## Foreword

The Hungarian World Encyclopedia is a collection of Hungarian-related issues, themes, events and persons. It attempts to present Hungarian history, culture and individuals who also shaped the life of the world throughout more than thousand years of history. It provides a cross-section of the Hungarian culture and presents the treasures of Hungarian heritage. Doing so, we believe, is an important contribution to the cultural wealth of mankind.

This Encyclopedia pays homage to those who served or are serving the public and contribute to the development and welfare of the nation and the world. Unfortunately only a fragment of important Hungarian historical events, cultural achievements and their eminent representatives are included in this work. Alas, much more was left out than could have been included in this work.

Language not only links, it also separates peoples and nations. Latin was the lingua franca of the literati in Europe well after the end of the middle ages. The gradual separation of peoples and their culture started with the emerging national languages. Hungarian, unrelated to Romance, Germanic or Slavic languages, gradually separated the Hungarians from the rest of the world. This is the reason why Hungarians remained mostly unknown or misunderstood in many ways. Since the world wars of the 20th century Hungarians scattered around the planet. Today 2.5 million live in the neighbor countries, 2.5 million in the western world and only 10 million in their own homeland. Despite all the adverse effects of forced separation, Hungarians represent one nation, one culture and one heritage. The realization that so little is known about Hungary and Hungarians is the motive behind this work. Especially since the facts are most often inaccurate and at times distorted. This work attempts to rectify this situation.

So far no one has ventured to publish a modern Hungarian Encyclopedia in English, French or German. Most probably it is due to a proud, old Hungarian attitude that “If one wants to know more about Hungarians – learn the language!” Unfortunately the world did not learn Hungarian and we remained mostly unknown to the world. This Encyclopedia is an attempt to bridge the gap.

The Hungarian World Encyclopedia has some 6000 entries which based on a number of available resources. At the end of each entry the letter “B” and the subsequent numbers indicate their bibliographical sources, and the letter “T” followed by its number specifies the translator’s name, and there are also cross-references. All the names of the entry-writers, data-providers, chief contributors as well as text editors are listed in the Introduction, and the Bibliography, Rulers, Maps, etc., in the Appendix.

The Hungarian World Encyclopedia is the work of more than a hundred volunteers from all over the world. From Hungary and its detached historical territories: Transylvania (now in Romania), Northern Upland (now in Slovakia), Sub-Carpathia (now in Ukraine), Southland (Vojvodina, now in Serbia), and the Hungarian Diaspora of Australia, Canada, Finland, Germany, the Netherlands, Italy, Switzerland and the USA. To sum up: this Encyclopedia is the result of a combined effort of Hungarian experts worldwide.

We are grateful to the State Secretariat for National Policy of the Ministry of Justice, Budapest for sponsoring the CD edition of HWE, and for the technical support of the Corvinus Library, Hamilton, Ontario, Canada.

Canada and Hungary, 31 December 2012.

Dr. Joseph Pungur  
Editor-in-Chief

## CO-WORKERS

### EDITOR-IN-CHIEF

Pungur, Joseph PhD, MDiv, MMus

**GEORGE FALUDY:  
ODE TO THE HUNGARIAN LANGUAGE**

(A free, partial translation by Éva Kossuth on the occasion of Hungary's millecentenary.  
Vancouver, 1996)

As violet twilight darkens my lodging  
I see before me St. Gellért's handmaiden,  
on whose lips on an ancient evening  
song burst forth in Hungarian.  
Her Magyar face is distant and fading –  
yet, some secrets we must still be sharing:  
for her song flows through my every pore  
on a distant shore.

Magyar tongue, my loyal mate in life,  
you gave comfort to my wounded pride;  
through loss, suffering and adversity  
you were the promise, a brighter destiny  
Attack me with guns or accusations:  
I shall be armed with alliterations  
Each ancient, vibrant verb  
protects me in every nerve.

Your melodious vowel harmony  
will stay with me through eternity  
Those sturdy nouns, so vain and proud,  
possessive endings, like greedy Counts.  
Your gay adjectives and playful similes  
stood guard over us through the centuries.  
In each word I see your physiognomy,  
tormented Hungary.

It's the speech of Árpád's people,  
and not that of the Latin scribbler,  
nor the chatter of foreign barons,  
but the prayer of toiling peasants.  
Magyar tongue! Can you withstand the gale?  
You're our future, stand firm and hale!  
Your soft sounds cover the nation's face  
like St. Veronica's veil.

Magyar speech, so flowing and vivid:  
you bubble, like our rebellious spirit.  
We lost at Buda, Mohács and Muhi –  
but church bells still toll for Hunyadi's victory!  
Unfulfilled promises and burning desires,  
a brighter future, or fateful disasters;  
Tokaj's wines, ancient songs: they're all  
in one sobbing tárogató-call.

## HOW TO FIND A WORD ARTICLE:

1. Put the CD in the DVD/CD Drive of your computer,
2. Double Click on the TITLES file and FIND or SELECT a TITLE, HIGHLIGHT it and click: COPY,
3. Go to the relevant WORD FILE and open it (A, B, C, etc),
4. Go to the 'FIND' box of your computer and open it.
5. After the 'Find and Replace' Box appeared, copy the SELECTED TITLE in it,
6. Then click on its 'Find Next' or the 'Main Document' in the 'Find in' Box,
7. The searched Word Article will appear on the screen.
8. In similar manner items/titles in the INTRODUCTION and APPENDIX can be found.

## A

**Aachen Hungarian Chapel**, Germany – A chapel built as an addition to the Cathedral of Aachen, Germany, a pilgrimage site. The quadrangular chapel, one of six chapels, is built next to the cathedral (with an octagonal basilica and a cupola, built by Charlemagne in 796). King Lajos I (Louis the Great) (1342-1382) built the original Hungarian chapel in 1367 that had become a pilgrimage site. In 1381 the king sent Ulrik, Abbot of Pilis to look after it. The original chapel was destroyed by fire and a new one was built in Baroque style in the 18th century. The Habsburg king and emperor József II (Joseph) (1780-1790), due to his antireligious sentiments, ordered the pilgrimages to cease; but later they were resumed. In the chapel there are statues of Kings István I (St Stephen, (997-1038), László (St Ladislav) (1077-1095) and Prince Imre (St Emeric) (1007-1031). Some pieces of the original treasury, such as two candelabras and the silver coat of arms of King Lajos I, as well as those of the Anjou kings are now kept in the treasury of the cathedral. Memorial tablets of famous visitors decorate the walls of the chapel. Hungarian pilgrims regularly visit the chapel. – B: 1133, 1085, 1020, 7456, T: 7617, 7456.→**István I, King; László I, King; József II, King.**

**Aba** – An ancient Hungarian male name, meaning father. As a male name it was particularly popular in Hungary in the 11th to 15th centuries; it became popular again in the 19th century. Related names include *Abad*, *Abod*, *Abony*, *Abos*, and *Abosa*. – B: 2006, T: 7456.→**Aba, Clan.**

**Aba, Clan** – One of the oldest Hungarian clans. According to tradition they were descendants of Attila the Hun, as well as Edömér, the powerful Kabar tribal leader. Their large holdings were in Counties Abaúj, Borsod and Heves. From this clan descend some of the noble families of Hungary, among them the Báthory, Bethlen, Lipóczy, Nekcsey, Keczer, Rhédey, Somosy, Sirokay, etc., families. The origin of the name Aba can also be traced to Anonymus' *Gesta Hungarorum* in the form of "Oba" meaning "well-meaning, benevolent". Aba is also the name of a town in County of Fejér, near Székesfehérvár. – B: 1133, 1388, T: 7617.→**Aba; Kabars; Abaúj County; Aba, Sámuel; Attila; Anonymus; Gesta Hungarorum.**

**Aba Novák, Vilmos** (William) (Budapest, 15 March 1894 - Budapest, 21 September 1941) – Painter and graphic artist. In 1912 he studied at the Academy of Fine Arts in Budapest. In 1922 he had his first graphic art exhibition at the Ernst Museum, Budapest. Farmers' markets and circus scenes were his favourite subjects, dominated by expressionism and the Italian *novocento* art form. From 1928 for the next three years he worked in Rome at the Hungarian Academy. His Italian experience left its mark on his works. In 1933 he painted the fresco at the Roman Catholic Church in Jászszentandrás; and in 1936 finished the *Hero's Gate* in Szeged, a work that was painted over in 1945 for political reasons but since restored. His other works include *The Light (A fény)* (1925); *Road Laborers (Kubikusok)* (1926); *Baptism of Christ (Krisztus megkeresztelése)* (1931), and *Sekler Market (Székely vásár)* (1939-1940). He was one of the artists who painted monumental pictures. He taught in the Academy of Applied Art, Budapest, and was hailed as a popular artist between the two World Wars. Several exhibitions of his works were organized posthumously. Many of his paintings have found their way into public

and private collections. He won the *Grand Prix* at the Paris World Fair in 1936. – B: 0883, 0934, T: 7653.→**Ladányi, Imre.**

**Aba Sámuel** (Samuel Aba) – King of Hungary (1041-1044) and Lord of Transylvania (Erdély, now in Romania). According to tradition he was a descendant of *Edömér*, the Khabar tribal leader and ancestor of the Aba clan. His father was the Palatine of Hungary. Aba was married to Sarolt (Sarah), a younger sister of King István I (St Stephen) (997-1038). When insurrection broke out in 1041 against the despotic king Peter Orseolo, Aba was elected king. However, Peter turned to the Holy Roman Emperor Henry III for help. Henry defeated Aba in 1042 and then withdrew his forces. During that winter Aba's army sacked the German city of Tulln; whereupon the Emperor attacked Hungary once again and forced Aba to relinquish his ownership of the Vienna Woods. This had a demoralizing effect on his followers, who secretly began to conspire to reinstate King Péter. Upon learning of the plot, Aba had 50 of the conspirators executed and banished the rest of them from the realm. For this Gellért (St Gellért), Bishop of Csanád took him to task and refused to crown him at Easter. However, the rest of the clergy supported the king, not wanting to give the impression of national disunity. Some of the banished nobles fled to Germany and called on Henry and Peter. Then on 5 July 1044, due to treachery, Aba was defeated at the Battle of Ménfő and had to flee. He rode eastward to join his supporters by the River Tisza and gather an army. His enemies caught up with him at the town of Füzesabony and he was killed. They buried him at the same monastery he established at Sár (today, Abasár). Consequently, Péter was put on the throne with German help and for a while Hungary became a vassal of Germany. According to local legend, when Aba's coffin was opened a few years later his wounds were healed. This demonstrates Aba's popularity among the common people. – B: 0883, 1388, 1389, T: 3312, 7617.→**Aba Clan; Kabars; Kaliz; István I, King; Orseolo, Peter, King.**

**Aba Scythians** – In the times of Homer (ca. 8th century BC), they lived in the Carpathian Basin and after an absence of 1600 years they returned there; they were supposed to have been descendants of Attila the Hun, as well as of Edömér, the powerful Kabar tribal leader. In the Iliad they were called *Abio Scythians* and considered the most righteous of mankind, who fought on the side of Righteousness. In all probability, well before Attila, these Aba Scythians, together partly with the Huns and Árpád's Magyars, entered or returned to the Carpathian Basin; with the latter came also the Indo-European Kaliz of Islamic faith, originally from Chorezm, who spoke a language similar to Middle Iranian. Abu Hamid al-Andalusi al-Garnati, who traveled to Hungary, wrote in 1151, that thousands of the descendants of the Chorezmians lived there serving the king. Publicly they were Christians, keeping their Islamic faith secret. They were the managers of the Royal Treasury and worked as minters. Their name survived in place names like Kál, Káló, Kalász, Kálóz, and Kálózd. Also, according to ancient Hungarian chronicles, the Chorezmian clan (*de gente Corosima*) joined the Magyars just before the Carpathian conquest (895 AD); these must have been the Kabars of Aba Scythian origin and various other ethnic fragments, all of whom gradually merged with the Magyars. The *heros eponymos* of the Aba Clan who traced their genealogy to Chorezm, was King Aba Samuel (1041-1044). – B: 1906, T: 7456.→**Kabars; Scythians; Chorezm; Huns; Kaliz; Aba Sámuel.**

**Abádi, Benedek** (Benedict) (First half of the 16th century) – Printer, Protestant preacher. In 1534 he studied at the University of Krakow, Poland, where he also learned his printing skills at János Vietor's flourishing printing press. Tamás (Thomas) Nádasdy founded a printing shop at Újsziget. Here, Abády printed János (John) Sylvester's *Grammatica Hungaro-Latin*; and in 1641 he printed János Sylvester's *New Testament (Új Testamentom)*, the first Hungarian language book printed in Hungary. Mátyás (Matthias) Dévai Bíró's *Ortographia Ungarica* was printed under his supervision with his foreword. Subsequent to the closure of the Újsziget printing press, he became a student at Wittenberg in 1543 and was ordained there in 1544. He was a Protestant minister first in Eperjes (now Prešov, Slovakia) and later, between 1545 and 1552, in Szeged. – B: 0931, 1031, T: 7666.→**Nádasdy, Baron Tamás; Sylvester, János; Dévai Bíró, Mátyás.**

**Abauj County** – Its name is derived from the Aba clan who settled in the valley of the Hernád River during the years of the Carpathian conquest; they built the fort of Abaújvár in 1038. The famous battle of Rozgony of 1312 took place in this county. Up to the 14th century the seat of the county was Abaújvár, later it became the fast developing Kassa (now Košice, Slovakia). – B: 2006, T: 7456.→**Aba, Clan.**

**Ábel, András** (Andrew) (Sóskút, 19 February 1931 - ) – Engineer. On completion of his high school studies in 1949 at the Árpád High School, Budapest, he enrolled in mechanical engineering at the Polytechnic of Budapest. After two years of compulsory study for all engineering students, specialization followed, culminating in graduation from Aeronautical Engineering. In his first job at Budaörs he was engaged in development projects relating to military applications such as antitank weaponry, serving the Soviet markets. During the 1956 Hungarian Revolution he became chairman of the Workers' Revolutionary Committee at his workplace and actively took part in the freedom fight. After its defeat he became a refugee and started a new life in England working as an engineer by day at Murex Ltd. and as barman at night. In 1960 he enrolled as an external student at the University of London to study economics and political science more as a hobby than a desire to change profession. On acquiring a scholarship for full time study at MacMaster University, Hamilton, Ontario, he left for Canada in 1962 to work on the fatigue of aircraft materials. After obtaining an MSc Degree in metallurgy he was invited to Australia by the University of New South Wales as a teaching fellow, where he completed his Ph.D. studies in "fatigue". In 1969 he joined the University of Sydney as temporary lecturer and served in the Civil Engineering Department until his retirement at the age of 70. Since his official retirement the University has engaged him in an honorary position of lecturer and consultant. From 1975 to 1976 he spent a year in Stuttgart, Germany on a Max Plank Fellowship and worked on single crystals in the Low Cycle Fatigue area. His research on fundamental and applied topics resulted in over 100 publications, and invitations to lecture on five continents. Three of his publications appeared in the *Philosophical Magazine*. He is founding member and director of the International Society of Offshore and Polar Engineers. He is a fellow member of six learned societies in England, Australia and the USA. He published three books in his native language and was awarded a Golden Diploma from the Polytechnic of Budapest. He also received two awards for his work and contributions. – B&T: 1084.→**Freedom Fight of 1956.**

**Abeles, Peter Sir** (Emil Herbert Abeles) (Vienna, Austria, April, 25 1924 - Sydney, Australia, June 25 1999) – Economist. He was born in Austria of Jewish parentage but lived in Hungary. In Budapest he attended the Fásor Evangelical (Lutheran) Secondary School. In 1949, just at the time of the Communist takeover, he emigrated to Australia. His success story began with “Samson and Delilah”, two small run-down second-hand trucks in the drayage business. In 1950 he founded the Alltrans Pty Ltd Transport Co. that in 1967 was taken over by Thomas Nationwide Transport Ltd (TNT), an international transport empire stretching over 180 countries. He became managing director and deputy chairman of TNT, and chairman of Ansett Airlines of Australia owned jointly by TNT and Rupert Murdoch’s News Corporation. Eventually he became president of the Australian Cancer Research Foundation. He was an advisor to the Australian government and a prime mover of that country’s economic life. He was knighted in 1972. – B: 0883, 1031, T: 7680.

**Abódi Nagy, Béla** (Székelyszenterzsébet, now Eliseni, Romania, 13 July 1918 - ) – Transylvanian painter (*Erdélyi*, now in Romania). He studied at the Academy of Fine Arts, Bucharest, 1940, and at the Academy of Fine Arts, Budapest, 1942. In 1942 he became a teacher at Kolozskovácsi (now Faueni, Romania); later a POW in the Soviet Union (1944-1948). From 1949 until his retirement in 1983, he taught at the Academy of Fine Arts in Kolozsvár (now Cluj-Napoca, Romania). Among his paintings are *In Church (Templomban)* (1943), *Waiting for Godot (Godotra várva)* (1967), *Cheerfulness (Vidámság)* (1970), *Source (Forrás)* (1980), and *Where to? (Hová?)* (1991). He also illustrated books and painted portraits of classical writers. He exhibited in several countries, among them in the Soviet Union, Poland, Hungary, Czechoslovakia, East Germany, Italy and Egypt. He received Romanian honors, such as the Order of Labor Medal (1954), State Prize (1954, 1955), and the Cultural Order of Labor (1968). – B: 1036, T: 7103.

**Abódy, Béla** (Budapest, 14 June 1931 - Budapest, 17 August 1990) – Writer, reviewer, literary translator. He studied philosophy at the University of Budapest (1949 - 1953). He started publishing his writings, literary and music reviews in 1948. During the years 1955-1957 he was literary manager at *Magvető Publishers*. After working as a primary school teacher for several years, he became a contributor to the literary review *Life and Literature (Élet és Irodalom)*. In 1962 his drama *Investigation (Nyomozás)* was presented at the Gárdonyi Theater (*Gárdonyi Színház*), Eger. In 1965 the Jókai Theater (*Jókai Színház*), Békéscsaba, performed his play *Családi Kör (Family Circle)*. From 1970 he worked for the Budapest Opera House, publishing its Opera Guide and writing articles and reviews of singers and performances. Between 1971 and 1975 he was director of the *Comedy Theater (Vígshízház)*, Budapest. He found his forte when he worked at the Hungarian Radio and Television. In 1978 he launched the periodical *Four Seasons (Négy Évszak)*, editing it until 1985. From 1987 until his death he was editor-in-chief of *Pallas Publishers (Pallas Könyvkiadó)*. His translations were mainly from English classics. His works include *Dialogue with the Saint (Párbeszéd a szenttel)*; *Short Stories* (1960), and *The Fourth Quarter (Negyedik negyed)*, autobiography (1981). He received the Attila József Prize in 1973. – B: 0883, 0878, 1257, T: 3240, 7103, 7456.

**Ábrahám, Dezső** (Desider) (Old, 1920 - Roebling, NJ, USA, 7 October 1997) – Reformed prelate in the USA. He completed his secondary school education at Kiskunhalas in 1938; then enrolled at the Reformed Theological Academy in Budapest. He first served in the rural community of Soltvadkert. A year later he was transferred to Fót, and from there went on to serve in the Calvin Square Church, Budapest. He took an active part in missionary work amongst young people. He was a member of the Soli Deo Gloria Youth Organization (*Soli Deo Gloria Ifjúsági Szervezet*), the Young Men's Christian Association (YMCA) (*Keresztyén Ifjúsági Egyesület – KIE*) in Hungary, as well as the *Boy Scouts*. He served as Secretary of the YMCA in 1945-1946. At the end of World War II he received a scholarship from the Church of Scotland to study in Glasgow. In 1947 he received an invitation from Princeton Theological Seminary in the USA. From there he visited the Hungarian congregations in the vicinity, gathering statistical data for a study he published under the title *A Short History of the Hungarian Reformed Christian Communities in the United States (A magyar református keresztyénség rövid története az Egyesült Államokban)* that served as the thesis for his Master's Degree in Theology. In 1948 he became minister of the Hungarian Reformed Church in Roebling, NJ. In 1954 he received a call from the Hungarian congregation of Perth Amboy, NJ, where he served for 20 years. Between 1957 and 1967 he edited the official paper of the American Hungarian Reformed Church. On 16 June 1968 he was installed as Bishop of the American Hungarian Reformed Churches, a post he held for 18 years. One of his many achievements was the publication of a revised *Constitution and the Book of Rules*. Between 1974 and 1988 he served the largest American Reformed congregation, the Allen Park Church in Michigan, from where he retired. He was Director, later Vice-President of the American Hungarian Reformed Association, a member of the American Hungarian Foundation, and a contributor to Radio Free Europe. He received an Honorary Doctorate from the Reformed Theological Academy, Budapest (1990). – B: 0906, T: 7617.→**Soli Deo Gloria; Young Men's Christian Association; Reformed Churches in America.**

**Ábrahám, Pál** (Paul) (Apatin, now Serbia-Montenegro 2 November 1892 - Hamburg, Germany, 6 May 1960) – Composer. He studied music at the Ferenc (Franz) Liszt Academy of Music, Budapest. He was a bank-clerk for a time. In 1928 he became conductor at the Operetta Theater (*Operett Színház*), Budapest. His operettas, such as *Rose of Hawaii (Hawai rózsája)* (1931), *Ball in the Savoy (Bál a Savoyban)* (1931), and *Viktória* were successful at home and abroad. He moved to Berlin; but in 1933 was forced to leave for political reasons and went to the United States. His career was broken and he fell into a state of dementia. After years of treatment he returned to Germany and settled in Hamburg. Some of his works were filmed, e.g. *Happy Hearts (Boldog szívek)* (1932) and *Antonia* (1935). His operettas are still popular worldwide. He belongs to the line of the great Hungarian operetta composers of J. Huszka, Sz. Fényes, F. Lehár and V. Jacobi. – B: 0883, 1427, T: 7103.→**Lehár, Ferenc; Jacobi, Victor; Huszka, Jenő; Fényes, Szabolcs.**

**Ábrányi, Emil** (Pest, 31 December 1850 - Szentendre, 20 May 1920) – Poet, journalist, translator of literary works. He published his first poem in 1866. From 1873 he worked for the *Pest Journal* (*Pesti Napló*); from 1879 for *Hungary* (*Magyarország*), and from 1896 for the *Budapest Journal* (*Budapesti Napló*). From 1904 to 1907 he was permanent contributor to the daily *Sun* (*Nap*). In 1889 he was elected Member of Parliament. He was a member of the Petőfi Association from 1876, and between 1880 and 1890 he was second secretary of the Association. In 1885 he became a member of the Kisfaludy Association and edited the weekly *Wreath* (*Koszorú*). His poems had a great effect on the country's youth at the end of the 19th century. His literary translations are still considered classics, the most important ones being Byron's *Don Juan* (1892); Rostand's *Cyrano de Bergerac* (1898), *The Eaglet* (*L'Aiglon – A sasfiók*) (1903). His poetry includes *His Poems* (*Költeményei*) (1876); *His Newer Poems* (*Újabb költeményei*) (1882); *Freedom, Country* (*Szabadság, Haza*) (1888); *Songs of March* (*Márciusi dalok*) (1899), and *His Selected Poems* (*Válogatott költeményei*) (1903). – B: 0883, 1257, T: 3240.

**Abrudbánya, and Massacres of** (now Abrud, Transylvania in Romania) – A mining town and important transportation junction with a population of more than 5,000, situated 600m above sea level. Even before the Romans it was famous for its gold and silver mines. Its Roman name was *Ambrutus*. It was a wealthy town during the era of the Hungarian Principality of Transylvania (16th and 17th centuries). On 7 November 1784, Vlach (original name of Romanians) freebooters of Hora and Kloska massacred its Hungarian population. On 9 May 1849, Iancu's Vlachs ransacked and burned the town and killed the Hungarian population. This time only a small part of the population survived. – B: 1133, 0883, T: 7672. → **Vlach, The; Atrocities against Hungarians.**

**Academic Legion** – A special force of the Viennese university students, who participated in the 1848 Viennese uprising. It was in their assembly hall that demands were first made public on the 12th of March for free speech, freedom of the press and religion and, above all, the freedom to study. Next day the Legion was formed and was armed from the public arsenal. After the suppression of the uprising the student troops, about one hundred in number, escaped to Hungary, and under the command of General Bem were incorporated into the Transylvanian (*Erdély*, now Romania) army and fought in the 1848-1849 War of Independence. – B: 1078, T: 7668. → **Freedom Fight of 1848-1849; Bem, József.**

**Academy of Sciences, Hungarian** (*Magyar Tudományos Akadémia, Budapest, MTA*) – The highest Hungarian scientific organization. Before its foundation in 1825, attempts had been made, both in Hungary and in Transylvania, for at least two hundred years, to establish a learned society of Hungarian researchers and scholars. Some of the attempts were thwarted by the Habsburg rulers who encouraged such efforts mainly in the Austrian parts of their empire. However, in 1825, Pál (Paul) Felsőbüki Nagy made such an influential speech at the Diet of Pozsony, (now Bratislava, Slovakia) – seat of the Hungarian Parliament at the time – urging the foundation of an organization to refine the Hungarian language and to help science flourish, that Count István (Stephen) Széchenyi, one of the wealthiest magnates, son of Count Ferenc (Francis) Széchenyi, offered one year's income from his large estate for the purpose. Other magnates followed his example, and in 1827 a law was passed by Parliament for the establishment of the

Academy with six departments, those of linguistics, philosophy, history, mathematics, science, and law. The king, after some delaying maneuvers, at last confirmed the law in 1830, and the Academy began to function.

During its first period it had 42 regular and 24 honorary members, and an indefinite number of correspondents, all of them elected by the general assembly and directed by a Board of 25 that represented the four estates of the feudal society. It soon became the motor of scientific and cultural life in Hungary, launching great undertakings one after the other, like publishing the Rules of Hungarian Orthography, the Great Hungarian Dictionary and the Collection of Ancient Hungarian Texts, starting different scientific journals, financing scientific research projects, distributing scientific, literary and artistic awards, publishing school textbooks, bilingual dictionaries, and translations of important foreign works, etc. Its first President was Count József (Joseph) Teleki, its Vice-President Count István Szécheny, its General Secretary Gábor (Gabriel) Döbrentei.

During the 1848-1849 Revolution and War of Independence, the Academy greeted the abolishment of censorship and made its sessions public. When the united Austrian and Russian armies defeated the Hungarian forces, several academicians were imprisoned. During the oppressive absolutist rule that followed, new members could not be elected nor could general sessions be held until 1858. The nation however strived to maintain the spirit of freedom by concentrating on making the arts and sciences flourish in the country, and the Academy became the leader of these efforts. In 1859, a campaign was launched to raise money for a home for the Academy, which until then held its sessions in the National Museum. The construction of a fine neoclassical palace for the Academy on the banks of the Danube in central Budapest was completed in 1864. It houses, in its magnificent assembly hall and fine office and research rooms, the second largest library in Hungary and a number of valuable collections of art and science, as well as the original manuscripts of many Hungarian scientists, explorers, writers of fiction, poetry, drama and music.

In 1870 the Academy adopted new regulations reducing the number of departments to three: (1) Linguistics and Arts, (2) Philosophy and Social Sciences, and (3) Mathematics and Natural Sciences, with altogether 240 members (26 honorary, 64 regular and 160 corresponding), plus a 26-member Board of Directors. Continuing and extending its original activities, the Academy became one of the most important centers of the sciences and arts in Europe, its members contributing to the advance of European civilization with outstanding discoveries and inventions (e.g. the principle of the dynamo discovered by Ányos Jedlik, the proof of the proportionality of inertial and gravitational mass by Count Loránd (Roland) Eötvös, the carburetor of internal combustion engines of Donát Bánki, etc.). However, their most important contributions were in the fields of Hungarian culture, history, linguistics, and arts.

In the first part of the 20th century, before the Second World War, the Academy continued to function as the most important center of scholarship in Hungary, publishing countless studies and essays in all fields of science and culture, nurturing the advancement of knowledge with its numerous publications and periodicals that were printed and published by its own publishing firm. A brief exception was the short lived Communist dictatorship of 1919 in the wake of the First World War, when the dictatorial government took on the managing of the Academy and excluded all the members who expressed their disagreement with the deeds and ideas of Communism. After their fall, the leader of the new democratic regime, Regent Miklós (Nicholas) Horthy, gave all his

help to the Academy to regain its self-government and financial independence, so that high standard scientific and cultural work could continue.

Shortly after the Second World War, it was again reorganized after the second communist takeover of 1949, which occurred as a result of the Russian Red Army occupying Hungary and remaining there in accordance with the 1945 Yalta Agreement between the Western Powers and Russia. Again, all members expressing disagreement with communist ideology or being labelled as “idealists” or “bourgeois thinkers” were excluded, deported, imprisoned, or executed, with such great names among them as professor Ferenc (Francis) Orsós, the great anatomist, professor Bálint (Valentine) Hóman, the great historian, and many others. Still others had to flee the country to avoid harassment, like Albert Szent-Györgyi, the Nobel Prize winner biologist, or János (John) Selye, proposer of the “stress” theory in psychology.

As a result of its reorganization, the Academy lost its independence and became an organ of the Hungarian Communist Party, with the Academy’s party secretary as the most important person, and with many new members whose only merit was their association with the Party. The Arts Department was terminated, and the Academy was given administrative functions to become a sort of “ministry of science” of the Communist government. Still, life did not stand still, and as years passed the old members who managed to stay, together with their disciples, slowly raised the standard of scholarship in and outside of the Academy as high as circumstances could allow, and much valuable scientific work was carried out by Academicians or under their management. Many institutes were established under the auspices of the Academy to function as centers of a certain field of study, as e.g. Institute of History, Institute of Mathematics, Institute of Musicology, etc. These usually have their headquarters in Budapest, some of them with offices in other cities as well.

Beginning with the late 1980s, a reform process began to take place with the proposal of a new set of laws for the Academy. In 1989, many of the members, excluded and persecuted by the Communist Party, were rehabilitated. In 1990, new by-laws were adopted and the Academy did not function any longer as an administrative organ of the government. In order to rehabilitate the most outstanding members of the Arts Department that was terminated in 1949, the Academy initiated the establishment of an associated but mainly independent institution for the cultivation of Arts and Literature, as a result of which the Széchenyi Academy of Literature and Arts (*Széchenyi Irodalmi és Művészeti Akadémia*) has come into being. The culmination of the reform process was the codification of the new Academy’s laws and its enactment by Parliament in 1994, which also made new by-laws necessary. The 40th Law of 1994 says that the Hungarian Academy of Sciences is a self-governed public institution for the sciences, whose main functions are the cultivation of science and art, the dissemination of the achievements of science, the promotion of research work, and the representation of Hungarian scientific life. – B: 0961, 7696, T: 7696. → **Most of the persons and events have their own word entry; Yalta Conference.**

**Ács, Károly** (Kovács) (Charles) (Szabadka now Subotica, Serbia, 8 September 1928 - Cologne, Germany, 3 July 2007) – Hungarian poet, translator of literary works of the Voivodina region (*Vajdaság*, now in Serbia). He studied in his hometown, where he graduated in 1947. He read law at the University of Belgrade, where he worked as text-editor and literary translator. In 1951 he moved to Újvidék (now Novi Sad, Serbia),

where he was a contributor to the journal *Hungarian Word* (*Magyar Szó*) until he became editor-in-chief of the magazine *Bridge* (*Híd*) (1965-1975). Until his retirement he was editor at the Book Publishing Co. (*Könyvkiadó Vállalat*). In the early 1990s he moved to Cologne, Germany. His works include *Hand on the Door Knob* (*Kéz a kilincsen*), poems (1953); *Smoke of Song, Song of Smoke* (*Ének füstje, füst éneke*) (1976), *The Naked Clown* (*A meztelen bohóc*), *Essays* (1992). Among his literary translations is *Song of our Days*, vols. i.ii. (*Napjaink éneke, I, II*), an anthology of Yugoslav poetry (1965, 1967). Among his prizes are the *Híd Literary Prize* (1960), the *Prize of the Alliance of Yugoslavian Translators* (1973), and the *Life Prize of the Society of Writers of Vajdaság* (1991). – B: 0878, 1169, 1257, T: 7103.

**Ács, Mihály Jr** (Michael) (28 February 1672 - Kassa, now Košice, Slovakia, 28 April 1710) – Lutheran pastor, writer. He was a pietist theologian; studied in Győr, Strassburg, Tübingen and Wittenberg. He was headmaster at Győr from 1702, and a preacher from 1704 at Vadosfa in County Sopron; from 1706 at Rozsnyó (now Rožňava, Slovakia), and concurrently a pastor at the courts of *Kuruc* noblemen; he became a schoolmaster at Bártfa (now Bardejov, Slovakia) in 1709, and a preacher at Kassa in 1710. His main works are two university disputations from Strassburg, a funeral oration from 1708; *Hungarian Theology* (*Magyar theologia*) (1709); *The Cart of Happy Death* (*Boldog halál szekere*), and a book of prayers published by his father, Mihály (Michael) Ács Sr. in 1702. – B: 1050, 1517, T: 7456. → **Kuruc**.

**Acsády, Ignác** (Ignatius) (until 1875 Adler) (Nagykároly, now Carei, Romania, 9 September 1845 - Budapest, 17 December 1906) – Historian. After studying law he worked from 1869 as a journalist at the *Pest Journal* (*Pesti Napló*), *Great Plain* (*Alföld*) and *East* (*Kelet*). His comedy and novels point to romanticism. His historiographical work began in 1877 amidst growing interest in the economy and social history characterized by a progressive sympathy toward the peasantry. He was the first among the Hungarian historiographers to recognize the importance of social struggle. He wrote the first comprehensive history of the feudal tenants. His most important works are *In the Country of Gold* (*Aranyországban*) comedy (1880); *Marriage for Money* (*Pénzházasság*) (1893); *Hungary in the Time of the Reconquest of Buda Fortress* (*Magyarország Budavár visszafoglalása korában*) (1886); *History of Hungary's Division into Three Parts 1526-1608* (*Magyarország három részre oszlásának története, 1526-1608*); *History of the Hungarian Empire*, vols. i, ii (*A magyar birodalom története, I-II*) (1903-1904), and *History of the Hungarian Serfs* (*A magyar jobbágyság története*) (1906, 1944, 1948, 1950). He was a member of the Hungarian Academy of Sciences (1888). – B: 0883, 1257, T: 3240. → **Reconquest of Buda in 1686**.

**Actio Catholica** (Catholic Action) – The aim of the organization was the participation of the laity in the apostolic work of the clergy. Its activity embraced the fields of the apostolic mission of the Church. As such, it differs from other societies and associations that are active in other fields. Its origin was in the *Firmo sane* encyclical letter of Pope Pius XI, and in *Ubi arcano Dei* encyclical letter of Pope Pius XII. Participation in its work was not compulsory, although every Catholic was its member in principle, while in practice it depended on the spiritual gift of the individual. This organization differs from country to country. There is only one stipulation: the participants had to collaborate with

the clergy. In Hungary it was established on 19 October 1932. Its founding organizations were the congregations encompassed by the council of district deans constituting the national organization. There were five departments at every level: (1) faith and moral defense (2) culture (3) press (4) social and charitable (5) organizational. Its programs were set up by the yearly conference of bishops. Following the Communist takeover in 1948, the *Actio Catholica* was dissolved together with other religious organizations. Only its presidium remained with limited activity: it organized the consecration of bishops and published the Catholic periodicals *Teológia*, *Vigilia* and *New Man (Új ember)*. It also organized religious broadcasts and dealt with the import-export of ecclesiastical items. It was dissolved on 19 February 1990. – B: 1143, T: 7103.→**Catholic Church in Hungary, History of.**

**Aczél, György** (George) (Henrik Appel) (Budapest, 31 August 1917 - Vienna, 6 December 1991) – Cultural politician of the Kádár regime. Raised in an orphanage, his working career began as a construction worker. He was a self-educated man, who was devoted to learning. First he joined the *Sho-mer* Zionist movement, and then entered the Communist Party in 1935. He had a talent for acting and studied at the Academy of Dramatic Art, Budapest; for a while he became an actor; he was an outstanding communicator. He was arrested in 1942 and sentenced to hard labor, but was later released. During the German occupation in 1944, he worked in the resistance movement and rescued hundreds of Jews. After World War II he worked for the Communist Party in various places, such as Budapest, as well as in Zemplén and Baranya counties. He was a Member of Parliament in 1947-1949. In June 1949, he was arrested in connection with the László (Ladislav) Rajk political trials, imprisoned, then released in August 1954, and became manager of a construction company. He was in Vienna between 21 and 27 October 1956. Having returned to Hungary he joined the Partisan Association. On 31 October 1956, he participated in the founding meeting of the Hungarian Socialist Workers' Party (*Magyar Szocialista Munkáspárt - MSZMP*). He was in favor of Yugoslav-type neutrality and for further negotiations with Imre Nagy. In 1958 Aczél was not yet a member of the Political Committee that made the decision to execute Imre Nagy. For this he was not directly culpable and presumably this may explain his acceptance – however unwillingly – by Hungarian intellectuals. From April 1957 he worked in the cultural field first as deputy minister; but because of his friendship with János (John) Kádár, he soon became a towering figure of the Kádár regime, entrusted with pacifying the intellectuals in the aftermath of 1956. He was responsible for the manipulation of intellectuals, for the blackmailing the infamous three Ts writes (Ps in English) which translate as patronizing, permitting and prohibiting, the stick-and-carrot policy by which Aczél held sway over Hungary's cultural life for almost three decades. He served in a number of high-ranking offices, such as the Central Committee of the MSZMP, and until 1974, in the Political Committee of the Party. He also served as deputy prime minister. Toward the end of the 1980s, with the decline of the influence of János Kádár, his career also ended. He authored many articles and books. – B: 1111, 0157, T: 7103.→**Kádár, János; Rajk, László; Herzl, Theodor, Nagy, Imre.**

**Aczél, János** (John) (Budapest, 26 December 1924 - ) – Mathematician, a specialist in the area of functional equations. He completed his higher studies at the Department of Mathematics and Physics of the University of Budapest (1943-1947). He was assistant

professor at the University of Szeged (1948-1950). From 1950 until 1965 he gave lectures at the Heavy Industrial University of Miskolc and at the University of Debrecen. He emigrated to the West, and from 1965, he was professor at Waterloo University, Ontario, Canada until his retirement. He was a guest professor at universities in Austria, Australia, Japan, West-Germany, Italy, Spain, Switzerland and the USA. His major works include *Funktionalgleichungen der Theorie der geometrischen Objekten* (*Functional Comparisons of Geometric Objects*) (1960); *On Applications and Theory of Functional Equations* (1969); *A Short Course on Functional Equations Based upon Recent Applications to the Social and Behavioral Sciences* (1987), and *Aggregating Clones, Colors, Equations, Iterates and Tyles* (editor) (1995). He is also editor of a number of publications in his field. He is a recipient of a number of awards and prizes, a member of the Royal Society of Canada (1971), and an external member of the Hungarian Academy of Sciences (1990). The Universities of Karlsruhe, Germany; Graz, Austria; Katowice, Poland; Miskolc and Debrecen, Hungary (2003) bestowed an Honorary Doctorate on him. – B: 0974, T: 7103.

**Aczél, Tamás** (Thomas) (Budapest, 16 December 1921 - Boston, Mass. USA, 18 April 1994) – Poet, writer, journalist, literary translator. He joined the Communist Party and the Writers' Alliance after 1945. Soon he became one of the favorite writers of the new regime. From 1950 he edited the magazine *Star* (*Csillag*). In 1953 he joined the Reformist wing of the ruling party led by Imre (Emeric) Nagy. After the defeat of the 1956 Revolution, he escaped to the West and settled in England. From 1960 he was contributor to the *Literary News* (*Irodalmi Újság*), London. He moved to Switzerland in 1963; and from 1966 lived in the USA, where he was a university professor. Among his writings are *Song on the Ship* (*Ének a hajón*) poems (1941); *In the Shadow of Freedom* (*A szabadság árnyékában*) novel (1948); *About the Secret* (*A titokról*) poems (1956); *Revolt of the Mind* (in Hungarian *Tisztító vihar*) study with T. Révay (in English, 1959, in Hungarian 1960); *Ein aristokratischer Kommunist* (*An Aristocratic Communist*) (1963); *Ten Years After*, ed. (in English, 1966), *Le temps de la peur* (*The Times of Fear*) novel (1968), and *The Hunt* (*A vadászat*) novel (1991, Hungarian 1994). Some of his novels appeared also in other languages. He did translations of literary works as well. He was a recipient of the Kossuth Prize (1949) the Stalin Prize (1952) and the Imre Nagy commemorative plaque (1994). – B: 0878, 1257, T: 7103. → **Nagy, Imre**.

**Ádám, János S.J.** (John) (Pécs, 15 April 1927 - Miskolc, 15 April 2010) – Priest, educator, and organizer. He graduated from the Jesuit High School, Pécs in 1945 and subsequently entered the Jesuit Order and studied philosophy at the *Alojzianum*, Szeged, and in Chieri, Italy (1948-1951), after the Communist regime nationalized the Jesuit College of Szeged. At the order of the Jesuit Provincial of Rome he illegally fled Hungary for Austria by hiding for 18 hours in the bottom compartment of a sleeping car of the Orient Express. From 1952 he studied at the Catholic University of Leuven, Belgium and at Ludwig Maximilian University, Munich, obtaining his Ph.D. in philosophy in 1957. He was also a tutor at the high school of *Sankt Blasien*, Germany (1951-1952). He was ordained in 1961 after completing his theological studies at the Jesuit College, Toronto, Canada (1957-1961). He served as professor of Philosophy at Fordham University, New York, NY, USA (1961-1995). He was Assistant Provincial of the Hungarian Jesuits abroad (1961-1968), then Provincial (1968-1977). In 1994 he

returned to Hungary to become Assistant Provincial (1994-1995) then Provincial (1995-2001). In 2001 he became the spiritual leader of the Gyula Fényi Catholic High School, Miskolc. While his work as Provincial was demanding, he also strengthened Hungarian missions, launched a program for Hungarian neophytes abroad, and supported the Theological Little Library of the Priestly Unity (the all-embracing organization of Hungarian priests abroad), the Central European Research Institute, and the interdisciplinary studies in the Philosophy of Understanding, launched and maintained by Tibor Horváth S.J. – B: 0998, T: 7103.→**Horváth, Tibor S.J.**

**Ádám, Jenő** (Eugene) (Szigetszentmiklós, 13 December 1896 - Budapest, 15 May 1982) – Composer, conductor, music teacher. He was a student at a teachers' training school when World War I broke out in 1914, and was conscripted into the army. He became a POW in Russia where he organized a choir and orchestra and went entertaining from camp to camp. Having returned home he studied composition with Zoltán Kodály at the Ferenc (Franz) Liszt Academy of Music Budapest (1921-1925) and conducting with Felix Weingartner (1933). First, he taught at a city school; then from 1929 until his retirement in 1959, he was a Professor at the Academy of Music, Budapest. He taught a variety of subjects and achieved much success with the Academy Choir. At the request of Kodály he worked out the famous "Kodály Method", a new way of teaching music based on the solfège system. His radio and television lectures popularized the love of music. His compositions were closely related to folk music. His works include *Hungarian Christmas (Magyar Karácsony)* (1929); *Complaint and Festival (Panasz és ünnepség)* (1941); *Two String Quartets* (1924, 1931); *Songs of János Arany (Arany János dalai)* (1951), as well as choir pieces, songs, folk-song variations, and six film scores. He authored the books *From the Scale to the Symphony (A skálától a szimfóniáig)* (1943), and *On Music (A muzsikáról)* (1953, 1955). He received the Merited Artist title (1955), and the Kossuth Prize (1957). – B: 0883, 1257, T: 7103.→**Kodály, Zoltán.**

**Adams, Don** (New York City, 13 April 1926 - Los Angeles, Calif. USA 25 September 2005) – Actor. He was born Donald James Yarmy to an Irish Catholic mother and a Hungarian Jewish father. While fighting at Guadalcanal in World War II, he experienced a religious awakening and became a devout Roman Catholic. He became a commercial artist, also writing comedy material and working in small clubs. He married Adelaide Adams, a singer and adopted her surname as his stage name. He succeeded in appearing in major TV productions, including both Johnny Carson's and Steve Allen's *Tonight Show*, *The Perry Como Show*, *The Jimmy Dean Show*, and *The Bill Dana Show*. His greatest success was the TV show *Get Smart* (NBC, 1965-1969, CBS 1969-1970). It was revived as *Get Smart Again* in 1989. His success in directing *Get Smart* led to a post-Smart career as a director of commercials. In 1993, he made his debut with *Shreck*, a thriller about teenagers who resurrect a serial killer. – B: 1081, T: 7456.

**Áder, János** (John) (Csoma, 9 May 1959 - ) – Politician, lawyer. He read Law at the Law School of the University of Budapest and acquired his Degree in 1983. He worked at the Residence Exchange Department of the District VI Town Council, Budapest (1983-1984). From 1985 to 1990 he was co-worker at the Sociological Research Institute of the Hungarian Academy of Sciences, where he conducted research in political sociology and parliamentary procedures for drafting laws. He has been member of the political party

FIDESZ (Alliance of Young Democrats – *Fiatal Demokraták Szövetsége*) since 1988. He is the law expert of the Party, and Member of Parliament since 1990. He was the election campaign leader of his Party in 2002, President of the Party electorate, Vice-President of the FIDESZ, Vice-President and then President of Parliament from 1998 to 2002, and a member of parliamentary committees in several cycles. Between 2002 and 2006 he was the leader of the FIDESZ fraction of Parliament: Hungarian Citizens' Party (*Magyar Polgári Párt – MPP*). From 2009 he was FIDESZ's European Union representative in Brussels. In 2012 he was elected President of Hungary. – B: 0874, 1479, T: 7103. → **Alliance of Young Democrats, Hungarian Citizens' Alliance.**

**Adria Crude Oil Pipeline** – An oil pipeline extending from the Adriatic Sea through (former) Yugoslavia and Hungary to (former) Czechoslovakia. The participating countries designed the structure in 1973-1974 and commissioned it in 1978. It originates at the Yugoslav seaport of Omisalj, enters Hungary at Csurgó, touches the oil-refinery of Százhalombatta, and crosses into Slovakia at Turpa to join the Friendship I. Oil Pipeline (*Barátság I. Kőolajvezeték*). Its capacity is 10 million tons per year between Csurgó and Százhalombatta, and 5 million tons per year between Százhalombatta and Tupa. After operating below capacity until the late 1980s, due to uncertain Soviet oil supplies, it is now more efficient and is capable of processing the full volume of crude arriving through the line. The pipeline system is suited for the two-directional transport of crude. Since negotiating for more favorable oil transport contracts in 1991, Hungary's position has considerably improved. – B: 1137, 1020, T: 7674.

**Adventist Church** (Seventh Day Adventist, *Hetednapos Adventista Egyház*) – In Hungary the Adventist mission started in 1869 led by Michael B. Czechowski (1818-1876) a former Polish Catholic priest, followed by the German Louis Richard Condardi (1856-1839). In 1895 János (John) Rottmayer and his wife, both Baptist pioneers, were converted to Adventism and contributed to the growth of the Church. A Minister of the Reformed Church, József Szalay translated into Hungarian E. G. White's book *A Road to Jesus* that helped the Adventist cause. Since the community developed successfully, the Adventist World Organization sent János (John) F. Huenergardt to Hungary to organize the church that was only recognized in 1957. In 1890 István (Stephen) Kelemen was sent to the seminary of Friedensau, Germany, where he became the first ordained Hungarian Adventist minister. In 1902 the Austro-Hungarian Balkan Mission was set up. In that same year the Danube Union was formed. In Hungary the Adventists number about 4,500 baptized adult members; and with their relatives their number is more than double. There are 117 congregations served by 46 ministers and assisted by 31 retired ministers. There are 110 persons employed by the Church. The Church has a seminary, 2 diaconal institutions and a Conference Center. The Christian Adventist Community has 3 diaconal institutions. The Church accepts neither state financial contribution nor assistance from abroad for the upkeep of the church-ministry. – B: 1042, T: 7390.

**Ady, Endre** (Andrew) (Érmindszent, now Adyfalva, earlier Mecentiu, Transylvania, Romania, in former County Szilágy, 22 November 1877 - Budapest, 27 January 1919) – Leading lyric poet of the 20th century, also writer and journalist. Descendant of an old family of impoverished landed gentry (*Diósadi*); his mother came from a Calvinist minister's family. He began his studies at the Piarist High School of Nagykároly (now

Carei Romania) and completed it in the Reformed College of Zilah (now Zalău, Romania) in 1896. Already at this stage of his life he regularly published poems and writings in the paper *Szilágyság*, which was edited by Gyula (Julius) Kincs, the Principal of the College at Zilah. The first of these poems was entitled *20th March (Március 20)*. After passing the maturity examination he read Law at the University of Debrecen, later at Budapest, while serving as a law clerk at the Royal Court of Appeals in Temesvár (now Timișoara, Romania). On returning to Debrecen, from January 1897, he became a journalist for the local papers. In 1899 he published his first volume of poems entitled *Poems (Versek)*, with a foreword by Emil Ábrányi. Early in 1900 he moved to Nagyvárad (now Oradea, Romania), where he first became a contributor to the

journal *Freedom (Szabadság)*, later to *Nagyvárad Journal (Nagyvárad Napló)*. His sojourn at Nagyvárad exercised decisive influence on his development as a poet; the lively urban environment and the presence of other talented young writers there had a stimulating effect on him; this is shown strongly by his volume of poems *Once Again (Mégegyszer)*, published in the fall of 1903, in which his later poetic attitude is clearly set out. In 1901 he was imprisoned for three months for his revolutionary writing *A Small Walk (Egy kis séta)*. In 1902 his play *In the Workshop (A műhelyben)* was given its first performance at the Szigligeti Theater (*Szigligeti Színház*) of Nagyvárad. It was in the summer of 1903 at Nagyvárad that he became acquainted with his great love, Léda (Mrs. Ödön Diósy, née Adele Brüll), the wife of a Hungarian businessman living in Paris. It was largely because of his longing for her that he traveled to Paris in 1904. This journey, repeated several times until the beginning of World War I, was a decisive experience for him. The greatness of Paris, the French culture and freedom dazzled Ady and at the same time filled him with bitterness seeing Hungarian conditions viewed from Paris. Reading of the French poets, particularly Baudelaire and Verlaine, gave him encouragement to embark on displaying the novel and daring poetic spirit dormant in him. From Paris he sent numerous reports back to Hungary. The appearance of his next book entitled *New Poems (Új versek)* proved to be of great significance in the history of Hungarian literature. In this book he introduced an entirely new voice into poetry, fearlessly whipping up general public opinion. He attacked the Hungarian public and cultural conditions in Hungary; in his love poems he openly unveiled his amorous feelings, the bitter struggle between man and woman. This book of poems created unprecedented sensation, splitting the public opinion into two opposing camps, giving rise to enraged indignation on the part of conservative writers, while the majority of public opinion of the literary youth always ready to innovate, showing a great enthusiasm. It set off the most heated and longest-lasting controversy in Hungarian literature: the Ady polemics, in which all the great Hungarian literary figures were with or against the poet. The journal *West (Nyugat)* was where most of his poems appeared and where he was the editor for many years. The protracted controversy made him the most widely read poet in the history of Hungarian literature. In 1907 another volume of poems, *Blood and Gold (Vér és Arany)* appeared, provoking even greater controversy. From its inception he was the

leading poet of *West (Nyugat)*, a leading literary review in Hungarian literature, and at the same time he was also a forceful leader of *Tomorrow (Holnap)*, a literary group active in Nagyvárad. In 1915 he married “Csinszka”, (Bertha Boncza), daughter of a Transylvanian lawyer, Miklós (Nicholas) Boncza. He spent the first years of the war in Boncza’s castle at Csucs (now Ciucea, Romania, in County Kolozs), from where he dispatched his anti-war poems and reports. In November 1918 he took part in the inaugural ceremonies of the Republican Government and also attended the meeting of the Vörösmarty Academy, of which he was elected President. Soon afterwards he died prematurely of syphilis, an incurable disease at the time. He was the greatest Hungarian poet of the 20th century. He enormously widened the scope of poetic expression; he freed poetry from many conventional inhibitions, discovered many secrets of the Hungarian language and its rhythm and a large portion of his poems belong to the cream of Hungarian literature. He brought into fashion the symbolic poetic language, the imageries and expressions some of which even his most devoted followers could not understand. After his death his fame kept growing despite the controversies surrounding his life and poetry. Several streets and cultural institutions bear his name. The house of his birth at Érmindszent (on the Ér Creek) is a simple village manor house, opposite the Gothic Reformed church. On the wall of the house a commemorative plaque was placed by the Hungarians of Transylvania in July 1924. His works include: *On the Cart of Elijah (Illés szekerén)* (1908); *I would Like to be Loved (Szeretném ha szeretnének)* (1909); *From the Poems of All Secrets (A Minden Titkok Verseiből)* (1911); *The Escaping Life (A menekülő élet)* (1912); *Our Own Love (A magunk szerelme)* (1913); *Who Saw Me? (Ki látott engem?)* (1914), and *At the Head of the Dead (A halottak élén)* (1918). His book of poems *The Last Ships (Utolsó hajók)*, and his versified novel *Margita Wants to live (Margita élni akar)* were published after his death. His books of short stories include *It can Also Occur this Way (Igy is történhetik)*, and *Pale Humans and Stories (Sápadt emberek és történetek)*. From the extensive literature on Ady the most important are the biographical works of Lajos (Louis) Ady (brother of Ady), György (George) Bölöni, Béla Révész and Aladár Schöpflin. – B: 0883, 1068, 1257, T: 7666, 7456.→**Abrányi, Emil; Léda; Bölöni György; Schöpflin, Aladár.**

**Africa, Discovery of** – There are two Hungarians among the researchers and discoverers of Africa. László (Ladislav) Magyar led two expeditions to Africa between 1848 and 1851 to study Angola (Bihé); and between 1861 and 1864, when he discovered the left tributaries of the River Congo. Count Sámuel Teleki discovered Lake Rudolf in Kenya and Lake Stephanie in Ethiopia (1887-1888), and the volcano Teleki was named after him. Lake Rudolf was renamed Lake Turkana after Kenya became independent in 1963. – B: 1138, 1257, 1020, T: 7456.→**Magyar, László; Teleki, Count Sámuel; Kittenberger, Kálmán; Almásy, László Ede.**

**Africa, Hungarians in** – Africa is the continent where Hungarians live in the smallest number: some 10,000-12,000 in the *Republic of South Africa*. During the English-Boer War (1899-1902) 50 Hungarian Hussars fought on the Boer side. Later, the gold and diamond fever attracted some Hungarians too. After the Versailles-Trianon Peace Treaty that dismembered Historic Hungary (1920), refugees from the detached regions found asylum in South Africa. They founded the South African Hungarian Alliance in 1932 (*Délafrikai Magyar Szövetség*). Its activity was banned during World War II, and its

leaders were accused of irredentism, anti-Communism and Axis-friendship, and they were confined to internment camps. However, after World War II, and after the Hungarian Revolution of 1956, Hungarian refugees found ready admittance into the country. They organized themselves into Hungarian societies and constructed a community center – the Hungarian Farmstead (*Magyar Tanya*).

The so-called *Magyarabs* live in the Sudan. Their ancestors were refugees of the defeated peasant insurgent army of György Dózsa (1514), who either found asylum in Turkish territory of the Balkans, or the Turks took them as slaves from Hungary later in the 16th century. They were settled in the Nile's island of Bedin. They preserved some of their ancient customs. In 1937 the Africa explorer Count László (Ladsislas) Almásy discovered them. Their number is circa 50-60 thousand and they have some knowledge about Hungary. A handful of their young people had higher education in Hungary. They would like to establish closer contacts with Hungary. There is a Magyarab Association; its president is Dr. M. H. Osman.

A handful of Hungarians live in Algeria, Libya, Morocco and Tunisia, and some of them are expatriates. There is a handful of Hungarians in the former British colonies of Tanzania, Kenya and Uganda. – B: 1104, 1364, T: 7103.→**Magyarabs; Almásy, László Ede; Dózsa, György; Missionaries in Swaziland; South Africa, Hungarians in.**

**Ágai, Adolf** (Adolph) (Jankovác) (Jánoshalma, 31 March 1836 - Budapest, 21 September 1916). – Writer, journalist, humorist. He completed his secondary education at Nagykőrös, where he studied under poets János (John) Arany and Károly (Charles) Szász. Although he obtained his Medical Degree in Vienna in 1862, he never practiced medicine. He moved to Pest, and in 1868, founded and edited until 1910 the comic periodical *Pepper Johnny (Borsszem Jankó)* aimed at the governing political party. He used the pen name of *Chickling Pepper (Csicseri Bors)*. Between 1870 and 1879 he was editor of two literary periodicals: *Hungary (Magyarország)* and the *World at Large (Nagyvilág)*. From 1877 he revolutionized children's literature with his *Small Paper (Kis Lap)* written under the pen name Twirling Uncle (*Forgó Bácsi*). He became a member of the Kisfaludy Association in 1877. He also edited several calendars under the pen name of *Spunky Bernie (Mokány Berci)*. He was an excellent humorist and creator of modern Hungarian humor. His literary translations of German and French novels are also significant. His most important works include *Dusty Feuilletons, vols. i-ii. (Porzó tárca levelei I-II)*, (1876); *Onto the Borders, Magyar! (Gyepűre Magyar!)* anecdotes (1879); *Dust and Ash (Por és hamú)*, portraits of his contemporaries (1892), and *Traveling from Pest to Budapest (Utazás Pestről Budapestre)* (1908). – B: 0883, 1257, T: 3240.→**Arany, János; Szász, Károly Jr.**

**Agárdy, Gábor** (Gabriel) (Szeged, 2 August 1922 - Budapest, 19 January 2006) – Actor, painter. He started as a dancer and chorister at the City Theater (*Városi Színház*), Szeged (1937). In 1938 he completed his studies at the School of the National Actors' Alliance (*Országos Színészegyesület Iskolája*). He worked at Szeged until 1941; thereafter with traveling troupes. Between 1947 and 1952 he was with the National Theater of Miskolc (*Miskolci Nemzeti Színház*) and at the Operetta Theater (*Operett Színház*), Budapest, in 1955 at the Youth Theater (*Ifjúsági Színház*), later at the Petőfi Theater (*Petőfi Színház*), and in 1964 at the National Theater (*Nemzeti Színház*), Budapest. From 2000 he was a member of the Hungarian Theater of Pest (*Pesti Magyar Színház*). His rugged

appearance, acerbic sense of humor, and outstanding sense of timing, especially in detailed and spirited characterizations, were most effective. He appeared in Hungarian as well as foreign plays. His most successful roles were character parts. Among his major roles were: Colonel Krahl in Molnár's *Olympia*; Abiram in Madách's *Mózes*, as well as in operettas and musicals, such as head-waiter in I. Kálmán's *The Gypsy Princess (Csárdáskirálynő)*; Sir Basil in Lehár's *The Count of Luxemburg (Luxemburg grófja)*, and Alfred Doolittle in Lerner-Loewe's *My Fair Lady*. He appeared in feature films and television productions, among them *My Grandpa and I (Én és a nagyapám)*; *Germinal*, *Jaguar*, *Retour*, and *Earthquake (Földindulás)*. He distinguished himself also as a stage manager. He was a successful painter as well. His works were exhibited from 1967 on. Some of his icons are at the Pannonhalma Abbey, Hungary; some are in Russia and in the Vatican. He was recipient of a number of distinctions including the Mari Jászai Prize (1958, 1962), the Merited Artist title (1968), the Outstanding Artist title (1980), and the Kossuth Prize (1985). He was Life Member of the National Theater (1989), Actor of the Nation (2000), member of the Society of Immortals; and received the Order of Merit with the Star of the Republic of Hungary (2002). – B: 0870, 1445, T: 7684.

**Agathirs** – The very first people known by name who lived in the Carpathian Basin in Northern Transylvania (*Erdély*, now in Romania) in 550-500 BC. According to the medieval Hungarian chronicler, Anonymus, the Agathirs (Khazars) were living in northern Transylvania even at the time of the Hungarian settlement in 896 AD. These people were related to the Scythians and belonged to their oldest social class. Herodotus and other contemporary Greek writers describe them as having an abundance of gold and eating and drinking without reserve. They lived in polyandry sharing all their goods except the sword and the goblet. They were the first to mine gold in Transylvania. They put their laws into songs, handing them down from generation to generation. The elite were tattooed in blue. They conquered the Thracians and kept them under a firm rule. There is hardly any mention of them before the 4th century BC. During the Macedonian conquest they were pushed back to the area of the Carpathian Mountains and the River Dnyester. During the Hun Empire, they lived in the Lower Don region. Byzantine historian Priskos Rhetor (5th century AD) spoke of them by the name of Akathir or Akatzir. Attila conquered some of the Akathir princes and named his son Ellák to be their king. The migrations of the Avars pushed the Agathirs toward the Caucasus Mountains, where they founded the Khazar Empire. This was the time when they became neighbors to the Onogurs. It was the beginning of the new historical cycle of the Hungarian-Khazar mutual influence. – B: 1078, 1133, T: 7668. → **Anonymus; Priskos Rhetor; Khazars; Scythians.**

**Ágay, Karola** (Caroline) (Staud, Ágai) Budapest, 16 November 1936 - Budapest, 22 February 2010) – Singer, coloratura soprano. She studied singing under the direction of Mrs. F. Révhegyi. Her career started in 1952 as a chorister, first in the Choir of the National Trade Unions (*Szakszervezetek Országos Tanácsa – SZOT*); between 1953 and 1955 she sang in the Choir of the Hungarian Radio, where she was also a soloist; and between 1955 and 1956 was a member of the Arts Ensemble of the Army (*Honvéd Művészegyüttes*). She made her debut as Queen of the Night in Mozart's *Magic Flute (Varázsfuvola)*, in the Sate Opera House, Budapest. In 1957, she became a private member of the Opera House. Soon she was the leading coloratura soprano, and she

performed the famous coloratura roles with great success. She appeared in the Metropolitan Opera, New York, in 1969, in the title role of *Lucia di Lammermoor*, and in the Great Theater of Moscow in 1973. She was a guest singer at the opera houses in Berlin, Vienna, Hamburg, Prague and Warsaw. Her art was characterized by virtuoso coloratura technique and excellent acting. Her main roles included Melinda in Ferenc Erkel's *Bánk bán*; Violetta in Verdi's *La Traviata*; Gilda in *Rigoletto*; Alice in *Falsaff*; and Zerbinetta in R. Strauss' *Ariadne auf Naxos*. She was also a renowned as a singer of art songs (*Lieder*), as well as a recording artist. She made a number of Hungaroton LP recordings, and radio, as well as TV productions. She was a recipient of the Ferenc Liszt Prize (1968), the Merited Artist title (1970), the Outstanding Artist title (1977) and she was Honorary Citizen of District II of Budapest, and Life Member of the Opera House. – B: 0874, 1445, T: 7103.→**Erkel, Ferenc**.

**Aggházy, Gyula** (Julius) (Dombóvár, 20 March 1850 - Budapest, 13 May 1919) – Painter, teacher. Between 1869 and 1871 he attended the Vienna Academy, and from 1871 the Munich Academy. In 1874 he returned to Hungary and after a short stay in Szolnok, he traveled to Paris, where he was a student of Mihály (Michael) Munkácsy. He painted genre pictures in the Munich Style that emphasised naturalism. From 1876 he lived in Szolnok and Budapest and taught at the School of Decorative Arts. His works include *Chatting* (1880); *Leave Me Alone* (1886), and *Sheep Herd* (1875-1885) genre pictures in naturalist style that brought him a lot of success. Several of his genre pictures and sceneries related to Géza Mészöly's style are held by the Hungarian National Gallery, Budapest. – B: 0883, 1122, T: 1122.→**Munkácsy, Mihály; Mészöly, Géza; Szolnok Artist Colony**.

**Aggtelek National Park** – A biosphere reserve in Northern Hungary with an area of 20,000 hectares. The Park was established in 1985 to preserve the characteristic land

forms of the karstic landscape of this region: the dolines and uvulae as land surface forms the rainbow-colored stalactites and stalagmites in the caves. Its purpose is to conserve the unique flora and fauna that evolved on the lime-rich bedrock as it is being slowly dissolved by surface and ground water. This area is still the nesting place of a rare eagle (*Aquila heliaca heliaca* Sav) of the Ukrainian steppes and the Great Hungarian Plain, also of the largest owl of

the now almost extinct great European oak and beech forests. The owl's common Hungarian name is *uhu*, scientifically "*Bubo bubo bubo* L". The park's cave-system contains Europe's longest *karst* cave, the world-renowned 26-km long Baradla Cave. It has an 8-km section that now belongs to Slovakia, where it is called Domica Cave. In addition to the natural fauna, the only breed of mountain horses in Hungary, the *Hucul*-horses were relocated to this area in 1986. Early European human settlers utilized the caves in the Neolithic (New Stone Age) era. Several earth fortifications (*földvárak*) of the Avar times and castle remnants of the Middle Ages enhance the historical value of the area. The first map of the Aggtelek (Baradla) Cave was completed in 1794, and it is the

first accurately scaled engineering map of a cave-system in the world. About 200,000 tourists visit the caves each year. Both the Hungarian and the Slovak sections have enjoyed international protection since 1979, when they were qualified as a biosphere reserve under the UNESCO Man and the Biosphere Program. Patients suffering from respiratory diseases are treated in several of the huge underground caverns, and the excellent acoustics also permit regular staging of concerts. The majority of the caves are open to tourism, and the wondrous stalactites lend to an unforgettable experience. The cave system was listed as a part of World Heritage in 1995. Also in 1995, the Aggtelek cave system became a part of the Cultural and Natural World Heritage. – B: 1066, 1546, T: 1546, 7656.→**Baradla Cave.**

**Ágh, István** (Stephen) (Nagy) (Felsőiskáz, 24 March 1938 - ) – Poet, writer. His higher studies were done at the University of Budapest, where he studied Hungarian literature and librarianship (1956-1961). He worked as a librarian from 1961-1968. He was a member of the editorial board at the journal *Labor (Munka)* (1968-1970). Since 1971 he has been a free-lance writer. He was a columnist for the *New Writing (Új Írás)* literary review (1975); and from 1997, he has contributed to the journal *Credit (Hitel)*. He has been a member of the Hungarian Academy of Arts since 1992. His writings include *May I Sing? (Szabad-e énekelni)*, poems (1965); *Copper Forest (Rézerdő)* poems (1968); *Daylight (Napvilág)* poems (1981); *Selected Poems (Válogatott versek)* (2000); *The Bird Returns (A madár visszajár)* sociography (1973); *Half-King (Felekirály)*, juvenile poems (1985); *Fox Pub (Rókacsárda)* novel (1993); *Flower Ditch (Virágárok)* essays (1996), and *Revolution of October (Októberi Forradalom)*, (2006). He did some translations of literary works as well. He is a recipient of a number of awards, among them the Kossuth Prize (1992), the Imre Nagy Memorial Plaque (1993), and the Book of the Year Prize (1998). – B: 0878, 1257, T: 7103.

**Ágnes, Saint, of the House of Árpád** (Also called St. Agnes of Bohemia and Agnes of Prague) (Prague, Bohemia, 1200/1205 - 1281/1282) – She was the daughter of Ottocar, King of Bohemia, and Constance, who was the daughter of King Béla III of Hungary (1172-1196), and relative of St. Elizabeth of Hungary (1207-1231). At an early age Ágnes was sent to the Cistercian convent of Triblice, where she received her education. She was betrothed to Frederick II, Emperor of Germany (Holy Roman Emperor). When the time of the wedding arrived it was impossible to persuade her to abandon the resolution she had made to consecrate herself to the service of God. The Emperor, upon learning that Agnes had left him to become the spouse of Christ, is reported to have said: “If she had left me for a mortal man I would have taken vengeance with the sword; but I cannot take offense because in preference to me she has chosen the King of Heaven”. She entered the Order of St. Clare in the convent of St. Saviour that she had founded in Prague. She was elected Abbess of the convent and in this office became a model of Christian virtue and religious observance for all. God favored her with the gift of miracles; she predicted the victory of her brother Wenceslas over the Duke of Austria. Pope John Paul II canonized her on November 12, 1989. – B: 1173, 0945, T: 1173.→**Béla III, King; Elizabeth, Saint, of Hungary.**

**Ágoston, Sándor** (Alexander) (Bácsfeketehegy, Hungary, now Feketic, Serbia, 8 May 1882 - Feketic, 23 June 1960) – Bishop of the Reformed Christian Church in Yugoslavia

(now Serbia). He studied Theology at the Reformed Theological Academy, Budapest (1900-1904). He was Parish Minister in Kórógy (1916), Eszék (1917), and Bácsfeketehegy (1921). He was Dean and finally Bishop of the Reformed Church in Yugoslavia. His theology and activities were motivated by the catechism that he learned by heart at the age of 8. He organized the diaspora services of the Reformed Church in the southern region of Historic Hungary, called *Délvidék (Southern Hungary)*, ceded to Yugoslavia by the Versailles-Trianon Peace Treaty in 1920. He was Editor for the *Life of the Reformed Congregation of Eszék (Eszéki Református Egyházi Élet)*; *The Sower (Magvető)*, and *Calendar of the Reformed Orphanage (Református Árvaházi Naptár 1924-1940)*. He presented a hymnbook to his Church in 1939 that was the most progressive one of the fragmented Reformed Church in the Carpathian Basin (written by Béla Árokháty). His works include *Sunday Afternoon (Vasárnap délután)* prayers (1911); *Take it and Read it! (Vedd és olvasd!)* sermons (1915); *Pictures from Yugoslavia* (1929); *The Lord's Prayer (Miatyánk)* (1941), and *Liberation (Felszabadulás)* (1941). – B: 0913, 0883, T: 7103. → **Reformed Church in Yugoslavia; Árokháty, Béla; Kovácsi, Sándor.**

**Agricultural Museum, Hungarian** – Housed in the City Park of Budapest in a smaller-size replica of the Vajdahunyad Castle of Transylvania (*Erdély*, now in Romania). It is the oldest Agricultural Museum in the world since the closing of the Russian Agricultural Museum in St Petersburg. Ignác (Ignatius) Alpár designed it for the Hungarian Millennium in 1896. Popularly known as the *Vajdahunyad Castle*, it retained features of the original castle in the seat of the one-time Hunyadi family. The building also houses the Hungarian National Herbarium and the Library of Hungarian Natural History. The exhibits occupy 21 halls. The Museum is located in the City Park (*Városliget*), a favorite recreational area in Budapest – B: 1144, T: 7456, 7677. → **Alpár, Ignác.**

**Agyagfalva Meeting** (Agyagfalva, now Lutița, Romania) – László (Ladislav) Berzenczey, the Transylvanian (*Erdély*, now Romania) government commissioner called a meeting on the plateau near this village on 16 October 1848, at the time of the Hungarian War of Independence. Austrian military authorities did everything to keep the regiments of the areas of Határőr, Csík and Háromszék from attending it. Hussars and infantry drew up even from the most hidden places led by their officers and priests. At least 60,000 people attended the meeting; but according to ancient custom, only half of them carried weapons to go directly to the battlefield afterwards. The meeting was held in perfect order under the presidency of Count Imre (Emeric) Mikó, whom the crowd elected. They swore an oath on the Constitution and they requested this from other Transylvanian ethnic groups as well. The Saxons and Vlachs were warned to stay peaceful, otherwise they would be treated as enemies. They declared that the unlawful military actions of the Saxons must cease and a militia was to be established instead. The nation depended only on the Hungarian Ministry instead of the Austrian military authorities. They appointed General Zsombory as their leader, who incorporated the whole Sekler nation into the Hungarian Army. This impressive act of the Szeklers, who actually were politically inactive until then, lasted for only a short period of time; only General Bem was able to exert influence on this combative nation. – B: 0942, 1480, T: 7672. → **Freedom Fight of 1848-1849; Seklers; Vlachs, The; Bem, József; Mikó, Count Imre.**

**Ajtay, Andor** (Andrew) (Fogaras, now Făgăras, Romania, 25 July 1903 - Budapest, 9 May 1975) – Actor. He studied in the Acting Studio of Szidi Rákosi. His first appearance on stage was in Szeged. He was a member of the Szeged City Theater (*Szegedi Városi Színház*) between 1929 and 1932. In 1932 he was in Budapest where the Comedy Theater (*Vígyszínház*) contracted him. In 1943-1945 he was a member of the National Theater, Budapest. In 1945 he returned to the Comedy Theater as a contracted actor, as well as director. From 1951 he was playing in the Madách Theater (*Madách Színház*), Budapest. In regional theaters he appeared mainly in operettas. In the Comedy Theater at first he played leading roles. As his artistic ability developed, the circle of his roles expanded. His outstanding technical knowledge and his ability for in-depth characterization came across and his speaking technique was of great help when portraying classical dramatic roles on a grand scale. Even humor and grotesque elements were not unusual in his characterizations. His more important roles were in Shakespeare's *Hamlet*; B. Shaw's *Man and Superman* (*Tanner John házassága*); *Pygmalion*; Chekhov's *The Seagull* (*Sirály*); Brecht's *The Resistible Stop of Arturo Ui* (*Állitsátok meg Arturo Uit!*); Schiller's *William Tell*; Jacobi's *Sybil*, and Offenbach's *La belle Hélène* (*Beautiful Helen – Szép Heléna*). From 1937 he regularly played in feature films. Appearing as a singer was not strange to him either, being an extremely versatile artist. Besides stage acting he was also well known on radio and television. He was a recipient of the Kossuth Prize and received the titles of Merited Artist and Outstanding Artist. – B: 0870, 1445, T: 7684.→**Rákosi, Szidi.**

**Ajtony** (1028) (Achtum, Ochtnm) – Last ruling head (*gyula*) of Erdély (Transylvania, now in Romania) during the reign of King István I (St Stephen) (997-1038), head of the clan living along the lower Maros River, P prince of the Black Magyars. Their capital city was Marosvár. He was of distinguished parentage, with lands inherited from his ancestors dating back to the Carpathian Conquest Period (896). According to the chronicler Anonymus, his wealth and power were known well into the 12th century. He possessed large herds of horses and cattle that grazed on rich pastures. His large forces were increased with soldiers captured in his wars. Comfortable in his power he obstructed the king's salt-carrying ships on the River Maros. When "Bulgar Killer" Bazil extended the boundaries of Greece up to the River Danube in 1019, Ajtony accepted his sovereignty and he sent missionaries of the Greek (Byzantine Christian) rite to Ajtony. Ajtony took the baptized name of Bodony (Vidin) and founded Greek monasteries, including one in Marosvár called St John, the Baptist. When the Greek royal family died out and no assistance was available to Ajtony, King István I turned against him. He sent Csanád, Ajtony's former chief commander against him, who defeated Ajtony in a two-day battle on the field of Nagyősz, beheading him with his own hand. Csanád was awarded most of Ajtony's estate; and to commemorate this event he founded a church at Oroszlános. Marosvár was renamed Csanád. – B: 0942, 1133, T: 3312.→**Anonymus; István I, King; Koppány.**

**Ákom, Lajos** (Louis) (Margitta, now Marghita, Romania, 7 March 1895 - Budapest, 18 May 1967) – Organ virtuoso, composer. Although he wanted to be a chemist, his talent drove him to a career in music. He was a student of Dezső (Desider) Antalffy-Zsíross (1885-1945) at the Ferenc (Franz) Liszt Academy of Music, Budapest. His professor had been a student of Vincent d'Indy in Paris who, in turn, had studied under César Franck. It

is no wonder that Ákom was an outstanding representative of the French school of organists at the time when the German school of organ playing was dominant in Hungary. In the era of silent-films, he made his living as a cinema organist, where he acquired a brilliant improvising skill. He toured Austria, Germany and Italy with great success in 1926. He was Professor of the National Music School (*Nemzeti Zenede*), Budapest and President of the Society of Composers. For this reason he was not favoured by the new regime after World War II. He composed film background music, organ pieces, chorals and songs, many of which remained in manuscript form. From 1921 to 1967 he was the organist at the Calvin Square Reformed Church, Budapest. Among his students were Zsigmond (Sigismund) Szathmáry (Germany), Pál (Paul) Beharka (Hungary) and József (Joseph) Pungur (Canada). Among his film-music are: *Black Diamonds (Fekete Gyémántok)* (1938); *The Last Song (Az utolsó dal)* (1940); *Spring Sonata (Tavaszi szonáta)* (1942), and *Annamária* (1943). He also composed songs, such as: *Give, my Lord God (Adj Uramisten)*. He was a great organ virtuoso, improviser, and an authentic representative of the French-style organ playing in Hungary. His organ compositions remained in manuscript. – B: 0883, 0901, T: 7103.→**Antalffy-Zsíros, Dezső; Pungur, József.**

**Ákos Master** (? - 1273) – A cleric at the Hungarian Royal Court and a historian. Between 1235 and 1244 he was vicar at Pest and after the Mongol-Tartar Invasion (1241-1242) he became a canon, a member of the Royal Chapel and chancellor to the Queen. He is considered by many to be the originator of the 13th century Hungarian chronicles. – B: 1105, T: 7666.→**Ancient Chronicle.**

**Alaska, Hungarians in** – At the 1980 census 710 people claimed Hungarian as their mother tongue, although their number is estimated to be 1,022. The 1990 census indicates 2,200 Hungarians. According to the 2000 census, the Hungarian population of Alaska was 2,238. Most of them live in the city of Anchorage. – B: 1146, T: 3240.

**Alba Ecclesia** (White Church) – A church situated in the Pilis Mountain Range near Buda. According to Italian historian Bonfini, Charlemagne built it after he defeated the Avars (AD 796) and introduced Christianity to them. The ruins of the ancient *Blessed Lady (Nagyboldogasszony) Church* found in Hábod indicate the religious importance of the region. The church belonged to the royal family. During the mediaeval era the head of the royal chancery was chosen from the priests of Alba Ecclesia. According to written sources the kings of the time were crowned and buried in Alba Ecclesia, whose importance was mentioned in records dating from the Turkish occupation of Hungary. They also mentioned in their records that Attila the Hun was buried in Old Buda, and King István I, (St Stephen) (977-1038) was laid to rest in the Alba church. When the Pauline monks returned after the Turkish defeat, they tried to find the location of the church, as King Mátyás I (Matthias Corvinus) (1458-1490) had donated it to the monks before the Turkish invasion. In 1719, the Pauline monks sent László (Ladislav) Terstyánszky to Pozsony (now Bratislava, Slovakia) to look up old documents about the location of Alba Ecclesia. According to his findings, the monks moved to the Hábod Monastery near Pilismarót and built a three-meter high wall all around it. The old foundation of the ancient church is probably inside the walls, as it has been described in old documents. – B: 1355, T: 7663.→**Attila; Avars; Bonfini, Antonio.**

**Alba Maria** (*Alba Ecclesia – Fejéregyház*) – According to the chronicler Anonymus, and the document of King Mátyás I (Matthias Corvinus) dated 1480, the church was built in Óbuda at the beginning of the Christian era in honor of the Virgin Mary. King István I (St Stephen) mentioned the church in the 1015 Charter of the Benedictine Abbey Church of Pécsvárad (*Pécsváradi Apátság*). According to other medieval records the church was situated at the foot of the Pilis Mountains by the old road to Esztergom (today *Bécsi út*). The church was close to a hot spring and, according to Anonymus it flowed through a rock bed to the town of Attila. Árpád was buried at the head of the spring. – B: 1078, T: 7663. → **Anonymus; Pécsvárad, Abbey Church of; István I, King; Mátyás I, King.**

**Alba Regia** → **Székesfehérvár.**

**Albert, Flórián** (Hercegszántó, 14 September 1941 - Budapest, 31 October 2011) – Soccer player, coach; played soccer at the Ferencváros Gymnastic Club (*Ferencvárosi Torna Club – FTC*) (1952-1974). His team was national champion in 1963, 1964, 1967 and 1968, and cup-winner in 1972. He was the most successful goal-scorer (*gólkirály*) in 1960, 1961, and 1965. He was an Olympic bronze-medalist in 1960, and medaled at the European Championship in 1964. Between 1959 and 1978 he appeared with the national team 75 times and was on the World Cup team in 1968 and 1972. He was a member of the European Championship Team in 1974. He is the only Golden-Ball player in Hungarian soccer history (1967). He coached in Libya and at the FTC. He was named European Footballer of the year in 1967. He wrote a book entitled *Kick the Ball (Rúgd a labdát)* with J. Hofer (1970). He was Sportsman of the Nation since 2004. He received the Middle Cross of Merit of the Republic of Hungary. The Stadium on Üllői Street in Budapest was named after him in 2007. – B: 0874, 1031, T 7103. → **Golden Team, The.**

**Albert, Gábor** (Gabriel) (Egyházasharaszti, 30 October 1929 - ) – Writer. His secondary education was at the Military Cadet School, Kőszeg, and at the István Széchenyi High School of Pécs. His university studies were taken at the Teachers' Academy, University of Pécs, where he also read Law. He studied at the Reformed Theological Academy, Budapest, and at the University of Budapest, where Hungarian Literature and Librarianship were his major subjects. For ten years he worked at the Széchenyi Library and at the Musicological Institute of the Hungarian Academy of Sciences, Budapest. He was founder and Editor-in-Chief for the *New Hungary (Új Magyarország)* in 1991. After working for a short while for the *New Hungarian News (Új Magyar Hírek)* in 1992, he became editor-in-chief of the magazine *Hungarian World Journal (Magyarok Világlapja)* (1992-1995). In 1998 he was one of the founders of the *Hungarian Protestant Educational Society (Magyar Protestáns Közművelődési Egyesület)*. He became its Secretary, thereafter its President. From 1989 to 1994 he was President of the Board of Trustees of the János Arany Foundation. From 1998 to 2001 he was a member of the Presidium of the Hungarian Writers' Association. His works include *Furnished Rooms (Albérleti szobák)* short stories (1966); *The Book of Kings (Királyok könyve)* novel (1980); *With Head Erect (Emelt fővel)* sociography (1983); *After Dispersal (Szétszórás után)* study (1989); *Heroes of Blind-Alleys (A zsákutcák hősei)* historical essay (1989); *Szárszó 1992-2001* (ed. with others, 2002), and *Old Dog is About to Shed its Fur (Öreg kutya vedleni készül)* (2001). He is the recipient of a number of prizes, among them the

Literary Prize of the Art Foundation (1986), the Prize of Book of the Year (1990), and the Knight's Cross of the Order of Merit of the Republic of Hungary (2004). – B: 0878, 1257, T: 7103.

**Albert, Zoltán** (Brassó, now Braşov, Transylvania, Erdély, Romania, 31 January 1957 - ) – Graphic artist. He graduated in 1981 from the Art School of the N. Grigorescu University of Bucharest. He was employed as a creative artist at the *Curtea de Arges* (1982-1985) and at the Braşov Students' Club as graphic art instructor (1985-1991). From 1991 he was Professor at the Braşov Music and Fine Art Lyceum. Since 1982 he has continued to participate in all the exhibitions in Braşov, the national graphic art exhibitions at the Dulles Exhibition Room, Bucharest, and numerous exhibitions abroad, including Norway, Germany, France, Belgium and Japan. – B: 0875, T: 7668.

**Alberta, Hungarians in** (Canada) – According to the 1986 Statistics Canada census, 12,700 people claimed Hungarian origin in the province of Alberta. According to the 2001 census, the total number of Hungarians in the Province was 41,535. Most of them live in and around Calgary, Edmonton and Lethbridge. – B: 1222, T: 3240.→**Canada, Hungarians in.**

**Aleppo, Hungarian Refugees of** (Syria) – Refugees of the 1848-1849 War of Independence escaped through the southern part of Hungary undefended by the enemy, to Turkey that was hostile to Austria. The Turkish government, hoping to restore relationships with the Austrian government, interned the soldiers in the refugee camp already established in Sumia. Here they were ordered to convert to Islam and to stay permanently in Turkey. A large number of them did so and they were transported to Aleppo, Syria to become accustomed to the Turkish lifestyle. Lajos (Louis) Kossuth, himself a Lutheran, and his entourage refused to change their faith. They found a place safe from the Austrian agents in Kiutahia, in Turkish Asia-Minor. – B: 1143, 1020, T: 7668.→**Kossuth, Lajos; Freedom Fight of 1848-1849.**

**Alexa, Károly** (Charles) (Radstatt, Austria, 16 June 1945 - ) – Literary historian, critic. He studied Hungarian literature and history at the University of Budapest for a Bachelor of Arts Degree, and also for a Diploma of Education (1963-1968). Thereafter he taught at a school for skilled workers from 1968 to 1970. From 1970, as a demonstrator, he taught at the Department of Old Hungarian Literature at the University of Budapest and, from 1978, as assistant lecturer. Concurrently he worked as a cultural columnist for the daily *Hungarian News* (*Magyar Hírlap*), and as critical editor for the journal *Contemporary* (*Kortárs*). Between 1978 and 1983 he was deputy editor of *Moving World* (*Mozgó Világ*), from 1987 that of *Credit* (*Hitel*); from 1992 editor of the newspaper *Weekly Hungary* (*Heti Magyarország*). Between 1993 and 1996 he was managing director of *Hungarian News Service* (*Magyar Távirati Iroda – MTI*). In 1997 he worked as editor-in-chief of *New Hungary* (*Új Magyarország*); and from 1998 he was President of the News Board of *Hungarian Television* (*Magyar Televízió*). His main field of study is the late 19th century works of fiction. His works include *Hungarian Psalm* (*Magyar zsoltár*) editor (1994); *Of the Selfsame Persuasion* (*Ugyanazon gyuradékból*) (2000), and *The Essays of the Year* (*Az év esszéi*) (2007). He was recipient of the Táncsics Prize (1999), and the Attila József Prize (2008). – B: 0874, 1257, T: 7456.

**Alexander, Bernát** (Bernard) (Pest, 13 April 1850 - Budapest, 23 October 1927) – Philosopher, esthete. Beside his philosophical and literary studies at the University of Budapest, he was interested in mathematics and natural sciences. He obtained a Degree in Education and a Ph.D. in Philosophy. He taught from 1876 until 1904 at a high school in Budapest. From 1878 he was a resident fellow of the Department of History of Philosophy at the University of Budapest. In 1895 he became its professor; and from 1878 he was lecturer of dramaturgy at the Academy of Dramatic Arts, Budapest. He was an important theater reviewer from 1869 to 1874; and from 1914 to 1919, for the newspaper *Pester Lloyd*, and from 1893 to 1914 for the *Budapest Journal* (*Budapesti Hírlap*). Between 1881 and 1919, he co-edited the *Philosophical Writers' Collection*. Between 1915 and 1919, he was editor of the *Athenaeum*, a philosophical periodical. First he was Vice-President, then between 1914 and 1919, President of the Hungarian Philosophical Association. He was a member of the Kisfaludy Society from 1899; but his name was erased from the register of these two associations at the fall of the short-lived Communist regime of 1919. For a short time he resided in Switzerland and Germany, but moved back to Budapest in 1923. He divided his time between teaching, public life and scientific literature. He published a great number of philosophical and literary writings in periodicals. Among his works are *The Concept of History of Philosophy (A filozófia történetének eszméje)* (1878); *Kant* (1881); *The Pessimism of the 19th Century (A XIX. század pesszimizmusa)* (1884), and *National Spirit in Philosophy (Nemzeti szellem a filozófiában)* (1893). He translated into Hungarian some of the philosophical works of Descartes, Hume, Diderot and Kant, and annotated these works with his introductions and commentaries. He popularized the most important works of international literature. A classical bourgeois liberalism and neo-Kantian philosophy characterize his works, and the high standards of his esthetic compositions had strong influence on the theoretical and artistic ideas of Hungarian intellectuals. He was a member of the Hungarian Academy of Sciences. – B 0883, 1257, T: 3240.

**Alexander, Franz** (Budapest, 1891 - California, USA, 1964) – Physician and psychoanalyst. He attended the Trefort High School in Budapest. He was trained at the Psychoanalytic Institute in Berlin and was in contact with Sigmund Freud. In 1930 he was invited by the University of Chicago to be a visiting professor of psychoanalysis. In 1932 he founded the Chicago Psychoanalytic Institute that acquired worldwide fame. He was an independent thinker and his research interests included psychosomatic medicine, sociology, philosophy, criminology and the visual arts. Most of all, he deserves credit for bringing psychoanalysis out of isolation from medicine and building meaningful bridges between it and the rest of psychotherapy. His book *Psychoanalytic Therapy* (1946), co-authored with Thomas M. French, created uproar in orthodox psychoanalytic circles. In it a shorter, more efficient techniques of psychotherapy were suggested. He was the leading figure of what came to be known as the "Chicago school", characterized by an emphasis on the emotional relationship rather than intellectual insight as the main curative factor in psychoanalysis. He identified emotional tension as a significant cause of physical illness. He is regarded as the father of psychosomatic medicine. – B: 1081, 1403, T: 7103.

**Alexits, György** (George) (Budapest, 5 January 1899 - Budapest, 14 October 1978) – Mathematician. He applied for admission to the University of Budapest in 1917;

however, he was drafted into the army soon afterwards and sent instead to the Front during World War I. He was active in the Socialist Youth Wing of the Hungarian Soviet Republic of 1919. He was barred from the University after the fall of the Republic and left the country. He studied at the University of Graz, Austria, where he obtained his doctoral degree in 1924. At the beginning of his studies he was interested in the problems of theoretical physics; later he turned his attention to mathematics. On his return to Hungary his degree was not recognized; and due to his involvement in the political events of 1919, he was not allowed to teach. He eventually obtained a position at the Hungarian Bureau of Statistics, worked for insurance companies, and wrote musical reviews for newspapers. He moved to Romania in 1926, taught for a year in Giurgiu, and became an assistant lecturer at the University of Bucharest. In 1928 he was certified, and the following year he received a teaching position in mathematics and physics. He began his research of curvilinear theory around 1930. As a result of his research he was invited to the University of Vienna. This generated some interest in Hungary, where he was offered a teaching position in a secondary school and some possibilities of teaching at the Budapest Polytechnic. Following the recognition of his Ph.D. in Kolozsvár (now Cluj-Napoca, Romania), he became a private teacher. Following his involvement in the resistance movement in 1944, he was taken to Dachau, then to Spaichingen. He returned to Hungary in 1945. Besides his scientific research work, he became a school principal for a year and a half and then was state secretary at the Ministry of Education followed by a year-long engagement as Secretary General of the Scientific Council. Eventually he became the first Secretary General of the reorganized Hungarian Academy of Sciences. His scientific activities spread to various different areas of mathematics (curvilinear theory, theory of functions, geometry); but his most important contributions were related to the theory of approximation and the Fourier-lines. His mild manners and professional enthusiasm made him a popular educator. He authored and co-authored several monographs and 88 professional articles. He was a member of the Hungarian Academy of Sciences and recipient of the Kossuth Prize (1951) and also the State Prize (1970). – B: 0883, 1105, T: 3240.→**Council (Soviet) Republic of Hungary.**

**Alexy, Károly** (Charles) (Poprád, now in Slovakia, 1823 - Budapest, 10 May 1880) – Sculptor. After attending the Vienna Academy he created small bronzes: *Faust and Margaret*, *Egmond and Klara*, etc. He began his famous series of field marshals in 1844. In 1845 he worked on sculptures for the Hermina Chapel in Pest. Several of his works, such as *King Matthias*, *Maria Theresa*, and *Christ under the Olive Trees* (*Mátyás király, Mária Terézia, és Krisztus az Olajfák hegyén*) were exhibited in 1846. He created a bust of Lajos Batthány in 1848. Having fought in the War of Independence of 1848-1849, he was sentenced to imprisonment for an extended period. He emigrated to London following his release, where he recreated the busts of Lajos Batthány and Lajos Kossuth. *Dancers*, his best-known relief work decorated the facade of the Vigadó building in Budapest. His style was on the borderline between classicism and romanticism. On his return to Budapest in 1861 he worked as an art teacher. – B: 0883, 1124, T: 1124.→**Batthány, Lajos; Kossuth, Lajos; Maria Theresa, Empress; Mátyás I, King.**

**Alexy, Lajos** (Louis) (19th century) – Gunsmith of Kassa (now Košice, Slovakia), he built a breech-loading rifle in 1849, featuring a safety lock. As early as 1862 the discharge of the cartridge worked by means of a central firing pin. At that time his gun

designs were considered significant innovations. The prototypes are at the Museum of Kassa. – B: 1078, T: 7674.

**Alfonzó** (Alphonsus) (born József [Joseph] Markstein) (Budapest, 28 February 1912 - Budapest, 31 May 1987) – Actor, acrobat. He toured Europe and North Africa with a group of acrobats between 1928-1940. Following his return to Hungary he worked as an acrobat and comic at the Royal Variety, Kamara Variety, and the Moulin Rouge, Budapest. From 1945 he performed at the Royal Revue Theater (*Royal Revú Színház*), the Comedy Stage (*Vidám Színpad*) and the Kamara Variety Theater (*Kamara Varieté*). In 1951 he became member of the Comedy Stage troupe. He left Hungary in 1956 and worked in Belgian pantomime productions for two years. He returned to Hungary in 1958 and appeared at the Operetta Theater (*Operett Színház*), then went to the Comedy Stage. He staged his own show at the Budapest Dance Palace (*Budapest Táncpalota*). He had a very particular, wry sense of humor and his preferred subjects were the absurdities of public life. His opening sentence “*Listen to me, men*” (“*Ide figyeljenek, emberek*”) became an adage in Hungary. The Comedy Stage’s Repertory Theater presented *Alfonzo’s Cabaret* on 29 October 1980. He appeared in many movies and was a frequent guest on Hungarian Television. He was awarded the Merited Artist title in 1969. – B: 0883, 1445, T: 3240.

**Alieni, Mario** (Turin, 1926 - ) – Linguist. He was Assistant Professor of Italian linguistics and literature, University of Utrecht (1959-1962), later Associate Professor in the same field (1962-1968); then full professor (1968-1987) at the same University. Since 1980 he has been editor of the journal *Quaderni di Semantica*. He was co-founder, Vice-President and President (from 1982) of the *Atlas Linguarum Europae*, a UNESCO-sponsored project (1970-1997). He is author of several hundred publications and well known as a scholar in the field of dialectology. He is also the main proponent of the so-called Paleolithic Continuity Theory, which contends that the Indo-European languages originated in Europe and existed there since the Paleolithic Age. Some of his linguistic contributions for this theory involve the idea of a tendency toward the conservation of languages, as opposed to the theories of “biological laws” of linguistic change, and what he calls the method of lexical self-dating. Alieni is a pioneer in the use of computers in linguistics. He is member of a number of learned societies. Since 1996 he has been a member of the Royal Gustaf Adolf Academy of Uppsala and a member of a number of other scientific societies, including the International Society for Dialectology and Geolinguistics. His works include *Lingua e dialetti: Struttura, storia e geografia; Origini delle lingue d'Europa* (1996), *Etrusco: una forma arcaica di ungherese (Etruscan: an Archaic Form of Hungarian)* (2003), in Hungarian translation entitled: *Ősi kapocs (Ancient Link)* (2005), This work was presented at the 6th World Congress of Hungarians, Budapest in 2004. – B: 1031, T: 1031, 7456.→**Etruscan-Hungarian Linguistic Relationship.**

**Alliance of Young Democrats, Hungarian Citizen’s Alliance** (*Fiatal Demokraták Szövetsége, Magyar Polgári Szövetség, FIDESZ-MPSZ* since 17 May, 2003) – This was a liberal party founded in March 1988 by university students and young intellectuals. Its original attraction lay in the youthful Libertarian attitude of opposition first to the Communists and later toward the Conservatism and Nationalism of the Independent

Smallholders' Party (*Független Kisgazdapárt-FKgP*). Viktor Orbán succeeded in transforming Fidesz into a mainstream conservative party, a change reflected in the alteration of the name by adding "citizens' party" to the original Fidesz name in 1995. From its liberal beginnings the Party has now taken up conservative national and Christian themes and has criticized the economic reform policies of the Hungarian Socialist Party (*Magyar Szocialista Párt-MSZP*) government as "too harsh". The change has been criticized by some of the original supporters of Fidesz, who feel that Orbán has conceded too much. Some members have left to join the Free Democratic Alliance (*Szabad Demokraták Szövetsége- SZDSZ*). Nevertheless, in the 1998 elections, Fidesz gained a massive victory. After the elections Orbán chose to form a coalition with the FKgP, a traditional opponent of the many libertarian supporters of Fidesz. Fidesz-MPP lost the 2002 election by a very small margin. On 17 May 2003 the party transformed itself into an Alliance. Its new name is Fidesz Hungarian Civic Union (*Fidesz Magyar Polgári Szövetség- FIDESZ-MPSZ*). The Fidesz-MPP lost again the election in 2006. However, in the 2010 election, in alliance with the Christian Democratic People's Party (*Kereszténydemokrata Néppárt – KDNP*), won an overwhelming victory, capturing more than 2/3rd of the parliamentary seats. – B: 1019, T: 7103.→**Orbán, Viktor; Áder, János; Németh, Zsolt; Political Parties in Hungary.**

**Alma-Ata, Runic Inscription** – In 1969, while excavating some Saka-Scythian burial mounds around the city of Almaty in Kazakhstan, archeologists found in one princely *kurgan* a male skeleton wrapped in gold. Also there were more than 4,000 golden articles and one silver chalice with runic writing. On the basis of the discovery, Akisov, an archeologist from Kazakhstan, and Sándor (Alexander) Forrai of Hungary, an expert on runic script, published an exact replica of the 28-character inscription, as well as an evaluation of the text that has 18 distinct signs. Among them are Turkish, Magyar (Hungarian), Etruscan, Pelasgian, Phoenician and 3 previously unknown symbols. Amongst the characters seven can be equated with signs of the inscription on the Nagyszentmiklós Gold Treasure and four are found in the inscription on the scabbard of the Campagna runic axe, and one in an inscription in the interior of the Reformed Church at Dálnok. – B: 1174, 1020, T: 7669.→**Nagyszentmiklós Gold Treasure; Hungarian Runic Script; Scythians; Forrai, Sándor.**

**Almás, Éva** (Eve) (Budapest, 5 June 1942 - ) – Actress. She graduated from the Academy of Dramatic Art in 1965. In 1960 she was already a member of the Petőfi Theater (*Petőfi Színház*), in 1965 of the József Attila Theater (*József Attila Színház*), in 1968 of the Madách Theater (*Madách Színház*), and in 1987 of the Comedy Theater (*Vígyszínház*), Budapest. She became a freelance actress in 1991. In 1995 she worked at the Szigligeti Theater of Szolnok (*Szigligeti Színház*), but a year later she returned to freelancing. She appeared in many classical Hungarian and foreign plays, including as Ingrid in Ibsen's *Peer Gynt*; Elisabeth in Shakespeare's *Richard III*; Kate in *The Taming of the Shrew* (*A makrancos hölgy*); Elisabeth in Schiller's *Maria Stuart*; Polly in Brecht-Weill's *The Beggar's Opera* (*Koldusopera*), and Mama in F. Molnár's *The Guardsman* (*Testőr*). She is recipient of the Mari Jászai Prize (1973), the Merited Artist title (1978), the Outstanding Artist title (1986) and the Kossuth Prize (1997). She is a lifetime member of the Society of Immortals. – B: 0870, 1445, T: 7684.

**Almási, István** (Stephen) (Kolozsvár, now Cluj-Napoca, Romania, 8 December 1934 - ) – Folklorist in Transylvania (*Erdély*, now in Romania). He completed his higher studies at the G. Dimna Music Academy, Kolozsvár in 1969. Since 1957 he has been a fellow and chief researcher at the Folklore Institute of Kolozsvár. Some of his major works include *In the Forest of Lapád (A lapádi erdő alatt)*, folk songs, co-author (1957); *Folk Poetry of Magyargyerőmonostor* (now Manastireni, Romania) (*Magyar-gyerőmonostori nép-költészet*), co-author (1969); *Folk Songs of Futasfalva* (now Faureni, Romania) (*Futasfalvi dalok*) (1973); *Hungarian Folk Music of the Szilágyság* (now Silvanei, Romania) (*Szilágysági magyar népzene*) (1979), and *245 Folk Dance Melodies (245 népi táncdallam, 245 melodii de joc; Tanzmelodien)* (1970). He collected some 5,000 tunes in more than 100 locations; but so far only one fifth has appeared in print. – B: 1036, 1031, T: 7103.

**Almási, Miklós** (Nicholas) (Budapest, 26 September 1932 - ) – Esthete, philosopher. His higher studies were done at the University of Budapest, where he read philosophy (1951-1954); then he was a postgraduate student (1954-1957), and Adjunct Professor (1957-1958). After having been a high school teacher between 1958 and 1962, and having worked at the Theater-Research Institute (1962-1978), he became Professor and Head of the Esthetics Department of the University of Budapest in 1978. He also fills important positions in related institutions and author of scientific magazines. He is a regular member of the Hungarian Academy of Sciences (1993). His fields of research are drama, theory, and philosophical esthetics. His major works include *On the Roads of Modern Drama (A modern dráma útjain)* (1961); *Mask and Mirror (Maszk és tükör)* (1966); *The Reality of Appearance (A látszat valósága)* (1971); *Adventures of the Intellect (Az értelem kalandjai)* (1980); *The Philosophy of Appearances* (1992), and *The Global Games of the End of the Millenium (Az ezredvég globális játszmái)* (1998). Some of his works were published in English, German, Serbian, Croatian and Polish translations. He is a recipient of the Attila József Prize (1967, 1977), the Prize of Film Review (1982), the Prize of Theater Critics (1984), and the Széchenyi Prize (2004). – B: 0878, 1257, 1031, T: 7103.

**Almássy, Zsuzsa** (Susan) (Budapest, 8 October 1950 - ) – Figure skater and coach. She obtained a diploma in mechanical engineering from the Budapest Polytechnic in 1974. From 1956 she competed in the colors of the Ferencváros Gymnastic Club (*Ferencvárosi Torna Club – FTC*), Budapest. Almássy was in the Hungarian Selected Team from 1964 to 1972. She became the number one Hungarian competitor and belonged to the vanguard team of the world. She participated in a number of Winter Olympic Games, including the Games of 1964, 1968, and 1972 where she received a fifth and a sixth place. She received a Bronze Medal at the World Championships in Colorado Springs, USA, in 1969. At the European Championships, she won a Silver Medal in 1971, and a Bronze Medal in 1967 and 1972. In each year from 1966 to 1972 she was elected the Figure Skater of the Year. From 1973 she was a professional Ice-Revue solo dancer in the USA. In 1974, she returned to Hungary. Since 1980, she has been living in Switzerland and working as a figure-skating coach. – B: 1031, T: 7103.

**Almásy, György** (George) (Kétegyháza, 15 October 1864 - Graz, Austria, 22 September 1933) – Scholar of Asiatic studies, and zoological and ethnographic collector. In 1897 he toured and studied in Dobruja in Romania and returned to Hungary with an important

ornithological collection. In 1900 he traveled to Asia for the first time with Strummel-Traunfels, Professor of Zoology at the University of Graz. They explored the River Ili region of Mongolia, the eastern portion of Issikkul, and the as yet unknown third southern mountain range of the Tien Shan. The zoological result of his journey was a collection of some 20,000 birds and other specimens and a number of new species. During his second trip to Asia in 1906, he made a study of the geographical, geological, meteorological, ethnographic and economic conditions of the northern region of China. He toured the middle ranges, as well as the still unexplored southern ranges of the Tien Shan and returned home with a valuable zoological collection. His works include *My Journey in Russian Turkestan (Utazásom Orosz-Tukesztánba)* (1901) and *My Wandering in the Heart of Asia (Vándorútam Ázsia szívébe)* (1903). – B: 0883, 1257, T: 7456.

**Almásy, László Ede** (Ladislaus Eduard, Abu Ramala) (Borostyánkő, now Bernstein, Austria, 22 August 1895 - Salzburg, 22 March 1951) – African scholar, explorer, pilot, car racer. Son of the Asiatic scholar György (George) Almásy, he became the Hungarian representative of 20th century desert studies of international significance. His work greatly enhanced the knowledge of the interiors of the eastern Sahara and the Libyan Desert. After his technical studies in London, the Austrian Steyr automobile works employed him. He traveled to Africa for the first time in 1926 in order to try out a new type of car. In 1929 he founded a flying school and developed amateur aviation in Hungary and abroad. Having been familiar with desert conditions he organized expeditions to Africa almost every year, and in 1930 conducted a camel expedition from Sudan to Abyssinia. In 1932 he explored by airplane and by car the hitherto unknown plateau of the Libyan Desert: the Gilf el Kebir. He also discovered the enigmatic Zarzura Oasis. In 1933 he found prehistoric rock paintings in the caves of the Uvainat Mountain. He later revisited these with experts. Almásy toured Tanganyika, Kenya, Uganda and Sudan by car and from there he traveled to Cairo through the Nubian Desert. He mapped Wadi Haur. He provided information about the Berber tribe called *Magyar* (Magyarab) living on an island of the Nile. In 1941 he was called up for military service and on German request was transferred to the *Afrika Korps*. He was in a Soviet prison after World War II. In Hungary he was tried for treason, eventually acquitted. After the Communist take-over he escaped from Hungary. In 1949 he established a world distance record by towing a glider from Paris to Cairo. On his deathbed he learned that he had been appointed Director of the Egyptian Desert Research Institute. A part of his life was immortalized in the feature film *The English Patient* (1966). – B: 1105, 1482, T: 7456. → **Magyarabs; Magyar, László; Teleki, Count Sámuel; Kittenberger, Kálmán; Africa, Hungarians in.**

**Almásy-Nedeczky Plot** – Planned in 1864 and aimed at re-establishing the national independence of Hungary lost in the defeat of the War of Independence (1848-1849). A similar organization in Poland and their uprising in 1863-1864 inspired the plotters. The participants were in agreement as to immediate tactics but disagreed on goals. István (Stephen) Nedeczky, a former officer during the war, insisted on the Proclamation of Independence (dethronement of the Habsburgs), but Pál (Paul) Almásy, a former speaker of the House of Representatives that convened in Debrecen in 1849, would have been satisfied with the reconstitution of the reform laws of 1848. During the preparation of armed insurrection they organized successful anti-Habsburg demonstrations; but due to

treason the police arrested the plotters. Following the compromise with Austria in 1867 the leaders received amnesty. – B: 1138, 1020, T: 7661.→**Almásy, Pál; Nedeczky, István; Beniczky, Lajos.**

**Almásy, Pál** (Paul) (Gyöngyös, 1818 - Budapest, 1 November 1882) – Politician, landowner. In 1848 he was representative of Gyöngyös then Deputy-President of the House of Representatives. In 1849 he was President of the House of Representatives in Debrecen. On 14 April 1849 he announced the dethronement of the House of Habsburg as monarchs of Hungary. After the fall of the War of Independence of 1848-1849, he lived for a while in Geneva, Brussels and Paris. After he received amnesty, he retired to his estate in County Heves. In 1864, with István (Stephen) Nedeczky and Lajos (Louis) Beniczky, he organized a movement for the restoration of Hungary's independence on the bases of the laws of 1848. They organized demonstrations as a preparation for an armed rebellion. The plan was betrayed and he was arrested, prosecuted, and sentence for 20 years of custody in Castle Olmütz. In 1866 he received amnesty. After the Compromise (*Ausgleich – Kiegyezés*) of 1876, he retired to his estate. – B: 0883, T: 7103.→**Freedom Fight of 1848-1849; Almásy-Nedeczky Plot; Nedeczky István; Beniczky, Lajos; Compromise of 1867.**

**Álmos** (? 819 - Transylvania, *Erdély*, now Romania - ?) – According to legend he was the son of tribal leader *Ügek* and his wife *Emese*, a direct descendent of Attila through his youngest son *Irnik* – the legendary *Csaba* of the Szekler chronicles. Irnik later became the leader of the Onogur-Bulgars along the shores of the Black Sea. This is confirmed by a contemporary Greek document found and deciphered by the Bulgarian Omeljan Pritsak in 1955 (*Die bulgarische Fürstenliste ...The Bulgarian Royal Lists* 1955, Wiesbaden). Álmos, the leader of the Magyar tribe, was elected supreme leader of the seven tribes in the territory known as Etelköz (now in Southern Ukraine) by forming an alliance sanctioned with a Blood Treaty (*Vérszerződés*). He led the united tribes now collectively called Magyars to the Carpathian Basin as far as Transylvania. A legend tells us having fulfilled his mission he turned over his power to his son Árpád. – B: 0962, 7617, T: 7617.→**Etelköz; Blood Treaty; Emese; Irnik; Csaba; Csaba, Legend of Prince; Ügek; Álmos; Árpád.**

**Alpár** – This is a town in County Bács-Kiskun. The remains of an earthen fortification (*földvár*) are recognizable on the mound around the church, called Nagyobbvár. It was probably an Avar center. Of the two separate high mounds one lacks any construction except some wine cellars dug into its side; the other mound is the site of a church. A monument commemorating the 900th anniversary of the settlement of the Hungarians in the Carpathian Basin under Árpád is located at the south side of the fort. The plaque on the monument has the following inscription: “The remains of a several-thousand-year-old earth fortress. This fort played a significant role at the time of Árpád's conquest of this land. This commemorative plaque was placed here by the Town Council” (*Több ezer éves földvár maradványai. A vár jelentős szerepet töltött be a honfoglalás idején. Ezen emléktáblát emelte a nagyközségi tanács*). – B: 0942, T: 7662.→ **Árpád.**

**Alpár, Gitta** (Klopfer) (Budapest, 5 March 1903 - Palm-Springs, California, USA, 17 February 1991) – Coloratura soprano, actress. Her father, cantor of the Dohány Street

Synagogue, Budapest, gave her the first lessons in music. Later she enrolled at the Ferenc (Franz) Liszt Academy of Music, Budapest, where she studied singing, and learned to play the piano. Her stage career began at the Budapest Opera House in 1923, where she appeared as Gilda in Verdi's *Rigoletto*. She was a member of the Munich Opera House (1925-1927). Between 1927 and 1933 she was a member of the Berlin Staatsoper and became famous in Mozart's *Magic Flute*, in Rossini's *Barber of Seville*, and Carl Millocker's *The Beggar Student (Der Bettelstudent)*. She left Berlin for Budapest, then for Vienna in 1933, for political reasons. In 1936 she moved to the USA, where she was able to continue her career as an operetta singer. The film industry became aware of her talents and she made her film debut with the productions *Gitta entdeckt ihr Herz (Gitta Pours out her Heart)*. Her other film roles were in *Ball in Savoy*, *Guilty Melody*, *M. Stringfellow Says No*. Her last movies include *Everything in Life*, *The Loves of Madame Du Barry*, and *The Flame of New Orleans (New Orleans angyalai)* with Marlene Dietrich. Following her retirement from stage and film roles she trained young actresses in her home. She was the recipient of the Golden Band Medal in Berlin (1987). – B: 1105, 1445, T: 7103.→ **Gyurkovics, Mária; Sándor, Erzsi.**

**Alpár, Ignác** (Ignatius) (Pest, 17 January 1855 - Zürich, Switzerland, 27 April 1928) – Architect. He started out as a bricklayer and then became a student of Alajos (Aloysius) Hauszmann. He gained his diploma in Berlin and after his return to Hungary he became assistant professor to Imre (Emeric) Steindl and later Alajos Hauszmann. From 1890 he was engaged in creating designs and became a master of late eclecticism. Many buildings reflect his talent: county houses, theaters, banks, bathhouses and churches. His most important works are the Stock Market Palace (*Tőzsdepalota*) and the Hungarian Agricultural Museum (*Magyar Mezőgazdasági Múzeum*) by the lake in the City Park (*Városliget*), Budapest. – B: 0883, 1105, T: 7663.→**Steindl, Imre; Hauszmann, Alajos.**

**Alvinczi, Péter** (Alvinci) (Nagyenyed, now Aiud, Romania, ca. 1570 – Kassa, now Košice, Slovakia, 22 November 1634) – Preacher of the Reformed Church. He attended school in his hometown and later in Nagyvárád (now Oradea, Romania). He also attended the Universities of Würtemberg (1598) and Heidelberg (1600), Germany. In 1601 he was Rector at the Reformed College of Debrecen. In 1603 he was minister at Nagyvárád, later dean of the Bihar deanery. In 1605 he had to leave Nagyvárád (now Oradea, Romania) because of wartime difficulties and soon became minister in Kassa (now Kosiče, Slovakia), where he managed to maintain tolerance among the denominations. He also played a role in political life. He was the confidant of Prince István (Stephen) Bocskai (1605-1606), then Zsigmond (Sigismund) Rákóczi (1606-1608), and finally Reigning Prince Gábor (Gabriel) Bethlen (1613-1629). He was involved in sharp polemics with the Roman Catholic Péter Pázmány. He is regarded as the author of the *Querela Hungariae (Complaint of Hungary)* political flyer (1619), and *Postilla*, sermons vols. i, ii (1633-1634). – B: 0931, 1257, T: 7103.→**Bocskai, Prince István; Bethlen de Iktár, Prince Gábor; Pázmány, Péter.**

**Amade, Baron László** (Ladislav) (*várkonyi*) (Bős, 12 March 1703 - Felbár, 22 December 1764) – Poet. His higher studies were at the University of Nagyszombat (now Trnava, Slovakia) run by the Jesuits. He pursued postgraduate studies at Graz, Austria, where he obtained a Ph.D. in 1725. In 1734 he joined the Hávör Hussars with the rank of Captain;

in 1742 he was promoted to Colonel; two years later he was aide-de-camp of a general. He gave up his military career in 1750, and was appointed Counsellor to the Imperial and Royal Chamber in Pozsony (now Bratislava, Slovakia); in 1751, he was appointed Imperial and Royal Chamberlain, an office he held until his death. His works include *Victor in praelio S. Ivo* (1722); *Vocal Supplications of a Pious Heart (Buzgó szívnek énekes fohászkodási)* (1755), and *Poems of Baron László Amade (Várkonyi báró Amade László versei)* (Pest, 1836). To his well-known poem, entitled *The Handsome and Illustrious Soldier... (A szép fényes katonának [arany, gyöngy élete]...)*, poet laureate János (John) Arany composed a tune. – B: 1031, T: 7103.→**Arany, János; Kelecsényi-Songbook.**

**Amber Route** – In antiquity it was a well-established commercial trading route between the Baltic Sea, where amber was found, and northern Italy, where it was valued as jewelry. German merchants would take the goods to Pannonia, about 960 km away, from where the Venetians transported them further. When the Romans occupied the former Noricum (now Austria) all the way to the River Danube, most of this route fell under their authority. They paved the original road with flat stones and used it for military purposes. Parts of this road may still be found in Vienna, Austria, as well as in Sopron and Szombathely, Hungary. – B: 1148, T: 7676.

**Ambrosius Pannonius** (Ambrosius of Pannonia) (Second half of the 15th century - Vienna, Austria, 1536) – Humanist, Hungarian religious author and publisher. In 1484 he entered the Scottish Benedictine Monastery in Vienna, where he became Prior in 1509. He published four printed liturgical books, where the *devotio moderna* and humanist morals can be found together: *Cursus Beatae Mariae Virginis* (1513), *Additiones ad cursus* (1514). In his breviarium *Diurnale monasticum* (1515) are prayers to Hungarian saints. In his last work *Vigiliae officium et moruorum* (1518) are some music notations as well. – B: 1150, 1257, T: 7666.

**Ambrus, Zoltán** (Debrecen, 22 February 1861 - Budapest, 22 February 1932) – Writer, literary translator, critic. His university studies were taken at the Law School of the University of Budapest. In 1885 he went on a study trip to Paris. Following his return he worked for newspapers such as the *Week (Hét)* and the *West (Nyugat)*, where he published his novels, short stories and theater critiques. He was dramaturgist and later manager of the National Theater (*Nemzeti Színház*), Budapest (1916-1922). He was also involved in editorial work at the newspapers *New Hungarian Review (Új Magyar Szemle)*, and the weekly *Future (Jövendő)*. He was a fine translator of French prose and a member of the Kisfaludy and the Petőfi Societies. His writings are reflection on city life. His works include *King Midas (Midás király)*, novel (1891, 1906)é *Giroflé and Girofla, vols i, ii*, novel (1899)é *Baron Berzsenyi and his Family (Báró Berzsenyi és családja)*, sketches (1902)é *Leading Minds (Vezető elmék)* studies (1913), and *Theater Evenings (Színházi esték)* (1914). He was one of the outstanding prose writers at the beginning of the 20th century. – B: 0883, 1257, T: 7103.

**America, First Hungarians Arriving in** – According to written records, the first person from Hungary to arrive in America was Tyrker, who came ashore with the Viking Leif Erikson's ships on the coast of what is now Newfoundland, Canada, around 1000 AD. A

few hundred years later, on 13 December 1519, when the ships of the Magellan expedition dropped anchor in South America on the shores of today's Rio de Janeiro, the commander of its artillery division was the Hungarian János (John) Varga. On 3 August 1583 István (Stephen) Parmenius Budai arrived with Sir Gilbert Humperly's expedition again to the shores of Newfoundland and was the first to record the New World in writing. – B: 1134, 1020, T: 7668.→**America, Hungarians in the USA; Parmenius, István of Buda.**

**America, Hungarians in the USA** – As early as the end of the 18th century, Hungarian emigrants arrived in the USA; some moved on to other countries of the Continent. The main waves were the Kossuth émigrés in the mid-19th century; around the turn of the 20th century, during the interwar years, then following the crushed revolution in 1956; and finally in the period of the collapse of Communism in Hungary in 1989. There were 453,000 Hungarians in the USA in 1940. Some 80% of them lived in the huge industrial centers such as New York, Pennsylvania, Ohio, New Jersey, Illinois and Michigan. In 1991 their numbers grew to 1,579,784. The 2001 census shows their numbers as 1.54 million. According to the Organization for Economic Co-operation and Development some 100,000 Hungarians immigrated to the USA between 1990 and 2002. The descendants of all Hungarian emigrants in the USA are estimated to be about 6 million. There are Hungarians in each state. Their numbers in 2000 were 194,000 Hungarians in Ohio, in New York 137,000, in California 133,000, in Pennsylvania 132,000, in New Jersey 115,000, Florida 96,000. In 16 other states their number varies between 10,000 and 100,000. In 26 States their number varies between 2,000 and 10,000. In South-Dakota, Mississippi and Wyoming they number less than 2,000. In the USA around the turn of the millennium there were 285 Hungarian registered societies, 127 Hungarian churches, as well as 21 Hungarian schools operating in the afternoon. There were 23 boy-scout troops, 41 Hungarian newspapers, 9 radio broadcasts in Hungarian, and 7 TV stations with some Hungarian programming. – B: 1134, 1104, 1154, T: 7661.

**America, Hungarian Songs About** – A collection of lyrical folk songs about the immigration to the USA. Their birth is contemporary to the beginning of the immigration at the end of the 18th century. Their rise was sporadic but they grew more numerous from the 1870s on. Their melodies beget memories of the style of wandering troubadours, songs of prisoners and songs of farewell. They were mainly developed through rewriting the lyrics of old folk and popular songs to reflect the new life. Truly original lyrics in these songs were rare. Their lyrical contents can be divided into three categories: (1) Farewell songs about the family, a loved one, the ancestral home and the country. (2) Songs of lament about the difficulties of the new life. (3) Songs reflecting homesickness, longing for the family, the familiar sights, and the country left behind. These songs have important documentary value and they also give insight into the development and rewording of old folk lyrics. – B: 1134, 1020, T: 3240.

**Ámos, Imre** (Emeric) (Nagykálló, 7 December 1907 - Ohrruf, Germany, 1944/1945) – Painter. His university studies were taken at the Budapest Polytechnic (1927-1929) and at the Academy of Fine Arts, Budapest (1929-1935) where he was a student of Gyula (Julius) Rudnay. His exhibitions were held in Budapest in 1931, 1933, and in 1943, when he won first prize with his painting *Dreaming Women* (*Álmodozó asszonyok*). In 1935 he

had an exhibition with his wife Anna Margit at the Ernst Museum, Budapest. During the same period he became member of the Munkácsi Guild. In the following year he was elected member of the New Society of Fine Artists. In the summer he worked at Szentendre, north of Budapest. In 1937 he went on a study trip to France and established contact with Chagall. In 1938 he became a member of the National Salon. From 1941 to 1944 he was in the labor unit of the army in the southern part of Hungary (*Délvidék*, now Voivodina, Serbia) then on the eastern front. In 1944 he was deported to Germany where he died. His paintings include *Source of Purity (Tisztaság forrása)* (1933); *Dreamer (Álmodó)* (1938); *Self-portrait with Nail and Hammer (Önarckép szöggel és kalapáccsal)* (1939); *Dark Times (Sötét idők)*, series (1940), and *A Couple in front of the Barbed Wire (Pár a szögesdrót előtt)* (1944). – B: 0883, 1124, T: 7103. → **Rudnay, Gyula.**

**Anabaptists in Hungary** – Anabaptism was a widespread sectarian movement of the Radical Reformation. The name Anabaptist means literally “rebaptizer”, although the sect repudiated infant baptism (at the time a crime punishable by death) and baptized their children only after they reached the age 12 or 13. The sectarians themselves never used the name Anabaptist. They turned away from the immoral world believing in the Last Judgment and in the salvation of the virtuous. The sect did not accept the dogmas of the Roman Church or the teachings of the Protestant Churches; thus the Roman Catholic, Lutheran and Calvinist churches persecuted them alike in the western lands. The sect was founded around 1525. By 1530 close to a thousand Anabaptists are believed to have been executed or burned at the stake abroad. Under the name Anabaptist two major groups are distinguishable: the Mennonites, including the Swiss Brethren, the Amish and the Hutterites (Habans). To avoid persecution the former group fled to the West, the latter to the East. Both groups included masters of many crafts and highly skilled farmers using scientific methods. Their medical doctors were much sought after for their knowledge by royalty and the local aristocracy. The Hutterites settled in the historical northern part of Hungary (*Felvidék*, now Slovakia) in the second quarter of the 16th century. They lived in a strict communal society based on Biblical principles. In Hungary they were literate in a largely illiterate rural society, maintained regular schools for their children, copied the Bible and secretly wrote their own Chronicles. They excelled in the crafts especially in producing fine tin-glaze earthenware for their landlords and protectors. The Hutterites suffered greatly in the Thirty Years War (1618-1648) and a large number of them moved to Transylvania (*Erdély*, now in Romania) at the invitation of Reigning Prince Gábor (Gabriel) Bethlen (1580-1629). Later, to keep one step ahead of the Counter-Reformation, many of them moved to Russia and still later to the United States and Canada. The American Baptists trace the origin of their church back to the Anabaptists by way of the Mennonites in the Netherlands. – B: 7654, 7655, T: 7654. → **Habans; Hutterites; Bethlen, Prince Gábor.**

**Anavi, Ádám** (Torda, now Turda, Romania, 26 February 1909 - Temesvár, now Timisoara, Romania, 23 February 2009) – Poet, writer, dramaturgist. His higher studies were taken at the University of Kolozsvár (now Cluj-Napoca, Romania), where he read Philosophy. He moved to Temesvár (now Timisoara, Romania) and started working as a teacher. He settled in this town for life. He became one of the most important representatives of Hungarian literature not only in the Bánság district, but also in the Partium and Transylvania. He reorganized the circle of poets and writers of Temesvár.

His works include *Truth of the Elderly* (*Öregek igazsága*), play (1940); *Shoo, Poverty* (*Hess, szegénység*) poems (1944); *Metaphoric Times* (*Metaforikus idők*) collected poems (1959); *Knuckles and the Other Four* (*Csülök és a többi négy*) juvenile poems (1978) *Kepler*, drama (1995), and *Shepherds of Light* (*Fénypásztorok*), drama. He was recipient the Prize of the Writers' Association of Temesvár (1970). – B: 0877, 0878, 1036, T: 7103.

**Ancestor Cult** – A form of the cult of ancestors where prescribed homage was paid to the real or imagined ancestors and the rites connected with it. The ancestors in many places are regarded as benign guardian spirits who see to the welfare of the living. Their goodwill however must be secured by performing rites with sacrifices. The image relics are to be guarded in separate places in homes and their memory preserved in prayers and songs. Prior to conversion to Christianity, the ancestral cult played an important role among Hungarians. Archeological finds and writings in ancient chronicles point to this. Some important families or clans considered themselves to be descendants of a supernatural being that might have an animal form called a totem ancestor. The ancestor of the clan was regarded as a supernatural being. Relatives of important families were often buried in the same place.

At the era of cremations it was customary to bury the ashes beneath the threshold of the door of the ancestral founder and guardian of the family, especially the one who died far away because the door symbolized the gate between life and death. King László I (St Ladislas) (1077-1095) decreed the abandonment of this custom in his first book of laws, ordering the dead to be buried next to the church. Although King Kálmán (Coloman, 1095-1116) renewed this law, some of the families still tried to uphold this ancient custom. Peasants in villages still don't step onto the threshold but over it. The memory of the ancestral cult is demonstrated in calling the firstborn son by the name of the ancestor. – B: 1134, 1336, 1020, T: 7682.

**Ancestors, Religion of** – According to research the basic character of the ancestral religion of the proto-Hungarians was animistic. It included belief in spirits, in the spirit of the dead, in the cult of the good and evil, and homage to dead ancestors. The family (home) and clan spirits, as well as their symbols played an important part. These represent the developed forms of totemism. The significance of animism and totemism in the history of religion is that the idea of a god becomes personal and consequently the image of a world-redeeming god appears. In this way the religious cultivation of ancestors by the Hungarians made it easier for them to accept Christianity.

From sources prior to their settlement in the Carpathian Basin and also from folk tradition, the ancestor religion can be proved with certainty. Islamic and Byzantine sources distinguish between fire and idol worshipers among the horse-riding peoples. The people of Árpád are described unanimously as fire worshipers. The Chronicle of Kiev describes them as Black Ogurs, because black was the mark of the fire worshipers. The Hungarian folk tales without doubt preserve the notions of *Black King* (*Fekete Király*), *Red Cow's Son* (*Vörösthén fia*), or *John the Strong* (*Erős János*). *Son of the White Horse* or *Son of the Kabalo* (*Fehérló fia vagy Kaboló fia*), *Cult of the Autumn Sun and the Spring Sun* (*Őszi Nap és Tavasz Nap kultusza*). The greatest revolt of the followers of the old religion against the Christian religion happened in 1061, when King Béla I (1060-1063) ascended the throne. János (John), son of Vata rose up in arms and was followed

by the Szeklers. King Béla I, after defeating the army of János at Székesfehérvár, descended upon the Szeklers and defeated the followers of the ancestral religion. He abolished everything among the Szeklers that could remind them of the old religion.– B: 1152, 1336, 1020, T: 7682.→**Rabonbán; Szabó, Károly; Toldy, Ferenc.**

**Ancient Chronicle** (*Ősgeszta, Gesta Ungarorum*) – A chronicle originating from the middle of the 11th century, probably around 1066. The original text is now lost. The work was based on written sources and oral traditions compiled by an unknown Hungarian cleric. It dealt with the history of the era and that of the Hungarian people prior to the Settlement Period of 896 AD. It is believed to have contained the ancient history of the Hungarians based in the main part on Hungarian-Hun traditions, as well as on 11th century written sources and legends. It placed the Huns' arrival in the Carpathian Basin in 373, and the arrival of the Avars in 558, exactly 104 years after the death of Attila. It relates the founding of the seven Transylvanian (*Erdély*, now in Romania) castles (*Septem castra, Siebenbürgen*), preceded by the immolation of Álmos. The 12th century chronicler Anonymus wrote his subsequent personal chronicle of Árpád's homecoming Magyars as a complement to the Ancient Chronicle. Later, Master Ákos expanded it, while Simon Kézai arbitrarily abridged the expanded text. The known textual versions of the Chronicle are reflected in the Illuminated Chronicle (*Cronica de gestis Hungarorum*) in the Zsomboki-Codex (*Sambucus-Codex*) and in the 16th century Turkish *Tarih-i Üngürüş* (*The Story of the Hungarians*). – B: 1153, T: 7617.→**Anonymus; Illuminated Chronicle; Kézai, Simon; Ákos, Master; Tarih-i Üngürüş; Zsámboki Codex.**

**Ancient Hungarian Runic Writing**→**Hungarian Runic Script.**

**Ancient Poetry** – Hungarian poesy's rich past is attested to not only by the chronicles. There are other authentic records from early times, which show that the Hungarians had a long tradition of songs not only for the glorification of God, Earth, Fire and Creation, but also to tell about the heroic deeds and military prowess of their ancestors, as examples for the young. The chronicler Anonymus quotes two lines from tribal leader Tétény's heroic poem: "*They won land for themselves and a reputation and a good name with it*". Ancient poesy was an oral tradition. It was not written down because after conversion to Christianity an early church interdict prohibited Hungarian secular songs and destroyed any written record of them. In spite of this, a considerable number of the once rich sources survived, even if only fragmentarily. These fragments passed through centuries like a subterranean stream and survived in the chronicles, partly in the *Csaba Legend*, partly in the texts of the classical ballads, as well in the chivalric tale of *Toldi* by János (John) Arany. But it survived mostly in Hungarian folk tales. – B: 1141, 1020, T: 7617.→**Anonymus; Csaba; Arany, János.**

**Ancsel, Éva** (Eve) (Budapest, 23 May 1927 - Budapest, 1 May 1993) – Philosopher, poet. Her higher studies were taken at the University of Budapest, where she read Philosophy, Psychology and Sociology (1945-1950). She taught at a number of schools, and in 1970 she became an adjunct professor, later Professor of Philosophy at the University of Budapest. Her poems appeared until 1957. She researched meeting points of ethics and the history of philosophy and she worked on solving a question on

philosophical anthropology. Her works include *Art, Catharsis, Education (Művészet, katarzis, nevelés)* (1970); *The Dilemmas of Freedom (A szabadság dilemmái)* essay (1972) (in English 1978); *History and Alternatives...(Történelem és alternatívák...)* (1978) (in German 1984), and *On the Ethos of Knowledge (A tudás étoszáról)* (1986). She was a corresponding member of the Hungarian Academy of Sciences and a recipient of the State Prize (1983). – B: 0878, 1257, T: 7103.

**Anda, Géza** (Geza) (Budapest, 19 November 1921 - Zürich, Switzerland, 13 June 1976) – Concert pianist, music teacher. His higher studies were taken at the Ferenc (Franz) Liszt Academy of Music, Budapest, where he studied with Ernő (Ernest von) Dohnányi and Leó Weiner. As a protégé of the German conductor Furtwängler, he went to Berlin on a scholarship in 1941. In 1942, after Hungary entered World War II, he moved to Zürich. In 1960 he took over Edwin Fischer's master classes in Lucerne. In 1969 he started his own master classes, running them with missionary zeal. As a performing artist he excelled in the interpretation of Bartók's music. His recordings of the three piano concertos under Ferenc Fricsay are timeless classics. He was also famed for his interpretation of Mozart. He recorded all of Mozart's piano concertos with the Camerata Academica des Salzburger Mozarteum, being the first pianist to do so. His performance ideal was a true synthesis of temperament and intellect. From 1957 on he also performed as a conductor. He held master courses at Lausanne, Salzburg and in Hungary. He succumbed to cancer at the height of his career (aged 55). He was a member of the Royal Academy of Music, London. – B: 0883, 1279, T: 7103.→**Bartók, Béla; Dohnányi, Ernő; Weiner, Leó; Fricsay, Ferenc.**

**András I, King (Endre, Andrew)** (? - Zirc, 1060) – Hungarian king of the House of Árpád reigned between 1046 and 1060. He was the great grandson of Prince Taksony, son of Vászoly (Vazul), father of Salamon. He married Anastasia, daughter of Jaroslav the Wise of Russia. After the blinding of his father, András fled with his brothers Levente and Béla to the Bohemian Prince Bretislav, and then on to Kijev, where he was baptized. During the battles for the throne following the death of King István I (St Stephen, 1038) Hungarian leaders fighting against Prince Peter called for his assistance. He arrived with his brother Levente and the Russian troops. Not just the nobility but also the members of a pagan revolution made up of poor commoners aided his ascent to the throne, following which he defeated the Vata rebellion. In the early years of his reign he concentrated on strengthening the royal power and Christianity and mending Hungarian-German relations. However, Holy Roman Emperor, Henry III rejected his offers of peace mediated by the pope and attacked Hungary, trying to force András I to give up all the westernmost areas of Hungary as far east as the Lajta River. Henry's first campaign in 1051 was in the Vértes Mountain. His second one in 1052 was near Pozsony (now Bratislava, Slovakia); but in both attacks the Hungarian forces defeated him. Hungarian victories were greatly helped by the tactics of King András. In front of the invading army, territories were evacuated and the supply ships near Pozsony on the Danube were scuttled by the diver, Kund (Zotmund). To follow up the successful defense of Hungary, András I sent his army into Austrian (Karinthian) and Bavarian territories to ravage them and this continued until Henry III's death in 1056. He lost a battle against his brother Béla and was trampled by horses. He died of his wounds at Zirc in 1060 and was buried at the Abbey of Tihany, which he founded in 1055. He bequeathed the "sword of Attila" to his

widow. – B: 0883, 1031, T: 3312.→**Attila, Sword of; Tihany Abbey Foundation Document.**

**András II, King (Endre, Andrew)** (1176 or 1177 - 21 September 1235; ruled 1205 - 1235) – Second son of Hungarian King Béla III (1172-1196). He married three times. His children of his first marriage with Gertrude of Meran (Merano) were Béla, Kálmán (Coloman), András, and two daughters. One of them was St Elizabeth, a famous Hungarian saint. He turned against his brother King Imre (Emeric) and became an independent ruler. In 1199 he lost a battle and took refuge with the Austrian prince. During the first 15 years of his reign he was tied down with the expansionist politics of Halics (Haliz, Galic, town in Galicia, now divided between Poland and Ukraine). In his absence his wife Gertude, due to her lavish lifestyle and intrigues, became victim of the rebellious nobles and was assassinated in 1213. Her assassination is the theme of József (Joseph) Katona's classic drama, *Bánk bán*, made into an opera by Ferenc (Francis) Erkel. His father, the great Béla III, left a coffer full of gold for him to finance a crusade to the Holy Land, but András II squandered it. This led to the royal treasury falling into debt and the monarchy reaching the verge of anarchy. Due to the deterioration of the royal finances, he had to contract out the national revenue to the Ismaelites and the Jews. Finally he mustered enough strength to launch the long planned crusade, the so-called "Crusade No. 5", with an army of 15,000 men. About 10,000 of them sailed from Venice to Acre. The whole undertaking proved a failure. Meanwhile, the internal conditions continued to worsen in Hungary and his son, the future great King Béla IV (1235-1270), became leader of the disgruntled masses. Even András' *Golden Bull* of 1222 (the Hungarian *Magna Carta* – the first in continental Europe – an important source of the Hungarian constitution until 1949) could not counter-balance the situation, although it limited the royal privileges, confirmed the basic rights of the nobles, promised to improve the coinage of the realm, and guaranteed justice for the whole nation. It also gave the nobles the right to resist by force any illegal decree by the king. This was the *jus resistendi*. The Archbishop of Esztergom was empowered to excommunicate the King if he did not mend his ways. In 1224, András II issued the *Andreanum* document ensuring the rights of the Saxons in Transylvania (*Erdély*, now in Romania). He also clashed with the Teutonic Order, settled by him in the Barcaság in 1208, which challenged both royal and church authority, and they were expelled from the country in 1225. Since he did not agree with the Church, he was excommunicated in 1231 and was forced to appeal to Pope Gregory IX for absolution. He agreed to all the demands of the Church in the Agreement of Bereg in 1232. On his coat of arms, shaped like the sun's disc, are seven stripes and seven lions rampant. Subsequent rulers retained only the seven stripes on the national flag. He was buried in the Cistercian Monastery of Egres (now Igrış in Romania). – B: 0945, 0883, 1031, 7456, T: 7456.→ **Golden Bull; St. Elizabeth; Katona, József; Erkel, Ferenc.**

**András III, King (Endre, Andrew)** (ca. 1265 - Buda, 14 January, 1301) – Last king (1290 -1301) of the male line of the Árpád Dynasty, grandson of András II, posthumous son of Prince István (Stephen) and a Venetian Patrician's daughter Morosini Thomasina. He was educated in Venice. Following the assassination of King László IV (Ladislas) the "Kun" (Cuman), the Hungarian estates elected András king, the last living male member of the Árpád Dynasty. His coronation took place on 23 July 1290 in Buda. His reign was

complicated by the pretenders, the descendants of Maria, daughter of King Béla IV, Queen of Naples and Sicily, and of the Anjou dynasty supported by the pope. András III survived difficult times with the help of the Hungarian clergy and the lesser nobility. They were his devoted supporters throughout his reign and during his fights against the Anjous and the Hungarian oligarchs, who possessed huge estates, such as the Kőszegi clan and Máté (Matthew) Csák. His entire reign was full of fights with the different baronial alliances. He even conducted a successful military campaign against Albert, Prince of Austria, regaining the earlier lost territories in the Peace Treaty of Hainburg in 1291. Later, he supported the Prince in the battle of Göttheim in his bid for the German crown. Following the death of his first wife, Fennena of Kujavia (1295), he married the daughter of Prince Albert. The king's mother was his main supporter; but she was poisoned and, according to a legend, he was poisoned too. His only daughter Elizabeth, a nun born to his first wife, survived him. He was buried in the Franciscan Church of St John in Buda. With his death the male-line of the Árpád dynasty died out. B: 0945, 0883, 1031, 7456, T: 7456. → **Árpád, House of; Csák, Máté.**

**András, Imre S.J.** (Emeric) (Csíkszereda, now Miercurea Ciuc, Romania, 30 October 1928 - Vienna, 24 December 2011) – Monk-priest, sociologist. He studied Theology in Szeged (1953-1956) and in Innsbruck (1956-1960); later studied Sociology in Vienna (1963-1972). In 1947 he joined the Jesuit Order in Hungary and after the dissolution of the Order he worked as electro-technician from 1950 to 1956. During the 1956 Revolution he left Hungary for Austria, where he was ordained in 1959. In 1961 he became an associate in the Hungarian Church's Sociological Institute in Vienna, and since 1962, he was its leader. He lectured on Sociology at the Péter Pázmány Catholic University in Budapest between 1992 and 1995. There are more than 200 publications to his credit. His books include *Bilanz des ungarischen Katholizismus (The Balance of Hungarian Catholicism)*, with Gyula Morel (1969); *Entstehung und Entwicklung der sogenannten "Völkischen Bewegung" in Ungarn, 1920-1956 (Consolidation and Unfolding of the so called "Folkmovement" in Hungary, 1920-1956)* (1974); *Hungarian Catholicism: A Handbook*, with Gyula Morel (1983), and *Hungarian Catholic Books, 1945-2003 (Magyar nyelvű katolikus könyvek, 1945-1993)* (2004). He was recipient of the Officer Cross of the Order of Merit of the Republic of Hungary (1994). He was buried in Csíkszereda. – B: 0874, 1639, T: 7103.

**Andrásfalvy, Bertalan** (Bartholomew) (Sopron, 17 November 1931 - ) – Ethnographer, politician. His higher studies were at the University of Budapest (1950-1955), where he studied Romanian and Hungarian Literature, Museology, Ethnography, obtaining his qualification in Agricultural Engineering from the Technical College of Kecskemét (1965). From 1955 to 1960 he was a museologist at the Museum of Szekszárd. From 1960 to 1976 he was a science contributor for the Transdanubian (*Dunántúl*) Scientific Institution. From 1977 to 1985 he was the Department Head at the Janus Pannonius Museum, Pécs. Thereafter he worked in various places, including at the University of Pécs, where he was a professor, organized the ethnography department, and was Editor of the *Acta Ethnographica*. Between 1990 and 1993 he was Minister of Education and Culture. His fields of research are wine and fruit cultures, animal husbandry, ethnographic groups, and folk heritage's impact upon future public education. He was a member of the Hungarian Democratic Forum (*Magyar Demokrata Fórum-MDF*) and

since 1988 he has been a member of the leadership. He left the MDF in 2005 and became a member of the National Forum (*Nemzeti Fórum*). He is also on the board of some foundations and learned societies. He authored textbooks and wrote some 160 scientific articles and studies. His works include *The Folkart of Sárköz (A Sárköz népművészete)* (1967), *The Folkart Yesterday and Today*, with T. Hoffer (*A népművészet tegnap és ma*) (1976), *Bibó Memorial Book (Bibó Emlékkönyv)*, co-authored (1980), and *Tradition and Future (Hagyomány és jövő)* (2004). He is a recipient, among others, of the Ericson Prize (1980), the István Győrffy Memorial Medal (1983), the Middle Cross with the Star of the Order of Merit of the Republic of Hungary (1994), the Péter Pázmány Prize (2007), the Prima Prize (2007), the Gold Medal of the Hungarian Art Academy (2008), and is Honorary Citizen of Pécs (2010). – B: 0874, 1257, 1031, T: 7103.

**Andrássy, Count Gyula (1)** (Julius) (Oláhpaták, now Vlachovo, Slovakia, 8 March 1823 - Volosca, now Volosco, Croatia, 18 February 1890) – Politician, statesman. First he was

a follower of Count István (Stephen) Széchenyi; but later joined Lajos (Louis) Kossuth. He was Lord Lieutenant of County Zemplén, then commander of its National Guard. He participated in the battles of Pákozd and Schwechat, and became an adjutant to General Artur Görgey during the 1848-1849 War of Independence. After its defeat he lived in Constantinople, Paris and London. He was sentenced to death in absentia and executed in effigy. In Paris he abandoned his former policy and was in favor of a compromise with Austria. After the amnesty in 1858, he returned to Hungary, sided with Ferenc (Francis) Deák, and worked for the compromise with Austria. He was

Prime Minister and Minister of Defense from 1867 until 1871. He helped to realize the Austro-Hungarian Dual-Monarchy. He became Minister of Foreign Affairs of the Monarchy in 1871. He worked for closer relations with Germany, and was instrumental in calling together the Berlin Conference in 1878 with far-reaching political consequences. It allowed the Monarchy to take possession of Bosnia-Herzegovina. The state of Wallachia received the name Roumania (now Romania) on the suggestion of the Foreign Minister of the Austro-Hungarian Monarchy Gyula (Julius) Andrássy. One day before his resignation, on 8 October 1878, he signed the alliance between Austro-Hungary and Germany, aimed against France and Russia. After centuries, he was the first Hungarian diplomat involved in major political decision-making, affecting world affairs. He was not only a talented and skillful politician and statesman, but also a pleasant and noble-minded gentleman. After his resignation he withdrew from politics. – B: 0883, 0881, 1122, T: 7103. → **Görgey, Artur; Deák, Ferenc; Kossuth, Lajos; Compromise; Freedom Fight of 1848-1849.**

**Andrássy, Count Gyula (2)** (Julius) (Töketerebes, now Trebišov, Slovakia, 30 June 1860 - Budapest, 11 June 1929) – Politician, son of Gyula (Julius) Andrássy (1823-1890). He was a member of the Liberal party and, in 1894-1895, was Minister for the Person of the King. In 1904, in protest against István (Stephen) Tisza's conservative policy, he left the Liberal party and joined the opposition. He sharply criticized the Fejérvári

government. In 1905 he became leader of the Constitution Party. In the Wekerle government he was Minister of the Interior from 1906 to 1910. In 1918 he conducted diplomatic negotiations in Switzerland. At the end of 1918, for a short time, he was Minister of Foreign Affairs of the Monarchy. In 1919 he was leader of the Hungarian Anti-Communist Committee in Vienna. He was involved in the second royal coup d'état of King Károly IV (Charles) in 1921. Later he joined the Christian National Unity party and fought against the Bethlen government. He was a member of the Hungarian Academy of Sciences. His works include *On the Compromise of 1867 (Az 1876-es kiegyezésről)* (1896); *Causes of the Survival of the Hungarian State and its Constitutional Freedom, vols. i-ii-iii (A Magyar állam fönntmaradásának és alkotmányos szabadságának okai, I.II.III)* (1910-1911); *The Problem of the King from a Legal Point of View (A királykérdés jogi szempontból)*, and *The Preliminaries of the World War, vols. i-ii (A világháború előzményei I-II)* (1925-1926). – B: 0883, 1122, T: 7103.→**Andrássy, Count Gyula (1); Tisza, Count István; Károly IV, King; Wekerle, Sándor Sr; Bethlen, Count István.**

**Angeli, Henrik** (Henry) (Sopron, 8 July 1840 - Vienna, Austria, 20 October 1925) – Portrait and genre painter. He painted his most famous piece, the historical composition *Mary Stuart Reading Her Death Sentence*, in Düsseldorf, Germany in 1857. Two years later he received an invitation to the court of the Bavarian crown prince. The picture *Revenge of Honor* brought enormous fame for him; and from there on he became one of the most sought-after artists in Vienna. The elegance of his paintings, the eloquent compositions including the luxurious costumes illustrated in these works, made him the favorite of Vienna, London and St Petersburg. Some of his famous portraits are that of Emperor and King Ferenc József I (Franz Joseph), German Emperors Frederick and Wilhelm, and Queen Victoria. The most important features of his portraits are the personal characteristics of his subjects, giving less importance to details and other components of the portraits. – B: 1184, T: 7653.

**Angelo, F. Pál** (Paul) (Funk) (Budapest, 31 January 1894 - Budapest, 13 December 1974) – Photographer. Initially he wanted to become a painter but soon switched to photography. He studied in Budapest, Berlin, Hamburg, Paris and London. He completed his studies under Aladár Székely. He became attracted to filmmaking as well. Abroad he worked as a cameraman on a number of films. In 1916 he was an assistant and cameraman of Mihály Kertész (Michael Curtiz) at the shooting of the first Hungarian feature film. In 1919 he ran some photo studios in Budapest, and later in Paris and Nice. In 1927 he brought into Hungary the first sound-film equipment. From 1951 until his retirement in 1964 he worked at the Light Cooperative (*Fényszövetkezet-FÉNYSZÖV*). He founded the Alliance of Hungarian Photographers in 1956, and had a number of exhibitions of his photos at home and abroad. He was a recipient, among others, of the Medal of the Alliance of International Photo Artists. – B: 0883, T: 7103.→**Curtiz, Michael.**

**Angster, József** (Joseph) (Kácsfalu, now Jagodnjak, Croatia, 7 July 1834 - Pécs, 9 June 1918) – Organ builder. He studied in Vienna and afterwards took part in the organ building for the Cathedral of Notre Dame in Paris, and other important cathedrals. In 1867 he set up his studio in Pécs and in 1870 secured the most important commissions,

such as building the organs for the Cathedral of Pécs, the Cathedral of St Elizabeth of Kassa (now Košice, Slovakia), and the St István Basilica in Budapest. He wrote a book *The History of the Organ: its Substance and Structure* (*Az orgona története, lényege és szerkezete*) (1886). After his death, his sons and grandsons continued the trade and built more than 1,300 organs. With the completion of the organ in the Szeged Cathedral, they have built the largest in Hungary. – B: 0883, T: 3240, 7103. → **Acquincum Organ.**

**Anhalt, István** (Stephen) (Budapest, 19 April 1919 - Kingston, Ont. 24 February 2012) – Composer, teacher. He was born into a Jewish family. He studied with Zoltán Kodály at the Ferenc (Franz) Liszt Academy of Music, Budapest (1937-1941). He was Assistant Conductor of the Hungarian National Opera. He emigrated to Canada in 1949 and taught music at McGill University, Montreal. The National Research Council and the Electronic Music Laboratory employed him as a researcher. He was head of the Music Department at McGill University from 1971 until his retirement. He also taught at the Academy of Music, Budapest (1972). His compositions include *Interludium* (1950); *Journey of the Magi* (Eliot) (1952); *Symphony* (1958), and *Symphony of 1967*, *Electronic Compositions No.1-4* (1959-1962). Some of his writings are: *The Making of Cento*; *La Musique électronique*; *L'Histoire de Cento in Raoul Duguay*, ed. *Musiques du Québec* (Montreal, 1971); *Alternative Voices*; *Essays on Contemporary Vocal and Choral Compositions* (1985). He was one of Canada's most individualistic composers and was at the forefront of 20th century Canadian musical culture. He combined traditional instruments, electronics and the human voice in textures and sonorities of a highly complex musical language. He won the Juno Award in 2005. He was made an Officer of the Order of Canada (2003), and a Fellow of the Royal Society of Canada (2007). – B: 0893, T: 4342. → **Kodály, Zoltán.**

**Anjou, Age of** – Period in the history of Hungary between 1308 and 1395, when the House of Anjou or Angevin provided kings for Hungary as well as for France, England, Naples and Sicily. This period in Hungary is noteworthy because the Anjou kings restored the declining royal dignity and authority following the demise of the kings of the Árpád dynasty. Instead of increasing the hitherto unrestrained self-interest of the oligarchy, their members were drawn into the service of the throne. They strengthened public order, increased the growth of the economy, and expanded the constitution with laws that imposed some control on public life, thereby creating a civic discipline that lasted for centuries. Anjou monarchs of Hungary were Károly I (Charles) (1307-1342), Lajos I (Louis the Great) (1342-1382), Mária (Maria) (1382-1395) and Károly II (Charles) (1385-1386). – B: 1078, T: 7668. → **Hungarian Anjou Book of Legends.**

**Anjou Book of Legends** → **Hungarian Anjou Book of Legends.**

**Annalista Saxo** – A chronicle known by this name in the *Historia Regnum Francorum* written around the time of the Magyar (Hungarian) military campaign described as contemporary with the two campaigns against Saxony: “In 890, Arnulfus called on the help of the Magyars, a previously unknown people who had only recently left Scythia, the huge territory beyond the Don river-bend. Having been driven out by the neighboring Pechenegs, the Magyars said farewell to their homeland, first seeking food and a livelihood on the *Pusztas* [Plains] of the Avars and the Pannonians by hunting and

grazing, then breaking into the territories of the Karantans, the Moravians and the Bulgarians. In 908, the Magyars killed Prince Burchardus of Thuringia and many others with him. The Delemincuses hired the Avars against the Saxon Prince Henrik. After much bloodshed in Saxony, another Magyar army that threatened to wage war against the Delemincuses, as they turned back toward Dalmatia laden with booty, confronted them. Disregarding the help the Magyars had provided, they bestowed all this booty on the Avars. This is how Saxony was ransacked for the second time”.

This campaign has been described in other sources of German origin and provides a historical proof that, following the death of the Hungarian Reining Prince Árpád, Avar armies still existed in the Carpathian Basin and fought alongside with the Magyars. – B: 1185, T: 7668.→**Avars; Pechenegs.**

He is a recipient, among others, of the Ericson Prize (1980), the István Győrffy Memorial Medal (1983), the Middle Cross with the Star of the Order of Merit of the Republic of Hungary (1994), the Péter Pázmány Prize (2007), the Prima Prize (2007), the Gold Medal of the Hungarian Art Academy (2008), and is Honorary Citizen of Pécs (2010). – B: 0874, 1257, 1031, T: 7103.

**Annexed Parts of Hungary** – (1) This term in earlier times referred to the annexed provinces of Croatia, Slavonia and Dalmatia. The expression came into use at the turn of the 16/17th centuries and was officially used for the first time in Act I of the Peace of Vienna of 1606, referring to the King of Hungary reigning over the Hungarian realm and the annexed parts (lands). Later these parts or provinces enjoyed local autonomy and were treated as parts of the Hungarian Crown, the Holy Crown of King István I (St Stephen) (997-1038). (2) Subsequent to the separation of Transylvania from Hungary proper, other Hungarian areas were referred to as annexed parts, such as the counties of Kraszna, Central-Szolnok and Zaránd, as well as the Kővár region, giving rise to the title of the Prince of Transylvania: *Princeps Transylvaniae et partium Hungariae eidem adnexorum dominus*. When Transylvania again came under the rule of the King of Hungary, the Diet on a number of occasions unsuccessfully urged, with the exception of the period of 1693-1733, the return of these parts to Hungary. Act VI of the 1848 Peace Treaty stated that these parts were to be regarded in every respect as inalienable parts of Hungary. During the ensuing period of Absolutism, these territories were annexed to Transylvania and regained their legal status and constitutional rights in 1861. – B: 0942, T: 7456.→**Vienna Peace Treaty.**

**Anniviards** – Myth of Hun Origin, Switzerland – Local tradition believes that Attila’s Huns founded some villages in the valley of Val d’Anniviers, Canton Wallis in south Switzerland. The citizens of Hüniken, Viscoye, Pinsec, St Luc, St Jean and Grimentz, about 2,000 persons, profess to be Hun descendants. Their present language is French mixed with Italian, in which there are apparent similarities to Hungarian language peculiarities. Their mongoloid features – of which even last century’s globetrotters wrote – are barely visible today. The ancient custom of the funeral feast, the cult of the dead, are extinct already, but their folk art, especially the Alpine chapels and the ornaments on the gables of houses show many identical features to those of the Szeklers on Transylvania (*Erdély*, now in Romania).

The Anniviards differ greatly from their regional neighbours in their physical appearance, folk art and everyday habits. They use their family name first, as only Hungarians do in Europe. The main decorative element of their folk art is the tree of life and the tulip. Their cemeteries are full of richly carved wooden grave markers that serve as tombstones. They display runic inscriptions; but now even the elders are unable to read them.

Although there is a great body of scholarly literature about them, their origin and history are still unknown. This question has greatly preoccupied European history researchers. A whole literature arose on this theme, such as Ferenc (Francis) Toldy's *Hun Myths in the Helvetian Snowy Mountains (Hun mondák a Helvetian havasokban)*, an essay published in 1834. The historian Mihály (Michael) Horváth researched them in detail in 1853. Anton Karl Fischer (1892-1950) wrote a book entitled *Die Hunnen in schweizerischen Eifisch Tal und ihre Nachkommen bis auf die heutige Zeit (The Huns in the Swiss Eifisch Valley and their Descendants to the Present Time)*, published in 1896. Bernard Savioz, the French writer, native of Pinsec village, published a book entitled *Valaisans, descendants d'Attila (The Wallis People, Descendants of Attila)*, who wrote on previously unknown details about the Anniviards. Other historians such as A. K. Fischer contributed to this question in 1896, Sándor (Alexander) Makoldy in 1913. Jenő (Eugene) Muzsnay published several books on this question; (1978, 1985), Genetical research was also conducted among these people in 1989. In addition to the results of etymological research, runic signs found in Pinsec not long ago, as well as blood tests carried out by the Japanese, indicate a definite Asian origin. – B: 1177, 1078, 1020, T: 3240, 7669, 7617.→**Eifischthal, Hun Runic Writing at; Toldy, Ferenc; Muzsnai, Jenő; Hungarian Runic Script.**

**Anonym of Sarlóköz** (16th century) – Author of the poem *Optima historia de extremo iudicio (Legyünk készök, körösztényök...)* written in 1552 that survived in the János (John) Mátéfi, Lugossy and Mihály (Michael) student Codices. It is about the Last Judgment and apart from the Bible, it is also based on Petrus Comestor's work: *Historia evangelica*. – B: 1150, 1257, 1020, T: 3240.→**Lugossy Codex; Codex Literature.**

**Anonyma** – A Hungarian (Magyar) surgeon at the time of the Settlement Period (895-896). Her name is unknown. It is not certain whether she was the first woman or the only one, who practiced medicine at that time. In 1945 there was an archeological discovery at Basahalom in County Szabolcs, where many tombs of men and of a few of women were found. Many objects and tools they used in their everyday life were buried with them. In one of the female tombs a fine medical instrument was found, made from iron and silver, presumably used for craniotomy. Around the world many human skulls have been found with the signs of craniotomy, a proof that it was performed in ancient times. Healing of the bone in the skulls dating from the Hungarian Settlement Period in the Carpathian Basin (896 AD) shows that the injured survived the operation. The archeological discovery and tomb finds at Basahalom also proved that there were women as well as men among the brain surgeons in 9th century Hungary; but the contents of the tombs also suggests they were not as well paid. – B: 1178, 1020, T: 7660.

**Anonymus, the Chronicler** (end of the 12th - beginning of the 13th century) – Anonymus or “Nameless” chronicler), author of the *Gesta Hungarorum* (Deeds of the

Hungarians, about 1200), is presumed to have been the Notary of King Béla III (1148-1196). This is the only extant, late 13th century copy of the original Codex. It is a Hungarian historical work that contains a summary of early Hungarian folk and historical traditions. The book is considered by the experts to have been based on an earlier work, the *Ancient Chronicle*, now lost. The author identifies himself in the *Prologus* (Foreword) as *P. dictus magister ac quondam bone memorie glorissimi Bela Regis Hungariae notarius...* (“P. called Magister ... Notary [Clerk] of King Béla”). The *Gesta* is dedicated to his friend “N”, with whom he studied presumably in Paris, where he became familiar with the works of the Greek historian *Dares Phrygius* (ca. AD 600: *De excidio Troiae historia* and *Gesta Alexandri Magni*) that by his own admission prompted him to write the *Gesta* and served as examples for the work.

The Codex is in Latin, contains 26 manuscript pages with illuminated initials, and is divided into 57 chapters or parts. The dating of the work is based largely on the author’s use of archaic forms of Hungarian personal and geographic names unmistakably pointing to the end of the 13th century. It was first published in 1746 by György (George) J. Schwandtner and Mátyás (Matthias) Bél in their *Scriptores rerum Hungaricum (vol.i)*, and first published with Hungarian translation in 1958 by György (George) Györffy.

The Codex was kept in the collection of the Royal Library of Vienna and was returned to Hungary only in 1928. It is now in the National Széchényi Library’s Rare Manuscript Collection in Budapest under catalogue number *Cod. Lat. Medii Aevi 403*. Regarding the author’s identity, opinions are divided as to the meaning of “P” in *P. dictus magister*: whether the *P.* is an abbreviation of a name, or whether it stands for *P[rae]dictus magister*. Some historians identify him with Peter, Provost of Esztergom (Loránd Szilágyi, 1937); others with Peter, Bishop of Győr (János [John] Horváth and Károly [Charles] Súlyom, 1966). Many other works deal with the author’s true identity, the date and circumstances of the work’s composition, but to date none was able to provide conclusive proof. *The Hungarian Helicon (Magyar Helikon)* published the Codex in facsimile form in translation of Dezső (Desider) Pais, in 1975). – B: 0883, 1430, 7617, T: 7617. → **Ancient Chronicle; Béla III, King; Bél, Mátyás; Pais, Dezső; Gesta Hungarorum; Györffy, György; Horváth. János.**

**Antal, E. Nimrod** (Los Angeles, Calif., USA, 30 November 1973 - ) – Film director, screenwriter, actor. He was born of Hungarian ancestry. In 1991 he moved to Hungary to study at the Academy of Dramatic and Film Arts, Budapest. After graduating, he went on to work in the film and television industry. In 2005 he returned to Los Angeles to pursue his career in Hollywood. He became known for writing and directing the Hungarian-language film *Kontroll* (2003), which is about a ticket inspectors of the Budapest Metro, which won three awards: the Youth Award at the Cannes Film Festival in 2004, the Golden Hugo prize at the Chicago International Film Festival, and the European Film Award nomination for Best Director. *Vacancy* was Antal's first American feature film (2007), the next one was the *Armored* (2009), followed by the *Predators* (2010). Nimród has also appeared as an actor in numerous Hungarian films, including *András Salamon is Close to Love (Salamon András közel a szerelemhez)* (1999), and *Sunset is on the Left (Balra a nap nyugszik)* (2000). – B: 1031, 1719, T: 7103.

**Antal, Géza** (Tata, 17 March 1886 - Pápa, 30 December 1934) – Bishop of the Reformed Church, theologian, writer. He started high school studies in Tata and continued them in

Pápa, where he also studied Theology. From 1885 he studied in Utrecht. He was teacher in the high school of Pápa in 1888, and a professor at the Reformed Theological Academy of Pápa from 1899. In 1893 he earned a doctorate in philosophy while he stayed in the USA and Holland for a couple of years. He was Bishop of the Transdanubian Reformed Church District from 1924. He was MP for Pápa (1910-1918) and member of the Upper House of Parliament. He edited the *Protestant Newspaper of Transdanubia (Dunántúli Protestáns Újság)* and wrote many articles in it. Among his writings are: *Die holländische Philosophie im XIX Jahrhundert (Dutch Philosophy in the 19th Century, 1888)*; *J.G. Fichte and the Ethicism in the Newer Philosophy of Religion (Fichte H.G. és az ethicismus az újabb vallásbölcseletben) (1891)*; *The Heidelberg Catechism in 52 Sermons (A Heidelbergi Káté 52 egyházi beszédben) (1902)*, and *The Future of Hungarians in America from a National Point of View (Az amerikai magyarság jövője nemzeti szempontból) (1908)*. His wife was Dutch and he worked for Dutch-Hungarian friendship, and translated Hungarian novels into Dutch. He received an Honorary Doctorate. – B: 0932, T: 7103.

**Antal, Imre** (Emeric) (Hódmezővásárhely, 31 July 1935 - Budapest, 15 April, 2008) – Concert pianist, journalist, TV personality. He studied piano at the Music Conservatory of Szeged (1947-1951), at the Music Secondary School, Budapest (1951-1954), and at the Ferenc (Franz) Liszt Academy of Music, Budapest (1954-1959). He received a scholarship from the National Philharmonic Society and became its soloist. He went on a concert tour in 17 countries and won 6 international prizes. Due to health concerns over his right hand he had to change profession, and in 1972 became chief contributor, reporter and popular program host of Hungarian Television; from 1997 he was its life member. He also acted in TV and feature films, such as *The Bespectacled (Szemüvegeselek)*; *Circus Maximus*; *Pepper (Bors)*; *Let the Devil Take it (Az ördög vigye)*, and *The Secret Place (A titkos hely)*, as well as the TV series *Capricious Seasons (Szeszélyes évszakok)*. His books include *The Best Jokes of Imre Antal (Antal Imre legjobb viccei) (1998)*; *Pami. Memoires, Experiences, Adventures (Pami. Emlékek, élmények, kalandok) (1991)*, and *In Crisis (Krizisben) (2006)*. He was an honorary citizen of Budapest and recipient of the Ferenc Erkel Prize (1984), the Merited Artist (1988), the Opus Prize (1991), and was made Life member of Hungarian Television (2004). – B: 0874, 1522, T: 7103.

**Antall, József** (Joseph) (Budapest, 8 April 1932 - Budapest, 12 December 1993) – Politician, statesman. He acquired his qualifications as an instructor, archivist, librarian and museologist at the University of Budapest, where he graduated with a Ph.D. in Philosophy. Initially he taught at the József (Joseph) Eötvös Secondary School. In 1956 he participated in the reorganization of the Independent Smallholders' Party. He prepared a plan for the withdrawal of the Soviet Army from Hungary and the restoration of the country's constitutional structure. He was arrested for his participation in the Revolution and, as a disciplinary measure, he was given a teaching position in the Ferenc (Francis) Toldy secondary school. Finally, as a result of his political activities, he was prohibited from teaching altogether in 1959. Between 1960 and 1961 he was a librarian, and from 1964 a research fellow, then in 1984 became the Chief Administrator of the Semmelweis Museum of Medical History, Budapest.

From 23 May 1990 until his death he was Prime Minister of the Hungarian Republic. He propagated a doctrine of peaceful withdrawal from the Soviet bloc, promoted a peaceful transition; in the post-Communist Europe he was internationally acclaimed as the Prime Minister of the most stabilized former Eastern Bloc country. Numerous major achievements may be attributed to him as Prime Minister, such as the institution of free elections, the withdrawal of the Soviet Army, the restoration of Hungarian independence, and the dismantling of Communist ideology, but not its power structure. During his tenure a controversial treaty was signed between Hungary and Ukraine. The international media praised him as a great European statesman. – B: 1061, 0932, T: 7668.

**Antalffy-Zsiros, Dezső** (Desider) (Nagybecaskerek, now Zrenjanin, Voivodina, Serbia, 24 July 1885 – Denville, NJ., USA, 29 April 1945) – Orgona virtuoso, composer and conductor. In his childhood his mother and the local church organists taught him piano. In Budapest, he studied organ and composition under János (John) Koessler at the Ferenc (Franz) Liszt Academy of Music. Abroad he was a student of Karl Straube, Max Reger and Enrico Bossi. From 1910, he was professor of organ at the Academy of Music of Budapest. In 1921, he embarked on an American Concert tour. He became professor of organ at the Eastman School of Music, at the University of Rochester, N.Y. In 1925 and 1926, he taught again at the Academy of Music, Budapest. Thereafter, he returned to the USA, and was a composer and conductor for film and stage director Max Reinhardt. Between 1935 and 1942, he was organist and composer at the Radio City Music Hall and member of the Philharmonic Society of New York. He was the first significant organ professor of the Academy of Music of Budapest. Under his tenure the magnificent organ of the Academy was built. His compositions include: music for orchestra, a Suite, a Hungarian Overture, piano and organ works, comic opera, songs for organ and piano, s and choir pieces, as well as operetta. His pedagogical works are: *Textbook for Organ (Orgonaiskola)* (1910); *The Method of Transposition (A transzponálás módszere)* (1913), and *Handbook of Choral Score Reading (Az énekkari partitúra olvasás kézikönyve)* (1913). According to Zoltán Kodály, Antalffy-Zsiros was one of the greatest organists of his time and a reformer of European organ music. – B: 0883, 1031, T: 3240, 7103. → **Ákom, Lajos, Koessler, János; Kodály, Zoltán Varnus, Xavér.**

**Anthes, György** (Georg Anthes) (Hamburg, 12 March 1863 - Budapest, 23 February 1922) – Opera singer (tenor). His father was a German conductor. Anthes received his training in voice from Julius Stockhausen in Frankfurt, and from C. Galiera in Milan. Originally, he had planned to become a lawyer, but he decided to follow a singing career. In 1888, he had his debut in Freiburg as Max in Weber's *Der Freischütz (A bűvös vadász)*. From 1889 to 1902 he was the leading heldentenor in the Dresden Opera House. Thereafter, for one year, he was the leading tenor at the Metropolitan Opera House, New York, and, between 1903 and 1913, at the Budapest Opera House, where he first appeared in his most successful role, in the title role of Wagner's *Lohengrin*. Anthes' repertoire consisted of more than a hundred roles; he was a reliable, musical artist with an outstanding technique; he sang his roles also in Hungarian. From 1913, he worked as a teacher at the Ferenc (Franz) Liszt Academy of Music, Budapest; he was the mentor of a number of well-known singers and, from 1920 until his passing, he was the stage manager of the Opera House. His roles include title roles in Wagner's *Tannhäuser*, *Tristan and Isolde* and *Parsifal*; also as Cavaradossi in Puccini's *Tosca*. His well-known

work as stage manager was Nándor Rékai's *Frater George (György barát)*. He was one of the great Wagner-singers of his age, and one of the great figures of Hungarian operatic history. His voice is preserved on a phonograph-cylinder. – B: 1031, 1444, T: 7456.

**Ányos, Pál István** (Paul Stephen) (Nagyesztergár, 8 December 1756 - Veszprém, 5 September 1784) – Poet. After completing his secondary education in Komárom, Veszprém and Győr, he entered the Pauline Order in 1772. He was posted in succession to Márianosztra, Pápa and Elefánt (now in Slovakia). He tolerated his loneliness with great difficulty; fell sick, then returned to die at Veszprém. Ádám Pálóczy Horváth was his comforter on a daily basis. Ányos was one of the well-known representatives of sentimental lyric poetry. János (John) Batsányi and Ferenc (Francis) Kölcsey continued his poetic style. His commemorative plaque can be seen on the house of his birth and on the Franciscan church at Veszprém. A street bears his name at his birthplace. – B: 0932, 1257, T: 7103.→**Batsányi, János; Kölcsey, Ferenc; Pálóczy Horváth, Ádám.**

**Anzelm, Albert** (Pest, 1819 - St Louis, MO, USA 20 November 1893) – One of General Frémant's four eminent officers during the American Civil War (1861-1865). After having spent twelve years in the Regiment of the Austrian Imperial Army, he returned to his birthplace on hearing of the revolutionary events in 1848, and served beside Colonel Kmetty at the storming of Buda Castle, in charge of one of the troops. He especially excelled at the Battle of Temesvár (now Timișoara, Romania) despite its unfortunate end. After the failure of the fight for freedom he went through Havasalföld (Wallachia) to Vidim, then to Sumla (then under Turkish occupation, now both in Bulgaria). Influenced by the Turkish environment, he embraced Islam and lived for a time in Aleppo. From Turkey he escaped to the United States and took part in the Civil War. During the first battles of the infantry at St Louis, Missouri, he was promoted to the rank of Colonel, then to Chief of Staff, later serving beside General Sándor (Alexander) Asbóth. In the Battle of Wilson Creek he was seriously wounded and taken prisoner by the southern army. General Asbóth had him freed in a prisoner exchange program and he resigned from the army in June 1864. – B: 1143, T: 7668.→**Asbóth, Sándor; Freedom Fight of 1848-1849.**

**Apáczai Csere, János** (John) (Apáca, now Apața, Romania, 10 June 1625 - Kolozsvár, now Cluj-Napoca, Romania, 31 December 1659) – Hungarian scholar and an important figure of the intellectual scene of the 17th century. The child of poor serfs, he was educated at Kolozsvár and Gyulafehérvár (now Cluj-Napoca and Alba Iulia, Romania). Reformed Bishop István (Stephen) Geleji Katona sent the talented youth to the West, where he studied at the universities of Franekera, Leiden and Utrecht. He turned down an appointment in Utrecht and returned to Transylvania (*Erdély*, now in Romania). He became one of the rectors of the Reformed College at Gyulafehérvár where, in his inaugural address, he put forward a program for Hungarian national educators for all time. He criticized the backward conditions of public education, demanded the teaching of the native language (Hungarian) at lower grade schools, and demanded higher education that would train high-level specialists in secular subjects. His insistence on his innovations in teaching earned him enemies. As a result of an investigation launched against him, he was transferred to Kolozsvár, where he taught in elementary schools. His works, a collection of his lectures, are: the *Hungarian Encyclopedia* and *Hungarian*

*Lesser Logic (Magyar Encyclopaedia and Magyar logikátska)* and also in *Philosophia Naturalis*. He rejected many medieval preconceptions and was the first person in Hungary to openly accept the heliocentric cosmos theory of Copernicus. He preceded several other nations with his initiative for public education in his native tongue instead of the dominant Latin. His *Hungarian Encyclopaedia* became the basic text for Hungarian scientific language. Words and expressions coined by him are still in use today in the Hungarian vocabulary, especially in the area of natural sciences. – B: 0883, 1257, T 7675.→**Geleji Katona, István; Language Reform; Kazinczy, Ferenc.**

**Apafi I, Prince Mihály** (Michael) (*apanagyfalvi*) (Ebesfalva, 3 November 1632 - Fortress of Fogaras, now Făgăras, Romania, 15 April 1690) – Prince of Transylvania (1662-1690). The Tartars in Poland took him captive in 1657 during the war of György (George) Rákóczi II (1648-1660). Following his escape, the Turkish (Ottoman) Porte elected him Ruler of the Principality of Transylvania. He was a weak leader and his wife, Anna Bornemissza together with Chancellor Mihály (Michael) Teleki ran the government. He participated in the war against Austria as a vassal of the Turks; but negotiated with the Habsburgs in 1664. For a short period he assisted Count Imre (Emeric) Thököly, the Hungarian freedom fighter against the Habsburgs. When King Lipót I (Leopold) (1654-1705) occupied Transylvania in 1688, Apafi was compelled to accept his sovereignty. He became a melancholic recluse in his last years. – B: 0883, 1031, T: 3312.→**Rákóczi II, Prince György; Thököly, Count Imre; Armenians; Bánffy, Baron Dénes.**

**Apáthy, István** (Stephen) (Pest, 24 January 1863 - Szeged, 27 September 1922) – Physician, biologist, zoologist, politician. He was a resident fellow of the University of Budapest (1888-1890), and a professor at the University of Kolozsvár (now Cluj-Napoca, Romania) between 1890 and 1918, where, as Chair of the Department of Zoology, he organized the most modern biological institute in Europe. Between 1919 and 1922 he was a professor at the University of Szeged. His main field of research was comparative nerve histology. He worked in co-operation with the *Stazione Zoologica* of Naples, Italy, and conducted his research partly in Kolozsvár, partly in Naples. He worked out special experimental methods that aroused interest worldwide, e.g. Apáthy's fixation, Apáthy's dyeing; gilding and double embedment. The University of Kolozsvár became the international pilgrimage site for researchers of the nervous system. Equally significant was his hypothesis of stimulus conduction which represented the so-called continuity doctrine against the neuron theory of Ramón y Cayal. Although, his theory is outdated, it contributed, together with Apáthy's research, to the deeper knowledge of histology. He was active in the fields of educational organization and in politics. He played an important role in developing the University of Kolozsvár, and was its Rector between 1903 and 1904. He completed the task of evacuating the University from Kolozsvár to Szeged in 1918, before the Romanian occupation of Transylvania. He was also interested in the relationship of biology to sociology and philosophy. His major publications are: *Das leitende Element des Nervensystems und seine topographische Beziehungen zu Zellen* (*The leading elements of the Nervous Systems and its topographic applications to the Cells*) (1888); *Die Mikrotechnik der tierischen Morphologie I-II* (*The Microtechnic of Animal Morphology I-II*) (1896-1901); *Private Property, Barter and Social Life in the Animal Kingdom* (*Magántulajdon, csere és társadalmi élet az állatvilágban*) (1908); *Law*

of *Evolution and Society (A fejlődés törvénye és a társadalom)* (1912), and *The Biology of War (A háború biológiája)* (1915). A Society and an Award bear his name. – B: 1047, 1122, T: 7103.→**Palágyi, Menyhért.**

**Apor, Baron Péter** (Altorja, now Turia Romania, 3 June 1676 - Altorja, 22 September 1752) – Historiographer. He was educated in Kolozsvár (now Cluj-Napoca, Romania) and Nagyszombat (now Trnava, Slovakia). As a bearer of high offices in Transylvania (*Erdély*, now in Romania), he sided with the Habsburgs. Eventually he was detained both by the *Kuruc* and the *Labanc* forces. In the solitude of his retirement he recorded the happenings of his time mostly in Latin, but some also in Hungarian. His works are valued historical and cultural sources. His major works are *Metamorphosis Transylvaniae... (On Changes in Transylvania...)*, written in Hungarian (1736) and *Synopsis mutationem (Summary on the Changes in 1676-1748)*. – B: 0883, 1257, 1440, T: 7103.→**Kuruc; Labanc.**

**Apor, Baron Vilmos the Blessed** (William) (Segesvár, now Sighisoara, Romania, 29 February 1892 - Győr, 2 April 1945) – Roman Catholic Bishop and martyr. He was ordained in 1915 and was Chaplain in Gyula until 1917. For a while during World War I, he was a chaplain on a hospital train. From 1918 to 1940 he was the parish priest in Gyula, and was known as the “priest of the poor”. In 1941 he became Bishop of Győr and was a supporter of social movements. He opposed the Nazi dictatorship in Hungary toward the end of World War II. On 30 March 1945, the occupying Soviet army entered into the Bishop’s residence demanding women. When the Bishop refused the demand and protected the women hiding in the basement, a Soviet captain fired three times at the Bishop, wounding him seriously. He was hospitalized but died later. With his heroic deed he saved fifty young women from a violation that was the fate of countless others. His body was

interned temporarily at the Church of the Carmelites. The Ministry of Interior delayed his final burial for 38 years. Finally in 1986 he was laid in his final resting place in the Cathedral of Győr. His beatification took place at the Vatican on 9 November 1997 in the presence of 20,000 pilgrims, among them 5000 Hungarians. A school in Győr bears his name. May 23 is his designated feast day. – B: 1186, T: 7103.→**Csávossy, Elemér, Béla S.J.**

**Apor Codex** – Paper codex of medium size and octavo form, in some parts mutilated. It was written by three different hands; among them the style of the first reveals that its author was clearly identical to the authors of the Viennese and Munich codices. The work became known first only in 1877. It was named by Áron Szilády at Kiskunhalas in honor of the writer Baron Peter Apor, whose property the Codex was. The names of the writers and the time of the preparation of the Codex are unknown; it probably appeared in the years after the death of King Mátyás I (Matthias Corvinus, 1490). The nuns of the Premonstrian Order, living on the Island of Hares (*Nyulak szigete, now Margaret Island*), on the Danube in Budapest, had the Codex bound in book form in Buda, together with

further ecclesiastic texts, copied by them and completed probably between the peasant uprising of Dózsa (1514) and the military catastrophe at Mohács (1526). The codex, on 93 letters, contains translations of psalms, hymns, prayers and meditations. The psalms of the Codex were copied from the first Hungarian Bible translations. It is preserved in the Szekler National Museum at Sepsiszentgyörgy (now Sfintul Gheorghe, Romania). – B: 0942, 1031, T: 7456.→**Mátyás I, King; Dózsa, György; Mohács Battles; Viennese Codex; Munich Codex; Tatros Bible; Hussite Bible; Bible in Hungarian; Szilády, Áron; Codex Literature.**

**Apostol, János** (John) (Kunszentmiklós, 9 April 1903 - Sao Paulo, Brazil, 25 July 1991) – Minister and missionary of the Reformed Church. He attended high school in his hometown; then studied Theology at the Reformed Theological Academy of Budapest, and at Reformed Theological Faculty of Debrecen. He was on scholarship at Princeton University in America in 1925 where, in the following year, he earned his M.Theol. He became a minister of the Reformed Church in America and served in New York. In 1927, commissioned by the Presbyterian Church in Canada, he began organizing congregation work in the areas of Calgary, Lethbridge, Raymond, Taber and Coalhurst in the Province of Alberta. In 1928 he returned to Hungary and served as assistant minister in a number of towns, such as: Tahitótfalú, Nagykőrös, Pestszenterzsébet, Pestszentlőrinc and Pécel. In 1932 his Church sent him for missionary work to Brazil, where he successfully founded and organized the Hungarian Reformed Church in 1943. He extended his missionary work over Uruguay and Argentina. The first church was dedicated in Brazil at Árpádfalva in 1935. The Sao Paulo church, built in the Kalotaszeg style, was dedicated in 1941. The central church in Sao Paulo also organized churches in the countryside in 17 different locations, among them in Burim, Árpádfalva and Rákóczifalva. In 1946 the congregations formed an independent Church under the name *Igreja, Christa Reformada do Brazil*. In the meantime, his colleagues, Dezső (Desider) Nagy Balázs, Béla Mohai Szabó, István (Stephen) Csákány, as well as his wife assisted him. – B: 0906, T: 7103.→**Reformed Church in Hungary; Brazil, Hungarians in; Nagy, Balázs Dezső; Mohai Szabó, Béla; Csákány, István.**

**Apostolic Cross** – A cross, made in the Italian Renaissance style and used at the coronation of Hungarian kings. On the front of the cross there are images of the Messiah, the Virgin Mary, Saint John the Apostle, Mary Magdalene, as well as a pelican, all on a dark blue enamel base. On its reverse side there are images of the Madonna and the four gospel writers. The cross is mentioned in a document, dated 1238. It is kept in the treasury of the Esztergom Archdiocese. – B: 1078, T: 7675.→**Apostolic Title and Cross.**

**Apostolic King** – The unique title of Hungarian kings, bestowed on them at their coronation. The origin of this title dates from about A.D. 1000, when it was conferred by Pope Silvester II upon István I, King (Saint Stephen) (975–1038), the first Christian king of Hungary, in recognition of the activity displayed by him in promoting the introduction of Christianity into Hungary. However, some rulers, like Empress and Queen Mária Terézia (1740-1780) did not use it at first. She resumed its use in 1758. – B: 1078, T: 7675.→**Apostolic Title and Cross; Mária Terézia, Empress and Queen.**

**Apostolic Right** – The right of Hungarian kings in ecclesiastical matters, integral to the Hungarian Crown since the reign of István I (St. Stephen, 997-1038). They could invoke this right in matters of church governance. Rome did not convert the Hungarians; rather conversion came at the hands of their own king in the 11th century. Converting, organizing and establishing were the three criteria for governing the church. This included establishing bishoprics and richly endowing them. This was not the personal right of the king but the right of the nation. According to the Constitution the nation exercised this right through the King bestowed upon him at his coronation. – B: 1078, T: 7675.

**Apostolic Title and Cross** – According to tradition, Hungarian kings were granted the title “Apostolic King” by Pope Sylvester II. On 19 August 1758, Pope Clement XIII endowed Empress and Queen Maria Theresa (1740-1780) and her heirs with the title. Subsequent Hungarian kings used this title. Pope Sylvester II sent the Apostolic Cross to King István I (St Stephen) of Hungary (997-1038) and his heirs as a sign of apostolicity. The cross was later lost but was replaced by a simple silver cross. At coronations this cross was carried in front of the person to be crowned. – B: 0942 T: 7675.→**Apostolic Cross; Apostolic King; Mária Terézia, Empress and Queen.**

**Appeal Court of Seven** – This high court in Medieval Hungary was established by King Mátyás I (Matthias Corvinus, 1458-1490), as the “Court with Royal Presence”. Later the Habsburg rulers transferred the Court’s jurisdiction to the local government under the Palatine. Between 1535 and 1723 three high nobles and three prelates advised the Palatine. King Károly III (Charles) (1711-1740) in 1723 reorganized it by raising the number of its members to 15; and the Appeal Court of Seven and the Royal Curia constituted the Royal Supreme Court. Its judgments could not be appealed. It was reorganized again in 1868, and it functioned until 1949. – B: 1138, 1020,T: 7677.

**Applied Arts in Hungary** – The branches of applied art succeeded each other in importance. In the times of King Mátyás I (Matthias Corvinus, 1458-1490) the Renaissance and the succeeding Baroque ages, architecture dominated. During the 19th century’s romanticism, historical and genre painting had the leading role; thereafter memorial sculptures occupied the forefront, while at the *fin de siècle*, the grand constructions to mark Hungary’s Millennium had priority. The artists’ school of Nagybánya (now Baia Mara, Romania) familiarized the impressionist trend in painting and proved to be more relevant than that of the *avant-garde*. In the period after World War II, graphics and illustration gained ground. The present time is characterized by polarization and designing of huge office buildings and malls.

*Paintings and graphics* – The earliest traces of Hungarian painting can be found in the fresco on the walls of the 12th century Romanesque church at Feldebrő. Gothic works of 13-14th centuries can be seen in the chapel of the royal castle of Esztergom. Its royal palace preserved the remnants of Renaissance frescos from the age of King Mátyás I. There is a late Gothic painting above the main altar of the Mária Church at Selmecebánya (now Banská Stiavnica, Slovakia) dating from 1506. Its painter was M.S., whose full name is unknown. Baroque painting was imported by foreign artists, among them Franz A. Maulbertsch, who painted church frescos; Johann Lucas Krachert painted frescos in the library of the *Licée* in Eger; István (Stephen) Dorfmeister painted the scenes of

Zrinyi's death onto the wall of the church of Szigetvár. In this age, portrait painting came into fashion. Ádám Mányoki (1673-1757) painted the portrait of Ferenc (Francis) Rákóczi II, Prince of Transylvania (1676-1735). Miklós (Nicholas) Barabás was the most popular painter in the first half of 19th century. He painted the portraits of the leaders of the 1848-1849 War of Independence against Austria. His colleagues were Károly (Charles) Markó, the landscape-painter, and József (Joseph) Borsos, a portraitist. Important painters of the post-war period were Károly (Charles) Lotz, who painted the ceiling fresco of the Budapest Opera House; Viktor Madarász, whose historical painting, the *Mourning of László Hunyadi (Hunyadi László siratása)* won the *Grand Prix* of the Paris Salon; and Bertalan (Bartholomew) Székely, whose *Women of Eger (Egri nők)* was painted in the same *genre*. The monumental *Taking of Buda Castle (Budavár bevétele)* by Gyula (Julius) Benczúr belongs in this category. The representatives of the *Popular Realism (Népi realizmus)* lived in the last third of the 19th century, among them Mihály (Michael) Munkácsi. His paintings are important landmarks in the history of Hungarian painting, among them the *Yawning Apprentice (Ásító inas)*; *Making Lint (Tépéscsinálók)*; *Woman with Brushwood (Rőzsehordó asszony)*, and the *Christ Trilogy (Krisztus-trilógia)*. Pál (Paul) Merse Szinyei painted his *plein-air* masterpieces *Picnic in May (Majális)* and the *Lady in Violet (A lilaruhás nő)* in this period. Tivadar (Theodore) Csontváry Kosztka was the first representative of the secessionist and post-impressionist trend of the 20th century in Hungary, as demonstrated by his well-known painting *Pilgrimage to the Cedars in Lebanon (Zarándoklás a cédrushoz Libanonban)*. During this time Simon Hollósy founded the artist-colony at Nagybánya (now Baia Mare, Romania). Painters of the Great Plain (*Alföld*), like János (John) Tornyai and Gyula (Julius) Rudnai represented the trend of realism. Lajos (Louis) Gulácsy created a special dream world. József (Joseph) Rippl-Rónai connected Hungary to the European stream of post-Impressionism. At the time of the founding of Gödöllő's artist-colony, a new generation of the Nagybánya School appeared. Béla Czóbel and Károly (Charles) Kernstock demonstrated *avant-garde* in the '*Group of Eight*'. Lajos (Louis) Kassák and Béla Uitz represented the next step in *avant-garde*. The "official" style of the 1920s was the neo-classicism of the School of Rome with its outstanding representative Vilmos (William) Aba-Novák. Aurél Bernáth and István (Stephen) Szőnyi belong to the late impressionist school, as does József (Joseph) Egri with his painting of Lake Balaton. In this category are also the works of the Gresham Circle's artists, together with the work of Gyula (Julius) Derkovits. In 1928 a new artist colony opened at Szentendre in the environs of Budapest. Its most renowned artists were Béla Czóbel and Jenő (Eugene) Barcsay. Graphics came to the forefront after World War II with masters Ádám Würtz, János (John) Kass, Arnold Gross, Károly (Charles) Reich and Victor Vasarely (Viktor Vásárhelyi) with his op-art *genre*. Vasarely was born in Pécs, became famous in Paris, and later founded a museum in Pécs. Among the contemporary painters are Tibor Csernus, István (Stephen) Mácsai, Károly (Charles) Klimó, Lili Ország, István (Stephen) Nádler, Ilona (Helena) Keserű, Pál (Paul) Deim, Péterger Földi and Endre (Andrew) Szász.

*Sculpture* – From the Roman style era the best-known works are the figures on the gate of the Church of Ják. One of the best pieces of 14-15th century woodcarving in Hungary is the altar of St Miklós (St. Nicholas) at Jánosrét. Gothic style sculpture in Hungary began with György (George) and Márton (Martin) Kolozsvári's *Equestrian Statue of St George (Szt György lovasszobra)*. The best-known work of Renaissance plastic art is the relief of King Mátyás I and Queen Beatrix by an Italian master. The main masters of the

Baroque age were George R. Donner and Johann A. Krauss, who made sculptures for churches and for public places. Even at the beginning of the 19th century magnificent church interiors were created. Miklós (Nicholas) Izsó with his *Shepherdess (Pásztorleányka)* laid the foundation of Hungarian sculpting art. Miklós (Nicholas) Izsó's *Sad Shepherd (Búsuló Juhász)* represents national romanticism. In the last decades of the 19th century memorial sculptures were dominant. The style's main representatives were Adolf Huszár, Alajos (Aloysius) Strobl, Barnabás (Barnaby) Holló, György (George) Zala and János (John) Fadrusz. The century's last undertakings were tied to the Hungarian Millennium, among them the creation of the Heroes' Square in Budapest by György Zala and Albert Schickedanz, and the construction of some remarkable buildings and boulevards. Working already in the 20th century: Zsigmond (Sigismund) Kisfaludy-Strobl's sculpture *David* is at the National Gallery. Béni (Ben) Ferenczy's *Standing Girl (Álló leányka)* and Ferenc (Francis) Medgyessy's *Sower (Magvető)* signified change. Fülöp (Philip) Ö. Beck made medals and reliefs at the beginning of the century. Eminent members of the "Group of Eight" were Vilmos (William) Fémes-Beck, Márk Vedres and János (John) Máttis-Teusch. Outstanding artists were László (Ladislav) Mészáros and György (George) Goldmann. The most influential artists were Pál (Paul) Pátzay, founder of the Gresham Circle, and Béni (Ben) Ferenczy. Further eminent contemporary sculptors are László (Ladislav) Márton, Miklós (Nicholas) Melocco, József (Joseph) Somogyi, Tamás (Thomas) Vigh and Miklós (Nicholas) Borsos.

*Architecture* – The first significant architectural monuments in Hungary are in the old Roman Province of Pannonia (now the *Dunántúl*, or *Transdanubia*). It was under Roman rule for the first 500 hundred years of our era. The Romans built military settlements around the Amber Road strongholds and on the boundary lines. Such places are Iseum in Szombathely (then Savaria), the procurator's headquarters in Óbuda, the ruins of Aquincum in the outskirts of Budapest, and Gorsium in the vicinity of Tác. Following the settlement of the Carpathian Basin (895) by the Magyars, some important constructions started to appear. Among the most important ones was the Benedictine Abbey in Pannonhalma, now part of World Heritage. King István I (St Stephen, 997-1038) had the Royal Basilica built in Székesfehérvár that would become the venue for coronations and royal burials. The monastery church founded by King Béla I in Szekszárd in 1061 follows the Byzantine style, whereas the abbey-church in Somogyvár, founded by King László I (St Ladislav) in 1091, was built in Lombard style.

The late-classic Gothic style and the Italian *Trecento* show their impact upon Hungarian architecture in the 14th century. During the reign of King Károly (Charles) Róbert (1307-1342) work still continued on royal buildings in Visegrád, and continued on during the reigns of King Lajos I (Louis the Great, 1342-1382), and King Zsigmond (Sigismund of Luxembourg, 1387-1437). In Buda, extensions were added to the existing buildings. King Lajos I (Louis) made Buda Castle a royal residence and also expanded it. Under the Anjou kings (1308-1382), towns were improved and town walls were constructed. The building of castles characterized the time of King Zsigmond I (Sigismund). Buildings erected during the reign of King Mátyás I (Matthias Corvinus, 1458-1490) showed the influence of the late-Gothic style. However, the improvements in Visegrád, such as wells, balconies and loggias, as well as those in Buda Castle showed the signs of the Italian Renaissance. King Matthias Corvinus enlarged the castle church in the Gothic style. It is now called Matthias Church (*Mátyás templom*). General Pál (Paul) Kinizsi's late Gothic style buildings in Nagyvázsöny set a trend around the highlands of

Lake Balaton. The Bakócz chapel built in the Jagiello Era of kings (1490-1526) is an outstanding example of the Hungarian Renaissance.

In the 16th century castles grew in importance because of the ongoing war with the Turks. Significant improvements had to be made on border fortresses against them. These were made mostly to Italian plans (e.g. in Győr, Komárom and Kanizsa) and were fortified.

In the 17th and 18th centuries the Baroque style left its mark on the country; its remains in the cities are still prevalent. After the Turks were expelled, a massive rebuilding program began in the 18th century, including the Jesuit church style, e.g. the churches in Eger, the Minorite Church in Miskolc, the Piarist Church in Debrecen, and the Cathedral in Kalocsa. Memorials and castle projects were built in the Baroque style, e.g. at Ráckeve, Gödöllő, Keszthely and Fertőd. The traditional layout of towns began during this time, e.g. in Sopron, where in the old town center, in the marketplace, they erected the Fire Tower, the Town Hall and the Trinity Monument. In the 19th century, Classicism became the dominant style. This style is manifested in the Great Reformed Church of Debrecen and the Bishop's Palace of Székesfehérvár. Classicism is prevalent in the works of Mihály (Michael) Pollack, e.g. the National Museum in Budapest. József (Joseph) Hild's works include the Cathedral of Eger and the Basilica of Esztergom. The era's most novel construction was the Chain Bridge in Budapest. Count István (Stephen) Széchenyi ("the Greatest Hungarian") initiated and oversaw its construction. Historicism was the leading architectural movement from the second half of the 19th century until World War I. In 1860 the neo-Renaissance style became dominant. One of the period's most prominent architect was Miklós (Nicholas) Ybl. His main works were the Opera House (1878-1884) and the Hungarian Academy of Sciences (1861-1865) in Budapest. The period was characterized by a building boom in Budapest that saw the construction of the Great Boulevard, the Sugárút (present day Andrásy Boulevard) with its Neo-Renaissance palaces, the iron-and-glass Nyugati (Western) Railway Station planned by the Eiffel Company (1874-1877), while the Keleti (Eastern) Railway Station was built in the historicist style (1881-1884). Development of the Danube embankment began in 1880. To commemorate the Hungarian Millennium (896-1896), spectacular buildings were constructed in the 1890s. The Millennium Monument, built on Budapest's Heroes' Square (1898-1906) features statues of great Hungarian kings. The buildings on Heroes' Square are the works of Albert Schickedanz and Filep Herczog. The square is one of Europe's greatest historicist landmarks. The Houses of Parliament (1888-1904), designed by Imre (Emeric) Steindl (1839-1902), is in neo-Gothic style. This magnificent building stands on the Pest bank of the Danube and is protected as part of World Heritage. Buildings with a combination of styles were also built at the end of the 19th century, e.g., the Museum of Folkart, the Exchange Palace (presently the seat of Hungarian Television), the Vajdahunyad Castle (a smaller replica of the original in the Transylvanian County Hunyad, in magnificent Gothic style) based on the plans of Frigyes (Frederic) Schulek, and the Fishermen's Bastion in Buda in neo-Roman style (1902). Ödön (Edmund) Lechner was one of the prominent architects of the "secession" period. He designed the Museum of Applied Arts (1893-1896), the former Postal Savings Bank and the Geological Institute. He incorporated folk art influences his work. He was the first to use the pyro-granite decorations of the Zsolnay ceramic/porcelain factory. The aim of the designer was to create an indigenous style. A good example of this philosophy is the Cifrapalota (Fancy Palace) in Kecskemét, the Reök Palace in Szeged and the Town

Hall of Kiskunfélegyháza. Some characteristic villages have kept the traditions of the 19th century, such as Hollóháza and its architecture, which is protected as part of World Heritage. Village museums preserve folk architecture, especially in the Open-Air Ethnographic Museum of Szentendre and the “cellar villages” of Villány and Hajós.

From the second decade of the 20th century many architects, following the Lechner School, wanted to preserve the spirit of peasant architecture in modern structural design. Károly (Charles) Kós planned the buildings of the Budapest Zoo and the Catholic Church in Zebegény (1909-1910). In the inter-war period conservatism and neo-styles characterized the 1920s. Modernist tendencies appeared, among them the “Bauhaus” style was significant. A major project was the Votive Church in Szeged (1913-1930), built in historicist style. After World War II, besides the rebuilding the destroyed bridges, the reconstruction of Buda Castle must be mentioned. The period of the Communist dictatorship is characterized by concrete structures, undecorated gray blocks of apartments and dull public buildings. Imre (Emeric) Makovecz gained international fame by applying natural building materials that created a new trend. He used elements of folk art as well as Celtic, Far Eastern, Scythian and Transylvanian motifs in his buildings. – B: 1051, T: 1051, 7103. → **Most of the artists in the article have their own entry.**

**Applied Ornamentation** – A decorating method with sheepskin and leather. There are two kinds of applied ornaments. (1) White sheepskin ornaments applied on white leather in a continuous or trailing pattern. This was an older method. (2) Individually cut, primarily red leather flower motifs, applied on a whitened base. This was a newer method. The older method survived mostly in Transylvania (*Erdély*, now in Romania) especially in the area of Gyulafehérvár (now Alba Iulia). In old times the Hungarian furriers of Nagyenyed (now Aiud, Romania) made all the conservative attires for the Protestant population of Miriszló (now Mirăslău, Romania) and Magyardécse (now Cireșoiaia, Romania). In Zalatna (now Zlatna, Romania) the main motive was applied to the closed front of the vest called “*melles*”. If there was damage on the leather it was covered by a small ornament called “*eagle claw*” cut out of an originally larger ornament. This very special pattern had its own logic, but the “*eagle claw*” was not considered a flower ornament. The continuously cut white sheepskin ornament was also known on the Great Hungarian Plain (*Nagy Alföld*). This was the preferred decorating style in Debrecen. The old sheepskin waistcoats of Hódmezővásárhely were exclusively decorated this way. Similar to the motives of Debrecen, the white sheepskin was cut with scissors and was applied on the shoulder plate of the wide sheepskin coat that reached down to the heels. The latest leather-decorating technique is rooted in the era of the former Turkish occupation. At first the cordovan leather called “*szattyán*” was tanned with sumac. This intensely red leather was used for appliqués and border trims. The tanners were called “*tobakos*”. They lived in Pécs and Székesfehérvár, while the cordovan-leather was tanned in Gömör and Ratkó and sold all over the country. In Transylvania the cordovan-leather of Fogaras (now Făgăraș, Romania) is the best known. – B: 1145, 1020, T: 3240.

**Apponyi, Count Albert** (Vienna, Austria, 29 May 1846 - Geneva, Switzerland, 7 February 1933) – Politician, statesman, born into an ancient Hungarian noble family. Like his predecessors he also entered into politics. He joined the *Deák Party* in 1872. After having changed parties he established the *National Party (Nemzeti Párt)*, and in 1904 he

joined the *Independence Party (Függetlenségi Párt)* and became one of its leaders. He

was Minister of Religion and Public Education (1906-1910 and 1917-1918). From 1910 he was member of the *Kossuth Party*, then its president. During the communistic Council (Soviet) Republic of 1919, he went into hiding. Following World War I he led the Hungarian delegation at the peace negotiations at Versailles-Trianon, although neither he nor his delegation was allowed to attend the Peace Conference. When he finally was allowed to comment on the Peace Dictate he brilliantly put forward Hungary's case in several languages, pleading for the realization of the Wilsonian plebiscite in drawing new borders for Hungary.

Instead, a Peace Dictate was created which took away two thirds of the nation's territory and one third of the country's Hungarian ethnic population, ceded to the newly created neighboring states. Apponyi, instead of signing the dictated unjust peace treaty, resigned. Later he became Hungary's chief delegate at the League of Nations (1923-1933). He dedicated his knowledge, experience and talent to the revision of the unjustly imposed peace treaty. His writings include *Austria-Hungary and the War* (1915); *Speeches vols. i-ii (Beszéddek, I, II)* (1896); *My Memoirs Emlékirataim* (1923-1934), and *Experiences and Memories (Élmények és emlékek)* (1933). – B: 0883, 1031, 1257, T: 7103.→**Trianon Peace Treaty.**

**Áprily, Lajos János** (Louis John) (Lajos Jékely) (Brassó, now Braşov, Romania, 14 November 1887 - Budapest, 6 August 1967) – Poet, literary translator. Áprily was his pen name. His family moved to Kolozsvár, Transylvania (now Cluj-Napoca, Romania), where he attended school and acquired a teacher's certificate in Hungarian and German literature at the University of Kolozsvár (1909). He taught at the Reformed College of Nagyenyed (now Aiud, Romania), from 1909. He published poetry from 1907 onward. His first volume, entitled *Village Elegy (Falusi elégia)* elevated him to the group of leading Hungarian poets of Transylvania. At the end of 1918, when Romania occupied Transylvania and the territory was ceded to her in 1920, Áprily tried to find a *modus vivendi* with the Romanians, at the same time trying to maintain the Hungarian education. During 1923 he studied in Dijon, France on a scholarship, where he acquired a diploma in French. In 1926 he taught at the Reformed Academy of Kolozsvár and became the editor of the periodical *Transylvanian Helicon (Erdélyi Helikon)* of the literary society. In 1929 he moved to Budapest and taught at the Lónyai Street Reformed High School and edited the *Protestant Review (Protestáns Szemle)* with Bishop László Ravasz. From 1934 to 1943 he was Principal of the Baár-Madas Reformed High School for Girls, Budapest. He retired in 1943 in protest of the so-called anti-Semitic Jewish Laws. He spent the rest of his life at his home in Szentgyörgypusztá, a picturesque valley beside the Danube, opposite Kisoroszi. The years of retirement yielded not only new poems, but very significant literary translations as well. He loved nature and was a great humanist with pure lyrical poetry. He was an outstanding poet of 20th century Hungary. Among his works are: *Ballad of the Gold Washer (Az aranymosó balladája)* (1943); *The Invisible Writing (A láthatatlan írás)* (1939); *Abel's Smoke (Ábel füstje)* (1957); *Onto the Wall of*

*the Age (A kor falára)* (1967), and *Do you want light? (Akarsz-e fényt?)* (1969). His dramas are: *Shepherds of Mount Ida (Idahegyi pásztorok)*; *Oedipus in Corinth (Oedipus Korinthosban)* and *The Cardinal (A bíboros)*. He translated English, French, Chinese, Polish, German and Russian poems. His translation of Pushkin's *Onegin* has no equal. He was a member of the Kisfaludy Society, and a corresponding member of the Hungarian Academy of Sciences (1934-1949). Schools and cultural societies bear his name at home and abroad. He was a recipient of the Attila József Prize (1954). A Literary Prize and some schools bear his name. – B: 0883, 1257, 1489, T: 7103. → **Ravasz, László.**

**Aqua Reginae Hungariae** (Water of the Hungarian Queen) – According to legend Queen Erzsébet (Elizabeth), mother of King Lajos I (Louis the Great, 1342-1382) distilled it from flowers of the Visegrád palace garden. This medicine or perfume was much sought after until the end of the Middle Ages. It was a well-known medicine abroad as well. In France it was called “*eau de la reine de Hongrie*” and was very costly. During the 17th century it was still made from rosemary and alcohol. – B: 1078, 1020, T: 7660. → **Lajos I, King.**

**Aquila, János** (John) (Radkersburg, Germany, 2nd half of 14th century) – Painter. Italian and German masters influenced his art and works while he lived in seclusion. He is considered to be the founder of the art school in a region west of the Danube and worked mostly in Vas and Zala counties. His signature is on the very first European self-portrait, documented in 1378. It was painted in the church of Velemér. In the Mártonhegy church he painted *The Death of St Martin* with the following two inscriptions: “*Per manus Joannis Aquile de Rakespurga Oriundi 1392*” and “*Omnes sn orate p.me Johanne Aquila pictore*” written below his own figure on the coat of arms wearing traditional Hungarian folk costume. In 1383 he painted frescos on the wall of the Bántornya church. His other works are: *The Procession of the Three Kings (A három királyok vonulása)*; *The Last Supper (Az utolsó vacsora)* and fragments of the *King László I (St Ladislas) legend*. – B: 0883, 1409, T: 7653.

**Aquincum** → **Óbuda.**

**Aquincum Organ** – A famous 1800-year-old find from the southern residential part of the city of Aquincum, an ancient Roman stronghold, near Óbuda, now part of Budapest. Lajos (Louis) Nagy found it in 1931. The portable hydraulic organ with several registers, stops and pipes is made of wood. Large number of its parts were found, including a plaque which reads: “*Gaius Iulius Viatorinus, Consul of the colonia-ranked city of Aquincum and former aedilis (a kind of police chief), from his own pocket, endows the organ of the firefighters' command (praefectus collegii centonarum) to said organization, in the time of the consulate of Modestus and Probus (228 AD)*”. It is of small size, can be placed on a table, is easy to transport, and weighs six to eight kilograms. Its playable reconstruction can be seen and heard in the Aquincum Museum. – B: 1154, T: 7684. → **Óbuda; Angster, József.**

**Arad** – (Latin: *Aradinum*, Romanian: *Arad*). Town at the eastern edge of the Great Hungarian Plain in present-day Romania; it is situated on the right bank of the Maros River. From ancient times it was a crossing- and market place. Arad is an industrial and railway center, producing machine tools, wagons and locomotives. Its textile, leather, as well as flourmill and timber industries are well developed, also its agriculture and commerce. It is the seat of an Eastern-Orthodox Bishopric. Toward the second half of the 19th century Arad developed rapidly to become one of the richest towns of the southeastern-part of historic Hungary in the Carpathian Basin. In 1920 (the last year that Arad still belonged to Hungary) its population was 65,000, with 40% Hungarians, 20% Romanians, 10% Jews and 5% Germans. By 1930 it had a population of 77,225, which grew to 172,824 in 2002 (13% Hungarians, 83% Romanians, 1,7% Roma, 1,3% Germans). The town was known as early as the 12th century. It was for a long time under Turkish occupation (1542 -1689); by 1551 the fortress of Arad also surrendered to the Ottoman Turks. It was only more than a century later (in 1658) that Prince György (George) Rákóczi II defeated the troops of the Pasha of Buda. In the 1848-1849 War of Independence from Habsburg rule, the Hungarian independent army defeated the Austrian forces holding Arad, the town becoming temporarily the seat of Louis Kossuth's revolutionary government, and it was at Arad where the 13 Hungarian secessionist generals were executed for "high treason and perjury" (from the Habsburg angle) on 6 October, 1849. Since then these generals have been regarded as martyrs and 6th October is an official mourning day in Hungary. A Memorial of the Martyrs of Arad, by Adolf Huszár and György (George) Zala, immortalizes their memory in Arad (1890). Among the buildings worth mentioning in Arad are the Town Hall, the Theater, the Palace of the Ministry of Justice, the Museum, the Chamber of Industry and Commerce, and a Theological Institute. The agrarian character of the town-plan is well expressed by the 2-km-long main boulevard. The overall impression of the town makes it one of the most attractive in the eastern part of the Carpathian Basin. There are several churches, all built in the Baroque style. The remnants of the castle fortress of Arad, first mentioned in 1132, and rebuilt by Empress Maria Theresa in 1752, are on the left bank of the Maros River, about 7 km east of the town. In the 20th century, the settlements of Kisszentmiklós, Mikelaka, Öthalom, Újarad and Zsigmondháza were merged with Arad. – B: 1031, 1068, 1582, 1789, 7456, T: 7456.→**Arad, Martyrs of.**

**Arad, Martyrs of** – After crushing the Hungarian War of Independence of 1848-1849 with the assistance of the Russian Czarist Army, and after the surrender of the Fort of Komárom, Baron Julius von Haynau, the Austrian general with plenipotential powers, wanted to commemorate the anniversary of the 6 October 1848 Viennese Revolution and the killing of Latour, Minister of National Defense, with a bloody revenge. His immediate fury was directed mostly against the officers of the Austrian Imperial Army, who fought on the Hungarian side and were captured and imprisoned in the Fort of Arad (now in Romania). A military court sentenced all of them to death for high treason. Four of them, Dessewffy, Kiss, Lázár and Schweidel were sentenced to die in front of the firing squad, the others by hanging. All of them, except Lázár, who was a colonel in the Imperial Army, held the rank of general. The verdict was carried out at daybreak on the 6th of October 1849. The above-mentioned four were shot in the north corner entrenchment of the fort; the other nine were executed south of the fort. Those who were

executed were *Lajos Aulich, János Damjanich, Arisztid Dessewffy, Ernő Kiss, Károly Knézich, György Lahner, Vilmos Lázár, Count Károly Leiningen, József Nagysándor, Ernő Pöltenberg, József Schweidel, Ignác Török and Count Károly Vécsey.*

The last to be executed was Count Vécsey, whose additional punishment was to witness the execution of his peers. Up to the last minute the conduct of the thirteen men showed a spiritual strength and moral stature that cannot be explained by military bravery alone, but by the knowledge that they were giving their lives for a great cause. The nation has always paid respect to these heroes. The initial letters of their names are included in a sentence, very popular at the time: "*Pannonia! Vergiss Deine Todten Nicht, Als Kläger Leben Sie*". ("*Pannonia, Do Not Forget Your Dead, They Live On As Accusers* "). A monument was erected on 6th October 1890, marking the site of the executions. It was renovated in 1974 to mark the 125th anniversary. There is a crypt at its base that holds the ashes of eleven of the martyrs. The grave of Ernő Kiss is in Alsóelemér (now Srpski Elemer, Serbia) and the grave of Arisztid Dessewffy is in Margonyán (now Marhan, Slovakia). The day of their execution has been dedicated by the Hungarian nation as the Memorial Day of the Martyrs of the War of Independence.

Besides the execution of 13 high-ranking officers of the Hungarian Army in Arad, there were other martyrs as well. Count Lajos (Louis) Batthyány, the Prime Minister of the First Hungarian Council of Ministers, was executed in Pest on 6 October 1849, by firing squad. In connection with the Revolution and Freedom Fight of 1848-1849, altogether 1765 court-martials took place, out of which, 895 cases were in Hungary. Thirty-four army officers were executed before 1849, according to the historian, Mihály (Michael) Horváth. After 1849, 128 army officers were sentenced to death, according to Endre (Andrew) Bakk. In Transylvania alone, 72 officers and 25 civilians were executed, as recorded by Ákos Egyed. – B: 1078, T: 7668. → **Aulich, Lajos; Damjanich, János; Dessewffy, Arisztid; Kiss, Ernő; Knézich, Károly; Lahner, György; Lázár, Vilmos; Leiningen, Count Károly; Nagysándor, József; Pöltenberg, Ernő; Schweidel, József; Török, Ignác; Vécsey, Count Károly; Batthyány, Count Lajos; Haynau, Baron Julius Freiherr von; Ferenc József, Emperor and King; Arad.**

**Aradi, Éva** (née Rétfalvi) (Budapest, 14 January 1938 - ) – Linguist. Her higher studies were taken at the University of Budapest, interrupted by the Revolution and Freedom Fight of 1956, when she distributed flyers. She was arrested in March 1957, and kept in custody for three months. She was banned from all universities and worked at a firm dealing with foreign trade. In 1965 she was finally admitted to the University of Budapest, where she obtained an M.A. Degree in Hungarian and English literature in 1969. She went to India with her husband, staying in Bombay for eight years, and studied Hindi language and literature at *Bharatiya Vidhya Bhavan* (1971-1976). She took part in the 1st, 2nd, 3rd and 4th World Hindi Conventions. She obtained a Ph.D. from the University of Budapest in Indian literature and Hindi language (1978). She is retired but teaches Hindi and Indian Culture at the Asia Center of the Faculty of Sciences of the University of Pécs. She translated short stories from different Hindi writers, among them Premchand's *Nirmala*, and ten short stories, published in 1980 in Hungary. She visited India several times and published many essays both in India and Hungary, and a book about the Hephthalites, i.e. the Huns. Its Hungarian title is: *A Hunok Indiában – a heftaliták története* (*The Huns in India – the History of the Hephthalites*) (2005). This book and her essays deal with the Hephthalite Empire in the 5th-6th centuries A.D., when

the White Huns occupied the territories of present day Pakistan and the Northern and northwestern part of India. After the end of their kingdom, one part assimilated with Indian society, they became the brave Rajput and Jat warriors. The other part of the Huns started for the West, and together with other Central-Asian tribes they became the Avar people, who occupied the Carpathian Basin at the end of the 6th century. So the successors of the White Huns in India are related to the Hungarians, the successors of the Avars. Aradi received awards from the President of India in 1993, and from the Indian Government in 2008. – B: 1920, 1932, T: 7694, 7103.→**White Huns; Huns; Avars.**

**Arany, Bálint** (Valentine) (Rinyaújlak, 28 February 1901 - Budapest, 24 November 1987) – Mechanical engineer. He studied at the Reformed High School of Csurgó and obtained his diploma in mechanical engineering at the Polytechnic of Budapest in 1925. He found work at the Swedish Ball-Bearing Co. (SKF) in 1929. He played an important role in creating and popularizing ballbearings in Hungary. During World War II he was involved in some anti-German actions. He was one of the founders of *Turul Publishing* (*Turul Könyvkiadó*) and the weekly *Hungarian Road* (*Magyar Út*). From 1945 he worked as organizing secretary at the head office of the Independent Smallholders' Party. He was arrested in December 1946 and charged with conspiracy against the Hungarian Republic. It was a so-called *Hungarian Community lawsuit* (*Magyar Közösség-per*). In the trumped up lawsuit he was given a death sentence that was later commuted to a 12-year prison term. He was freed and rehabilitated in 1956. He continued to work until the end of his life while being constantly harassed by the police. His book: *Crown Witness. Memoirs 1945-1957*, (*Koronatanú. Emlékirat 1945-57*) was published in 1990.→B: 0883, 1031, T: 3240.

**Arany, János** (John) (Nagyszalonta, an ethnically purely Hungarian town, now Salonta in Romania, at the eastern edge of the Great Hungarian Plain, 2 March 1817 - Budapest, 22 October 1882) – Poet. Descendant of an impoverished *Hajdú* (*Heyduk*) family, he attended secondary school first in his birthplace, and later (aged 16) in the Reformed College at Debrecen, but did not complete his studies. After working for a year as a teacher at Kisújszállás, he was a strolling actor for a while, but he became disillusioned with acting. He returned to teaching, finally settling down in Nagyszalonta as an assistant teacher, then as a junior clerk; and finally as town clerk. While he was junior clerk, he married Julianna Ercsey in 1839, and from his marriage he had two children.

His first noteworthy piece of work was a satirical epic poem, *The Lost Constitution* (*Az elveszett alkotmány*) written in hexameters, published in 1845, and was awarded a prize from the Kisfaludy Society. In 1847 he received a literary award from the same Society for the epic poem *Toldi*, which became the most outstanding, true folk epic in Hungarian literature, comparable to Petőfi's *John the Hero* (*János Vitéz*). With *Toldi* he achieved nationwide fame. Later it became the epic *Toldi Trilogy*, consisting of *Toldi* (1847), *Toldi's Love* (*Toldi szerelme*) (1879) and *Toldi's Evening* (*Toldi estéje*) (1854). This was the most creative period of his life, contributing

greatly to Hungarian literature, and making him the leading epic and lyrical poet of Hungary, the Poet Laureate. He was the most distinguished master of Hungarian epic poetry. He also excelled in ballads. The publishing of *Toldi* also started a close friendship with poet Sándor (Alexander) Petőfi that lent him a creative force to the end of his life. The epic *Gypsies of Nagyida (Nagyidai cigányok)* (1852) expresses in a humorous way the poet's bitterness about the downfall of the War of Independence (1848-1849). He also planned to write another epic trilogy based on the Hun-legends, but he only completed the first part: *Death of Buda (Buda halála)* in 1864. His sense of humor was richest in the incomplete epic *Mad Istók (Bolond Istók)* (1850). The *Siege of Murány (Murány ostroma)* (1848) is a realistic depiction of the hero's inner life.

In his lyrical poems the great problems of mankind, the fate of his country and his family, as well as the turn of events in his own life deeply affected his sensitive soul: voices of struggle, despair, doubt and hopelessness are combined with the voice of righteousness. His themes are rooted in Hungarian history, in the War of Independence, and in scenes of everyday life, as in the *Family Circle (Családi kör)*. Most of his lyrics were from the 1850s, and they tend to be somewhat brooding and melancholic, in contrast to Petőfi's generally lively lyric buoyancy. The depth of his thoughts, the purity of his feelings, the seriousness of his noble outlook on life, and his sincere religiousness exert an uplifting and soul-stirring effect on the reader both in his lyric and his epic poetry. Side by side with Sándor Petőfi, he was the towering figure of Hungarian poetry until the appearance of Endre Ady. The Hungarian poetic language was enriched by his countless new turns of expression; he was able to create as many tones as epic poems, and at will he could be old-fashioned, popular or modern. His metrics were perfect; he was the first to recognize the rules of the Hungarian stressed beat. He was the greatest master of the Hungarian language.

During the 1848-1849 War of Independence from Austrian rule, for a short time he was a volunteer in the National Guard. The struggle for freedom inspired him to write many revolutionary poems. He was also appointed as a junior civil servant in the Interior Ministry, but after the Hungarian downfall, he lost his position. His official work absorbed so much of his time that he was unable to do creative work in the literary field; his muse became silent, and he became a disappointed man. From 1851 to 1860 he worked as a teacher at the Reformed High School of Nagykőrös, then moved to Pest and for four years (from 1860) he was Director of the Kisfaludy Society; thereafter he became Secretary of the Hungarian Academy of Sciences until 1879, when he had to resign at age of 62, due to ill health. During these years he wrote most of his masterly ballads, mostly dark and tragic: *Calling to the Bier (Tetemre hívás)*; *Ágnes Woman (Ágnes asszony)*; *Matthias's Mother (Mátyás anyja)*; *The Bards of Wales (A walesi bárdok)*. He also translated works of Aristophanes from Greek, and works of Shakespeare (*Hamlet, Midsummer-Night's Dream*) from English. He was the first to appreciate the great Hungarian tragedy of Katona's *Bánk bán*, and value the Faust-like universal drama of Madách's *The Tragedy of Man (Az ember tragédiája)*. In his last years he wrote a group of charming poems entitled *Őszikék (Autumn-blue poems)*, showing humaneness, wisdom and warm humor. His bronze statue was erected at the front entrance of the National Museum of Budapest and his memory is cherished also by the *Arany Museum* of Nagyszalonta. Many schools, cultural institutions and streets in towns and villages bear his name, not only in present-time truncated Hungary, but also outside within the Carpathian Basin. Arany's biography has been planned in 3 volumes by the literary

historian Géza Voinovich; his life's work is featured by another literary historian, Frigyes (Frederick) Riedl, entitled *János Arany* (from 1887). – B: 0883, 1257, 7456, T: 7666, 7456.→**Petőfi, Sándor; Katona, József; Madách, Imre; Ady, Endre; Riedl, Frigyes.**

**Arany, László** (Ladislav) (Nagyszalonta now Salonta, Romania, 25 March 1844 - Budapest, 1 August 1898) – Poet, literary translator, political writer, son of poet laureate János (John) Arany. Following his secondary education at the Reformed High School in Nagykovács, he studied at the Law School of Pest. From 1866 he was a clerk at the Institute of Agrarian Loan of Budapest and its director from 1880. He published his first work *Original Folk Tales (Eredeti népmesék)*, collected by him in 1862. He was involved in the translation of poems of Lermontov, Puskin, the plays of Shakespeare, and those of Molière. He wrote *Elfrida* and *The Hero of Mirages (A délibábok hőse)*, both narrative poems, rewarded with a prize by the Kisfaludy Society. He edited, together with poet Pál (Paul) Gyulai, the three volumes of the *Collection of Hungarian Folk Poetry (Magyar Népköltési Gyűjtemény)* (1872-1883). He was a Member of Parliament with a liberal program (1887-1892). He published his father's unpublished literary works in four volumes (1887-1889). He was member of the Kisfaludy Society. – B: 0883, 1257, T: 7103.→**Arany, János; Gyulai, Pál.**

**Arany, Sándor** (Alexander) (Mezőtúr, 4 March 1899 - Debrecen, 16 February 1984) – Soil chemist, agricultural scientist. He studied at the Polytechnic of Budapest, obtained his Degree in Chemistry in 1923. At first he worked at the Agricultural Chemical Research Station of Debrecen; then he was appointed Assistant Professor to Elek Sigmund at the Polytechnic of Budapest. In 1926 he studied problematic sodic soils at the University of California at Berkeley, USA. Then he studied in Bonn, Germany. Following his return to Hungary he oversaw the Debrecen Agricultural Academy's Chemical Department and also taught at the University of Debrecen. After 1945 he directed the Land Improvement Company's Soil Laboratory east of the River Tisza; later heading the Hungarian Agricultural Testing Institute's Soil Department in Debrecen. His highly specialized research work was recognized internationally. In the course of his research in the 1920s, he discovered how the ground could be vastly improved by proper drainage and by water and lime treatment. He gave his name to many technological inventions still used in sodium soil research, such as Arany's categorization number "KA". He was active internationally and was vice-president of the International Soil Research Association's Sodic Sub-Commission from 1926 to the beginning of World War II. He published his findings in some 100 scientific papers. He was recipient of the Kossuth Prize in 1958. – B: 0883, 1523, T: 3240.→**Sigmund, Elek.**

**Arányi, Jelly d'** (*hunyadvári, d'Aranyi*) (Budapest, 30 May 1895 - Florence, Italy, 30 March 1966) – Violin virtuoso. She was grandniece of the violin virtuoso Joseph Joachim. She made extensive European concert tours in Europe and in the USA. From 1923 she lived in London. Together with Béla Bartók she gave successful sonata *soirées* at many places. Maurice Ravel composed and dedicated both of his violin concertos to her and paid her compliments by dedicating his *Tzigane for Violin and Orchestra* virtuoso work to her. – B: 0881, T: 7103.→**Bartók, Béla.**

**“Aranykert”** (Golden Garden) – Ancient name of *Csallóköz* that is now Zitny Osztrov, Slovakia. It is a huge island in the Danube, where the river enters into the Carpathian Basin from Austria. It has an entirely Hungarian ethnic population but has belonged to Slovakia since the Dictated Trianon Peace Treaty of 1920. Legend has it that the area was once a “golden garden” inhabited by fairy godmothers and swans. – B: 0942, T: 7656.→**Trianon Peace Treaty.**

**Aranyos, Zoltán** (Debrecen, 16 June 1934 - ) – Minister of the Reformed Church, theologian. He studied at the Reformed Theological Academy, Debrecen (1953-1957), then at the University of Bonn, West Germany (1958-1959). He earned a Ph.D. in Theology. He was a German language lecturer at the Reformed Theological Academy of Debrecen (1959-1966) then secretary of the Ecumenical Council of Hungarian Churches (1966-1972). In 1972-1973 he was a co-worker of the Inter-Denominational Research Institute, Bensheim (then in West Germany). He was director of the Inter-Denominational Research Institute in Budapest (1974), then Head of Study Department of the General Synod Office of the Reformed Church in Hungary, after that Counselor of the General Synod Office, Budapest (1979-1991). He acted as General Secretary of the Inter-Church Peace Committee of the National Peace Council (1983). He retired after being the Chief Counselor to the Ministry of Defense (1991-1994). His books include *Commentary of the Book of Nahum (Náhum könyvének magyarázata)*, and *Commentary of the Book of Micah (Mikéás könyvének magyarázata)*. His articles and studies appeared in ecclesiastical periodicals at home and abroad. – B: 0874, T: 7103.→**Reformed Church in Hungary.**

**Arday, Géza** (Budapest 3 February 1973 - ) – Literary historian. His university studies were taken at the Gáspár Károli Reformed University of Budapest, where he studied Hungarian language and linguistics. From 2000 he worked as a ministerial counselor. Currently he is a high school teacher in Budapest. From 1990 he was Presidium member of the Mother Tongue Summer College Society, Sárospatak (*Sárospataki Nyári Anyanyelvi Kollégium Egyesület*) for 10 years. He was President of the Mother Country Youth Department of the World Federation of Hungarians (*A Magyarok Világszövetsége Anyaországai Ifjúsági Tagozata*). For two years he was one of the leaders of the Conservative Club and since 2000 he has been a member of the Knightly Order of St. John of Jerusalem. Alongside his work as a literary historian he writes critiques, reviews and articles. His field of research is the works of Hungarian writers in the West, especially the work of the late László (Ladislav) Cs. Szabó. He works closely with the periodical, *Mikes International in Holland*. He is also involved in research for the literary review *The West (A Nyugat)* and the *New Moon* literary circle. His works include a study on László (Ladislav) Cs. Szabó (2001), and a volume entitled *The Attitude and Character of Dezső Szabó (Szabó Dezső szemlélete és egyénisége)* (2003). His book *Fights and Faces of Albert Beke (Beke Albert (h)arcai)* (2003) is based on his professor. – B: 1248, T: 7103.→**Cs. Szabó, László; Beke, Albert.**

**Argay, György** (Kórpona, 10 April 1893 - Kolozsvár, now Cluj-Napoca Romania, 24 October 1974) – Lutheran superintendent in Transylvania (*Erdély*, now in Romania). He was ordained in Budapest in 1948. He served as parish minister in Temesvár (now Timișoara), Steierlak (now Steierlakanina), Pürkerec (now Purcăreni) Arad, and

Kolozsvár. He was Dean of the Bánság Distric and from 1941 he was Superintendent of the Church District. – B: 1050, T: 7103.

**Argentina, Hungarians in** – According to official records, in the 1920s there were about 4,000 Hungarians in Argentina, mainly in and around Buenos Aires. They were mostly peasants and laborers who arrived in great numbers after World War I. Being hard workers they soon gained a good reputation in their new country. The second wave arrived after World War II and they were mostly intellectuals wanting to secure a new life for themselves and their families. The third wave reached Argentina following the Revolution of 1956. The Hungarian immigrants favored Buenos Aires, Chaco and Misiones in the North, Rosario, Santa Fé, the banks of the River Parana, Cordoba and Mendoza in the western mountainous region, and Tucuman. In Buenos Aires there is a “Magyar Square” with a “Sekler Gate” (*Székely kapu*). Hungarians are also scattered all over Patagonia and other regions of Argentina. The educated among the newcomers soon became actively involved in the religious and intellectual life of their new country. There is the *Iglesia Cristiana Reformada Evangélica Húngara en la Argentina* in Buenos Aires, and the *Asociación de los Húngaros Católicos en Argentina* in Buenos Aires. For a time there were two Hungarian schools between the two World Wars, the first established in 1926 in Pineyro near Buenos Aires. Initially a Parents’ Committee was leading it, coming later under the supervision of the Hungarian Embassy. The school was moved in 1935 to Valentin Alsina. It closed its doors in 1944. The second school, established by the Hungarian Embassy in Leguizamon, closed in 1940. These schools made possible the survival of the Hungarian language and identity in the new surroundings where, even in 1991, some members of the older generation cultivated and nurtured their mother tongue along with their original identity. From the beginning every local Hungarian association had its own library. Hungarian private and state interests donated a large part of the literary and scientific collections, the rest being either bought by the associations or donated to them. When an Association ceased to exist their library was given to another Society. The *Relief Club*, the *Hungaria*, the *Hungarian Veterans’ Assocation* (*Magyar Harcosok Bajtársi Szövetsége – MHBK*) and the *St Stephen Circle* had the best Hungarian libraries in Argentina. *The South American Hungarian News* (*Dél-amerikai Magyar Hírlap*) is the only Hungarian Newspaper in Latin America. A Hungarian newspaper estimated the number of Hungarians living in Argentina in 1961 as 60,909. The Hungarian Office of Statistics in Budapest set the number at 15,000 in 1969, while in 1985 there were an estimated 40,000 Hungarians living in Argentina. According to an educated estimate, the number of Hungarians in Argentina numbered about 40,000 in 2003. – B: 1104, 1364, 1020, T: 3240.

**Árkus, József** (Joseph) (Nagykanizsa, 1 November 1931 - Budapest, 28 September 1992) – Journalist, humorist. His work mainly tied him to the TV, first as a guest in the *Family Half-Circle* (*Családi félkör*), later as manager of the magazine *Parabola*. This he turned into a political platform with growing criticism of the Communist administration of the country. He was manager of the *Szuperbola* show, a popular segment of the New Year’s Eve cabaret programs. He was a regular writer for the Microscope Theater (*Mikroszkóp Színpad*), Budapest. His outspokenness represented a political statement in the final decades of the Kádár regime. – B: 1122, 1178, T: 7103. → **Kádár, János**.

**Armaments, Old Hungarian** – The Hungarian army entering the Carpathian Basin in the 9th century had armaments similar to all Asiatic nomad ethnic groups (also known as “Turanians”). All the fighters were horseback riders. Each warrior often had more than one horse as dictated by his means and obligations. He also had several bows (similar to the Scythian reflex or composite bows) with dozens of arrows. The warriors rarely wore heavy protective armour, since speed was of the essence of combat. For close encounters they often used a 2-4-meter-long lance (*kopja*). On the end of this pole they often carried an identifying flag. Their sword, called “*szablya*”, was slightly curved and had one sharp edge. The early Hungarians later adopted the double-edged sword or “*pallos*”, used among kindred ethnic groups, such as the Avars, Kabars and Onogurs. The 15th century axe-like weapon, the “*csákány*” was developed into the “*fokos-csákány*”. – B: 1133, 1020, T: 7656. → **Turan; Avars; Kabars; Onogurs.**

**Armenians** – A people of Asian origin. Most of them (4.2 million) live in the former Soviet Union’s Armenian, Georgian and Azerbaijan Republics. A smaller group of Armenians, about 1.5 million, live all over Central Europe, Turkey in the Near East, and on the American continent. During the end of the Middle Ages, several of their groups settled in Moldavia, fleeing from the Turks. They lived there for approximately 250 years and built two cities. During the Turkish military campaigns against Kameniec, the Polish border fortress, they were forced to leave their settlements. After three years of wandering, led by Daniel Todor, they escaped to Transylvania (*Erdély*, now in Romania), where Mihály Apafi I, Prince of Transylvania (1662-1690) allowed the mainly merchant Armenians (3,000 families) to settle in 1672. Their different religious affiliations ended through their union with the Roman Catholics. At the beginning of the 18th century they formed the Armenian Catholic Church. During this time they built four centers in Transylvania: *Csíkszépvíz* (now Frumoasa, Romania), *Erzsébetváros* (*Ékesfalva*, now Dubraveni-Ebesfalva, Romania), *Gyergyószentmiklós* (now Gheorgheni, Romania), and *Szamosújvár* (now Gherla, Romania). They built the last one on top of the destroyed medieval village at the beginning of the 18th century. There was a significant Armenian colony at *Újvidék* (now Novi Sad, Serbia) to which Armenians escaped from Belgrade in 1739, after the fortress fell into the hands of the Turks. During the 19th century they scattered all over Transylvania and the cities of the *Nagy-Alföld* (Great Hungarian Plain). The Armenians living in Hungary also joined the War of Independence (1848-1849). Among them were high-ranking officers, such as János (John) Csetz, Ernő (Ernest) Kiss, and Vilmos (William) Lázár. All representatives of the Armenian cities in Hungary and Transylvania voted for the union of Transylvania (*Erdély*, now in Romania) with Hungary. At the turn of the 19th century, besides remaining aware of their ethnic origin, those who lived in the Carpathian Basin gave up their mother tongue for Hungarian. – B: 0942, 1078, 1134, T: 7684. → **Apafi I. Prince Mihály; Csetz, János; Kiss, Ernő, Lázár, Vilmos.**

**Army** (*had*) – (1) Word used by the Hungarians of old to name the tribes or the family unit in a broad sense. Not only the male and female members and their children were covered by this expression but even their serfs were included as members of the “*had*”. In various regions the meaning of the word differed considerably and the expression lost its significance in modern times. (2) In wartime the name of the belligerent army.

Declaration of war in Hungarian is “*hadüzenet*” and waging war is “*hadviselés*”, preserving the old root of the word. – B: 1078, 1134, T: 3233.

**Árokháty, Béla** (Gyüre, 14 January 1890 - Budapest, 28 March 1942) – Organist, musicologist, composer and minister of the Reformed Church. He studied Theology at the Reformed Theological Academies of Sárospatak and Budapest, composition and organ under Zoltán Kodály and Dezső (Desider) Antalffy-Zsiross at the Ferenc (Franz) Liszt Academy of Music, Budapest. Between 1920 and 1923 he was a teacher of religion, choirmaster, and Professor of church-music in the Reformed Theological Academy, Budapest. For two years he studied church music in Edinburgh, Scotland, where he was choirmaster and church organist. He performed organ recitals in many Scottish towns. When he returned to Hungary he organized the Goudimel Choir. His main aim was the music renewal of the Reformed Church. He reconstructed in Hungarian the Geneva Psalms in their original form and published them with organ accompaniment under the title *Psalterium* in 1940. He wrote a study entitled *Albert Szenczi Molnár and the Geneva Psalms (Szenczi Molnár Albert és a genfi zsoltárok)* (1934). He also edited the *Hymnbook of the Reformed Church in Yugoslavia* in 1939. Some 35 organs were built in Hungary to his specifications. – B: 0913, T: 7103.→**Kodály, Zolán; Antalffy-Zsiross, Dezső; Szenczi Molnár, Albert; Reformed Church in Hungary; Ágoston, Sándor; Reformed Church in Yugoslavia.**

**Árpád** – (? - Buda, 907 AD) – Reigning Prince (*fejedelem, khagan*) of the Magyar Tribal Confederation. He led and settled the Magyars in the Carpathian Basin at first in the eastern and central parts during 895-896. By 900-904 he extended his reign to the Central and Transdanubian region as well. Árpád is regarded as the founder of the Hungarian nation.

On their settlement in the Carpathian Basin and also their antecedents we mainly rely on two Hungarian chronicles: Anonymus' *Gesta Hungarorum* (ca. 1200), and Simon Kézai's *Gesta Hungarorum* (1384). According to Kézai, Árpád, through his father Álmos, was of the ancient *Turul* clan, a descendent of *Attila the Hun*. He unequivocally states that the Hungarians are direct descendents of the Huns. *Anonymus* relates that Álmos, the head (*kende*) of the *Megyer Tribe*, as descendent of Attila, was the rightful heir to the land of “Pannonia”, (i.e. Hungary), the seat of Attila's western Hun Empire. *Anonymus* points out that the Hungarians are descendants of the Scythians. According to him, the Magyar tribes, while still in their earlier home in “Scythia”, occupied a territory called *Dentu-moger*

(Presumably between the Black and Caspian Seas). We learn from the Byzantine Emperor Constantine VII (*Porphyrogenetos*) (913-959) that the “Turks” (Hungarians) moved from the neighborhood of the Khazars (i.e. from Dentumoger) to a place called *Etelköz*. From 887 to 895 they stayed in *Etelköz (Atelcuzu, Etelközü)*, “between the rivers” at the confluence of the Dnepr, Dnestr, Seret and Prut Rivers reaching all the way to Kijev in modern Ukraine. The Hungarian Chronicles don't mention *Etelköz*. The

leaders of the Seven Tribes (*Hétmagyar* or *Hetiümoger*) elected *Álmos* as their leader and entered into a Blood Treaty (or Alliance, *Vérszerződés*), whereby the leaders slashed their arms, collected their blood in a golden cup, each drank from its contents, then swore an oath of allegiance – a ritual also practiced by the Scythians (cf. Herodotus, *The Histories*. 5th century BC). The names of the leaders were *Álmos*, (*Árpád*), *Előd*, *Ond*, *Kond*, *Tas*, *Huba*, and *Töhötöm*. The names of the tribes were: *Nyék*, *Megyer*, *Kürt-Gyarmat*, *Tarján*, *Jenő*, *Kér*, *Keszi*, names that live on in settlement names all over Hungary. *Álmos*, head of the powerful *Magyar (Megyer) Tribe* was elected *Khagan* of all the tribes by being hoisted on a shield in a ceremonial procession, symbolizing his ascendancy to power. There is some controversy about his title: according to Constantine VII, his title was *gyula*. During their stay in Kijev (*Keve*) in Etelköz, he allied himself with three united *Kabar (Kavar) Tribes (Varsány, Tárkony and Káliz)*, themselves breakaway tribes from the Khazar Khaganate. However, before crossing the Carpathian Mountain Ranges, *Álmos* transferred his powers to his son *Árpád*, and then apparently died. (According to some historians the shamans killed him as a sacrifice). According to some estimates, by this time the Magyar Confederation numbered about half a million. Now, in command of all the Magyar and Kabar tribes, *Árpád* embarked on the formidable task of settling his people in the Carpathian Basin, urged on by the threat of the ever expanding and approaching *Pechenegs (Besenyők)*. This involved a carefully planned military campaign in the form of a pincer movement, the main force led by *Árpád*, crossing the Carpathians through the northeastern passes (the *Verecke-*, *Uzsok-* and *Tatar Passes*). A little earlier his son *Levente* (a.k.a. *Liüntika*) and his forces swept around the southern Carpathian bend and entered through the *Iron Gate*. Here *Levente*, in alliance with the Byzantine Emperor Leo VI, defeated the Bulgars who, at that time, ruled over the eastern Transylvanian part of the Carpathian Basin. *Levente* fell in the fighting; but *Árpád*'s northern campaign succeeded (described in detail by Viktor Padányi in his book: *Dentu-Magyararia*, 1963). The Magyar Tribal Confederation settled in the vast, largely uninhabited areas of the Basin amongst the remnants of various ethnic groups: the *Slavs*, mostly in the North, and the more numerous *Avar* tribes. The Magyars surrounded themselves with vacant strips of land (*gyepű*) as defense lines on the periphery of the Basin, with the thick forests of the Carpathians in the north and east, with the swampland in the west, while the Danube and its tributary, the Sava forming the southern defense line. *Árpád* shared his powers with *Kurszán (Curzan)*, probably a relative, head of a powerful clan) bearing the title *kende (kündü)*, the head of state, who was also responsible for “foreign affairs”. In 904 while on a diplomatic mission in Bavaria, *Kurszán* was treacherously murdered (*in dolo malo*) by the Germans during a banquet. Following his death *Árpád* assumed sole leadership. In 907 *Árpád* died and was buried at his tribal seat north of Buda at Fehéregyháza or Fehérvár (so far his burial site has not been found). *Árpád* founded the Hungarian ruling dynasty the Royal House of *Árpád*. They reigned first as Ruling Princes, then as Christian kings from *István I (St Stephen)* in 1000 to *András III (Endre, Andrew)* in 1301.

What language the Magyars spoke in the 9th century has been the subject of many a heated and hitherto unresolved debate among historians and linguists. According to some, the early Hungarians also spoke a Turkic dialect, apparently the language of the Kabars. However, it has never been conclusively proven that *Árpád* and his people spoke anything else but Hungarian, a Hun-Avar related ancient language with some Finno-Ugric and Turkic admixture. The Hungarian (Magyar) language of the famous *Funeral*

*Oration* of early 13th century is understandable in the 21st century. The Magyars found the Magyar-speaking Sekler tribes (*siculi, székelyek*, according to folk legend, remnants of the Huns) in the eastern part of the Carpathian Basin, who apparently invited them in (see: *Anonymus*). Gyula (Julius) László, in his book, *A kettős honfoglalás (The Two-Fold – Dual – Conquest)* (1978) puts forward the theory that the first wave of Magyar-speaking peoples, the late Avars, called by him “Onogur-Magyars”, settled in the Carpathian Basin around 680, and their descendants lived to experience the arrival of the Magyars under Árpád’s leadership. The Árpád Dynasty reigned as kings from István I (St Stephen) in 1001 until András III (Endre, Andrew) in 1301. – B: 0883, 7456, 1385, 7617, T: 3312, 7456, 7617.→**Álmos; Anonymus; Attila; Avars; Dentumoger; Etelköz; Gesta; Gyepű; Hungarian language; Hun-Hungarian Language; Huns; Kabars; Kende; Kézai; Khazars; László, Gyula; Padányi, Viktor; Pannonia; Pechenegs; Scythians; Turul.**

**Árpád, House of** – This ancient Hungarian dynasty originated with Árpád, first leader of the Hungarian nation. First rulers were *Árpád, Zolta, Fajsz* and *Taksony*. The three oldest sons of Árpád were: *Tarhos, Üllő* and *Jutas*, who died early. His youngest son *Zolta* became the ruling prince, succeeded by *Fajsz*, the grandson of Árpád, and after him the son of *Zolta, Taksony* became the reigning prince. *Géza-István*, son of Taksony took over the leadership as a reigning prince (972-997). His son *Vajk* became the first crowned Christian monarch in the year 1000, as King István I (St Stephen), who ruled from 997 to 1038, and stabilized his father’s work. The state grew stronger and successfully defended its independence successfully against the German emperors’ expansionist policies. During the rule of their successors, Kings András I (Endre, Andrew) (1046-1060), László I (St Ladislav) (1077-1095) and Kálmán (Coloman the Booklover) (1095-1116). During the reign of Béla III (1173-1196), Hungary became a leading European power. An outstanding ruler of the House of Árpád was Béla IV, who rebuilt Hungary after the devastation caused by the Mongol Invasion of 1241-1242. To guard against further attacks he entered into many successful diplomatic relations. András III (Endre, Andrew), the last king of the House of Árpád died in 1301. This ruling family was related to all of Europe’s reigning dynasties. After the House of Árpád died out the state fell into anarchy for a short period. – B: 1138, 1020, T: 7685.→**Árpád; Géza-István; István I, King; András I, King; László I, King; Kálmán, King; Béla IV, King; Mongol-Tartar Invasion.**

**Árpád Railcars** – The collective name of the first Hungarian four-axle railcars (*sinautó*). Its diesel oil engine and a cogwheel drive, designed by György (George) Jendrassik, were produced at the Ganz Works of Budapest in 1934. They covered the 270 km distance between Budapest and Vienna in two hours and fifty-seven minutes. As a result of their technical success several countries ordered them. After World War II the “*Tas*” car became a museum piece. Due to its excellent condition it was recommissioned in the 1980’s under the name “Árpád” for some nostalgic trips. – B: 1138, T: 7674.→**Jendrassik, György.**

**Árva Bethlen, Kata**→**Bethlen, Countess Kata Árva.**

**Árva Fort** – Fortified castle located in the Upper Hungary (*Felvidék*, now Hrod Orava, Slovakia). The area was an uninhabited primeval forest at the time of the founding of the Hungarian state in the 10th century. The original royal fort was built on rocky peaks above the River Árva. The boldest and the most beautifully constructed fort of Central Europe, it appears in the condition today as it did in the early 17th century.

The fort was already a county seat in 1267. King Zsigmond (Sigismund of Luxembourg, 1387-1437) pawned the fort to a local lord, Stibor. Giskra, with the Polish robber baron Peter Komorowsky occupied the fort for 25 years in the middle of the 15th century and kept the inhabitants in fear. King Mátyás I (Matthias Corvinus, 1458-1490) put an end to the illegal occupation of the fort and to the criminal activities of the outlaws. The king employed the well-trained soldiers of the fort during the formation of his famous Black Army. King Mátyás I held Péter Várady, Archbishop of Kalocsa, captive for political reasons in the fort. The fort and the neighboring 80 thousand acres of land, 80 villages, the chapel houses and a marble statue of György Thurzó became the property of the Thurzó family in 1556. They renovated and converted it into a fortified residential palace. Under the leadership of Gáspár (Gasper) Pika, the refugees, together with the rebelling serfs, captured the fort from the Austrian armies in 1672. In 1678, the army of Count Imre (Emeric) Thököly occupied it, followed by the forces of Prince Ferenc (Francis) Rákóczi II. Ferenc Babocsai, Commander of the fort, defeated the attacking Austrian army in January 1709. The fort did not suffer much damage during the freedom fights of Thököly and Rákóczi, but it burned down in 1800. The Thurzó heirs rebuilt the fort and it remained in the family's ownership until 1918.

The fort has three vertically separated units: the lower, middle and upper fort. The chapel in the lower fort contains the family crypt. The tower is home to the archives of the estate. A 91-meter deep well in the middle fort is always filled with water. Wooden steps provide access to the upper fort situated on the top of a 136-meter high peak. Ferenc (Francis) Thurzó built this unit in 1561. A museum was established in the halls of the fort in 1920, but the Czechs plundered the large and priceless collection. – B: 1078, 120, T: 7663. → **Most of the persons mentioned have their own entry.**

**Arvisura** (“Speaking the truth”) – Early history of the Huns, and also the Magyars (Hungarians), described in the form of legends. It is supposed to have a history more than two thousand years, recorded and finally preserved in runic script by the Voguls (or Mansis) in the lower, northernmost course of the Ob River. The ancient history of the Magyars is shown through their world of legends. It is considered to have originated from the shamans of the Hun tribal confederation of 24 tribes under their great king *Mao-tun* in the 2nd century BC. With the adoption of Christianity by the Hungarians in the Carpathian Basin, these runic legends, which used to be held in Buda before the Carpathian settlement of the Magyars, fell into serious danger. The head shaman of the Gyarmat tribe looked after it for some time. The whole collection was saved by taking it to the Bashkirs, a mixture of Finno-Ugric, Turkic and Mongolian tribes living on the southern slopes of the Ural Mountains. However, because of the approaching Mongol conquest of the 13th century endangered it again, it was transferred for safekeeping to the Voguls, living much further north, out of the way of the Mongols. Tura Szalaváré, the Vogul chief-shaman, living in the 20th century, befriended a Hungarian, Zoltán Paál (1913-1982), who was living in the Soviet Union as a forced laborer at the time and, regarding him “initiated”, entrusted the collection to him, with the request to transcribe

the runic text into Hungarian. 20-30 years later he completed the transcription, thus considerably enriching Hungarian ancient history. The book appeared in printed form for the first time in 1998 entitled: *Arvisura - Igazszólás, I, II (Arvisura - Speaking the Truth, vols. i, ii)* (Püski Publishers, Budapest, 1998). There are six centers of the runic-carving shamans around the world today, who are writing the secret history of mankind; but the time has not yet come for the disclosure of all the secrets. However, some scholars of ancient history regard Arvisura as a fake document, composed in recent times. – B: 1945, 1789, T: 7456.→**Paál, Zoltán.**

**Asbóth, Oszkár (1)** (Oscar) (Pankota, 1 March 1891 - Budapest, 27 February 1960) – Engineer, Hungarian inventor of the helicopter. He was a descendant of General Lajos (Louis) Asbóth, a freedom fighter in the War of Independence of 1848-1849. Following his studies in Arad (now in Romania), Szabadka (now Subotica, Serbia) and Wiener Neustadt, Austria, he was engaged in airplane constructions. As a novice airplane builder he obtained a concession in 1913 for the organization of the Turkish Air Force, ahead of the French Ministry of the Interior. He was a leader in aviation. During World War I, he worked together with countryman Tódor (Theodore) Kármán at the Fischamend Institute of propeller development. After World War I he built a helicopter equipped with the Asbóth propeller and stabilized by rudder planes. It ascended vertically with horizontal maneuverability. Its success gave new impetus to helicopter research all over Europe. Asbóth also worked on the design of shallow displacement propeller-driven boats rendering shallow inland waters navigable. He also completed an experimental model of this type of boat. – B: 0883, 1031, T: 7674.→**Kármán, von Tódor; Némethy, Emil; Zsályi, Aladár; Pioneers of Hungarian Aviation.**

**Asbóth Oszkár (2)** (Oscar) (Újarad, now Aradul-Nou, Romania, 10 August 1852 - Budapest, 24 August 1920) – Slavic linguist. Apart from the University of Budapest he did his studies in Leipzig, Berlin and Göttingen, where he obtained his Ph.D. in Philosophy in 1875. On several occasions (in 1882 and 1889) he made study trips to Russia. From 1882 to 1885 he was Assistant Professor of Slavic linguistics and literature; from 1885 to 1892 Associate Professor, and from 1892 to 1919 Professor. After the fall of the Hungarian Soviet Republic he was dismissed from his position. From 1907 to 1917 he was Editor of the journal *Linguistics (Nyelvtudomány)*. He was the founder of Slavistics in Hungary, including the research in Russian Linguistics. He carried out pioneering research on Slavic loan words in the Hungarian language. He was Member of the Hungarian Academy of Sciences (corresponding 1892, ordinary 1907). His works on Slavic linguistics appeared in various Hungarian and German professional journals. His published works include *Die Umwandlung der Themen im Lateinischen (The transformation of the themes into Latin)* (1878); *Slavism in Hungarian Christian Terminology (Szlávtság a magyar keresztény terminológiában)* (1884); *Kurze russische Grammatik (Short Russian Grammar)* (1889); *Russische Chrestomatie für Anfänger (Russian Anthology for Beginners)* (1890, 1891), and *Our Slavic Loanwords (Szláv jövevényszavaink)* (I. 1907). – B: 1068, 0883, T: 7456.→**Council (Soviet) Republic of Hungary.**

**Asbóth, Sándor** (Alexander) (Keszthely, 11 December 1811 - Buenos Aires, 21 January 1868) – American military officer of Hungarian origin, served as colonel in the Army

Corps of Engineers during Hungary's War of Independence (1848-1849), and later as General and envoy of the United States. He is the older brother of General Louis Asboth. A graduate engineer of the Academy of Selmechánya (now Banská Štiavnica, Slovakia) he was posted to the National Bureau of Architecture in the city of Temesvár (now Timișoara, Romania). At the outbreak of the War of Independence in 1848, he served under General György (George) Klapka as military engineer; but also participated in the decisive battles of Kápolna and Nagysalló (now Tekovské Lužany, Slovakia). As a Lieutenant Colonel he served as Adjutant to Lajos (Louis) Kossuth. After the defeat of the War, he escaped from the fort of Arad (now in Romania) and joined Kossuth's entourage. He and his cousin buried and hid the Holy Crown of Hungary and the coronation regalia in the Orsova (now in Romania) area. He followed Kossuth voluntarily to the camp of Viddin, and later to Kiutahia, Turkey. He embarked with Kossuth on 9 October 1851 on the ship "Mississippi"; but while Kossuth disembarked in London, he continued his voyage with a group of Hungarians to New York. Soon he was the head engineer of the canal construction in Syracuse, NY. In partnership with an American he built a foundry in New York that was the first large capacity iron foundry. He laid down the city plans for New York including the famous Central Park and the Manhattan peninsula. He was the first to use bituminous material to cover sidewalks. At the outbreak of the Civil War he volunteered again for military service. General John C. Fremont designated him as his Chief of Staff and promoted him to the rank of Brigadier. Sándor Asboth participated in many battles of the American Civil War. The Asboth Brigade, named after him, captured the cities of Bentonville and Fayetteville. His main theaters of operation were the states of Missouri and Arkansas. His most famous engagement was his victory at Pea Ridge, where he soundly defeated the Confederates. After conquering the two States he moved his operation to Kentucky; and in 1863, became Military Commander of West Florida. At Marianna in Florida he won a decisive victory over the Southerners; but was wounded for the third time. For his valor and loyalty the American Congress promoted him to Brigadier-General. After the end of the Civil War, from October 1866, he became the emissary and envoy extraordinary of the United States in Argentina and Uruguay. His mission was to stop the fighting between those two countries and Paraguay. In the ensuing battle he received a bullet in his head that could not be removed and he had to endure great pain for the rest of his life. Ultimately his wound was the cause of his early death. A high school bears his name at Keszthely. – B: 0883, 1339, 1031, T: 3233.→**Anzelm, Albert; Klapka, György; Kossuth, Lajos; Freedom Fight of 1848-1849.**

**Ascher, Oszkár** (Oscar) (Budapest, 20 August 1897 - Budapest, 25 October 1965) – Actor, producer. He obtained an engineering degree from the Polytechnic of Budapest and for a while he was employed as an engineer. During that time he studied with Árpád Ódry and chose to become a performing artist. During the 1920's he had a one-man show. Between 1926 and 1928 he appeared in the cabaret of Endre (Andrew) Nagy. In 1927 he found his way into the labour movement. He was the leader of the choral recitalists of the printers and the building trade-workers, and he also acted in illegal programs. In 1933 he became a professor at the Actors' Training School. However, he lost his position due to his leftist inclinations. In 1945 he was a member of the Podium Cabaret, then its director. Then he became chief drama-producer at the Hungarian Radio, and artist at the Young Pioneers' Theater. In the latter part of his life he was chief drama-

producer and director of the State Village Theater (*Állami Faluszínház, Déryné Theater*). He had a significant role in the development of the performing style. For example, he recited János Arany's entire epic poem of *Toldi and Hammer of the Community* (*A helység kalapácsa*). His interpretations of the poetry of Endre Ady, Ferenc Karinthy, and Árpád Tóth were outstanding. His works include *The Art of Elocution* (*Beszédművészet*) (1937); *The Art of Reciting Poetry and Stage Elocution* (*A versmondás művészete és a színpadi beszéd*) (1953), and *Little Book of Recitations* (*Kis szavaló könyv*) (1956). As an actor he played interesting character roles and was attracted to the grotesque. His more important roles were Hypokritos in Giraudoux's *No War in Troy* (*Trójában nem lesz háború*), the scribe in Anouilh's *Euridice*, Mr. Willerspoon in Kesselring's *Arsenic and Old Lace* (*Arzén és levendula*), and Rogers in Christie's *Ten Little Indians* (*Tíz kicsi indián*). He was recipient of the Kossuth Prize and the title of Outstanding Artist. – B: 0871, 1445, T: 7456, 7684.→**Nagy, Endre, Ady, Endre; Karinthy, Frigyes; Tóth, Árpád; Ódry, Árpád.**

**Asperján, György** (George) (Újpest, 8 February 1939 - ) – Writer, poet. His higher studies were taken at the University of Budapest, where he read Hungarian Literature and Philosophy (1960-1965). Initially he worked as a turner. In 1964 he founded and edited the *With a Pure Heart* (*Tiszta Szívvel*), a literary newspaper of the University of Budapest. From 1965 he was a contributor at the Hungarian Radio, and from 1981 he has been its literary columnist. His works include *Emergency Exit-Entrance* (*Vészkijáratbejárat*), novel (1975); *Rush with Me!* (*Rohanj velem!*), novel (1980); *Accusations and Confessions* (*Vádak és gyónások*) novel (1986), and *Ready for Everything* (*Mindenre készen*), poems (1987). He is a recipient of the Móra Publishing House's Prize (1980), the Attila József Prize (1985), and the Extra Prize of the Writers' Association (1995). – B: 0874, 0878, 1257, T: 7103.

**Assembly Line Automobile Production** – József (Joseph) Galamb, designer of the famous model T Ford, was the first to introduce assembly line production at the Ford Automobile Factory in Detroit, MI., U.S.A. in 1908. Every automobile factory adopted his method. – B: 0883, 1031, T: 7662.→**Galamb, József.**

**Asteroid Research** – Systematic observation of the asteroids (planetoids mostly between Mars and Jupiter) started in Hungary in 1932, and became internationally recognized. Lajos (Louis) Terkán (1877-1940) discovered an asteroid marked BB1934 in 1934. The most successful Hungarian asteroid researcher was György (George) Kulin, who discovered more than 84 asteroids of several hundred, and has determined the orbits of 15 of them with sufficient accuracy that they could be provided with definitive serial numbers and names supplied by him. Some of these are the asteroids Corvina, Detre, Konkolya, and Salonta. In addition, other astronomers have also given Hungarian-related names to asteroids. – B: 1153, 1020, T: 7674.→**Kulin, György; Fényi, Gyula S.J.; Terkán, Lajos; Astronomy in Hungary.**

**Astronomy in Hungary** – Traces of the mythical star-worship of early Hungarian history were preserved in the names of only a handful of stars and constellations. Calendar computations and some entries also containing certain astrological predictions, can be found in mediaeval codices. From the beginning of the 15th century, calendars with

verses, the so-called “*csizió*”, made their appearance. Scientific astronomy started in the Renaissance in the middle of the 15th century, following the activities of János (John) Vitéz, Bishop of Nagyvárád later Archbishop of Esztergom. He invited Regiomontanus, one of the most outstanding scientists of contemporary Europe to Hungary. Regiomontanus worked first in Pozsony (now Bratislava, Slovakia), and later at the court of King Mátyás I (Matthias Corvinus, 1458-1490) at Buda and Esztergom, as a mathematician and astronomer. Subsequently eminent scientists practiced some branches of astronomy including János (John) Honterus, Kristóf (Christopher) Pühler, András (Andrew) Duduth, János (John) Apáczai Csere, and others.

Astronomy reached its first golden age in Hungary in the 18th century when, in the second half of the century, five modern observatories were established: in Kolozsvár (Cluj-Napoca, now Romania) (1753), Nagyszombat (now Trnava, Slovakia) (1756), Eger (1778), in the Castle of Buda (1881), and in Gyulafehérvár (now Alba Iulia, Romania) (1794). Although they were considered exceptions in Europe, most of these well-equipped institutions operated only for a short period of time. The Jesuit astronomer, Miksa (Maximilian) Hell, played a part in establishing and equipping almost all of them. He took part together with János (John) Sajnovics in the observation of the passage of Venus in 1769 on the island of Vardö. The Specula of Eger, now a Museum on top of the Teachers' College, was inaugurated in 1778. This is the only place in Europe where an 18th century observatory can still be seen on its original site and with parts of its original instrumentation. The *Urania* University Observatory was inaugurated on Mount Gellért (Buda) in 1815, and it was an important event on European scale. It was one of the best-equipped observatories of the period with co-workers Pál (Paul) Tittel (1784 - 1831) and Ferenc (Francis) Albert (1811-1883). However, its activities waned after the death of Tittel. The observatory was seriously damaged during the siege of Buda in 1849, during the War of Independence (1848-1849), and the rest of its parts were demolished in the area of the *Citadella* (Fort) that was built in the meantime. Noteworthy is the Astronomical Institute outside Bicske, established by Károly (Charles) Nagy (1797-1868) during the 1840s. It was turned into a military operational area during the War of Independence. Its scientific work could not even have begun, because its instrumentation and start of operation were prevented by Nagy's imprisonment and exile after the War of Independence. During the latter decades of the 19th century, a few observatories were established by private initiatives.

Astronomical research of scientific standard began with Miklós (Nicholas) Konkoly-Thege (1842-1916) who, on his estate, founded his private astronomical observatory of Ógyalla (now Hurbanovo, Slovakia) north of Komárom in 1871, which later became the Hungarian State Observatory, now the Slovakian Central Observatory. It was the largest and most renowned Astronomical Observatory. Konkoly-Thege started his regular observations with a 4-inch telescope and a meridian circle. The sunspot observations, weather permitting, had been regularly carried out from 1872. From 1874, in his new building, the spectroscopic observations were carried out with a 10 ½-inch Browning reflecting telescope; from 1881 the spectroscopic observations of the various stellar bodies were carried out with a 10-inch Merz refracting telescope. The results of the spectroscopic work threw light on the relationship between comets and meteors. For interpretation of the spectral observations it was necessary to carry out laboratory investigations as well, and based on their results, the first report to the Hungarian Academy of Sciences was submitted in 1884. It was the first astrophysical observatory in

Hungary and gained Europe-wide renown. Its founder donated it to the state in 1899. A world-renowned observatory was established in Baja by Archbishop Lajos (Louis) Hajnald in 1787, where Gyula (Julius) Fényi worked. The observatory of astrophysics, established by Sándor (Alexander) and Jenő (Eugene) Gotthard in Herény (today Szombathely) produced good results and became known chiefly for its photography and spectral analysis of celestial bodies. The observatory, established on the *Svábhegy* (called *Szabadsághegy – Liberty Hill* today) of Budapest in 1920, began its investigations with the instruments of Ógyalla, while gradually acquiring modern instruments of improved performance. The Observatory's principal field of activity was on the initiative of László (Ladislás) Detre, the study of stars of variable light intensity. This has remained its focus to date. From the mid 1930's György (George) Kuhn conducted very productive asteroid research. The Astronomical Research Institute of the Hungarian Academy of Sciences has established an observatory on the 964-meter high Pizskéstető in the Mátra Mountains, where Hungary's astronomical instruments are operating at present. In addition to the observation and detection of pulsar-peculiarities, the Institute is interested in the structure of the Milky Way galaxy, the star-clusters, the condition of the upper stratosphere, and several other issues related to various other aspects of astrophysics and space research. They have been successful in discovering and studying the supernovas and more distant galaxies.

The education of astronomers carried out systematically and continuously is offered in the Astronomy Department of the University of Budapest. The popularization of astronomy takes place in Hungary primarily through the Society of Science Popularization with the involvement of professional astronomers. The Urania Demonstrative Observatory was established for this purpose in 1947. Aurél Thewrewk Pónori started the Planetarium of Budapest in 1977, which is reaching a wide audience. Amateur astronomy became strong in Hungary after World War II. Following the example of Budapest's Urania, demonstrative observatories were organized and directed by amateur astronomers in several other Hungarian cities. The work of Hungarian amateurs is internationally recognized principally in the areas of the observation of pulsars, meteors, planets, the moon, sun, deep-sky objects and construction of telescopes. The most significant organization-rallying amateurs, is the Hungarian Astronomical Society, operational since in 1948-1949, and was updated in 1989. – B: 1180, 1020, 2126, T: 7674, 7456. → **Vitéz, János; Mátyás I, King; Apáczay Csere, János; Tittel, Pál; Sajnovics, János; Konkoly-Thege, Miklós; Kéri Borgia, Ferenc; Kövesligethy, Radó; Kulin, György; Pónori Thewrewk, Aurél; Honterus. János; Pühler, Kristóf; Duduth, András; Hell, Miksa; Albert, Ferenc; Nagy, Károly; Hajnald, Lajos; Fényi, Gyula; Gotthard, Sándor and Jenő; Detre, László; Kuhn, György.**

**Aszlányi, Károly** (Charles) (Orsova, now Mehedinti, Romania, 22 April 1908 - Dorog, 8 December 1938) – Writer, playwright. He was educated in Nagybecskerek (now Zrenjanin, Serbia), Vienna, and in Germany. He was a contributor to the *Sport Journal* (*Sport hírlap*). He died in a motorbike accident. He authored a number of humorous writings and plays including *Money on the Horizon* (*Pénz a láthatáron*) novel (1929); *Swindler Wanted* (*Szélhámos kerestetik*) play (1930); *Seven Slaps* (*Hét pofon*) novel (1934); *Sleeping is Forbidden* (*Aludni tilos*) novel (1935), and *Bradford Makes Order* (*Bradford rendet csinál*), novel (1937). – B: 0883, 1257, T: 7103

**Asztalos, György** (George) (first half of 17th century) – Wood carver at Tepla, in Northern Hungary (*Felvidék*, now Slovakia). His authenticated works are the pews in the Renaissance-style church at Szmracsány (now Smrecany, Slovakia). The following inscription can be read on one of the pews “*Georgius mensator Tepliensis fecit haec sedilia Anno Domini 1628*”. The memorial tablets for the Polish Kubiny family may be attributed to him based on stylistic considerations. – B: 1181, T: 7675.

**Asztalos, István** (Stephen) (Mikeszásza, now Micesasa, Romania, 28 August 1909 - Kolozsvár now Cluj-Napoca, Romania, 5 March 1960) – Writer, important representative of Hungarian literature in Romania. He was born into a poor railroad clerk’s family, who could not afford more than two years’ tuition at the Reformed High School in Kolozsvár. At first he worked in forestry, then became a day laborer, a stone carver, and a textile worker. Later he wrote about the experiences of these formative years in his short stories and three novels. He moved to Kolozsvár in 1934, where he wrote his first novel, *John Tells (Elmondja János)* (1939), an authentic account of Transylvanian society in the 1930s. From 1945 to 1950 he was editor-in-chief of the paper *Village People (Falvak Népe)*, and from 1956 he edited the children’s paper *Sunrays (Napsugár)*. The main subjects of his short stories and novels are centered on struggles of the rural classes and the hardships of the urban laborers. His works include *Bitterness (Üröm)* short stories (1940); *Black Cat (Fekete Macska)* drama (1943); *Writer on the Milky Way (Iró a hadak útján)*, novel (1946); *Wind will not Start without a Blast (Szél fúvatlan nem indul)*, novel (1949); *Problems of Fourteen Oxen (Tizennégy ökrös gondok)* reports (1951), and *Brave Boys (Bátor fiúk)*, short story for young readers (1959). A volume of his works was published in 1962. Among other prizes he received the Baumgarten Prize (1943). – B: 0883, 0878, 1257, T: 3240.

**Asztalos, János** (John) (Feldebrő, 11 February 1910 - Feldebrő, 12 October 1995) – Priest. He was ordained in 1934 and worked as a chaplain and parish priest at Pócspetri. The Communist government ordered the nationalization of the schools, including church-schools in the spring of 1948. In protest, Cardinal Mindszenty threatened the collaborators with excommunication. In Pócspetri some 400 people protested with their signatures against the nationalization of their Catholic school and assembled around the local council house. One of the two policemen accidentally fired his gun and killed himself. The state security police (ÁVO) falsely accused one of the clerks with murder and executed him. The parish priest was charged with conspiracy and sentenced to life imprisonment. During the ill-fated 1956 Revolution and Freedom Fight he was freed and emigrated to Rome, Italy. After the collapse of the Communist regime in 1989, he returned to Hungary. – B: 0999, T: 7103.→**Mindszenty, József; Schools, Struggle for Control of; State Security Police.**

**Atrocities Against Hungarians** – It may be traced back to the Mongol-Tartar invasion of 1241-1242, led by Batu Khan, which decimated the population of the Kingdom of Hungary. In response, King Béla IV (1235-1270) developed the policy of bringing in settlers (immigrants) from neighboring countries, thereby breaking down the homogeneous ethnic Hungarian character of the kingdom. This situation further deteriorated, when central Hungary was under Ottoman Turkish occupation for 150 years (1526-1686), seriously reducing the Hungarian population within the Carpathian Basin.

The Habsburg rulers, for fear of a strong Hungary, resettled the decimated central and southern areas of the country, not with Hungarians from other parts of the kingdom, but by bringing in German, Serb and Vlach (Romanians) settlers. This multi-ethnic situation sowed the seeds of future ethnic clashes that have become increasingly serious in more recent times and have become exacerbated by the political situation brought about by the peace treaties following World Wars I and II: Trianon (1920) and Paris (1947). The resulting main atrocities against Hungarians are presented here region by region.

(1) *Northern Hungary* (former Hungarian *Felvidék*, now Slovakia). Slovaks sparsely populated the forest areas of the Northern Carpathian Mountains at the time of the Hungarian settlement period (895). A Turkish traveler reported in the 16th century that Hungarian was spoken as far north as the town of Nyitra (now Nitra, Slovakia). While the Hungarians fought the Turks and later the Germans, their numbers decreased, but those of the Slovaks (historically called *Tót*, plural *Tótok*) multiplied, and they moved into areas formerly inhabited by Hungarians, waiting for the opportunity to claim the entire region. It was a similar situation with the Romanians (then Vlachs) in Transylvania and the Serbs (*Rác*) in the Southern Hungary. In the meantime, awakening Slovak nationalism in the 19th century was enthusiastically voiced in the press and in Parliament. Czech émigrés in France and England conducted effective propaganda against Austria-Hungary. *Edvard Beneš* (1884-1948) and *Tomáš G. Masaryk* (1850-1937), living in exile in Paris during the War, formed the Czecho-Slovak National Council that was recognized by the Allies in 1915, and was officially sanctioned as the Government of the Czechoslovak Republic on 28 October 1918. The situation deteriorated further in the post-war years following the Treaty of Versailles-Trianon (1920). At the Peace Treaty the government of the state of Czechoslovakia, by then in existence, was one of the signatories. Czechoslovakia was newly created as one of the “successor states” of the Austro-Hungarian Monarchy, formed after the World War I, and was one of the major players in the dissolution of the Austro-Hungarian Monarchy. Later D. Lloyd-George, Prime Minister of England, complained: “*Some of the proofs which our allies provided were lies and distortions. We made decisions on false claims*”, referring to the evidences presented for the Peace Treaty by Beneš and Masaryk. This Peace Treaty resulted in the dismemberment of the thousand-year old Hungarian Kingdom, and the ceding of the northern part of Hungary (*Felvidék*) to the newly created state of Czechoslovakia that did not respect the rights of its newly acquired national minorities, including more than one million ethnic Hungarians, mostly in one block along the artificially created northern border of truncated Hungary, despite the stipulations of the Trianon Peace Treaty.

The new masters inflicted discriminatory regulations upon the Hungarian minority. Under the guise of agrarian reform, lands were expropriated from Hungarian owners and given to newly settled Czechs and Slovaks. The area also experienced the first ethnic cleansing when more than 100, 000 were forced to flee to “truncated” Hungary, reduced to one-third of its former size. Hungarians in the new state were unable to obtain, or had great difficulty in securing passports. Czech became the official language everywhere. In the Ruthenian region twice as many votes were needed to elect a representative to the Parliament in Prague than in other regions of the country. Procurement of Czech citizenship for the Hungarian minority presented an opportunity for serious discrimination with the creation of many obstacles and the charging of exorbitant fees. Some 45,000 Hungarians were denied citizenship in the new state of Czechoslovakia. At the same time, those who did not possess such a document lost their jobs and pensions.

Hungarian teachers, who did not possess the required Czech citizenship papers, were dismissed in the hundreds. The Hungarian Press was censored and Hungarian newspapers were banned. The exchange rate for the new Czech currency was two to one in Bohemia, in Slovakia four to one, while in Ruthenia it was pegged at ten to one. Through such policies the Czechoslovak Government attempted to thin out the purely Hungarian regions. The Czechs successfully colonized both Northern Hungary (*Felvidék*) and Ruthenia or Sub-Carpathia (*Kárpátalja*).

The fate of the Hungarian minority further deteriorated markedly after World War II as a result of the earlier pre-war return of the Hungarian-populated southern strip of Northland to Hungary. By the *First Vienna Award* of 2 November 1938, a new border was drawn almost precisely between the Hungarian and the Slovak-populated areas. Understandably, the Hungarian population was glad to be reunited with the mother country after endless discrimination, oppression and persecution. However, the reunion of Hungarians lasted only six years. After World War II, in the reconstituted Czechoslovakia, more repressive measures came into force in an atmosphere of revenge. The so-called *Beneš Decrees*, consisting of 143 declarations was conceptualized by the Czechoslovak President Edvard Beneš. Fifteens of them collectively and severely punished the Hungarian (and German) minorities. The decree declared Hungarians and Germans to be “collective war criminals”. This meant that they were stripped of their civil rights and citizenship. In 1945 the Czechs planned the expulsion of 600,000 native Hungarians from the regions occupied by them for the past ten centuries. Of this number, 60,000 were forcibly resettled in Silesia under inhuman conditions in the middle of the winter in an area vacated by the expelled 3.5 million Germans. Another 100,000 ethnic Hungarians were expelled to Hungary without compensation for their property. In exchange, they brought a limited number of Slovaks from Hungary to Slovakia, although the majority Slovaks opted to stay in Hungary. Hatred for the Hungarians reached its zenith during the post-war trials for war crimes. In it mostly Hungarians were condemned and executed. As many as 90 young men from a paramilitary unit, earlier evacuated but returning home from Germany through Slovak territory, were captured by Slovak police, taken to a forest and shot simply because they were Hungarians. Count János (John) Esterházy, the only Hungarian member in the Slovak Parliament of the Tiso era, alone protested against the anti-Jewish laws. After the War he was accused with war crimes, sentenced to death, commuted to life-imprisonment, and died in prison. In this period Hungarian civilians in Slovakia lost their employment, their homes; movable properties were expropriated including the tools of their trade.

After the *Prague Spring* of 1968, when Soviet occupation came to an end, the anti-Hungarian policies still continued: two-hundred Hungarian-language schools remained closed and Hungarian-language education remained abolished. In the post 1990 era of political changes, in a separate non-communist Slovak state, since 1993, aspiring to join the *European Union* (EU), the autochthonous Hungarian population in the southern areas hoped to be given human and minority rights and offered partnership with the Slovak population. They also expected reparations for their sufferings and humiliation; and restitution of, or compensation for the confiscated properties. However, what they received so far is the continuation of their suppression, which culminated in the anti-Hungarian language law, introduced in 2009, which meted out heavy penalties to those Hungarians who spoke Hungarian in public, or in offices. Slovak law of 2010 threatens Hungarian nationals in Slovakia to lose Slovak citizenship if they take Hungarian as a

second one. In the 1991 Slovakian census: 567,290 Slovakian citizens (10.8% of the total population) identified themselves as members of the autochthonous Hungarian minority, while 608,221 (11.5% of Slovakia's population) declared Hungarian as their native tongue. Some Hungarian sources estimate the total number of Hungarians living in Slovakia to be 650,000, or less, whereas, before World War I, more than 1 million Hungarians had been living in the same area. This was a decline of more than a third of a million as a result of "ethnic cleansing" by persecution, oppression, discrimination and atrocities perpetrated against them during most of the 20th century. During the same period the Slovak population grew from 1.4 to 4.5 million.→**Trianon Peace Treaty; Vienna Award I; Paris Peace Treaty; Benes, Edvard; Benes Decrees.**

(2) *Carpatho-Ukraine* (Ruthenia, or Sub-Carpathia, former Hungarian *Kárpátalja*) – This part of the Carpathian Basin has never formed part of Ukraine or Russia, and only became part of the Soviet Union in 1945. After the dissolution of the Soviet Union at the end of 1991, this region automatically became part of Ukraine. During the interwar years, as a result of the Versailles-Trianon Peace Treaty (1920), this area formed part of the newly created state of Czechoslovakia, despite the fact that the Slavic Ruthenes (or Rusyns) of the mountainous areas, not to mention the autochthon Hungarian population of the lowland, expressed their desire during the Peace Treaty negotiations in 1920 to remain in the historic Kingdom of Hungary. There was a short period of reunification with Hungary (1939-1944) as a sequel to the *First Vienna Award* of 1938. With the collapse of the Soviet Union, Ukraine "inherited" Carpatho-Ukraine on 1 December 1991, although it had never historically been a part of Ukraine. In 1990 there were 200,000 ethnic Hungarians in the region. At the turn of the millennium there were 183,000 ethnic Hungarians in Carpatho-Ukraine. They experienced a great deal of suffering toward the end of World War II when, in October 1944, the Soviet army occupied the area. In November 1944, the Soviets began forcibly deporting all able-bodied members of the Hungarian population of this key part of the Carpathian Basin through the mountain passes. All Hungarian males between 18 and 50 were carried off to forced labor camps in the Ukraine and Belorussia simply because of their nationality. They had to work in inhumane conditions on the construction of railway lines, canals, tunnels and mines. A total of 40,000 were deported including women. One-hundred-and-sixty members of the clergy were also deported and most of them perished in Soviet prisons. The Hungarians to be deported to the Soviet Union were first transported to the concentration camp of *Szolyva*, 20 km northeast of Munkács (now Mukacheve in Carpatho-Ukraine). Even from across the border in Hungary the men from 23 Hungarian villages under Soviet military occupation were also rounded up and sent to the Szolyva camp. In this concentration camp about 100 men perished every day. On 1 April 1945, the camp was closed down after an outbreak of exanthematic typhus. Most of the 40,000 deported have never returned.→**Trianon Peace Treaty; Vienna Award I; Paris Peace Treaty.**

(3) *Transylvania* (Hungarian *Erdély* with *Partium* and a part of *Bánát*) now in Romania – This region was also part of the Historic Kingdom of Hungary and was ceded to Romania by the Versailles-Trianon Peace Treaty on 4 June 1920. In the 14th century there were only 389 Vlach (now Romanian) villages in Transylvania. The number of Vlach immigrants grew considerably during the 17th century, when the Habsburg kings brought in Vlach settlers to make up for the greatly reduced Hungarian population. The Vlach population in 1700 was only 250,000; by 1784 it had increased to 787,000. Their

numbers grew in equal proportion to their claim to possess all of Transylvania. The basis of their claim was the so-called Daco-Roman theory.

Amongst the organized anti-Hungarian activities the first one recorded was the bloodbath of *Mádéfalva*, the so-called *Siculicidium*, (slaughter of the Seklers), which occurred on 7 January 1764. It happened during the reign of Empress Maria Theresa (1740-1780), when Austrian troops fired into an unarmed assembly of village folk of *Sekler* Hungarians, killing several hundred villagers. The cause of this massacre was the refusal by the men folk to enlist for border-defense.

There was a Vlach (Romanian) peasant uprising, the *Horea-Closca Uprising*, led by *Horea* (Vasile Nicua), *Ion Closca* and *Gherorghe Crisan* (*Hóra, Kloska, Krisán*) in 1784-1785. On 7 November 1784, the Vlach freebooters of Horea and Closca massacred the Hungarian noble families, officials, priests and pastors, and the innocent population of Verespatak (now Roşia Montană), Abrudbánya (now Ambrutus), Offenbánya (now Baia de Arieş), of the Ore Mountain area, and many other places. The uprising, which lasted for 6 weeks, was directed exclusively against Hungarians, torturing and murdering them and pillaging their homes. During the uprising more than 4000 Hungarian men were slaughtered and 113 Hungarian settlements were ruined. When caught Crisan committed suicide in the prison, Horea and Closca were executed. In modern Romania they regarded as national heroes and streets bear their names.

There was another Vlach uprising in Transylvania during the Hungarian War of Independence in 1848-1849 against Habsburg rule, led by *Avram Iancu* (1824-1872). The Vlachs of Transylvania rose against the Hungarian national state of the Carpathian Basin re-established under Lajos (Louis) Kossuth. This resulted in numerous massacres of Hungarian noble families and of the general population at the hands of Vlach nationalistic insurgents in Transylvania. For example, on 9 May 1849, Iancu's Vlachs ransacked and burned down the mining town of Abrudbánya in the Ore Mountain and killed a large number of the Hungarian population. This time only a small part of the population survived. These uprisings exterminated the majority of Hungarians mostly in southern Transylvania.

During the Hungarian War of Independence (1848-1849) a part of the Vlach population of Transylvania sided with the Habsburgs and turned against the Hungarians. From October 1848 to January 1849, terrorist Romanian troops, led by Axente Sever, Avram Iancu and Prodán Probu went on a killing spree particularly in Nagyenyed (Now Aiud) and the Hungarian villages in County Torda, in Central Transylvania. On 14 October 1849, after the rebelling Vlachs set the houses of Zalatna in fire, the 5-600 mostly women and children, fleeing towards Nagyenyed, were encircled at the village of Preszák and the Vlachs, after having burglarized them, cruelly massacred most of them. On January 8, 1849, after they had forced the terrified Hungarian population to sign the statement of loyalty to the Habsburg throne, they tortured and massacred 1000 innocent Hungarian civilians, mainly women, children and clergymen. The Vlach attackers ousted the rest of the Hungarians to the ice-cold empty fields, where an additional 1000 of them died of the cold, and the Vlachs continued to devastate Nagyenyed until November 17. They looted and also burned the ancient Bethlen Reformed College and destroyed valuable old documents containing the history of the Hungarians in Transylvania. Although during the War of Independence, part of the Vlach population in Transylvania sided with the Hungarian cause. The severe Vlach anti-Hungarian pogroms took place in at least 55 towns and villages and claimed altogether 8,500-10,500 Hungarian victims.

These massacres basically changed the proportions of Hungarians and Romanians slightly in the favor of Romanians.

On 1 December 1918 at *Gyulafehérvár* (now Alba Iulia) an irregular Romanian assembly unilaterally declared the unification of Transylvania with Romania. It was enshrined into the Versailles-Trianon Peace Treaty of 1920. Thereafter, the descendants of the Vlach immigrants and migrant workers took over the reins of power in Transylvania and the persecution of two million Hungarians began in earnest. Within two years all the cities, towns and villages in Transylvania were given Romanian names. A land reform law was passed that took land from the Hungarians and handed it over to Romanians. More than 200,000 Hungarian families, all state, district, city and township officials, clerks and other public workers were evacuated and sent across the new Hungarian border with only the possessions they could carry. The use of the Hungarian language was abolished from all public places. All Hungarian publications including literary magazines and books were placed under rigid censorship. Practically overnight Hungarians became second-class citizens in Transylvania. This period saw an administrative oppression, the violent enforcement of the Romanian language, and hostility aimed at the total destruction of the established Hungarian school system, language and culture. The new Romanian laws served to act as oppressive political and nationalistic tools against the Hungarians and other minorities.

On 30 August 1940, the *Second Vienna Award* returned Northern Transylvania and a part of *Partium* to Hungary, repatriating 1,200,000 Hungarians to their motherland, while still leaving about 600,000 under Romanian domination in southern Transylvania. After the Second Vienna Award, the Antonescu and the legionary systems were involved in persecution and atrocities against ethnic Hungarians, Jews and Gypsies in Southern Transylvania that remained under Romanian rule. Thousands of these Hungarians became the victims of angry Romanian retaliations between 1940 and 1945.

In the fall of 1944, the Romanians returned with a vengeance into Northern Transylvania behind the advancing Russian army, committing many atrocities against the Hungarian population. The Maniu Guard and some 50,000 Romanian volunteers turned on the Hungarians in Northern Transylvania. They took almost everything from Hungarian houses and homes, rounded up Hungarian men and handed them over as partisans to the Russian soldiers. On 3 November 1944 the official Gazette of Romania published an order on setting up and operating concentration camps. These were: *Foksány* (now Focșani), *Belényes* (now Beiuș), *Temesvár* (now Timișoara), *Kishalmagy* (now Hîrnîgel), *Lugos* (now Lugoj), *Földvár* (now Feldioara), and *Targu Jiu* and other locations. In the fall of 1944, some 40,000 Hungarian men, intellectuals and juveniles under the age of 18 were arrested and taken to internment camps. Most of them were never seen again. It was planned that they should perish there of malnutrition, cruel treatment and epidemics.

(a) The atrocities against the Hungarian population committed by the *Maniu Gardists* (*Voluntarii pentru Ardeal "Iuliu Maniu"*) stand out. The Maniu-guard was a voluntary semi-military organization established with the assistance of the Romanian politician Iuliu Maniu in World War II. In the fall of 1944, under the pretext of "hunting for partisans" and collecting of hidden weapons, perpetrated a series of murders and robberies against the Hungarian population in Northern Transylvania, which was returned to Hungary in the years 1940-1944 according the Second Vienna Award, which was occupied by the Soviet armed forces at the fall of 1944. Groups of the Guard behind the

frontline committed serious atrocities. In the village *Szárzajta* (now Aita-Seacă), where on 26 September 1944, a 30-35-men Maniu guard led by Gavril Olteanu massacred 13 Szekler inhabitants. Following the widespread looting they carried off 70 men to a death camp, where most of them perished. Wherever the guards went, they terrorized the local population, murdering a further 8 Szeklers. In the village *Szentmihály* (now Sânmihaiu) they shot dead one landowner and three Hungarian farmers. On 8 October they executed 11 persons at *Csikszentdomokos* (now Sândominic). On 15 October they shot dead 3 Szeklers at *Gyergyószentmiklós* (now Gheorgheni). On 21 October they killed 3 men at *Magyarzsombor* (now Zimbor), 13 men at *Egeres* (now Aghireșu). On 30 October at *Bánffyahunyad* (now Huedin) they murdered 11 local Hungarian inhabitants. The members of the guard carried off 40 men, 6 women and one child from *Mezőpánit* (now Pănet), while from the 19 men carried off from *Szováta* only 4 returned. In addition to the above cases, there were murders, lootings, destructions and rapes of women in numerous places. From County Maros-Torda alone nearly 4000 Hungarian inhabitants were carried off by the Maniu guards to the internment camps of *Földvár* (now Feldioara), and Targu-Jiu, many of them perishing there. These mass executions of Hungarians occurred out of vengeance and without trial on the sole basis that the victims were Hungarians. The atrocities of the Maniu-guards proved too much even for the Soviet occupying forces and finally it was their units that expelled them from Transylvania, dissolving their organization and introducing Soviet military administration on 12 November 1944 for a period of six months in order to curb these crimes. On 16 November the Romanian Government finally dissolved the Maniu Guard. On 7 April 1945 in Brassó (now Brasov), a criminal proceeding started against the Maniu Guard. According to the verdict, Olteanu received a life sentence *in absentia*; the rest received a few years or months in prison. – B: 1031, T: 7456.

(b) Although in 1950 Romania was forced to create the “Maros Hungarian Autonomous Region” on the insistence of Stalin, it existed only as a formality and it was terminated in 1968. From 1967, under communist dictator Nicolae Ceaucescu, the oppression, dispersion and persecution of Hungarians accelerated. Hungarian schools and universities were closed. Only a few Hungarian newspapers were left chiefly for propaganda purposes. Intellectuals and church leaders were persecuted. The history of Transylvania was expunged from school textbooks and is gradually being re-introduced in a much-altered Romanian version. Ecclesiastical objects and registries were confiscated. Hungarian Bibles were sent to paper mills, and from them toilet paper was manufactured. Hungarian cemeteries were closed and tombstones broken, Hungarian names erased. Hungarian speech was prohibited and penalized. While Hungarians could be employed only in Romanian regions, Romanians moving to Hungarian regions and cities were rewarded. Hungarian citizens were forced to assimilate into the Romanian nation. The aim of the plan for “systematization” and destruction of 8,000 mainly Hungarian villages was to force the Hungarian population into slum housing and “agricultural centers”. From this bleak situation more than 50,000 Hungarians fled to Hungary. Romanian border guards shot many of them. Dramatic changes took place when Romanian security forces attempted to arrest the Hungarian Reformed Minister of *Temesvár* (now Timisoara), the Rev. (later Bishop) László Tőkés, who bravely defended the rights of the oppressed Hungarian minority. His resistance triggered the events that resulted in the execution of dictator Nicolae Ceaucescu and his wife at Christmas 1989, and the political change in Romania. However, this did not do much to alter the anti-

Hungarian Romanian policy. In fact, it even exacerbated it with the “new” Romania terming Hungarians “Bozgors” i.e. homeless people. In an anti-Hungarian pogrom in March 1990 at *Marosvásárhely* (now Targu Mureş, at that time with a majority Hungarian population), some worked-up Romanians seriously manhandled a number of Hungarians, amongst them András (Andrew) Sütő, the renowned writer.

(c) The latest atrocity against Hungarians occurred on 19-20 March 1990, again at Marosvásárhely in the first year of the new “democratic” political system in Romania. On 1 January 1990, Hungarian students of the Medical School of Marosvásárhely conducted a “sit in” strike demanding the restoration of the Hungarian language department at the Medical School. In February some 100,000 Hungarians with books and candles in their hands took part in protests, demonstrating for the reinstallation of a Hungarian school and university. The *Vatra Romanesca* nationalist organization regarded this and the observation of Hungarian National Day on 15 March as a provocation against the Romanian state. On 19 March, groups of Romanians from outer Romania (Moldova) poured in transported by buses, and laid siege to the main office of the Hungarian Democratic Alliance in Romania (*Romániai Magyarok Demokratikus Szövetsége – RMDSZ*) and seriously wounded its County President András (Andrew) Sütő. On the next day they rushed upon the protesting Hungarians on a square and beat them up with sticks, iron bars and stones, turning the city into a place of street clashes. The result of the “Black March” pogrom was 3 dead and 100 wounded. Not a single Romanian but many Hungarians were arrested, accused and sentenced to prison terms.

(d) The so-called *Csángó* Hungarians, who settled for various reasons outside the Carpathian Mountains in Moldavia and Bukovina in past centuries, have so far been unsuccessful in obtaining official approval for Hungarian-language education in *Csángó* villages. Once again the desire of the Romanian government was clear: forced Romanianization. Only recently (as a result of EU influence) the Hungarians were allowed to open a few Hungarian schools, but only of primary level. Due to inhuman treatment, some 200,000 Hungarians left Transylvania for the West in the 1990s. In the 20th century, the Hungarian population in Transylvania decreased from 31% to 18%, while at the same time Romanian population had doubled. In 2002 it reached 5,393,400 while Hungarians were only 1,416,844. Despite political changes and “democratization” in Romania, of all the 4000 Hungarian church properties, earlier confiscated by the Communist state, only 375 have been returned. These events also contributed to the acceleration of Hungarian emigration out of Transylvania.→**Mádéfalva’s Peril; Daco-Roman Theory; Trianon Peace Treaty; Vienna Award II; Parish Peace Treaty; Romanian Atrocities in Transylvania; Bukovina, Hungarians of; Csángós; Maros Hungarian Autonomous Province; Tőkés, László; Sütő, András; “Black March Pogrom”.**

(4) *Southern Hungary* (Voivodina now in Serbia, the former Southland *Délvidék* of Historic Hungary) – This is the southern portion of the Kingdom of Hungary that Serbians had been planning to take over as early as their three-centuries long Ottoman Turkish captivity. Hungarians have populated this region since their settlement of the Carpathian Basin in 896. Serbs appeared there in strength when the conquering Turks pushed them northward from the Balkans after the fall of Constantinople in 1453. The Serbs began to move more and more into Hungarian territory from the 15th century on. In 1420, King Zsigmond (Sigismund of Luxembourg) gave permission for a Serbian group to settle in Hungary. After the Hungarian army’s defeat in the Battle of Mohács in 1526,

the Turkish armies and their Serbo–Bosnian–Albanian auxiliary troops burned down this area enslaving or massacring those who could not flee. At the time of the first Turkish census in 1557–1558, the majority of the population was still Hungarian. In addition to Serb immigration, mass immigration of Vlachs (now Romanians) also began during the Turkish occupation. Only between 1641 and 1646, 10,000 families fleeing from Wallachia (*Havasalföld*) settled in the region and the Turks also began settling them on vacant Hungarian lands. In 1690, under the leadership of Arzenije Carnojevic III, the Orthodox Patriarch of Pae (Ipek), 35,000 families, *i.e.* 200,000 Serbs, settled in Southern Hungary. Empress and Queen Maria Theresa gave permission for temporary settlement to 20,000 Serbs who, in the end, stayed there permanently. Pan-Slav ambitions turned the Serbs against the Austro-Hungarian Monarchy that resulted in the assassination of Crown Prince Franz Ferdinand and his wife in Sarajevo and the outbreak of World War I (1914–1918).

When the War seemed lost to the Central Powers, the Serb General Misica proceeded out of hand to occupy Southern Hungary between the 8th and 21st of November 1918. The Versailles-Trianon Peace Treaty in 1920 awarded Croat-Slovenia and Southern Hungary to Serbia. Following the occupation of Hungarian territories, the Serbs completely forgot that Hungary in the past had given asylum to a great number of fleeing Serbs. They mercilessly did everything to uproot all that was Hungarian. They massacred tens and thousands of Hungarians and much more were expelled. They closed down all Hungarian cultural and other institutions and gave the buildings and all their equipment to Serbian institutions. They expropriated Church lands, abbeys, schools and other properties. They also expropriated and closed down Hungarian rural elementary as well as secondary schools and prohibited the use of Hungarian educational books. The contents of Hungarian libraries had to be shipped to Belgrade. Hungarian historic monuments were destroyed. Hungarian theater companies were expelled. Hungarian newspapers were banned, although later a few were allowed to operate under strict censorship. All these anti-Hungarian measures were made in contravention of Article 19 of the Peace Treaty that guaranteed all ethnic minorities the right to their own schools, a term approved even by the Serbian National Assembly.

According to an American Presbyterian Mission's Report: "*We have concluded that the occupation and administration of the territories ceded from Hungary to Serbia is characterized by grievous and brutal behavior and vengeful ethnic hatred that has evoked and tolerated the dirty politics of terror, abuse, brutality, plunder and coercion. They are imprisoning and beating members of the clergy and civil servants in large numbers and are threatening them with torture and death. They are also holding people in jail for months without trial, or even without charge. Appeals are disregarded, or held back, the appellants penalized.*"

Five days after the German forces attacked Yugoslavia on 6 April 1941, and following Serbia's collapse, Hungarian army units occupied the ceded areas of Bácska (Backa), the Baranya Triangle and the Mura confluence as part of the rightful reunification with the mother country. In fact, the entire historic County of Bács-Bodrog became once again an integral part of Hungary. On 22 June 1941 in Nagybecskerek (now Petrovgrad), Chetnic (royalist) partisan leaders Marko Perecin, Pasco Romac and Jovan Veselinov decided on partisan terrorist actions against the occupying Hungarian army, on instructions from Moscow, starting on 28 June 1941. The Serbians developed a 58-member partisan terrorist unit that operated from Sajkás (near Titel) as their central base (southeast corner

of Bácska). From July to October of that year thirty-five sabotage actions took place in the Bácska area. From December 1941, a number of Hungarian country-policemen and border guards were killed including the gendarme-commander of Zsablya (Žabalj), northeast of Újvidék (Novi Sad). This partisan terrorist activity lasted for six months with brazen contempt for international Articles of War and ignoring martial law introduced by the Hungarian authorities. This activity included shooting Hungarian soldiers and police patrols from treetops, church towers and roof windows all over the Bácska area, especially in Újvidék (now Novi Sad), Csurog (Čurug), Zsablya and Zombor (Sombor). They also burned crops in the fields, carried out robbery, extortion of food, as well as killing and torturing the civilian population. This untenable situation was followed by severe but understandable reprisals on the part of the Hungarian authorities to maintain law and order in the Bácska area; consequently there were police-raids in the area. On 4 January 1942, mainly in and around Újvidék, the Hungarian army and police units captured and executed 1049 of the terrorists. After that the partisan activity ceased. 3300 became victims of the mopping-up operation, including 2500 Serbians. However, Hungarian authorities conducted an investigation into this case during World War II.

In October 1944 the invading Soviet forces reached the Southern part of Hungary, accompanied by the Serbian partisan units filled with revenge, and immediately set about slaughtering the local unarmed and innocent Hungarian and German civilian population, and buried them in unmarked mass graves.

The revenge by Tito's partisans took place in 130 Hungarian-inhabited towns and villages including Ada, Adorján (Nadrljan), Apatin, Bácsföldvár (Bačko Gradište), Bajmok, Bezdán (Bezdan), Csóka (Čoka), Csurog (Čurug), Hadikliget (Veternik), Hódság (Odžaci), Horgos (Horgoš), Kula, Magyarkanizsa (Kanjiža), Martos, Martonos (Martonoš), Mohol (Moh), Mozsor (Mošorin), Óbecse (Stari Bečej), Pacsér (Pačir), Palánka (Palanka), Péterréve (Petrovo Selo), Piros (Rumenka), Szabadka (Subotica), Szentfülöp (Gračac), Szenttamás (Srbobran), Szivác (Sívac) Temerin, Tiszaistvánfalva (Járek), Topolya (Topola), Újvidék (Nový Sad), Verbász (Vrbas), Vörösmart (Zmajevac), Zenta (Senta), Zombor (Sombor), Zsablya (Žabalj).

They massacred thousands of civilians without any reason or trial, just because they were Hungarians, using cruel and sadistic methods and not even sparing women and children, even twelve Catholic priests also fell victim.

Some of the details: on 8 October 1944, Tito's partisans, in the wake of the advancing Soviet forces, executed 500 Hungarians at Péterréve (Petrovo Selo), south of Zenta (Senta). The Serbian ethnocide started in earnest on 18 October 1944, when the ethnic Hungarians and Germans were rounded up into forty-one concentration camps, where many of them perished. The mass execution of "collaborating" Hungarian leaders took place in Szabadka on 30 October 1944. Also in the fall of 1944 massacres occurred in Újvidék, Szenttamás 30 km north of Újvidék when returning Serbian army units in a few days rounded up 3,000 Hungarian men and executed them. In the same month in the Zsablya region the Serbian partisans rounded up fifty Hungarians daily, killing them by machine-gun fire and tossing their bodies into mass graves. There has been not one Hungarian left in Zsablya for some time while in 1941 there were 8,526. During the autumn of 1944 in the pogrom of Adorján, at a treacherously convoked civic meeting held in the village square, the assembled Hungarian men, women and children were massacred by the armed Serbian terrorists. Many of the Hungarian population of Temerin were killed in a mass-execution and buried in unmarked mass grave, and in Újvidék the

partisan terrorists, in retaliation for the Hungarian razzia, brutally executed several hundred Hungarians.

A witness' account of the sadistic executions: *"They tore their nails off, slashed their skin and put salt in it. They cut some men into half with a saw or impaled them, some they burnt or buried alive. They cut the heads off of most with an axe. I have seen the head of a suckling baby hurled at the wall, its brain splashed all around. One of the women was pregnant when they stamped the baby out of her. In many cases they tied a ten kilogram piece of lead to a rope that they used to swing at their victims thrashing them to death; there were some whose nose got torn off from the hit. Women were looking for their sons, husbands, among the dead, sobbing. All around men were lying in pools of blood. It was a horrific sight"*. (Julia Teleki: *Where are the graves? (Hol vannak a sirok?)*).

During this campaign of retaliation by the Serb partisans, 40,000 to 50,000 Hungarians fell victim including women and children. They were executed without any basis simply because they were Hungarians.

The destruction of Hungarian culture in Southern Hungary began with the suppression of the language. Hungarian children were forced to go to Serbian classes and the training of Hungarian teachers was suspended. The jobless Hungarians were encouraged to emigrate. By means of the agricultural reforms newcomers were settled in these depopulated areas. Between 1944 and 1948, 385,000 hectares of land were distributed in Voivodina and Slavonia among 40,000 southern settler families (Serbs from Lika in Croatian Krajina, Bosnians, Montenegrins) numbering a total of 200,000 persons. One-tenth of the distributed land was given to 18,000 landless Hungarians. With the exception of the Germans no largescale deportations or population exchanges took place. Yet about 30,000 Hungarians, mostly those who had served in the Hungarian army and members of their families, moved to Hungary. The influx of Serbian people into Voivodina continued with more than 500,000 newcomers settling in the province between 1953 and 1971. The influx continues from the south with Serbian refugees coming from Kosovo. As a result the proportion of the Hungarian minority in the province has shrunk from the former one-third to one-sixth today, putting them in an even more desperate situation.

A new ordeal befell the Hungarians living in former Southern Hungary (northern Yugoslavia) in the 1990s, during the Yugoslavian civil war. Far more Hungarian young men were conscripted into the army than from other ethnic groups and were sent to the most dangerous parts of the front-line. This resulted in a mass exodus of young Hungarians from Voivodina. They were followed by thousands of Hungarian families who escaped from the war zones or were forcibly evacuated from their homes that were given to Serb refugees from Kosovo. The new settlers do not generally tolerate the autochthonous Hungarian population and wish to see the latter chased out of Voivodina. To achieve this goal Serbs beat up Hungarians on the streets, in schools or in the bars, desecrating Hungarian cemeteries and threatening them on wall graffiti. There were hundreds of such cases in recent years. The European Union sent a committee to conduct an investigation into these issues. – B: 1273, 0954, 1272, 1062, 1357, T: 7456, 7103, 7684, 7690.→**Vajdaság, Hungarians in; Trianon Peace Treaty; Paris Peace Treaty; Újvidék, raid at; Massacre of Hungarians; Bezdán.**

**Attila** (406 - 454) (Etel, Etele, Etzel, Atil, and by the most recent research Atilla) – King of the Huns, grandson of Uldin, son of Mundzuk-Mundoguz (Bendeguz), known as

“*Flagellum Dei - The Scourge of God*” in the West. In old Hungarian he was called *Etele*. In the German heroic sagas, especially in the *Nibelungenlied*, he figured as *Etzel*, while in Scandinavian (Icelandic) sagas he was *Atli*. After the death (in 434) of the previous Hun ruler, Rogilas (Rugila or Rua, who was his uncle), he acted as co-ruler (434-445) with his elder brother *Buda* (in Western chronicles known as *Bleda*). Buda was the supreme ruler, while Attila was second in command as the head of the army and chief judge of the realm. According to some mediaeval chronicles, Attila murdered his brother Buda in 445, and from then on he was the sole ruler (445 to 453). According to various

legends, his royal residence was either on the site of present day Buda, or in the Tisza-Maros confluence, near today’s city of Szeged in the center of the Great Hungarian Plain. Toward the end of Attila’s eight-year rule, the Hun Empire reached its zenith, extending from the Caspian Sea all the way to the Baltic region in the north, to the River Rhine in the west, and to the lands south and north of the Danube. In 439 the city of Ravenna bestowed upon Attila the title of *Magister Militum* (Master of the Militia). Apart from ruling over the Huns, he also rounded up a number of other nationalities, peoples of Slavic, Germanic, Sarmatian and Turkic origins. In 441 his troops crossed the Danube, captured Sirmium (now Sremska Mitrovica, Serbia), Singidunum (Belgrade), Naissus (Nish) and Sardica (Sofia), and threatened Byzantium itself. In the ensuing war the army of Emperor Theodosius II was defeated in 447 and the Eastern Empire won peace only by raising its yearly tribute from 700 to 2100 pounds of gold. Now Attila turned to the West and found an unusual excuse for war. Emperor Valentinian’s ambitious sister *Honorio*, in order to escape from an arranged marriage, secretly offered herself to Attila, sending him a ring. However, Attila requested half the Western Roman Empire as dowry, which was refused, and further strained Attila’s relations with the Western Empire. In 451 he set out to invade Gaul, sacked and burned Trier and Metz and nearly took Aurelianum (Orleans). It was about this time that he became known as *flagellum dei* – the Scourge of God. The Vandal King *Geiserich* pleaded for Attila’s help against the Visigoth King Theodoric I, who allied himself with the Roman patrician *Aëtius*. As a young man Aëtius had spent several years among the Huns as hostage and knew Attila well. The combined forces of Aëtius and Theodoric forced the Huns to withdraw from Aurelianum and the decisive engagement with Attila’s huge multi-ethnic army of some half million men took place on the Catalaunian Plains (Maurica), Châlons-sur-Marne near present-day Troyes. The *Battle of the Catalaunian Plains* (451) was one of the greatest battles of the era. According to a 6th century Latin work by Jordanes (*Gothic History*), 165,000 men fell on each side (considered to be a gross exaggeration) in the long and fierce fighting, during which the Visigoth king was killed. A battle on such a vast scale was bound to end inconclusively. According to some chronicles, Aëtius won while, according to others, Attila remained in command of the battlefield, but found it wise to retreat, and soon withdrew from Gaul altogether. His losses could not have been so great, however, for in 452 he invaded northern Italy and sacked a number of cities, among them the fortresses

of Aquileia (its fleeing citizens later founded Venice), Bergamo, Brescia, Milan, Padua and Verona. On the banks of the River Mincio he met Pope Leo the Great (called the Bishop of Rome at the time) heading a Roman embassy, (this scene is the subject of a painting by Raffael), whose eloquent entreaties as well as the shortage of provisions coupled with an outbreak of pestilence in the Hun army forced Attila to withdraw. Also the news that the forces of the Eastern Roman Emperor Marcianus were endangering the Hun Empire, forced Attila to leave Italy and withdraw to his capital in the Carpathian Basin. In 454 Attila married the German *Ildikó* (*Krimhild* of the *Nibelungenlied*). According to Jordanes, who based the story on the earlier history by the Byzantine historian Priscus, Attila died on the wedding-night of the last of his numerous marriages, apparently of a nosebleed following a drunken revelry. 19th century historian Edward Gibbon recounts the affair in his *Decline and Fall of the Roman Empire*. Others claim Attila may have been poisoned. According to legends he was buried in three coffins: one made of gold, one of silver and the outermost of iron. The triple coffin, together with his treasures, was buried in a backwater riverbed by the River Tisza and was subsequently flooded. The gravediggers and members of the funeral procession were slain, ensuring that the site of Attila's burial would never be found (based on numerous theories even centuries of search for the site so far yielded nothing).

Attila was one of the greatest rulers of the Migration Period, outstanding both as statesman and as military commander. According to Jordanes: *“He was a man born into the world to shake the nations, the scourge of all lands ...the power of his proud spirit appeared in the movement of his body...He was ...a lover of war, yet restrained in action; mighty in counsel, gracious to suppliants and lenient to those who were once received under his protection. He was short of stature, with a broad chest and a large head; his eyes were small, and his beard was thin and sprinkled with gray. He had a flat nose and a swarthy complexion, revealing his origin.”* But reference to his appearance was based on hearsay; Jordanes never met Attila.

Attila was the greatest architect of the idea of a nomadic world-empire prior to Genghis Khan. However, a comparison with Julius Caesar and Alexander the Great by the French historian A. Thierry is rather inept and incorrect. Attila was the first to conceive the idea of a European Union and it was he who understood the unique geographic structure of the Carpathian Basin with its interdependent parts that were later on exploited by the Avars, and still later by the Magyars. Attila's early and unexpected death prevented him from carrying out these grandiose plans. For the estimation of his character and achievements the best source is provided by the Byzantine historian Priscus Rhetor (?415–473?) a member of a delegation from Constantinople sent by Emperor Theodosius II. Priscus visited Attila's camp-capital in 448 in present day Hungary, probably around the modern city of Szeged by the River Tisza. He wrote a reliable and objective assessment of Attila and his state-structure in the form of a memorandum (of which only a fragment survived). Priscus attended a banquet given by Attila and noted that while Attila ate only meat from a wooden platter and drank from a wooden cup “the other Scyths” ate all manner of delicacies from silver platters and drank from silver cups. Toward the end of the banquet torches were lit and the bards sang odes about Attila's conquests and military prowess. While the Hun common folk lived in tents and huts, the leading men lived in large fortified timber structures.

Attila was a great military commander, a determined negotiator and a born diplomat, who exchanged ambassadors with various empires, including China. He conceived and

planned a European water transport system whose construction was later realized by Charlemagne. He developed an efficient system of intelligence-gathering and instituted the torch and bugle signaling system, as well as the mounted messenger network extending from China to the Baltic Sea. These were methods usually well developed by nomadic civilizations (though they form only one of the 34 different kinds of civilizations mentioned by Arnold Toynbee).

Attila ruled not only over the Huns: his empire was a conglomerate of tributary Germanic tribes. His short-lived empire, under his sole rule a mere eight years, was an ephemeral bonding together of the diverse nominally independent Hun tribes. Following his death his realm was divided among his sons. They proved incompetent to preserve it, and Attila's vast empire broke into pieces and melted away.

Attila's emblem depicted a hawk (*turul*) with a crown on its head. In addition to the Huns, the Magyars also wore this emblem on their standards up to the time of Prince Géza (Geza) and King István I (St Stephen). – B: 0942,1020, 7456, T: 3312, 7676, 7456. → **Scourge of God; Huns; Hun Battle; Attila Medals; Attila, Sword of; Árpád; Árpád, House of; Géza I, King; István I, King; Turul; Priscus Rhetor.**

**Attila Medals** – Roughly cast commemorative medals known by this name decorated with Attila's portrait on the front, encircled with the inscription "ATTILA 441 REX". On the other side is a cityscape with an inscription "AQUILEA" above it. They originate from the 17th century. Commemorative medals of famous historic personages were already being cast in the 16-17th centuries. Amongst them were Hannibal and even Buda, brother of Attila. – B: 1078, T: 7662.

**Attila, Sword of** – (1) According to the Hun-Magyar legend, concurrently with Attila's dream, a shepherd boy found a sword in the field, which he took to the king. According to the shamans, God, promising a conquering and punishing mission for Attila, sent the sword. The Huns saw the sword as an assurance of Attila's world domination, a belief that was known to the Byzantine historian Priskos Rhetor. The sword disappeared after Attila's death. Legend has it that the chief shaman took it back to Asia.

(2) Eastern European goldsmith's work, said to have belonged to Charlemagne. It is kept in the Vienna treasury and labeled as an Eastern European goldsmith's work. A decorative sword dated from the time of the settling of Magyars in the Carpathian Basin (895-896). It presumably belonged to Reigning Prince Árpád, considered by the Germans as the original God-given sword (*gladius divinitus ordinatus*). Lambert Hersfeldi in his *Annales* noted that in 1071, the mother of the Hungarian King Salamon presented the sword that at one time by the grace of the War-God belonged to Attila, to the Bavarian prince Otto Nordheim, the leader of the German army, because he put her son Salamon on the throne. According to a German royal coronation declaration the principal power was not bestowed in the form of the cross but in the form of the sword. – B: 1078, T: 7673, 7685. → **Attila; Árpád; Priskos Rhetor.**

**Attire, Hungarian** – The most ancient and characteristic Hungarian attire that was worn well into the 20th century by a large segment of the male population especially in the provinces was an ankle-length mantle called a *szűr*. Its name is derived from the word *szürke*, meaning gray, after the color of the heavy, full woollen twill or felt, from which it was made. In the 19th century they began to make it out of bleached white felt and

decorate it with red, blue or black appliqué work or multicolored embroidery according to regions. This was called the *cifra szűr* or ornamental *szűr*. The most famous one was the heavily embroidered *cifra szűr* of Debrecen. In some parts the garment was dyed brown or black, reaching only to the knees or even shorter and was known by various names like *suba*, *bekecs*, *szokmány*, *guba*, *ködmön*, *zeke* and *szürdolmány*.

The *szűr* stems from one of the most traditional and basic garments of Eurasia. Its historical prototype can be traced back to the *kandys* (Hungarian *köntös*) of the Medes of Persia of the 6th -5th centuries BC. It was a long garment worn over the shoulders with pendant sleeves and fastened across the chest with cords or straps.

Under the *kandys* the Medes wore a sleeved, belted shirt and long, tight trousers. Their heads were covered with domed, fur-trimmed hats. This attire was adopted in turn by the Persians, the Scythians and the Parthians; later by the Huns and the Avars; and finally by the Magyars, as well as by several Turkic peoples all the way to China. The Ottoman Turks called it *kepenek* (Hungarian 'köpönyeg'). Similarly, heavy coats are still worn over the shoulders by the nomads in the Hunza Valley near the Himalayas. It can also be found in some parts of Afghanistan, Uzbekistan, Turkistan and Kashmir. The garment is unknown west of Hungary.

Hungarian folk attire can be divided into four regions: The Great Plain, Western Hungary, Northern Hungary (its largest part is now Slovakia) and Transylvania (now Romania).

Judging by textile remnants found in graves of the Carpathian Settlement Period (896 AD) the attire of the Hungarians must have been colorful, conforming in cut to the above-mentioned Oriental style. They also wore underwear unknown in the West at that time. The Oriental character of Hungarian folk attire was kept alive by the influx of Pecheneg, Cuman and Jazyg settlers. Later, during the Turkish occupation of Hungary (1526-1686), it received considerable Turkic and Persian influences especially in embroidery patterns such as "the eye of the peacock", the rose and the tulip. From the West it was influenced by the styles of the Renaissance, the Baroque and the Rococo.

The folk attires of the various regions were worn well into the 20th century. Of the women's wear the most famous are the richly embroidered *Matyó* dresses of Mezőkövesd in the Palóc-region of Northern Hungary, and of Kalocsa in Central Hungary, where Kiskúnhalas is famous for its lace; of Sárköz in Western Hungary; and of Kalotaszeg and Torockó in Transylvania (now in Romania). The skirts are generally multi-layered, are either embroidered or accordion-pleated and worn with colorfully embroidered aprons. In some regions the skirts have as many as 10-15 layers. Their headdresses also differ by regions: some are high, dome-like creations embroidered with pearls and colored beads similar to the headdress recently found in a 2500-year old Scythian grave in Pazyryk in Siberia. Others sit close to the head and are fashioned out of white, gathered lace or heavily embroidered silk and colored ribbons called *párta* in Hungarian, generally worn by unmarried girls. Young married women cover their heads with white silk kerchiefs, while older women wear black kerchiefs and their attire is also of a more somber color, such as unadorned gray, navy blue, brown, or black. For jewellery they wear multi-stranded colorful bead necklaces. Their footwear consists of embroidered slippers, black or red shoes, tan or black calf-length soft leather boots.

Men's clothing also differs according to regions. On the Great Plain (Central Hungary) they wear wide-legged trousers made of white linen and wide-sleeved white shirts tied at the neck, topped with a blue sleeveless, sometimes embroidered vest. In Transylvania and

some other regions they wear tight white or black trousers with knee-high black boots. For an overcoat they sport waist-length leather or woollen jackets called *mente*, trimmed with fur and decorated with braiding, sometimes carelessly thrown over one shoulder. This became the attire of the Hussars and was adopted all over the world. In a stylized form it was worn on ceremonial occasions by the lesser and higher nobility and was called *díszmagyar* – a fully ceremonial attire. Men's hats also differ from region to region. Some are high-domed brimless hats, some with wide, turned-up brims. Others are small with a narrow brim and adorned with a feather. In winter they wear tall lambskin caps. These folk costumes are no longer worn, except on special occasions, like weddings or parish feasts. They have been replaced by the modern uniform fashion of the cities. – B: 1078, 1020, T: 7617, 7684. →**Szűr mantle**.

**Atzél, Baron Endre** (Andrew) (Mezőzáhon, now Zau de Câmpie, Romania, 20 February 1937 - Budapest, 7 December 2005) – Lawyer, humanitarian. He was born into an old noble family. When the Second Vienna Award of 1940 returned Northern Transylvania (*Észak Erdély*) to Hungary, the new border dividing Transylvania left his family estate in the Romanian part of Transylvania. The Romanian authorities confiscated the estate. The family escaped to Kolozsvár (Cluj-Napoca), at that time Hungarian territory again. His father established a transport company and spent all his income on the community. In 1944 the family moved to Budapest to avoid Romanian reprisal. His father, a parliamentarian, was sent to the armistice negotiations with the Soviet forces; but was arrested and executed. The family of six children was scattered and lived semi-incognito. His mother worked as a scrubwoman in a factory. In 1951 Atzél attended an industrial school and became trained as an electrician. He participated in the 1956 Revolution and Freedom Fight as a technician, later as a Viennese aid convoy helper, and finally as a resistance fighter. He was arrested and sentenced to 14 years in prison at Maria-Nostra. He was freed after six years and three months. In 1975 he was allowed to study law at the University of Budapest and he obtained his law degree in 1981. Since 1969 he has frequently traveled in Transylvania. After 1990 his main interest focused on the Moldova region, where the Csángós live amidst dire conditions, facing the dangers of Romanian assimilation efforts and practices. He helped in different capacities this ancient Hungarian folk group now living in abandonment, isolation and in danger of assimilation, first as an ambulance worker. To assist them he established the Friar Julian Foundation (*Fráter Julianus Alap*). He helped in the organization of the Áron Márton Colleges (*Márton Áron Kollégiumok*) in Transylvania and tried to raise scholarships for outstanding students. For the Transylvanian handicapped children he organized holidays in Hungary. He was a member of the Order of the Knights of Malta and recipient of the Hero's Medal of the Republic of Hungary. – B: 1664, T: 7103. →**Csángós**.

**Auer, Leopold** (Lipót) (Veszprém, 7 June 1845 - Dresden, Germany, 15 July 1930) – Violin virtuoso, conductor. As an 11-year-old boy he studied at the Vienna Conservatory and made concert tours in Europe. In 1868 he was invited to the Conservatory of St Petersburg, Russia. From 1872 he was first violinist of the Czarist Ballet. A couple of years later he formed his string quartet, the first such ensemble in Russia that became world famous. Auer was the violinist who made Tschaikovsky's violin concerto famous around the world. He conducted the works of Wagner, Grieg and Beethoven from memory. The Czar bestowed nobility on him that no artist had ever received before. In

London he had a studio from 1906 to 1911, and in Dresden, Germany from 1912 to 1914, where he was active as a teacher. In May 1917, after the first Revolution, he left St Petersburg and moved to New York. His educational achievements surpassed even his violin playing and conducting successes. Among his famous students were Richard Bourgin, Eddie Brown, Mischa Elman, Efrem Zimbalist and Jascha Heifetz. – B: 1032, 0903, T: 7684.→**Joachim, József.**

**Auffenberg, Baron Norbert** (Ormay) (Dobřany, 22 August 1813 - Arad, 23 August 1849) – Military officer and descendant of a Czech aristocratic family. As an officer of the Austrian army, he took part in the preparatory committee of the Polish uprising. For this, he was sentenced to a 20-year fortress imprisonment, to be spent in Munkács Castle in Hungary. During the 1848 Revolution, he was freed and he offered his services to the Hungarian government. He changed his name to *aranyos* Ormay. With the rank of major, he was Kossuth's aide-de-camp, and later, he became the excellent organizer of the regiments of riflemen. Just before the Világos surrender, he was taken prisoner by the Austrians near Arad; the court-martial sentenced him to be hanged, and he was executed. – B: 0883, T: 7456.→**Kossuth, Lajos.**

**Augsburg, Battle of** →**Lechfeld, Battle of.**

**Aujeszky, Aladár** (Aladar) (Pest 11 January 1869 - Budapest, 9 March 1933) – Veterinary pathologist, bacteriologist. He discovered a disease (pseudorabies) and a virus, both named after him. He worked out a serum that when used as a preventive, eliminated rabies in Hungary, the first nation in Europe to do so. His bacterium spore-coloring process is widely used in bacteriology.

Aujeszky Disease is a highly contagious acute and often fatal disease that affects the nervous and respiratory systems of most domestic and wild animal species with the exception of certain apes. Humans are not susceptible to the pathogen. It is manifested in general feverish symptoms and results in encephalomyelitis. The disease, caused by porcine herpes virus, is most common in hogs and is most dangerous for suckling pigs. It was first reported in March 1813 in the American Farmer Magazine. Aujeszky first described the disease in scientific literature in 1902. – B: 1038, 1031, T: 7660.

**Aulich, Lajos** (Louis) (Pozsony now Bratislava, Slovakia, 1793 - Arad now Romania, 6 October 1849) – General of the National Defense Force, and Minister of National Defense in the War of Independence (1848-1849). At first he was an officer of the Imperial Army, a colonel in the Sándor Infantry Regiment (named after Czar Alexander of Russia). In 1848 he was a colonel in the Hungarian National Defense Force, was promoted to general on 16 February 1849, and played a decisive role at the battles of Kápolna and Isaszeg. As a division commander he participated in the winter campaign in the Carpathian Mountains, and his unit fought with great success at the siege of Buda. He was a faithful follower of General Görgey. He served as the last Minister of Defense of independent Hungary between 14th July 1849 and 11th August 1849, and was one of the thirteen martyred generals. His bravery was exemplary. Until the last moment before his execution on 6 October 1849 at Arad (now in Romania) he was reading with undisturbed calm the poetry of the Roman poetry of Horace. – B: 0883, 1078, T: 3233.→**Arad, Martyrs of; Freedom Figh of 1848-1849; Görgey, Artúr.**

**Aurignacian Culture** – In Hungary the few accessible settlements of cave dwelling humans are thought to have originated from two groups: from southeastern Europe and from the eastern Alps in Central Europe. In the western region of the Bükk Mountains the inhabitants' bone craft industry of the inhabitants is of particular significance, the most notable location being the Istállóskő Cave in the Bükk Mountains with habitation dating from 45,000 to 8,000 BC. This Stone Age culture dates back to approximately 100,000-60,000 BC to the Pleistocene Ice Ages. Archeologists first discovered the remnants of this culture in the region of Aurignac in southern France in the early 20th century; hence the culture was named after this region. The Aurignacian people spread out from Western Europe to Siberia. Due to the cold climate these people tended to live in caves almost all year round. It is estimated that the first permanent winter huts built partly underground and partly above ground date from this period. They are noted for multiple layers of carefully made flint implements and bones. The Aurignacian people hunted wild horses and mammoths. They were apparently a matriarchal society. Anatomically they had a more feminine physique and were surprisingly productive. In Hungary remains of the Aurignacian culture were found in the Istállóskő cave. – B: 1138, 1020, T: 7676.

**Australia, Hungarians in** – The history of Hungarians in Australia goes back to the beginning of the modern history of the continent. Presumably there were Hungarians among the first Europeans who arrived by boat in 1788. The first recorded Hungarian in Australia was the merchant Isaac Friedman, who arrived in 1833 with his wife and son. A group of 20 Hungarian immigrants arrived in Australia in 1846.

After the 1848-1849 War of Independence against Habsburg rule a few exiled Hungarians arrived in Australia, chiefly during the gold rush of the mid 19th century. A few were known from the end of the 1930s, fleeing from Hungary as a result of the Jewish laws introduced under German National Socialist pressure; some of these Jewish immigrants during the critical years of the War were placed in concentration camps also in Australia, together with the unreliable German and Italian immigrants of the alien nations.

During the years 1949-1952 after World War II, the first wave of Hungarian immigrant refugees of considerable size arrived in Australia. Most of these were victims of the unsettled postwar conditions in Europe and at the same time victims of the Communist dictatorship formed in Hungary under Soviet military occupation. They numbered about 15,000 to 20,000 and were assisted by the International Refugee Organization (IRO), with a 2-year labor contract. They fled to this distant continent, which offered them unlimited opportunities.

The second Hungarian wave of a larger size arrived after the defeat of the 1956 Revolution and Freedom Fight; they amounted to about 15,000 to 20,000. Following this wave there were possibly another 10,000 to 15,000 who moved across to Australia from other continents, and from the detached areas of Historic Hungary of the Carpathian Basin, mainly from Voivodina (*Délvidék*), the Southern part of Historic Hungary, and included the political and economic emigrés from Hungary of the 1970s and 1980s.

Therefore the total number of Hungarians living in Australia amounted to about 50,000 to 55,000 in the 1990s. Another 12,000 identified themselves as Australian-born but having two Hungarian parents, and 18,000 as having only one Hungarian parent. The number of Hungarians is continually decreasing because the average age of those born in

Hungary and other parts of the Carpathian Basin, who migrated to Australia in the early 1950s, has reached 80, and those who immigrated to Australia after 1956 have reached the retirement age. The death rate is increasing among them, while the number of newborn barely affects the total number of Hungarians, since most of them tend to get assimilated into the multicultural melting pot and simply add to the overall population of Australia. According to the 2001 census data, those who stated that they were of Hungarian origin amounted to 62,859 and of these only 24,485 used the Hungarian language at home. The disclosure of the census shows that the largest number of Hungarians live in the State of New South Wales (NSW) and mainly in Sydney. The majority is in and around Melbourne, Adelaide, Brisbane, Sydney, Canberra and Perth.

In 1950, as a result of the effect of the different language, culture and environment in Australia, a feeling of relatedness emerged among the Hungarians and Hungarian community life soon began to take shape. The first organizations were established by priests and pastors of the historic churches and they were closely followed by the social, cultural, fraternal, sport and youth organizations.

Among the Hungarian communities it became necessary to set up local state councils to integrate the various groups in the capitals of every state of Australia, where Hungarians lived in larger numbers, in order to organize jointly the national celebrations, to take care of uniform federation of activities and to contribute to the dismantling of the Communist dictatorships in the Carpathian Basin. The oldest such institution, still functional at present is the Hungarian Council of NSW, which can look back upon six decades of successful past.

As a result of this initial collaboration in the early 1950s, various institutions were established in every state in Australia by self-effort, including Hungarian Houses, Hungarian Centers, Clubs, Scout Homes and Parks, Old People's Homes, and in Sydney the Saint Elizabeth home with a capacity of admitting 150 senior citizens, a section for caring for invalids and dementia patients, as well as a *Hungarian Village* made up of a dozen accommodation units, a Museum of Folk Art and a Library. The Hungarian Center in Melbourne is of a quite imposing size with a chapel, sportsground and gardens. In the larger cities there are also Hungarian cemeteries and war memorials to honor the heroes and victims of the wars in defense of the Carpathian Basin, freedom wars and world wars.

Apart from their local associations, cultural groups, Hungarian Houses, Hungarian Clubs, Hungarian Churches, and libraries, they have the Australian Hungarian Association (*Ausztrál Magyar Szövetség*) since 1955; the Australian and New Zealand Hungarian Association (*Ausztráliai és Újzélandi Magyar Szövetség-AZUMSZ*); the Hungarian Council of NSW (*NSW-i Magyar Szövetség*); the Transylvanian Association in Australia (*Ausztráliai Erdélyi Szövetség*); the Rákóczy Society; the Hungarian Human Rights Foundation (*Magyar Emberjogi Alap*); the Minority Foundation (*Kisebbségi Alap*); the *Regnum Marianum*; the Hungarian Historical Society Sydney (*Magyar Történelmi Társulat Sydney*); the Hungarian Boy Scouts in Australia (*Ausztráliai Magyar Cserkészlet*); and the Hungarian Folk Dance Ensembles (*Magyar Népi Tánccsoportok*).

The written and printed press appeared early in the 1950s: *Southern Cross* (*Dél Keresztje*), *New Life* (*Új Élet*), *With Honor* (*Becsülettel*), *Independent Hungary* (*Független Magyarország*), *Our Fate* (*Sorsunk*), *Australian Hungarians* (*Ausztráliai Magyarság*), and the high-standard weekly paper *Hungarian Life* (*Magyar Élet*), the only paper on the southern hemisphere still published in Australia on 16 to 24 pages at present,

dealing with the vital questions of Hungarian fate and every manifestation of community life. By means of the state-run Special Broadcasting Service (SBS) and the community radios, there is a Hungarian language broadcast almost every day, also a Hungarian TV program. The Duna TV introduced its complete program into the Hungarian homes and everybody receives up to date information about the life and cultural events of Hungarians of the Carpathian Basin.

The Australian Hungarian Conventions are organized once in every three years: large-scale reunions, gatherings, a little Hungary is conjured up for the participants for ten days, when everybody gets filled with Hungarian consciousness and responsibility for their original motherland for years to come. For these conventions from all the states of the Australian federation, artists, lecturers, sportsmen, dancers, choirs, actor troupes and overseas guests arrive to take part in the activities.

Admirable activity on part of the Hungarian Council of NSW has been its emphasis on fostering the Hungarian traditions in Australia. For this purpose it pressed for the publication of a number of English-language books and studies containing authentic data on Hungarian history and culture. These works consistently stressed the thousand-year old European, western character of Hungary and equally stressed the injustice of the dictated Peace Treaties of Trianon (1920) and Paris (1947). There were regularly published topical English-language studies and pamphlets pointing out facts in the interest of human rights of Hungarians in minority status in the detached territories within the Carpathian Basin and these were sent to every member of the Australian federal parliament, including the cabinet ministers and the senators, as well as to university professors, prominent public figures and media editors. The university- and public libraries were regularly supplied with publications on Hungary and issues favorable to Hungary.

Until 1990 the Communist Government of Hungary under Soviet military occupation was not recognized by any Hungarian group or institution in Australia. This changed radically with the change of regime. A correct, cordial and cooperative relationship was established with the foreign representatives of the democratically elected Hungarian governments. An early realization of Hungary's membership in NATO and EU was also supported.

For the fostering of language, culture and traditions and for maintaining Hungarian consciousness, national celebrations and jubilee anniversaries have been held regularly. The 50th anniversary of the 1956 Hungarian Revolution and Freedom Fight was commemorated, drawing the attention of the Australian political and public life and the population at large to this historic event. In the 21st century identity conferences were organized by the Hungarian Centers of Sydney and Melbourne, directing the attention of the youth of Hungarian extraction to the available teaching opportunities in schools of Hungary and to obtain the institutionalized support of the Hungarian Government for those establishments, which are active in the drive for preserving the Hungarian identity.

An important activity is the *Scout Movement*, strong in preserving and serving the Christian foundations and traditions, using playful methods to bring up humane Hungarian youths and to inject a love of nature in the young. The other important educational tool is the *Hungarian School*, where from kindergarten age the youth of Hungarian descent are taught Hungarian language and culture. In Australia the Hungarian language is officially recognized as a foreign language for the Higher School Certificate. The priests and parsons of the Christian churches also contribute considerably to the

preservation of the Hungarian identity. In the larger urban centers, in Sydney, Melbourne, Brisbane, Adelaide, where are flourishing church communities, thanks to the valuable work of the young clergymen. – B: 1104, 1364, 7456, 7693, T: 7456.

**Austria, Hungarians in** – During the Austro-Hungarian Monarchy (1867-1918), Hungarians freely moved to or settled in Austria. Hungarian emigration began in earnest in the closing days of the short-lived Hungarian Council (Soviet) Republic in 1919. At this time, adherents of the collapsing leftist parties immigrated to Austria. During the last years of World War II, and in the following period, a relatively small number of civilians were officially transferred; but significant numbers of Hungarian army units withdrew in front of the advancing Soviet Army. In this period many civilians fled to the West, via Austria. After the Soviet occupation of Hungary, fear for their lives, or a refusal to live in a country modeled after the Soviet system, caused a massive exodus to the West. There were a million or more Hungarian refugees in the partitioned Austria, waiting for resettlement at the end of World War II, the majority of them women and children. All were classified as displaced persons (DPs). The refugees in Austria were waiting for the withdrawal of the Soviet troops from Hungary, 90 days after the signing of the Austrian Political Treaty in 1955, as specified in the Treaties of Yalta and Potsdam. At the same time, there were a large numbers of refugees from other neighboring countries arriving in Austria, and their plight became a major refugee problem. Hungarians in Austria did not have any legal rights nor did they enjoy the right to work, to social benefits or healthcare, and their personal safety was in jeopardy. Kidnappings were frequent occurrences by Communist agents, who roamed freely between the French, American, British and Soviet zones of Germany and Austria. In such a situation, most Hungarian refugees were afraid to use their own names, let alone organize anything. Eventually, the local governments and the military commands of the occupying forces together supported the first organization for their safety: the Association of Hungarians in Austria. Previously, through the activities of the Hungarian clergy, they had obtained help through the Hungarian Aid (*Ungar Hilfe*).

The next wave of Hungarian refugees came to Austria in the wake of the crushed 1956 Revolution. This time, 200,000 Hungarians fled to the West, the bulk of them passing through Austria. A new wave of Hungarian refugees reached Austria after the collapse of the Communist system in Hungary, in 1989-1991. Most of the Hungarians eventually left Austria and settled in other western countries. By the estimate of a Hungarian newspaper, there were 65,055 Hungarians in Austria in 1961 but, by 1984, their numbers had dropped to 60,000. At the beginning of the 21st century, more than 39,000 Hungarians lived in Austria. The Austrian census registers people according to their spoken language, so it does not include people of Hungarian origin, who do not speak Hungarian anymore. According to reliable information, the real number of Hungarians in Austria is around 60,000 at present. The majority of Hungarians live in Vienna, Lower and Upper Austria and in Steiermark. In Burgenland (*Őrség*) there are some 16,500 autochthonous Hungarians, annexed to Austria in 1920. They live in the following locations: *Unterwart (Alsóőr)*, *Oberwart (Felsőőr)*, *Ober and Mittelpullendorf (Felső-és Középpulya)*, *Eisenstadt (Kismarton)*, and *Siget in der Wart (Őrsziget)*. They belong, together with the Hungarians of Vienna, to the *Hungarian Nationality Council (Magyar Nemzetiségi Tanács)*, formed in 1992. The Hungarian Roman Catholic Church's presence is quite strong in Austria. They have parishes in Vienna, Graz, Unterwart (*Alsóőr*), Klagenfurt

and Salzburg. Hungarian priests are serving in Innsbruck, Bregenz, Mariazell, Spittal and Kismarton. Altogether some 80 Hungarian priests are serving in Austria. The *Hungarian Church Sociology Institute*, founded in 1962, is involved in research work. There is a *Mindszenty College* in Innsbruck. Among the Protestant Churches, the most significant are the Hungarian Reformed Congregation in Vienna, the Reformed Parish in Oberwart (*Felsőőr*), the Hungarian Evangelical-Lutheran Pastoral Care Service in Vienna, and the Evangelical Lutheran parish in Oberwart. There are some 28 Hungarian cultural and sport organizations in Austria, among them 4 Boy Scout troops, 6 dance groups and 4 choirs. There is a *Collegium Hungaricum* in Vienna; a Hungarian-Croatian High School in Oberwart, as well as Hungarian Cultural Societies and libraries in some other locations. There is a *Hungarian Club* in Vienna and a weekly paper, *Vienna Journal (Bécsi Napló)*. Most of the Hungarian organizations belong to the *Central Federation of the Hungarian Associations and Organizations in Austria (Ausztriai Magyar Egyesületek és Szervezetek Központi Szövetsége)*, established in 1980. – B: 1104, 1364, T: 3240, 7103.

**Austrian-Hungarian North Pole Expedition** – From the middle of the 19th century the study of the North Pole was gathering momentum. On the part of Austria Count Johann Wilczek, President of the Geographical Society of Vienna, offered 40,000 Florins for the organization of an expedition and, with his influence, won the support of the Austrian government. On the Hungarian side, Count Ödön (Edmund) Zichy contributed a significant sum. They had a 220-ton steamer built with with auxiliary sails and strong sides. It was named “Admiral Tegethoff” after the Austrian admiral Wilhelm Tegethoff. Among the officers of the ship was one Hungarian, Gyula (Julius) Képes, the ship’s doctor. The task of the expedition was to explore the “North-Eastern Passage”.

The “*Admiral Tegethoff*” departed from Bremerhaven on 13 June 1872. Under Weyprecht and Payer but near Novaja Zemlja it struck an ice pack and froze into the drift ice, as a result the original plan was aborted. The locked-in ship gradually drifted northward. The crew and the scientists of the ship spent two winters under these conditions, but not idly. Meteorological observations were carried out; they studied the ice conditions and did some trips by using dog sleds. They killed bears for food and the fact that they remained healthy was mainly due to Dr. Képes’ care. In 1874 they traveled in areas never before seen by man and made a number of discoveries. The large island at the 82° northern latitude was named Wilczek Land, another was named Zichy Land, and the cliff projecting from it was given the name Cape Budapest. The surrounding group of islands received the name Franz Joseph Land. After a three-month long exhausting sled haul they came across open water and by means of their three boats rowed further and further south and eventually met with other boats at the shores of Novaja Zemlja. The expedition, though it could not carry out its original aim, was one of the outstanding achievements of geographical discovery. The Archipelago of 18, 940 km<sup>2</sup> area is now Russian territory and still carries the name of Franz Joseph. – B: 1182, 1020, T: 7456. → **Képes, Gyula; Franz Joseph Land.**

**Austro-Hungarian Monarchy** – A dualistic state created by the terms of the Compromise of 1867, masterminded by Ferenc Deák. It included the perpetual provinces of Austria and the territories of the Hungarian Holy Crown. Its territory was 677,443 km<sup>2</sup> and its population in 1910 was 51.5 million. Act XII of 1867, passed by the Hungarian Parliament determined the form of the Hungarian Government as a constitutional

monarchy. With this, Hungary's former political and administrative status was restored: Transylvania (*Erdély*, now in Romania) and the Mura region (now Croatia/Slovenia), was returned together with the port city of Fiume (now Rijeka, Croatia), while the Border Territory was abolished. On 14 November 1868, a Royal Decree determined the name of the dualistic state as the "Austro-Hungarian Monarchy", or the "Austro-Hungarian Empire", of them the former became more generally accepted. The common ministries (foreign affairs, defense, finance), the shared currency and the customs union secured the unity; but both members were independent regarding their internal affairs. Hungary's contribution to the common expenses was at first set at 30%, and later revised to 37%. From its inception the Monarchy was beset by internal political contradictions and conflicts. In spite of the constitutional nature of the state, the monarch enjoyed some absolutist privileges, e.g. with regard to the armed forces. The foreign policy of the Monarchy was directed against the Balkans. In 1878 it occupied Bosnia-Herzegovina; and annexed it in 1908, thereby worsening its relations with Serbia. In 1882 it made an alliance with Germany, then with Italy, forming the Triple Alliance. In 1914, after the assassination of Archduke Franz Ferdinand and his wife at Sarajevo, despite the opposition of Hungarian Prime Minister Count István (Stephen) Tisza, the Monarchy declared war on Serbia; this led directly to World War I. The loss of the war resulted in the destruction of the Austro-Hungarian Monarchy and also led to the unjust Peace Treaty of Versailles-Trianon in 1920 that carved up Historic Hungary – without a plebiscite – and resulted not only in a badly truncated country but also in the subjugation of 3.5 million ethnic Hungarians, one third of the population, to hostile, newly created neighboring states. – B: 1153, 1020, T: 7665.→**Austro-Hungarian Monarchy; Deák, Ferenc; Tisza, Count István; Trianon Peace Treaty.**

**Avar Finds** – Objects such as weapons, jewelry and sometimes utensils found mostly in graves. The 6th-7th century Byzantine gold could help to determine the age of some objects found in the graves. Soldiers were buried with their horses. One such horse skeleton is being reconstructed for exhibition in the Kecskemét Museum. The excavated Avar graves in the Carpathian Basin number over 50,000. In the graves they also found gold objects, weaponry: swords, spears, daggers, bows and arrowheads. – B: 1078, T: 7617.→**Avars; Late Avars.**

**Avar, István** (Stephen) (Egercsehi, 20 March 1931 - ) – Actor, politician. He worked as a miner between 1945 and 1949. After finishing his studies at the Academy of Performing Arts he became a member in the National Theater at Pécs in 1954, was member of the Madách Theater between 1960 and 1966 then worked at the National Theater, Budapest (1966) and again at the Madách Theater from 1985. He taught at the Academy of Dramatic Art and was University Professor from 1987, and a Member of Parliament from 1973 to 1990. His interpretation of Horatio in Shakespeare's *Hamlet* showed him as a heroic character actor. Several modern character interpretations are tied to his name, among them Stanley in Williams' *A Streetcar Named Desire* (*A vágy villamosa*); Dan in Arthur Miller's *After the Fall* (*Bűnbeesés után*); Áron in Madách's *Moses*; Postmaster in Gogol's *Inspector General* (*Revisor*); Ottó in L. Németh's *Gregory VII* (*VII.Gergely*); Luther in A. Sütő's *Palm Sunday of a Horse Trader* (*Egy lócsiszár virágvasárnapja*); the title role in Shakespeare's *King Lear* (*Lear király*), and Petur bán in J. Katona's *Bánk bán*. He frequently played in feature films as well. He received the

Mari Jászai twice (1963, 1969), the Merited Artist title (1972), the Kossuth Prize (1975), Outstanding Actor title (1980), the Greguss Prize (1990), and Actor of the Nation (2001), and the Middle Cross with the Star of Merit of the Republic of Hungary (2007). – B: 0871, 1445, 1742, T: 7684.→**Madách, Imre; Katona, József; Sütő, András,**

**Avar-Khabar-Szekler Connection** – The *Seklers*, a major Hungarian ethnic group, the “guardians of a settlement”. (In Hungarian, *Székely* literally means those who are in front of a settlement in order to defend it). There were several large Sekler groups in the Carpathian Basin. Some were guardians of the western borderland of the country; others settled in the northern Carpathian Mountains (now Slovakia), the eastern and southern regions of Transylvania (*Erdély*, now Romania), and along the banks of the Lower Danube (now Serbia). Since the time of the Hungarian settlement in the Carpathian Basin in 896, the western borderland was guarded successively by the remnants of the Avars and the Pechenegs. Subsequently the Pechenegs also became the guardians of the northern borderland. During the time of Avar rule, the protection of Transylvania and the safeguarding of the western borderland until the fall of Pannonia was the duty of the Avars. Later, the returning Csaba (Irnök) with his Avars joined them, and a Kabar group led by Edumen, who had previously lived on the plains of Csigla, also joined them. The Avar-Kabar-Sekler connection clearly reflects a legend of an earlier correlation between the Hun-Kabar-Sekler ethnic groups. – B: 0942, 1020, T: 3240.→**Szeklers; Csaba Prince, Legend of; Kabars; Avars.**

**Avar Scepter** – Among the Avar treasures seized during the Avar-Frank war of 796, the most important was a long-necked ceremonial vessel kept in the treasury of St Maurice d’Agaune. It was remodeled from an Avar scepter to become a consecrated oil container. The hollow stem became the long, shapeless neck, while the ball was transformed into the bowl of the vessel. The original Avar sceptre is identical to the Hungarian coronation scepter to the smallest detail. During the early Avar period, Avar craftsmen used enamel to decorate works of art. One of the important enamel ornaments shows two-winged griffins; the other displays two lions guarding the tree of life. The Hungarian scepter, the paintings in Esztergom, and the scepter with lion motives used by the early Avars, according to Gyula (Julius) László, can be regarded as cultic relics of the early Hungarians. The lion was not the animal of the family coat of arms but always adorned the emblem of the ruling prince (khagan). – B: 1078, 1134, T: 7685.→**Avars; László, Gyula; Coronation Insignia.**

**Avars** – A people of warrior horsemen from Asia, identified by Byzantine historians as an unusual branch of the Scythians. Numerous archeological digs at Avar cemeteries in the Carpathian Basin have yielded some interesting facts about their origin. Some of the skeletons showed a Mongol or mixed Mongol heritage (Kiskörös, Kis-Zombor, Kundomb, Öskü, Üllő) while others (Jutas, Kapospula, Tiszaderzs) did not exhibit any Mongol characteristics at all. The latter ones were relatives of the Várkonyis, the Onugors and the Sabirs. Byzantine historian Malalas identified the Avars with the Huns, based on the fact that Hun interpreters in Byzantium understood the language of the Avar envoys, although there is no historical corroboration that the Avars called themselves Huns. The Hungarian Chronicles mention them sporadically. Some sources identify them as “the returning Huns”.

From the 4th century AD they lived for about 150 years in the neighborhood of China in the same territory the Huns occupied before them. To escape from the invading Turks they moved to Eastern Europe after 550 AD. In 557, while in the region of the Volga and Don Rivers, about 557, they made contact with the Eastern Roman Emperor *Justinian*, and from then on they provided paid military services for him in exchange for yearly taxes and the right to settle on the banks of the Ister (Danube) River. In 568 they also formed alliances with the Longobards against the Gepids, and under the command of *Khagan Baján*, they conquered the area between the Danube and the Carpathian Mountains. In 582, after establishing their Empire from the Don River to the Plain of Vienna, they actually recovered Attila's legacy. The Carpathian Basin became the center of an empire again. During their expansion into the Balkans in 601-602, they fought against the Byzantines, but were defeated; however, in 612, they occupied the city of Salona (Spalato) and then besieged Byzantium in 626, though of no avail. The unsuccessful siege provoked a civil war in the Avar Empire that resulted in the separation of the northern, eastern and southern territories. Then in 630, fighting erupted unexpectedly with their Bulgar allies for power that resulted in the displacement of some 9,000 Bulgar families. They escaped to Bavaria, but almost all were killed there. Between 558 and 670, the great Avar Empire covered an enormous territory between the Rivers Lajta and Don. This is the era of the first Avar Khanate. Their name does not appear in the Hungarian Chronicles, although they do mention that “104 years after the death of Attila” the Avars arrived. In the World Chronicle of István (Stephen) Székely, published in 1558, the entry of the year 577 mentions one “*Avares*, King of Pannonia”. In 791, Charlemagne began the Frank campaign against the Avar Empire. In 803, this led to the collapse of the Avar state, though the Avar people continued to live on in several parts of the Carpathian Basin for some time, and they melted into the akin Magyars. – B: 1078, 1134, T: 3240.→**Late Avars; Attila; Székely, István, de Bencze; Avars, Late.**

**Avars, Late** – There was a long-drawn out war between the Franks and the Avars. It started with Charlemagne's campaign of 791. Finally, the 3rd Avar Khanate fell to pieces under a Bulgar-Frank onslaught in 803, and the remaining Avars lived under foreign control. At the time of the Magyar settlement in the Carpathian Basin (895-896), the Magyars met late Avars in large numbers, and of significant strength, who received Árpád and his people as kindred folk and liberators. The arriving Magyars considered the Late Avars as allies and shared the land with them. In the Western areas there were no significant differences between the local inhabitants and those newly arrived. For quite a while those inhabitants were called “Ungroks”. Byzantine Emperor Constantine VII (Porphyrogenetos, “Born in Purple”) (913-959) wrote in his “*De administrando imperio*” that, after the Magyars settled there around 950, Avars still lived in the Carpathian Basin until they melted into the Magyar population. Approximately 50,000 late Avar graves were excavated in the Carpathian and Vienna Basins until 1970, mainly according to archeologist Gyula (Julius) László. – B: 1134, T: 7684.→**Avars; László, Gyula.**

**Avas Mesolithic Flint Mines** – The Avas Mountain at Miskolc has been proven to be an ancient quarry site. It is from here that the cave dwellers of the Bükk Mountains obtained the flint they needed for their stone tools and weapons. Until that time the cave dwellers only used flint stones available on the surface; but some 7,000 years ago they started to mine it along with various other stones. They used mines with shafts and tunnels to

extract the flint that they would use to make primitive tools on site. These flint mines are the oldest in Europe. – B: 1078, T: 7676.

### **Aviation, Hungarian→Pioneers of Hungarian Aviation.**

**AVO/AVH** (*Államvédelmi Osztály/Államvédelmi Hivatal*) →**State Security Police.**

**Axe** – A tool with short wooden handle for chopping wood, used with one hand. It played an important role from prehistoric times (Stone Age). It was frequently used in warfare. The word *balta* (axe) is present in unchanged form in the Chagatay, Yakut, Khazan-Tartar, Mongol, Ozmanli and Tunguz languages; in ancient Sumerian it is "bal". The axe, ending in a quadrangular shape, was in general use among the 10th-11th century Hungarians. Axes used in ancestral times for ritual purposes were usually double edged, symbolizing creation and deliverance, but also wrath and destruction. Archeologists believe the axe represents the creative and liberating powers. This theory is illustrated also by the axe in the hand of King László I (St Ladislas) on a medieval painting, where he brought forth water with it from a rock. According to another Hungarian legend, a shaman named Kampó had a seven-edged axe and he could build a bridge with one stroke. According to popular Hungarian belief, prehistoric axes were thunderbolts, that is, stones from heaven that, together with lightning, were sent down to earth by angry celestial deities. On the other hand the benign, heavenly prowess of the axe is invoked when it is thrown at the whirlwind to chase away the storm. An axe thrown into the yard prevents hail according to ancient belief. – B: 1138, 1020, T: 7682.→**László I, King.**

**Aykler, Béla** (Bela) (Nagyszöllős, now Vinohradiv, Sub-Carpathia, 15 April 1929 - ) – Property developer. He attended a military cadet school. Toward the end of World War II he helped 30 younger, 10-13-year old cadets in their escape to the West. He became a POW in May 1945, but returned to Budapest the same year. He was conscripted in the fall of 1945, and in 1946 he emigrated to the West. He moved to Canada in 1948 and became a tobacco grower. After a failed attempt in civil engineering studies at the University of Toronto in 1953, he changed to another field and went into real estate with success. Soon he was advisor to the provincial and federal authorities in real estate matters. He built some 560 government-assisted apartments for the Hungarian community in the Toronto area. He was a founding member of the Rákóczi Foundation, and with his wife organized camps for the youth of the Carpathian Basin beyond the present borders of Hungary. On the occasion of the 10th anniversary in 2003, some 1,400 youngsters had had the chance to better acquaint themselves with Hungary's culture and history. In 2007 he and his wife were awarded the For Hungarian Youth Prize in Budapest. – B: 1037, T: 7103.

## B

**Bábi, Tibor** (Poczkody) (Báb, now Slovakia, 30 October 1925 - Pozsony, now Bratislava, Slovakia, 23 June 1978) – Poet, writer, journalist, translator of literary works. His higher studies were at the Law School of the University of Budapest (1947). In 1948 he returned to Slovakia and from 1949 he studied at the Academy of Political and Economic Studies, Prague. From 1951 onward he worked as a journalist for various newspapers, among them the *Torch* (*Fáklya*) and the *New Word* (*Új Szó*). Between 1967 and 1976 he was Editor of the *Literary Review* (*Irodalmi Szemle*). He wrote reports on workers, as well on poems and literary translations. His works include *This is your People* (*Ez a te néped*) poems (1954); *Wandering Bird* (*Vándormadár*) poems (1960); *Tear-drop Under Microscope* (*Könny mikroszkóp alatt*) poems (1966); *From Europe to Europe* (*Európából Európába*) travel diary (1973), and *Brook and Spring* (*Patak és forrás*), sketches (1976). He translated a number of lyric works from Czech into Hungarian. In his early poems he protested against discrimination of Hungarians in Slovakia. He was a member of the Society of Slovak Writers. He was a recipient the Madách Prize (1966). – B: 0883, 1257, 1551, 1890, T: 7103.

**Babits, Mihály** (Michael) (Szekszárd, 26 November 1883 - Budapest, 4 August 1941) – Poet, writer, essayist, translator of literary works. After Endre (Andrew) Ady and Zsigmond (Sigismund) Móricz he was the most prominent member of the literary circle *West* (*Nyugat*). Between 1906 and 1908 he taught at a high school in Szeged. From 1902 his poems and translations were published in daily papers and numerous journals. The first volume of *Tomorrow* (*Holnap*) published some of his poems, amongst them the *Turán March* (*Turáni induló*) and the *Black Country* (*Fekete ország*). He later became a permanent contributor to the literary review *West* (*Nyugat*). In 1909 his first book, *Poems: Letters from the Wreath of Iris* (*Versek: Levelek Irisz Koszorújából*) was published. As a young lyricist he was already a master of classic styles. The outbreak of World War I was painful to him. Because of publishing his poem *Fortissimo*, the state authorities closed down the paper *Nyugat*, started a lawsuit against him, and confiscated his earnings. In spite of his conservative stand he sympathized with civil radicalism and later defended his stand during the Revolution of 1918-1919. His disappointment with the liberal political views, and especially with the Communist terror, made him uncommunicative and lonely. He was well known not only for his poems and prose, but also for his ability to organize literary events. His poetic output includes *Recitativ*, (1916); *Valley of Restlessness* (*Nyugtalanság völgye*) (1920); *Island and Sea* (*Sziget és tenger*) (1925); *Book of Jonah* (*Jónás könyve*) (1938). Some of his novels are: *Christmas Madonna* (*Karácsonyi Madonna*) (1920); *The Son of Virgil Timár* (*Timár Virgil fia*) (1922); *Sons of Death* (*Halál fiai*) (1927); *Dog Market* (*Kutyavásár*) (1923); *In the Shadow of the Tower* (*A torony árnyékában*) (1933); *Elza Pilot...* (*Elza pilóta...*) (1933), and *Criss-crossing Over My Life* (*Keresztül kasul az életemen*) (1939). He translated Dante's *Divine Comedy* (*Isteni színjáték*), Shakespeare's *The Tempest* (*Vihar*), and Goethe's *Iphigenie auf Tauris* (*Iphigenia in Taurist – Iphigenia Taurisban*). His most outstanding work is *The History of European Literature* vols. i-ii (*Az európai irodalom*

*története I-II*) shows his enthusiasm for a united European culture. He was curator of the Baumgarten Foundation, and supported young poets and writers, such as Gyula (Julius) Illyés, Lőrincz (Laurence) Szabó and Károly (Charles) Pap. He was a member of the Kisfaludy Society. Babits was one of the greatest figures of 20th century Hungarian literature. – B: 0883, 1257, T: 7666.→**Ady, Endre; Móricz, Zsigmond; Illyés, Gyula; Szabó, Lőrinc; Bélia, György; Török Sophie; Pap, Károly.**

**Bábolna, Arabian Horses of** – A special breed of horses from Bábolna puszta, near Bana, in County Komárom (*Dunántúl - Transdanubia*). The experimental breeding started in Bábolna in the 19th century. A special breed was developed from repeated imports, later called *Shagya-Arabian*, an elegant type of horse with toughness, endurance and friendliness toward humans, thus suitable for the Hussars. These horses were used both as carriage and riding horses. The breed's name comes from the dapple-grey stallion *Shagya*, born in 1830. A Bedouin tribe bred Shagya and sold him to agents of the Habsburg monarchy. In 1836 Shagya became the breeding stallion at Bábolna. – B: 1187, 1143, T: 7680, 7103.

**Babos, Sándor** (Alexander) (Budapest, 3 February 1903 - Alta Loma, CA, USA, 19 March 1996) – Minister of the Reformed Church, missionary. He finished his theological studies at Kolozsvár (now Cluj-Napoca, Romania) (1921-1925) and at the Missionary High School and University of Basel, Switzerland (1926-1929). He was Assistant Minister at the Farkas Street Church, Kolozsvár, then substitute minister among Hungarians scattered in Braila, Galac (Galati) and Lupény (Lupeni), Romania. He spent a year at the University of Edinburgh. The Church of Scotland accepted him for missionary work and in 1935 he was posted in northern Manchuria, China. During World War II the Japanese allowed him to work because he was Hungarian, although with restrictions. He survived the Chinese civil war and the occupation of the Soviet army. He taught Greek and German at the Theological School of Mukden (Senyang) between 1942 and 1946. He moved to the United States in 1947, where he served the Hungarian congregations of Fairfield CT, Bethlehem and Pittsburg, PA. His publications include *What is the Foreign Mission? (Mi a külföldi misszió?)* (1930); *Behold, I am with You... Manchurian Diary (Ímé én titeletek vagyok...Mandzsuriai napló)* (1936); *Christ in Manchuria (Krisztus Mandzsuriában)* (1941), and *In the Shadow of Pagodas (Pagodák árnyékában)*, with Sándor Németh (1944). – B: 0910, T: 7103.

**Bach Era** – Austrian retaliatory administration in Hungary from 1849 to 1859, headed by Alexander Bach, Austrian Interior Minister. It actually began in July 1850, when Austrian General Julius Haynau's rule of terror ended, which was established after the defeat of the War of Independence (1848-1849). The Austrian regime laid a heavy burden on Hungary's population. It tried to stir up feelings of inequality and attempted to divide the people further by emphasizing class distinctions. In an effort to exercise control over and 'Germanize' Hungarian literary life, the regime appointed several Austrian teaching staff to Hungarian universities and scientific institutions. – B: 0942, 1078, T: 7668.→**Haynau, Baron Julius, Freiherr von; Freedom Fight of 1848-1849.**

**Bácska** (now Bačka, Serbia) – is the southern part of the Danube-Tisza interfluvium on the Great Hungarian Plain. This southern part of Hungary (*Southland, Délvidék-Vojvodina*) was part of the Historic Kingdom of Hungary until 1920. Now it is the western part of

Voivodina, making up the northern section of Serbia. Human settlements can be found here from the Stone Age. Proto-Hungarians (Late-Avars) started to settle the area around 677 AD. After 1000 AD, two counties were formed here: Bács in the South, and Bodrog in the North, both as administrative regions of the newly formed Hungarian Kingdom. The kings of the Árpád House (1000-1301) established 8 abbeys and monasteries in this region. The Mongol invasion of 1241-1242 extensively devastated the area. During the reign of King Mátyás I (Matthias Corvinus, 1458-1490) the region was again well populated by Hungarians and included 12 castles, 28 towns and 529 villages. During the 15th century, Slavs from the Balkans started to move in, escaping from the expanding Turkish Empire in the Balkans. The Orthodox Patriarch Arzen Csernojevic led their largest group. After the battle of Mohács in 1526, and during the Turkish occupation (1541-1697), the Hungarian population greatly declined. The greatest influx of Serbs occurred in 1691, after their rebellion against the Turks was crushed. Following the defeat of the Turks, this region was designated as the southern defense perimeter of the Habsburg Empire. By 1733 this designation had lost its significance and the region started to be resettled by Hungarians. Between 1763 and 1786 the Habsburg Dynasty initiated and organized a settlement of Swabian farmers from western Germany. These Germanic settlers were supported with reduced taxation by the Austrian authorities. In addition, Slavic people from the present Slovakia, and French farmers from Alsace Lorraine settled in Bácska at the end of the 18th century. In 1802 Bács and Bodrog counties were combined into one administrative unit as County Bács-Bodrog. After the Versailles-Trianon Peace Treaty in 1920, almost the whole area was ceded to Yugoslavia. From 1920 to 1940 a large number of Serbs were relocated here from the central Balkan regions. The Soviet army occupied this area in late 1944. Tito's partisans followed the Soviet forces. They massacred large portions of the non-Slavic population, among them some 40-50,000 ethnic Hungarians, including women and children. Persecution of Hungarians resumed during and after the civil war in the 1990s. In the Tito era the number of Hungarians in this region was 500,000, this declined to 270,000 during the civil war in Yugoslavia in the last decade of the old millennium. – B: 1031, 1134, T: 7656.→**Late Avars; Trianon Peace Treaty; Atrocities Against Hungarians; Southern Hungary.**

**Bacsó, Péter** (Kassa, now Košice, Slovakia, 6 January 1928 - Budapest, 11 March 2009) – Film producer, film scriptwriter. He studied at the Academy of Dramatic Arts (1946-1950). From 1973, he was Artistic Director of the Dialog Studio, then from 1987 to 1991, its Manager; as well as a lecturer at the Academy of Dramatic Art. His film scripts are: *Dearest Anna (Édes Anna)* (1958), *Two Half-Times in Hell (Két félidő a pokolban)* (1961). His feature films include *It is Simple in Summer (Nyáron egyszerű)* (1963); *The Witness (A tanú)* (1969); *Sparkling Girls (Szikrázó lányok)* (1974); *The Day Before Yesterday (Tegnap előtt)* (1981); *Stalin's Fiancée (Sztalin menyasszonya)* (1990); *Live Show* (1992), and *Dog with Tiger Stripes (A tigriscsíkos kutya)* (2000). Books he authored are: *Silent Shout (Csendes kiáltás)* (1994), and *3 Witnesses (3 tanú)* (2001). He was a recipient of many awards and prizes, among them the Béla Balázs Prize (1968), the Merited Artist title (1972), the Silver Leopard Prize of the Locarno Film Festival (1972), the Great Prize of the San Remo Festival (1974), the Kossuth Prize (1985), and the Specific Prize of the Rio de Janeiro Festival (1985). – B: 0874, 1178, 1257, T: 7103.

**Badal, János** (Jean Badal) (Budapest, 7 March 1927 - ) – Cinematographer. He served in the army in 1944-1945; studied History, History of Arts and Hungarian Literature at the University of Budapest (1945-1947), then attended the Academy of Dramatic Art, Budapest (1947-1951), and finally studied Cinematic Arts at the University of Paris (Sorbonne). From 1950 he worked as cameraman and made several films from 1953 on. He taught at the Academy of Dramatic Arts in 1949-1956. Since 1957 he lives in Paris. His works include *Lieutenant of Rákóczi (Rákóczi hadnagya)* (1953); *The American* (1964); *School of Emotions (Érzelmek iskolája)* (French 1968); *Borrowed Time (Kölcsönkapott idő)*, (French-Hungarian 1966), and *The Judgment (Az ítélet)*, (French-Italian 1974). – B: 0874, 1504, 1031, T: 7103.

**Badár, Balázs** (Blaise) (Mezőtúr, 5 May 1855 - Mezőtúr, 5 December 1939) – Master-potter. He elevated pottery to the level of art and made Hungarian folk pottery well known all over the world. At the turn of the 20th century, with his distinctly different vases, dishes, and ornamental pieces, he actively participated in every important artistic exhibition in Hungary and abroad. He added his signature to every piece he made. His work greatly influenced the potters of the Great Hungarian Plain (*Nagyalföld*). In 1932 a representative selection of his ceramics was deposited at the Museum of Stockholm. – B: 0883, 1134, T: 3240.

**Badiny Jós, Ferenc** (Francis) (Gács, now Halič, Slovakia, 3 June 1909 - Budapest, 10 March 2007) – Linguist, Sumerologist. Following his training at the Military Academy of Budapest, he became an officer in the Hungarian Air Force; but due to poor health, he did not do active service in World War II. Near the end of the war he emigrated to Austria, and finally to Argentina, where he studied the Sumerian language and civilization. He became Professor of Sumerology at the Jesuit University of Buenos Aires. After the death of his wife Ilonka, he returned to Hungary and settled there. He was founder, editor and publisher of the cultural periodical *Ancient Roots (Ősi gyökér)*. He published a number of articles, and 25 books dealing with early Hungarian history and Sumerology; they include *El Pueblo de Nimrod. Nuevas...(City of Nimrod News...)* (1966); *Ethnographical Map of Turanians (Uralo-Altaians)* (1966); *The Discovered Hungarian Ancient History (A megtalált magyar őstörténelem)* (Australia 1967); *Sumerian Syntax and Agglutination in Asian Languages*, (Canberra, 1971); *Mah-Gar is Magyar - (Mah-Gar, a Magyar)* (1976); *From Kaldea to Ister-Gam, vols. i,ii,iii (Kaldeától Ister-Gamig, I,II,III)* (1971, 1981, 2000), and *King Jesus – the Parthian Prince (Jézus király – A pártus herceg)* (Budapest, 1998). Badiny is author of a Hungarian Catechism entitled *Ballad – A Hungarian Church in its Hungarian Faith (Ballada – A Magyar Egyház Magyar Hitében)* (1976), an attempt at an exclusively Hungarian Christian religion; Badiny became the founder of a Hungarian Church. He was made an honorary doctor of the Private University of Miskolc (1977). His theological views and linguistic work were widely criticised, but his admirers regard him as the discoverer of an ancient Hungarian history. He died at the age of 98. – B: 1120, 1031, T: 7456, 7103.→**Bobula, Ida; Padányi, Victor; Pap, Gábor; Tomory, Zsuzsa.**

**Bagdal, Mrs. Vilmos** (William) (née Irma Kiss) (Ipolyvarbó, now Vrbovka, Slovakia, 9 August 1929 - ) – Nurse, leader of a vocal group, ethnographer. Her education was interrupted when the advancing Russian front reached her village and the school was

closed down in 1944. In 1950 she obtained a nursing diploma at Losonc (now Lucenec, Slovakia). In 1956 she worked at the farmers' co-operative of Ipolyvarbó. Since 1968 she is a member, and subsequently leader of the local singing group, and became the "woman of many songs" of the village. On collecting trips she taped numerous folk tales, village stories, traditions, folk-customs and folk songs. In addition, she took part in national folk craft competitions and festivals. Her folk ensemble appeared, among others, in Budapest, Hollókő, Kecskemét, Balassagyarmat, Szentendre. She has been a member of the CSEMADOK (Czechoslovakian Hungarian Social and Cultural Alliance – *Csehszlovákiai Magyar Társadalmi és Kulturális Szövetség – CSEMADOK*) since 1952. For her nursing work she received the Ministerial Order of Merit, and in 1984 she received from CSEMADOK the Medal of Excellence as a folk artist. – B: 1083, T: 7456.

**Bagpipe, Hungarian** (*Magyar duda*) – An ancient musical instrument of Oriental origin, different forms of which existed for at least 3,000 years, and was known to many races in Europe and Asia. Mainly shepherds used it. The player of the Hungarian bagpipe or *duda* supplies air into the bag through the mouthpiece. From there it flows into the two reed-pipes that have 6, sometimes 7 holes and have a one-octave range. Its longest pipe is the bass-pipe with a single low note that sounds continuously. The Hungarian bagpipe is characterized by decorations of animal or human heads, and displays markings of high- or low-level tunings. The oldest picture depicting this instrument dates from the late 15th century, where it appears on the marginal decorations of a Corvin Codex. However, description of it already appeared in 13th century documents. During the 16th century Hungarian bagpipe players were known in other parts of Europe as well. The bagpipe occupied a prominent place in the instrumental music of the Hungarian nobles of the 17th century as a solo instrument, in pairs, or accompanied by a violin. While at the beginning of the 20th century it was still fairly popular in Hungary, now only folk ensembles play it. – B: 1134, 1020, T: 7684. → **Codex Literature; Corvina.**

**Baja, Mihály** (Michael) (Végyvár, 11 December 1879 - Debrecen, 5 February 1957) – Minister of the Reformed Church, writer, poet. He completed his studies at the Reformed College in Debrecen and at the Reformed Theological Academy in Budapest. Between 1908 and 1914 he founded and served two Hungarian Reformed congregations in Wallingford, PA and in MacKeesport, PA USA. He was minister at Túrkeve in 1915, and from 1921 in Debrecen. His first poems appeared in 1902 in Debrecen in the *First Anthology of the Bokréta Circle of Debrecen* (*Debreceni Bokréta Kör első antológiája*), then more followed, such as the *Festive Sounds* (*Ünnepi hangok*) (1917); *The Bell is Ringing* (*Szól a harang*) (1930), and *The Old College of Debrecen* (*Debreceni öreg kollégium*) (1940). – B: 0876, 0877, 1257, T: 7103.

**Bajcsy-Zsilinszky, Endre** (Andrew) (Szarvas, 6 June 1886 - Sopronkőhida, 24 December 1944) – Journalist, politician. He read Law in Kolozsvár (now Cluj-Napoca, Romania), Leipzig and Heidelberg, Germany. In 1911, for family and political reasons he and his brother confronted the politician András (Andrew) L. Áchim, and in defense of his brother, he shot Achim. He fought in World War I and was seriously wounded in 1916. In 1919, during the 133-day reign of the Hungarian Council (Soviet) Republic, he lived in Vienna. On his return home he joined the national forces in Szeged. He became supporter of right wing political parties and participated in founding the *Race-Protection*

*Party (Fajvédő Párt)* in 1923. As journalist he worked for the journal *Hungarians (Magyarság)*, and in 1928 founded his journal *Vanguard (Előörs)*. From then on he leaned towards the democratic opposition, and in 1930-1931, organized the *National Radical Party (Nemzeti Radikális Párt)*. In 1932 he launched the weekly *Freedom (Szabadság)* that was a militant anti-Nazi voice. In 1936 his party united with the *Independent Smallholders' Party (Független Kisgazda Párt)*; in 1939 he became a Member of Parliament representing the district of Tarpa. As journalist of the weekly *Independent Hungary (Független Magyarország)* and that of the journal *Hungary (Magyarország)*, he warned against the Nazi danger and realized the necessity of a united resistance of the small nations along the Danube. During World War II he demanded Hungary's withdrawal from the War. On March 19 1944, when the German Army occupied Hungary, he was involved in a gun-battle with the Gestapo unit that wanted to arrest him. He was wounded and detained, then released by the intervention of the government. However, when he organized a resistance movement he was betrayed and finally executed by the Hungarian pro-Nazi government in power since October 1944. His works include *Our National Rebirth and the Press (Nemzeti újjászületésünk és a sajtó)* (1920); *National Radicalism (Nemzeti radikalizmus)* (1930); *Our Place and Fate in Europe (Helyünk és sorsunk Európában)* (1941), and *Transylvania, Past and Future* (1944). – B: 0883, 1090, T: 7103.

**Bajmóc Castle**, in Northern Hungary (Upland, *Felvidék*, now Slovakia) – When the Magyars settled in the Carpathian Basin in 895-896, there was already a castle at Bajmóc. Initially it belonged to the Árpád family, passing later to Máté Csák; then it became the property of the king. The Turks unsuccessfully tried to capture it in the 16th century. Later, István (Stephen) Bocskai's army attacked it, also unsuccessfully. The only person to take the castle was Miklós (Nicholas) Bercsényi in 1704, during Prince Rákóczi's uprising against Austrian rule. According to historical notes, a National Assembly was held under the old linden tree in the early 14th century. The castle contains two parts: the old castle with its polygonal foundation and the five-storey-high inner castle with one hundred rooms. The chapel was built in 1662; there is a large botanical garden next to the castle. József (Joseph) Huber designed the present building in 1888-1910 in the Neo-Gothic style. It was rebuilt for the owner Count János (John) Pálffy. It is one of the most attractive castles of the former Northern Hungary. Many of the castle's treasures disappeared during the Czech occupation following World War I, and the rest after World War II. – B: 1133, 1020, T: 7663. → **Csák, Máté; Mátyusföld; Bocskai, Prince István; Bercsényi, Count Miklós; Rákóczi II, Prince Ferenc; Pálffy, Count János.**

**Bajomi Lázár, Endre** (Andrew) (András Lázár) (Biharnagybajom, 19 August 1914 - Budapest, 18 May 1987) – Writer, journalist, translator of literary works. After initial studies at the University of Debrecen he became an extramural student at the University of Paris (Sorbonne) in 1934, obtaining his Degree in Education from the *Alliance Française* of Paris. In France, he worked first as a correspondent for leftist Hungarian immigrant papers published under the pseudonym Ferenc Dávid, and as Endre Bajomi in Hungarian journals, such as *Szocializmus (Socialism)* and *Answer (Válasz)*. He was sentenced in absentia for his articles in the journal *Our Way (A Mi Utunk)* of Debrecen in 1934. He was Paris correspondent for the journals *Our Age (Korunk)*, and *New Voice (Új Hang)*, and in 1938 he became Editor for the Hungarian publication *Free Word (Szabad Szó)* in Paris. Between 1945 and 1947 he was Editor for *Droit et Liberté (Law and*

*Freedom*) and *République Hongroise (Hungarian Republic)*. He returned to Hungary in 1952. Between 1953 and 1954 he was Editor for the Literary Publishers (*Szépirodalmi Könyvkiadó*), and from 1955 Editor of the *New Hungarian Publisher (Új Magyar Könyvkiadó)* and *Europe Publishers (Európa Könyvkiadó)* until his retirement in 1977. Central to his work were Hungarian-French cultural relations dating as far back as the 14th century. He published a number of books on the intellectual greats of France. His works include *The Comet (Az üstökös)*, novel (1957); *A Short Survey of Recent French Literature (A mai francia irodalom kistükre)* (1962); *The Magic of Paris (Párizs varázsa)* essays (1971), and *The Wonderful Life of Saint-Exupéry (Saint-Exupéry csodálatos élete)* (1987). He was awarded the gold medal of the City of Paris (1982) and the Prize of *Ordre des arts et des lettres* (1985). – B: 0883, 1257, T: 7456.

**Bajor, Gizi** (Gizella Beyer) (Budapest, 19 May 1893 - Budapest, 12 February 1951) – Actress. She studied at the Academy of Dramatic Art, Budapest (1914), and in the same year joined the National Theater (*Nemzeti Színház*), Budapest where, with the exception of two years, she worked until the end of her life. Her first success was in the title role of Géza Gárdonyi's *Annie (Annuska)* (1915) that secured her a place as a first rate artist of the Theater. Henceforth she was a cornerstone of the Theater's strategy for great successes. As a guest artist she often performed on stages of other theaters of Budapest. Her major roles include Miranda in Shakespeare's *The Tempest (A vihar)*; Titania in *A Midsummer-Night's Dream (Szentivánéji álom)*; Blanche in Csathó's *The New Relative (Az új rokon)*; Anna in B. Shaw's *Man and Superman (Tanner John házassága)*; Fruzsina in Zilahy's *Musical Clowns (Zenebóhócok)*, and Judit in *The General (A tábornok)*; Cyprienne in Sardou and Najac's *Let's Get a Divorce (Váljunk el)*; Phoebe in J. M. Barrie's *Quality Street (Vén leányok)*; Lavinia in O'Neill's *Mourning Becomes Electra (Amerikai Elektra)*; title role in Ibsen's *Nora*; Ásvayné in Harsányi's *The Mad Mrs. Ásvay (A bolond Ásvayné)*; Cleopatra in Shakespeare's *Antony and Cleopatra (Antonius és Cleopatra)*; Countess Diana in Lope de Vega's *The Gardener's Dog (A kertész kutyája)*; Anna in Tolsztoj-Volkov's *Anna Karenina*. Her feature film roles include *The Entchanted (A megbűvöltek)*; *Petőfi*; *Hallo Budapest*; *The Laughing Woman (A kacagó asszony)*; *The Virgin and the Kid (A szűz és a gödölye)*. She was a versatile actress, second to none in classical as well as modern dramas and a caring human being. During World War II she cared for persecuted persons in her home. Her life ended tragically. Her home became a Theater Museum. She was a recipient of the Corvin Wreath (1930), and the Kossuth Prize (1948). – B: 0883, 1031, 1427, 1090, T: 7103. → **Staud, Géza**.

**Bajza, József** (Joseph) (Szücsi, 31 January 1804 - Pest, 3 March 1858) – Poet, critic, journalist, editor. Descendent of a noble family, he completed his university studies in Pest. From 1822 his poems were published in contemporary almanacs. His study *The Theory of Epigrams (Az Epigramma teoriája)* generated great interest. Later he was engaged mainly in producing historical works. He was the director of the National Theater. In July 1849 he restarted the journal *Courier (Futár)*, published abroad earlier under the title *Opposition (Ellenzék)*, but only one issue appeared. After the surrender of the Hungarian Army at Világos on 13 August 1849, he went underground with poet Mihály (Michael) Vörösmarty; but by the end of 1849 he returned to Pest. He suffered a nervous breakdown caused by events of the ill-fated Revolution of 1848 and died from dementia. He was a member of the Hungarian Academy of Sciences. He was one of the leading figures of the literary renaissance of the Reform period in Hungary. His *Collected*

*Works, vols i-vi (Összegyűjtött munkái I-VI)* were published by F. Radics (1899-1901). A street in Budapest bears his name. – B: 1150, 1257, T: 7666.→**Vörösmarty, Mihály; Arad, Martyrs of; Bach Era.**

**Bakay, Kornél** (Cornelius) (Kalocsa, 27 May 1940 - ) – Archeologist, politician. His higher studies were taken at the University of Budapest, where he read Archeology and History. He was the pupil of the eminent archeologist Gyula (Julius) László. He received a scholarship from the Institute of Archeology of the Hungarian Academy of Sciences (1963-1965). Following this he worked for the Academy until 1972, first as contributor, then as head of its Archeological Institution. Since 1977 he has been Director of the Municipal Museum of Kőszeg. He began to teach in 1981, first at the Educational Academy of Szombathely and Eger, then at the University of Miskolc, where he is Professor and Head of the Department of Hungarian History. His field of research is Ancient Hungarian History, Archeology and History of Religion. In 2000 he participated in an archeological excavation in Kazakhstan; and in 2001 he was on a study trip in Armenia. His works include *Scythian Rattles in the Carpathian Basin and their Eastern Connections* (1971); *Founding of the Hungarian State (A magyar államalapítás)* (1978); *Die ständige Ausstellung des Jurisich Miklós Museums Kőszeg-Burg (The Permanent Exhibition at the Miklós Jurisich Museum in Kőszeg Castle)* 1983); *Who are we? Where did we come from? (Kik vagyunk? Honnan jöttünk?)* (1994); *Sacra Corona Hungariae (A Magyar Szent Korona)* (1994), and *Archeological Sources of Our Ancient History, vols I-III (Őstörténetünk régészeti forrásai I-III.* (2004, 2004, 2005). The University of Miskolc bestowed an Honorary Doctorate on him in 2000. – B: 0874, 1031, T: 7103.→**László, Gyula.**

**Bakfark, Bálint** (Valentine) (Greff, Graevius, Valentinus) (Brassó, now Braşov, Romania, ca. 1506 - Padua, 22 August 1576) – Musician and composer. He was a celebrated lute virtuoso throughout Europe. He was brought up in Buda at the court of King János I (John) (Szapolyai) (1526-1540) and later received noble status. After the death of King János he moved to Italy, then to France, where he was in close contact with the court during the first years of King Henry II's rule. As *Orpheus Pannoniae*, he traveled throughout Europe spending long periods at noble courts. Two of his lute compositions are still known. Many contemporary poets paid tribute to him. His works appeared in several editions in Hungary and throughout Europe. It was partly due to his artistry that Western composers became acquainted with Hungarian folk song motives. These appeared in the 16th century as *Ungaresca* or *Ungarischer Tanz (Hungarian Dance)*. He was also interested in French and Polish literature. – B: 0883, 1257, T: 7684.→**János I, King.**

**Bakócz, Tamás** (Thomas) (*erdődi*) (Erdőd, 1442 - Esztergom, 15 June 1521) – Archbishop, statesman. He was born into a family of serfs. He studied at the Dominican School of Szatmárnémeti (now Satu Mare, Romania). His university studies were at Krakow, Poland, and at Padua, Italy. King Mátyás I (Matthias Corvinus) (1458-1490) employed him at his chancellery. In 1486, he became Bishop of Győr. During the reign of Ulászló II (Wladislas) (1490-1516) he was chancellor; became Bishop of Eger in 1497, and supporter of the Habsburgs. In the same year he became Archbishop of Esztergom. He soon became wealthy and influential, virtually a “second king”. Became Cardinal in 1500, and Patriarch of Constantinople in 1507. At the election of a new pope in 1513, he

received eight votes. Pope Leo X commissioned him to conduct a crusade against the Turks, who were approaching Hungary. However, in 1514, the crusaders, together with their leader György Dózsa, turned against the nobles. Bakócz then turned away from the crusaders. After their defeat Bakócz withdrew from public life. He was a great supporter of humanist art. – B: 0883, 1031, 1257, T: 7103.→**Mátyás I, King; Ulászló II, King; Dózsa, György.**

**Bakony Mountain** – An elongated oval-shaped plateau made up of dissected, flat-topped blocks brought about by step-faulting; it is 400-500 m high, the highest point being Kőrishegy, 713 m. The Bakony Mountain is the westernmost part of the Transdanubian Central Mountains. It consists of Mesozoic beds, mostly limestone. It rises toward north because of the tilted tectonic movements. The tectonic fracture zone along the Devecser-Várpalota line forms its southern boundary; the Mór Graben, a tectonic subsidence, forming the eastern boundary; the Little Hungarian Plain constitutes its northern and western borders. Geologically the Bakony is a fault-block mountain. The surface of this limestone plateau is largely karstic, and this morphology lends to many parts of the Bakony Mountain a rather desolate appearance. Morphologically it is divided into three parts: (1) the most elevated *North Bakony*, consisting of three plateau blocks, those of Tés, Zirc and Bakonybél; (2) the *South Bakony* with some volcanic cones; its westernmost part is the Keszthely Range, the North and South Bakonys being separated by the structural line of the Séd and Torna Creek valleys; (3) the *Balaton Upland* directly north of Lake Balaton, separated from the South Bakony by the Veszprém-Nagyvázsony line and containing numerous volcanic cones composed of Pliocene basaltic lava, as well as the truncated cone of the 438 m. Badacsony, consisting of Pannonian clay overlain by basalt, with famous vineyards on its southern slopes. The Bakony Mountain has considerable mineral wealth, mainly as a result of the extraction of bauxite and manganese ores and mining of brown coal. Bauxite, in which Hungary is the second largest producer in Europe, is mined at (a) Halimba and Nyírád in the South Bakony, (b) Iszkaszentgyörgy in the North Bakony, and (c) Kislőd and Fenyőfő in the central part. Manganese ore is mined at Úrkút near Ajka. Brown coal of the Cretaceous age is mined at Ajka-Csingervölgy and of the Eocene age at Dudar, while of the Middle Miocene age at Szentgál and Várpalota. The Bakony Mountain is densely forested, mainly composed of beeches (*Fagus sylvatica*) and oak (*Quercus pedunculata*), as well as other deciduous trees; hence the alternative name *Bakony Forest* (German: Bakonyer Wald). There are some picturesque castles on this mountain, as those of Csesznek and Várpalota, also numerous monasteries, e.g. those of Zirc, Bakonybél, and the adjoining Pannonhalma. – B: 1068, 7456, T: 7456.

**Bakos, Gáspár Áron** (Gasper Aaron) (Siófok, Hungary, February 27 1976 - ) – Astronomer. He graduated from the Apáczai Csere János High School, Budapest. He worked in the Astronomy Department of the University of Budapest (1994-2000) as Research Fellow, Konkoly Observatory, Budapest (1998-2000), and an assistant at the Urania Public Observatory, Budapest from 1994. His higher studies were at the University of Budapest, in the Astrophysics Section, in 2000-2004; also Pre-doctoral Fellow at the Harvard-Smithsonian Center for Astrophysics, in 2001-2003. His Ph.D. was completed in 2004. He was a Hubble Postdoctoral Fellow, Harvard-Smithsonian Center for Astrophysics CfA, in 2001-2003. His research field was search for extrasolar planets with the HAT Network. His works includes: Bakos, G. Á. 2001, RTLinux driven HAT

for All Sky Monitoring submitted to ASP Conference Series (IAU coll. 183). In 2006 a team of astronomers and astrophysicists led by Bakos discovered the planet HAT-P-1 at a distance of 450 light years from Earth in the Lizard Constellation, spinning around one of a twin star. Its diameter is 38 % greater than that of Jupiter, but its mass is only half of that. This renders it unique and inexplicable among the more than 200 planets discovered so far. Bakos is a recipient of a number of awards including “Eminent Student of the Faculty of Sciences” award at the University of Budapest (1999) and the Dan David prize of the Tel-Aviv University (2003). – B: 1638, T: 7456.

**Bakos, Lajos** (Louis) (Kisbér, 27 December 1905 - Balatonfüred, 26 April 1979) – Bishop of the Reformed Church. He studied Theology at the Reformed Theological Academy in Pápa (1925-1929). He was on scholarship with *Stipendium Bernardinum* in Halle, Germany, and in Utrecht, Holland (1930-1932). He obtained a doctoral degree in Systematic Theology at the University of Debrecen in 1943, and was a minister at Balatonarács (1932-1964). During that time he taught Theology at the Reformed Theological Academy in Pápa (1949-1951) and was Minister in Veszprém (1964-1979). He was elected Bishop of the Transdanubian Church District in 1964. He was also a member of numerous social associations, as well as a recipient of several awards. His major works include *The Inspiration of the Holy Scripture (A Szentírás ihletettsége)* (1943); *Truths of Our Faith (Hitünk igazságai)* (1972); *I Believe and I Confess (Hiszem és vallom)* (1973), and *Festive Days and Sundays (Ünnepnapok, vasárnapok)* (1976). Remaining in manuscript form are his *Mission – Service (Küldetés – szolgálat)* (1975) and *As the Spirit Gave... (Ahogy a Lélek adta...)* (1978). – B: 0910, T: 7103.

**Baksay, Sándor** (Alexander) (Nagypeterd, 1 August 1832 - Kunszentmiklós, 18 June 1915) – Bishop of the Reformed Church, writer, literary translator. He studied Theology and Philosophy at the Reformed Theological College, Kecskemét (1847-1855). He was Assistant Minister in Kecskemét (1855-1856), teacher in the Kiskunhalas High School (1856-1862), Parish Minister in Érsekcsalád (1862-1865) and in Kunszentmiklós from 1866 to 1915. He was Bishop of the Danubian Church District from 1904, as well as a member of the Upper House of Parliament from 1908. His major works include *Footpath (Gyalogösvény)* short novels (1887); *Brambles (Szederindák)* short novels (1891); *Dame (Dáma)* (1899); *Encounter at the Puszta (Pusztai találkozás)*; *A Witch Called Patak (Patak Banya)* (1907); *Hungarian Folk Costumes (Magyar népviselet)* (1888), and *Hungarian Folk Customs (Magyar népszokások)* (1891). He translated Lucanus' *Pharsalia*, Homer's *Illiad* and *Odyssey* (i-ix chapters), and wrote numerous articles in various newspapers. His collected *Sermons vols. i-iv (Egyházi beszédek I-IV)* were edited by K. Hetessy (1930-1933). In his novels and short stories he accurately described the life of the Calvinist people of his birthplace and of the Kiskunság region. He was a member of the Kisfaludy Society, the Hungarian Protestant Literary Society, and the Hungarian Academy of Sciences. Today schools and streets bear his name. He was an Honorary Doctor of the University of Geneva, and was awarded the Franz Joseph Grand Cross. – B: 0910, 1257, T: 7103.

**Baktay, Ervin** (Gottesmann) (Dunaharaszti, 24 June 1890 - Budapest, 7 May 1963) – Orientalist. He wanted to become a painter and studied painting at the Academy of Applied Art, Budapest, then with Simon Hollósy in Munich, Germany. Following World War I, between 1926 and 1929, he studied the folk-life of India, including its religion,

philosophy and culture. He visited the locations where Alexander Csoma de Körös (*Sándor Körösi Csoma*) once lived. From 1930 to 1944 he was one of the editors of the periodical *The Globe (A Földgömb)*. He earned a Ph.D. from the University of Debrecen in 1933. From 1946 until his retirement in 1958, he was Deputy Director at the Ferenc Hopp East Asian Museum of Arts, Budapest. Simultaneously he lectured Indian Art History at the University of Budapest. At the invitation of the Government of India he visited the country again in 1956-1957. After his retirement he lectured in a number of countries on the Art of India. His more than 20 major works include *Rabindranath Tagore* (1921); *On the Roof of the World. In the Footsteps of Sándor Körösi Csoma in Western Tibet* (*A világ tetején. Körösi Csoma Sándor nyomdokain a nyugati Tibetbe*) (1930); *India, vols. i, ii* (1931, 2000); *Sanátana Dharma* (1936, 1991); *Hindustan* (1938); *The Wisdom of India (India bölcsessége)* (1943, 2000); *The Art of India (India művészete)* (1958, 1963, 1981), and *Sándor Csoma Körösi* (1962, 01963, 1981, 2000). Baktay also made literary translations. Some experts insist that Baktay's pseudonym was F.W. Bain. His statue is in the Park of the Hungarian Geographic Museum, Budapest. There is an Ervin Baktay Society and a Foundation. A School in Dunaharaszti bears his name. – B: 0883, 1031, T: 7103.→**Hollósy, Simon; Körösi Csoma, Sándor.**

**Bala Clan** – A Hungarian clan from the Árpád era. Their members are mentioned only in a few documents. The name was well known long ago as a family name, occurring usually among the serfs attached to a castle. – B: 0942, T: 7685.

**Balassa, Géza** (Felsőbaka, now Homi Prandorf, Slovakia, 10 March 1914 - Pozsony now Bratislava, Slovakia, 1994) – Archaeologist, historian. He completed his secondary school studies in Körmöcbánya (now Kremnica, Slovakia) (1933) and studied Lutheran Theology at the University of Pozsony (now Bratislava, Slovakia) (1933-1934). In the following year he studied at Pozsony Teachers' College and in 1949, he obtained a Diploma of Education in History and Geography. During the years 1935-1948 he taught at Zólyomberezná (now Březiny, Slovakia), Nagyszalatna (now Zvolenská Slatina, Slovakia), and Zólyom (now Zvolen, Slovakia). Between 1948 and 1952 he was Head of the Agricultural Archives of Radvány (now Radvaň nad Hronom, Slovakia). From 1952 to 1962 he was Head of the Archeological Department of the District Museum of Besztercebánya (now Banská-Bystrica, Slovakia) and authored its Museum Guide. He conducted archeological excavations around Zólyom in 1954, Pereszlény (now Preseľany, Slovakia) and Ipolyság (now Šahy, Slovakia), Hosszúhomok district in 1955, then at Gyügy (now Dudince, Slovakia) and Karvaly (now Jastrabá, Slovakia) in 1956, Korpona (now Krupina, Slovakia) in 1957, Rimabrézó (now Rimavske Brezovo, Slovakia), Tomalja (now Tomala, Slovakia) (in the Dobogó area) and Nagyszalatna in 1959, in the Besztercebánya region (Kápolna Cave, 1960) and at Derzsenye (now Drženice, Slovakia) and Vargede (now Hodejov, Slovakia) in 1962. From 1962 to 1977 he was Head of the Slovakian Office for the Protection of Historic Buildings and Monuments. His excavations of the remains of Medieval times include Nemesludrova (now Zemianska Ludrova, Slovakia) (1962-1963), the Castle of Znió (Znióváralka, now Kláštor pod Znievom, Slovakia) (1963), Bozók (now Bzovik, Slovakia), a Premonstrian provostship, later fortified, containing Romanesque, Gothic and Renaissance details (1966-1971), Gyügy, Roman bath (1969), Castle of Liptó (now Liptovský-Mikuláš, Slovakia) (1969-1973), Zólyomlipcse (now Slovenská Lupča, Slovakia), medieval monastery, and Zolna fort, (1971-1973), then Körmöcbánya, *Curia civitatis* and

Besztercebánya, the inner castle of the town (1973). He retired to Pozsony in 1977. His published works include *Contribution to the History of Zólyom (Hozzájárulás Zólyom történetéhez)* (1956); *Ancient Settlements in the Area of Gömör (Őskori települések Gömör területén)* (1965); *Ancient History of the Magyars (Magyarok őstörténete)* (1977), and *Novum castrum Lipto* (1980). He also published in Slovakian. His major exhibitions include the permanent exhibition of the Besztercebánya District Museum archaeological material (prepared in 1960), as well as that of the Madách Museum at Alsósztregova (now Dolná Strehová, Slovakia). – B: 1083, 1085, 1890, T: 7456.

**Balassa, Imre** (Emeric) (Szeged, 25 November 1886 - Nógrád, 4 February 1974) – Writer, journalist, dramaturgist, music critic. He acquired a diploma in stage management and acting at the Academy of Dramatic Art, Budapest (1907). He was assistant manager and secretary at the National Theater (*Nemzeti Színház*), Budapest until 1913. He was a war correspondent (1917-1919), and from 1919 he worked at various newspapers and wrote articles for the daily *New Generation (Új Nemzedék)* until 1939. Between 1946 and 1948 he was contributor to the weekly *The Morning (A Reggel)*. He founded the first artistic newspaper, the *Evening Life (Esti Élet)*. Between 1949 and 1967 he was the chief public relations officer and dramaturgist at the Budapest Opera House. Between 1952 and 1972 he regularly covered concerts. He was General Secretary of the Hungarian Writers' Association, Vice-President of the Lafontaine Society, and Vice-President of the Critics' Section of the Pen Club. He wrote excellent music commentaries in the decades following World War II. His works include *Stage Problems (Színpadi problémák)* (1912); *Christ (Krisztus)* novel (1928); *Kossuth*, novel (1928); *Molière*, novel (1938), and *Book of Operas (Operák könyve)*, with Gy. S. Gál (1951), *Erzsi Sándor (Sándor Erzsi)* (1968). – B: 0883, 1257, T: 7103. → **Kossuth, Lajos; Sándor, Erzsi.**

**Balassa, János** (John) (Sárszentlőrinc, 5 May 1814 - Pest, 9 December 1868) – Surgeon. He completed his medical studies in Vienna, where he also obtained his first post. Then he became Professor at University of Pest and Director of its Medical School. During the War of Independence (1848-1849) he was Director of the military hospital and became a prisoner following the collapse of the war. The foundation of the weekly *Medical Journal* was his idea. He set up the education and practice of modern surgery in Hungary and was one of the first in Europe to use general anesthesia. His study of abdominal hernias and the use of a laryngoscope in larynx operations were pioneering achievements. He also used new methods in plastic surgery and was ahead of his time in the conservative treatment of tubercular diseases of bones and joints, as well as in the use of thermotherapy in surgical practices. The Balassa János Medal was established in Hungary in memory of him and his work. The Szekszárd Country Hospital, a College and a Medal bear his name. – B: 0883, 0931, T: 7660. → **Markusovszky, Lajos; Plaster of Paris Bandage.**

**Balassa, Menyhért** (Melchior), *Comedy on the Betrayal of (Comoedia Balassi Menyhért árultatásáról)* – A political comedy dating from about 1565. It is the first Hungarian secular play. The author is unknown, although it was more likely written by someone belonging to the newly established Unitarian Church of Transylvania (*Erdély*, now in Romania). Pál (Paul) Karádi, a Unitarian preacher from Abrudbánya added a foreword and published it in 1569. It was the first ironical political text in Hungarian about a man who frequently changed sides. – B: 1150, 1257, T: 7659.

**Balassi, Bálint** (Balassa) (Valentine) (or Balassa) (Zólyom Castle, now Zvolen, Slovakia, 20 October 1554 - Esztergom, 30 May 1594) – Poet. He used both versions of his name

and was a distinguished poet of the Hungarian Renaissance. Based on false reports, his father, Captain of Zólyom Castle, was suspected of being involved with István (Stephen) Dobó in a conspiracy. He was captured in Pozsony and imprisoned, but escaped with his family and fled to Poland, where he wrote his first poem to console his parents. He took part in raids on border fortresses and continued the litigations started by his father against neighboring landlords. He had many love affairs and many ups and downs throughout his life.

In 1593-1594, he participated in the war against the Turks. He joined the army of Count Miklós (Nicholas) Pálffy, took part in the siege of Fejérvár and in the victorious siege of Pákozd. He retook his family castle at was a conspiracy. He was captured in Pozsony and imprisoned, but escaped with his family and fled to Poland, where he wrote his first poem to console his parents. He took part in raids on border fortresses and continued the litigations started by his father against neighboring landlords. He had many love affairs and many ups and downs throughout his life. In 1593-1594, he participated in the war against the Turks. He joined the army of Count Miklós (Nicholas) Pálffy, took part in the siege of Fejérvár and in the victorious siege of Pákozd. He retook his family castle at was captured in Pozsony and imprisoned, but escaped with his family and fled to Poland, where he wrote his first poem to console his parents. He took part in raids on border fortresses and continued the litigations started by his father against neighboring landlords. He had many love affairs and many ups and downs throughout his life. In 1593-1594, he participated in the war against the Turks. He joined the army of Count Miklós (Nicholas) Pálffy, took part in the siege of Fejérvár and in the victorious siege of Pákozd. He retook his family castle at Kékkő from the retreating Turks. He was wounded at the siege of Esztergom and a few days later he died from septicemia. The walls of Radvány Castle hid the copies of his love poems for nearly 300 years. They appeared by accident on 21 August 1874, among the pages of the Radvánszky Codex in the library of Baron Radvánszky, although the original versions of his poems have disappeared. Balassi was the first outstanding Hungarian lyrical poet. He invented and used new literary forms. In his lyrical love poems events are intertwined with experiences gained during the wars against the Turks. None of his poems was published during his lifetime, and mostly his religious and heroic poems were known and appreciated for about 300 years after his death. He was very well versed in serious music and many of the melodies he knew served as models for his poems. Balassi was the greatest figure of the second age of Hungarian Renaissance; and an outstanding representative of Hungarian poetry. He was the first classic poet of Hungarian Literature. – B: 0883, 1031, 1257, T: 7666.→**Dobó, István; Pálffy, Count Miklós; Radvánszky Codex; Codex Literature.**

**Balaton, Lake** – The largest freshwater body in Central Europe. It is situated 100 km southwest of Budapest in Transdanubia (*Dunántúl*), once Pannonia Province of the Roman Empire. It was formed by gradational subsidence along fault planes in a tectonic rift in the Earth's crust, along the southwest-northeast running “Balaton Lineament” during late Pleistocene and Early Holocene times (500,000 - 8,000 B.C.). It is the remnant of the “Pannonian Sea” of Late Miocene to Early Pliocene period (11 million to 0.5 million years). The Lake is 78 km long with varying widths between 6 and 12.5 km.

Its surface area is 598 km<sup>2</sup>, 106 m a.s.l. is a relatively shallow body of water with an average depth of a mere 3.3 m. Its feeder tributary is the Zala River at the western end of the lake. The excess water is drained from the lake at Siófok and this canalized waterway flows into the Danube near Szekszárd. The lake and its environment are home to a rich and diverse flora and fauna. A large number of rare and protected plant species are found in the area together with some strictly protected and rare animal species, such as the black stork (*Ciconia nigra*), black woodpecker (*Dryocopus martius*) and otter (*Lutra lutra*). There are 41 indigenous species of fish in Lake Balaton and its tributaries. In 1977 the government formed the Lake Balaton Highlands National Park with an area of more than 616 km<sup>2</sup>. The Kis-Balaton (Lesser Balaton) wetland area, a permanent Ramsar site (some 13 km<sup>2</sup>) forms part of it. About 250 bird species inhabit the area, among them 27 strictly protected ones, such as the spoonbill (*Platalea leucorodia*), or the long-eared owl (*Asio otus*). Walk-paths, educational trails and environmental showplaces explain the rich nature of the area to visitors from all over the world. Lake Balaton is one of the most significant natural treasures of Hungary, a unique ecological asset of the Central European region and a favored summer resort since the mid 19th century. – B: 1189, 7456, T: 7103, 7456.

**Balaton National Park** – The National Park was created in the centre of western Hungary on over 57,000 hectares in 1997. This is one of the most popular areas of Hungary for tourism including Central Europe's largest lake, the Balaton. Visitors find a host of cultural and natural attractions. The Lesser Balaton, one of the most valuable parts of the park, is a nesting site for close to 250 species of birds and among these at least a dozen are listed in the Red Data Book. The Tapolca Basin is noted for its volcanic caps and hills with vineyards on the lower slopes. Of the flora that survives on virtually bare rock surfaces the most noteworthy are the Mediterranean Fern of St. George's Hill and the Lip Fern (*Cheilanthes marantae*). This is the only place in Hungary where this plant is found. The climate of the low hills around Balatonfüred is characteristically Mediterranean and sub-Mediterranean. Within the park a few settlements are also protected. Salföld is one such village. There is a bird-watching tower on Kányavári Island and a buffalo reserve at Kápolnapuszta. B&T: 1546.

**Balázs, Árpád** (Szentes, 1 October 1937 - ) – Classical music composer. He studied at the Ferenc (Franz) Liszt Academy of Music of Budapest under Ferenc (Francis) Farkas (1959-1964) and at the Tchaikovsky Conservatory of Music, Moscow as a student of Khatchaturian (1967). He also attended the Santa Cecilia Conservatory of Music, Rome and was a student of G. Petrassi (1970). He was President of the Alliance of Hungarian Music Artists (1972-1990). Since 1990 he has been the leader of the Hungarian Section of the World Alliance of Music Societies. His works include *Musica Piccola* (1966); *Four Pictures (Négy kép)* (1981); *Prelude (Előjáték)* (1983); *Recruiting Fanfare Music (Fanfare verbunk)* (1985); *Concertino for Large Orchestra (Concertino nagyzenekarra)* (1992); *Singing Europe (Éneklő Európa)*, 7 pieces for mixed choir (1973-1998), also 10 works for orchestra, 10 cantatas, 2 oratorios, 200 pieces for choir and solo instruments, chamber pieces, 33 pieces for two clarinets, 7 musicals, film music and folk song variations. He also wrote books, such as the *Little Musical Alphabet (Kis zenei ábécé)* (1987). He is a recipient of the Ferenc Erkel Prize (1970), the Merited Artist title (1981) and the Pro Urbe Prize, Komárom (2001). – B: 0874, 1178, 1031, T: 7103.→**Farkas, Ferenc.**

**Balázs, Béla (1)** (Herbert Bauer) (Szeged, 4 August 1884 - Budapest, 17 May 1949) – Poet, writer, film esthete. He did his higher studies of Hungarian and German Literature at the University of Budapest. He was member of the Eötvös College. 1906 saw him in Berlin and Paris on scholarships. For a short while he was a teacher; then he worked at the Teachers' College of Budapest. He wrote poems that introduced him to the core team of the literary review *West (Nyugat)* and became a friend of poet Endre Ady and composers Béla Bartók, Zoltán Kodály and György (George) Lukács. He published a volume of poems *The Wanderer Sings (A vándor énekel)* in 1910. He fought and was wounded in World War I. In 1919 he became a member of the “Writers' Directorate” of the short-lived Hungarian Soviet (Council) Republic. After its fall he emigrated to Vienna (1919), where he wrote newspaper articles and his first major work on film-esthetics, the *Dersichtbare Mensch (The Visible Man)* (1924). Due to his leftist views he moved to Berlin in 1927, where he became involved in film-script writing and film producing, such as *Das Blaue Licht (The Blue Light)* with Leni Reifenstahl. He was artistic manager of the *Arbeiter-Theaterbund Deutschland* (Alliance of German Theater Workers). In 1931 he was invited and moved to Moscow, USSR, where he became Professor at the Academy of Dramatic Arts and continued writing poems, dramas, and essays on film-esthetics. He returned to Hungary in 1945 and became Professor at the Academy of Dramatic Arts and Director of the Film Science Institute. His works include *Der Geist des Films (The Spirit of Films)* (1930); *Der Film-Werden und Wesen einer neuen Kunst (Film: Beginning and Nature of a New Art)* (1949); *My Way (Az én utam)* collected poems (1945); *Bluebeard's Castle (A kékszakállú herceg vára)*, libretto (music by B. Bartók) (1910); *The Wooden Prince (A fából faragott királyfi)*, libretto (music by B. Bartók) (1912), and *Ballad of Panna Czinka (Czinka Panna balladája)*, libretto (music by Z. Kodály) (1948). He was a recipient of the Kossuth Prize (1949). A film-studio, a prize and a street bear his name. – B: 0883, 1257, T: 7103. → **Ady, Endre; Bartók, Béla; Kodály, Zoltán. Lukács, György.**

**Balázs, Béla (2)** (Várfölde, 15 March 1932 - ) – Engineer, businessman, diplomat. He studied at the Benedictine Secondary School (1942-1948) and at the Miklós (Nicholas) Jurisics Secondary School of Kőszeg (1948-1950). Graduated from the Polytechnic of Miskolc, where he studied Engineering (1950-1952). He obtained his qualifications in Petroleum Engineering from the University of Sopron (1953-1954). He received a scholarship and continued postgraduate studies of Applied Reservoir Engineering at the University of Alberta, Edmonton, Canada, where he received a B.Sc Degree. He worked at the Lovászi oilfield in Hungary (1954-1956). He actively participated in the 1956 Revolution. In November of 1956 he fled to Austria, then emigrated to Canada in 1957 and started working in the northern oil fields. From his earnings he paid the ransom to free his father from the Internment Camp of Kistarcsa. The Hungarian Court of Justice in Zalaegerszeg sentenced him in absentia to ten years' imprisonment for participating in the 1956 Revolution and Freedom Fight. He worked in various capacities, at the end as President of the James A. Lewis Engineering & Consulting Firm (1959-1982), Calgary, Alberta. In 1982 he established his own company, Capital Engineering Ltd. and became semi-retired in 2000. Between 1983 and 1995 he created and headed another oil company. He was Honorary Consul General of the Republic of Hungary for the Province of Alberta since 1991, and eventually that of Saskatchewan, until his retirement. He received the 1956 Commemorative Medal of Hungary in 1992, the Hungarian

Presidential Gold Medal in 1996. He is Officer of the Order of Merit of the Republic of Hungary (1994), the For Defense of Hungary Medal, 1st Class (2002), and the Pro Auxilio Civiona Hungarorum Medal (2003). – B: 1032, T: 7103.

**Balázs, Dénes** (Denis) (Debrecen, 17 September 1924 - Érd, 19 October 1994) – Geographer, writer on geography. He regarded Alexander Csoma de Kőrös, the great Asia researcher, as his role model. He began his career with the study of the karstic limestone cave region of the Aggtelek cave system. The exploration of the Freedom (*Szabadság*) Cave of Égerszög is linked to his name. His field studies in the geography of nature, over three decades, embraced five continents in 130 countries, resulting in the publication of several hundred scientific papers. During his travels, he had outstanding results in the study of deserts, karsts and volcanoes. In 1967 he organized and led the Hungarian-Polish Sahara expedition. He traversed the American continent from Alaska to Tierra del Fuego and extended his geographic explorations over Africa, Asia, Australia and the Oceanic islands. He related his traveling experiences in a delightful literary style, resulting in the publication of 27 books in five languages, some reaching publication of one million copies. He proved to be the most fertile scientific writer with a determining role in organizing societies, especially the Hungarian Karst and Cave Exploring Society (*Magyar Karszt- és Barlangkutató Társulat*), as well as the Hungarian Geographic Society (*Magyar Földrajzi Társaság*). He launched important journals, such as the *Karst and Cave* (*A Karszt és Barlang*) and also the *Geographical Museological Studies* (*Földrajzi Múzeumi Tanulmányok*). He established the Hungarian Geographical Museum (*Magyar Földrajzi Múzeum*) at Érd, southwest of Budapest. His work was recognized by a number of state and professional distinctions. He received the the Imre Vass Medal (1963), Great Lóczy Medal (1988), the Alexander Csoma de Kőrös Medal (1988), the Albert Szent-Györgyi Prize (1994), as well as the Ferenc Móra Prize. He was awarded the Otto Herman and Ottokár Kadic Medals by the Karst and Cave Exploring Society (1968), the Officer's Cross of the Order of Merit of the Republic of Hungary (1992), and he was elected as Honorary Freeman of the Town of Érd. – B: 0883, 1105, T: 7456.→ **Kőrösi Csoma, Sándor; Galántha, Judit.**

**Balázs, Ferenc** (Francis) (Kolozsvár, now Cluj-Napoca, Romania, 24 October 1901 - Torda, now Turda, Romania, 22 May 1937) – Unitarian minister, writer, poet. He studied at the Unitarian Theological College of Kolozsvár, then at Oxford in the UK, and at the University of Berkeley, California. He traveled the West Coast of the USA, Japan, Korea, China, Hong-Kong, Singapore, Burma, India and Asia Minor. He returned home to become first a teacher at the high school of Székelykeresztúr (now Cristuru Secuiesc, Romania). Then he was a minister at Mészkö until his death. He also organized a farmers' cooperative in Torda and was one of the initiators of the so-called "village research movement". He became involved in the *Transylvanian Helicon* (*Erdélyi Helikon*) group, an important society of Hungarian writers in Transylvania under Romanian rule. His books are *Fairy Tale River* (*Mesefolyam*) (1920); *Wandering All Over the World* (*Bejárom a kerek világot*) (1929, 1975, 1999); *Plans of Aranyosszék* (*Aranyosszéki tervek*) (1933); *Green Flood* (*Zöld árvíz*) (1936), and *Under the Clod* (*A rög alatt*) (1936). – B: 0879, 0876, 0877, 1257, T: 7103.

**Balczó, András** (Andrew) (Kondoros, 16 August 1938 - ) – Sportsman (Pentathlete), mechanic, politician. His sport career started at the Nyíregyháza Sport Club in 1954 and

continued at the Csepel Sport Club (1956-1973). He won five individual titles in 1963, 1965, 1966, 1967 and 1969, and five team titles in the modern pentathlon at the World Championships. He won the individual championship consecutively from 1963 to 1969. After placing fourth in the individual event at the 1960 Rome Olympics, he won a team gold medal in the same year. In 1968, at the Mexico Olympics, he won silver medal in the individual event and gold in the team event. In 1972, at the Munich Olympics, he won the individual title and a silver medal in the team event for a total of five Olympic medals: three golds, two silvers. He was a strong swimmer and runner and a consistent fencer. His overall record is the greatest of any modern pentathlete. His best event was cross-country running. His sports career was documented in the popular *Mission (Küldetés)*. He dominated modern pentathlon in the 1960s, and is the greatest figure of Pentathlon History. He always confessed his Christian faith. He wrote a book entitled *Delight Embedded in Suffering (Szenvedésbe ágyazott gyönyűség)* (2005). He is a recipient of the Hungarian Heritage Prize (*Magyar Örökség Díj*) (1996), and the Ferenc Csík Prize (2001). He is Sportman of the Nation (2004). – B: 1051, 1768, T: 7103. → **Balczó, Zoltán.**

**Balczó, Zoltán** (Nyíregyháza, 1948 - ) – Electrical engineer, politician. He completed his high school education in his native town. He obtained his Degree from the Department of Electrical Engineering of the Budapest Polytechnic. From 1971 to 1975, he was a designing engineer at the Power Station and Network Designing Company (*Erőmű- és Hálózattervező Vállalat*). Since 1975, he has been lecturing at the Kálmán Kandó Technical College. Since 1992, he has been active in politics; he became a member of the Hungarian Democratic Forum (*Magyar Demokrata Fórum – MDF*), which he left later; he could take part in patriotic politics by being a member of the Hungarian Life and Truth Party (*Magyar Igazság és Élet Pártja – MIÉP*); in October 1994, he became a member of this party's National Presidium and, from 1994 to 1998, he was elected to be the Member for the Municipal Assembly of Budapest. Following the 2002 elections, he resigned from his position early in 2003 and discontinued his membership. In October 2003, he joined the *For a Better Hungary Movement (Jobbik Magyarországért Mozgalom)* just being formed and, since then, he has been its Vice-President. Between 1998 and 2002, he was a Member of Parliament and, between 1999 and 2002, upon governmental request, he became Curator of the *Illyés Public Foundation (Illyés Közalapítvány)*. The initial program of the Movement for a Better Hungary is linked to his name, which was entitled “*Order Against Liberalism*” (*Rend a liberalizmus ellen*), and he also participated in the formation of the Gábor Bethlen Program (*Bethlen Gábor Program*). He represents the Euro-skeptic policy of the party and, he is a Member in the 2009 Euro-Parliament representing the *Party For a Better Hungary Movement – Jobbik* in Brussels. From 2010 he is a Member of Parliament and its Deputy Speaker as well. His fields of interest are education and energy-politics. He is the brother of András Balczó. – B: 0974, 1031; T: 7456. → **Balczó, András; Political Parties in Hungary.**

**Béldi Codex** – Manuscript donated to the Bishopric Library of Eger by Ferenc (Francis) Toldy, physician, author, Member of the Hungarian Academy of Science. It is a damaged manuscript, probably dating from the 16th century. It contains a partial copy of the Vienna Illuminated Chronicle (*Bécsi Képes Krónika*), as well as a Calendar for 1458-1459. It received its name from István (Stephen) Béldi, heraldist, Royal Assessor, one of the founders of the Transylvanian (Erdélyi) Museum Association. – B: 1031, 7617, T:

7617.→**Codex Literature; Toldy, Ferenc.**

**Bálint, Endre** (Andrew) (Budapest, 27 October 1914 - Budapest, 3 May 1986) – Painter, graphic artist. He studied graphic art at the Academy of Applied Arts, Budapest under Ferenc (Francis) Helbing (1930-1934), but was interested in modern artists as well, such as Picasso and Braque. In 1934 he was in Paris as assistant to photographer Robert Capa and friend of Lajos (Louis) Vajda. In Budapest he learned painting at the free school of János Vaszary and Vilmos Aba-Novák. He was member of the Szentendre artist colony. Later in life he created photomontages as well. His first collective exhibit was in 1938, followed by many more at home and abroad (e.g. Győr, Miskolc, Szentendre, Budapest, Paris, Brussels) He was influenced by the surreal style of the Szentendre School. His works include *Homesickness (Honvágy)* (1959); *Wonderous Fishing (Csodálatos halászat)* (1960); *Grotesque Burial (Groteszk temetés)* (1963); *Magical Night at Szentendre (Mágikus éjjel Szentendrén)* (1965), *Triptichon vols. i, ii, iii*, (1974). He also authored books such as *From the Diary of Lies (Hazugságok naplójából)* poems (1972); *Autobiographical Fragments (Életrajzi töredékek)* (1984), and *It Is All About My Fate (Sorsomról van szó)* (1987). He was a recipient of the Kossuth Prize (1985), the titles of Merited Artist (1973) and Outstanding Artist (1983). – B: 0883, 1124, T: 7103.→**Capa, Robert; Vaszary, János; Aba-Novák, Vilmos; Vajda, Lajos.**

**Bálint, Gábor** (*szentkatolnai*) (Gabriel) (Szentkatolna, now Cătălina, Transylvania, in Romania, 13 March 1844 - Temesvár, now Timișoara, Romania, 26 May 1913) – Linguist, orientalist. In childhood he learnt German from his father, later he learnt Hebrew, Greek, and Latin, and some western languages. When he matriculated, he spoke twelve languages; in his adulthood he knew 30 languages. He mainly studied in Vienna and Pest and became interested in eastern languages. The Hungarian Turkologist Ármin Vámbéry gave him assistance. Bálint soon compiled a book of Turkish grammar, still used today. As a law student at the University of Pest he became acquainted with the scholar János (John) Fogarasi, who was engaged in writing his famous dictionary of the Hungarian language at the time. In fact, the Hungarian Academy was just looking for a young linguist, who would travel to the eastern regions of the Russian Empire in order to study the Mongolian and Manchurian languages. Fogarasi recommended Gábor Bálint, who was sent to that region in the early 1870s. He first traveled to the Mongols living on the shores of the Caspian Sea, and eventually reached present-time Mongolia by 1874. During 1875-1877 he was an honorary lecturer at the University of Budapest and took part in the Southeast-Asian expedition of Count Béla Széchenyi, traveling through India as far as Indonesia, China and Japan (unable to enter Tibet) during 1877-1879. From 1879 to 1892 he worked in the Ottoman Turkish Empire; then he was teaching Arabic at the University of Athens. Later he became professor, head of the Ural-Altai Department at the University of Kolozsvár, Transylvania (now Cluj-Napoca, Romania), training some notable scholars. During Count Zichy's 1895 expedition he was working in the Caucasus Mountains. On the basis of his knowledge of eastern languages he contended that Hungarian was member of the "Turanian" language family of some 150 million people, thus opposing the concepts of József Budenz and Pál Hunfalvy. During the "Ugor – Turkic (linguist) war" he did not take sides, and he adhered to his "Turanian" concept despite considerable opposition. His two books and compiled works were published in the early 1990s. In his birthplace in Transylvania, the Gábor Bálint Cultural Society was founded on 24 March 1990 to acquaint the public with his Oriental linguistic work and to

keep his memory alive. – B: 1031, 1068, 1553, 1843, T: 7456.→**Vámbéry, Ármin; Széchenyi, Count Béla; Zichy, Count Ágost; Hunfalvy, Pál; Fogarasi, János.**

**Bálint, György** (George) (Budapest, 9 July 1906 - Sztarij Nyikolskoje, Soviet Union, 21 January 1943) – Writer, journalist, critic. He studied commerce at the Academy of Commerce, Budapest. From 1924 to 1939 he was a contributor to the journal *Evening (Est)*. In the meantime he visited a number of European countries including Italy, France, Norway and England. He wrote articles in German, English and Hungarian for leftist newspapers, such as the *Pest Diary (Pesti Napló)*, *Arbeiterzeitung*, *Pester Lloyd*. During World War II he served in a forced labor unit. He died in a military hospital in the Soviet Union. His writings are characterized by brave humanism. His works include *In the Captivity of Time (Az idő rabságában)* (1935); *Icefloes, Books, Beggars (Jégtáblák, könyvek, koldusok)* (1937); *In Praise of the Animals (Az állatok dicsérete)*, (1940), and *The Uprising of Words (A szavak felkelése)* collected articles (1947). – B: 0883, 1257, T: 7103.

**Bálint, Lajos** (Louis) (Újpest, 26 September 1886 - Budapest, 5 March 1974) – Critic, writer, dramaturgist, literary translator. He studied at the Universities of Budapest and Berlin. He was one of the founders of the Thalia Company (*Thália Társaság*) in 1904, and served as its secretary until 1906. He wrote articles for the *Weekly (Hét)*. In 1910 he became theater critic of the *Hungarian Newsletter (Magyar Hírlap)*. He joined the National Theater (*Nemzeti Színház*) in 1915, where he worked as secretary and dramaturgist. He also headed the literary section of the Geniusz Publishing Co. Bálint was one of the founders of the Hungarian National Jewish Educational Society (*Országos Magyar Izraelita Közművelődési Egyesület – OMIKE*). During 1945-1947 he was Executive Secretary of the Hungarian Writers' Association (*Magyar Írók Szövetsége*). From 1953 until his retirement he was Assistant Director of the Authors' Copyright Office (*Szerzői Jogvédelmi Hivatal*). Several of his dramatic plays were performed, including *Maria Baskircsev* (1936), *Csinom Palkó*, script (1951). He wrote about the world of artists in his *Dancers and Artists (Táncosok és artisták)* (1913); *Stage Door (Művészbejáró)* (1964); *Balcony and Box (Karzat és páholy)* (1967); *Thunderous Applause (Vastaps)* (1969), and *Brush and Chisel (Ecset és véső)* (1973). He translated and adapted more than 100 plays. – B: 0883, 1257, T: 7617.

**Bálint, Sándor** (Alexander) (Szeged, 1 August 1904 - Budapest, 10 May 1980) – Ethnographer, folklorist, researcher of Roman Catholic Folk Heritage and the life of peoples in the area of Szeged. He studied at the Roman Catholic High School and at the University of Szeged (1922-1927); became a University Docent, then an instructor at the Teachers' Training College of Szeged. He was a Member of Parliament representing the Democratic Party (1945-1948). Between 1947 and 1951 he was Professor of the Ethnography Department at the University of Szeged. Later he was accused of subversive activity against the Communist State, indicted and sentenced to a prison term. He retired in 1966. His works include *Festivals of Our People (Népünk ünnepei)* (1938); *An Ethnography of the Year (Az esztendő néprajza)* (1942); *Vocabulary of Szeged (Szegedi szótár)* (1957); *Dialogues and Famous Sayings of Szeged (Szegedi párbeszéddek és jeles mondások)* (1972); *Christmas, Easter and Pentecost (Karácsony, Húsvét és Pünkösöd)* (1974); *Pilgrim Hungarians (Búcsújáró magyarok)* (1994), and *Breviary, Parts of a Notebook (Breviárium, naplórészletek)* (1997). – B: 0881, 0879, 0876, 0877, 1257, T:

7103. → **Trogmayer, Ottó.**

**Bálint, Tibor** (Kolozsvár, now Cluj-Napoca, Romania, 12 June 1932 - Kolozsvár, 28 January 2002) – Writer, literary translator. He came from a poor family; his secondary studies were at the Reformed College of Kolozsvár. His higher studies of Hungarian Literature were at the University of Kolozsvár (1953-1955). Between 1953 and 1955 he worked at various newspapers; from 1967 to 1992 he was Editor of the children's magazine *Sunshine (Napsugár)*. He was a multitalented author. His works include *Quiet Street (Csendes utca)*, short stories, sketches (1963); *Black Peter (Fekete Péter)*, short stories (1967); *Vision after Mass (Látomás mise után)*, short stories (1979); *I was the Emperor (Én voltam a császár)*, tales, stories (1984), and *Endless World Championship (Végtelen világbajnokság)*, (1999). He translated works of Romanian writers including Eugen Barbu and Ion Minulescu. He was a recipient of, among others, the Prose Prize (1969, 1979), the Tibor Déry Reward (1992), the Krúdy Foundation Prize (1992), the Soros Foundation Prize (1995), and the Sándor Márai Prize (2002). – B: 0874, 0878, 1257, 1031, T: 7103.

**Balkan Entente** – An Alliance created by a pact between Greece, Yugoslavia, Romania and Turkey on 9 February 1934, for the defense of their borders and for coordinating their foreign policies. Assisted by French diplomacy, it set out primarily to prevent the expansion of the German and Italian Axis, as well as to oppose Hungary in its revisionist policies. Before the outbreak of World War II, when Romania became a German ally, the Alliance was dissolved. – B: 1138, T: 7668.

**Balla Cave** – A cave located in the Bükk Mountain, about 110 km northeast of Budapest, discovered in 1909. It contains two distinct diluvial strata of anthropological significance. The yellowish upper stratum yielded a human skeleton from the late Ice Age, that of a child of 1.5 years of age, representing the Magdalenian Culture. The skeleton already displays many of the features that are characteristic of *Homo sapiens* and is now preserved in the Geological Institute of Budapest. The stratum below the Cave is greenish-gray and yielded large quantities of bones of *Ursus spelaeus*, the cave-dwelling bear of the Pleistocene Age as well as findings from the *Proto-Solutrean Culture*. – B: 1178, 1020, T: 7656.

**Ballad** – A simple song, sentimental, romantic or narrative composition of several verses, each sung to the same melody, characteristic of the Middle Ages. Hungarians refer to it as the “long song”, and “history and story in song”; they are also known as “old songs” “ancient songs”. Typical for this genre is the presentation of a series of events in a solemn manner, as well as in a condensed and discursive style. This art form occupies a major place in Hungarian folk poetry. Early folk ballads appeared in oral folk traditions. Through them we know about the *Ballad of László Fehér (Fehér László)* (1547), *Szilágyi and Hajmási (Szilágyi és Hajmási)* (1561). Codices, songbooks and other language-related relics prove that the linguistic style of the Hungarian ballad reflects that of the 16-17th centuries. However, in their subject matter as well as in literary style, they preserve many even earlier memories. For example, the *The Beautiful Girl Julia (Júlia szép lány)* contains poetic images typical of the mindset before the adoption of Christianity. For instance, the ballad *Izsák Kerekes* contains expressions from cultures prior to the Settlement Period (896) and conversion to Christianity. The ballad *The Wife of*

*Stonemason Kelemen (Kőműves Kelemenné)* is based upon beliefs that connect it to pre-Christian cultures. These ballads are based on the life and activity of once existing real people. – B: 1134, T: 7684

**Balla, D. Károly** (Charles) (Ungvár, now Uzhhorod, Ukraine, 17 January 1957 - ) – Writer, poet. His higher studies were at the State University of Ungvár. He studied Physics until 1979, and Philology between 1980 and 1984). He was Assistant Editor, later Editor of the Hungarian section of a Ukrainian textbook publisher at Ungvár, and editor of the literary section of the newspaper *Carpathian True Word (Kárpáti Igaz Szó)*. From 1989, he was a free-lance writer and President of the Attila József Creative Community. He was founding Editor of the *Sixth Pipe (Hatodik Síp)*, the first Hungarian literary periodical in Sub-Carpathia, Ungvár (1989-1993). In 1992, he established the *Galeria Publishers (Galéria Kiadó)*. Since 1993, he has been Editor-in-Chief of the literary magazine *Pan's Pipe (Pánsíp)*. He is a member and presidium member of the Hungarian Writers Union (1990). In 2007 he committed a "virtual" suicide; since then he writes his "posthumous" works. His main works include *Dream Music (Álmodj zenét)*, poems (1979); *Recsitativi*, poems in Ukrainian translation (1983); *There is Fire Somewhere (Valahol tűz van)*, short stories, novels, plays (1988); *Hungarian Minor(ity) Schizophrenia (Magyar kis[ebbségi] skizofrénia)*, articles (1994); *On the Ditch-bank (Árokszélen)*, poems (1996); *With a Dead Bird (Halott madárral)*, poems (1999); *Metaphors of Homelessness (A hontalanság metaforái)*, articles, essays, confessions (2000), and *Minority Power Failure under the Schengen Wall (Kisebbségi áramszünet a schengeni fal tövében)* (2001). Since 2007, he lives in seclusion, but still writes. He is a recipient of the Berzsenyi Prize (1993), the János Arany Reward (1996), the Quasimodo Prize (1998), and the Attila József Prize (2000). – B: 0874, 0878, 1031, T:7103.

**Balla, Kálmán** (Coloman) (Pozsony, now Bratislava, Slovakia, 16 February 1954 - ) – Poet. He completed his high school education in Pozsony, and later obtained his teacher's qualifications in Hungarian and English from the Arts Faculty of the University of Budapest (1973-1978). He was Editor at the Madách Publishers of Pozsony (1978-1987); Editor for the *Literary Review (Irodalmi Szemle)* (1987-1990) and from 1989 Editor for the weekly *Day (Nap)*. He was a founding member of the Pen Club of Pozsony in 1989, and member of the Hungarian Writers' Union from 1991. His works include poems, literary and cultural articles, critiques, studies, essays, as well as translations from Slovakian and Czech. He published in the *Literary Review (Irodalmi Szemle)*, and in the periodical *New Youth (Új Ifjúság)* both from 1972; in the *Sunday New Word (Vasárnapi Új Szó)* from 1976, and in the *Week (Hét)* from 1979. He co-translated *The Identity Awareness (Az azonosság tudata)* by V. Havel (1991), and *The White Charger (A fehér paripa)*, a novel by K. Houba, translated by K. Balla; *The New General Collection (Új Általános Gyűjtemény)*, Part 4, edited by K. Balla (1985); Part 6 (1987), *Fire Castle (Tűzpalota)*, love poems by Hungarian poets in Czechoslovakia. He is a recipient of the Madách Prize (1988). – B: 1083, 0878, 1257, 1890, T: 7456.

**Balla, László** (Ladislav) (László Bakó until 1956) (Pálóc now Pavlovce nad Uhom, Slovakia, 23 July 1927 - Ungvár, now Uzhhorod, Carpatho Ukraine, 28 October 2010) – Writer, poet, journalist, literary translator. His higher studies were at the Academy of Applied Arts, Ungvár (1945-1946), where he studied sculpture; then he continued his studies at the University of Pécs, Hungary in 1946. He was manager of the Fine Arts

Salon of Sub-Carpathia (1946-1947). From 1947 to 1951 he was a text-editor at the newspaper *Carpathian True Word* (*Kárpáti Igaz Szó*). Afterward, he worked as a freelance journalist and editor, and served as boardmember of the Ukrainian Writers Union. He was the first Professor of Hungarian Literature at the University of Ungvár (1954-1960). Since 1987, he has been President of the Gizella Drávai Hungarian Academy of Applied Art. His works include *Summer Flames* (*Nyári lángok*), poems (1961); *This is the Town* (*Ez az a város*) reports (1962); *Barren Clouds* (*Meddőfelhők*) novel (1964); *Embers in the Snow* (*Parázs a hóban*) short stories (1967); *Shining, Fluttering, Trembling Landscapes* (*Fényes, lobogó, remegő tájak*) artist portraits (1975); *In Total Light* (*Totális fényben*), short stories and a novel (1983); *The Great Nothing* (*A Nagy Semmi*), novel (1994); *They Meet in Infinity* (*A végtelenben találkoznak*) (1996), and *On the Border of Being* (*A lét határán*) (2001). His other works include youthful poems, novels and translations from Russian, Ukrainian, as well as textbooks. He was a recipient of many distinctions, including the Ivan Franko Prize (1995), and the Lajos (Louis) Nagy Prize (1998). – B: 0874, 0878, 1257, T: 7103.

**Balla, Péter** (Hajdúszoboszló, 22 August 1908 - Budapest, 11 December 1984) – Folksong collector, violin teacher, religious leader. His higher studies were at the National Music School (*Nemzeti Zenede*) starting in 1923, and the Ferenc (Franz) Liszt Academy of Music, Budapest, where he studied violin under János (John) Koncz, and graduated in 1938. He took up folksong collecting work, and set out to know the life of Szeklers in Bukovina. In it he followed he method of László Lajtha. During his lifetime he was four times in Romania: January 1933, summer of 1933, summer of 1934, and summer of 1956. His collecting tour included *Józseffalva, Andrásfalva, Istensegíts, Hadikfalva és Fogadjisten*, and also Csöbörösök (Cioburciu), Sába (Saba). His collecting tour in Hungary included *Tiszacsege, Hortobágy, Dél-Dunántúl, Csongrád, Somogy, Tolna, Rimóc* in County Nógrád, *Vízvár, Sárpilis, Lápafő, and Algyő*. With his phonograph he collected several hundred folksongs. He was the National Song-Secretary of the *Soli Deo Gloria – SDG* Student Alliance of the Reformed Church (1938-1945), then, he was the Song-Secretary of the Reformed General Convent (*Református Egyetemes Konvent*) of the Reformed Church in Hungary until 1952. From 1952 to 1948 he worked at the Folk Art Institute, Budapest, popularizing folklore research. From 1958 to 1972 until his retirement he was a violin teacher at Monor; thereafter he lived at Vecsés. His works include a study entitled *Folksong Collection Among the Szeklers of Bukovina* (*Népzeneigyűjtés a bukovinai székelyek közt*) was published in the Ethnography periodical (1935). Fifteen pieces of his Bukovina Collection appeared in the *Little Calendar of Szeged* (*Szegedi kis Kalendárium*) with the engravings of György (George) Budai (1935); *Little Hungarian Songbook* (*Kis magyar Daloskönyv*), summary of his folksong teaching (1939); *Little Songbook* (*Kis énekeskönyv*), 500 pieces, 100,000 copies (1948); *Sing Along* (*Dalolj velünk*), *Folksongs from Upper Hungary* (*Felvidék*, now Slovakia (1956); *Four Bouquets of Folksongs* (*Négy népdalcsozor*) for choirs (1961); *Folksongs of Vecsés* (*Vecsési népdalok*) (1970), and *Sing a New Song to Him* (*Új éneket mondjunk Öneki...*) with J. Cseh and L. Kálmán (1986). Some of his works also appeared in record collections of the Hungarian Radio, and of the Ethnographic Institute (*Néprajzi Intézet*), Budapest. Péter Balla is regarded as “The Apostle of the Folk Song”. His name is added to the great folksong collectors: Béla Bartók, Zoltán Kodály, Lajos (Louis) Bárdos and Béla Vikár. There is a memorial plaque is on the wall of his house in Vecsés.

He received the Izraeli Yad Vashem International Prize for rescuing persecuted Jews in 1944, posthumously in 1995,– T: 0883, 1031, T: 7103.→**Lajtha László; Bartók, Béla; Kodály, Zoltán; Bárdos, Lajos; Vikár, Béla; Kálmán, Lajos; Szeklers; Bukovina.**

**Ballads About Convicts and Outlaws** – These are in the form of folk poetry. The 19th century classical ballad style is rooted in them. Loose in form and with many true-to-life and realistic traits, they perpetuate the legendary deeds of outlaws and highwaymen hiding in the reeds and forests to escape being pressed into military service, or from the extortions of those who oppressed the serfs. Their favorite heroes are *Bandi Angyal, Imre Bogár, Patkó and his Companions, Vidróczki and Marci Zöld*, famed in the old traditions of robbing the rich and helping the poor. They are typical folk heroes who dressed in splendid clothes, rode magnificent horses, engaged in combat over and over again with the hostile forces of state power, and the gendarmerie. Performer and audience alike sympathize with the tragic inevitability of their capture, their languishing in prison, and facing death by hanging. – B: 1136, T: 7659.→**Highwaymen’s Time; Sobri, Jóska; Savanyú, Jóska; Vidróczki, Márton; Zöld, Marci; Rózsa, Sándor.**

**Ballagi, Mór** (Maurice) (Móric Bloch until 1848) (Inóc, 18 March 1815 - Budapest, 1 September 1891) – Linguist, theologian. From 1829 he studied at the Jewish *Jeshivas* of Nagyvárad (now Oradea, Romania), and from 1831, at the *Beth-Hammidrash*, Pápa. He wanted to be a Talmud teacher. He was a private tutor for a while. Thereafter he read Philosophy at the Reformed College, Pápa, where he came under the influence of Professor Lajos (Louis) Tarczy (1836-1837). He studied engineering in Paris in 1839-1840, later he read Philosophy and Theology at Tübingen University, Germany, where he obtained a Ph.D. He converted to the Lutheran faith and taught at the Lutheran Lyceum of Szarvas (1844-1848). He participated in the War of Independence as captain (1848-1849). After its defeat he was detained; later he took up farming on a rented farm. From 1851 he taught Oriental languages and biblical exegesis at the Reformed Theological Academy of Kecskemét. Between 1855 and 1877, he was Professor at the Reformed Theological Academy of Budapest. He was also a newspaper and calendar editor, and defended the cause of language reform. His works include *Collection of Hungarian Parables and Proverbs, vols. i-ii (Magyar példabeszédek és közmondások gyűjteménye I-II)*, (1850, 1855); *A Textbook of Hebrew Elementary Grammar (A héber nyelv elemi tankönyve)* (1856, 1872); *Language Reform and Language Corruption (Nyelvújítás és nyelvrontás)* (1857); *Biblical Studies (Bibliai tanulmányok)* (1865-1888); *A Complete Hungarian Vocabulary, vols. i-ii (A magyar nyelv teljes szótára, I-II)* (1866, 1871, 1998); *The Origin of New Testament Writings (Az újszövetségi iratok keletkezése)* (1872), and *The Fight of Protestantism against Ultramontanism (A protestantizmus harca az ultramontanizmus ellen)* (1867). He was the first member of Jewish extraction of the Hungarian Academy of Sciences (corresponding 1855, regular 1858). From 1861 he was a Member of Parliament. He was the very first representative of Jewish Literature in Hungarian – B: 0879, 0876, 0877, 0932, 1257, T: 7103.→**Tarczy, Lajos.**

**Ballpoint Pen** – A modern writing instrument with metal or plastic outer casing. Its main inner components are a narrow tube that holds glycerine mixed with dye or graphite and a rotating ball in a jaw that transfers the dye onto the paper during writing. László József (Ladislav Joseph) Bíró of Argentina invented it. Hence it is also referred to as the Biro pen or simply “biro” after its inventor’s name. – B: 1138, T: 7662.→**Bíró, László József.**

**Baló, György** (George) (Budapest, 14 June 1947 - ) – Journalist. His higher studies were at the University of Budapest, in Hungarian, English and German Language and Literature (1970). From 1970, he has worked at the Hungarian Television filling various posts: at the TV News; at editorial office for foreign politics; on the program *Moving World* (*Mozgó világ*). He was Manager of TV2; Editor-in-Chief of the program *End of the Day* (*Napzárta*); *Chalk Circle* (*Krétakör*); *It's Topical* (*Aktuális*); *The Week* (*A hét*); *The Evening* (*Az Este*), *Tuesday 21* (*Kedd 21*); *Evening Express* (*Esti gyors*); *The Freedom of Speech* (*A szólás szabadsága*); was Manager of TV Electoral Office (1989-1990). In 1997-1999, he was Managing Director of TV3; since 2000, he has been its Program Director. Between 1986-1989, he was Co-President of the of Hungarian Film and TV Arts Society; in 1989 was President of the Alliance of Hungarian Journalists; he was a founding member of the New March Front (*Új Márciusi Front - ÚMF*) in 1988. From 1982 to 1988, and in 2003, he was a presidium member of the International Public TV (INPUT); and President and Member of the jury at international TV festivals (eg. Prix Italia, Banff, Berlin). His works include *Book of Facts* (*Tények könyve*) (1988-1989). He is regarded as one of the leading liberal journalists. He is a recipient of the Ferenc Rózsa Prize (1982), the Béla Balázs Prize (19889), and the Pulitzer Memorial Prize (1991). – B: 0874, 1031, T: 7103.

**Balog, Zoltán** (Ózd, 7 January 1957 - ) – Minister of the Reformed Church, politician. He graduated from the Reformed College of Debrecen in 1976, and worked as a laborer at the Ironworks of Diósgyőr (1976-1977). He did his higher studies at the Reformed Theological Academies of Debrecen, Budapest, Berlin and Halle (1978-1983); he also worked in a Catholic Social Home for one year. Between 1983 and 1987 he was Parish Minister in Maglód, serving five diaspora congregations. In 1987-1989 he pursued postgraduate studies at Tübingen, on a scholarship from the World Council of Churches. From 1989 he was a theological counselor of the Conference of European Churches. In 1989-1991 he was a sessional lecturer at the Reformed Theological Academy of Budapest, lecturing on New Testament topics; between 1991 and 1994 he was a counselor on Church Affairs for the parliamentary fraction FIDESZ (Alliance of Young Democrats – *Fiatalkorú Demokraták Szövetsége*). From 1993 to 1996 he was a scientific co-worker at the Ecumenical Institute of the University of Bonn. Since 1996 he has been Parish Minister in the German-speaking Reformed Congregation, Budapest. From 1988 to 2002 he was an advisor to the Prime Minister, and in 2002-2003 he worked for the President of Hungary. In 2006 he became a Member of Parliament for FIDESZ. He was Chair of the Human Rights Commission of the Parliament. In 2010 he was re-elected Member of the Parliament; and as Secretary of State of the Ministry of Justice and Public Administration, he is Secretary of State for the program “Closing the Gap Between Social Groups” (*Társadalmi Felzárkózásért Felelős Államtitkár*) of marginalized groups. He wrote a number of articles, essays and papers in Hungarian, German, English and French. His works include *Mitarbeiter des Zeitgeistes* (*Co-worker to the Spirit of the Times – A korszellem munkatársa*) (1997), *Die Ökumene und ihre Beziehungen zum sogenannten Osteuropa...* (*The Ecumene and its Relationships to the so-called Eastern Europe... – Az Ökumené és kapcsolata az úgynevezett Kelet-Európával...*) (2006). – B: 0874, 1633, T: 7103, 7456. → **Gypsies in Hungary.**

**Balogh, André** (Endre) (Szentes, 1940 - ) – Space scientist. He attended high school in Budapest and Esztergom. He was still in high school at the time of the 1956 Revolution,

when he emigrated to France, where he completed his studies and obtained the *Diplome d'Ingénieur Civile des Télécommunications* in 1964. He studied Engineering; but graduated as a physicist in 1964. The scholarship of the European Space Agency (ESA) made it possible for him to study space science at the Imperial College, London. There he met Nobel Laureate Dénes (Denis) Gábor, and decided to dedicate himself to space science. He is currently professor at the Imperial College and works at the Blackett Laboratory. His field of research is the magnetic field of planets, and the solar system: its origin, nature and effects. He is the principal researcher of the "Ulysses" magnetic field telescope program. He also participates in the "Cluster" project that dispatched four identical satellites to explore the Earth's magnetic field, called the magnetosphere. His main ambition is to explore the magnetic field of the planet Mercury. His books include *The Heliosphere Through Solar Activity Cycle*, co-authored with Steven T. Suess (2007); *Comparative Aeronomy*, editors: André Balogh, A. F. Nagy, T. E Craves, M. Mendilo and I. Müller-Wodarg (2008), *Planetary Magnetism* by U. R. Christensen, editors: A. Balogh, K-H- Grassmeie. D. Bauer (2009). – B: 1043, 1031, T: 7103

**Balogh, Edgár** (Kessler) (Temesvár, now Timișoara, Romania, 7 September 1906 - Kolozsvár, now Cluj-Napoca, 19 June 1966) – Writer, critic. He attended the Faculty of Philosophy of the German University of Prague, and was one of the founder-organizers of the *Sarló* (*Sickle*) Movement of the Czechoslovakian Hungarian youth. From 1931 he jointly edited with Zoltán Fábry the left-wing journal *The Way* (*Az Út*). He was expelled from Czechoslovakia in 1935, and returned to his Transylvanian birthplace, where he became correspondent for the periodical *Our Age* (*Korunk*). Between 1941 and 1944 he was Editor at the journal *People of the East* (*Kelet Népe*) in Kolozsvár; thereafter, from 1944 to 1948, he was Editor-in-Chief of the publication *Bright Light* (*Világosság*). He was imprisoned in 1949 on trumped-up charges; rehabilitated in 1956, then became Editor-in-Chief of *Our Age* (*Korunk*), and gave lectures at the University of Kolozsvár. His works include *The True 1848* (*Az igazi 1848*) (1948); *Test of Strength 1924-1934* (*Hétpróba, 1924-1934*) autobiography (1965); *Winged Altar* (*Szárnyasoltár*) narratives (1978), and *Bridge Builders in Transylvania 1944-1946* (*Hídverők Erdélyben 1944-1946*), selected articles (1985). He summarized his life experiences thus: "In my life, on all sides, in all social systems, I had to confront wickedness, mortal hatred, terror and anti-humanism". He was a recipient of the Romanian Order of the Star, 3rd class, the August 23 Romanian Order of Merit, 3rd class, and the Hungarian Order of the Banner (1976). – B: 0878, 1257, T: 7456. → **Fábry, Zoltán**.

**Balogh, Béla** (Székesfehérvár, 1 January 1885 - Szentendre, 30 March 1945) – Film-director. He was born into a family of actors, conductor and playwright. He trained to be an actor from a young age. In 1904 he became member of the City's Park Stage (*Városligeti Színkör*), Budapest, its nickname was "Penny Art-institute" (*"Filléres Műintézet"*). He later worked in the countryside in musical productions and as director, returning to the Capital in 1908; working in Újpest, and from 1911, in Budapest, in the Royal Orfeum, as a stage inspector in the Opera House of Budapest; he also managed a small movie theatre. After serving one year in World War I, he simulated neurosis, was declared disabled, and was discharged from the army. Balogh then founded with others the *Astra Film Factory*, (*Astra Filmgyár*) becoming its first artistic director. In 1919 the German *Star Film Company* (*Star Film Gesellschaft*) invited Balogh to work as a director in their new studio in Pasarét, Budapest. Although he received foreign offers, he turned

them down. During the Hungarian (Soviet) Republic in 1919, his films were banned. Between 1920 and 1924, he was the chief director of the *Star Studio*; but he was pushed into the background, which made him depressed. In 1926 he moved to Berlin but fell ill and returned Hungary. He moved back to Berlin with his family, living there between 1931 and 1933. From 1935 he started directing again, producing his memorable movies, including *Édes mostoha* (*Dear Stepmother*) (1935); *Tomi, a megfagyott gyermek* (*Tommy, the child who froze to death*) (1936) (the sound version of his 1921 film); *Havi 200 fix* (*Monthly Salary of 200*) (1936), and *Úrilány szobát keres* (*A Young Lady is Looking for Lodgings*) (1937). He worked together with the famous stars of his era, such as Pál (Paul) Jávor, Gyula (Julius) Kabos and Antal (Anthony) Páger. In 1941 he started a new company, Balogh Film LLC, producing two films during World War II, the last one being *Ópiumkeringő* (*Opiate Waltz*) with actress Katalin (Catherina) Karády (1943). Béla Balogh directed 50 silent and 17 sound films. He and his family survived the war in their cottage in Leányfalu, but soon after he died. He was one of the pioneers, and the prominent film-director in both silent and sound productions of the early 20th century. There was a Film Studio named after him in Budapest (1960-1991). – B: 1031, T: 7103. → **Jávor, Pál; Kabos, Gyula; Páger, Antak; Karády, Katalin.**

**Balogh, Elemér** (Elmer) (Székesfehérvár, 6 February 1866 - Pozsony, now Bratislava, Slovakia, 16 April 1938) – Bishop of the Reformed Church. He studied Theology in Budapest (1884 -1888) then in Edinburgh, Scotland (1890-1891). He was an assistant minister first in Pozsony (now Bratislava, Slovakia) (1888-1890), then in Budapest (1891-1895). He served as a minister in Pozsony (1895-1938) and became the first Bishop of the Reformed Church in Slovakia after the northern territories of Historic Hungary, (Upland, *Felvidék*) was ceded to the newly created Czechoslovakia by the Versailles-Trianon Peace Treaty in 1920. This meant that more than 1 million ethnic Hungarians fell overnight under the authority of a hostile foreign country. In this new situation the Reformed congregations were cut off from the mother Church and had to reorganize themselves. This is how the Hungarian-speaking Christian Reformed Church in Slovakia came into existence in 1921, and elected Elemér Balogh as its first Bishop. In this capacity he played an important role in the life of Slovakia's Hungarian population. His articles and essays were published in Slovakia as well as abroad. His major works are *Mary Jones*, translation (1894); *Short History of the Reformed Congregation of Pozsony* (*A pozsonyi református egyházközség rövid története*) (1900); and *Martyrs of the Gospel in the Decade of Mourning of the Hungarian Evangelical Protestant Church* (*Az evangélium vértanúi a magyar evangéliumi protestáns egyház gyászévtizedében*) (1900). – B: 0910, T: 7103. → **Trianon Peace Treaty; Reformed Church in Slovakia.**

**Balogh, István** (Stephen) (Páter Balogh) (Stájerlak, Transylvania, now Romania, 30 March 1894 - Budapest, 20 July 1976) – Roman Catholic priest, politician of the Smallholders' Party (*Kisgazdapárt*) and State Secretary. His high school studies were at Nagyszombat (now Trnava, Slovakia). He studied Theology in Temesvár (now Timișoara, Romania) and was ordained in 1918. He continued his studies by reading Philosophy at the Universities of Budapest and Szeged. First he was chaplain, then parish priest in Szeged, where he became founding Editor of the *Catholic Reporter of Szeged* (*Szegedi Katolikus Tudósító*) (1927-1935), and that of the *Farm News* (*Tanyai Újság*) (1936-1938). He also became Co-Editor of the newspaper *Southern Hungary* (*Délmagyarország*) (1944-1945). His political career started in November 1944. The

Peasant Party's Ferenc (Francis) Erdei and the Communist József (Joseph) Révai enticed him into politics. In December 1944 he helped to organize the Provisional National Assembly at Debrecen. As member of the Armistice delegation, he traveled to Moscow and was one of the signatories of the Armistice agreement. Balogh also filled several important political posts within the Smallholders' Party. In 1947 he left the Party and founded the "bourgeois-democratic liberal" *Independent Hungarian Democratic Party (Független Magyar Demokrata Párt)*. In the spring of 1949 his Party joined the *Independent Peoples Front (Függetlenségi Népfront)*. He took part in the founding of the state-sponsored *Clerical Peace Movement (Papi Békemozgalom)* in 1950. He rejoined the Church in the 1950s and served as a parish priest first in the countryside, later at St Michael's Church (*Szt. Mihály templom*) in Budapest (1962-1976). He became an abbot in 1968. Balogh published several books on political issues. He was Member of the State Presidium (1949-1951). He received a number of medals, among them the Banner Order First Class of the Hungarian Peoples Republic in 1970. – B: 0883, 1503, T: 7617.→**Erdei, Ferenc; Révai, József; Catholic Church in Hungary; Opus Pacis; Smallholders' Party.**

**Balogh, János** (John) (Nagybocskó, now Velykiv Bychkiv, Carpatho-Ukraine 19 February 1913 - Budapest, 15 August 2002) – Ecologist, zoologist. He was born into a poor family. He lost his parents early, was reared in an orphanage. His secondary studies were at the Fásor Evangelical Lutheran Gymnasium of Budapest. His talents brought him to the University of Budapest (1931-1935), where he earned a Doctoral Degree in Zoology in 1935. He started working at the Department of Zoology of the same University, held various positions, and finally was appointed full Professor. From 1970 he was a researcher and counselor in Ecology at the Hungarian Academy of Sciences. He took part in 30 expeditions on various continents and in numerous countries. His works include *The Foundation of Phytosociology (A cönológia alapjai)* (1953), *Lebensgemeinschaften der Landtiere* (1958), *The Oribatid Genera of the World* (1972), and *The Oribatid Mites Genera of the World* (1992). He was a renowned ecologist and a popular lecturer as well. He was Member of the Hungarian Academy of Sciences, H.C. Member of the Austrian Academy of Science and a recipient of the Kossuth Prize (1953), the Széchenyi Prize (1993), the Pro Natura Memorial Medal (1993), the Golden Medal of the Academy (1995), the Hungarian Heritage Prize (1999) and the Corvin Chain (2001). – B: 1090, 1390, T: 7103.

**Balogh, Lord Thomas** (Eger, 2 November 1905 - London, 20 January 1985) – Economist, economic policy maker. A graduate of the Model Secondary School of Budapest (*Budapesti Mintagimnázium*), he also earned degrees at the University of Budapest and the University of Berlin. Between 1927 and 1928 he studied on a scholarship from the Hungarian Institute in Berlin, and between 1928 and 1930 was on a Rockefeller Scholarship. He settled in England in 1931 and worked in the banking business until 1939. Between 1940 and 1955 he was a member of the British government. From 1960 to 1973 he was Professor at Oxford University, and acted as economic advisor to the British government between 1964 and 1968. He was appointed expert adviser to Prime Minister Harold Wilson in 1968. From 1973 to 1975 he was Minister of Energy Policy. He became member of the Hungarian Academy of Sciences in 1979. His published works include *Pragmatic Progress of German Inflation* (1928); *The Dollar Crisis* (1949); *The Economics of Poverty* (1955); *The Irrelevance of Conservative*

*Economics* (1962); and *Planning for Progress* (1963). He was an eminent representative of modern British economics, and was created Baron Balogh, of Hampstead in Greater London, for life in 1968. – B: 1138, 1020, T: 7680.

**Balogh, Sándor** (Alexander) (Kiskomárom, now Zalakomárom, 25 April 1931 - ) – Political scientist, writer. He began his higher studies at the Roman Catholic Seminary of Veszprém in 1949. After three years at the Seminary he was arrested for writing a pro-Mindszenty article and sentenced to three years of forced labor in the mines. During that time the Seminary was closed down. Thereafter, he worked as an electrician at the Shipyard of Balatonfüred. In 1956 he joined the Revolution and was elected to the Workers' Council of the Shipyard and the Revolutionary Council of Tihany. On 22 November 1956 he and his wife left Hungary for Austria and emigrated to the United States. He continued his education and acquired BA, MA and Ph.D. Degrees in Political Science at the University of New York. He became a university professor and taught at various universities until his retirement in 1992. In the meantime, he was involved in the work of emigrant Hungarian societies. His main fields of research are on past and present Hungarian politics and the questions of free will, consciousness and other spiritual factors of human existence. Among his writings are *The Draft of the New United European Constitution (Az új Európai Unió alkotmány javaslata)*; *Autonomy and the New World Order (Autonómia és az új világrénd)*; *Transylvania: Balkan or Europe? (Erdély: Balkán vagy Európa?)*, and *Separating Myths and Facts in the History of Transylvania (Mitológia és tények elválasztása Erdély történelmében)* – B: 1249, T: 7103.

**Balsaráti Vitus, János** (John) (Dombegyháza, 1529 - Sárospatak, 7 April 1575) – Physician, teacher, preacher. Marauding Turks, leaving behind the infant János on the roadside, took his parents to slavery. He was found and raised by his uncle, who eventually sent him to a Reformed College. In 1549 he studied Philosophy and Theology at the University of Wittenberg, Germany. On the advice of his mentor, the renowned Reformer Philip Melancton, he went to Bologna then to Padua, Italy, where he received a doctoral degree in medicine in 1560. He spent six months in the company of other physicians at the court of Pope Paul V. However, Chief Justice Gábor Perényi recalled him from Rome and appointed him his personal physician. With the help of Perényi, Balsaráti published his Latin work, *De remediis pestis prophylacticis (A pestist megelőző szerekéről)*. He also wrote in Hungarian; but his Hungarian opus, the *Hungarian Surgery vols. i-iv (Magyar Churgia)*, was never published, and the manuscript was lost. After the death of his patron, as well as his wife, Balsaráti became a parish minister at Liszka, where he wrote and published *A Brief Summary of the Branches of the Christian Church (A keresztényi vallás ágazatainak rövid summája)* (1571). The same year he was called to teach at the Reformed College, Sárospatak, enhancing the fame of the College. His own reputation spread to Vienna, and Emperor Maximilian II (Miksa, 1527-1576) bestowed on him a Patent of Nobility. He was also involved in botanical studies and research. – B: 0883, 1419, T: 7103. → **Reformed College of Sárospatak.**

**Baltazár, Dezső** (Desider) (Hajdúböszörmény, 15 November 1871 - Debrecen, 25 August 1936) – Bishop of the Reformed Church, lawyer, politician. He studied Theology at the Reformed Theological Academy, Debrecen during 1890-1894. He was private tutor to Lajos (Louis) Tisza, son of Prime Minister Count Kálmán (Coloman) Tisza. In this capacity he studied in the company of his pupil at the universities of Berlin and

Heidelberg (1896-1897). He obtained a Doctoral degree in Law from the University of Budapest in 1897. He worked at the Ministry of Religion and Public Education in Budapest, and served as Minister in Hajdúszoboszló in 1900, then in Hajdúböszörmény in 1904. He was elected Bishop of the Transtibiscan Reformed Church District (*Tiszántúli Református Egyházkerület*) in Debrecen, and Minister of the Great Reformed Church of Debrecen from 1911. He was a member of the Upper House of Parliament from 1914, President of the General Synod and that of the General Convent of the Reformed Church in 1917. He established the Reformed Ministerial Association (*Országos Református Lelkész Egyesület – ORLE*) in 1907, and the Liberal Jewish Block in 1922. He had a vital role in the founding of the University of Debrecen, and raised essential foreign aid for the Reformed College of Debrecen. His major works are *War in the Light of the Gospel (A háború az evangélium megvilágításában)* (1918); *From Times of the Trials (A próbáltatások idejéből)* (1920); *The Grace of God Is Enough for Me, vols. i-ii, Festive Sermons (Elég nékem az Isten kegyelme I-II, Ünnepi beszédek)* (1923, 1936); *Calvinism and Constitutional Theory (A kálvinizmus és az államelmélet)* (1923), and *Liberalism and Democracy (Liberalizmus és Demokrácia)* (1930). He was a recipient of the Hungarian Cross of the Order of Merit, First Class (1931), and the honorary title of Royal Councilor (1936). He received an Honorary Doctorate from the University of Debrecen (1929). – B: 0910, 0931, T: 7103.→**Reformed Church in Hungary; Tisza, Count Kálmán.**

**Bálványos Castle**, Transylvania (*Erdély*, now in Romania) - Bálványosvár, now Cetatea Bálványos. Today it is a castle ruin in County Csík, near Tusnád (now Tuşnad) in Bálványosvára (now Unguraş). It sits on top of a rocky hill called Vártetej. First mentioned in local documents in 1269, it was the most significant fortress in the Carpathian Basin in regard to size, location and architecture. It served as part of the Transylvanian fortress system. The fortress was destroyed in 1538 and its stones were used in the buildings of Szamosújvár (now Gherla), although some old walls are still standing. Near the town of Bálványosfürdő (now Baile Balvanyos) in County Háromszék, there is a 1040-meter-high rock formation. On its top sits an old fortress built in the 11th century by the powerful Apor (Opour) family during the reign of King István I (St Stephen) (997-1038). In that fortress Sándor (Alexander) Apor protected the ancient religion of the Hungarians against the king's aim to convert them to Christianity. After most of the Hungarians converted, members of the old faith continued to worship in the old fortress on the rock, where they made their last offering to the war-god "*Hadúr*" (*War Lord*), who helped their forefathers on the battlefield. In his novel, *Bálványosvár*, Mór (Maurice) Jókai, the renowned 19th century novelist wrote about the final struggle between the old faith and Christianity. During the reign of King Béla IV (1235-1270), when the Mongol-Tartars invaded Hungary in 1241-1242, the Sekler people of Transylvania put up a heroic resistance against the invaders in this fortress. Bálványosvár was the residence of László (Ladislav) Apor, the powerful leader who kept Otto of Bavaria captive in the fortress. The Holy Crown of Hungary was also guarded here for two years, defying the wishes of the King and Pope. Miklós (Nicholas) Apor lived there in 1603; but his widow moved to Torja (now Turia, Romania) and the fortress fell into decay. The oldest and best part of the fortress is a bastion, its strongest defense in sieges. The builders used flat stones and fitted them together so well that it was still standing solid in 1860. The height of the bastion is close to 20 meters. – B: 0942, 1020, T:

7663.→**István I, King; Jókai, Mór; Béla IV, King; Szeklers.**

**Bán** – This was originally a title of a dignitary of the Avar people, holding the highest office next to the chieftain. More than one *bán* may have served under the authority of any Khagan (Ruling Prince). During the reign of the Hungarian Árpád dynasty, King László I (St Ladislav) (1077-1085) became King of Croatia, and named Álmos, his nephew and the son of Gács, as its governor. Under his reign, the office of the *bán* fell into disuse. In 1102 King Kálmán (Coloman) (1095-1116) removed his relative Álmos, the son of Gács, from power and named Count Ugra to govern in his place, bestowing on him the title of *bán* with powers similar to those of the Palatine or Viceroy. King Géza II, (1141-1162) was the first to install a *bán* in Slavonia. King András II (Andrew, Endre) (1205-1235) installed a *bán* as chief administrator in what was known as the Seaside Province. Under the rule of the Habsburgs the power and dignity of the office of *bán* rapidly diminished. – B: 0942, 1078, T: 3233.→**Avars; Árpád, House of; László I. King; Kálmán, King; Géza II, King.**

**Bán, Frigyes** (Frederick) (Kassa, now Košice, Slovakia, 19 June 1902 - Budapest, 30 September 1969) – Film producer. He began his career in 1922 and produced his first film in 1939. Among his pre-1945 films are *One Night in Transylvania (Egy éjszaka Erdélyben)* (1940), which received high praise at the Venice Film Festival. One of his classic productions was *Foothold (Talpalatnyi föld)* (1948), became the third internationally successful Hungarian feature film. His later films were known for their irony, well-intentioned humor and satirical portrayals. There are 34 feature films to his credit. Among his best-known productions are *Háry János* (1940); *Night Music (Éjjeli zene)* (1943); *The Poor Rich (Szegény gazdagok)* (1959), and *St Peter's Umbrella (Szent Péter esernyője)* (1958). He was a four-time Kossuth Prize recipient (1950, 1952, 1954 and 1960). – B: 0883, 1440, T: 7617.

**Bán, János** (John) (Győr, 4 October 1955 - ) – Actor. He completed his studies at the Academy of Dramatic Arts, Budapest in 1979. The same year he started acting at the National Theater (*Nemzeti Színház*), Pécs. In 1980 he received a contract from the Kisfaludy Theater (*Kisfaludy Színház*), Győr. In 1982 he was with the Szigliget Theater (*Szigligeti Színház*), Szolnok, and since 1983, he has been a member of the József Katona Theater (*Katona József Színház*), Kecskemét. His roles include Jóska in Nádás's *House-cleaning (Takarítás)*; Horatio in Shakespeare's *Hamlet*; Hugó in Milán Füst's *Miss Margit (Margit kisasszony)*; Erdős in Béla Zsolt's *Oktogon*; Peter Hell in Canettis's *The Wedding (Die Hochzeit – Esküvő)*; Színész in Halász's *The Chinese (A kínai)*; Cop in F. Dürrenmatt's *The Mitmacher (The Silent Partner - A csendes társ) (A csendes társ)*, and Marc in Yazmina Reza's "Art". There are some 40 feature and TV films to his credit, including *Mission in Evian (Küldetés Evianba)*; *Weekend for a Million (Weekend egymillióért)*; *Julianus; Stalin's Bride (Sztalin menyasszonya)*, and *Rinaldo* (2002). He received an award in Paris for best male performance in 1987. He received the Mari Jászai Award (1987), and the Merited Artist title (1997). – B: 0871, 1439, T: 7684.

**Band** (*Bandérium*) – (1) The name of a cavalry unit in which all the troops served under a single banner. The word 'band' stands for "banner" in the language of the Hun/Herulean tribes. From the reign of István I (St Stephen) the first king of Hungary (997-1038) to the Insurgent Army of the nobility in 1848, a unit serving under a single banner was called "*bandérium*". In Hungary it was customary for an aristocrat of

considerable wealth to recruit a great number of soldiers and lead them into battle under his own banner. Less wealthy nobles with their smaller contingents were assembled under the banner of their county. King Zsigmond's (Sigismund of Luxembourg, 1387-1437) edict of 1433 regulated recruitment by organizing the Army into *bandériums*. (2) Beyond the regular defense forces stationed at the royal fortresses, the king was obliged to maintain a contingent of 1000 mounted soldiers at his own expense, and it was named "The Royal Bandérium". (3) The queen was also obliged to keep "The Queen's Bandérium" under arms at all times. (4) High dignitaries of the country bore the distinguished title "Lords of the Banner" and were obliged to maintain their own contingents. (5) Dignitaries of the church and lesser nobles were allowed to form their own *bandérium* only if they could raise a certain number of mounted soldiers. (6) County squires were obliged to raise a number of followers according to the number of retainers on their estate, or else they would serve personally in battle under the county's banner. (7) The fortified cities used their *bandériums* in defense of the city. They were obliged to provide transportation for guns, firearms, gunpowder and other military necessities. King Mátyás I (Matthias Corvinus, 1458-1490) undermined the efficiency of the *bandérium* organization by allowing the service to be redeemed for money that he used to finance his famous mercenary force, the "Black Army" (*Fekete Sereg*). Later kings of the Jagiello Dynasty accepted the redemption money but they did not finance the army. At the disastrous battle of Mohács against the Turks in 1526, King Lajos II (Louis, 1516-1526) even by recruiting the serfs and stretching all his resources could not muster an army of more than 25,000. Under the Habsburg Dynasty the *bandérium* system changed constantly according to circumstances; then in 1715, it became obsolete by the introduction of the standing army. It was abolished in 1848. – B: 0942, 1020, T: 3233. → **Zsigmond, King; Mátyás I, King; Black Army; Lajos II, King; Mohács Battles (1); Tomori, Pál; Győr, Battles of.**

**Bánd, Anna** (Anne) (Antalfalva, 26 November 1921 - 2007) – Puppeteer and director. In 1949 she moved from live theater to the Fable Cave Puppet Theater (*Mesebarlang Bábszínház*), thereafter to the State Puppet Theater (*Állami Bábszínház*). As a special student, being already a student actress and director, she finished the Academy of Dramatic Arts and obtained the Diploma of Director in 1963. At the 51st Congress of the World Esperanto Federation, held in Budapest in 1966, she directed the State Puppet Theater's young artists to perform the renowned Hans Andersen tale, *The Tinder Box* (*Bűvös tűzszerszám*). It was the world's first Esperanto puppet performance. She was awarded the Mari Jászai Prize. – B: 0870, 1445, T: 7684.

**Bandholtz, Harry H.** (1864 - New York, NY, USA, 11 May 1925) – American Military officer. He was stationed in Hungary as member of the Allied Control Commission following the proletarian dictatorship of 1919 in Hungary. During the Romanian occupation of Budapest in 1919, he stopped the Romanians from ransacking the Hungarian National Museum of Budapest, trying to remove its art treasures. Using a horsewhip he chased away the Romanian military detachment arriving there to loot. He also prevented the Romanians from capturing the then Hungarian Prime Minister, István (Stephen) Friedrich. A memorial plaque in the Hungarian National Museum and a bronze statue in front of the American Embassy in Budapest (1936) keep his memory alive. The statue shows him with a horsewhip in his hand. Although the communist government removed his statue, it has been put back in 1989. – B: 1078, T: 7668. → **Council (Soviet)**

**Republic of Hungary; Hungary, History of; Friedrich, István.**

**Bandinus Codex** – An important historical document written by Mark Bandinus, a Croat, who was Archbishop of Marcianopolis (was located at the site of modern day Devnya, Bulgaria). In 1646 he became Bishop of the Roman Catholic district of Moldavia, now a Romanian region. In his Codex Bandinus he wrote: “*Bakó: The Wallachians (original name of Romanians) are fewer in numbers. There were so many Hungarians in the old times that 12 friars had to minister to them*”. The Codex is the oldest authentic written document about Hungarians living in this territory. It contains numerous ethnographic details and facts about Hungarians and Wallachians. From the yearly reports of missionaries as documented in the Codex, the intent to make everyone a Wallachian is obvious. A list of names of Catholics in Moldavia in that year is given in the appendix. Since the Reformation period the Codex has been used for scientific research and is available in several copies. – B: 1134, 1031, T: 7666. → **Codex Literature; Bukovina, Hungarians of; Csángós.**

**Bánffy, Baron Dénes** (Denis) (Losonczi) (Around 1630 - Bethlen, now Beclean Romania, 18 or 19 December 1674) – Transylvanian statesman and aristocrat. He participated in the Polish campaign of Prince György (George) Rákóczi II, and returned to Hungary (*Erdély*, Transylvania, now Romania) in the Prince's retinue. First he was the follower of Ferenc (Francis) Rhédey, later János (John) Kemény, Ambassador of the latter in Vienna during 1660-1661. He was brother-in-law of Mihály (Michael) Apafi, the ruling prince of Transylvania, and in his reign Baron Bánffy was one of the first men of the Transylvanian Principality. In 1665 he was Viennese ambassador; from 1666 until his death Lord Lieutenant of County Kolozs and also Captain-General of Kolozsvár (now Cluj-Napoca, Romania) and the border fortress system. He was the chief representative of the pro-Habsburg orientation in Transylvanian politics. His Viennese policies and his fighting against the Turks increasingly showed the signs of independent politics and provoked the suspicion of the ruling prince and the opposition of the all-powerful Chief Minister Mihály (Michael) Teleki. His relentless acquisition of property set him up against the Transylvanian nobility. His enemies formed a league and he was arrested in the spring of 1674 and on 17 December the Transylvanian Diet of 1674 sentenced him to death for his despotic measures and disloyalty. The sentence was confirmed by Apafi with the backing of Mihály Teleki. The pardon obtained by the consort of the ruling prince, Anna Bornemissza, arrived too late to save him, and Baron Dénes Bánffy was executed in the Bethlen castle. His tragic fate interested several of Hungary's literary men in a later age, like the writer Mór (Maurice) Jókai, the actor Ede (Edward) Szigligeti and the lawyer-politician Károly (Charles) Szász, (1798-1853). – B: 0883, 1068; T: 7456. → **Rákóczi II, Prince György; Apafi I. Prince Mihály; Kemény, János (2); Teleki, Count Mihály; Jókai, Mór; Szigligeti, Ede.**

**Bánffy, Baron Dezső** (Desider) (Kolozsvár, now Cluj-Napoca, Romania, 28 October 1843 - Budapest, 22 May 1911) – Politician, statesman, Prime Minister. He studied at the Universities of Berlin and Leipzig. Count Kálmán (Coloman) Tisza appointed him Lord Lieutenant of Inner-Szolnok County, and later of Szolnok-Doboka County. From 1892 to 1895 he strictly followed party politics even when he became Leader of Parliament in 1892. When the Wekerle Government fell because of the introduction of the laws on church policies, the King appointed him Prime Minister, at the head of the so-called

“gray cabinet” from 14 January 1895 to 26 February 1899. During his tenure as Prime Minister Bánffy succeeded in implementing laws introduced on church policies. During his government Hungary celebrated her thousand-year statehood in 1896. The period of his government was noted for the strong Magyarization of the nationalities, suppression of labor and peasant movements and the ruthless quelling of all parliamentary opposition, particularly during the 1896 autumn elections. The open tyranny he employed gave rise to mass outrage and provoked a fierce attack by the remnants of the opposition parties: the parliamentary obstruction put the government in an extra-legal (*ex-lex*) situation, forcing Baron Bánffy to resign as Prime Minister in 1899. After his downfall he was appointed as Lord Steward of the Household. From 1904, as leader of the New Party, he relinquished his position as Lord Steward and had himself elected again as Member of Parliament, immediately sharply criticizing the Government of Count István (Stephen) Tisza. He joined the opposition alliance league and became its leader; but in March 1906, he left the coalition. His works include the collection of his articles entitled *Hungarian Nationalistic Policies (A magyar nemzetiségi politika)* (1902) and *On the Croatian Question (A horvát kérdésről)* (1907). – B: 0883, 1068, 1257, T: 7456. → **Tisza, Count Kálmán; Tisza Count István; Wekerle, Sándor.**

**Bánffy, Count Miklós** (Nicholas), (Kisbán) (Kolozsvár, now Cluj-Napoca, Transylvania, Romania, 30 December 1874 - Budapest, 6 June 1950) – Writer, politician, Minister of External Affairs. He studied at the Universities of Kolozsvár and Budapest. He was Lord Lieutenant of County Kolozs and the town of Kolozsvár between 1906 and 1909. From 1901 he was Member of Parliament. Between 1913 and 1918 he served as Superintendent of the Opera House and the National Theater, Budapest. From 14 April 1921 until 19 December 1922 he was Minister of External Affairs in the Bethlen Cabinet. He was active in cultural matters as well. He returned to Transylvania in 1926, then under Romanian rule, where he played a leading role in the area’s Hungarian literary life. He became a Member of the Hungarian Upper House of Parliament by invitation in 1940. He was Editor-in-Chief of the *Transylvanian Helicon (Erdélyi Helikon)* from its inception in 1928. He was active in music, painting, stage-management and literature. He used the pseudonym of Miklós (Nicholas) Kisbán in his dramatic works, including *The Great Lord (A nagyúr)* (1912) and *The Stronger (Az erősebb)* (1918). He also wrote novels, among them the recently rediscovered classic trilogy *The Transylvanian Trilogy*, also known as *Writings on the Wall (Írások a falon): (1) You Were Counted...(Megszámláltattál...)* (1935); (2) *And You Were Found Wanting...(És hijjával találtattál)...*(1937), and (3) *You Were Torn into Pieces (Darabokra szaggattattál)* (1940). In 1935 he produced the very first open-air presentation of Madách’s *Tragedy of Man (Az ember tragédiája)* in Szeged. – B: 0883, 1031, 1105, T: 7456.

**Bánffy, György** (George) (Hunyadi-Buzás, until 1962) (Budapest, 19 June 1927 - Corfu, Greece, 3 September 2010) – Actor, politician. He graduated from the Academy of Dramatic Arts, Budapest in 1954; he was a member of the National Theater (*Nemzeti Színház*) (1950-1953), then worked at the State Puppet Theater (*Állami Bábszínház*) in 1953-1954. He was a member of the Operetta Theater (*Operett Színház*) (1954-1960), member of the National Theater (*Nemzeti Színház*), Pécs, from 1960 to 1971, and after that he worked at the József Attila Theater (*József Attila Színház*) from 1971 until the end of his life. Since 1978 he was elocution instructor at the Academy of Music of Budapest. He was also a Member of Parliament (1985-1994). He was very talented dramatic actor

who had a great charisma coupled with an impressive appearance and expressive power on stage. Bánffy appeared in most of the Hungarian as well as foreign classical plays, among them Goethe's *Faust*; Rostand's *Cyrano de Bergerac*; Shakespeare's *Othello*; *Richard III*; *King Lear*; *Comedy of Errors*; in Sophocles' *Oedipus Rex*; Neil Simon's *Barefoot in the Park* (*Meztláb a parkban*); Illyés' *Innocents* (*Tiszták*); Miklós Bethlen's *Széchényi*; Németh's *Galilei*, and Székely's *Dózsa*. He also appeared in several feature films, such as *Linda*; *High School* (*Magasiskola*), and *Forbidden Area* (*Tiltott terület*). He also performed at recitals, appeared on the Literary Stage, on the University Stage, in many literary radio and television programs. He was regarded as one of the best actors of the Hungarian theater. He received the Mari Jászai Prize (1965), the Merited Artist title (1971), the Outstanding Artist title (1983), the Golden Cross of the Order of Merit of the Republic of Hungary (1992), and in 1994 he was made Officer of the Order of Merit of the Republic of Hungary. – B: 0871, 1031, 1439, 1445, T: 7684.

**Bánfihunyadi, János** (John) (Hans Hungarus, Johannes Banfi-Huniades) (Nagybánya now Baia Mare, Romania, 1576? - Amsterdam, Holland, 28 August 1646) – Alchemist from Transylvania (*Erdély*, now in Romania). Probably the city council sent him abroad with a scholarship. He traveled to England, where he became Professor of Chemistry at Gresham College. He also experimented with alchemy. He summarized his views concerning quicksilver, at that time considered to be an original idea, as follows: “*Est in Mercurio quid quaerunt sapientes*” (*It is in the quicksilver, what is sought after by the scientists*). In regard to the production of amalgams and ores, his work is groundbreaking. He kept accurate records of his experiments, but also described his failures. He had more than 200 results of his experimentation that were either utilized by industry or formed the basis on what chemists of the 18th century achieved remarkable scientific successes. The history of chemistry in England remembers him as a “great and celebrated chymist” He died on his way back to Hungary. – B: 0883, 1190, 1257, T: 7675, 7103.

**Bang-Jensen, Povl** (6 April 1909 - Long Island, NY, USA, 24 November 1959) – Danish UN diplomat, Secretary of the Special Committee investigating the 1956 Revolution and Freedom Fight, the “Hungarian problem”. The Committee was established for the purpose of investigating what happened in the Hungarian fight for freedom with special emphasis on the Soviet armed forces’ intervention. Most of the extensive and significant work was done by Bang-Jensen, personally interviewing 81 Hungarian witnesses in Vienna. He vigorously tried to shed light on the Hungarian tragedy. On completion of the Committee’s work, the Secretary General of the UN, Dag Hammarskjöld, demanded the witness list. Bang-Jensen refused to hand it over and was suspended, then dismissed from his job. He burned the list of names while on the way to the UN building in New York City on 24 January 1958. After leaving his apartment on 23 October 1959, he disappeared and was found two days later in a park shot under suspicious circumstances. In memory of Bang-Jensen, a Danish martyr of the 1956 Hungarian Revolution, a memorial plaque was erected in the 301N parcel of the cemetery at Rákoskeresztúr, near Budapest. – B: 1191, 1020, T: 7668. → **Freedom Fight of 1956.**

**Bangha, Béla S. J.** (Nyitra, now Nitra, Slovakia, 16 November 1880 - Budapest, 30 April 1940) – Priest, writer, orator and organizer. While a high school student at Kalocsa, he entered the Jesuit Order at the age of 15. He studied Theology at Innsbruck, Austria, and was ordained in 1909. He spent his whole life in the Jesuit monastery, Budapest,

from where he exerted his activity embracing the entire country. He was leader of the Maria Congregation and edited its monthly paper. In 1912 he created the Catholic periodical *Hungarian Culture (Magyar Kultúra)*, and in 1917 he published the journals *New Generation (Új Nemzedék)* and the *Noon Newspaper (Déli Hírlap)*. He was a tireless, itinerant orator on issues of apologetics, theology and social questions, and criticized his opponents: the Liberals, Protestants, Communists and Nazis. He worked in Rome for two years (1923-1925); then returned to Hungary and resumed his work. He visited Hungarian Catholics in South America in 1933, and returned home in ill health. He was chief organizer of the Eucharistic Congress, Budapest in 1938. He edited the four volumes of the *Catholic Lexicon* (1931-1933). His collected works were published posthumously in 30 volumes. His ideas were presented in a comprehensive way in the book *World-Conquering Christianity (Világhódító kereszténység)* (1940). – B: 0999, T: 7103. → **Catholic Church in Hungary; Religious Orders.**

**Bánki, Donát** (Donald) (Bánk, 6 June 1859 - Budapest, 1 August 1922) – Mechanical engineer, inventor. Following the completion of his university studies in Budapest, he became an assistant professor and design engineer at the Hungarian State Railways (*Magyar Állam Vasútak – MÁV*) Machine Works, at the Ganz Manufacturing Co. He built the “Bánki engine” in 1892 that was named after him. Together with János (John) Csonka he invented the carburetor in 1893. His water turbine was patented in 1917. In 1918 he developed a major plan for hydropower use of the Iron Gate on the River Danube in the southernmost part of Hungary. His technical publications dealt chiefly with the theory of gas engines and the principles of construction of steam turbines and hydro engines. He developed with János (John) Csonka the “Automatic (Tube) Ignition” to replace the earlier forms in internal combustion engines. This invention, in addition to being very simple, imaginative and reliable, enabled the use of flammable gasoline and increased compression and fuel economy. An even better patent, the electronic ignition, replaced it. – B: 1883, 1149, T: 7674. → **Csonka, János; Petroleum Engine.**

**Bánki, Zsuzsa** (Susan) (Budapest, 31 July 1921 - Budapest, 5 January 1998) – Actress. She completed her studies at the Academy of Dramatic Arts, Budapest, in 1939. Between 1945 and 1951 she was with the National Theater (*Nemzeti Színház*, Budapest. From 1951 to 1953 she worked at the Madách Theater (*Madách Színház*) and from 1953 to 1962 at the Jókai and Petőfi Theaters. From 1962 she performed in the Comedy Theater (*Víg Színház*). From 1980 she was teacher at the State Ballet Institute. She possessed dramatic personal power and was a versatile artist, an excellent interpreter of classical, as well as modern roles. She played many roles from William Shakespeare to Sándor (Alexander) Bródy, from classical to modern. Some of her more memorable roles include Titania in Shakespeare’s *A Midsummer-Night’s Dream (Szentivánéji álom)*; Celia in Shakespeare’s *As You Like It (Ahogy tetszik)*; Violet in Shaw’s *Man and Superman (Tann John házassága)*; Cherubino in Beaumarchais’ *Marriage of Figaro (Figaró házassága)*, and Esther in A. Miller’s *After the Fall (Alku)*. She often played in feature films and in radio dramas. She acted almost for ten years in the TV series entitled *Neighbours (Szomszédok)*. She was a recipient of two Mari Jászai Awards (1953, 1954), the title of Merited Artist (1983), and the Film Festival Prize of Locarno for best female acting. – B: 0870, 1445, T: 7684.

**Bánkút Wheat** – László (Ladislav) Baross (1865-1938), general manager of an experimental farm in County Arad, in the village of Bánkút (in Transylvania, now in Romania), crossbred the wheat of the Hungarian Tisza region with the Marquis wheat of Canadian origin, using the varieties B1201 and B1205 in 1917. Variety B1201 of the renowned Hungarian wheat was qualified as the World's best wheat; and László Baross was awarded a gold medal at the Regina World Fair 1933, Canada. – B: 0883, 1138, T: 7680.

**Bánkúty, Géza E.** (Budapest, 1926 - ) – Businessman. He graduated from the Toldy High School, Budapest and completed his higher studies at the University of Budapest (1944, 1946-1947). He excelled in motor sports and was eight times motorbike champion between 1948 and 1956. He participated in the 1956 Revolution as military commander of Buda; after the defeat of the Revolution he organized the “We Start Anew in March” (*Márciusban Újra Kezdjük* – MUK) movement. He fled to Austria in March 1957, and later moved to the USA. He was tried *in absentia* in Budapest. He acquired a diploma in engineering from the Bridgeport Engineering Institute. For ten years he was departmental head of the Bristol Meyers Clariol Co. In 1974 he founded his own firm, the New England Machinery Inc., manufacturing wrapping equipment. He has more than a dozen inventions to his credit. He is head of the Hungarian Association in America and President of the Hungarian Panorama Magazine. He is a member of the Knightly Order of Vitéz and the Knightly Order of St László. He is the a recipient of several medals, among them the Memorial Medal 1956 of the Republic of Hungary, is Officer of the Cross of Merit of the Republic of Hungary, the Cross of Merit with Crown of the Hungarian Veterans' Association. – B: 1037, T: 7103.

**Banners of 1848-1849** – The flags confiscated by the Austrians and Russians upon the surrender of the Hungarian National Army at Világos (now Siria, Romania) on 13 August 1849. The Austrians returned them sooner; but 56 of them, kept by the Russians, were returned on 20 March 1941 when, in exchange, Hungary released convicted Communist leaders Mátyás (Matthias) Rákosi, Zoltán Vas and their cohorts. The flags were released to Ambassador József (Joseph) Kristóffy, and the military attaché in Moscow Gábor (Gabriel) Faraghó. The flags were accompanied by military fanfare all the way to the then Soviet-Hungarian border in the Carpathian Mountains. This was also the occasion of the opening of the Moscow-Budapest railway line. At Lavocs the Hungarians took over and carried the flags, celebrating all the way to Budapest, where a military parade took them to Heroes' Square, and later to the Museum of War History, Budapest. During World War II, following the occupation of Buda Castle, the Soviets confiscated the flags again as part of their plunder. On the occasion of the “liberation” ceremonial on 4 April 1948, a Soviet military committee returned them to Hungary. They are now kept in the Museum of War History in Budapest. – B: 1200, 1020, T: 7656. → **Freedom Fight of 1848-1849; Rákosi, Mátyás; Stalin, Joseph; Vas, Zoltán.**

**Bánság** – A region in former Southern Hungary (*Southland, Délvidék*), now divided between Serbia and Romania. Before the arrival of the Magyars in 896 AD, the Avars, a kindred folk, populated the southern area of the Carpathian Basin. At that time the Ajtony-Gyula tribe settled in the area of Temesköz and established the town of Temesvár (now Timișoara, Romania). A significant Hungarian presence was maintained in this region until the Turkish occupation of Temesvár in 1552; but from then on it became

greatly reduced. After the defeat of the Turks (Passarovic Peace Treaty in 1718), the Habsburgs kept this area under separate administration from the Hungarian Parliament and initiated the creation of large German settlements. This process continued throughout the reign of Empress Maria Theresa's son, József II (Joseph) (1780-1790) and beyond, until 1814, when the XVIII Parliamentary Act established Hungarian administration for the region. Along with the Germans, other settlers came from Italy, Spain and France, while Serbs settled around Kikinda. During the latter part of the 18th and throughout the 19th century, significant Romanian immigration took place from Moldavia. Around 1883 Seklers from Bukovina established villages at Hertelendy (now Vojiovic), Sándorháza (now Ivanovo) and Székelykeve (now Skorenovac), bringing about the greatest ethnic mixture in South-Central Europe. After the end of World War I, by the Trianon Dictated Peace Treaty (1920), the area came under Romanian and Serbian rule. – B: 1078, 1143, T: 7656. → **József II, King; Trianon Peace Treaty.**

**Bara, Margit Éva** (Margaret Eva) (Kolozsvár, now Cluj-Napoca, Romania, 21 June 1928 - ) – Actress. The original form of her Szekler Hungarian name (from Transylvania) was Barra; her father changed it to Bara. She completed one year at the School of Dramatic Arts at Kolozsvár. From 1945 to 1955, she played in the Hungarian Theater of Kolozsvár. In 1955, she moved to and settled in Hungary. Until 1957, she was an actress at the Petőfi Theater (*Petőfi Színház*), until 1966 at the National Theater (*Nemzeti Színház*), Budapest and, from 1966 to 1978, a member of the Attila József Theater (*József Attila Színház*). In 1978 she retired permanently. Her career was wrecked by malicious and unfounded gossip mongering, as a result of which the more recent film-roles declined in number and, in the theater, she was given roles unworthy of her artistic standing. Between 1970 and 1972 she was living with her family in Columbia. She speaks a number of languages (apart from Hungarian also Romanian, French, English and Spanish). With her beauty, attractive femininity and tragic artistic make-up, she became well known throughout Hungary, especially in her 26 film-roles, including *Precipice* (*Szakadék*) (1956); *The Poor Rich* (*Szegény gazdagok*) (1959); *Shower* (*Zápor*) (1961); *Lark* (*Pacsirta*) (1963); *Sweet and Bitter* (*Édes és Keserű*) (1966); *Impostors* (1969), and *Jakob, der Lüger* (1975). Her roles include Mása in Chekhov's *Three Sisters* (*Három nővér*); Elizabeth in Schiller's *Don Carlos*; Anna in L. Németh's *By the Blaze of Lightning* (*Villámfénynél*); Eszter Rhédey in Zsigmond. Móricz's *Úri muri* (*Gentlemen's Fun*); title role in Tolstoy - J. Székely's *Anna Karenina*; Melinda in J. Katona's *Bánk bán*, and Titania in Shakespeare's *A Midsummer-Night's Dream* (*Szentiványéji álom*). Margit Bara was honored with the Béla Balázs Prize in 1967, and with the Kossuth Prize in 2002. There is a book about her: *The Glimpse of Margaret Bara* (*Bara Margit tekintete*) by Mihály L. Kocsis (2008). – B: 1031, 1445, T: 7456.

**Barabás, Miklós** (Nicholas) (Kézdimárkosfalva now Mărcușa, Romania, 10 February 1810 - Budapest, 12 February 1898) – Painter. He was educated at the Reformed College, Nagyenyed (now Aiud, Romania). His painting career began at a young age. He developed his skill in Vienna under J. Ender in 1829; then studied lithography with Gábor (Gabriel) Barra of Kolozsvár (now Cluj-Napoca, Romania) in 1830. He spent two years in Bucharest, where he established himself as a portrait-painter. In 1834-1835 he was on a study trip in Italy, where he learned watercolor and landscape painting from W.L. Leitch, an English painter. From 1835 onwards he lived mainly in Budapest, where he greatly helped establishing an art center in Pest in 1859, and was its president for life.

He was a sought-after portrait and landscape painter. He painted portraits of renowned contemporaries e.g. *Count István* (Stephen) *Széchenyi*, *Lajos* (Louis) *Kossuth*, *Sándor* (Alexander) *Petőfi*, *János* (John) *Arany*, *Ferenc* (Franz) *Liszt* etc. He painted in watercolor the *Laying the Foundation Stone of the Chain Bridge* (*A Lánchíd alapkövetétele*) in 1842. His paintings were elaborate and with delicate coloring. He was the first Hungarian painter who lived by means of his art. In 1867 he became a Member of Parliament. His autobiography, besides describing events of his life, also reports on the social and cultural *milieu* of his time. – B: 1124, 0883, T: 7103.→**Széchenyi, Count István; Kossuth, Lajos; Petőfi, Sándor; Arany, János; Liszt, Ferenc.**

**Baradla Cave** – Previously known as the Aggtelek Cave, it is the largest cave in the Aggtelek Cave System. The area has become much better known since the 1920s. In 1922, an engineer, Péter (Peter) Kaffka discovered a new branch to the north that he opened from Jósvalfő in 1928. In 1926 the Czechs began excavating from the Dómica Cave and made their way to the Hosszúszó Cave that they opened up shortly afterwards. In 1932 the engineer Hubert Kessler and his co-workers proved that the creek in this new branch is the upper course of the Stix Stream. They also found an additional 1-km-long gallery from the Retek Branch, making the length of the cave system 23 km, instead of 9 km, as previously thought. Of that, 14 km is on the Hungarian side of the border, while 9 km is in Slovakian territory. According to Professor Endre (Andrew) Dudich, 262 different animal species live inside the cave, which is part of a protected area. It became part of the Aggtelek National Park in 1985. – B: 1134, 1020, T: 7676.→**Aggtelek National Park.**

**Barankovics, István** (Stephen) (Eger, 13 December 1906 - New York, NY, USA, 13 March 1974) – Journalist, politician. Following his high school graduation in 1923, he became a journalist. He belonged to the Independence Movement. Together with Count Gyula (Julius) Dessewffy he launched and edited the journal *The Country's Road* (*Az Ország Útja*) (1937-1944). He was Editor of numerous periodicals, among them the *Small Journal* (*Kis Újság*) of the Smallholders' Party (1941-1944), and the *Hungarian Nation* (*Magyar Nemzet*). He was a representative in the National Assembly (1945-1947), and a Member of Parliament (1947-1949). He was President of the *Democratic People's Party* (*Demokrata Néppárt*), and the Editor-in-Chief of its journal, *Our Country* (*Hazánk*) from 1945 until its dissolution in 1949. He emigrated from Hungary in 1949 and settled in the USA in 1951. – B: 0883, 1105, T: 7103.

**Bárány, George** (György) (Hungary, 1955 - ) – Chemist. His family emigrated to the USA in 1960. He attended the Stuyvesant High School in New York City, and in 1971 started his graduate studies with Professor R.B. Merrifield at The Rockefeller University. He published his first paper in 1973 on the synthesis of an ATP-binding peptide. He obtained a Ph.D. in 1977 for the development of the Dts protecting group. His academic career began at the University of Minnesota Twin Cities campus in 1980, where he has been full Professor of Chemistry since 1991. A joint appointment as Professor of Laboratory Medicine and Pathology was made in 1996. He was named Distinguished McKnight University Professor in 1997. His research interests involve peptide synthesis (particularly the solid-phase method), protecting groups for organic functionalities (with an emphasis of the concept of orthogonality), the chemistry of thiols,

disulfides, and polysulfanes, functionalization of soluble and insoluble polymers and mass spectrometry. His research results have been described in ca. 250 scientific publications. He authored a number of seminal review articles on various aspects of the peptide field. He served a six-year term on the Council of the American Peptid Society. He was listed among “America's 100 Brightest Scientists under 40” by the Science Digest in 1984. He received the Vincent du Vigneaud Award in 1994. Other honors include his selection as a Searle Scholar in 1982, and a USPHS Research Career Development Award for his work from 1982 to 1987. – B&T: 1129.

**Bárány, István** (Stephen) (Eger, 20 December 1907 - Budapest, 21 February 1995) – Swimmer, trainer, sports leader, specialist writer. In 1926 completed his studies at the Commercial College of Vienna. From 1925 he studied in the Archbishopal College of Law at Eger, and in 1930 earned a Ph.D. in Law at the University of Pécs. From 1928 to 1930 he did further studies in France. In 1956 he obtained the qualification of a sports leader, trainer and master trainer in the School of Physical Education. From 1920 he was a swimmer and waterpolo player in an Eger team. He gained his greatest successes in swimming. Between 1924 and 1932 he played in the select team, at his best in the 100-meter free-style swimming. He won a gold medal in that event in the European championship of 1926, thus becoming the first European champion in the Hungarian swimming sport. Later he received two individual and one relay title as a European champion. Between 1928 and 1930 he broke the record three times in the 100-meter European championship. He was the first European swimmer who swam the distance within one minute. In 1930 he made a European record in 200-meter free-style swimming. He took part in three Summer Olympic Games; in 1928 as the best European he got the second position behind Johnny Weissmüller of the USA. In his career he earned a total of 27 Hungarian championship titles. From 1933 he became the team captain of the Hungarian select team that took part under his guidance in the Berlin Olympics in 1936. From 1956-1960 he was Secretary of the Hungarian Swimming Council; and from 1930 was correspondent of several sports magazines in Budapest. His works include *The Sporting-style Swimming (A sportszerű úszás)* (1929); *Swimming Instruction of Children (A gyermekek úszásoktatása)* (1950); *In Competition with Tarzan: Sporting Stories of István Bárány (Versenyben Tarzannal: Bárány István sporttörténetei)* (1984). The Sport Swimming Pool in Eger was named after him. He was awarded the title “Hungary’s Swimming Champion for Life” in 1982. – B: 1031, 1742, T: 7456.

**Bárány, Róbert** (Vienna, Austria, 22 April 1876 - Uppsala, Sweden, 8 April 1936) – Physician. He obtained his Medical Degree in Vienna. Later he studied internal medicine and psychiatry. He worked in Vienna; and during World War I, he was in charge of a military hospital. He became prisoner of war, but was later released by the intervention of the Swedish government in 1916. In 1917 he became professor at the Uppsala University, where he developed the methods of examination and the function of the equilibrium organ of the ear. From 1926 until his death he was the most senior professor of the University. He elaborated the surgical treatment of fresh bullet wounds, and the operational technique for chronic frontal sinusitis. His professional activities were honored with many significant awards, including the Pulitzer Prize in 1912, and the Guyon Prize in 1914. He received the Nobel Prize in 1914 for his work and research on the physiology and pathology of the equilibrium organ in the inner ear. The Robert Bárány Society was created in 1960. The Society holds a symposium every five years. –

B: 0883, 1105, T: 7660.

**Bárány, Tamás** (Thomas) (Budapest, 21 March 1922 - Budapest, 10 November 2004) – Writer. His higher studies were at the University of Kolozsvár (now Cluj-Napoca, Romania) (1941-1943) and at the University of Budapest (1940-1946), where he read Hungarian Literature, Art History and Archeology. He worked as a clerk at the Town Hall and as a contributor to the periodical, *Light (Világosság)* in 1945. He was a librarian (1946-1947), an editor, and filled various positions at the Writers' Association, including its deputy presidency. He became Vice-President of the PEN Club (1989) and was on the Board of the Art Foundation. He published poems, novels and plays since 1937. His works include *Dream Cities (Álomvárosok)* poems (1937); *Wolves (Farkasok)* novel (1952); *The Fatherless Generation (Apátlan nemzedék)* novel (1960); *Extraordinary Resurrection (Rendhagyó feltámadás)* play (1968); *The Judge (A bíró)* novel (1978); *The Man from Nazareth (A férfi Názáretből)* novel (1997) and *Selected Short Stories (Válogatott novellák)* (2000). He was a recipient of the Attila József Prize (1954, 1969), the Andor (Andy) Gábor Prize (1972), and the János (John) Arany Prize (1996). – B: 0874, 1257, T: 7103.

**Baranya Triangle** – An area located at the confluence of the River Danube on the east, and the River Drava on the south, thus forming a triangle. Once the region belonged to the County of Baranya, but was ceded to Yugoslavia by the Versailles-Trianon Dictated Peace Treaty in 1920. Between 1941 and 1944 the territory was returned to Hungary; but following World War II, Yugoslavia repossessed it. Since 25 June 1991, it has belonged to the reestablished state of Croatia. – B&T: 7103.→**Trianon Peace Treaty**.

**Barát, Endre** (Andrew) (Nagykáta, 24 April 1907 - Budapest, 17 March 1976) – Writer, journalist. He studied Economics; but in the 1930s appeared as a poet, and from 1938 he was a correspondent for the *Fresh News (Friss Újság)*, where his novels and poems were published. From 1945 he was a correspondent for the paper *Freedom (Szabadság)*; between 1950 and 1951 for the newspaper *People's Army Néphadsereg*; and from 1957 to 1959 for the magazine *Mirror (Tükör)*. For a decade from 1959, he was Chief Correspondent of the illustrated weekly *The Country and the World (Ország-Világ)*. He also published regularly in the daily, *Hungarian Nation (Magyar Nemzet)*. His works featured both the old peasant life and the servants of the large estates of the past. He published nearly forty works, among them *Antheus Sings (Anteus dalol)* poems (1934); *A Voice Crying in the Wilderness (Pusztába kiáltott szó)* novel (1936), and *Say Something, God (Szóalj Isten)* poems (1938). His drama, *The Wick is Aflame (Lobog a mécses)* was produced by the National Theater (*Nemzeti Színház*), Budapest, while *Black Gold (Fekete arany)* at the National Theater, Szeged. – B: 0883, 1257, T: 7456.

**Baráth, Tibor** (Alsólendva, now Lendava, Slovenia, 6 August 1906 - Montreal, Quebec, Canada, 22 February 1992) – Historian. His higher studies were at the University of Budapest, where he obtained a Ph.D. in 1929. He spent some time in Paris on a scholarship. In 1934 he was a clerk at the National Museum in Budapest. Thereafter, he worked at the Hungarian Study Center, Paris. From 1940 he was Professor of Hungarian History at the University of Kolozsvár (now Cluj-Napoca, Romania). In 1944-1945 he worked at the Ministry of Culture and Public Education, Budapest, and spent some time in France as a contributor to various scientific institutions. From 1946 to 1952 he headed the Documents Department of the Northern France Industrial Council. He moved to

Canada in 1952. He researched ancient Hungarian history and the possibility of Sumerian-Hungarian connection. He edited and published the periodical *Western Hungarians (Nyugati Magyarság)* (1949-1955). His articles appeared in other newspapers as well. He wrote 15 volumes in Hungarian and in French. Most of them dealt with Hungarian history. His works include *Histoire de la presse hongroise.* (1935); *Magyar történet (Hungarian Story)* (1951); *The Ancient History of the Hungarian Peoples vols. i-iii (A magyar népek őstörténete, I-III)* (1974, 1993, 1997); *Ideology of Hungarians in Foreign Lands (A külföldi magyarság ideológiája)* (1975), and *The Early Hungarians in the Light of Recent Historical Research* (Montreal, 1988). – B: 1169, 1257, T: 7103.

**Barca Region (Barcaság)** – Transylvania (*Erdély*, now Romania) – A fertile plateau and mountainous area immediately north of the crest of the southeastern Carpathian Mountain Range, around the city of Brassó (now Braşov). During the reign of King István I (St Stephen, 997-1038), it included the southern part of the Szekler land. It received its name from the adjacent Barót Mountain, Barót-Barca. The Szeklers defended the Tömös, Ó-Sánc and Bodza mountain passes that led north through the Carpathian Mountains, against the Cumanian, Pecheneg, Mongol, Wallachian/Romanian and Turkish incursions. During the reign of the House of Árpád (997-1301) many fortresses were built here, such as Brassóvár, Töröcsvár, Királykö and Feketealom. These were defended mainly by the Szeklers, hence the Hungarian-sounding names. In 1211 King András II (Endre, Andrew, 1205-1235) settled members of the Order of Teutonic Knights here to improve the defense against the Cumans. The Order was later banished from the area for its undisciplined and independent ways; but the German settlers, largely of Saxon origin, remained and prospered until the end of World War II. The Romanians began to settle in the area at the end of the 13th century. – B: 0948, 1078, 1134, 1020, T: 7656. → Borza Éand; **István I, King; Szeklers; András II, King; Árpád, House of.**

**Barcsay, Jenő** (Eugene) (Katona, now Cătina, Romania, 14 January 1900 - Budapest, 2 April 1988) – Painter, graphic artist. He was born into an aristocratic family of Transylvania (*Erdély*, now Romania). He moved to Budapest after the Romanian occupation of Transylvania in 1919 and studied at the Academy of Applied Arts under János (John) Vaszary and Gyula (Julius) Rudnay. He graduated in 1924. He went on a study trip to Paris in 1926, where Cézanne influenced him for life. He visited Paris again in 1927-1930 and was influenced by Cubist art. He was in Italy in 1927, and was particularly interested in the quattrocento's art. Later he lived in Szentendre, the site of the artist colony, near Budapest. Between 1931 and 1945 he taught at the Metropolitan Trade School (*Fővárosi Ipariskola*), and from 1945 until his retirement he was professor at the Academy of Applied Arts, where he taught figure sketching. His style was a version of constructive-geometric art as seen on his landscapes, mostly of Szentendre, as well as on his human figures. He also created murals and drawings. His works include *Worker Girl (Munkáslány)* (1928); *Street at Szentendre (Szentendrei utca)* (1932-1933) and *Factory (Gyár)* (1946). He had a number of exhibitions, e.g. at the Ernst Museum (1936, 1941, 1966). His books are: *Artistic Anatomy (Művészeti anatómia)* (1953) that was translated into several languages; *Man and Drapery (Ember és drapéria)* (1958), and *Form and Space (Forma és tér)* (1966). He won many national and international awards, among them the Kossuth Prize, the Merited and the Outstanding Artist titles. – B: 0872, 1124, 0883, T: 7103. → **Vaszary, János; Rudnay, Gyula.**

**Bárczay, Gyula** (Julius) (Budapest, 12 October 1931 - Therwil, Switzerland, 29 May 2008) – Minister of the Reformed Church, theologian, writer. He attended High School in the Reformed College of Sárospatak, and studied Theology at the local Reformed Theological Academy. After its closure by the Communist regime he transferred to the Reformed Theological Academy, Budapest and graduated in 1955. Following the ill-fated 1956 Revolution and Freedom Fight, he went to Basel, Switzerland with a scholarship of the Hungarian Reformed Church. He continued his theological studies in Basel (1957-1958) and Chicago, USA (1959). He obtained the Doctor of Divinity Degree under the guidance of Professor Karl Barth in Basel in 1961. His doctoral dissertation was on *Revolution of Morals? Changing Norms of Sexuality as a Problem of Evangelical Ethics* (*Revolution der Moral? Die Wandlung der Sexualnormen als Frage an die evangelische Ethik*). His other books include *Ecclesia semper reformanda...* (1961), and *Fates in the Reformed Church 1948-1988* (*Sorsok a református egyházban 1948-1988*) (1989). In it he traced the tragic fate of individuals of the Reformed faith, of ministers and church-members alike, who were persecuted by the Communist regime. He edited the works of *László Ravasz: Selected Writings 1945-1968* (*Ravasz László: Válogatott írások 1945-1968*) (1988) and *László Pap: Ten Years and What Comes After* (*Tíz év és ami ezután következik*) (1992). His articles and studies appeared in German, Hungarian and in English. He was involved in the work of the *European Protestant Hungarian Open University* (*Európai Protestáns Magyar Szabadegyetem*) (Basel). Since 1961 he has served the Reformed parishes of Oberwil, Therwil, and Ettingen in Switzerland. He was one of the most important Hungarian Reformed theologians living outside Hungary. – B&T: 7650, 7103. → **Reformed Church in Hungary; Reformed Churches in Western Europe.**

**Bárcki, Géza** (Zombor, Hungary, now Sombor, Serbia, 9 January 1894 - Budapest, 7 November 1975) – Linguist. He studied linguistics together with Hungarian, Latin, Greek and French at the University of Budapest as student of the Eötvös College. In the summer of 1914 he went on a scholarship to France for further studies, where he was interned during World War I. Eventually the International Red Cross succeeded in getting him to Switzerland, where he completed his studies at the University of Lausanne. Between 1919 and 1941 he worked as a high school teacher in Budapest; and from 1938 as an honorary lecturer at the University of Budapest, and taught Old-French Language. From 1941 he was Professor of Hungarian and Finno-Ugrian Linguistics at the University of Debrecen; and from 1952 he headed the School of Hungarian Linguistics at the University of Budapest until his retirement in 1969. He was a leading researcher of Hungarian linguistics. Most important were his studies on the history of the Hungarian language, particularly his work in the field of historical phonetics and morphology. From 1941 to 1949 he edited the journal *Hungarian Vernacular* (*Magyar Népnyelv*) and participated in collecting and organizing the great work *Hungarian Language Atlas* (*Magyar Nyelvatlasz*) starting in 1947. He authored a number of university and high school textbooks and was a Member of the Finno-Ugrian Society of Helsinki, later President of the Hungarian Linguistic Society. His works include; *Hungarian Etymological Dictionary* (*Magyar szófejtő szótár*) (1941); *Introduction into Linguistics* (*Bevezetés a nyelvtudományba*) (1953); *Explanatory Dictionary of the Hungarian Language* (*A magyar nyelv értelmező szótára*) (1959-1962); *History of the Hungarian Language* (*A magyar nyelv életrajza*) (1962, 2nd edn. 1966). He was a regular member of

the Hungarian Academy of Sciences (1947), Honorary Doctor of the University of Debrecen (1973), and a recipient of the Kossuth Prize (1952), and was also a corresponding member of the Finnish Academy (1967). – B: 0883, 1257, T: 7456.

**Bárdi, László** (Ladislav) (Mosonmagyaróvár 1932 - ) – Orientalist, researcher of the ancient history of Hungary. His family is from Transylvania (*Erdély*, now in Romania). He received his Degree in Geography and History from the University of Budapest in 1954, and later obtained a Ph.D., *Summa cum Laude*, from the same University. He conducted postgraduate studies in England, Germany, Italy and China. He worked for ten years as a professor. During the J. Antall Government of Hungary, he was the supervisor of the educational districts of Counties Somogy and Tolna-Baranya. He was employed in higher education: from the mid-1970s as university lecturer at the University of Pécs; he then became the founding director of the Asian Center at the University of Pécs, and is now Director of its Scientific Advisory Committee there. He was a guest professor in Romania and China. From 1994, he was a lecturer at the South Chinese University of Nanchang. Bárdi's historical research is directed toward the equestrian nomad peoples, as an adjunct to the Eastern background of Hungarian ancient history. To prove his theoretical research he has taken more than thirty Asian research trips to India, Mongolia, Nepal, Sikkim, Turkey – from Tibet to Manchuria, from Inner-Mongolia to Dzungaria, and spent 520–540 days in Asia, including China. He has published more than 12 books, among them several university textbooks. As a co-author, he has participated in the publication of more than 16 books and two lexicons. He has participated as a lecturer at several conferences in Hungary, and also at international conferences. He has worked as an editor for the scientific publication *Turán*, on articles concerning the research of the origins of the Magyars, and is a regular contributor to a Chinese-Magyar publication *Selyemút (Silk Road)*. – B: 1935, 1031, T: 7690, 7103.

**Bárdos, Albert Kornél** (Albert Cornel) (Felsőmindszent, 1 November 1921 - Budapest, 8 November 1993) – Cistercian priest, music historian. He obtained his qualifications at the Theological College of Zirc (1945), the University of Budapest (1949), and at the Liszt Academy of Music, Budapest (1951). Upon the dissolution of the Order, he was dismissed from the diocesan service in 1951. Thereafter he worked as a music teacher in Miskolc (1951-1955) and Budapest (1955-1979). He worked at the Institute of Music of the Hungarian Academy of Sciences from 1979 onward, and taught Music History to the Cistercian novitiate. From 1989 he was Professor at the University of Budapest. History of Hungarian music of the 16th-18th centuries was his main field of research. He edited the *History of Music of Hungary, vol. iii 1541-1686 (Magyar Zenetörténet III, 1541-1668)* (1990) that became his masterpiece. He was a recipient of the honorary title Excellent Worker of Education (1977) and the *Grad Prix* of the Art Foundation (1989). – B: 0879, 1466, T: 7456.

**Bárdos, Artur** (Arthur) (Budapest, 2 April 1882 - Buffalo, NY, USA, 10 August 1974) – Theater and stage manager, dramaturgist. At first he studied Law at the University of Budapest, and began his career as a journalist. Then in 1909 he went to Germany and worked as dramaturgist and stage director at the Stage-Play (*Színjáték*) of Hamburg. His book *The New Stage (Az új színpad)* was published concurrently. Under the same name he started his first theater venture in Budapest. In 1916 he became Director of the Modern Stage Cabaret (*Modern Színpadi Kabaré*) that in 1918 became the Inner City Theater

(*Belvárosi Színház*). Bárdos remained its manager for close to 30 years with some notable interruptions, e.g. he spent a six-year period (1926-1932) in Berlin as producer, where he also worked in the *Theater im Palmenhaus*. In 1948 he moved to the USA, where he published a volume of poetry in 1968. Bárdos directed the plays of most Hungarian, as well as foreign playwrights, such as Ferenc (Francis) Herczeg, Lajos (Louis) Zilahy, A. Strindberg, R. Roland, B. Shaw, W. Shakespeare, and others. He was appreciated for keeping a balance between lighter plays, and works of literary merit. Among his most important published works are: *Two Paths (Két ösvény)* poems (1903); *Rulers and Clowns (Uralkodók és komédiások)* (1936); *Play Behind the Curtain (Játék a függöny mögött)* (1943); *Workshop Secrets of the Theater (A színház műhely titkai)* (1943), and *Twilight (Alkony)*, poems (1967). – B: 0879, 0883, T: 7456, 7617.→**Herczeg, Ferenc; Zilahi, Lajos.**

**Bárdos, Lajos** (Louis) (Budapest, 1 October 1899 - Budapest, 16 November 1986) – Choirmaster, composer, music theoretician, music teacher. During his higher studies at the Ferenc (Franz) Liszt Academy of Music, Budapest, he studied under Albert Siklós, Artur Harmat and Zoltán Kodály in 1920-1925. He was active as a music teacher (1925-1929), lectured at the Liszt Academy of Music (1928-1968), was choirmaster of the Palestrina Choir (*Palestrina Kórus*) (1923-1933), the Budapest Choir (*Budapest Kórus*) (1941-1948), and the choir of the Mátyás (Matthias) Cathedral of Budapest (1942-1962), among other musical activities. He was publisher and editor of the journal *Hungarian Choir (Magyar Kórus)* (1931-1950), and was one of the architects of the *Singing Youth (Éneklő Ifjúság)* movement in 1934. He started publishing Hungarian folk songs in 1928, and conducted the premieres of numerous contemporary choral works and oratorios. He often appeared abroad as guest artist. He composed stage works, radio plays, chamber music, vocal church music, and choral works. He was particularly active in setting poems of ancient Hungarian bards to music. Among his compositions are: *String Quartet (Vonósnégyes)* (1925); *Distant Dream (Távoli álom)* (1958); *4 Latin Masses (4 latin mise)* (1985); *1 Hungarian Mass (1 magyar mise)* (1985), and psalms, motets, anthems and folksongs. He was an outstanding figure as researcher and as teacher of Hungarian music theory. He often gave lectures on various aspects of musical life (1928-1982). His writings include *Thirty Writings (Harminc írás)* (1929-1969); *Franz Liszt, Musician of the Future (Liszt Ferenc, a jövő zenésze)* (1976), and *Bartók Tunes and Folk Music (Bartók dallamok és a népzene)* (1977). He was a recipient of the Erkel Prize (1953), the Kossuth Prize (1955), the title of Outstanding Artist (1970), the Bartók-Pásztory Prize (1984), and the *Grand Prix* of the Art Foundation (1989). Choirs and schools bear his name, and there is a Lajos Bárdos Musical Week. – B: 0879, 1257, T: 7456.→**Siklós; Albert; Harmat, Artur; Kodály, Zoltán.**

**Bárdossy, László** (Ladislav) (Szombathely, 10 December 1890 - Budapest, 10 January 1946) – Politician. After completing his studies at the University of Budapest's Law Faculty, he worked for the Ministry of Religion and Public Education in 1913. In 1922 he became a civil servant at the Ministry of Foreign Affairs, and also filled various posts, including counselor at the London Embassy (1930), and Ambassador to Romania (1934). Following the sudden death of Foreign Minister Count Pál (Paul) Csáky, he was appointed to that post on 4 February 1941; he soon became Prime Minister after the tragic death of Count Pál (Paul) Teleki on 3 April 1941. On 27 June 1941, after the bombing of Kassa (now Košice, Slovakia), he announced in Parliament that Hungary

declared war on the Soviet Union (a decision not made by him). On 11 December 1941, first he severed diplomatic ties with the USA then, under Italian and German pressure he declared that Hungary was at war with the USA, without the endorsement of Parliament and Regent Miklós Horthy. In January 1942, he contributed to the dispatching of the Hungarian Second Army to the Eastern front that suffered heavy defeat in January 1943. The 1941 Act No. XV, known as the third anti-Jewish law, is tied to his name. He helped arrange the escape of the army officers responsible for the atrocities committed in Újvidék (now Novi Sad, Serbia), triggered by Serb partisan activities on Hungarian territory. Following the defeat of the Second Hungarian Army at the Eastern front, at the request of Regent Miklós Horthy, he left his office on 7 March 1942. His successor was Miklós (Nicholas) Kállay. Following the war he was condemned to death by the Peoples' Court and executed. His works include *In Defense of the Nation (A Nemzet Védelmében)* (1976) – B: 0883, 1031, T: 7103.→**Csáky, Count Pál; Teleki, Count Pál; Horthy, Miklós; Kállay, Miklós; Atrocities against Hungarians; Don Bend, Hungarian Military Tragedy.**

**Bárdy, György** (George) (Budapest, 26 May, 1921 - ) – Actor. He started his career at the Hungarian Theater (*Magyar Színház*), Budapest in 1945. Thereafter he was a member of the Art Theater (*Művész Színház*) (1945-1946), and the Comedy Theater (*Vígszínház*) (1946-1949), the Madách Theater (*Madách Színház*) (1951-1958), and the National Theater (*Nemzeti Színház*), Budapest (1958-1959). Later worked as a forester (1959-1962), following which the József Katona Theater (*Katona József Színház*), Kecskemét (1962-1964) employed him; finally he was again working at the Comedy Theater (*Vígszínház*), Budapest, (1964). He appeared in most of the classical Hungarian, as well as foreign plays, among them Lucifer in Madách's *The Tragedy of Man (Az ember tragédiája)*; Max the Knife in Brecht-Weil's *Beggar's Opera (Koldusopera)*; the title role in Shakespeare's *Coriolanus*; Antonius in *Antony and Cleopatra*; Oscar Madison in Neil Simon's *Odd Couple (Furcsa pár)*, and Uncle Ben in Arthur Miller's *Death of a Salesman (Az ügynök halála)*. He also appeared in several feature films and TV productions, among them *Somewhere in Europe (Valahol Európában)*, and *Dr. Jekyll and Mr. Hyde* (American production). There is a György Bárdy Prize, established in 2006. He received the Mari Jászai Prize (1958), the Merited Artist title (1983), the Order of the Banner of the Republic of Hungary (1991), the Outstanding Artist title (2000), the Life Achievement Prize (2003), and the Middle Cross of the Order of Merit with the Star of the Republic of Hungary (2006). – B: 0871, 1105, 1445, T: 7684.

**Barényi, Béla** (Hirtenberg, Austria, 1 March 1907 - Stuttgart, Germany, 28 February 1997) – Engineer, pioneer of automobile safety. He completed his studies at the Viennese Technical School. He designed the famous Volkswagen *Beetle* passenger car in 1925. However, Porsche was later credited with the invention (1938). Barényi took legal action in 1955, and a German Court and the State Patent Office in Mannheim acknowledged that Barényi had invented the concept and the main components of the Volkswagen Beetle. From 1939 to 1974 he worked for Daimler-Benz, heading the planning department. Among his several inventions was the passive safety idea. Out of his 2500 inventions for the automobile industry, dividing cars into three collision zones was the most significant one (1951). The rigid passenger cell is enclosed by deformable front and rear ends (crumple zones) that absorb the impact of collision. Today, every automobile company in the world manufactures cars based on Barényi's design. Crash tests are also

associated with his name. He retired in 1974. Barényi's inventions completely changed the world's automobile production. In recognition of his achievements he was admitted to the Automotive Hall of Fame in 1994. With his ideas he has saved the lives of millions on the roads. – B: 1279, T: 7103.

**Barki, Éva Mária** (Vienna, 1948 - ) – International lawyer. She was born into a Hungarian family living in Austria. As infant she lost her father and was raised by her mother in the spirit of Hungarian identity. The 1956 Hungarian Revolution and Freedom Fight had a decisive impact on her life. In high school she sometimes debated some of the statements of the history teachers. She read Law at the University of Vienna under the direction of the renowned professors Günther Winkle and Felix Ermacora, who influenced the autonomy negotiations of South Tirol. She has a law-firm in Vienna dealing not only with civil cases but also issues on international law, human rights and national rights. She is President of the *Association for the Study of the World Refugee Problem – WAR*, and board member of the *Internationales Institut für Nationalitätenrecht und Regionalismus – INTEREG*, Munich, and is president of the *Austrian Human Rights League*. Her early activities included dealing with Hungarian refugee issues. She was also observer for Amnesty International on the political trials in Bratislava, Athens and Belgrade. At the time of the changes in the political system in Hungary, she became one of the founding members of the *Hungarian Democratic Forum (Magyar Demokrata Fórum – MDF)*, and was its western spokesperson. Already in the 1980s she represented Transylvanian refugees from Romania. Since that time the sad fate of the 2 million Transylvanian Hungarians/Szeklers in Romania became her favorite theme. The first anti-Ceausescu press-conference in the West took place in her office. She organized the Transylvanian Committee, and as its President, represented the Hungarians in Transylvania at international forums. Due to her activities, the Human Rights Committee of the United Nations, Geneva, condemned Romania for human rights violations. She fought for international recognition of the *Romanian Hungarians' Democratic Alliance (Romániai Magyarok Demokratikus Szövetsége – RMDSZ)*. During the South-Slavic War, both Slovenia and Croatia asked for her help in the realization of their independence. Dr. Barki continuously keeps her eyes on the situation of Hungarians in Transylvania. In 1994 she was declared by Romanian authorities as an enemy of Romania, spreading a negative image of Romania in the West. There was a time when the Austrian secret police warned her that there was a plot against her life, and received police protection. In addition, she was declared *persona non grata* in Romania and was twice banned from entering Romania. Later the ban was lifted and she has already been a key speaker in youth camps there. Her international experience will be a great help in the realization of autonomy for Szeklers in Transylvania. She is also a welcome speaker wherever Hungarians live in the world. – B: 1759, T: 7103.→**Political Parties in Hungary.**

**Barkós** – An ethnic group living in Erdőhátság and in Borsod, Gömör, Heves and Nógrád counties of Northern Hungary (*Felvidék*, now Slovakia), inhabiting about fifty villages. They are considered to be ancient inhabitants prior to the Hungarian Settlement of the Carpathian Basin (895-896). Most of their villages were established on cleared woodlands. The origin of their name is unknown, although in written sources they already appear with the name “*Barkó*” at the beginning of the 1800s. They kept their archaic folk culture until the 20th century due to the isolation of their villages in closed

valleys, far removed from the cities. Their speech is somewhat easier to understand than the *Palóc* dialect, although they share quite a lot of words and a similar pronunciation. Their clothes are as striking as their language. While their women wear long skirts, the men favor short shirts, embroidered peasant cloaks and white sheepskin waistcoats. They are resourceful and manually skilled. Their typical house, called “*egyporta*”, consists of 3 or 4 houses behind each other, built around a common courtyard. The center of their territory is Ózd. Their best-known villages are Domaháza, Hangony and Szentsimon. – B: 1134, 1020, T: 3240.→**Palóc**.

**Barn** – A farm building or shed used for storage. Its Hungarian name is “*pajta*”. Both ends of the building were used for keeping straw and hay, while the middle part was a working area or used for storing carts. Attractive barns used to be built in Transylvania (*Erdély*, now in Romania). Sometimes barns were built next to the stable. – B: 1134. – B: 1137, T: 3240.

**Barn Stomper** – This is the collective name of various Szekler dances. Usually performed solo by young men. Its pace is lively with fanciful stomping movements. It is practised on the right bank of the River Sebes-Kőrös (now Crișul Repede, Romania) from Élesd (now Aleșd, România) to Királyhágó (now Bucea, Romania) in Western Transylvania (*Erdély*, now all in Romania). – B: 1134, T: 7656.→**Szeklers**.

**Báródság** – An area in Western Transylvania (*Erdély*, now in Romania). It is located on the right bank of the River Sebes-Kőrös (now Crișul Repede) from Élesd (now Aleșd) to Királyhágó (now Bucea). Kings of the House of Árpád designated the population of the area to defend the military road through the valley leading to central Transylvania. The people of this region were feudal subjects of the king, their leader having the title of a royal captain. This designation came to an end after 1711. – B: 1134, T: 7656.→**Árpád, House of**.

**Baron** – A title from feudal times. The word carries the general meaning of a powerful man. In Low Latin *baro* means slave or servant. As the feudal system became entrenched in Europe integrating its three essential components (the concepts of land ownership, of hereditary rights and of service), a “baron” became a “man”, on whom a superior relied. He was the superior's man who had taken the oath of allegiance. The feudal system allowed the baron to hold land as a tenant-in-chief of his superior. In Hungary during the 13-15th centuries, church and secular dignitaries were at first known as *bannerets*, and only later were named barons. From the time of King Mátyás I (Matthias Corvinus) (1458-1490), the more affluent nobles, those who were entitled to a mounted escort, were named barons. Only from the 15th century did the king bestow the title of baron, when it became hereditary. In the period of the Austro-Hungarian Monarchy (1867-1918), families with an industrial background, among them many Jews, were elevated to this rank. In Hungary the title was bestowed until 1918. – B: 1192, 0942, T: 7103, 7669.→**Mátyás I, King**.

**Baross, László**→**Bánkút Wheat**.

**Baróti, Géza** (Szabó) (Déva, 22 August 1914 - Biatorbágy, 2 September 1993) – Writer, journalist. His career started at the newspaper *Fejér County Diary* (*Fejér megyei Napló*). Later he worked at the papers *Evening* (*Est*), *Small Newspaper* (*Kis Újság*) and the *Interesting Newspaper* (*Érdekes Újság*). He wrote short stories as well. His writings appeared in the magazines *Bridge* (*Híd*) and, the *New Times* (*Új Idők*). For decades he

was a contributor, then chief contributor to the daily *Hungarian Nation* (*Magyar Nemzet*). Beside journalism he was successful as a writer, playwright and critic. His major works include *Acacia Way* (*Akácos út*) novel (1936); *Honorable House* (*Tisztességes ház*) novel (1943); *Chinchilla* (*Csincsilla*) novel (1944); *Wolf Inside* (*Benn a farkas*) drama (1953); *Spring in Siberia* (*Tavaszi Szibériában*) travelogue, with J. Randé, (1968); *Ecstasy? The Dramas of Alcohol* (*Mámor? Az alkohol drámái*) reports (1969); *Home Stories, Reports* (*Hazai történetek, riportok*), with P. Ruffy and A. Kristóf, (1970). There are more than 100 radio-plays to his credit, including the popular *Szabó Family* (*Szabó család*); co-writer and author of 10 scripts for musicals, including *No. 77 Bastion Promenade* (*Bástya sétány 77*). He was a recipient of the Ferenc Rózsa Prize (1963), the Golden Pen (1963), the Silver Medal of Labor, and the Sándor Pethő Prize (1992). – B: 0877, 1031, 1257, T: 7103.

**Baróti, Lajos** (Louis) (Kratochfill) (Barót now Baraolt, Romania, 19 August 1914 - Budapest, 23 December 2005) – Soccer player and coach. He was born into a teacher family in Erdély (Transylvania, now in Romania). At 14 he moved with his family to Szeged, where he lived until 1946. He graduated from the Law School of the University of Szeged in 1940. He attended the School of Physical Training, Budapest in 1947 and 1956. He played soccer with the Szeged Football Club team in 1928-1948, at the Győr ETO Football Club in 1946-1948. He was member of the winning team of the University World Competition in 1935. He was on the National Team twice between 1939 and 1941, and also played on various other teams (e.g. *Vasas*, *Dózsa*, *Postás*). In 1979 he became coach of the Wacker Innsbruck FC (Fußballclub), and from 1980 to 1982, he was coaching the S. L. Benfica of Lisbon. From 1957 to 1966, and from 1975 to 1978, he was coach of the Hungarian National Team. In 1971 and in 1972 he coached the Peruvian National Team. He retired in 1978, and from then on he was Honorary President of the Hungarian Soccer Association. – B: 0874, 1178, T: 7103.

**Baróti Szabó, Dávid** (Barót, now Baraolt, Romania, 10 April 1739 - Vért, now Virt, Slovakia, 22 November 1819). – Poet, priest, literary translator. He came from a Szekler (Transylvanian Hungarian) family of the lesser nobility. In 1757 he entered the Jesuit Order at Székelyudvarhely (now Odorheui Secuiesc, Romania) and studied and taught in a number of places until his ordination in 1770 in Kassa (now Košice, Slovakia). In 1770-1771 he taught high school in Nagyvárad (now Oradea, Romania). He spent his third probationary pastoral year at Besztercebánya (now Banská Bystrica, Slovakia) (1772-1773). After the dissolution of the Jesuit Order he taught in Komárom from 1773, and in Kassa from 1777 to 1799. Together with Ferenc (Francis) Kazinczy and János (John) Batsányi, he edited the first Hungarian-language literary periodical *Magyar Museum* from 1788. He retired in 1799 and lived in his home of his student days at Virt. He was one of the poets of the nationality movement of the lesser nobility, the first to introduce Greco-Roman metrics in Hungarian poetry. He enriched the Hungarian language with words from the various dialects, while introducing other innovations. He was involved in a debate over the so-called “prosody fight” with József (Joseph) Rajnis and Miklós (Nicholas) Révai. His works include *B. Sz. D. poetical works* (*B. Sz. D költeményes munkái*) (1787) and *Infant Dictionary* (*Kisdéd szótár*) (1784, 1792). He translated Vergil’s *Aeneas* (*Virgilius Éneisse*) (1810, 1813). There is a Dávid Baróti Szabó Memorial Committee in Transylvania, and a Hungarian school at his birthplace at Barót. A Hungarian School at Székelyudvarhely (now Odorheiu Secuiesc, Romania) bears his

name, and a memorial house in Komárom is dedicated to him. – B: 0883, 1257, T: 7456.→**Batsányi, János, Kazinczy, Ferenc.**

**Bársony, Rózsi** (Róza Sonnenschein) (Budapest, 14 March 1909 - Vienna, 28 March 1977) – Actress. She already scored some success as a child actress; later she attended Szidi Rákosi's School of Dramatic Arts, Budapest. From 1925 to 1931 she was member of the King's Theater (*Király Színház*), Budapest. She began her career in the theater choir, later getting various smaller roles. In 1929 she also appeared in the Magyar Theater (*Magyar Színház*). From 1932, together with her husband Oscar Dénes, she went on a tour of Europe and America, where they popularized Hungarian operettas; they were particularly successful as Daisy Parker in Pál Ábrahám's *Ball at the Savoy* (*Bál a Savoyban*). She appeared as an actress at the Operetta Theater (*Operett Színház*), Budapest, in 1934, in the Magyar Theater in 1935, again in the Operetta Theater in 1936, at the King's Theater during 1936-1937, and at the Andrassy Boulevard Theater (*Andrássy úti Színház*), Budapest, in 1938. Due to the anti-Semitic measures, she was unable to appear as an actress during World War II. After 1945 she did not appear much as an actress. In 1948 she left Hungary and lived in Vienna. In the 1960s she often played in Hungary as well, appearing mainly on television and in open-air variety shows. She excelled in soubrette primadonna roles, winning the hearts of the audience with her humor, attractive singing voice, and virtuosic dancing ability. Her main roles included Bözsi in B. Zerkovitz's *My Violin Shattered* (*Eltörött a hegedűm*); Icike in P. Ábrahám's *Viktória*; Zizi in L. Lajtai's *The Clever Mom* (*Az okos mama*); Stefi in A. Szirmai's *Alexandra*; Kató in M. Eisemann's *I and My Younger Brother* (*Én és a kisöcsém*), and Gingi in P. Ábrahám's *3:1 for Love* (*3:1 a szerelem javára*). – B: 1445, 1427, T: 7456.→**Rákosi, Szidi; Ábrahám, Pál; Lajtai, Lajos; Szirmai, Alberet; Eisemann, Mihály.**

**Barta, Gyula** (Julius) (Párkány, now Šturovo, Slovakia, 23 November 1922 - Pozsony, now Bratislava, 11 September 2008) – Painter. He received his high school education in Érsekújvár (now Nove Zamky, Slovakia) and in Dunaszerdahely (now Dunajska Streda, Slovakia). From 1949 to 1951 he studied at the Tibor Gallé School of Art, Budapest; then became a student of the Slovakian College of Fine Arts, Pozsony (now Bratislava, Slovakia) and completed his studies under J. Mudroch in 1952. Thereafter he was a freelance artist in Pozsony. In the 1960s his landscapes were characterized by abstract perception: buildings and scenery merge with simplified forms and color compositions. In the 1980s he returned to natural representation of landscapes along the River Danube. He created over a hundred murals, mostly with fellow artists Károly (Charles) Drexler and Sándor (Alexander) Szabó. His one-man exhibitions include one in Pozsony at the University Library jointly held with K. Drexler (1955), another at the Majernik Gallery in Pozsony (1960). He also had an exhibit at the Pryzmat Gallery of Krakow, Poland (1976) as well as joint exhibitions with S. Szabó in the Dunamenti Museum of Komárom, and the Town Gallery of Pozsony (1977). In 1982 his Jubilee exhibition was at the Novomesky Hall, pictures and sketches exhibition at the Bazovsky Gallery of Trenčín (now Trenčín, Slovakia). From 1952-1990 he had altogether about 50 exhibitions at home and abroad. His murals appear along with the work of others in Párkány, on the wall of the Mess Hall of the town's paper mill (1969). *Metamorphosis*, prepared from stained glass, can be seen in Rozsnyó (now Rožňava, Slovakia). He won the Majernik Prize of the Slovakian Association for Fine Arts (1975), and became Artist of Merit (1989). – B:

1083, 1890, T: 7456.→**Szabó, Sándor.**

**Bartalus, Ilona** (Helen) (Kőröstarcsa, 11 September 1940 - ) Music pedagogue, choir conductor. She graduated from the Secondary Musical Training School of Debrecen (1958), and from the Ferenc (Franz) Liszt Academy in Budapest (1963). Between 1964 and 1976, she taught and was choirmaster at the Lorántffy Secondary Musical Training School in Budapest. Between 1966 and 1984, she acted as instructor for foreign students. In 1973-1974, she taught post-graduate courses at the Liszt Academy of Music in Budapest; then became instructor at the Béla Bartók Music School teaching tonic solfège and music theory. In 1994 she became music director of Hungarian Television. From 1974 to 1978 she was visiting professor at the University of Western Ontario (London); in 1985-1986 at the Wilfrid Laurier University of Waterloo (Ontario), and in 1986-1987 at the Victoria Conservatory of Music (British Columbia), where she also taught tonic solfège and music theory. She also taught the Kodály-method of teaching music in Japan, Australia, Bulgaria, and in several Central European countries. She was one of the pioneers who introduced the Kodály method abroad. Between 1966 and 1982, at the request of the Hungarian Duna TV, she made 51 music films. In 1980 she also published a songbook: *Sing, silverbirch, sing: a Collection of Canadian Folksongs with Analysis*. In 1999, she was awarded the Small Cross of the Order of Merit of the Republic of Hungary. – B&T: 7617.→**Kodály Method.**

**Bartalus, István** (Stephen) (Bálványosváralja, now Unguras, Romania, 23 November 1821 - Budapest, 9 February 1899) – Folk music researcher, music historian, music critic in Kolozsvár (now Cluj-Napoca, Romania), where he also studied Law, Philosophy, Theology and Music. He was the music tutor at the Wesselényi Castle. From 1848 he was the best-known music educator in Kolozsvár. He went to Budapest in 1851 as a concert performer, and then worked as an educator/instructor in a preparatory school. His career as a composer began in 1858. During the 1860s he conducted historical music research in libraries in Hungary and Austria and he carried out significant folk music research from 1870. In 1873 he started publishing the *Universal Collection of Hungarian Folk Songs (Magyar Népdalok Egyetemés Gyűjteménye)*. In the last two decades of his life he published studies on Hungarian and world music history. His activities in the history of Hungarian musicology are of fundamental importance as are his folk music research activities. – B: 0883, 1257, T: 7684.

**Bártfa Collection** – A music collection in the library of the choir of St Egyed Church of Bártfa (now Bardejov, Slovakia). It consists of 16th-17th century manuscripts and printed musical compositions, phrase books and organ tabulators. The collection was acquired by the National Museum, Budapest in 1916. The oldest volumes of the manuscript works are in volumes 22 and 23, dating from about 1550, containing approximately 200 works each. Among the 19 printed works, 11 have manuscript additions from the end of the 16th century. – B: 1197, T: 7666.

**Bartha, Antal** (Anthony) (Budapest, 3 April 1927 - Budapest, 13 December 1999) – Historian. As an orphan he lived and studied at the high school of a Reformed College. In 1946 he was sent to study at Oxford University, England. During 1947 he studied at the University of Budapest, and in 1948-1949 furthered his studies at the Department of History at the University of Kazan (then Soviet Union, now the Russian Federation). In 1950-1957 he worked in the Medieval Section of the Hungarian National Museum under

Erik (Eric) Molnár, while in 1955 he participated in a research expedition to Mongolia. From 1958 to 1976 he worked at the Institute of History of the Hungarian Academy of Sciences; and while there, he completed his MSc thesis in 1964. He obtained his Ph.D. in 1975. From 1976 until his retirement in 1988 he was with the Ethnographic Research Section of the Hungarian Academy of Sciences. In 1979 he was appointed Professor at the Department of Historical Auxiliary Sciences of the University of Budapest. His works include *The Hungarian Community in the 9th-10th Centuries (A IX-X századi magyar társadalom)* (1968); *Community and Economy in Hungarian Ancient Historical Period (Társadalom és gazdaság a magyar őstörténetben)* with A. Bartha, K. Czeglédy, A. Róna-Tas eds. (1977); *Studies on Ancient Hungarian History (Magyar Őstörténeti Tanulmányok)*, and *Ancient History of the Hungarian People (A magyar nép őstörténete)* (1984). – B: 0969, T: 7456. → **Czeglédy, Károly.**

**Bartha, Tibor** (Magyarkapud, 13 July 1912 - Budapest, 4 July 1995) – Bishop of the Reformed Church, writer, politician. He studied Theology at the Reformed Theological Academy, Debrecen (1930-1934), then in Halle, Marburg, and Basel (1934-1936). He earned a Doctorate in Theology from the University of Debrecen in 1938. He was Assistant Minister in Hajdúhadháza, Sáp, Debrecen and Csaholc (1934-1941). He was a teacher of religion in Munkács (now Mukacheve, Ukraine) (1941-1945), as well as minister in the Ministerial Retreat Home of Berekfürdő (1949-1951), and in the Árpád Square Church, Debrecen (1951-1957). Meanwhile, he was a professor at the Reformed Theological Academy, Debrecen, and Assistant to Bishop János (John) Péter of Debrecen. He was Minister of the Great Church, Debrecen (1958-1986) and became Bishop of the Transtibiscan Church District from 1958 until his resignation in 1986; President of the Reformed General Synod (1962-1983); President of the Ecumenical Council of the Hungarian Churches (1959); Member of Parliament (1958), Member of the Presidential Council of the People's Republic of Hungary. He was in charge of the Reformed Church during most of the Communist era. He was the founding father of the *Theology of Service (A szolgálat teológiája)*, the official Theology of the Church. It was developed by a group of theologians from the *Narrow Way Theology (A keskeny út teológiája)* of Bishop Albert (Albert) Bereczky. His writings include *The Word of God and Our Sermons (Az Isten igéje és igehirdetésünk)* (1938) and *Gospel, Church, People, vols. i-ii (Ige, Egyház, Nép, I-II)* (1972). A great number of his articles appeared in Hungary and abroad. He received an Honorary Doctorate from the Lutheran Theological Academy, Budapest (1972) and from the Protestant Theological Institute, Kolozsvár (now Cluj-Napoca, Romania) (1974). He was a recipient of a number of distinguished medals, among them the Labor Order of Merit Golden Class, the Banner-Order with Rubies of the People's Republic of Hungary, and the Order of St Vladimir. – B: 0910, T: 7103. → **Bereczky, Albert; Péter, János; Reformed Church in Hungary.**

**Bartholomäus Pannonius** (Buda, circa 1400 - after 1522) – Humanist writer, poet. He studied at the University of Vienna, where he was also magister. He returned to Buda in 1517. He spent some time in Rome, then returned to Hungary again and settled down in Körmöcbánya (now Kremnica, Slovakia). He joined the followers of Martin Luther. He published two humanistic comedies *Comedia Gryllus* and *Vigilantiae et Torporis Virtute arbitra certamen* sometime after 1515. – B: 1152, T: 7456.

**Bartis, Ferenc** (Francis) (Gyergyószárhegyes, now Lăzarea, Transylvania, *Erdély*, now

in Romania, 4 July 1936 - Budapest, 9 June 2006) – Writer, poet, politician. He completed his studies at the Teachers' Training College at Marosvásárhely (now Targu-Mures, Romania) (1968) and at the Stefan Georghiu Academy, Bucharest (1975). He was Editor of the *Village People (Falvak Népe)* Hargita, the *New Life (Új Élet)*, and other newspapers. He was arrested five times and sentenced to prison terms for his anti-dictatorial stand and activities. In 1954 he organized the *Pan-Hungarian Association (Összmagyar Testület)*. He wrote for a long time under the pseudonym *Bridge Builders (Hídverők)*. Altogether he spent ten years in Romanian prisons. At the time of his release he was deaf in one ear and had nineteen broken bones. Stripped of Romanian citizenship in 1984, he moved to Budapest. In 1985 he organized the *Transylvanian Peoples' Democratic Resistance Movement (Erdélyi Népi Demokratikus Ellenállási Mozgalom)*. It is active in 33 countries with 31 departments under the name of *Pan-Hungarian Association (Összmagyar Testület)*. He wrote 39 books, among them *Stubborn Love (Konok szeretet)* poems (1970); *Cruel Beauty (Kegyetlen szépség)* poems (1975); *Provision for the Arrivers (Útravaló érkezőknek)*, poems (1989), *The World's Soul was Stolen (Ellopták a világ lelkét)* poems (1988); *You Should want to Live in Freedom! (Akarjatok élni szabadon!)*, poems (1999), and *I Have Adopted the Earth - Compass for Hellwalkers (Örökbe fogadtam a Földet – iránytű pokoljáróknak)*, poems (2001). He wrote plays and prose, such as *Stones and Grassblades (Kövek és fűszálak)* (1980); *Apotheosis of the Survivor (A túlélő megdicsőülése)* (1996), and some 3000 articles, studies and essays in domestic and foreign publications. He appeared at several international forums and fought for the rights of Hungarian and other minorities in Transylvania (Romania), and for the poor and oppressed of the world. His life-story was twice made into film: *Bridge Builders (Hídverők)* and *Compass for Hellwalkers (Iránytű pokoljáróknak)*. He lectured as guest speaker at many places, and received honorary citizenship of the City of Budapest and Gyergyó. He is a recipient of 33 awards, among them the Officer's Cross of Order of Merit of the Republic of Hungary. – B: 0874, T: 7103.

**Bartók, Béla** (Nagyszentmiklós, Transylvania, now Sinnicolau Mare, Romania, 25 March 1881 - New York, NY, USA, 26 September 1945) – Composer, concert pianist

and musicologist. His musical interests and talents were already evident in childhood. The young Bartók's first compositions, minor dances and a piano piece, called *The Flow of the Danube (A Duna folyása)* appeared in Nagyszöllös (now Vinohradiv, Ukraine). He first performed in public at a school festivity in 1892. At the beginning of 1894 his family moved to Pozsony (now Bratislava, Slovakia). This greatly contributed to his musical development, since musical life among the Hungarian country towns was the liveliest there. By the age of 18 he knew well the musical literature of the period from Bach to Brahms. In Pozsony he became acquainted with Ernő (Ernest) Dohnányi, four years his senior, on whose advice he enrolled not at the Conservatory of close-by Vienna, but in the Ferenc (Franz) Liszt Academy of Music in Budapest. The great experiences of the college years

supplied provisions for his whole life and created the awakening of his nationalistic and social thinking. The road to nationalism for Bartók pointed in the direction of social development and European culture. One of his early compositions is the *Kossuth Symphony*, written in 1903.

The years 1905-1906 brought a turning point in the career of the artist, as his attention turned toward folk music. With the help of Zoltán Kodály, he began a systematic collection of folk songs. Within a decade he had traveled through the most diverse parts of Hungary, especially Transylvania (*Erdély*, now in Romania) and soon extended his activities to the musical culture of other peoples as well. During a three-year period he did research work on several occasions in the Slovak speaking regions; and until World War I also in Romania. Relying on folk music sources, together with Kodály, he created a new Hungarian musical style. However, their work was not looked upon favorably. It was treated with indifference and even hostility. The decade following World War I was spent on a series of concert tours. He gave concerts in Germany, England, France, Holland and Italy. Later he traveled to the United States and the Soviet Union. In 1936, at the invitation of the Turkish Government, he went on a folk music collecting tour in southern Anatolia.

He was recognized the world over, and respected as a performer and composer. In Hungary official opinion of him slowly changed in his favor. For 27 years he was professor at the Ferenc (Franz) Liszt Academy of Music in Budapest, the position he left in 1934. Finally in 1940, he and his second wife, Ditta Pásztory, left for the United States for political reasons. Bartók, one of the outstanding Hungarian musicians of the 20th century, spent his last years in New York. He died on 16 September 1945. His funeral was held in New York's Fern Cliff Cemetery. On 22 June 1988 his remains were exhumed and after an official farewell in New York, the casket was put on the ocean liner Queen Elizabeth II, shipped to Great Britain, and then taken to Hungary. There were Bartók memorial celebrations in Southampton and later in Cherbourg, France. Concerts and exhibitions celebrated the accomplishments of the great Hungarian composer for ten days in France. Among his greatest works are the three *Piano Concertos* (1926, 1931, 1945); *Sonata for Two Pianos and Percussion* (1937); the two *Violin Concertos* (1907, 1938); the *Sonata for Solo Violin*, written for Yehudi Menuhin (1944); the six great *String Quartets*; the one-act ballet *The Wooden Prince* (1914-1916); the pantomime-ballet *The Miraculous Mandarin* (1919); the one-act opera *Bluebeard's Castle* (1911); *Music for Strings, Percussion and Celeste* (1936); *Divertimento for Strings and Orchestra* (1939), and *Concerto for Orchestra* (1943). – B: 0883, 1031, T: 7684. → **Kodály, Zoltán; Dohnányi, Ernő; Lajtha, László.**

**Bartók, de Málnás, György Jr.** (George Jr.) (Málnási) (Nagyenyed now Aiud, Romania, 3 August 1882 - Budapest, 26 November 1970) – Philosopher. He came from a Szekler lesser noble family; his father was Reformed Bishop György (George) Bartók. Bartók Jr. was educated at his birthplace and at Szászváros (now Orastie, Romania). Between 1900 and 1905 he studied Hungarian and German Language and Literature at the Faculty of Humanities of the University of Kolozsvár (now Cluj-Napoca, Romania). At the same time he was a divinity student at the Reformed Theological Academy. He continued his Philosophy studies in Leipzig, Berlin and Heidelberg, Germany (1905-1906). Returning home he acquired a Ph.D. in Philosophy (1906) and became a lecturer in Theology (1908). At the beginning of his career he taught at a high school. In

September 1909 he was appointed professor at the Reformed Theological Academy, Kolozsvár where he headed the New Testament Department until 1912. He also taught at the Faculty of Humanities of the University of Kolozsvár until 1917, when he was appointed full professor. At the time of the Versailles-Trianon Peace Treaty (1920) he stayed on in Kolozsvár. In the summer of 1921 he joined his colleagues in exile when the University of Kolozsvár moved its education program to Szeged. He led the Department of Philosophy at the University of Szeged for nearly twenty years. In 1940, the Northern Transylvania was returned to Hungary by the Second Vienna Award, together with the University, György Bartók returned to Kolozsvár, where he was Rector of the University in 1940-1941. In the fall of 1944, when the Soviet and Romanian armies reoccupied Northern Transylvania, he had to escape from Kolozsvár.

He became member of the Hungarian Academy of Sciences (corresponding in 1927, ordinary in 1945). In spite of getting pensioned off the same year (1945), he still gave lectures at the Reformed Theological Academy and at the University of Economics in Budapest, though relegated to the background. After World War II he was stripped of his membership at the Hungarian Academy of Sciences, and it was restored only after 1990. He died almost forgotten after a long-lasting serious illness.

He was known as a follower of Károly (Charles) Böhm (1846-1911); but his theory was different from Böhm's philosophy in principal and essential questions. His works on the history of philosophy are *Kant's Ethics and the Moral Philosophy of German Idealism (Kant etikája és a német idealizmus erkölcsbölcselete)* (Budapest, 1930); *The History of Moral Conception of Value vol. I (Az erkölcsi értékeszme története I)* (1926, vol. ii 1935); *The History of Greek Philosophy (A görög filozófia története)* (Den Hauge, 2002); *The History of Philosophy of the Middle and Modern Ages (A középkori és az újkori filozófia története)* (Budapest, 1935), and Monographs: *Kant* (Kolozsvár-Torda, 1925) and *Károly Böhm* (Budapest, 1928).

His first important theoretical work was *The Philosophy of Moral Value (Az erkölcsi érték filozófiája)* (1911). In this he tried to reconcile Kant's and Böhm's conceptions. This attempt made him consider the views on the aims, tasks and methods of philosophy and develop a new standpoint and program for himself in *The Essence of Philosophy (A filozófia lényege)*, (Szeged, 1924), then in *Man and Life* and in *The Outlines of Philosophical Anthropology (Ember és élet. A bölcseleti antropológia alapvonalai)* (Budapest, 1939). In Bartók's concept the history of philosophy and spiritual philosophy are inseparable. Bartók drew up the anthropological idea of Man in the name of human *thoughts* in their entirety and so he prepared the way for his own system. Only the first manuscript volume of his system is known: *Imagery and Knowledge (Képpalkotás és ismeret)* for his text might have been lost in the turmoil of the war. – B: 1253, T: 7689. → **Böhm, Károly; Ravasz, László.**

**Bartók, György** (George) (Málnás, Transylvania, now Malnas, Romania, 27 April 1845 - Kolozsvár, now Cluj-Napoca, Romania, 19 December 1907) – Bishop of the Reformed Church in Transylvania, (*Erdély*, now in Romania). He attended elementary school in his birthplace; then studied at Sepsiszentgyörgy (now Sfintu Gheorge, Romania) and Nagyegyed (now Aiud, Romania), where he taught after finishing his theological studies. In 1872 he registered at the University of Tübingen, Germany and earned a Ph.D. in Philosophy in 1874. He was the Bishop's secretary in Kolozsvár and was Minister first in

Nagyenyed in 1876, then in Szászváros (now Orastie, Romania) in 1893. He taught at the Theological School of Nagyenyed during 1889-1893 and 1895-1896. He was elected Bishop of the Transylvanian Reformed Diocese (*Erdélyi Református Egyházkerület*) in 1899, and as Minister of the Congregation of Kolozsvár in 1900. He was a member of the *Hungarian Protestant Literary Society (Magyar Protestáns Irodalmi Társaság)*, and edited the *Church and School Review (Egyházi és Iskolai Szemle)* (1876-1883). He wrote numerous articles and essays. – B: 0931, T: 7103.

**Bartók String Quartet** – Hungarian musical ensemble that is one of the world's most renowned string quartets. It was founded in 1957 as the Komlós Quartet by graduates of the Franz Liszt Academy of Music of Budapest, headed by Péter Komlós as first violin. In 1962, the group changed its name to the Bartók String Quartet. Their international career began with a first prize at the 1964 String Quartet Competition in Liège, Belgium. In 1970, on Human Rights Day in New York, the Quartet participated in the Gala Concert in the United Nations' General Assembly Hall. In 1973, the Quartet gave three concerts at the opening festival of the new Sydney Opera House. Thereafter they performed at festivals all over the world. The six Bartók String Quartets, recorded for the French Erato (EMI) Label were honored by Italian and West German critics with the Grand Prix du Disc. They contributed a large number of recordings for the Hungaroton and Erato Labels of the works of Haydn, Schubert, Mozart, Brahms, Dvorak, Debussy, as well as Beethoven complete String Quartets. The Quartet, in the opinion of the Financial Times' critic, is ranked among the top 6 best ensembles of the world. They received numerous national and international awards. – B: 1031, 2042, T: 7617.→**Bartók Béla; Komlós, Péter.**

**Basilides, Mária** (Maria) (Jolsva, now Jelsava, Slovakia, 11 November 1886 - Budapest, 26 September 1946) – Opera singer (alto). She studied at the Ferenc (Franz) Liszt Academy of Music of Budapest. She was contracted by the People's Opera (*Népopera*) in 1911. In 1915 she was admitted to the Royal Hungarian Opera House on a scholarship and was made a life member there in 1934. She remained active until her death. She was an outstanding *Lieder* singer (Schubert and Mahler), as well as oratorio singer (Bach). From 1923 onward she regularly performed in the great music centers of Europe. She was one of the greatest vocal artists of the period, especially outstanding in the operas of Gluck, Handel and Wagner, and an excellent interpreter of the art songs of Béla Bartók and Zoltán Kodály. – B: 0883, 1031, 1445, T: 7617.→**Bartók, Béla; Kodály, Zoltán; Tiszay, Magda.**

**Basilides, Zoltán** (Vágújhely, now Nové Mesto nad Vádom, Slovakia, 26 March 1918 - Budapest, 29 September 1988) – Actor. He studied opera at the Ferenc (Franz) Liszt Academy of Music, Budapest. In 1949 he was member of the Theater Company (*Színház Társulat*), Debrecen. From 1951 he was with the Madách Theater (*Madách Színház*), Budapest. His robust stature and *basso profundo* voice rendered him suitable for representing men of great strength. His lyrical inclination and acerbic sense of humor were most effective in portraying extreme and controversial characters. Some of his more significant roles were Zemlianyka in Gogol's *The Inspector General (A Revizor)*; Lopakhin in Chechov's *Cherry Orchard (Cseresznyés kert)*; Marco in Miller's *A View from the Bridge (Pillantás a hídról)*; Ghost in Shakespeare's *Hamlet*. He also acted in films such as *Student Gábor (Gábor diák)* (1955); *Captain of Tenkes (A Tenkes*

*kapitánya*) (1963), and *Yellow Rose (Sárga rózsza)* (1969). – B: 0871, 1160, T: 7684.

**Basis Communities** – A movement and network of small communities within the Roman Catholic Church. Their aim is the institutional renewal of the Church. The leaders are mostly lay people, who organize church fellowships of members who live their faith, believe in human dignity and have a sense of vocation. Regular meetings, joint prayers, as well as social, charitable and evangelizing activities characterize their communities. Their basic units are small committed groups. They have no hierarchy. The leaders, priests and lay people of both sexes function on an equal basis. The organization is decentralized, the individual groups enjoy a high degree of independence and members can transfer from one group to another and are open to outsiders. The most important Basis groups are the *Regnum Marianum*, the *Bush Movement (Bokor Mozgalom)*, *Charismatic Catholics*, *Focolare* (hearth), *Let us live the Word of God* movements, and the *Taizé* groups. The Bush Movement started its activities after World War II. Its founder is György (George) Bulányi, a Hungarian Piarist priest, who was condemned to an eight-year prison term in Hungary on the charge of activities dangerous to the State. He differed with church authorities on theological and disciplinary issues. On many issues he took a stand different from that of the Vatican and consequently the Bishops' Conference suspended his public activities in 1982. The Bush Community called attention to itself by fighting for advocating alternative military service. Many of its members were sent to prison for refusing military service. They represent love of humanity and refusal of violence. Pope Paul VI approved of the Basis Communities in 1975 by saying that they strengthen Christianity in secularized societies. – B: 1042, T: 7390.→**Bulányi, György S.P.; Catholic Church in Hungary.**

**Basta, Cart of** – During the rule of General Giorgio Basta (1599-1605), the ravages of Habsburg rule brought such destitution to the common people of Transylvania (*Erdély*, now in Romania) that in place of their confiscated animals they harnessed themselves to the cart, thus became known as “the cart of Basta”. – B: 0942, T: 7668.→**Basta, Giorgio.**

**Basta, Giorgio** (Ulpiano, Italy, 1544 - Vienna, 26 August 1607) – Soldier of Albanian descent. Rose from foot soldier to the rank of general. After fighting in almost all the battlefronts of Europe, he was stationed in Hungary in 1597. Following the death of András (Andrew) Báthory, he governed the principality of Transylvania (*Erdély*, now in Romania) together with Voivode Mihály (Michael of Wallachia). At Goroszló in 1601, he defeated Zsigmond (Sigismund) Báthory, who wanted to regain his throne; then he ordered the assassination of Voivode Mihály (Michael of Wallachia). In the name of Emperor Rudolf of Austria, he ruled with full power and exercised a reign of terror in the devastated Principality. He was rewarded with the rank of field marshal and the title of Count. He won a battle against István (Stephen) Bocskai at Osgyán; but was forced by the Hajdú (Hayduck) units to retreat to Eperjes (now Prešov, Slovakia). He escaped from there to Vienna in the spring of 1605 with his reduced army. Hungarian and Romanian historians alike portray Basta as a treacherous, licentious and violent man, motivated by ardent hatred of Hungarians. During his rule, Transylvania descended into chaos created by his army of mercenaries and bandits. During his reign of terror a third of Transylvania's population was lost, including most of the nobility. After his retirement, Basta wrote several military manuals. – B: 0883, 1031, T: 7687, 7103.→**Basta, Cart of; Bocskai, Prince István; Báthory, Count Zsigmond; Báthory, Prince András.**

**Básti, Juli** (Julie) (10 August 1957 - ) – Actress. She graduated from the Academy of Dramatic Art in 1980. Among her teachers were Zsuzsa (Susan) Simon and Tamás (Thomas) Major. She was member of the Gergely Csíky Theater (*Csíky Gergely Színház*) of Kaposvár and of the National Theater (*Nemzeti Színház*), Budapest (1979). From 1984 she acted at the Katona József Theater (*Katona József Színház*), Kecskemét. She appeared in most of the classical Hungarian as well as foreign theatrical leading roles, more than 30 plays, among them as Helena in Shakespeare's *A Midsummer-Night's Dream* (*Szenivánéji álom*), Lady Anne in *Richard III*, Ophelia in *Hamlet*; Masa in Chechov's *Three Sisters* (*A három nővér*); Ranzevszkaja in *The Cherry Orchard* (*A Cseresznyés kert*); Beatrice in Goldini's *Servant of Two Masters* (*Két úr szolgája*); Nelli in Örkény's *Key-seekers* (*Kulcskeresők*); Elmira in Molière's *Tartuffe*, and Jenny in Brecht's *The Beggar's Opera* (*Koldusopera*). She appeared in more than 23 feature films, among them *Split Ceiling* (*Kettévált mennyezet*); *Lost Illusions* (*Elveszett illúziók*); *The Red Countess* (*A vörös grófnő*); *Miss Arizona*; *Stalin's Fiancé* (*Sztalin menyasszonya*), and *Glass Tiger* (*Üvegtigris*). She is a recipient of the Best Female Role Prize, San Remo (1982), Moscow (1985), the Mari Jászai Prize (1985), the Film Critics' Awards the Theater Critics Award (1980, 1983, 1986, 1990, 1992), the Erzsébet Prize (1992, 1994), the Déryné Prize and the Kossuth Prize (1993), Member of the Society of Immortals (2005), and the Officer Cross of Order of Merit of the Republic of Hungary (2009). – B: 0871, 1439, 1445, T: 7617. → **Major, Tamás**.

**Básti, Lajos** (Louis) (Berger) (Keszthely, 17 November 1911 - Budapest, 1 June 1977) – Actor. He received his diploma at the Academy of Dramatic Arts, Budapest in 1935. Until 1937 he was member of the Inner City Theater (*Belvárosi Színház*), Budapest. He became noticed in the role of Dunois in Shaw's *St. Joan*. Between 1937-1939 he had important roles at the Comedy Theater (*Vígszínház*), Budapest, in the plays of Maugham, Hunyady, Molnár, O'Neill, Bókay and Deval. Afterwards he appeared at the Hungarian Theater (*Magyar Színház*) in Huszka's *Tokay Wine* (*Tokaji aszú*) and in János Vaszary's *The Devil is Not Sleeping* (*Az Ördög nem alszik*). In 1945 he was contracted by the Artist's Theater (*Művész Színház*). He played the SS officer in Steinbeck's *The Moon is Down* (*A Hold*), and the Actor in Molnár's *Prologue to King Lear* (*Előjáték Lear Királyhoz*). He played Ádám in Madách's *The Tragedy of Man* (*Az ember tragédiája*), and the title role in Katona's *Bánk bán*. Some of his important roles were Almoviva in Beaumarchais' *Marriage of Figaro* (*Figaró házassága*); Armand Duval in Dumas' *The Lady of the Camelias* (*La Dame aux Camélias – Kaméliás hölgy*); Menenius Agrippa in Shakespeare-Brecht's *Coriolanus*; Chancellor Ferdinand in Schiller's *Love and Intrigue* (*Ármány és szerelem*); Senator in Williams' *Sweet Bird of Youth* (*Az iffjúság édes madara*), and Edgar in Strindberg's *The Dance of Death* (*Haláltánc*). He gave an outstanding interpretation in the role of H. Higgins in G.B. Shaw's *Pygmalion*, as well as in its musical version, *My Fair Lady*. He was an outstanding recitalist, taught speech technique at the Academy for years. He was contracted by the Hungarian Radio, as well as by the Television. Some of his feature film roles were *St Peter's Umbrella* (*Szent Péter esernyője*) (1935), *Momentary Cash-Flow Problem* (*Pillanyatnyi pénzzavar*) (1937); *Siege of Beszterce* (*Beszterce ostroma*) (1948, 1955); *Daytime Darkness* (*Nappali sötétség*) (1963); *The Baron's Sons i-ii* (*A kőszívű ember fiai, I, II*) (1964), and *A Hungarian Nabob – Zoltán Kárpáthy* (*Egy magyar nábob – Kárpáthy Zoltán*) (1966).

His book entitled *What Are You Thinking About, Adam?* (*Mire gondolsz, Ádám?*), was published in 1962. In it he analyzed the role he played five hundred times. He was awarded the Best Interpretation Award at the Monte Carlo Film Festival, the Kossuth Prize, and was Outstanding Artist, and Artist of Merit titles. – B: 0871, 1439, 1445, T: 7684.

**Báthory, Gábor** (Gabriel) (Solt, 26 January 1755 - Nagykőrös, 12 February 1842) – Bishop of the Reformed Church. He studied at the schools of Solt, Kecskemét, and Debrecen, and from 1876 in Marburg and other universities in Germany and in Switzerland. He ministered in Tass in 1798, Dunapataj in 1792, Pest in 1796, and Nagykőrös in 1838. He was Bishop of the Danubian Church District from 1814 until his death. He was founder of the Reformed Congregation of Pest, and he built the Calvin Square Church, completed in 1830. He worked patiently and effectively in church organizations, pastoral work and in politics. His writings include *Evangelical Service Pleasing to the Lord God* (*Az úr Istennek tetsző evangéliumi szolgálata*) (1808); *Evangelical Christian Tolerance...* (*Az evangéliumi keresztyén tolerancia...*) (1822); *Could There Be, Is There a One-and-Only Redeeming Church?* (*Lehet-e, van-e egyedül üdvözítő ecclesia?*) (1822). He received an Honorary Doctorate from the University of Göttingen, Germany in 1817. – B: 0910, T: 7103.

**Báthory, Prince András** (Andrew) (*somlyói*) (1566? – Csíkszentdomokos, now Sândominic, Transylvania, Romania, 31 October 1599) – Cardinal, ruler of *Erdély*, Transylvania. He was raised by the Polish King István (Stephen) Báthory, at the royal court of Poland. He chose an ecclesiastic career, and soon became Prince-Bishop of Warmia (Ermland) (1589-1599). He was in Rome in 1583 and 1586. He was made Apostolic Protonotary in 1583, and Cardinal in 1584. On 30 March 1599, he became ruler of Transylvania after his cousin, Prince Zsigmond (Sigismund) Báthory resigned in his favor. Prince of Wallachia (now Romania) Mihai Viteazul (Michael the Brave – *Vitéz Mihály*) (1593-1601), utilizing the inner tensions of Transylvania went against Báthory with his army, helped by the Szeklers, and defeated him at the Battle of Șelimbăr (*Sellenberk*), near Brassó (Brasov), and the escaping András Báthory was killed by the Szeklers at Csíkszentdomokos. Mihail Viteazul became Prince of Transylvania in 1599-1600. – B: 0883, T: 7103. → **Báthory, Prince István; Báthory, Prince Zsigmond.**

**Báthory, Prince Gábor** (Gabriel) (Várad, now Nagyvárad/ Oradea, Romania, 15 August 1589 - Várad, 27 October 1613) – Reigning Prince of Transylvania (*Erdély*, now in Romania) (1608-1613). He came from the princely Báthory family. He was the last reigning prince from the family, and with the support of the *Hajdús* he became ruler of Transylvania. Gábor Bethlen also supported him. Báthory reigned only a few years, but his time was characterized by unrest. He had internal as well as external enemies. The Saxons turned against him because Báthory occupied Szeben (now Sibiu, Romania), despite it being a free royal town. He fought several battles with Radu Vlach Vojvode with changing luck. A part of the Transylvanian nobles organized a conspiracy against him, but Báthory suppressed it. The Viennese Court too, sent an army against Báthory, and even the Turks distrusted him; it was in the interest of both empires to be rid of him. When Báthory intended to hand over Várad to the Turks, his *Hajdús* killed him. – B: 1031, 2083, T: 7103. → **Bethlen, Prince Gábor; Hajdús.**

**Báthory, Prince István** (Stephen) (Somlyó, now Sumuleu, Romania, 27 September 1533

- Grodno, Poland 22 December 1586) – He was elected Reigning Prince of Transylvania (*Erdély*, now Romania) in 1571, and King of Poland in 1575. Following his studies at the University of Padua, Italy, he became a page at the court of Ferdinand I, and later a confidant to Queen Isabella and János (John) II (John Sigismund), King of Hungary and Prince of Transylvania. In 1564 he was made Captain of Várad (Nagyvárad, now Oradea, Romania). Between 1563 and 1565 he was an envoy to Emperor Ferdinand I, who interned him for two years. The Parliament elected him Ruling Prince of Transylvania on 25 May 1571, and he fought against the Habsburg expansion. After the Jagello House died out, the Polish Estates elected and crowned him as King of Poland in Krakow in 1576, and Reigning Prince of Lithuania as well. He proved to be an exceptional choice. He strengthened the country financially, kept Polish freedom intact, regained occupied lands from the Russians, and reinforced its boundaries. Although a foreigner, he controlled external affairs, reformed the army, the economy, the judicial system and the administrative structure. He selected capable assistants from amongst the Poles and utilized his experience in governing Transylvania to obtain effective counselors. In Polish history he is noted as an excellent commander. He defeated Ivan the Terrible of Russia, made favorable peace with Russia, and repelled a German attack. He is regarded as a bright light in Polish history, despite his short reign. He did not renounce his office as Reigning Prince of Transylvania; instead he installed a governor in his place. The more important foreign affairs issues were handled through the Transylvanian Chancellery in the Polish capital. He also planned a Polish-Hungarian-Transylvanian Alliance that would have forced both the Habsburg and Turkish powers to draw back; but due to his untimely death, this was not to be realized. He was buried in Krakow. The Poles regard him as one of their greatest kings. – B: 0883, 1122, 1257, 1445, T: 3312.→**Izabella, Queen; János II, King; Békés, Gáspár; Poland, Hungarians in; Polish-Hungarian Personal Union; Lithuania, Hungarians in; Báthory, Prince Zsigmond.**

**Báthory, Prince Zsigmond** (Sigismund) (Várad, now Nagyvárad/Oradea, Romania, 20 March 1572 - Libochovice, Bohemia, [German Libochowitz], now the Czech Republic, 27 March 1613) – Prince of Transylvania (*Erdély*, now in Romania). He was nephew of the great Báthory, Prince István (Stephen) (1533-1586). He was elected prince in his father's Kristóf (Christopher) lifetime. He was quite young at his father's death and the governance was entrusted to a Regency. In 1588 he became ruler and, following the advice of his councillor Alfonso Carillo, Báthory abandoned the traditional policy of Transylvania, i. e. the friendly relation with the Turkish Porta in order to counterbalance the ever hostile influence of the Habsburgs, and joined the league of Christian princes against the Turks. This radical change of policy prompted a part of the estates to depose Báthory at the Diet of Torda. Ultimately Báthory got the upper hand and executed all his opponents (1595). Initially Báthory won spectacular victories. In 1595 he subdued Wallachia and defeated the army of Sinan Pasha. The turning-point of his career was his separation from his wife, the Archduchess Christina of Austria in 1599, and his abdication as ruler of Transylvania in the same year. However, before all that, he offered the throne of Transylvania to the Emperor Rudolph II of Austria in exchange for the Duchy of Oppeln. However, in the following year, with an army of Poles and Cossacks, he attempted to recover his throne, but was defeated by Mihály (Michael), Voivode of Moldavia, at Suceava. Surprisingly, in 1601, the Diet of Kolzsvár (now Cluj-Napoca, Romania) reinstated him, but again he was driven out by Mihály, never to return.

Thereafter he lived in Prague. Báthory's unpredictable and contradictory policy left Transylvania in ruins. – B: 1222, 1031, T: 7103.→**Báthory, Prince István; Báthory, Prince András.**

**Báthy, Anna** (Anette Stampf) (Beregszász, now Berehove in Carpatho-Ukraine, 13 June 1901 - Budapest, 14 May 1962) – Opera singer (soprano). Between the years 1927 and 1930 she sang at the City Theater (*Városi Színház*), Budapest and was a member of the Opera House (*Operaház*), Budapest between 1930 and 1958; in 1955 she became a life member. She made numerous guest appearances in most major opera houses of Europe; was also a noted *Lieder* singer, especially outstanding in the interpretation of the songs of Béla Bartók and Zoltán Kodály. Her main roles were Donna Anna in Mozart's *Don Giovanni*; Elsa in Wagner's *Lohengrin*; Leonore in Beethoven's *Fidelio*, and the Empress in Kodály's *Háry János*. She was a recipient of the Kossuth Prize and the Outstanding Artist title. – B: 0883, 1178, 1445, T: 7617.→**Bartók, Béla; Kodály, Zoltán.**

**Batizi, András** (Andrew) (? Batiz, Transylvania, now Romania, circa 1515 - after 1546) – Lutheran preacher and songwriter. He worked as a schoolteacher in Kassa (now Košice, Slovakia) Sátoraljaújhely and Szikszó. He studied at the University of Wittenberg, Germany (1542) and became a Lutheran preacher in Tokaj, Hungary in 1545. He was one of the earliest propagators of the Reformation movement in Hungary. In the early 1540s he wrote the first evangelical catechism, and between 1530 and 1546, composed 10 songs in the spirit of the Reformation. A powerful interpretation of the 44th Psalm is one of the earliest Psalm adaptations, a moving allusion that portrays the sufferings of the Hungarian people under Turkish oppression. He wrote one of his most popular compositions the *Song on Marriage (A házasságról való ének)* in 1546. – B: 0883, 1257, T: 7684.

**Bátky, Zsigmond** (Sigismund) (Kocs, 5 January 1874 - Budapest, 28 August 1939) – Ethnographer. He completed his high school and university studies in Budapest, majoring in geography. At a young age he was employed at the Ethnographic Department of the Hungarian National Museum, where he worked for a few years. In 1922 he became the director of the Ethnographic Museum. In the work entitled *Ethnography of Hungary (Magyarország néprajza)* he was the author of the chapters on *Nutrition, Building Activities, Heating, and Mechanizations* (1905). He published in 1906 his work *Guide to the Organization of Ethnographic Museums (Útmutató néprajzi múzeumok szervezésére)*, ever since widely used as a handbook. Especially significant are his researches carried out in the field of popular building activities. His works include *On the Origin of the Hungarian Home (A magyar ház eredetéhez)* (essay, 1930); *Kocs and Tekevár (Kocs és Tekevár)* (study, 1926); and *Das ungarische Bauernhaus (The Hungarian Peasant House)* in: *Ungarische Jahrbücher (Hungarian Yearbooks)* (1938). His lifework considerably contributed to the rise of Hungarian ethnographic work to European level. To his memory the Hungarian Ethnographic Society and the people of the township of Kocs placed a memorial tablet on the wall of the local school in 1984. – B: 0883, 1031, T: 7456.→**Viski, Károly.**

**Batsányi, János** (John) (Tapolca, 9 May 1763 - Linz, Austria, 12 May 1845) – Poet. He studied at Keszthely, Veszprém and Sopron. While a law student in Pest (1784-1786) he tutored at Lőrinc (Lawrence) Orczy's family, where his literary life began. He became a

civil servant at the Hungarian Treasury in 1787. Together with Ferenc (Francis) Kazinczy and Dávid Baróti Szabó, he created the first Hungarian-language literary periodical, the *Hungarian Museum (Magyar Museum)* (1788-1792). In it he published his revolutionary poem, *On the Changes in France (A franciaországi változásokra)* in 1789. Owing to his progressive attitude he lost his position in 1793. While he was secretary to Miklós (Nicholas) Forgách, Lord Lieutenant of County Nyitra (now Nitra, Slovakia), he was arrested on 11 November 1794 for his part in the Hungarian Jacobite Movement. He was sentenced to a one-year imprisonment in the Castle of Kufstein, Austria. He was freed on 23 April 1796. He settled in Vienna, where he worked for a financial firm. He founded the *Magyar (Hungarian) Minerva* series. In 1809 he participated in the drafting of Napoleon's proclamation to the Hungarians, when he occupied Vienna. Upon the withdrawal of Napoleon's forces from Vienna, Batsányi moved to France and lived in Paris from 1809 on Napoleon's civil-list pension. The Austrian police arrested him after the fall of Napoleon. At first he was in captivity in Spielberg and was interned for life; then, from 1816, together with his wife, in Linz. As the first notable Hungarian representative of political lyrics, the pugnacious and cultured plebeian poet lived a large part of his life cut off from Hungarian literary circles. Striving for the reform of the nobility as well as favoring the German influence he was an important lyric poet of the Hungarian enlightenment era. The elegies he wrote in Kufstein are most outstanding. His poetic works include *Poems of János Batsányi (Batsányi János versei)* (1827). His prose was published in 1960-1961. He was a regular member of the Hungarian Academy of Sciences (1843). – B: 0883, T: 7456. → **Baróti Szabó, Dávid; Kazinczy, Ferenc; Kölcsey, Ferenc; Besse, János, Károly; Nagyváthy, János; Martinovics, Ignác; Jacobites in Hungary.**

**Batta, György** (George) (Rimaszombat, now Rimavská Sobota, Slovakia, 10 January 1943 - ) – Hungarian poet, writer, playwright in Slovakia. He graduated from the High School of Tornalja in 1959, and obtained his qualification in Slovak Literature from the Teacher Training College of Nyitra (now Nitra, Slovakia) in 1966. He worked as journalist for a number of newspapers. From 1975 he was Editor-in-Chief of the children's paper *Little Builder (Kis Építő)*, and from 1991 that of the *Cricket (Tücsök)*. Since 1995 he has been free-lancing. From 2006 he has been Editor-in Chief of the periodical *At Home (Itthon)*. His works include *Testament (Testamentum)* poems (1969); *Fifteen Spor Reports (Tizenöt sportriport)* (1973); *The Twentieth World War (A huszadik világháború)* poems (1974); *A Sentence on Love (Egy mondat a szeretetről)* poems (1991); *Singing Animals (Daloló állatok)* poems (1995), and *Sausage-recorder (Kolbászfurulya)*, children poems (1997), and J. Solovic: *Beggar-adventure (Kolduskaland)*, a play, translation (1972). His plays include *Rooster Dance (Kakastánc)* (1978), *Pumpkin-lamp (Töklámpás)* (1980), and *The Quail Egg (A fürjtójas)* (1987). – 0878, 1257, 1551, 1890, T: 7103.

**Battery of the Dead** – The name given to those artillery units who sacrificed themselves in the Battle of Königgrätz, Austria (now Hradec Krlovi in the Czech Republic) that was one of the decisive battles of the 19th century. The title originated after the battle, where the Austrian Army of 215,000 suffered a decisive defeat from the 220,000 better equipped Prussian Army. A Hungarian Mounted Field Artillery Battery fought on the Austrian side sacrificed themselves up to the last man and so merited the title "Battery of the Dead". – B: 1198, 1020, T: 3233.

**Batthyány Codex** – The oldest surviving handwritten Protestant gradual, originating between 1556 and 1563. It contains hymns, antiphones, translations of psalms etc, a good many of them dating from the Middle Ages, therefore they are of Roman Catholic origin. In translation the original texts have been changed to suit Protestant beliefs. To the unsung parts of the hymns, tunes were added and eventually some became popular folk tunes. Many of these melodies originated in 17th century graduals. The Codex is in the Batthyány Library at Gyulafehérvár (now Alba Iulia, Romania) from where it derives its name. – B: 1136, T: 7666.→**Codex Literature.**

**Batthyány, Count Lajos** (Louis) (Pozsony, now Bratislava, Slovakia, 14 February 1806 - Pest, 7 October 1849) – Politician, landowner, martyr of the War of Independence of 1848-1849. After completing his studies in Law he managed his large estate with progressive methods. In politics he was one of the leading forces of the opposition until 1848. On 15 March 1848 he was a member of the delegation that took the National Assembly's demands for reform to Vienna. Ferdinand V named him Prime Minister on the 17 March. The Hungarian Parliament sent him and Ferenc (Francis) Deák to the King to petition him to put an end to Jellačić's attack from Croatia against Hungary. The king refused to see the delegation and when Baron Josip Jellačić made a raid into the country with his Croatian units, Battyány resigned the next day. The following day, on the insistence of Lajos (Louis) Kossuth and others, he agreed to form a government again; but this did not receive Royal Assent, and his appointment was not ratified. Realizing that he would not be able to reach his goal, he officially withdrew his nomination on the 2 October 1848. In the National Assembly he continued to strive for consensus. He proposed that the National Assembly send a delegation to Prince Windischgrätz and he was to be a member of the delegation; but on the 3 January 1849, Windischgrätz did not receive him. Instead gave orders for his arrest in Pest on 8 January 1849. He was imprisoned in Buda, Pozsony, Laibach, and finally in Olmütz. He was tried for high treason that he unsuccessfully denied. He was sentenced first to a few years of imprisonment; then, on the influence of Schwarzenberg, to death with a recommendation for clemency. Baron Julius von Haynau, the Commander-in-Chief of the Austrian army in Hungary, ignoring formalities, ordered his execution by hanging. Batthyány attempted an unsuccessful suicide with a secretly obtained dagger. Due to his serious injuries he was not hanged but executed by a firing squad in the New Building (*Újépület*) of Pest on the 7 October 1849. The sentence caused worldwide grief and protest, the world press sharply attacked Austria. Haynau was replaced. A few days later Batthyány's body was laid to rest in the crypt of the Franciscan church in Pest; and after the Compromise of 1867 was transferred amidst national mourning to the Mausoleum of the Kerepes Cemetery of Budapest. This Mausoleum was broken into and ransacked in 1987. At the site of his execution a lamp now guards his memory. – B: 0883, 1031, 1105, T: 7668.→**Deák, Ferenc; Kossuth, Lajos; Haynau, Baron Julius Freiherr von.**

**Batthyány, Count Tódor** (Theodore) (? 26 October 1729 - ? 1812) – Landowner, inventor. He was known for his technical and economic improvements. In the mid 1780s he had a large workshop at Borostyánkő, where sulphuric acid, copper and needles were manufactured. He made plans for the regulation of the Danube-Sava and Kulpa-River waterways. In 1793 he patented a ship design, named *Bucentaurus*. The ship was actually built and equipped with horse-driven paddles and it could go against the stream. – B: 1160, T: 7103.

**Batthyány Gradual** – A most important 16th century manuscript of Hungarian Gradual literature. It was written between 1556 and 1563 as a collection of liturgical songs composed on the basis of Gregorian chants for Protestant religious purposes, called *Hymni et Psalmi cum notis cantus hungariae*. Its 19th century copy is in the library of the Hungarian Academy of Sciences in Budapest. – B: 1197, T: 7684.

**Batthyány Strattman, Prince, László** (Ladislas) (Dunakiliti, 28 October 1870 - Vienna, Austria, 22 January 1931) – Physician. He began his secondary education in the Jesuit College, Kalkburg, near Vienna, continuing it at Kalocsa and Ungvár (now Uzhhorod, Ukraine). From his early childhood he wanted to be a physician and to heal the sick for free. However, first he studied Agriculture, Chemistry, Astronomy and Philosophy at the University of Vienna, and only later did he switch to Medicine and acquired his Degree in 1900. In 1902 he founded his first fully equipped private hospital in Castle Köpcsény, where he healed all who sought his help, free of charge. Later he built and equipped a new 120-bed hospital. When Köpcsény was ceded to Austria in 1921, the regional administration took over the hospital. From then until 1990, it operated as the Köpcsény Hospital. The Prince moved to Körmend in 1922, and in his castle he opened another hospital – but now for those with eye troubles. He performed close to 20,000 operations, of which about 6,000 were eye operations. He died of cancer and was buried in the family's mausoleum located in the church of the Franciscan Order at Németújvár. A plaque on the wall of the church in Körmend tells the life story of the “physician of the poor”. A small exhibit in the renovated Batthyány oratorium of the parish church shows the physician's memorabilia. There are plans for his statue to be erected in the garden of the Batthyány Castle in Körmend. On 23 March 2003 “the doctor of the poor” was beatified by Pope John Paul II in St Peter's Square, Rome in the presence of Hungarian statesmen, Hungarian bishops and thousands of pilgrims from Hungary and Austria. – B: 1033, 1031, T: 7103, 7668.

**Batthyány Strattman, Prince Ödön** (Edmund) (Milan, Italy, 21 November 1827 - Körmend, 29 October 1914) – Sportsman, land owner. He purchased the ‘*Flying Cloud*’, a two-masted, 75- ton schooner in England. He and his crew won a challenge race with the Royal Thames Yacht Club in 1862, beating three larger vessels during the same year. He was the very first successful representative of Hungarian boat racing abroad. After returning home in 1866, he established sailing boat racing on Lake Balaton; but continued to race in England and won 13 times out of 14. – B: 0883, 1339, T: 7675. → ‘*Flying Cloud*’.

**Battle Axe** – A small, curved handle weapon on a long helve. The lighter “*csákány*” could be used successfully against chain mail replacing the heavier weapon, called “*csatabárd*” that was more effective against solid armor. At the end of the 15th century a sharp point was added to one side that could pierce an armor plate of sheet metal. – B: 1078, T: 3233.

**Batu** (circa 1205-1256) – Mongol Khan. He was a grandson of Genghis Khan, the first ruler of the “Golden Horde”. During his military campaigns between 1235 and 1246, he conquered the majority of the Russian principalities, chased away or subjugated the Cumanian tribes of southern Russia, and for many years strengthened the rule of the Golden Horde. He ravaged Poland in 1240-1241; and following the victory over Hungary at the Battle of Muhi (now Mochovce, Slovakia) in 1241, and some battles in Croatia and

Dalmatia, he withdrew after receiving the news of the Great Khan Ogotái's death. Due to his bad relationship with Kujuk, a candidate for becoming the Great Khan, he never returned to his homeland. According to Muslim historians he settled on the shores of the River Volga and died there. – B: 1078, T: 7668.→**Béla IV, King; Julianus, Friar.**

**Bauer, Lord Peter Thomas** (Budapest, 6 November 1915 - Cambridge, England, 3 May 2002) – Economist. He studied at the Piarist High School, Budapest. One of his father's clients in Budapest offered the 18-year-old higher education in Britain. He studied at the Goonville and Gaius Colleges, Cambridge. Then he read Economics at the University of London (1947-1948) and lectured in economics at Cambridge (1948-1956). Following some study trips in Malaysia and West Africa, he became a professor at the London School of Economics (LSE). He specialized in Economic Development in 1960. He was created a Lord in 1982. He joined the Conservative Philosophy Group and soon was an ardent follower of Margaret Thatcher. His published works include *The Rubber Industry, Dissent on Development, Reality and Rhetoric and Studies in Economics*. – B: 1125, T: 7680, 7103.

**Bauer, Rudolf** (Budapest, 2 January 1879 - Sósér, 9 November 1932) – Athlete, discus-thrower. He was the second Hungarian sportsman to gain an Olympic championship after Alfréd Hajós. As a young student of the Agricultural College of Magyaróvár, he was the first in the world to throw the discus by taking a revolving swing. With the new technique he revolutionized the throwing technique. In Paris he won the first gold medal of Hungarian athletics with a 36.04- meter throw. At the time of his Olympic victory he was only 21; afterwards he took part only in a few athletic tournaments. He turned to rowing. Eventually he became a farmer. In the summer of 2000, on the occasion of the hundredth anniversary of his victory of 15 July 1900, a memorial plaque was placed on his one-time house in Kinizsi Street, Budapest. – B: 0883, 1768, 1031, T: 7456.→**Hajós, Alfréd.**

**Bautzen, Mátyás Memorial** (Matthew) – A large-scale *bas-relief* over the main gate of Ortenburg Castle, Germany. King Mátyás I (Matthias Corvinus, 1458-1490) had the ruined castle rebuilt and owned it with the city of Lausitz. It shows the king seated on a throne with a scepter in his hand. There are two angels overhead holding the Saxon Royal Crown. A copy of the monument is attached to the sidewall of the Orbán Tower in Buda. – B: 1078, T: 7675.→**Mátyás I, King.**

**Bay, Zoltán Lajos** (Louis) (Gyulavári, 24 July 1900 - Washington, DC, USA, 4 October 1992) – Physicist. He was born into a family of a pastor in the Reformed Church. He graduated from the Reformed Gymnasium, Debrecen in 1918. He was a student of the Eötvös College, and the University of Budapest, where he obtained his degree in 1922. He then joined the Department of Chemistry and Physics, University of Berlin. Soon he successfully determined that active nitrogen gas is made up of free atoms. This proved to be so significant that he was soon appointed to the Chair of Theoretical Physics at the University of Szeged, where he was professor between 1930 and 1936. From 1936 on he was occupied with the development of television. However, World War II stopped his experiments. Thereafter he became professor at the Polytechnic of Budapest between 1938 and 1948. From the end of the 1930s he achieved many of his world-renowned technical results in the company of a scientific team at the research laboratory of the United Incandescent Works (*Egyesült Izzó Művek*) in Budapest. In 1939 he patented the lighting diodes suitable for solving tasks of numbering; but its significance was not

recognized at the time. At the University of Budapest, together with Lipót (Leopold) Aschner, he established the Chair of Nuclear Physics. As part of the war effort during 1942-1944, he succeeded in developing a type of radar suitable for tactical reconnaissance tasks. Later he and his research associates successfully worked out the principle of sign multiplication for the purposes of moon probes. In 1944 he was arrested by the Germans, but managed to escape. However, until the end of the War, he was forced to remain underground. In 1945 he became managing director of the United Incandescent Works. In 1948, upon the invitation of Washington University, he left for the USA. In the research laboratory of the University he organized and directed a virtual "Hungarian section". In 1955 he became a physicist at the US Standards Laboratories. He also became an honorary member of the Hungarian Academy of Sciences in 1981. Bay was invited to Houston for the preparation of the Mariner Program, where his earlier worked-out method was introduced. He did pioneering work in the fields of electroluminescence and in particle counting by means of an electron multiplier. He was the first to develop the moon-radar and was first to observe radar echoes from the Moon. In fact, Bay became the founder of radar astronomy and it was he who provided the method. In 1946, for the first time, an electromagnetic sign could be reflected and became measurable from an extraterrestrial body. The method of sign summation, introduced by his associates, suggesting a more accurate determination of the length of one meter, was introduced in 1965 by means of the exact determination of the speed of light and that of one second. Today, his method of determining the exact length of a meter is used throughout the world. In the Technical Museum of Washington his electron multiplier was exhibited and regarded as the earliest instrument of its kind. Besides his technical activities, Bay was very much interested in literature and the arts. His circle of friends included such famous figures as Zoltán Kodály, Zsigmond (Sigismund) Móricz and László (Ladislav) Németh. Though he died far away from his homeland, his ashes, according to his wish, were taken back to Hungary, to his place of birth, Gyulavári and placed next to his parents on 10 April 1993. A foundation bears his name. – B: 1122, 1160, 1031, T: 7456. → **Kodály, Zoltán; Móricz, Zsigmond; Németh, László; Aschner, Lipót.**

**Bayer, Zsolt** (Budapest, 28 February, 1963 - ) – Journalist, writer. After graduating from high school he studied Hungarian Literature and History at the University of Budapest (1985-1991). Between 1982 and 1985 he was a teacher without a diploma, an unskilled laborer, and a surgeon's assistant. In 1988 he was one of the founders of the political party Young Democrats' Alliance (*Fiatal Demokraták Szövetsége – FIDESZ*) and the spokesperson and leader of its press department. In 1993-1994, he was Chief-Contributor for the daily, *People's Freedom (Népszabadság)*. Later he worked for the Hungarian Television, preparing programs, and as artistic advisor from 2000. From 1988 he was chief advisor for the Commissioner's Office of the Millennium. From 2000 he was Cultural Deputy Director at the Duna Television. Later he became chief contributor for the daily, *Hungarian News (Magyar Hírlap)*. He is a leading patriotic journalist. His TV series were: *The Best Summer of Our Teenage Years - America (Kamaszkorunk legszebb nyara – Amerika)*; *1100 Years in the Center of Europe (1100 év Európa közepén)*. His books include *Fairy-cemetery (Tündértemető)* short stories (1995); *Liberalism Reaches to the Wall, vols. i, ii (Falig érő liberalizmus I-II)* (2000); *1956:... "that there should be a Sign" (1956:... "hogyan legyen jel" (2000); 1100 Years in the Center of Europe, vols. i,ii.*

(1100 év Európa közepén, I, II) travel-sketches (2001); *Where is the Limit of Impertinence – New Moralists, Pharisees, vols. i,ii (Hol a pofátlanság határa - Új moralisták, farizeusok I-II)*. He received the Madách Prize in 2011. – B: 0878, 1645, T: 7103.

**Beck, Ödön Fülöp** (Edmund, Philip) (Pápa, 23 June 1873 - Budapest, 31 January 1945) – Sculptor. He studied at the Academy of Applied Art, Budapest, and continued his education in Paris and Munich. Later, he visited Italy on a study trips. In 1895 he was commissioned to create a reward medal for the Hungarian millennium exhibition of 1896, and his design won first prize. He then moved back to Hungary. First he created artistic utensils in secessionist style; later plaquettes and sculptures. From 1908 he carved stone sculptures and chiseled the negative of his medals. His works include *Aphrodite* (1915); *Animal Reliefs (Állatreliefek)* (1911); *St. Sebastian (Szent Sebestyén)* (1914); *Baumgarten Tombstone (Baumgarten síremlék)* (1928); *Heros' Memorial of Pápa, (Pápai hősi emlékmű)* Pápa (1931); *Ferenc (Franz) Liszt Memorial Plaque (Liszt Ferenc emléktábla)* (1935), and *Ironcasting Workers (Vasöntő munkások)* (1943). His busts include those of Zsigmond (Sigismund) Móricz, Mihály (Michael) Babits and Zoltán Kodály. He created some 500 medals. He is regarded as one of the pioneers of Hungarian sculpting. – B: 0932, T: 7103.→**Liszt, Ferenc; Móricz, Zsigmond; Babits, Mihály; Kodály, Zoltán.**

**Bécs** – (1) In ancient times this word in Hungarian meant a location that lay outside a defined boundary. In the Transdanubian (*Dunántúl*) district, the local dialect still uses the expression: “*I am going to bécs*” to indicate a journey to the periphery of the city. The origin of the word is most likely late Avar. (2) Bécs is the Hungarian name of Vienna, capital of Austria. – B: 0942, T: 3233.

**Bécs Country** – According to Pál (Paul) Király, this term was used to describe a territory that lay outside the boundary of a larger region but belonging to it. The theory is supported by a text in the Wagner Universal Dictionary describing how King Mátyás I (Matthias Corvinus, 1458-1490) conquered *Bécsország* (Bécs country) as a whole. Although it is located outside the boundary proper, the author of the text regards the territory as an outlying part of Hungary, since it was under the authority of the Hungarian Crown during the reign of King Mátyás. It was in this sense that the district was named *Bécsország*. – B: 1133, T: 3233.→**Mátyás I, King.**

**Becse-Gergely Clan** – One of Hungary's most remarkable clans. Ancestors of the clan, Becse and Gergely looked after King Béla III (1172-1196) while he was living in the Greek Emperor's court. It is possible that they were either stewards of the royal household, or the king's private tutors. The members of the clan gained distinction for the founding of monasteries and for populating the eastern part of the country. The clan had two main branches: the Almakeréky, Apafi, Bethlen, Léti and Tóti families originate from the Bethlens; while the Nemegyey, Somkeréky and Virágosberky families descend from the Somkeréky branch. – B: 1078, T: 7685.→**Béla III, King.**

**Bécsi Béke** (Vienna Peace Treaty, 1606) – Treaty between King Rudolf (Rudolph) I (1576-1608) and Prince István (Stephen) Bocskai, following his successful uprising and freedom fight. The Treaty stipulated the independence of Transylvania, the freedom of religion for Protestants, and the restoration of the estates' self-government. Hungary was to be governed by her laws, the King to make peace with the Turks. Castle Tokaj, the Counties of Ugocsa, Bereg and Szatmár were to be added to the estates of Bocskai with

the condition that after his death all his estates would revert to the King. This treaty was the legal basis for the independence fights of the 17th century. – B: 1105, T: 7103.→**Freedom Fight of Bocskai, Prince István.**

**Bécsi Codex**→**Vienna Codex.**

**Bede, Anna** (Budapest, 14 July 1926 - Budapest, 30 March 2009) – Poet, literary translator. She studied Hungarian Language and History of Art at the University of Budapest. She has been writing and publishing since 1953. Her translations include *Let the Shaman Drums Sound (Sámándobok szóljatok)* (1973); *Ivanov: Narszpi, A Chuvash Epos (Narszpi Csuvasz eposz)* (1977); *Ovid: The Art of Love (A szerelem művészete)* (1982); *Golden Peewit Says at Spring, Anthology of Lapp Folk Poetry (Aranylile mondja tavasszal. Lapp népköltészeti antológia)* (1984); *Szijaszar: Mordvin Epos (Szijaszar: Moldvin Eposz)* (1984); *Sesztalov: Julianus Found Me (Julianus rám talált)* (1985); *Horace's Complete Works (Horatius összes művei)* (1989); *Tarhanov: Pagan Walkway (Pogány gyalogút)* (2000); her own poems *Serious Spring (Szigorú tavasz)* (1963); *Silver Prayer (Ezüstfohász)* (1990), and *Signs on the Ice (Jelek a jégen)*, poems (2003). She was awarded the József Attila Prize in 1975, and the Knight's Cross of the Order of Merit of the Republic of Hungary in 2001. – B: 0874, 0878, 0879, 0877, 1257, T: 7103.

**Bég** – It was the name of a military leader or chief magistrate in the Turkish Empire. Bég ruled the central part of Hungary when it was under Turkish occupation between 1526 and 1686. – B: 1105, B: 7103.→**Turkish rule in Hungary.**

**Bejczy, Antal K.** (Anthony K.) (Ercsi, 16 January 1930 - ) – Electrical engineer. His higher studies were carried out at the Budapest Polytechnic until 1956. Following the defeat of the 1956 Revolution, he left Hungary for Norway. He finished his studies with a Ph.D. in applied physics at the University of Oslo, Norway in 1963. He remained at the University, lecturing on statistics. He moved to the USA in 1966. From 1969 he was a professor at the California Institute of Technology and at the University of St. Louis. He became a Senior Research Scientist of the NASA Telerobotics Development Program at the Jet Propulsions Laboratory (JPL), California Institute of Technology. He led the development of The Mars “microrover”, dubbed Sojourner, and Pathfinder's Remote Control System. His work was completed with the active participation of Ferenc (Francis) Pavlics, the Hungarian originator of the Moon Rover, and Pál (Paul) Greguss. Bejczy was also the principal investigator of a robot arm force-torque sensor and control flight experiment. His major research interests have been robotics and advanced teleoperation. He is a Distinguished Lecturer for the Robotics and Automation Society. He authored two books, some 124 scientific studies and four patented inventions. He is a recipient of numerous awards, among them the Jean Vertut Prize (1987). – B: 0874, 1279, T: 7103.→**Greguss, Pál; Pavlics, Ferenc.**

**Békás Pass and Lake Gyilkos National Park**, Transylvania (*Erdély*, now in Romania) – Located 24 km east of Gyergyószentmiklós (now Gheorgheni, Romania), the canyon-like pass is 5 km long with 200-300 m high rock walls. It was possibly carved by a glacier at the end of the last glacial period (12,000-10,000 BC) and subsequently modified by the rapidly flowing River Békás. This valley is a spectacular natural pass across the eastern Carpathian Mountains from Transylvania to Moldavia. The head of the valley is occupied by Lake Gyilkos (Killer) that was formed above a dam created by a landslide from the slopes in 1837 AD. The surface area of the lake is about 70 hectares. Its elevation is 983

m and its greatest depth is 10 meters. The tallest mountain of the area is the famous 1154 m high Oltárkő (Altar-stone) rock formation. The sub-alpine vegetation of the valley and adjacent mountains is unique. Recently the chamois was rehabilitated here from the Fogaras Mountains of the Southern Carpathians and adapted well to the region. The protected area of the National Park is 2128 hectares. – B: 1199, T: 7656.

**Beke, Albert** (Nádudvar, 18 March 1934 - ) – Writer, literary historian. His secondary studies were at the Reformed High School and at the Mihály (Michael) Fazekas High School, Debrecen. He acquired a teacher's certificate in Hungarian Literature in 1956. In 1956-1957 he taught at the High School of Sátoraljaújhely. Between 1957 and 1962 he was librarian at the University Library, Debrecen. In 1959 he earned a Ph.D. in Hungarian Literature at the University of Debrecen. From 1962 to 1994 he taught at a High School in Budapest. From 1994 he was professor at the Gáspár (Gasper) Károli Reformed University, Budapest, where he lectured on the history of late 19th century literature and taught special courses on the works of Pál (Paul) Gyulai, Endre (Andrew) Ady, and on literary romanticism and realism. He was Editor-in-Chief of the *Studia Nova* periodical of the University. In 1997 he obtained a Ph.D. from the University of Debrecen. From 1998 until his retirement in 2000 he was Departmental Head at the Ministry of Environment. His writings have appeared since 1953, including *Power and Role - the Man, Pál (Paul) Gyulai (Hatalom és szerep, Gyulai Pál, az ember)* (1994), *The Art of Doubting (A kételkedés művészete)*, essay in literary history and theory and criticism (1999); *Against the Wind (A széllel szemben)*, essays in criticism (1994), *The Art of Doubting (A kételkedés művészete)*, studies and critics (1999), *The Emigrant Sándor Márai on Hungarians and on Himself (Az emigráns Márai Sándor a magyarságtól és önmagáról)* (2003), and *Remembering the Day before Yesterday (Emlékezés a tegnapelőttre)* (2009). He was awarded the Annual Literary Critic Prize of the Mihály (Michael) Táncsics Foundation (1995). – B: 1247, T: 7103.→**Gyulai, Pál; Ady, Endre; Márai, Sándor.**

**Beke, György** (George) (Úzon, now Uzului, Romania, 3 August 1927 - Budapest, 20 January 2007) – Writer, literary translator, journalist. He completed his higher education at the Hungarian Language Department of the University of Kolozsvár (now Cluj-Napoca, Romania) in 1947. He worked for the newspapers *Hungarian Word of Romania*, *Forward*, and *Week (Romániai Magyar Szó, Előre and Hét)*. From 1989 he lived and worked in Budapest. His writings are true reports about the life of Hungarians in Romania. He translated Romanian literature into Hungarian as well. His works include *Companionless in Sin (Bűnben társtalanúl)* novel (1969), *Searching for Ourselves (Magunk keresése)* reports, (1972), *Tracing Kinship (Nyomjelző rokonság)* (1978), *Bearing Capacity of Arches (Boltívek teherbírása)* (1983), *Csángó Passion* (1988), *The Ruin of Peoples Under Romanian Rule (Népek nagy romlása román uralom alatt)* (1994), *Kossuth Émigrés in Bucharest (Kossuth emigráció Bukarestben)* (1998), and *Wanderings in Transylvania, vols. i-iii. (Barangolások Erdélyben, I-III)* (2000). He was awarded the Miklós (Nicholas) Jósika, the Attila József and the Mihály (Michael) Táncsics Prizes. He was one of the outstanding writers on Transylvanian themes. – B: 0874, 0875, 0879, 0877, 1257, T: 7103.→**Kossuth, Lajos; Atrocities against Hungarians.**

**Beke, Sándor** (Alexander) (Csilizradvány, now Čilizsko Radván, Slovakia, 26 February 1939 - ) – Actor. Following his basic education (1946-1954) he studied at the Teachers'

College of Pozsony (now Bratislava, Slovakia (1954-1958). The Hungarian Regional Theater (*Magyar Területi Színház - MATESZ*) in Komárom (now Komarno) employed him as an actor (1958-1959). He obtained a diploma in acting at the Pozsony College of Dramatic Art (1963). He earned another diploma in Stage Directing from the Academy of Dramatic Art, Budapest (1963-1968). From 1968 to 1976 he was Director of Hungarian Regional Theater (*Magyar Területi Színház – MATESZ*), which, due to his effort, later became the Jókai Theater of Komárom (*Komáromi Jókai Színház*). Later, with his efforts, the Thalia Theater (*Thália Színház*) in Kassa (now Košice, Slovakia) became independent, and he was its Director (1969-1976). He left Czechoslovakia for political reasons in 1976. From 1976 to 1978 he was Director of the Miskolc National Theater (*Miskolci Nemzeti Színház*). In 1978 he settled in Hungary, and between 1978 and 1984, he was Director of the József Katona Theater (*Katona József Színház*) in Kecskemét. From 1984 to 1991 he directed the Folk Theater (*Népszínház*), Budapest. From 1991 he was Director of the Chamber Theater (*Kamara Színház*), Budapest, and at the same time a lecturer at the Art Faculty of the University of Miskolc. His leading roles include Shakespeare's *Romeo and Juliet* (1968); Mihály Vörösmarty's *Csongor and Tünde* (1972) at Kassa Theater; András Sütő's *Kain and Abel*, (1978); T. Nash's *The Rainmaker (Esőcsináló)* (1990), Thalia Theater of Kassa. His studies include Vörösmarty's *Csongor and Tünde (Csongor és Tünde)* in the *Literary Review (Irodalmi Szemle)* (1973). He wrote a book on *The Development of Clothes (A ruházat fejlődése)* (1973), and one on *The History of Stage Directing (A rendezés története)* (1974). – B: 1083, 1890, T: 7456.→**Vörösmarty, Mihály; Sütő, András.**

**Békeffi, István** (Stephen) (Békeffy) (Szeged, 31 August 1901 - Budapest, 9 June 1977) – Playwright, cabaret writer. He was educated in a Cadet School and read Law at Nagyvárad (now Oradea, Romania), Sopron and Budapest. His successful stage comedies, such as *Where Were You Suring the Night? (Hol voltál az éjszaka?)*, made him famous. This was followed by operettas, film-scripts and comedies. His first film-script appeared in 1934, and he wrote about 22 until 1942. His co-writers were Dezső (Desider) Kellér, László (Ladislav) Vadnai and Adorján (Adrian) Stella. He edited the journal *Reflector (Fényszóró)* in 1945-1946. In 1957 he and his wife, actress Ida (Ida) Turay left for Switzerland, where he produced scripts for the West German film industry, such as *Accident (Baleset)*, *Der Hund Bozzi hiess (A kutya akit Bozzi úrnak hívnak)*. His musical had its debut at the Operetta Theater, Budapest in 1977. They returned to Hungary in 1971. His works include *The Siege of Beszterce (Beszterce ostroma)*, and *An Angel Landed in Boston (Egy angyal szállt le Bostonban)*. He also published in book-form the *Latyi-Matyi* poems, and the *Adventures of Pomócsi*, with Dezső (Desider) Kellér. He was a famous and popular playwright of his time. He was twice a recipient of the Attila József Prize (1950, 1953). – B: 0883, 1160, T: 7103.→**Kellér, Dezső; Turay, Ida; Vadnai, László; Stella, Adorján.**

**Békefi, Benő** (Benjamin) (Budapest, 5 May 1909 - Budapest, 25 March 1964) – Bishop of the Reformed Church. He studied Theology in Budapest and Debrecen (1928-1932), where he also learned Philosophy and Pedagogy. He was Assistant Minister in Dévaványa (1935-1940) and in Nyíregyháza (1941-1943). Later he was a minister of the *Friendly Association of Congregational Evangelization (A gyülekezeti evangélizáció baráti társasága)* (1943-1945), Dean and Minister in Nyíregyháza (1945-1969), in Dunaalmás (1961-1963), and in Veszprém (1963-1964). He was Bishop of the

Transdanubian Church District (1962-1964). He was also Director of the Institute of Deaconesses, Nyíregyháza, then Professor of Theology at Debrecen, and later in Budapest. In addition, he was involved in numerous civil activities. He edited Church papers such as the *Sentry of Szabolcs (Szabolcsi Órszem)* (1935); *Vigil of the Nyírség (Nyírségi Virrasztó)* (1940-1942); *The Hungarian Reformed Awakening*, with A. Bereczky (*A Magyar Református Ébredés*), A. Bereczkyvel (1943-1947), and *Christian Family (Keresztyén Család)* (1946-1947). He authored numerous articles. He also wrote under the pen-names Doulos, Dániel Faluvégi, and Tamás (Thomas) Magyar. His books include *Jesus and Buddha (Jézus és Buddha)* (1922); *From Grace by Faith (Kegyelemből hit által)*, and *The Method of Mission (A misszió módszere)* (1944). He was a leader of the post-war Reformed awakening who was later elevated in church leadership to Dean, Professor of Theology and Bishop. – B: 0910, T: 7103.→**Bereczky, Albert.**

**Békéscsaba** (Slovak: *Békésská Čaba*) – Town in the southeastern part of the Great Hungarian Plain. The region was inhabited from ancient times by Scythians, Celts and Huns. After the Hungarian (Magyar) settlement in the 9th century, it was known as a town from the early 13th century, but it was completely destroyed during the Liberation Wars against the Ottoman Turkish occupation at the end the 17th century. In the beginning of the 18th century, the repopulation of the town was started by János György (John George) Harrucken, who re-settled it with Slovakian Lutheran serfs (*Tótok*, today *Slovaks*). Since that time the town is the center of Slovak minority in Hungary. It developed rapidly, due to the political and strategic situation of the 19th-20th centuries, thus became one of the busiest and most populous towns in Hungary, with a population of 68,000 in 1983; 46,630 in 1920; and 37,547 in 1901, and 93.8 % of its residents was Hungarian. Most of the inhabitants of this oversized village are engaged in agriculture and stockbreeding; the agricultural environs amount to 71,000 acres of rich loess soil. At the end of the 19th century there were great social problems, including high unemployment. András L. Áchim founded the Peasant Party here. After the end of World War I, Békéscsaba was temporarily occupied by Romanians. Between the two World Wars despite the economic crisis the town developed considerably. In September 1944 the town was carpet-bombed and suffered enormous damage. In 1948 there was a population exchange between Slovaks and Hungarians seriously affecting the town. Since 1950 Békéscsaba is the administrative center of County Békés. On the central plaza are the Lutheran church, the town hall, a merry-making hotel, theater, casino and a statue of Lajos (Louis) Kossuth. There are four other churches in the town. There are several high schools and special schools, government offices and an open-air swimming pool. The industry of the town has developed during the socialist era with meat packing industry ("Csaba Sausage" or "Csabai"; poultry packing), machine-works, textile factories, brickworks and grain mills. After 1990, with the new political system came economic difficulties, but by investments the town started to develop again. Its municipal museum (in a palatial building) was established in 1899. In its archeological section valuable findings are held from recent excavations in the area (Tótkomlós, Mezőberény), and in its picture-gallery over 100 paintings and sculpture are held. The women's hand-woven clothes are known all over Hungary. The town is an important railway junction between Budapest-Arad and Nagyvárad (now Oradea, Romania)-Szeged. The sporting life of the town is particularly active. – B: 1031, 1068, 1582, 7456, T: 7456, 7103.→**Scythians, Huns; Hungarian-Slovakian Population Exchange.**

**Békés, Gáspár** (Gasper) (? 1520 - Grodnó, 7 November 1579) – Statesman. He started his career as a page in the service of Peter Petrovics, and later as a servant in the house of Szapolyai. From there the lowborn servant rose to the position of leading statesman of Transylvania (*Erdély*, now in Romania). During the reign of János Zsigmond (John Sigismund, 1540-1553) he became *voivode* of Erdély, and an adviser to the young Prince. After the death of the Prince he was a candidate for the succession. He lost his bid for the throne to István (Stephen) Báthory. In alliance with Emperor Maximilian (Miksa) he attacked Báthory but was defeated and Báthory arrested him. They reconciled their differences following Báthory's election to the throne of Poland. Báthory promoted him to the ranks of Polish nobility and he served him faithfully as Commander of King Báthory's cavalry contingent. – B: 0883, 1031, T: 3233.→**János I, King; Báthory, Prince István.**

**Békés, Gellért O.S.B.** (Gerard) (József Burzer) (Budapest, 3 January 1915 - Austria, 29 July 1999) – Monk, theologian. He was educated at the Budapest High School of the Benedictine Order. He joined the Order in 1932 and received a new name. He studied Theology at the St. Anselm College in Rome, was ordained on 1st September 1938. He received his Doctor of Theology Degree in 1940, and he was posted to the Benedictine Abbey of Pannonhalma, Hungary in 1940, where he taught and performed pastoral duties. He organized the *Actio Catholica* and the youth associations of KALOT (*Katolikus Legények Országos Testülete – National Organization of Catholic Young Men*), and KALÁSZ (*Katolikus, Lányok Szövetsége – Alliance of Catholic Girls*). As a priest of the International Red Cross he rescued Jews and refugees in 1944-1945. After World War II he helped Hungarian refugees. He became involved in ecumenical theology following the Second Vatican Council (1962 - 1965). From 1946 to 1992 he taught at the universities of St. Anselm and St. Gregory in Rome. In 1957 he was appointed *vicarius archiabbatis in externis*-prior of the Hungarian Benedictines abroad and remained in this capacity until 1991. In 1994 he became worldwide praeses-abbot (abbot president) of all Hungarian Benedictines. He retired to Pannonhalma in 1992, but continued teaching there at the Theological Academy and at the Kalazantium Theological Academy. A few highlights of his many literary and spiritual achievements are translation of the *New Testament* with Patrik Dalos in 1951, primarily for the use of refugees, and edited the *Catholic Review* (*Katolikus Szemle*) in Rome from 1959. He provided spiritual leadership to the *Pax Romana* movement, wrote articles in the *New Horizon* (*Új Látóhatár*), *Our Life* (*Életünk*), and in Hungarian newspapers worldwide. He was pastor of the *Catholic Hungarian Intelligentsia Movement* (*Katolikus Magyar Értelmiségi Mozgalom*, KMEM), and his book of poems is entitled *My Fate Is God* (*Sorsom az Isten*). He rests in the *Chapel of the Blessed Mother* (*Boldogasszony Kápolna*) of the Pannonhalma Abbey. An Ecumenical Institute bears his name. – B: 1064, T: 7103, 7677.→**Catholic Church in Hungary; Religious Orders; Pax Romana.**

**Békési, Andor** (Andrew) (Panyik) (Ócsa, 17 February 1910 - Ócsa, 1 March 1989) – Minister of the Reformed Church, theologian. He studied Theology at the Reformed Theological Academy, Budapest (1928-1932) and at Montpellier (1931), Bonn (1932), and Princeton (1933). He obtained his Doctoral Degrees in New Testament Studies from the Protestant Divinity School, Philadelphia in 1933, and in Old Testament Studies from Princeton in 1938. He was a lecturer at the Theological Academy, Budapest (1938-1939), a teacher of religion in Budapest (1938-1945), and Minister in Ócsa (1945-1983). He

participated in the Reformed Renewal Movement and in the Reformed Action Committee during the 1956 Revolution. He was arrested and put under investigative detention. He was an eminent John Calvin researcher and, his writings appeared in church papers and magazines in Hungary as well as abroad. He was one of the best-educated theologians of the Reformed Church in the second half of the 20th century. He was Series Editor of the *Evangelical Calvinism*. He also participated in the *Jubilee Commentary (Jubileumi Kommentár)* publication. His books include *Let You Be Quiet (Csendesedjetek el)* (1943), *The Dissimilar Bible (A felemás Biblia)* (1943); *God's Man in the Storm (Isten embere a viharban)* (1943), *The Kingdom of God and Us (Isten országa és mi)* (1943), *He who Triumphs... (Aki győz...)* (1944, 1990), *Preach the Word... (Hirdesd az Igét...)* (1980), *Calvin on the Holy Spirit (Kálvin a Szentlélekről)* (1985), and *Calvin on the Sacraments (Kálvin a sákramentumokról)* (1987). He translated Calvin's *Institutio religionis christianae 1559 (Teaching the Christian Faith – Tanítás a keresztyén vallásra, 1559)* (1986). – B: 0910, T: 7103. → **Reformed Church in Hungary.**

**Békésy, György** (George von) (Budapest, 3 June 1899 - Honolulu, HI, USA, 13 June 1972) – Biophysicist, scientist of acoustics. He was Nobel Prize winner in Medicine (1961) for “The discovery of the physical means of sound communication and analysis in the inner ear”. His father was a diplomat. His elementary studies were at Munich, Germany, and Constantinople, Turkey (1910-1913). His high school studies were in Zürich, Switzerland (1914-1916). He studied Chemistry at Bern University, and obtained his Ph.D. in physics in Budapest in 1923. He worked for a short time in Berlin, and later was chief engineer and researcher at the Postal Experimental Station (*Postakísérleti Állomás*) in Budapest. The results of his research were so outstanding that he was invited as Guest Professor by a number of universities abroad. In 1941 he took over the leadership of the Practical Physical Institute (*Gyakorlati Fizikai Intézet*). In 1946 he was a researcher at the Royal Carolinska Institute in Stockholm. In 1947 the Harvard University, at Cambridge, Mass. invited him, and he emigrated to the USA. He worked at the University as a leading researcher until 1966. He received the Nobel Prize mainly for the research that he accomplished in Hungary in the field of the acoustic function of the ear. He did not accept the invitation to be a professor either at the University of Stockholm, Sweden, or at the University of Göttingen, Germany. For health reasons he moved to Honolulu and became Professor of the Experimental Laboratories of the Sense Organs, a University Foundation Institute there. When he was still in Stockholm he constructed an automatic audiometer, known in the technical literature and medical terminology as “Békésy audiometer”. Acoustics was his main field of activity, but he also took an active role in the start of Hungarian broadcasting. At the beginning of his work he was interested in every acoustics problem; but later his interests turned more and more toward the biophysical problem of the ear. When the mechanism of the middle ear was worked out he was the first in the world who was to understand perfectly what goes on in the 1cm long snail-shaped cochlea. He solved the secret that was lying in the “corresponding vibration” in the cochlear fluid, which was not really understood before. In Honolulu, his main investigation centered on the cerebral reception of the corresponding vibration. Békésy was also internationally recognized as an expert on American Indian cultures. He left his valuable collection to the Nobel Foundation. He was member of the Hungarian Academy of Sciences, and was a recipient of numerous medals. Several universities bestowed honorary doctorates on him. He was elected an

honorary member of several academies of sciences. A Technical School in Budapest and a postdoctoral scholarship bear his name. – B: 0883, 1031, 1105, T: 7660.

**Békésy, Miklós** (Nicholas) (Münich, Germany, 3 August 1903 - Budapest, 25 November 1980) – Agriculturalist. His high school studies were at Pécs and his higher studies at the Agricultural Academy, Debrecen, where he acquired his Degree (1927). He obtained a Ph.D. from the Budapest Polytechnic (1938). He farmed at Gyulapuszta, where he observed a growth on rye called *ergot*. He guessed its pharmaceutical value, as it indeed contained ergotin, histamine etc. He developed a process that makes possible the artificial production of ergot now used worldwide. He lived in Budapest from 1933, and from 1934 he worked at the Medical Plant Research Station. Later he also worked for the Polytechnic of Budapest. He received a number of prizes, among them the Kossuth Prize (1954). – B: 0883, 1160, T: 7103.→**Ergot**.

**Béklyó, békó**→**Hobble**.

**Béky-Halász, Iván** (Budapest, 12 August 1919 - Budapest, 8 March 1997) – Poet, literary translator. He received his university education in Budapest, then, after the crushed Revolution and Freedom Fightg of 1956, moved to Canada. He obtained a Degree in Library Science at the University of Toronto, and worked in the John P. Robarts Research University Library. In the library he collected in a section some 30,000 volumes of Hungarian literature and history. He published several collections of poems, including *Facing the Wall (Arccal a falnak)* (1972); *Blessed Harbors (Áldott kikötők)* (1979); *Indian Summer (Indian nyár)* (1981), and translated several works of Hungarian poets into English including Sándor (Alexander) Csoóri, János (John) Pilinszky, László (Ladislav) Kálnoki and György (George) Rónay. He later repatriated to Budapest, Hungary. – B: 0892, 1257, T: 4342.→**Csoóri, Sándor; Pilinszky, János; Kálnoki, László; Rónay, György**.

**Béky, Zoltán** (Hernádszentandrás, 21 June 1903 - Washington, DC, USA, 26 November 1978) – Bishop of the Reformed Church in the USA. He was a leading figure of the emigrant Hungarians. He was ordained in Sárospatak, where he studied Theology at the Reformed Theological Academy. He continued his studies in Philadelphia. Between 1929 and 1936 he was Minister of the Trenton congregation. In 1936 he became the Dean of Eastern Classis; in 1954 he was named Senior Dean of the Hungarian Reformed Church in America, and Bishop from 1958. He took part in various world congresses, where he became a spokesman for Hungarian causes. The city of Trenton made him an honorary citizen and named a street after him. The Governor of the State of New Jersey appointed him Commissioner for Refugees. He was chairman of various emigrant organizations and institutions of the Hungarian Reformed Church in the US. In 1970 he became a member of an Advisory Committee, appointed by the President of the United States. On four occasions he delivered the opening prayer in both chambers of the Congress. He administered the sacrament of the Lord's Supper to US presidents Johnson, Nixon and Ford. He was Editor-in-Chief of the *Hungarian Church (Magyar Egyház)* from 1954 onward, and the periodical *Brotherhood (Testvériség)* from 1965 on. He was also the author of numerous religious, sociological and political articles and published several volumes on Theology, as well as on the history of Hungarian congregational life in America. He served as President of the Hungarian Reformed Federation of America from 1964 to 1976. He furthered the ecumenical movement, and throughout his life he sought

to keep together the emigrant Hungarians scattered throughout America. In 1947 the Theological Academy of Sárospatak granted him an Honorary Professorship in Theology. – B: 0883, 0910, 1160, T: 7686.→**Reformed Churches in America.**

**Bél Clan** – A Hungarian clan dating from the Árpád-era. Their domain was in the region of Molnos-Bél that later became County Borsod in northern Hungary. Several sources mention that converted Cumanians built the Bélháromkút Monastery in 1232, thus presumably this was a Cumanian clan. Evidence for this assumption is supported by the clan names Buken, Karul, Kene, Mikó, Ugra, Zerje, widespread amongst the Cumanian or related families. The descendants of this clan were the Bekényi and Béli families. – B: 0942, T: 7685.→**Árpád, House of; Cumanians.**

**Bél, Mátyás** (Matthew) (Ocsova, now Ocova, Slovakia, 22 March 1684 - Pozsony, now Bratislava, Slovakia, 29 August 1749) – Lutheran pastor, historian, outstanding scientist of his time. He was born into an artisan family. He studied at the University of Halle, Germany between 1704 and 1707, where he became acquainted with pietism. He was chaplain in Besztercebánya (now Banská Bystrica, Slovakia), later rector of a high school for girls and afterwards he worked as a pastor. While teacher-director, he applied the principles of pietism to new educational methods, and this made the Pozsony High School famous. He wrote school textbooks and, from 1721 to 1727, established and edited *Nova Posoniensa*, a periodical in Latin for the purpose of furthering his educational ideas. He was the first scientific researcher of the Szekler-Magyar runic writing. His runic alphabet, which is more in calligraphic style than Telegdi's lettering form, originally came from Sámuel Kapossy, a schoolmaster of a college in Transylvania (*Erdély*, now in Romania). In 1718 he published his own alphabet in Leipzig, Germany with the title *De vetere litteratura Hunno-Scythica*; but by then it was public knowledge in Northern Hungary (Upland, *Felvidék*, now Slovakia). Entries in the Reformed Church registries of births using his alphabet can be found at Nagybánya (now Baia Mare, Romania), Furta etc. He wrote a handbook to acquaint Germans with the Hungarian language and with their runic writing under the title *Der ungarische Sprachmeister (The Hungarian Speech Master)* that saw nine editions. He was to compile the many-faceted political picture of the whole of Hungary in order to go beyond the goals of the German polymaths. He kept data on geographic, historical, ethnographic and linguistic subjects of the Carpathian Basin with a research group made up of his sons and students. The result of decades of work is the published first five volumes of *Notitia Hungariae novae historico geographica (New History and Geography of Hungary)*, Vienna (1735–1742). They contain his description of ten counties with maps by Sámuel (Samuel) Mikoviny. These are still valuable references. The rest of the work remains in manuscript form to this day. His life's work shows the significant stages of progress of sciences for nearly one hundred years in Hungary. – B: 0883, 1257, T: 7675.→**Evangelical Lutheran Church in Hungary; Runic Writing Research; Hungarian Runic Script; Mikoviny, Sámuel.**

**Béla I, King** (circa 1016 - 8 July 1063) – Hungarian king of the House of Árpád. He was the third son of Vazul (Vázsony), grandson of Khagan (Prince) Taksony. When his father Vazul (Vázsony) was blinded, Béla fled with his brothers to the court of Prince Bretislav of Bohemia to thwart his father's political designs, and later to King Miesko of Poland, where he gained considerable acclaim in the battle against the Pomeranians. He was

invited back by his brother, King András I (Endre, Andrew) in 1048. He returned to Hungary to oversee the country's defenses. He successfully defeated Henrik III, Holy Roman Emperor, by using ancient Hungarian tactics. When his brother reneged on his promise by granting the throne to Salamon (Solomon) instead of Béla, he returned to Poland and gathered an army to attack his brother, András (Endre). After defeating him, Béla was crowned king at Székesfehérvár on 6 December 1060. Following his enthronement he suppressed the rebels of János (John), son of Vata, attacked the Szeklers and canceled all ancient titles, an act that strengthened Christianity. He did much to strengthen Christianity and created a strong cultural base in Hungary. In his battle against Emperor Henrik IV, a supporter of the former king Salamon, he suffered a serious injury at Dömös and died of his wounds near the western border of Hungary. He was buried at the Abbey of Szekszárd, which he had founded. From his marriage to Rexa, daughter of a Polish prince, he had three sons Géza (Geza), László (Ladislav) and Lambert, and four daughters Princesses Zsófia (Sophia), Eugenia, Ilona (Helena) (wife of Croatian King Zvojnimir) and another whose name is lost. – B: 0883, 1133, T: 3323.→**Árpád, House of; András I, King, Géza I, King; László I, King.**

**Béla II, King** (circa.1108 - 13 February 1141) – King of the House of Árpád; son of Prince Álmos. King Kálmán (Coloman) blinded him at the age of five along with his father. He became known as “Béla the Blind” (*Vak Béla*). In 1129 King István II (Stephen) named him as his successor. He was crowned on 28 April 1131. He married Ilona (Helena), daughter of Serbian Prince Uros, who exercised a great influence on her husband. She persuaded him to settle accounts with the magnates who had been responsible for blinding him in 1136 at Arad. She was responsible for the massacre of 68 distinguished nobles, while others were sentenced to prison term and loss of property. From Spalato (now Split, Dalmatia) Béla occupied Bosnia and the nearby territory of Rama on the right banks of the River Sava, for which he assumed the title of King of Rama. He established the Provostship of Arad and the Abbey of Földvár. He died in 1141 and buried at Székesfehérvár. – B: 0883, 1133, T: 3312.→**Árpád, House of.**

**Béla III, King** (1148 - 23 April, 1196) – King of the House of Árpád, second son of King Géza II. He was educated in the Byzantine Court, according to an arrangement between his brother King István III (Stephen) and Byzantine Emperor Manuel, who made him his heir but reneged on his promise when a son was born to him. Béla married the Emperor's half-sister. After the death of King István III, he succeeded to the throne in 1172 and was crowned with the Pope's consent by the Archbishop of Kalocsa. In 1180-1181 his alliance with Manuel came to an end when Manuel died and Béla occupied Dalmatia. He continued his expedition against Venice and gained recognition of Hungary's supremacy. He supported trade, commercial ventures and the sciences. During his reign, political, cultural and ecclesiastical relationships were developed with the Western countries, especially with France. He was true to the beliefs of Western Christianity despite his Greek upbringing. He invited the French Cistercian Order to teach his people the arts of agriculture and building construction. Later they spread the art of animal husbandry and the sciences. He maintained favorable relations with the Pope and the ruling family of France. He was cautious and maintained a neutral diplomacy with the Holy Roman Emperor. At this time the Hungarian court was one of the most attractive centers of Europe. At the prompting of King Béla III (1172-1196), King László I (St Ladislav) (1077-1095) was canonized by the Church in 1192. Through the establishment of the

Hungarian Chancellery he strengthened central control. During his 24 years reign Hungary's power was on an equal footing with the western and eastern empires, and was Europe's largest united country. On his large crown lands there were the rich gold mines, making him one of the richest rulers of Europe. His royal palace at Esztergom (excavated in the 1930s) was without parallel at that time. No great wars were fought either. His second wife was Margaret, French royal princess, the widow of the English crown prince Henry. One skirmish involved the naval fleet of Venice that was successfully repelled to retain Hungary's rights on the Mediterranean Sea. Croatia, Bosnia, Wallachia (*Havasalföld*) in the Balkans and Halics in the north remained feudal vassals of Hungary. Béla III was buried in Székesfehérvár. In 1848 his remains were discovered and laid to rest in the Mátyás (Matthias) Church in Buda. – B: 0883, 1133, T: 3312. → **Árpád, House of; Béla III, King; László I, King.**

**Béla IV, King** (? , November 1206 - 3 May 1270). – Hungarian king of the House of Árpád (1235-1270), first son of King András II (Endre, Andrew) and Princess Gertrud of Meran. As a child he witnessed the murder of his mother by disgruntled nobles, led by Bánk bán. Before his succession to the throne he bore the title “junior king” (*ifjabb király*) with jurisdiction over Slavonia and Transylvania. He married the daughter of Emperor Theodore Laskaris of Nikea, which caused him to fall out of his father's favor.

In 1222, his father King András II (Endre, Andrew) was forced to issue an edict known as the *Golden Bull* (*Aranybulla*) that, among others, curtailed the powers of the king and church. This

shocked the clergy and displeased the Pope. In fact, the Pope excommunicated András for the latter's use of Moslems and Jewish moneylenders and for restricting the Church's salt monopoly. The king was compelled to conclude a truce with the Pope by surrendering to the demands of the Church. Thus, the Hungarian clergy, under the protection of the papacy, managed to retain their power – for the time being.

When Béla IV succeeded to the throne in 1235, he faced grave difficulties and saw no other solution than the restoration of the former economic basis of royal power. He set up a commission charged with the task of revising grants of land and recovering alienated castles and crown lands. This attempt met with universal resistance. He also dismissed and imprisoned some of his father's counselors. The estates of those who participated in the murder of his mother were confiscated. This poisoned relations between the king and the majority of the Hungarian ruling class with grave consequences that became evident during the subsequent Mongol-Tartar invasion in 1241.

A few years earlier, a Hungarian Dominican friar named Julianus traveled east to find Hungarians who had stayed behind in Bashkiria (Magna Hungaria) by the River Volga. There he learned that the Mongol hordes were advancing toward the West. Soon the news of the fall of Kiev reached Hungary. A Mongol invasion of Hungary looked imminent.

In 1237 the Mongols attacked the Cumanian tribes inhabiting an area between the rivers Dnieper and Dniester. Some of the Cumanians, led by their king, Köttöny, fled westward and asked permission to settle in Hungary. Béla IV designated a district in the

region between the Rivers Danube and Tisza for them in the hope that the Cumanian warriors would be loyal to him in his struggle with the barons. However, the Cumanian herdsmen soon clashed with the neighbouring farmers. The resulting animosity provided food for agitation and the barons were quick to turn it to their own advantage. They clamored for the expulsion of the Cumans. The King however was reluctant to let the Cumans be expelled as he received fresh news of the approach of the Mongol hordes.

At the last moment Béla lost the Cumans. A mob incited by the barons murdered King Kötöny and the Cumans left Hungary for the Balkans. A large number of barons looked on indifferently, even with hostility at the King's efforts to rally resistance when the Mongol hordes reached the frontiers of Hungary. Apart from the prelates only few barons led their soldiers to the king's standard.

The Mongols entered Hungary from three directions in 1241. From Poland in the north, Transylvania in the east, while the main body of the Mongol forces led by Batu Khan entered from the northeast through the Verecke Pass in the Carpathians. It was only after Batu Khan defeated the army of Palatine Dénes (Denis) Tomaj that he was able to muster sufficient forces to march toward Pest with all his armies united. The Battle of Mohi on the banks of the River Sajó resulted in a decisive defeat of the badly organized Hungarian army. With just a handful of troops the King fled to Prince Frederick of Austria. Frederick, instead of giving him assistance, took him prisoner. He released him for a large ransom and occupied three western Hungarian counties. From the Pope the King received no assistance other than words of encouragement. In the meantime the enemy plundered and destroyed the country. When the Mongol-Tartars crossed the frozen Danube River the king fled to Spalato (now Split) on the Dalmatian coast, and later to the Island of Trau. Only after the Mongol hordes had left the ruined country in 1242 did the king's skills as statesman emerge: together with the nobility he started to rebuild his devastated realm. He modified his political stance toward the noblemen and through large donations of land to the counselors, began the reconstruction of the cities and built stonewalled forts in anticipation of the returning enemy. He struck a peace with the Cumans and used family alliances towards strengthening the country's defenses. In 1245 he married off his son István (Stephen) V "the younger king" to Elizabeth, daughter of the princely Cumanian family. His daughter Anna became the wife of Prince Rotislav of Csernigov. His daughter Ilona (Blessed Jolanta) became the wife of the ruler of Halics, while his other daughter Kinga (Kunigunda) married Boleslav, the Polish Prince of Krakow. Pope John Paul II beatified Kinga on 16 June 1999.

Béla later defeated the Austrian Prince Frederick and installed his son István as ruler of Styria. In the latter part of his life there was a conflict with his son István. Jointly with his two sons an important edict was declared whereby they installed as nobles those who were in the 'servant' role attending to the king. He spent his last days with his daughter Margit (St. Margaret – *Szent Margit* of Hungary) in a monastery on the Island of the Hares (today's Margaret Island – *Margit Sziget*) of Budapest) and was buried by the Franciscans of Eger. – B: 0883, 1133, T: 3312.→**Árpád, House of; András II, King; Golden Bull; Julianus, Friar; Mongol-Tartar Invasion.**

**Béládi, Miklós** (Nicholas) (Békés, 23 March 1928 - Budapest, 29 October 1983) – Critic, literary historian. He studied at the Arts Faculty of the University of Debrecen and received a Degree majoring in Hungarian, History and French. He carried out research in

the Hungarian Faculty of the University of Budapest for a year, from where he joined the Institute of Literature History at the Hungarian Academy of Sciences in 1956. He worked there until his death. Between 1957 and 1960 he was also the Literary Editor for the Magvető Publisher (*Magvető Kiadó*). His main field of research was Hungarian Literature of the 20th century, where he played a leading and decisive role. He specialized in the populist writers' movement and the history of the Hungarian *avant-garde*. He founded and edited until his death the small monographic series *Our Contemporaries* (*Korátrsaink*). Between 1963 and 1972 he was internal associate of the literary review *Critic* (*Kritika*), thereafter Founder and Executive Editor of the review, *Literature* (*Literatura*). He endeavored to introduce to the Hungarian public the literature of Hungarian writers living in national minority areas of the Carpathian Basin, and their integration into the mainstream Hungarian literary life. He was Editor of the *Hungarological Bulletin* (*Hungarológiai Értesítő*). His works include *Historical Present* (*Történelmi jelenidő*) (1981), *Value Changes* (*Értékváltozások*) (1985) and *Hungarian Literature in the West after 1984* (*A nyugati magyar irodalom 1984 után*), with B. Pomogáts and L. Rónay (1986), and *Gyula Illyés* (1987). He was awarded the Attila József Prize (1975). – B: 0883, 1257, T: 7456.→**Pomogáts, Béla.**

**Bélaház** (now Boleraz, Slovakia) – Village in former County Pozsony (now Bratislava, Slovakia) with royal privileges from King Béla II (1108-1141). The name Bélaház has evolved from the inscription “Béla Rex” (*King Béla*) forming part of the village seal. At the end of the 18th century high quality faience dishes and vessels were produced here by the former Habán potters living in the neighborhood and filling the niche provided by the decline in the faience production at Holics. Bright red and crimson roses on a soft white background were the major decorative elements on the village's popular faience vessels. – B&T: 7654.→**Bélaház Faience; Habans.**

**Bélaház Faience** – Glazed earthenware. Bélaház, a village in the former County of Pozsony (now Bratislava, Slovakia), held special privileges from the time of King Béla I (1235-1270). The products of its faience workshop, founded in the 18th century, are very rare today. The basic color of the glaze is whitish green, decorated mostly with crimson flowers. These bellied vessels are fine relics of the Hungarian provincial late Rococo era. The workshop was closed down probably in the middle of the 19th century. – B: 1134, T: 3240.

**Béldi Codex** – A manuscript on paper. It contains part of the *Illuminated Chronicle* (*Képes Krónika*); the songs of praise of János (John) Hunyadi and King Mátyás I (Matthias Corvinus), and a calendar for the years from 1458 to 1496. Ferenc (Francis) Toldy donated it to the Archiepiscopal Library of Eger. There is a copy in the library of the Hungarian Academy of Sciences – B: 0942, T: 7659.→**Hunyadi, János; Mátyás I, King; Codex Literature; Toldy, Ferenc.**

**Belényesi, Gergely** (Gregory) (Belényes, now Beius, Transylvania in Romania 1514 - 1545?) – Church reformer, John Calvin's Hungarian disciple. He studied at Nagyvárad (now Oradea, Romania) where at that time Greek was already being taught. Then he continued his studies abroad in Strassburg, Paris, Geneva and again in Strassburg where he became acquainted with the Reformed Church and with John Calvin. During the time when Calvin was banished from Geneva, between 1539 and 1541, he was the Minister of the refugee French congregation. After a few months in Strassburg Belényesi moved to

Paris, where he continued his humanistic studies at the University of Paris (Sorbonne). Returning to Strassburg he met Calvin more frequently, who in 1544 often invited him to be a guest at his table. News of the cruelties of the Turks in Hungary reached him and made him to decide to return home. He took leave from Calvin in a letter dated 26 March 1545. His last letter was dated from Frankfurt on 29 March 1545. Nothing is known of him after that. – B: 1185, 1257, T: 7682. → **Reformed Church in Hungary.**

**Belgium, Hungarians in** – The first group of Hungarian immigrants in 1919 settled mainly in Belgium's mining districts of Charleroi and Limburg. Children brought by special trains were scattered in northern Belgium's Flemish area. Hungarians looking for work between 1919 and 1940 were also settled in the mining and industrial districts of the country. In the 1930s young Hungarian women were employed as domestics in and around Brussels. In 1937 most of the 146 dismissed Hungarian coal miners from the mines of Pécs also went to Belgium. In 1945 some of the Hungarian immigrants stayed in Brussels, others settled in the mining and industrial areas of Charleroi, Liège, and Limburg. The immigrants of 1956, who stayed in Belgium, were scattered all over the country. An impressive group of young people ended up at the Catholic University of Louvain, where nearly 400 Hungarian students graduated over the years. Before 1956 the number of Hungarians in the district of Liège and Limburg was between 1200 and 1800, growing to some 3000 by 1984. In 1956 their number temporarily grew much higher due to the arrival of about 6000 new refugees. Most of them later left for overseas; but while they were in Belgium these new immigrants received help from the authorities and private institutions. There is a *Hungarian House (Magyar Ház)* in Brussels that accommodates a library, other societies, and the Boy Scouts. The most important Hungarian institution in existence since 1978 is the *Corvina Circle*. The *Collegium Hungaricum Lovaniense* was established in Louvain in 1948, and is run by the Jesuits. Its college offers lodging for some 100 students. The *Outlook (Kilátó)* is a cultural review, founded in the mid-1980s. Since 1991, the *Hungarian-Flemish Circle of Friends (Magyar-Flamand Baráti Kör)* includes Hungarians living in Flanders. It offers cultural programs and Hungarian language courses. Estimates put the number of Hungarians in Belgium in 1961 at 6700. In 1969 the Hungarian State Census Office set the number of Hungarians in Belgium at 15,000. In 2005 the best estimate of the number of Hungarians living in Belgium was around 24,000. It is expected that the number of Hungarians will rise because of the growing Hungarian presence in the institutions and offices of the European Union in Brussels. – B: 1104, 1364, T: 3240, 7103.

**Belgrade Peace Treaty** (18 September, 1739) – Under the alliance of the Russian-Habsburg Treaty, the war against the Turks continued until the Austrian and the Turkish troops clashed for the last time at Belgrade. During the battle 500 Turks fell, 200 were wounded, and many became prisoners. The Imperial Army lost only 100 men and claimed a total victory. Refusing to give in to despair, the grand vizier next day called upon the imperial guardians of Belgrade to give up the stronghold to the Turks. Facing the willingness of the Turks to continue the battle and acting without the approval of their superior, Counts Wallis and Neipperg made the shameful Belgrade Peace Treaty with them. Under its terms all the reconquered territories except the Bánság region were returned to Turkish hands. Due to the Treaty, the Habsburg Empire completely lost all opportunities to liberate the Balkans, thus opening the way for Russia to extend its influence to that region. – B: 1131, T: 7668.

**Belia, György** (George) (Nagyszeben, now Sibiu in Transylvania, Romania, 2 December 1923 - Budapest, 12 March 1982) – Literary historian, translator. His career began in the Archives of the National Széchényi Library (*Országos Széchényi Könyvtár*), Budapest by researching the life work of poet Mihály (Michael) Babits. From 1957 he was correspondent for the Literary Institute of the Hungarian Academy of Sciences, and later became editor of *Europe Publishers* (*Európa Könyvkiadó*). He headed the classics group of the Belletristic Literary Publisher (*Szépirodalmi Könyvkiadó*). He took active part in collecting valuable literary works of the past for publication, and it was to his credit that all the works of Mihály Babits were published. He was chief contributor to the *World Literary Lexicon* (*Világirodalmi Lexikon*). His works include *The Correspondence of Babits-Juhász-Kosztolányi* (*Babits-Juhász-Kosztolányi levelezése*) (1959); *Mihály Babits From Book to Book* (*Könyvről-könyvre*) (1973), and *Student Years of Mihály Babits* (*Babits Mihály tanulóévei*) (1983) – B: 0883, 1257, T: 7456.→**Babits, Mihály**.

**Bells Toll at Noon** – The *Bulla Oratorum*, an order for ringing the church bells at noon was issued by Pope Callixtus III on 29 June 1456, asking Christians worldwide to pray for a Hungarian victory over the Turks. The battle at Nándorfehérvár, Hungary (now Belgrade, Serbia) began on 29 June 1456, and the decisive battle took place on the 22nd of July. Hearing of the Hungarian victory at Nándorfehérvár on 6 August, the pope ordered that the *Feast of the Transfiguration of Jesus* to be celebrated on that day and the prayers said at the time of the ringing of the bells should be prayers of thanksgiving. – B: 1178, T: 7668.→**Bulla Oratorum**.

**Bell Tower** – A tower built next to a church exclusively for the housing of one or more bells. Such structures were developed in Italy during the Renaissance and became popular mainly in Upper Hungary (*Felvidék*, today Slovakia) during the 16-17th centuries. The best examples are in the cities of Késmárk (now Kežmarok), Lőcse (now Levoča), Poprád and Igló in the Szepes region (now Slovakia). They are mostly built of stone in a square form. – B: 1078, T: 7663.

**Belovai, István** (Stephen) (Csanádapáca, 4 January 1938 - Denver, CO., USA, 6 November 2009) – Officer of the Hungarian military intelligence. He joined the Hungarian Army in 1958 and later entered the Military Strategic Intelligence Service. In 1975, he was asked to translate a telegram full of operating procedures of the US Seventh Army in Europe. Later on it turned out that the telegram came from Clyde Lee Conrad, an American NCO, working at the secret NATO archives in Bad Kreuznach, Germany. From 1974 to 1988, Conrad sold top secret materials to Hungary. From 1978 on Belovai translated intelligence information – some 300.000 – that came from the Conrad spy ring and dealt with Nato Army and Air Force deployments, NATO strategy, and the location of nuclear weapons sites on the borders with the Eastern Bloc. Actually, Conrad supplied the Soviet Union – via Hungary – with the Defence Plan of allied units, in case of a war, and how are they to defend the West against Warsaw Pact forces. Belovai decided to alert the United States to the security leak, since the Soviet Military Intelligence already had all the necessary intelligence data on the US and NATO forces in Europe. Thus the Red Army had the ability to launch a successful general attack against NATO forces in Europe, which certainly would have led either to capitulation or to a nuclear war. In 1982 he was posted to serve at the Embassy in London. In 1984 he made contact with “Richard C”, an American agent in London, and revealed the leakage of the NATO

defence plan, thereby preventing a potential Soviet aggression. However, Belovai was betrayed and arrested in Budapest in 1985. At his trial he faced the death sentence, but instead was sentenced to life imprisonment, had all his property confiscated, and was stripped of his lieutenant-colonel military rank. Belovai was released in September 1990, after the political system changed in Hungary. At the end of 1990, he left for the USA and settled in Denver, CO, received American citizenship and a rank of colonel in 1992. He is not yet fully rehabilitated in Hungary. – B: 2128, T: 7103,

**Bem, József** (Józef Zachariasz) (*Bem apó*) (Burek now Tarnów, Poland, 14 March 1794 - Aleppo, 10 December 1850) – Polish army officer, Hungarian general. He was born into a Czech family with an ancestry of Polish nobility. He was trained in a military school at Kraków. He participated in Napoleon's campaign against Russia in 1812. He was awarded the French Legion d'Honneur for the defense of Danzig (now Gdansk, Poland). He participated in the Polish War of Liberation (1830-1831). After its fall he emigrated to Paris. At the news of the revolution in Vienna, he joined in to build up a defence against Windisch-Grätz's army. After its fall he escaped to Hungary and offered his services to Lajos (Louis) Kossuth, who appointed him Commander-in-Chief of the Transylvanian Army (*Erdélyi Hadsereg*). With his reorganized army he retook Kolozsvár (now Cluj-Napoca, Romania) from the Austrian forces; then he liberated the Szeklerland (*Székelyföld*), and quickly occupied Nagyszeben (now Sibiu, Romania). At Piski he defeated the Austrian-Russian army, whereupon the Russians withdrew from Transylvania. (*Erdély*). After that he reoccupied Brassó (now Brasov, Romania). However, he was unable to resist the second Russian invasion and suffered defeat at Segesvár (now Sighisoara, Romania) on 31 July 1849. Sándor Petőfi, the Hungarian poet laureate and Bem's *aide-de-camp* fell in this battle. After losing Transylvania (Erdély) Bem was appointed Commander-in-Chief of the Hungarian Army. However, General Haynau defeated his army at Temesvár (now Timisoara, Romania). Following the defeat of the War of Independence, Bem escaped to the Balkans. To circumvent a possible extradition by the Russians, he converted to Islam. For a while he directed the modernization of the Turkish army. Finally, he became the governor of Aleppo, Syria under the name Pasha Murad. His ashes were taken to Poland via Hungary. His statue is on the square named after him in Buda. The first sparks of the 1956 Revolution broke out beneath his statue. – B: 0942, 1031, T: 7103. → **Freedom Fight of 1848-1849; Academic Legion; Kossuth, Lajos; Petőfi, Sándor; Haynau, Baron Julius Freiherr von.**

**Bence, Lajos** (Louis) (Göntérháza now Genterovci, Slovenia, 1 July 1956 - ) – Poet, essayist, journalist. His earlier education was at the Technical High School, Lendva (now Lendava, Slovenia). In 1981 he acquired a B.A. Degree in Hungarian Literature at the University of Budapest, where he earned his Ph.D. in 1994. He taught at the high school of Lendva (1981-1990). Between 1990 and 1992 he was Editor for the nationality program at the Slovenian TV. From 1991 to 1997 he was an assistant professor at the Maribor University, Slovenia. Since 1997 he has been Editor of the *People's Journal* (*Népújság*), and Director of the Hungarian National Information Bureau. He is the author of several hundred articles, studies, and 10 books, among them *Pleasantly Heartless* (*Szíves szívtelen*) poems (1981); *The Diagnosis of Existence* (*Létlelet*) poems (1989); *Sunflower-Parrot* (*Napraforgó-papagáj*) children's poems (1991), and *With the Written Word for Survival* (*Írott szóval megmaradásért*), (1994, 1996). – B: 1169, 1257, 1031, T: 7103.

**Bencsik, András** (Andrew) (Budapest, 9 February 1951 - ) – Journalist. He studied at the Kálmán Kandó Electrical Technical College (1969-1972) and at the Alliance of Hungarian Journalists (*Magyar Újságírók Szövetsége – MUOSZ*) (1973-1975). He worked for a number of newspapers, including *People's Journal of County Somogy* (*Somogyi Néplap*); *People's Voice* (*Népszava*); *People's Freedom* (*Népszabadság*); *News of Pest* (*Pesti Hírlap*); *Democrat* (*Demokrata*), and *Hungarian Democrat* (*Magyar Demokrata*); in the last three papers he was Editor-in-Chief (1975 - ). He was a member of the Hungarian Democratic Forum (*Magyar Demokrata Fórum, MDF*) (1992-1995). He was a Member of Parliament in 1994 and in 1998. He is one of the leading patriotic journalists. His works include *Good Advice for Newlyweds* (*Jótanács kezdő házasoknak*) short stories (1985); *The Great World Regatta* (*A nagy világregatta*) sci-fi (1988); *Eternal Hungary* (*Örök Magyarország*) (2000), and *Nazis with Red Carnation* (*Nácik vörös szegfűvel*) (2002). – B: 0878, 1645, T: 7103.

**Benczúr, Gyula** (Julius) (Nyíregyháza, 28 January 1844 - Dolány, 16 July 1920) – Painter, one of the outstanding Hungarian painters of the 19th century. His painting *The Farewell of László Hunyadi* (*Hunyadi László búcsúja*) (1866) made him known in Pest. A study trip to Italy made a deep impression on him and his paintings well reflect this. *The Baptism of Vajk* (*Vajk megkeresztelése*) (1876) (later King István I, St. István/St. Stephen) reflects a great Baroque sumptuousness. Between 1876 and 1883 he was one of the professors at the Academy of Fine Arts in Munich, Germany. Following his return to Hungary he worked as Principal of a Master School until his death. He bought the Pejacevics mansion in Dolány and was using it as his studio during the summer. For the Millennium celebrations in 1896, he created another famous painting called *The Conquest of Buda* (*Buda elfoglalása*). Some of his other paintings are *The Arrest of Ferenc Rákóczi II* (*II Rákóczi Ferenc elfogatása*), the portraits of Emperor Franz Joseph I, Count István Tisza, Ágoston Trefort, as well as mythological scenes, such as *Perseus and Andromeda*, and *Doves of Venus*. He was a member of the Upper House of Parliament. After his death the town of Dolány took on his name; and ever since it has been called Benczúrfalva. – B: 0883, 0934, T: 7653.

**Benda, Kálmán** (Coloman) (Nagyvárad, now Oradea, Romania, 27 November 1913 - Budapest, 13 March 1994) – Historian. He studied History and Geography at the University of Budapest. On scholarships he also studied in Vienna, Berlin and Paris. His area of interest included the history of the Transylvanian Principality, and the political and cultural history of contemporary Hungary. He worked at the Pál (Paul) Teleki Institute between 1942 and 1948; then as a casual worker (1948-1950). Between 1950 and 1957 he was an archivist at the Danubian Reformed Church District. From 1957 to 1985 he worked at and headed the Institute of History of the Hungarian Academy of Sciences. Between 1980 and 1990 he was Director of the Ráday Collection. From 1990 to 1994 he was President of the World Federation of Hungarian Historians. In 1993-1994 he was Rector of the Károli Gáspár Reformed University, Budapest. In 1990 he was a corresponding member, and in the following year a regular member of the Hungarian Academy of Sciences. His works include *History of Hungarian Consciousness* (*A magyar nemzeti hivatástudat története*) (1937); *István Bocskai* (1942, 1994); *History of the Hungarian Jacobite Movement* (*A magyar jakobinus mozgalom története*) (1957); *The Four-Hundred-Year Old Debrecen Press* (*A 400 éves debreceni nyomda*) (1961); *Studies on the Enlightenment* (*Tanulmányok a felvilágosodás köréből*) (1978); *History of*

*Hungary (Magyarország története)* (1980), and *Document Collection of the Csángó-Magyars in Moldavia, vols. i-ii (Moldvai csángó-magyar okmánytár I-II)* (1989). He was one of the finest historians of the second half of the 20th century. Among others he was a recipient of the Pál Bugár Commemorative Medal (1966), the Széchenyi Prize (1992), and the Soros Life-work Prize (1994). – B: 0876, 0877, 0879, 1257, T: 7103.

**Bendeguz** – According to tradition, the name of Attila's (Etele), Buda's (Bleda) and Réva's father. Hungarian phonetics derives the name from Mondiochos (Munduguz, Munduz). Since Bendeguz was the father of both Attila and Buda, it is regarded as evidence that Hungarians of old had some ancient Hun traditions. – B: 0942, T: 7103. → **Attila, Buda; Huns.**

**Bene, Ferenc** (Francis) (Balatonújlak, 17 December 1944 - Budapest, 27 February 2006) – Soccer-player. He was a player of Újpest Dózsa (1961-1978), Volán FC (1978-1979, 1983-1984), Sepci-78, Finland (1981-1982), and Kecskemét SC (1985). He was a member of the team that won the gold medal at the 1964 Summer Olympics in Tokyo, Japan. He was the top scorer of the tournament (12 goals in 5 matches). Bene played his first international match against Yugoslavia on 14 October 1962, and his last against Czechoslovakia on 12 September 1979. He obtained 76 caps and scored 36 goals. He was bronze medalist at the European Championships of 1964, and a quarter-finalist at the World Cup of 1966 (at the latter event he was the top scorer of the Hungarian national team). Bene was named Footballer of the Year in 1969. He died after a lengthy treatment following a fall at the end of 2005. His son Ferenc (Francis) Bene Jr. is also a former player, who is working as a coach. – B: 1031, T: 7103.

**Benedek, Elek** (Alec) (Kisbacon, now Bătaneii Micu, Transylvania in Romania, 30 September 1859 - Kisbacon, 17 August 1929) – Writer, journalist. He completed his university studies in Budapest, became first a journalist and later a Member of Parliament. In his parliamentary speeches he dealt with issues relating to juvenile literature, folk poetry, popular speech and education. In 1889, with Lajos (Louis) Pósa, he started the first national childrens' literary magazine, *My Journal (Az Én Újságom)*. He edited a series of children's books and also wrote poems, plays and books for girls, historical books, and books on the history of literature. From 1921 he lived in Kisbacon and edited the youth journal *Buddy (Cimbora)*. His works include *Szekler Storyteller (Székely mesemondó)* (1888); *Book of the Heart, vols. i, ii (A szív könyve, I, II)* stories (1895), and *The Wonder-Tree (A csudafa)* (1927). As a children's storyteller he was one of the founders of children's literature. As a folk and popular scientific writer he also had a great influence on a wider range of literature. In his stories and novels he immortalized the village folks of Transylvania (*Erdély*, now in Romania). – B: 0883, 1257, T: 7666. → **Benedek, Marcell; Pósa, Lajos.**

**Benedek, István** (Stephen) (*kisbaczoni*) (Budapest, 17 January 1915 - Venice, Italy, 9 June 1996) – Physician, writer, cultural historian. Son of Marcell Benedek, and grandson of Elek Benedek, both well-known writers. His higher studies were at the Medical School of the University of Kolozsvár (now Cluj-Napoca, Romania). He became professor of clinical psychology and worked at his Alma Mater and later in Budapest. He was a true polyhistor, interested not only in psychology but also in cultural history. He was a dedicated mountaineer as well. His books and writings proved his versatility. He was member of learned societies and the Hungarian Mountaineering and Sport Climbing

Association. His works include *Golden Cage (Aranyketrec)* (1957, 1968), that reached 11 printings and was translated into German and Slovak; *Man and Kid (Ember és gyerek)* (1965); *Three Shirts (Három ing)* (1966); *Csineva* (1968); *Voice in the Wilderness (Pusztába kiáltott szó)* (1974), and *Tramping Through the Alps (Csavargás az Alpokon)* (1958). He was a recipient of the Széchenyi Prize (1992), the Albert Szent-Györgyi Prize (1992), and the Distinguished Prize of MTI-Press (1994). – B: 0878, 1255, T: 7103.→**Benedek, Elek; Benedek, Marcell.**

**Benedek, László** (Ladislav) (Budapest, 5 March 1905 - Bronx, N.Y., 11 March 1992) – Producer, director, screenwriter. He was a writer, editor and photographer in Budapest. The film giant Metro-Goldwin-Mayer brought him to the US. His third feature film, the *Death of a Salesman*, an adaptation of Arthur Miller's classic play, gained him wide acclaim and won a Golden Globe and the Director's Guild Award in 1951, and was nominated for five Oscars. In 1954 he directed the classic motorcycle rebel movie, *The Wild One* with Marlon Brando (1953). This was his most successful film. He produced successful television plays as well, including such hits as *The Outer Limits*, *Mannix*, *The Untouchables*, *Voyage to the Bottom of the Sea*, and *Perry Mason*. – B: 1279, 1283, T: 7103.

**Benedek, Loránt** (Budapest, 4 April 1944 - ) – Linguist and philosopher, he studied English and French linguistics and literature at Budapest University, graduating with the equivalent of an M.A. degree in 1970. When graduating he founded the English language teaching studio named Structura to utilise the findings of contemporary structural and generative transformational linguistics in foreign language teaching and to connect it with the intensive method. In 1984 he obtained a scholarship from Trinity College, Cambridge, and studied philosophy and general linguistics there from 1986 to 1989, graduating with his second M.A. degree. After the political transformation of Hungary in 1990, he published, in the radical national weekly *Demokrata Fórum* (no. 47, vol. V), a lengthy article in the philosophy of economics entitled *Thoughts on the Basic Principles of Economic Policy (Gondolatok a gazdaságpolitika alapelveiről)*, pointing it out that neo-liberal economic policies destroy the country's economy, and true economics can only be rightly conceived of as applied ethics. Between 1992 and 2004 he taught philosophy, English linguistics and ancient Greek at Károli Gáspár Reformed University in Budapest. Since 2001 he has been an editor of the international journal of philosophy *Existencia* published in Hungary, contributing with articles like *Justice and Post-Communist Transformation* (vol. XI/2001) and *The New Hungarian Constitution* (vol. XXI/2011). He also translates works in philosophy and theology into English and Hungarian. – B&T: 7666.→**Károli Gáspár Reformed University.**

**Benedek, Marcell** (Marcellus) (Budapest, 22 September 1885 - Budapest, 30 May 1969) – Literary historian, translator. He received a teacher's degree in German at the University of Budapest. In 1904 he founded the *Thalia Society (Thalia Társaság)* with György (George) Lukács and László (Ladislav) Bánóczy. He spent one year on a scholarship at the University of Paris (Sorbonne). After World War I he spent some years working for the *Dante Book Publishers (Dante Könyvkiadó)* as an editor, then joined the *New Times Ltd. (Új Idők Rt.)* publishing company and became its director. During 1930-1939 he acted as Secretary-General of the *Hungarian National Book Publishers*

*Association (Magyar Könyvkiadók Országos Egyesülete)*. At the time of the German occupation in 1944, he fled to Transylvania (*Erdély*, now in Romania), and during 1945-1946 taught at the University of Kolozsvár (now Cluj-Napoca, Romania). He also acted as a dramaturgist and guest director of the local Hungarian Theater (*Magyar Színház*). In 1947 he moved back to Budapest and was professor at the University. In 1965 he published his autobiography *I am Reading My Diary (Naplómat olvasom)*. His book on the great poet János (John) Arany was published after his death in 1970. He also wrote studies on *Victor Hugo* (1912); *Emile Zola* (1922); *Shakespeare* (1958); *Romain Roland* (1961), and *G. B. Shaw* (1963). Some of his most notable works are *Modern Hungarian Literature (A modern magyar irodalom)* (1924); *French Literature (A francia irodalom)* (1928); *Literature Esthetics (Irodalom-esztétika)* (1936), and *World Literature (Világirodalom)* (1964). His writing is characterised by a clear, informal style, and a humanistic mentality. His translation output is vast; there are close to 200 foreign works translated into Hungarian by him. Several of his translations popularized French literature. He had a Ph.D. in Literature (1952). He was a recipient of the Baumgarten Prize (1944) and the Kossuth Prize (1963). – B: 0883, 1257, T: 7617. → **Benedek, Elek; Benedek, István; Arany, János.**

**Benedek, Sándor** (Alexander) (Felsőőr, 3 April 1904 - Budapest, 24 January 1983) – Minister of the Reformed Church, theologian, writer. He studied Theology at Pápa (1923-1925, 1927), Vienna, (1925-1926), Marburg (1926), and Basel (1926-1927). He was Assistant Minister in Erdősokonya (1927-1930), in Nagyatád (1930-1931), then Minister there (1931-1938). He earned a Ph.D. in Theology in Debrecen in 1933. He was Professor of Practical Theology at the Reformed Theological Academy and Director of the Reformed College in Pápa (1938-1952). After the Theological Academy and the College of Pápa were closed by the Communist regime, he became a Parish Minister in Nagydorog in 1953. He edited the Congregational monthly, *New Path (Új Ösvény)* and a mission periodical (1947-1949). In his retirement he worked at the Ráday Collection, Budapest. His articles, essays and translations appeared in the *Theological Review (Teológiai Szemle)*. His books include *Practical Theology of Ferenc Tóth (Tóth Ferenc gyakorlati teológiája)* (1933); *The Future Church and its Service (A jövő egyháza és annak szolgálata)* (1946), and *What Kind of Minister Should the Future Minister be? (Milyen legyen a jövő lelkipásztora?)* (1947). – B: 0910, T: 7103.

**Benedictine Order in Hungary** (Hungarian: *Benedekrend, Bencésrend*; Latin: *Ordo Sancti Benedicti – OSB*) – The oldest monastic order of the Roman Catholic Church, thus the oldest monastic order of Western Christianity. The order was founded by St Benedict of Nursia (ca. 480-550-553), in his hermit cave near Subiaco. Its basic principle, laid down by St Benedict, was a moderation instead of severity in monastic life and in perfect Christian life in the spirit of the Gospels. Near his cave St Benedict established 12 monasteries or abbeys with 12 monks in each. He also established the Monastery at Monte Cassino in 529; here he established the rules (*regula*) for monastic life. The head of the Monastery was the abbot, like the father of a family, to whom the other monks show filial obedience. He determined the chief virtues of monastic life: *self-restraint, silence, humility, poverty* and *diligence*, which combine a contemplative, meditative life with an active life. Another characteristic Benedictine virtue is *hospitality*.

In Hungary the foundations of the first Benedictine Abbey were laid down by Reigning Prince Géza at Pannonhalma (near Győr in northwest Transdanubia) in 996. His son,

King István I (St Stephen, 997-1038) confirmed Géza's foundation, provided it with a deed of foundation in 1002, and granted the same rights to the Abbey of Pannonhalma, as those enjoyed by Monte Cassino. According to these rights the Abbot of Pannonhalma in his own area commands the same jurisdiction as a bishop. St Stephen founded the Abbeys of Pécsvárad, Bakonybél, Zalavár and Zoborhegy. To a large extent the King was assisted by the Benedictines in his spreading of Christianity and European culture. Bishop St Gellért, who became a martyr, was also a Benedictine monk. Apparently, it was Astrik, the Abbot of Pécsvárad Monastery, who brought the Holy Crown of Hungary from Rome, from Pope Sylvester II for the coronation of St Stephen, the first king of Hungary. The first Hungarian writer, St. Mór, Bishop of Pécs (from 1036), was also a Benedictine monk; he was the author of a Latin legend: biography of the hermits Benedek and Andrew. The successors of St Stephen continued his activities of founding Benedictine monasteries: King Sámuel Aba at the foot of the Mátra Mountain; then in 1055 King András I (Andrew) founded the Tihany Abbey (on the peninsula in Lake Balaton); King Béla I (1060-1063) at Szekszárd and Kolozsmonostor; King Géza I (1074-1077) at Garamszentbenedek; in 1091 King St László (Ladislav, 1077-1095) settled French Benedictine friars at Somogyvár (south of Lake Balaton) and founded other abbeys at Kolos, Szentjobb and Báta (north of Mohács) and King Béla II (1131-1141) founded a monastery at Dunaföldvár on the banks of the Danube. The Mongol (Tartar) invasion and destruction of the Kingdom in 1241-1242, as well as the 150-year long occupation of Hungary by the Ottoman Turks (1526-1698) seriously affected the life and activities of the Benedictine Order. The well-defensible abbey of Pannonhalma, built of stone, escaped total destruction; but the other abbeys could not escape, 40 of them had never recovered. In 1501, Máté Tolnai became abbot at Pannonhalma. In 1586 only some troops remained there, all the monks fled. Before the Turks were driven out from Hungary, Mátyás Pálffy became the abbot at Pannonhalma and re-established life there. The abbeys of Bakonybél, Dömölk and Tihany reappeared again. The Habsburg Emperor József (Joseph II, 1780-1790) abolished the order in 1786, as well as all the other orders. However, when King Ferenc I (Francis, 1792-1835) ascended the imperial throne, the Benedictines were reestablished in 1802, first at Pannonhalma, with the stipulation, that the monks provide teaching staff for 6 high schools in country towns. In 1842 there were 150 regular clergy and 40 clerics in the Order. By 1936 the official documents show 279 Benedictine members for the Order. The Head of the Order in Hungary is the Senior Abbot of Pannonhalma. There are four abbeys under the Senior Abbey of Pannonhalma: Bakonybél, Celldömölk, Tihany and Zalaapáti. The Primate of Hungary in the interwar years was Cardinal Jusztinian Serédi, also a member of the Order. The Benedictine theological and teacher-training college was functioning at Pannonhalma until 1948. In addition, the Benedictines carry out their teaching activities in boys' high schools: in Budapest, Esztergom, Győr, Komárom, Kőszeg, Pápa, Sopron, and since 1945, also at Csepel (a new high school). A Hungarian-founded high school also exists in Sao Paulo, Brazil. Benedictine friars perform their pastoral duties in 25 parishes. Their 1948 membership consisted of 221 ordained monastic teachers, 52 seminarists and 4 brethren. During the Communist regime, while Hungary was under Soviet military occupation (1945-1989), the Benedictine Order was only allowed to keep the Abbey of Pannonhalma and its high school, as well as its school and convent at Győr. Since the political change in 1989, the Order revived and resumed its regular activity. – B: 0945, 1068, 1344, T:

7456.→**Pannonhalma; Árpád, House of; Catholic Church in Hungary; Religious Orders in Hungary.**

**Benepuszta Find** – A 10th century find in the hamlet of Benepuszta near the town of Lajosmizse in Bács-Kiskun County on the southern part of the Great Plain. This discovery from the Hungarian settlement era in the Carpathian Basin was the first in Hungary to be scientifically analyzed. Miklós Jankovich (1773-1846) published the description of this find in 1834. – B: 1138, T: 7617.

**Beneš Decrees** – The collective name of the 143 decrees authored by Czechoslovak President Edvard Beneš during and after World War II. Out of the 143 decrees 15 severely punished the German and Hungarian minorities and led to their persecution and expulsion. Beneš' London Government in Exile already received the support of Stalin for the implementation of this program, when Beneš offered to cede Carpatho-Ukraine (Sub-Carpathia, or Ruthenia, *Kárpátalja*, a part of Historic Hungary) voluntarily to the Soviet Union, an act that was actually carried out in the middle of 1945. The Košice (*Kassa*) Government Program on 5 April 1945 aimed at eliminating all the non-Slavic minorities in order to establish a “national state” of Czechs and Slovaks – in effect, it amounted to “ethnic cleansing”. The three million Sudeten Germans and the 720,000 Hungarians of Slovakia were not to be part of the re-established Czechoslovakia. Beneš held these nationalities “collectively guilty” for the collapse of Czechoslovakia in 1938. On his way back to Prague from Košice in 1945, he visited Bratislava (*Pozsony*) and declared that *“After this war there will be no minority rights... After punishing all the delinquents who committed crimes against the State, the overwhelming majority of the Germans and Hungarians must leave Czechoslovakia. This is our resolute standpoint... Our people cannot live with Germans and Hungarians....”* The Beneš government lobbied to have the Allies approve the ethnic cleansing of Germans and Hungarians. At the Potsdam Conference Stalin aggressively supported the mass deportation of the 3 million Germans; and it was agreed to – after a five-minute long negotiation – on 25 July 1945. Although the Western Allies did not approve the expulsion of the Hungarians, the Košice program set the stage for the expulsion of the Hungarians as well. As a first step it deprived the Hungarians of Czechoslovak citizenship. This meant that “non-Slavic elements” were eliminated from public administration. All Hungarian landholdings were confiscated and all Hungarian schools were closed. Hungarians were not allowed to participate in local self-governing institutions, not even in the overwhelmingly Hungarian inhabited areas along the state border. In the meantime, a press hate-campaign was unleashed against both the German and Hungarian minorities, in which 240,000 Germans perished. Besides the hate campaign, the Hungarians were targeted by intense persecution. After the expulsion of those who were assumed “guilty of war crimes” (some 4800 persons), the Beneš decrees provided for the expulsion of all Hungarian schoolteachers. When the mass firing of Hungarian civil servants took place pursuant to directive 44/1945 of the Slovak National Council, the overwhelming majority of the Hungarians were left without earnings overnight. In addition, all retirement payments to Hungarians were halted. Directive 69/1945 of the Slovak National Council went further and ordered all “unreliable” Hungarians to be fired from private employment as well. Finally, about 50,000 Hungarians were railroaded from their place of birth in the winter cold in unheated cattle wagons to lands left vacant by the expelled Sudeten Germans, to provide slave labor for the abandoned farms. Altogether, some 120,000 ethnic Hungarians were

expelled or deported to Hungary. There was a voluntary population exchange program signed at the Pöstyén (*Pieštany*) Agreement on 13 July 1947. The discriminative Beneš Decrees have never been repealed. The Czech and Slovak governments even refuse to renounce these notorious Beneš decrees despite the fact that these are mirror images of the *Third Reich*'s racist Nuremberg Laws. In 2007, the Parliament of Slovakia confirmed the Beneš Decrees, which sparked protest in Hungary and Germany. – B: 0930, T: 7103.→**Atrocities against Hungarians; Beneš, Eduard; Hungarian-Czechoslovakian Population Exchange; Deportations.**

**Beneš, Eduard** (Kozlany, Bohemia, 28 May, 1884 - Sezimovo Ústí, 3 September, 1948) – Czech politician. He was educated in Prague, Paris and Dijon, where he studied Political Science and Sociology and obtained a Doctorate in Law (1908). Afterwards he taught at the University of Prague. At the outbreak of the First World War Beneš organized a resistance group, the *Maffia*, but soon escaped from Austria-Hungary and went to Paris, where he taught Slavic Studies at the University of Paris (Sorbonne), and joined Tomáš Garrigue Masaryk in the fight for Czechoslovak independence. What the two men formed was the kernel of the Czechoslovak National Council with Beneš as its first General Secretary. Throughout the rest of the war Beneš worked to persuade the Allies to support the establishment of an independent state for the Czech people. As a result of the Versailles Peace Treaty (4 June, 1920), the independent state of Czechoslovakia, established in 1918, was then confirmed. Beneš became Foreign Minister of the newly created country. In 1920-1922 he organized the Little Entente with Romania and Yugoslavia against revisionist efforts of the badly mutilated Hungary. He worked hard for the League of Nations and attempted to obtain good relations with other nations in Europe. Beneš replaced Tomáš Masaryk when he retired as President in 1935. He considered the Munich Agreement (1938), negotiated by Neville Chamberlain and Adolf Hitler as a grave betrayal and resigned from office and went into voluntary exile in Great Britain (1938). In 1941 Beneš became head of a Czechoslovak provisional government in London. In March 1943 Beneš flew to Moscow, expecting more from Stalin, and he became a Kremlin agent. Beneš, along with Jan Masaryk, accompanied the Russian troops who liberated the country from Germany at the end of World War II, and both were returned victoriously. Beneš worked out and executed the Košice (*Kassa*) Government Program and the infamous Beneš Decrees on 5 April 1945 to drive out all the non-Slavic minorities and establish a “national state” of Czechs and Slovaks. As the result of his “ethnic cleansing” three million Sudeten Germans and 720,000 Hungarians of Slovakia were declared “collective war criminals” and punished in many ways, including confiscation of property, deportation, expulsion and even slave labor in Silesia. Beneš remained President of Czechoslovakia for three years. After Klement Gottwald formed a pro-Communist government in February 1948, he attempted to keep his presidential role neutral in the struggle for power. In June 1948, when Gottwald intended to introduce a Communist political system, Beneš resigned from office on 7 June and soon died a broken man. His “Decrees” are still somehow an active part of the *Corpus Juris* both in the Czech Republic and Slovakia, despite the fact that both countries have been a part of the European community since 2004. Beneš is regarded as one of the great figures in Czech and Slovak history. He had numerous critics as a fanatic nationalist with a radical plan to eliminate without mercy all non-Slavic ethnic groups. In 2008 a Beneš statue was erected at his place of birth, unveiled by the President of the Czech Republic,

Václav Klaus. – B: 1031, 1947, T: 7103.→**Beneš Decrees; Hungarian-Czechoslovakian Population Exchange; Atrocities against Hungarians; Trianon Peace Treaty; Hitler, Adolf.**

**Benevento, Battle of** (Italy) – One of Hungary's famous acts of bravery. On 20 June 1350, 300 German mercenaries lodging at Benevento swore an oath to capture the Hungarian king Lajos I (Louis the Great, 342-1382) and hand him over to Johanna I, Queen of Naples. Hearing this, Miklós (Nicholas) Lackfi took 150 specially selected warriors of great courage and on the next day, leading them personally, fought the Germans at the gate of the city. After a bloody fight the Hungarians won a resounding victory, killing 150 of the mercenaries and taking another 150 captive. When King Lajos arrived from Melfi they were paraded in front of him as trophies of the victory. The king let them go but not before putting them to shame by stripping them of their weapons. – B: 0942, T: 7668.→**Lajos I, King; Lackfi, Miklós.**

**Beniczky, Lajos** (Louis) (Micsinye, now Horná Mičiná, Slovakia, May 1813 - Pest 16 July 1868) – Colonel, politician. In the War of Independence of 1848-1849, he was Commissioner of the mining towns of Northern Hungary (Upland, *Felvidék*, now Slovakia). Prior to 1848 he was a politician of the Reform Party, follower of Lajos (Louis) Kossuth. Until 1842, he worked as a clerk in various county offices. He was promoted to colonel on 15 March 1849. After the fall of the War of Independence, he was first sentenced to death, then to 20 years of castle custody. He received amnesty in 1857, and in 1861 he was elected a representative of Parliament. In 1864 he participated in the Almásy-Nedeczky plot and was sentenced for 10 years of castle custody. He received amnesty after the Compromise (*Ausgleich – Kiegyezés*) of 1876. He became organizer of the veterans. It is presumed that his political adversaries murdered him. – B: 0883, T: 7103.→**Freedom Fight of 1848-1849; Kossuth, Lajos; Almásy-Nedeczky Plot; Almásy, Pál; Nedeczky István; Compromise of 1867.**

**Benjámín, László** (Ladislav) (Pestszentlőrinc, 5 December 1915 - Budapest, 18 August 1986) – Poet, editor. As a young man he worked as a printer, welder and messenger. From 1931 he took part in the cultural, later political work of the Social Democratic movement. In 1935 he visited Austria. His first poem appeared in the *People's Voice* (*Népszava*), and other poems were published in *Nice Word* (*Szép Szó*), *People of the East* (*Kelet Népe*) and other newspapers. His first volume of poems was published in 1939. He was editor and organizer of anthologies by working-class writers. In 1944 he was enlisted in the Hungarian army and sent to forced labor in the Ukraine. Later he defected from the retreating army. At first he got a job with the local newspaper *People's Paper* (*Néplap*) at the end of 1944 in Debrecen. That was followed by work as correspondent and editor of various Social Democratic newspapers in country towns. From 1952 he was Editor of the periodical *New Voice* (*Új Hang*). From 1960 he was employed in the Ervin Szabó Library (*Szabó Ervin Könyvtár*), Budapest. His next volume of poems could not be published because of his conflict with the Communist Party. By 1970 he fully returned to his literary activity, and from 1976 entered the editorial board of the illustrated weekly *New Mirror* (*Új Tükör*) and was its Editor-in-Chief from 1979 until his death. The motive of the love of family life permeates his poetry. The poems about his children possessed lasting value even in the period of anti-Semitism. His works include *The Star did not Come* (*A csillag nem jött*) poems (1939); *With Fire and Knife* (*Tűzzel, késsel*) poems

(1951); *I wanted Fire (Tüzet akartam)* selected poems (1978), and *Collected Poems (Összegyűjtött versek)* (1982). He was awarded the Kossuth Prize (1950, 1952), the Attila József Prize (1968), the Pro Arte Prize (1971), and the Order of the Banner with Laurels (1985). – B: 0883, 1257, T: 7456.

**Benkő, András** (Andrew) (Fejérd, now Feiurdeni, Romania, 21 January 1923 - ) – Musicologist from Transylvania (*Erdély*, now in Romania). His higher studies were at the Academy of Music and Dramatic Art (1946-1948) at the Hungarian Institute of Arts (1948-1950) and at the Gh. Dima Music Academy (1951), Kolozsvár (now Cluj-Napoca, Romania). He was an adjunct professor at the Hungarian Academy of Arts, Kolozsvár (1949-1950) and an adjunct professor at the Musicology Department of the Gh. Dima Music Academy (1950-1958). He retired in 1985, but continued teaching in the Protestant Theological Institute, Kolozsvár (1990-1998). His major works are: *Béla Bartók's Concerts in Romania (Bartók Béla romániai hangversenyei)* (1970, *History of Universal Music, vols. i-ii (Az egyetemes zene története I, II)* (1973, 1981), *The Music Theory of the Bolyais (A Bolyaiak zeneelmélete)* (1975), *Little Music Lexicon (Zenei kislexikon)* (1983), *The History of Church Hymns, Hymnology (Az egyházi ének története, Hymnologia)* (1994), and *Aladár Zoltán* (1996). He also authored many articles, studies, essays and critiques. He is Editor of the *Musicological Writings, vols. i-iv (Zenetudományi írások, I-IV)*; contributor to the *Hungarian Literary Lexicon in Romania (Romániai Magyar Irodalmi Lexikon)* and the *Grove Dictionary of Music and Musicians*, London. He is a member of the Hymnological Committee of the Consultative Synod of the Hungarian Reformed Churches; founding member and first President of the Hungarian Music Association in Romania; a member of the Association of Romanian Composers and Musicologists. He received the Order of Merit of Culture (1968), the Bartók Medal (1981) and the Prize of the Alliance of Composers (1987). – B: 1036, 1031, T: 7103.  
→**Bartók, Béla.**

**Benkő Dixieland Band** – A jazz band formed in 1957, which became one of the best-known and most popular jazz ensembles in Hungary and abroad. Their international career began in the 1960s by touring the neighboring countries in Europe. In the 1970s they left for the West. In 1998 they played in front of audiences of 10,000 and worked with such leading pop-stars as the American Mit Jackson, Freddy Hubbard, Al Grey, Buddy Tate, Joe Newman, Buddy Wachter, Henry Questa, Joe Muranyi, Eddy Davis, Cynthia Sayer, Herry Sweet Edison, Albert Nicolas, Wild Bill Davison, or the European Chris Barber, Kenny Ball, Huub Janssen, Acker Bilk – and many others. The Benkő Dixieland Band plays 200-250 concerts annually in Hungary and abroad. Their 64th record came out recently; and 130 hours of TV programs were prepared of their performances, watched worldwide by 600 million people. They often go on world tours. The members of the band are: Vilmos (William) Halmos (piano, singing), Jenő (Eugene) Nagy (banjo), Gábor (Gabriel) Kovacsevics (drum), Zsolt Kelemen (double bass), Iván Nagy (singing), Béla Zoltán (trumpet), Sándor (Alexander) Benkő (clarinet, band manager). In 1982 in California they won the grand prix of the Sacramento Jazz Festival. In 1983 it was the “International Jazz Band of the Year”, also in California. In 1987, American President Ronald Reagan recognized their outstanding work, thanked them in the name of the American people, saying that the Dixieland Band represents American jazz at the highest level in the world. In 2001 the Band received the Hungaroton Oeuvre Prize. In 1997, the President of the Republic of Hungary, Árpád Göncz presented to

every member of the Band the “Order of the Civil Servant Cross of the Republic of Hungary”. In 2006 the Dixieland Band received the highest prize for art in Hungary: the Kossuth Prize. – B: 1637, T: 7456.→**Göncz, Árpád.**

**Benkő, Ferenc** (Francis) (Magyarláros, now Suciú, Romania, 4 January 1745 - Nagyenyed, now Aiud, Romania, 16 December 1816) – Minister of the Reformed Church, natural scientist. He started his schooling in Nagyenyed and Kisbacon (now Băteni Mici, Romania), later became a student at the Gábor Bethlen College at Nagyenyed. He completed his Theological studies, and continued with postgraduate education at universities in Switzerland and Germany. On his return to Hungary he traveled a great deal, took a position as a private tutor; and later became a Minister and served until 1790. Afterwards he taught at the Nagyenyed Reformed College until his death. He gave his inaugural address in Hungarian instead of Latin, this being a first at that time and caused a great sensation. He published and edited at his own expense a popular literary and scientific educational paper until 1797, entitled *Pastime at Parnassus* (*Parnasszusi Időtöltés*). He wrote the first textbook, *Hungarian Mineralogy* (*Magyar mineralogia*) in Hungarian, which he published in 1786 at Kolozsvár. He is considered to be one of the outstanding scientific personalities of the 18th century, as well as a progressive thinker, pedagogue and pioneering innovator. – B: 0883, 1257, T: 7675.

**Benkő, Gyula** (Julius) (Budapest, 22 August 1918 - Budapest, 30 July 1997) – Actor. He trained at the Comedy Theater (*Vígyszínház*), Budapest and joined it in 1939. He was its Director for a short while with Klári (Clara) Tolnai and István (Stephen) Somló in 1949. From 1949 to 1951 he worked at the Youth Theater (*Ifjússági Színház*). His portrayals of psychological characters and grotesque figures were outstanding. His major roles included Marchbanks in Shaw’s *Candida*; Tuzenbach in Chechov’s *Three Sisters* (*A három nővér*); Christian in Rostand’s *Cyrano de Bergerac*; Oswald in Ibsen’s *Ghosts* (*Kísértetek*); Husband in Mesterházi’s *Men of Pest* (*Pesti emberek*); Val Xavier in Williams’ *Orpheus Descending* (*Orfeusz alászáll*), and Menelaos in Euripides’ *Trojan Women* (*A trójai nők*). There are some 26 feature films to his credit, including *Love Each Other*, *Children* (*Szeressük egymást gyerekek*); *Thorn Under the Nail* (*Tüske a köröm alatt*); *The Red Countess* (*A vörös grófnő*); *Cold Days* (*Hideg napok*); *Zoltán Kárpáthy*; *Foto Haber*; *Darkness in Daylight* (*Nappali sötétség*); *Two Confessions* (*Két vallomás*) *Two Halftimes in Hell* (*Két félidő a pokolban*), and *Why?* (*Miért?*). He was a recipient of the Mari Jászai Prize, and the titles of Merited Artist and Outstanding Artist. – B: 0870, 1445, T: 7103.→**Tolnai, Klári; Somló, István.**

**Benkő, József** (Joseph) (*középjajtai és árkosi*) (Bardóc, 20 December 1740 - Középjajta, now Ajta Medie, Romania, 28 December 1814) – Minister of the Reformed Church, historiographer, natural scientist. He was a student of Nagyenyed (now Aiud, Romania) Reformed College, became Minister in Középjajta, later Professor at the College of Székelyudvarhely (now Odorheiu Secuiesc, Romania). He established three botanical gardens on his estate at Középjajta, containing 600 species of plants that are considered to be the very first botanical gardens in Transylvania (*Erdély*, now in Romania). He occupied an important place amongst scientists of Transylvania, visiting all areas of Erdővidék, his homeland, and his descriptions of the flora of Transylvania’s various regions were a pioneering work. His scientific career embraced history, linguistics and the natural sciences. Contrary to the unscientific methods of many authors whose works

were published throughout Europe during the latter part of his century, he was a strict adherent to direct observation. Unfortunately, his most important work, the *Flora Transsilvanica*, the very first phytogeographical opus on Transylvania remained an unfinished manuscript. In his honor, foreign scientists named one of the plants he described *Epilobium benkőianum*. In his research work he included missing species of plants and is thereby regarded as a precursor of biogeography. In his *Filus Postumus* he was the first to include data on the population of Erdővidék, demonstrating the demographics of this regional unit. There is no lack of geographical data either in his main opus *Trassilvania sive Magnus Transsilvaniae Principatus*, published in 1777-1778. He was the first to systematize the loan words in the Hungarian language in the publication. In the parts dealing with the areas of Maros, Szamos and Olt Rivers, he lists settlements, lakes and tarns (lacustrine mountain lakes) and writes also about the mineral water sources. This work belongs to the best descriptive works about Transylvania. He was the first to publish an all-inclusive work about the caves of Transylvania, called *Imago Specuum Transilvae*. It was published in Haarlem, the Netherlands in 1781. A large number of his historical studies, collections of source materials and botanical monographs remained in manuscript form. His life's work brought history writing of Transylvania to a level of the quality equal to that of the rest of Europe. – B: 0883, 1257, T: 7675.

**Benkő, Loránd** (Roland) (Nagyvárad now Oradea, Romania, 19 December 1921 - Budapest, 17 January 2011) – Linguist. His university studies were at the József Ferenc University, Kolozsvár (now Cluj-Napoca, Romania) (1941-1944), where he read Hungarian and Italian History, and at the University of Budapest (1944). From 1946 he taught at the same university in different positions until his retirement as its Deputy Rector. However, he continued to teach on a part-time basis. He also filled important positions in related organizations, such as the Hungarian Linguistic Art Institute. He was President of the International Hungarian Philologist Society (1980-1990); President of the Linguists Committee of the Hungarian Academy of Sciences (1964-1996); was Editor for the periodical *Hungarian Language (Magyar Nyelv)* (1973-1990); President of the editorial board of the *Pedagogical Review (Pedagógiai Szemle)*; was a representative of the European Lexicography Association, and President of the Society of Natural Sciences (*Természettudományi Társaság – TIT*) (1995-2000). His greatest work is the monumental *Historical-Etymological Dictionary of the Hungarian Language, vols. i,ii,iii (A Magyar nyelv történeti-etimológiai szótára I,II,III)* of which he was Editor-in-Chief, (1967-1976). His other works include *The History of Hungarian Dialects (Magyar nyelvjárástörténet)* (1957); *History of the Hungarian Language (A magyar nyelv története)* (with G. Bárczi and J. Berrár, 1967), and the *Nation and its Mother Tongue (Nemzet és anyanyelve)* (2000). He is a member of the Hungarian Academy of Sciences (corresponding 1965, regular 1976). He is a recipient of a number of prizes, among them the Dezső Pais Prize (1988), the Széchenyi Prize (1996), and the Grand Prix, Pro Renovanda Cultura Hungariae (2001). – B: 0877, 1257, T: 7456, 7103.→**Benkő, Samu.**

**Benkő, Samu** (Samuel) (Lőrincfalva now Leordeni, Romania, 25 February 1928 - ) – Cultural historian in Transylvania (*Erdély*, now in Romania). He read philosophy at the University of Kolozsvár (now Cluj-Napoca), where he also served as an assistant lecturer (1949-1950). He taught in the countryside (1951-1952), he was an assistant professor at the University of Kolozsvár (1951-1953), and a scientific researcher at the Historical

Science Institute of the Romanian Academy, Kolozsvár (1953-1975). He was Editor of the magazine *Our Age (Korunk)* (1957-1958) and contributed to the *Istoria Romaniei, vol. iii*, 1964. He was one of the translators of the *History of Erdély (Erdély története)* (1964) and co-editor of the *Revolutia de la 1848-49 din Transilvania* series (1977), as well as that of the volume *Szekler Uprising, 1595-1596 (Székely felkelés, 1595-1596)* (1979). He was a researcher at the Kolozsvár Chapter of the Romanian Academy until his retirement in 1988. Among the works he authored are: *Confessions of János Bolyai (Bolyai János vallomásai)* (1968); *Father and Son (Apa és Fiú), Bolyai Studies* (1978); *Watchwords (Őrszavak)*, (1984); *Károly Kós: Biography (Kós Károly: Életrajz)* (1990), and *New Beginnings (Újrakezdések)* (1996). He is an external member of the Hungarian Academy of Sciences (1990) and a recipient of numerous prizes, among them the Romanian Writers' Association Prize (1971, 1984), Middle Cross of Merit of the Republic of Hungary (1994), Széchenyi Prize (1997), the Golden Prize of the Hungarian Academy of Arts (1999), the Gábor Bethlen Prize (2000), and the Pro Patria Prize (2008). – B: 1036, 1257, T: 7103. → **Benkő, Loránd**.

**Bény, Attire of** – The name of the traditional costume of the Kisbény region situated at the lower Garam River of Northern Hungary (Upland, *Felvidék*, now Slovakia). It was popular in the 19th and in the first half of the 20th century. It belongs to the same group of folk costumes as the traditional attire of the Catholic Bart, Kéménd, Kisgyarmat, Kőhidgyarmat and Páld regions (now Bruty, Kamenin, Sikenicka, Kamenny Most, Páld in Slovakia). The women wove the hemp cloth; other materials they needed were procured in nearby Esztergom. Of all Hungarian folk costumes for women, this has the lowest waistline. The original hemp cloth was first bleached, then dyed bright blue, the most favored color, although red and green were also popular. The men's hat is black with a round top. Their summer clothes are made of white canvas; their holiday shirt is pleated and worn inside the trousers with its long full sleeves gathered into a wristband. Their knee breeches and long-sleeved vests are made of black felt or some other black cloth. They wear side-stitched boots of soft leather that can crumple as they are worn loose for comfort. – B: 1134, T: 3240.

**Benyovszky, Count Móric Ágost** (Maurice Austin) (Verbó, now Vrbove, Slovakia, 20 September 1741? - Angontsy, Madagascar, Africa, 23 May 1786) – Discoverer, soldier of fortune, King of Madagascar, world traveler, writer. The year of his birth is disputed. According to some it was 1746. He entered the military at a young age. In a lawsuit over his share of family inheritance he tried to obtain by force, he became involved in a high treason case, and as a consequence Empress Maria Theresa banished him. He took refuge on his property in Poland; and when the Poles rose against Russian rule in 1768, Benyovszky joined them. He was taken prisoner by the Russians and exiled to the Bolsereck colony on Kamchatka. In the spring of 1771 he organized an uprising with other interned Czarist officers, captured a ship and escaped. Their original destination was America; but at the Aleutian Islands they turned around, sailed past Japan, touched on Formosa, and finally landed at Macao. From there Benyovszky traveled via Madagascar to France, where he was received with great honors and was given the title of Baron for his bravery. King Louis XV of France commissioned him to lead an expedition of volunteers to Madagascar and establish commercial settlements there with the aim of turning the island into a French colony. Benyovszky stayed in Madagascar from February 1774 until December 1776; and with the help of his expedition, greatly contributed to the

exploration of the Island at the time still unknown to Europeans. Before leaving Madagascar, a delegation of 62 native chiefs proclaimed him their ruler in August 1776. It was partly due to Benyovszky's benevolent nature and efforts toward the natives, and partly to a local belief that an important former ruler had reappeared in him. This seemed to be a threat to French interests; hence they criticized him on his return to France. Thus he went back to Hungary following Empress Maria Theresa's pardon. During 1778-1779 he took part in the Bavarian War of Inheritance; and in acknowledgment of his bravery received the rank of Count, a title he was already using. On hearing of the American War of Independence in 1779, he wanted to join the legion led by General Pulaski; but it met with little success and he returned to Hungary. There he made plans for land and water transportation of goods and for development of Fiume's harbor (now Rijeka, Croatia). Having been on friendly terms with Benjamin Franklin, he went back to America in connection with a foreign legion he wanted to organize; but the idea was not received well. In 1783 he decided to resume the colonization of Madagascar and for this reason traveled to America a third time. With the aid of some Baltimore businessmen he managed to fully equip his expedition. He landed on Madagascar again in July 1785 and built up his fortified settlement, Mauritanie near Cape East at Angontsy. From the *Ile de France* (the Island of Mauritius) the French took a dim view of Benyovszky's activities and a detachment of 60 men led by Captain Larcher was sent to capture him. In the ensuing engagement Benyovszky received a fatal bullet wound. He was buried at the base of his fort; but over the years his grave has been lost to tropical growth. Before his final and fatal undertaking Benyovszky wrote down the story of his adventurous life and left it behind in London. His *Memoirs* were published after his death, translated into a number of other languages and earned world fame for him, although his real historical role is still debated. – B: 0883, 1257, T: 7456.

**Beöthy, László** (Ladislav) (Budapest, 13 April 1873 - Budapest, 7 May 1931) – Theater manager, journalist. He was the son of Zsolt Beöthy and Szidi Rákosi. He started journalism in 1891 at the paper *Budapest News* (*Budapesti Hírlap*), owned by his uncle, Jenő (Eugene) Rákosi. In 1898 he became manager of the Magyar Theater (*Magyar Színház*), which functioned at that time as an Operetta Theater. From 1990 to 1992 he was manager of the National Theater (*Nemzeti Színház*), Budapest. He was the first to stage the works of Géza Gárdonyi and Sándor (Alexander) Bródy. In 1903 he founded the King Theater (*Király Színház*), opening with Pongrác Kacsóh's *John the Brave* (*János vitéz*), reaching 689 performances, which popularized operetta, as well as the feasibility of his new theater. In 1907 he took over the management of the Magyar Theater and that of the Folk Opera (*Népopera*) in 1916. In 1918 he founded the First Hungarian Theater and Theater Management Corporation (*Színházi és Színházüzemi Unió Rt.*), which included, beside the Magyar Theater and the King Theater, the Inner City Theater (*Belvárosi Színház*) and the Lujza Blaha Theater (*Blaha Lujza Színház*). In 1924 he became the main shareholder and Managing Director of the Union. After the dissolution of the Union, he managed the Inner City Theater between 1926 and 1928. His poems, articles and stories appeared in a number of papers. His works include *Two Girls and a Lad* (*Két lány, egy legény*) (1895), *The Three Casimirs* (*A három Kázmér*) (1896), *Golden Wedding* (*Aranylakodalom*), with Viktor Rákosi (1898) *Madama Kovács* (*Kovácsné*) (1903), and *Uncle Ben* (*Béni bácsi*) (1903). – B: 0883, T: 7103. → **Beöthy, Zsolt; Rákosi, Szidi; Gárdonyi, Géza; Bródy, Sándor; Kacsóh, Pongrác; Rákosi, Viktor.**

**Beöthy, Zsolt** (Buda, 4 September 1848 - Budapest, 18 April 1922) – Writer, literary historian. His son was László (Ladislav) Beöthy. He studied Law at the University of Pest (1867-1870); thereafter went abroad and studied at the Universities of Vienna and Munich (1870-1871). Between 1871 and 1875 he was a clerk at the Ministry of Finance. In 1877 he received a Ph.D. in Arts. Between 1875 and 1882 he taught Science at a Budapest high school. From 1878 he was an honorary lecturer, later Professor of Esthetics at the University of Budapest, as well as its Rector (1915-1916). He was first President of the Hungarian Literary Historical Society (*Magyar Irodalomtörténeti Társaság*) (1911-1919). He was the leading figure of a conservative-minded literature and literary scholarship around the turn of the 19th-20th centuries. He was a member of the Kisfaludy Society in 1876, its Secretary from 1879, and its President until his death. His works include *Historical Review of Hungarian National Literature, vols. i,ii (A magyar nemzeti irodalom történeti ismertetése I-II)*, textbook (1877-1879, reached 14 editions); *History of Hungarian Literature, vols. i,ii (A Magyar Irodalom Története, I-II)* illustrated edition (1893-1895); *A Short History of Hungarian Literature (A magyar irodalom kis-tükre)* (1896), and *History of the Arts, vols. i-iii (A művészetek története, I-III)*, editor (1905). He was a regular member of the Hungarian Academy of Sciences from 1884, Director from 1893, and Vice-President in 1910-1913. He was a recipient of the Kisfaludy Society's Greguss Award (1930). – B: 0883, 1257, T: 7456. → **Beöthy, László; Rákosi, Szidi; Hungarology; Mitrovics, Gyula.**

**Berán, Lajos** (Louis) (Budapest, 9 June 1882 - Budapest, 5 January 1943) – Sculptor and medalist. He studied at the Budapest and Vienna Academies. He exhibited for the first time in 1902, and won several prizes between 1906 and 1942. He belongs to the most outstanding and productive medalists of Hungary. In 1943, the Association of Fine Arts organized a commemorative exhibition of his works. He made some 1000 mostly portrait medals, among them that of *Ignác Semmelweis, Kálmán Thaly* and *Ferenc Erkel*. – B: 1185, T: 7673. → **Erkel, Ferenc; Semmelweis, Ignác; Thaly, Kálmán.**

**Bercsényi, Count László** (Ladislav) (Eperjes, now Prešov, Slovakia, 3 August 1689 - Luzancy, France, 9 January 1778) – Organizer of the French Hussars, Marshal of France. Son of Count Miklós (Nicholas) Bercsényi, Supreme Commander of the Hungarian *Kuruc* (insurgent) forces during the uprising against Austrian rule (1703-1711) led by Ferenc (Francis) Rákóczi II, Prince of Transylvania. When Bercsényi's father escaped to Poland, Austrian Imperial General Montecuccoli arrested the son and incarcerated him at Kassa (now Košice, Slovakia). The younger Bercsényi was freed when the Imperial Army was forced to give up Kassa. He participated in the uprising in 1709, and served as captain and standard-bearer of the Nobility Contingent. In 1711 he was in the entourage of Ferenc (Francis) Rákóczi II, when he was negotiating with Peter the Great, Czar of Russia. He went to France in the summer of 1712. He served in the squadron of the musketeer cavalry of Louis XIV. Later he transferred to the Regiment of the Ráttky Hussars and was soon promoted to colonel. He participated in the Spanish War of Succession. In 1720 he started to organize his own Hussar (mounted) regiment following his visit to his exiled father in Rodosto, Turkey, where he recruited several Hungarian Hussars. There were many officers with Hungarian names on staff in his regiment, such as Dávid, Csepreghy, Esterházy, Kisfaludy, Sulyok, Tolnay and Tóth. For a long time the uniform of his regiment: dolman, cape and trousers were light blue with red braiding. In 1733 he organized a new Hussar regiment under the command of Count Bálint

(Valentine) Esterházy; and in 1743 another new regiment was created under the command of András (Andrew) Polleritzky. In 1738 Bercsényi held the rank of General and was promoted to Marshal in 1758. Under his service there were seven Hussar regiments in the French army. He retired in 1759, and for two decades he and his wife lived in their castle in Luzancy, France in frugal circumstances. Both are buried in the modest village church of Luzancy. The Hungarian government has made several petitions for the transfer of his remains to Hungary, without success. A memorial for the heroic Bercsényis was erected in the courtyard of the Ádám Vay Múzeum in Vaja, Hungary. At the 1790 commemorative festival of the fall of the Bastille, his regiment was represented by four of his staff members. The Bercsényi Hussars fought with valor at Valmy, at Jemmapes and Fleurus. In World War II the 1st Bercsényi Hussar Regiment was captured; but was reorganized on 16 January 1946. His palace on the rue de Verneuil 58 in Paris has been declared a National Monument and was decorated with the family crest in 1923. In 1968, on the 190th anniversary of Bercsényi's death, a spectacular festival was organized at his historic residence at Luzancy. Deputies represented the whole French Army and the flags of 48 regiments were lowered, paying respect to the memory of the Hungarian Marshal of France. The festivities continued at Tarbes, the original headquarters of the Bercsényi Hussar Regiment. Today the park and the castle serve as a youth educational center. – B: 0883, 1358, T: 3233.→**Bercsényi, Count Miklós; Rákóczi, Prince Ferenc II; Freedom Fight of Rákóczi II, Prince Ferenc; Kuruc; Esterházy, Count Bálint Miklós.**

**Bercsényi, Count Miklós** (Nicholas) (Temetvény, now only a castle-ruin beside Hradek, Slovakia, 6 December 1665 - Rodosto (now Tekirdağ), Turkey, 6 November 1725) – *Kuruc* general under Prince Ferenc (Francis) Rákóczi II. He was one of the major organizers and a leading figure in the historic Hungarian Freedom Fight against Austrian rule (1703-1711). He studied at the University of Nagyszombat (now Trnava, Slovakia); then, under Palatine Pál (Paul) Esterházy, he began a study of military strategy. In 1685 he was appointed Captain of Vágsellye (now Sal'á, Slovakia). In 1686 he excelled at the Battle of Buda, was promoted to Colonel, then Captain-General of Szeged Castle. In 1687 he was made Knight of the Golden Spur, and from 1691 Lord-Lieutenant of the County of Ung (now in Carpatho-Ukraine) and Lieutenant General of its mining district. From 1696 to 1698 he was Superintendent of Northern Hungary (Upland, *Felvidék*, now Slovakia). During the 1690s he found himself more and more in opposition to the absolutism and political suppression of King Lipót I (Leopold) (1654-1705). With his political vision he bewitched the young Rákóczi and together they embarked on organizing an uprising of noblemen to end the Habsburg rule in Hungary, with France's assistance. When Prince Ferenc (Francis) Rákóczi II was captured in 1701, Bercsényi escaped to Poland, where at first by himself, and later with Rákóczi, tried to gain the assistance of the French and Swedish kings in support of the Hungarian bid for political freedom. From the spring of 1703, as soon as the Freedom Fight started with the uprising of the peasants of Tiszahát in northeastern Hungary, he was almost constantly involved in the fighting, leading the army for the next eight years. He also took part in the diplomacy of the fight for freedom as one of the Prince's most confidential and able advisers. From 1705 on he was General of the Hungarian allied estates, the first member of the Senate; and in 1707 he became the Prince's Governor General. In Warsaw he led the delegation to forge a secret agreement with Czar Peter I. At the end of 1710, with the help of the

Russian military, he departed for Poland. He did not accept the 1711 Peace Treaty of Szatmár. Between 1711 and 1716 he lived in the fort of Brezna, Poland. At the outbreak of the Turkish-Austrian war he was invited by the Turkish Sultan to move to the territory of the southern Danube River in 1716. In 1717 he attempted to break into Hungary at Orsova; but after the Peace Treaty at Pozsaverác z he moved to Rodosto (Tekirdağ) Turkey in 1728, where physical and spiritual inactivity took a toll on him. He was buried in front of the throne of the Archbishop at the Greek Church in Rodosto. On his grave there is an inscription: *“He is famous for his titles, for his merits he is honourable, and now a handful of soil covers the exile. You, traveler, learn from this that because of human adversities, no one in exile has permanent wealth. How does one have to live in order to go to Heaven? In his life with pious dignity, in his sickness with lengthy patience, and with his short but heroic struggle with death, he left a noble example to his successors. Go traveler, and do not forget the piously departed. Consider, then that with these weapons he won entrance to Heaven”*. His ashes were brought back to Hungary amid nationwide celebration in 1906. – B: 0883, 1358, T: 7668.→**Kuruc; Bercsényi, Count László; Rákóczi, Prince Ferenc II; Szatmár, Treaty of; Freedom Fight of Rákóczi II, Prince Ferenc.**

**Berczelly, Tibor** (Berczeller) Rákospalota, 3 January 1912 - Budapest, 15 October 1990) – Swordsman. He studied at the Military Academy (Ludovika), became a company officer, taught at the Athletic Officer School, and after World War I, worked as a supervisor for the Hungarian National Bank. He founded the Sport School of Olympic Champions, after which he worked as a trainer. He holds the record of Hungarian swordsmanship, and led the life championship list with eight individual championships and earned another twenty championship titles. In three Olympics he led Hungarian swordsmen to victory as a true team leader. He was already there in Berlin (1936); and in London (1948) he won all the four bouts in the final against the Italians. In Helsinki (1952) the all-time rivals, leading with 7:5, with 5:0 victory over Nostini, brought back hope. His powerful punitive cuts were feared by the opponent, but at the same time they respected him as a superbly trained swordsman. He was left-handed, hotheaded, but a warm-hearted sportsman, who demonstrated his versatility by becoming a champion also in pistol shooting. – B: 1768, 0883, 1031, T: 7456.→**Ludovika Royal Hungarian Military Academy.**

**Berda, József** (Joseph) (Budapest, 1 February 1902 - Budapest, 5 July 1966) – Poet. At first he worked as locksmith, messenger and book salesman. He published in the newspapers of Budapest. His first volume *Flood (Áradás)*, appeared at Újpest. One of his books was confiscated in 1940. He published more than ten volumes. Some of them are *Bleeding Days (Vérző napok)* (1927); *Alone (Egyedül)*, (1928); *Merciful Poverty (Irgalmas szegénység)* (1931); *Selected Poems (Válogatott versek)* (1944); *Whip and Olive Branch (Ostor és Olajág)* (1957), and *To be Worthy of Myself (Magamhoz méltóan)* (1965). He received the Baumgarten Prize (1944) and the Attila József Prize (1965). – B: 0932, 1257, T: 7103.

**Berde, Mária Julianna** (Mary Juliana) (Mrs. Jenő Róth) (Kackó now Căţcâu, Romania, 5 February 1889 – Kolozsvár, now Cluj-Napoca, Romania, 20 February 1949) – Writer,

poetess. In 1912 she obtained a Ph.D. in Arts, in 1917 a Teacher's Degree from the University of Kolozsvár (now Cluj-Napoca, Romania). Thereafter she taught in Nagyenyed (now Aiud, Romania) and Marosvásárhely (now Tirgu-Mures, Romania). After the territory was ceded to Romania in 1920, she obtained a Romanian Teacher's Degree in 1923. Later she settled in Nagyvárad (now Oradea, Romania), became a member of the Transylvanian Literary Society (*Erdélyi Irodalmi Társaság*) (1919), and in 1920 that of the Zsigmond Kemény Society (*Kemény Zsigmond Társaság*). In 1920 and 1921 she was Editor at the literary review *Grim Times (Zord Idő)*. In 1933 she was one of the founding members of the Hungarian Writers Guild in Transylvania under Romanian rule. She first appeared with her poems prior to World War I, and soon became a notable figure in the Hungarian literary life of Transylvania. She wrote mostly novels, unveiled the problems of her own era by a realistic and high-standard literary style. She also wrote several stage-plays and published a collection of *Szekler* folk-tales. Her poems appeared in German, French and Romanian. She also translated literary masterpieces and some of Ion Creanga's writings into Hungarian. Her works include novels such as *Earthquake (Földindulás)* (1929); *Fiery Furnace (Tüzes kemence)* (1936) and *Men of Daybreak, vols. i, ii (A hajnal emberei I-II)* (1943). She was awarded the Baumgarten Prize and the Amália Ormódy Prize of the Hungarian Academy of Sciences. – B: 0883, 1257, T: 7456.→**Kemény, Baron Zsigmond.**

**Bereck, György** (George) (*Briccius*), (Vízakna, now Ocna Sibiului, Romania, 1668 - Kolozsvár now Cluj-Napoca, Romania, August 1620) – Physician. He studied Theology, Philosophy and Medical Sciences at the Reformed College, Nagyenyed (now Aiud, Romania). Thereafter he went abroad for postgraduate studies at Frankfurt an der Oder, Franekera and Leyden. In 1695, he obtained a Doctorate in Medicine. A year later he returned to Hungary and settled in Kolozsvár (now Cluj-Napoca, Romania), where he practised medicine and prepared medications. In his diary he reports the vicissitudes of the *Kuruc* age that he was involved with as field doctor in the staff of General Count Sándor (Alexander) Károlyi. In 1703, he became a city councilor; and from 1703, he was a judge of the Royal Law Court, and its President in 1715. His works include *Disputatio medica de peripneuma, Dissertatio inaug. medica de colica passione* (both in 1695), His *Diary* (reliable records from 1693 to 1717) was published in Pest (1860). – B: 0883, 1031, T: 7103.→**Kuruc; Károlyi, Count Sándor.**

**Berecz, András** (Andrew) (Budapest, 29 October 1957 -) – Folklorist, folk tale collector, performer; learned the first folk songs from his mother. He worked as an unskilled stevedore and forest-worker and was also a law student. For twenty years he collected the folklore of Transylvania (*Erdély*, now in Romania), Northern Hungary (Upland, *Felvidék*, now Slovakia), in Moldova (Romania), in the Nyírség, Szatmár and the Somogy regions of Hungary. He is an itinerant performer. Besides appearing frequently on television, he is well received not only in Hungary but also in the detached former Hungarian territories, and in Hungarian areas of the Carpathian Basin and, in Hungarian communities of Western Europe, Canada, and in the United States. He has a number of audiotapes, CDs, and has produced television shows. His work includes *Grief Brings it, Humor Carries it (Bú hozza, kedv hordozza)*, folklore study (1997), and a volume was produced not long ago about the beer-praising poetry of ethnically and linguistically related peoples. He received the Young Master of Folk-Art Prize (1985), the Prize for

Hungarian Art (1990), the Gold Cross of Merit of the Republic of Hungary (1993), and the Kossuth Prize (2011). – B: 1663, T: 7103.

**Bereczki, Gábor** (Gabriel) (Békés, 24 March 1928 -) – Linguist, folklorist, literary translator. He studied at the University of Budapest (1948-1949), then at the University of Bucharest (1949-1952). He was an assistant scientific researcher at the Philological Institute of the Hungarian Academy of Sciences (1953-1956). He taught at the Finno-Ugrian Department of the State University of Leningrad (now St Petersburg) from 1956-1973. Between 1973 and 1993 he was a professor of the Finno-Ugrian Department of the University of Budapest, and professor at the University of Udine, Italy (1958-1979). With László (Ladislav) Vikár he collected and published the folk music of more than 300 villages along the Volga-Kama Rivers (Votjak, Mordvin, Tartar, Bashkir etc.). His main research field is the Cheremis language. He translated some of their literary works into Hungarian. Some of his publications are: *Grundzüge des tscheremischen Sprachengeschichte (Principal Features of History of the Cheremis Language)* (1992); *From the Neva to the Ural (A Névától az Uralig)* (1994); *The Finno-Ugrian Foundations of the Hungarian Language (A magyar nyelv finnugor alapjai)*, university textbook (1996), and *Introduction to Baltic Finn-Ugrian Linguistics (Bevezetés a balti finnugor nyelvészetbe)* (2000). He received the Academy Prize (1986). – B: 0874, 1257, 1031, T: 7103, 7456→**Vikár, László**.

**Bereczky, Albert** (Budapest, 10 August 1893 - Budapest, 4 July 1966) – Bishop of the Reformed Church, theologian, politician. He studied Theology at the Reformed Theological Academy, Pápa (1912-1916) and in Basel (1916). He was Assistant Minister in Salgótarján and Minister in Dunabogdány (1919-1924). He was Director of the Hungarian Tractate Society, of the Sylvester Press, General Secretary of the Faith and Service Movement, and Minister in Tahitótfalu (1926-1930). With Zoltán Tildy he organized the first and the second Reformed Assemblies in Tahitótfalu. He moved to Budapest with the Sylvester Press. He was Minister in the Tutaj Street Congregation that later became the Pozsonyi Street Congregation, after its new church was completed in 1938; Minister in the Calvin Square Church, Budapest (1953-1958); and Bishop of the Danubian Church District (1948-1958). In 1944, while working in the Independent Front, a resistance organization, he sheltered and saved the lives of many Jews. In 1946 he was Political Undersecretary of the Ministry of Culture and Member of Parliament representing the Smallholders' Party. He was Chair of the Foreign Affairs Committee of (1945-1946); President of the National Reformed Free Council of Nyíregyháza (1946-1947); member of the Committee that prepared the nationalization of schools (1948); member of the Committee that prepared the "Agreement" between the Reformed Church and the State (1948). He initiated the *Narrow Path of Theology (A keskeny út teológiája)* that put the Church in a subordinate position to the restrictive will of the Communist State. Its result was that while in theory, Church was separated from the State, in practice the Church was subjugated to the State. He was a presidium member of the National Peace Council, the Patriotic People's Front and the World Peace Council. He was editor of several church papers and wrote a number of articles. His main works include *The Hungarian Protestantism Against the Persecution of Jews (A magyar protestantizmus a zsidóüldözés ellen)* (1945); *Between Two Judgements, vols. i-ii (Két ítélet között, I-II)* (1947); *Security, Certainty, Peace (Biztonság, Bizonyosság, Békesség)* (1948); *The Narrow Way (A keskeny út)* (1953), and *Obedience in Faith (Hitben való engedelmesség)*

(1961). He received an Honorary Doctorate from the Comenius Faculty of the University of Prague. He was a recipient of the Banner Order Second Class of the People's Republic of Hungary. – B: 0910, T: 7103.→**Reformed Church in Hungary; Tildy, Zoltán; Bartha, Tibor; Reformed Free Council, National; Patriotic People's Front.**

**Beregi, Oszkár** (Oscar) (Budapest, 20 February 1876 - Los Angeles, 19 October 1965) – Actor. Following his studies in Philosophy at the University of Budapest, he studied acting at the Academy of Dramatic Art. He appeared on stage with the Krecsányi Ensemble in 1895, and after some acting in Kolozsvár (now Cluj-Napoca, Romania) he received a contract first with the Comedy Theater (*Vígszínház*), Budapest and then in Pozsony (now Bratislava, Slovakia). He traveled frequently to Vienna, as the artistry of Kainz had great influence on him. He learned from him an excellent speech technique. In 1899 he became a member of the National Theater (*Nemzeti Színház*), Budapest and was given important roles during the directorship of László (Ladislav) Beöthy. His first great success came in 1900 with Shakespeare's *Troilus and Cressida*; the strong sexual undertone caused a sensation at the conservative Theater. Between 1907 and 1910 Max Reinhardt directed him in Berlin; then he returned to the National Theater, Budapest. From then on he was the only actor to play young characters of classical dramatic roles, such as *Hamlet*, *Rostand*, *Othello*, *Brutus*, *Prince Henry*, *Faust*. He was from the old school; however, his restless, highly-strung nature made him a modern actor. Between 1920 and 1925 he worked in Vienna; between 1925 and 1929 he acted in films in the United States; in 1930 he played in the Hungarian Theater (*Magyar Színház*), later in the Inner City Theater (*Belvárosi Színház*), the Comedy Theater (*Vígszínház*) and the Theater of Pest (*Pesti Színház*). After World War II, he became a permanent member of the National Theater (*Nemzeti Színház*) but could not adapt himself to the new ensemble and in 1946 he left again for the United States. After much wandering he settled in Hollywood, where he performed in film roles. He also wrote his autobiography. – B: 0871, 1031, T: 7684.→**Beöthy, László.**

**Beregszászy, Lajos** (Louis) (Békés, 5 January, 1817 - Budapest, 4 April 1891) – Piano builder, inventor. He learned his trade at Temesvár (now Timișoara, Romania), Pest, Hamburg, London and Vienna. Between 1846 and 1879 he worked in Pest and owned a piano-manufacturing firm. Franz Liszt mentioned his work with appreciation. Among his famous inventions were a new piano key system and the so-called “cello, lowest register”. The German piano builder Bösendorfer bought both his inventions and used them after 1878 in his world famous pianos. Bösendorfer used the *Resonanzboden* (Sounding board) as “System Beregszászy” in his instruments. – B: 1160, T: 7684.→**Liszt, Ferenc.**

**Berek, Kati** (Catherine) (Katalin) (Makó, 7 October 1930 - ) – Actress. She came from a poor family of five children; lost her father early and grew up on a farm. She always wanted to become an actress. From 1944 to 1947 she performed as a volunteer amateur actress. In Szeged she met Béla Balázs, who arranged her admission to a college and to the Academy of Dramatic Arts, Budapest. She studied with Endre (Andrew) Gellért, Oszkár (Oscar) Ascher, Endre (Andrew) Marton and Béla Both. In 1952 she joined the National Theater, Budapest (*Nemzeti Színház*). In 1970 she helped to create the new “25th Theater”. In 1974 she returned to the National Theater; then in 1975 joined the Kisfaludy Theater of Győr; and from 1991 to 1993 she was with the József Katona

Theater of Kecskemét. She appeared on radio, television, movies, worked on the stage, directed, and was an educator as well. Her roles include Adela and Poncia in García Lorca's *The House of Bernarda Alba* (*Bernarda háza*), Hermia in Shakespeare's *A Midsummer-Night's Dream* (*Szentivánéji álom*); Regan in Shakespeare's *King Lear* (*Lear király*); Misi Nyilas in Móricz's *Be Good Unto Death* (*Légy jó mindhalálig*); Anna in Gorkij's *Night House of Refuge* (*Éjjeli menedékhely*); Nelly in Örkény's *Key-seekers* (*Kulcskeresők*); Sarolt in Szörényi-Bródy's *Stephen the King* (*István, a király*); Mrs. Pernelle in Molière's *Tartuffe*; Lucifer in Madách's *The Tragedy of Man* (*Az ember tragédiája*); Princess Plata-Ettingen in Molnár's *Olympia*, and Cecília in Kálmán's *The Gypsy Princess* (*Csárdáskirálynő*). Her feature film-roles include *The Marriage of Katalin Kis* (*Kis Katalin házassága*); *Life-signal* (*Életjel*); *Dialogue* (*Párbeszéd*), and *Heavenly Bird* (*Égi madár*). She also worked as a stage manager. She received the Farkas-Ratkó Prize, the Mari Jászai Prize twice, the Radnóti Prize, the Madách Prize, the titles of Merited Artst, Outstanding Artist, and as the Actor of the Nation (2000). – B: 0874, 1031, T: 7103.→**Ascher, Oszkár; Both. Béla; Gellért, Endre; Marton Endre; Várkonyi Zoltán.**

**Bereményi, Géza** (Vetro) (Budapest, 25 January 1946 - ) – Writer, producer. His higher studies were at the University of Budapest (1964-1970) where he read Hungarian and Italian Literature. From 1971 to 1978 he worked as a synchronic-dramaturgist at the Pannonia Film Studio, Budapest. From 1978 to 1995 he was a freelance writer. Between 1995 and 1997 he was a stage manager at the Szigligeti Theater (*Szigligeti Színház*), Szolnok. He held the same position at the Sándor Hevesi Theater (*Hevesi Sándor Színház*) at Zalaegerszeg from 1997. He is a member of the European Film Academy. His works include *The Swedish King* (*A svéd király*) short stories (1970); *Collection of Legends* (*Legendárium*) novel (1977); *Trilogy* (*Trilógia*) dramas (1983), and *Songs* (*Dalok*) (1992). Some of his film-scripts are *Romance* (*Romanatika*); *Time Stands Still* (*Megáll az idő*), and *The Penultimate Judgment* (*Az utolsóelőtti ítélet*); his scripts for television include *The Wedding Guests* (*Násznap*) and *Eldorado*. He also excels as a lyric writer. He has already received a number of prizes, including the Attila József Prize (1984), the Béla Balázs Prize (1989), the Félix Prize (1989) and the Kossuth Prize (2001). – B: 0874, 1257, T: 7103.→**Cseh, Tamás.**

**Berend, T. Iván** (Ivan T.) (Budapest, 11 December 1930 - ) – Historian. His higher studies were at the University of Budapest (1949-1953). From 1949 to 1979 he held various positions at the University of Economics such as lecturer, professor and dean. He was Secretary General of the Hungarian Historical Society (1975-1979); President of the Hungarian Academy of Sciences (1985-1990). He was a member of the Central Committee of the Hungarian Socialist Workers Party – MSZMP) (1988-1989). Since 1990 he has been Professor of History at the University of California, Los Angeles, Director of the Center of European and Russian Institute of UCLA (1993). He is a member of a number of related societies and institutions including the Royal Historical Society, and a corresponding member of the British Academy. His works include *The Industry of Hungary 1900-1914* (*Magyarország Gyáripára 1900-1914*) with Gy. Ránki (1955); *Hundred Years of the Hungarian Economy 1848-1944* (*A magyar gazdaság száz éve 1848-1944*), with Gy. Ránki (1973); edited *Transition to a Market Economy at the End of the 20th Century*, (1994), and *On a Diverted Way* (*Terelőúton*) (1999). He is a member of the Hungarian Academy of Sciences (1973). He received the Kossuth Prize

(1961), the Academy Prize (1965, 1966), the János Apáczai Csere Prize (1981), and the State Prize (1985). – B: 0874, 1257, T: 7103.→**Ránki, György (1)**.

**Berény, Róbert** (Budapest, 18 March 1887 - Budapest, 10 September 1953) – Painter. In 1904 he was Tivadar (Theodore) Zemplényi's student; but continued his studies in Paris, where Césanne's art had a decisive impact on him. In 1906 he exhibited at the Salon d'Automne. He joined the "Group of Eight" in Budapest in 1911. In 1919 he created the war poster "*To arms!*" (*Fegyverbe!*) for the Council (Soviet) Republic of Hungary. He was also contributor to the literary review *West (Nyugat)*. Between 1919 and 1926 he lived in Berlin. From 1935 he lived and worked in Zebegény. His studio in Zebegény and many of his paintings were destroyed at the end of World War II in 1945. In 1948 he was appointed professor of the Academy of Applied Art. He gradually turned from expressionism and cubism toward the Nagybánya tradition. He had a number of exhibitions. He is regarded as one of the masters of modern Hungarian painting. His works include *Still Life (Csendélet)* (1907), *Portrait of Bertalan Poór* (1907), *Garden (Kert)* (1911), *Portrait of Béla Bartók* (1913), *Woman in the Green Room (Nő zöld szobában)* (1927), and *Woman with Violoncello II (Csellózó nő II), Painter before the Wall (Festő a fal előtt)* (1945). He received the Szinyei Prize (1936). – B: 0883, 0934, T: 7103.→**Czigány, Dezső; Nagybánya Artist Colony; Eight, The Group of**.

**Béres, Alexandra** (Budapest, May 7 1976 - ) – Fitness champion. Her higher studies were at the School of Physical Training, Budapest. Between 1982 and 1994 she participated in gymnastic competitions. From 1994 onward she was fitness competitor and champion in Hungary. In 1996 she became European and World Champion. In 1999 she was European Champion again. She coaches children and adults at the Alexandra Fitness Club. – B: 0874, 1031, T: 7103.

**Béres, Ferenc** (Francis) (Gagybátor, 3 December 1922 - Budapest, 6 July 1996) – Singer (Tenor). He completed his high school studies at the Reformed College of Sáropatak. In 1945 he moved to Budapest and lived in the Petőfi College. He studied Ethnography and History of Art at the University of Budapest. He founded the Artistic College of the People Ensembles (*Népi Együttesek Művészeti Kollégiuma*). In 1948 he became a soloist of the Army Ensemble (*Honvéd Együttes*), which later became the Artist Ensemble of the Hungarian People's Army (*A Magyar Néphadsereg Művészegyüttese*). He was a private singer of the National Philharmonic Society (*Országos Filharmónia*). His interest was folk music and folk hymns. From 1946 he was an itinerant singer and his mission was to bring everywhere the best pieces of folk songs and folk hymns, with the purpose of letting Hungarians know the art and beauty of the national treasury of folk songs. He visited Hungarian communities on five continents. During his lifetime he performed more than ten thousand concerts in Hungary, the neighboring countries and Finland, Western Europe, Australia and New Zealand. In Britain, during a four-month-long tour, he gave 120 performances. He was also in Canada, the USA and Japan. In Transylvania (*Erdély*, now in Romania) he gave 65 charity concerts in 1991-1992. He was warmly received everywhere and was an instant success. His frequent accompanist was the organist Endre (Andrew) Kovács. He liked Reformed psalms and hymns not only as valued pieces of Hungarian cultural history, but also as his personal credo. During the time of the Communist atheism his service helped people to stand firm and appreciate their religious and cultural heritage. He made several recordings as well. He was well known at home

and abroad. In 1968 he laid the foundation of the Art Gallery of Sárospatak by donating his collection of paintings and other works of art. His distinctions include the Franz Liszt Prize, the Outstanding Artist title, and the Officer's Cross of the Order of Merit of the Republic of Hungary. His bust is in the garden of the Reformed College of Sárospatak and he received an honorary citizenship from the town of Sárospatak. – B: 0900, T: 7103.→**Kovács, Endre.**

**Béres, Ilona** (Helen) (Kispest, 4 June 1942 - ) – Actress. She did her higher studies at the Academy of Dramatic Art, Budapest (1960-1964), where she studied with Géza Pártos. She was a member of the Csokonai Theater (*Csokonai Színház*), Debrecen (1964-1966); the Madách Theater (*Madách Színház*), Budapest, (1966-1967); the National Theater (*Nemzeti Színház*), Budapest (1967-1969); the Comedy Theater (1969-1984) (*Vígszínház*); the National Theater (*Nemzeti Színház*) (1984-2000) and from 2000, the Hungarian Theater of Pest (*Pesti Magyar Színház*), and is President of the Hungarian National Actors' Association. She played more than 75 major classical and modern roles, including Vilma in M. Füst's *The Unhappy Ones* (*Boldogtalanok*); Hippia in Madách's *The Tragedy of Man* (*Az ember tragédiája*); Hermia in Shakespeare's *A Midsummer-Night's Dream* (*Szeniványéji álom*); Alma Winemiller in T. Williams' *Summer and Smoke* (*Nyár és füst*); Natasa in Chechov's *Three Sisters* (*Három nővér*); Beatrix in Molnár's *The Swan* (*Hattyú*), and Albertin Prine in L. Hellman's *Toys in the Attic* (*Rejtett játékok*). She also appeared in a number of feature films including *Rainy Sunday* (*Esős vasárnap*); *The Golden Man* (*Az aranyember*); *Golden Kite* (*Aranysárkány*), *Lost Illusions* (*Elveszett illúziók*), and TV plays such as *The Reigning Prince* (*A fejedelem*); *Gabseck*; *Girls of Tündérlak* (*Tündérlaki lányok*), and *Hospitality* (*Vendéglátás*). She received the Mari Jászai Prize (1973) the titles of Merited Artist and Outstanding Artist (1983, 1996) the Officer's Cross of Order of Merit of the Republic of Hungary (1992), and the Kossuth Prize (2000). She is Life Member of the National Theater, Budapest. – B: 1120, 1439, 1445, T: 7103.

**Béres, József** (Joseph) (Záhony, 7 February 1920 - Kisvárda, 26 March 2006) – Research chemist. His higher studies were at the Agricultural College at Gödöllő (1965). He did post-graduate studies in Engineering. He fought in World War II (1941-1945) and has been injured. After his return he was a co-operative manager, construction worker, and Head of the Laboratory of the State Agricultural Farm at Kisvárda. From 1964 to 1989 he was employed as a research fellow by the Agricultural Experimental Research Institute of Nyírség until his retirement in 1989. In 1989 he was one of the founders of Béres Export-Import Ltd.; and since 1990 he was a member of a Budapest research team. Beside his agricultural research he turned toward the investigation of cancerous growths in humans and their prevention. He developed an anti-cancer drug, the "Béres Drops" (*Béres Cseppek*), invented during the early 1970s. Taking the drops not only alleviated the pain associated with advanced cancer, but in some cases it cured the cancer itself. The chemist, who worked in Kisvárda, could not accept money for the drug that he developed because he was not a qualified physician. The fame of Béres Drops soon traveled abroad as well and, as a consequence, many hopeless cancer patients visited him. He went bankrupt and later became mentally ill. Under Hungarian public pressure and opinion, as well as the results of changes in the political system, the dramatic effect of the Béres Drops was demonstrated in a film presentation in 1987. It proved to be effective.

However, it was not accepted officially as registered medication until 1991. The drug had to undergo all the regulatory animal and clinical experiments and tests. Finally, this natural drug was qualified as registered medication. In 1992 he isolated and induced the reproduction of genes triggering cellular proliferation in cell culture. His works include 47 scientific publications. He was honored with the Natural Healing Prize (1993), the Teichmann Prize (1995) and the Széchenyi Prize (2002). – B: 0873, 1473, T: 7103, 7660.

**Beretz, L. Árpád** (Bridgeport, CTonn. USA, 17 November 1914 - Kalamazoo, NY, 19 October 1980) – Bishop of the Hungarian Reformed Church in the USA. He studied Theology at the Reformed Theological Academy, Sárospatak in northeast Hungary, where he was ordained. After graduation he taught English at local secondary schools. After his return to the United States in 1946 he continued his studies at the Yale Seminary, CT. For a short time he served as a curate at the First Hungarian Reformed Church in Cleveland, OH. Between 1948 and 1961 he was Minister of the Hungarian Reformed Church in Wallingford, CT. In 1961 he received a call from the Hungarian Reformed Church of East Chicago, IN. Under his leadership the congregation relocated to Hammond, where they built a church in 1965, a school in 1972, and a manse in 1979. In 1956 the Calvin Synod and his Congregation sent him to Europe to work with the refugees of the 1956 Hungarian Revolution. At one time he was President of the Eastern Diocese. Later he became Clerk of the Calvin Synod; and in 1971 he was elected its President, then its Bishop. He took part in the 2nd and 4th Assemblies of the World Council of Churches, and attended the 400th anniversary of the Hungarian Reformed Church in Hungary in 1967. – B: 0906, T: 7617. → **Reformed (Hungarian) Churches in Western Lands.**

**Bergendy, István** (Stephen) (Szolnok, 8 October, 1939 - ) – Musician, composer. His higher studies were at the Budapest Polytechnic (1958-1961) and at the Béla Bartók Conservatory of Music, where he studied the clarinet (1961-1964). He was member of a number of music groups, including the *Symphony Orchestra of the University*, the *Holéczy Ensemble* and the *State Symphony Orchestra (Állami Hangversenyzenekar)*. In 1962 he founded the *Bergendy Ensemble* with his brother Péter. They played at the Youth Park of Buda (*Budai Ifjusági Park*) for four years, and abroad for three years. In 1970 the Ensemble was newly formed, and in 1982 they named it *Bergendy Concert, Dance and Salon Orchestra*. Their most successful music was composed for the TV series *Süsü the Dragon (Süsü a sárkány)* (9 parts); *Süsü, the Dragon-kid (Süsü a sárkánygyerek)* (13 parts); *Futrinka Street (Futrinka utca)* (13 parts), and the *Never Mind, Tobias (Sebaj, Tóbiás)* (52 parts). His musicals include *Card-affair in Lady-circles (Kártyaaffér hölgykörökben)*; *Tell us a Tale Münchhausen (Mesélj, Münchhausen)*, and *Robinson and Friday (Robinson és Péntek)*. His rock-cantata is entitled *The Resolute Tin-soldier (A rendíthetetlen ólomkatona)*. He had a number of diamond and gold records and is a recipient of the Golden Guitar (1962), the eMeRTon Prize (1995), MSZOSZ (National Association of Hungarian Artists) Prize (1996) and several Standard Prizes. – B: 0874, 1655, T: 7103.

**Berki, Feriz** (Frank) (Cattaro, Austria, now Kotor, Montenegro, December 31 1917 - Budapest, 7 January 2006) – Greek Orthodox Dean and theologian. He studied first in Greece between 1936 and 1940, then at the Orthodox Theological Seminary in Eperjes (now Presov, Slovakia) (1957). He worked at the Hungarian Ministry of Culture (1941-

1952). He taught at the Greek Orthodox Theological Academy, Budapest (1942-1944). In 1944-1945 he was a political detainee. In 1952-1954 he served the Hungarian Orthodox Administration and was its Dean from 1954. From 1962 he was a member of the presidium of the Ecumenical Council of Hungarian Churches. His major works include *The Organization of the Hungarian Eastern Orthodox Church (A Magyarországi Keleti Orthodox Egyház szervezése)* (1942); *Liturgikon vols. i, ii* (1955); *Prayer Book for Orthodox Christians (Imakönyv orthodox keresztények számára)* (1956); *Euchologion* (1959); *Hymnologion, vols. i,ii* (1969); *Modern Greek Conversation Pocket Book (Újgörög társalgási zsebkönyv)* (1969), and *Orthodox Christianity (Az orthodox kereszténység)* (1975). He is Honorary Doctor of the Theological Academy of Moscow and the Reformed Theological Academy of Budapest. He was a recipient of the Order of St. Vladimir, the Lajos Magyar Prize and the Golden Pen Prize. – B: 0874, 1474, T: 7103.

**Berky, Lili** (Lilian) (Győr, March 15 1886 - Budapest, 5 February 1958) – Actress. After having completed studies at the Academy of Dramatic Art, Budapest, she became a successful operetta prima donna in country theaters, mainly in Kolozsvár (now Cluj-Napoca, Transylvania, in Romania). She was member of the Király Theater (*Király Színház*), Budapest from 1911. Thereafter she acted in the Theater of Kaposvár from 1915. She returned to Budapest and worked at the Apollo Cabaret, the Király Theater (*Király Színház*) and the Inner City Theater (*Belvárosi Színház*); and finally she became a permanent member of the National Theater (*Nemzeti Színház*). After performing in operettas, plays and folk plays, she was successful in the role of elderly dramatic heroines. She appeared in several films as well. Her main roles were in A. Dumas' *Friend of Women (L'ami des femmes – A nők barátja)*; F. Herczeg's *The Gyurkovics Girls (A Gyurkovics lányok)* and *Bizánc (Byzantium)*; V. Rákosi's *Muted Bells (Elnémult harangok)*, and G. Csíky's *Grandma (A Nagymama)*. She received the Merited Artist title. – B: 0884, 1439, T: 7103.→**Herczeg, Ferenc; Rákosi, Viktor; Csiky, Gergely.**

**Berlin Wall** – A wall that separated West and East Berlin during the Cold War era (1961-1989). After the end of World War I, following the Potsdam Agreement, the Great Powers (USA, Great Britain and the Soviet Union) divided not only Germany into four occupational zones (American, English, French and Soviet), but also the Capital of Germany, Berlin, and they treated it as a separate entity. Since the Soviet Union annexed the Berlin zone unilaterally to the German Democratic Republic (DDR), the zone lines in Berlin were canceled and the three other zones were recognized collectively as West Berlin, but did not become part of the Federal Republic of Germany (BRD). To keep the West Berlin territory isolated from a continuous flow of East German escapees, the DDR authorities built a high wall around West Berlin in 1961, and kept it under military guard. On 2 May 1989, the Hungarian authorities began tearing down the Iron Curtain along the Austro-Hungarian border, thus unleashing a tide of East Germans leaving through Czechoslovakia, Hungary and Austria, to West Germany. On 9th November 1989, the people of East and West Berlin together pulled down the “Berlin Wall”. In German governmental circles the saying about this historical event was that “*the first brick from the Berlin Wall was knocked out by the Hungarians*”. Following the disappearance of the Berlin Wall, the two Germanies (the Federal Republic of Germany, BRD and the German Democratic Republic, DDR) were reunited on 3rd October 1990. – B: 1153, 1031, T: 7668.→**Pan-European Picnic.**

**Bernáth, Aurél** (Aurelian) (Marcali, 13 November 1895 - Budapest, 13 March 1982) – Painter. He spent his childhood in the Lake Balaton area in Transdanubia (*Dunántúl*), where he received the first inspirations for painting. In 1915 he went to Nagybánya (now Baia Mare, Romania) and joined its Art School. In 1916 he was called up for military service. In 1921 he moved to Vienna, where his first album *Graphic* was published. His paintings reflect the romantic Hungarian tradition, the European way of drawing, and Expressionism. He lived in Berlin between 1923 and 1926. His abstract and expressionist works were first shown in the Gallery Sturm in Berlin in 1923. In 1926 he moved to Budapest. In the meantime he traveled all over Europe. In 1928 he had the first exhibition of his collection in Berlin. It was a success. The picture *La Riviera* shows the infinite sea behind the rocks. It was his first important work. In 1928 he painted *Winter (Tél)* that shows a crow in flight in front of a snow-covered hill. After this exhibition he became one of the most important Hungarian artists. In 1945 he was Professor at the Academy of Fine Arts, Budapest, and a leading figure in Hungarian artistic life. His works include *Hotel Room (Hotelszoba)*; *Night with Butterflies (Éjszaka lepkékkel)*; *Self-portrait in Yellow Coat (Önarckép sárga kabátban)*, and *On the Terrace (Teraszon)*. He painted landscapes of Lake Balaton and the River Danube, and created murals, e.g. in the Erkel Theater in Budapest. He had important exhibitions in Brussels (1959), Venice (1962), in the Ernst Museum, Budapest; Berlin (1957) and London (1962). He wrote essays and a six-volume autobiography. In 1984 a Memorial Museum was dedicated to him at Marcali, his birthplace. He was a recipient of many awards and prizes, among them the Kossuth Prize (1948, 1970), the Munkácsy Prize (1950), the titles of Meritorious Artist (1952) and Outstanding Artist (1964). – B: 0883, 1122, 1124, T: 7103.→**Miskolczy, László**.

**Berniczky, Éva** (Beregszász, now Berehove, Carpatho-Ukraine, Ukraine, 29 December 1962 - ) – Hungarian writer of tales and short stories. Her higher studies were at the Faculty of Arts of the State University of Ungvár (now Uzhhorod, Ukraine) (1981-1987). Since 1990, she has published articles on raising children and on education, and has edited books of Sub-Carpathian Hungarian writers. Her major works include *Fragment of a Little House (Töredék házacská)*, edited (1994), *The Sky-walking Little Elfín (Égenjáró kismanó)*, tales (1996), *One Hundred Sad Sonnets (Száz szomorú szonett)* edited (1998), *The Etiquette of Topaz (A topáz illemtana)* short stories, with Károly (Charles) Balla D., (1999), *Chapters from the Glass-house (Fejezetek az üvegházból)*, fiction (1999), and *Bird in the Morning, Rope at Noon (Reggel madár, délben kötél)*, short stories, co-author (1999). – B: 0874, 1475, T:7103.→**Balla D., Károly**.

**Bertalan, Imre** (Emeric) (Nyírtass, 1918 - Schenectady, N.Y. USA, 10 July 2008) – Minister and Dean of the Hungarian Reformed Church in the USA. He received his education at the secondary school in Hajdúböszörmény, then studied Theology at the Reformed Theological Academy, Sárospatak, did postgraduate studies in Halle, Germany, as well as in Basel, Zürich and Geneva, Switzerland. In 1946 he received a scholarship to Princeton Seminary, NJ, and an invitation to the ministry of the Hungarian Reformed Church in Staten Island, New York, 1946-1954. Then he was Minister of the Hungarian Reformed Church in Passaic, NJ. (1954-1963), and in the Hungarian Reformed Church in New Brunswick, NJ. (1963-1980). Soon he was elected President of the Hungarian Reformed Federation in America and served in that capacity until his retirement in 1992. He was Minister of the Hungarian Reformed Church in Washington,

DC, from 1981. He was former President and Chairman of the American Hungarian Federation; President of the Hungarian Reformed Federation of America (HRFA); a founding Board Member of the Hungarian American Coalition; a representative of the American Section of the World Alliance of Hungarians, and Chairman of the Board of the American Hungarian Federation of Metropolitan Washington, DC. He also served as Associate President of the Hungarian Boys Scouts' in exile. He was a stalwart advocate of minority rights for Hungarian communities beyond the post-Trianon borders. He was author of many articles and books, including *Three Centuries of Hungarian Reformed Peregrinations to Holland with Special Significance of Sárospatak College* (1986); *A New Beginning in the Soul of the Founders of the State (Újrakezdés az országalapítók lelkiületében)* (1996); *Passion for New Beginnings. One Hundred Years of the People of the American-Hungarian Reformed Church (Újrakezdés népe. Az amerikai magyar reformátusság száz éve)* (1966, 1997) and *I Sat there...among them (Ott ülök...ő közöttük)* (2005). In 1988 the Hope College of Holland, MI bestowed on him an Honorary Doctorate of Divinity. The Theological Faculty of the University of Debrecen, Hungary, also granted him the same Degree in 1989. He received the Officer's Cross of Republic of Hungary in 2000. Imre Bertalan was one the most important personalities of the Hungarian American community. – B: 0906, T: 7617, 7103.

**Bertha, Bulcsu** (Nagykanizsa, 9 May 1935 - Budapest, 19 January 1997) – Writer. He attended High School in Keszthely and after graduation worked at different places in the region. In 1960 he joined the staff of the newspaper *Evening Diary of Pécs (Esti Pécsi Napló)*, then the *Dunántúl Diary (Dunántúli Napló)*. In the meantime he was Editor for the periodical *Present Age (Jelenkor)*. From 1967 he lived in Budapest and was Editor-in-Chief of the periodical *New Writing (Új Írás)* and later became a chief contributor for the literary review *Life and Literature (Élet és Irodalom)*. His writings also appeared in the periodical *New Horizon (Új Horizont)* of Veszprém. The themes of his writings were taken from village life of Transdanubia (*Dunántúl*). His works include *Smoke-Dogs (Füstkuttyák)*, novel (1965); *Across the River Styx (Át a Styx folyón)* short novels (1969); *The Naked King (A csupasz király)* portraits (1972); *Decades at the Balaton (Balatoni évtizedek)* (1973), and *Communism in Afternoon Sunshine (Kommunizmus délutáni napfényben)* (1996). He was a recipient of a number of prizes, among them the Attila József Prize (1955, 1971, 1975), the Mihály Táncsics Prize (1993), the Endre Illés Prize (1996), and a posthumus Kossuth Prize (1997). – B: 0932, 1257, T: 7103.

**Bertha Legend** (*Bertha au grand pied* or Big-Foot Bertha, a.k.a. “Bertrada Broadfoot”, “Goosefoot” and “The Spinner”) (Laon, Aisne around 720, France- Choisy, Haute-Savoie, France 12 July 783) – According to the Charlemagne legends, Bertha, daughter of either the Count of Laon or a Hungarian king, became the wife of Pepin (Pipin, Pippin) the Short (751-768), King of the Franks. She is rumored to have been very beautiful but had large feet. Legend has it that on her journey to Pepin's court as a bride, her evil escort had arranged to have her killed and to send his ugly daughter to Pepin instead. However, in some miraculous way, Bertha escaped death and during a royal hunt Pepin saw her and married her before 742. Of this marriage, Charlemagne (Charles the Great) was born. Thus goes the legend, which strongly resembles the swan-footed or goose-footed German pagan goddess, Berchta (or Perahta, meaning bright or shiny in Old High German). Several versions of it exist in Latin, Italian and French. In German legends she was known as *The Spinner (Die Spinnerin)*. Bertha was the subject of many medieval poems;

the best known is the one by the Walloon troubadour Adanet le Roi: *Berte aus grand pies*, written in 1275. Francois Villon (1431-ca.1480) apostrophizes “*Berte au grant pié*” in his *Ballade des dames du temps jadis* (Ballad of the Ladies of Bygone Times). In French and Burgundian churches one can still see statues of *Reine Pedaque* (*Regina pedeaucae*). The story is known in Hungarian Transylvanian (*Erdély*, now in Romania) folk legend as *The Shaman and the Gooseherd Girl* (*A táltos és a libapásztor lány*). She has also inspired proverbs such as “*Al tempo que Berte filava*” (Italian), “*Die Zeit ist hin, wo Berta spann*” (German), and “*Ce n'est plus le temps où Berthe filait*” (French). All to the effect that the good old times, when Bertha spun, are gone. Nobody knows when and where the various versions of the legend originated. – B: 1054, 7617, T: 7617.

**Bertha, Zoltán** (Szentes, 4 June 1955 - ) – Literary historian, critic. His higher studies were at the University of Debrecen, where he read Hungarian and English Literature (1973-1978). He was librarian at the History of Literature Institute of the same University (1973-1986), and was its Scientific Contributor (1986-1990). He was Editor for the journal *Work and Spirit* (*Dolog és Szellem*) (1988-1989); thereafter, a contributor for the periodical *Tomorrow* (*Holnap*) (1990-1993), the weekly *Hungarian Life* (*Magyar Élet*) (1993-1995), and Editor for the literary review *Lowland* (*Alföld*) (1991-1993). Since 1994 he has been Professor at the Gáspár Károli Reformed University, Budapest. He was an initiator and organizer of the opposition movement. He was a Member of Parliament (1990-1994). His field of research is 20th century Hungarian Literature beyond the present borders of Hungary, mainly in Romania. His works include *Hungarian Literature in Romania in the Seventies* (*A hetvenes évek romániai magyar irodalma*) with A. Görömbei (1983), *Signal Lights of the Spirit* (*A szellem jelzőfényei*) essays (1994), and *Mirror of Fate* (*Sorstükör*), essays (2001). He is a recipient of the Kölcsey Prize (1996), and the Attila József Prize (2004). – B: 0874, 1257, T: 7103.

**Berze Nagy, János** (John) (Besenyőtelek, 23 August 1879 - Pécs, 6 April 1946) – Ethnographer, school inspector. He was born into a peasant family as the eleventh child. His high school studies were at Gyöngyös (1889-1896), Eger (1896-1897) and Jászberény (1897-1898), where he matriculated. He started his ethnographic collecting at the age of 14. He studied at the Arts Faculty of the University of Budapest, concluding with a Ph.D. in Arts in 1905. In the same year he started to work as a school inspecting clerk at Lugos (now Lugoj, Romania). From 1907 to 1913 he worked on his *magnum opus*: the *Vocabulary of Fables* (*Meseszótár*), accepted for publication by the Athenaeum Publishers, while he worked at Nagyenyed (now Aiud, Romania) from 1908, and at Csíkszereda (now Miercurea Ciuc, Romania) from 1915. This great work became lost. In the middle of World War I, when the Romanians invaded Transylvania, entering the war against the Central Powers, thus hoping to gain more, Berze Nagy had to flee with his family, and as a result he lost his 800-volume library. For a year he found refuge and work in Debrecen. However, from 1917, after the intruding Romanian army units were driven out from Transylvania, he could go back to Csíkszereda and work there. Then he was appointed as Royal Hungarian School Inspector at Pancsova (now Pančevo, Serbia). Despite the upheavals caused by the dismemberment of Historic Hungary, he found work in Szekszárd (1919); then, from 1924 until his retirement in 1939, he worked at Pécs in southern Transdanubia. In order to salvage his lost collection of fables, he assembled a great catalogue of more than 500 Hungarian folk-tales, the first of its kind in Europe. His work on mythology remained in manuscript form, entitled the *Origin of the Ancestral*

*Hungarian Religion (A magyar ősvallás eredete)* remained in manuscript form and was published only after his death with the new title of *Tree Reaching to the Sky (Égigérő fa)* (1958, 1961, 2004). Another significant work by him is the *Hungarian Folktale Types, vols. i,ii (Magyar népmesetipusok, I-II)* (1957). The high school of Gyöngyös was named after him in 1971. – B: 1031, 1105, T: 7456.

**Berzeviczy, Albert** (Berzevicze, now Brezivuca Saros, Slovakia, 7 June 1853 - Budapest, 22 March 1936) – Politician, writer on esthetics, author, historian. His political career started in County Sáros (now in Slovakia), where he became Professor at the Law School of Eperjes (now Prešov, Slovakia). He was a Member of Parliament from 1881. From 1884 he was a Ministerial Counselor; while between 1881 and 1887 he was Undersecretary of State at the Ministry of Culture. He was Vice-President of Parliament and Minister of Culture in the Cabinet of Count István (Stephen) Tisza (1903-1905). Thereafter he withdrew from politics for a while. He was a member of the Kisfaludy Society (1889), and President of the House of Representatives (1910-1911) and President of the National Gymnastics Council (1923). He was a Member of the Upper House and President of the Pen Club (1932). He was a member, Director and President of the Hungarian Academy of Sciences (1904-1936). He was a cultural policy setter for a considerable time. His works include *Queen Beatrice (Beatrix királyné)* (1908); *Landscape Painting in the 17th Century (Tájképfestészet a XVII. században)* (1910), and *The Age of Absolutism in Hungary, vols. i-iv (Az abszolútizmus kora Magyarországon, I-IV)*. – B: 0883, 1257, T: 7103. → **Tisza, Count István.**

**Berzsenyi, Dániel** (Egyházashetye, 7 May 1776 - Nikla, 24 February 1836) – Great lyric poet between the Ages of Enlightenment and Romanticism; was an outstanding master of classical poetry. He enrolled in the Secondary School of Sopron rather late in his life. With his great strength he became the terror of the local German-speaking bully-boys, the *Ponrichter* or “bean planters”. He never completed his studies. For a short time in 1795 he was a soldier; and from 1798 he looked after the family holdings in Kemenessömjén, living in Nikla from 1803 on. Besides managing the farm he embarked on his literary career. Ferenc (Francis) Kazinczy heard about him from János (John) Kiss and sent suggestions and alternative ideas for his writings. In his poetry the life and times and the inner ideological struggles of the best of the contemporary Hungarian nobility are mirrored. He reached the pinnacle of his art with his nationalistic odes during the Napoleonic Wars between 1805 and 1807. In these works, addressing the common people, he forewarns of the perils looming over the nation and advises them to stand firm. The first volume was published in 1813. He distanced himself from Kazinczy after an argument over the satirical Transdanubian work *Mondolat*. Criticism by Ferenc (Francis) Kölcsey in 1817 provoked him to a debate. After a prolonged silence, from 1825 he played a significant role in literary circles. Besides writing esthetic works he penned essays about the plight of the peasants. In spite of his considerable wealth he maintained a very simple lifestyle. His gift of expression was extraordinary; his talent often reminds us of the greatest poets of ancient times. Due to his powerful and suggestive language and style he is considered to be the most important forerunner of Hungarian romantic lyric poetry. His works were published posthumously with the title *All Works, Poems and Speeches (Összes művei. Költelem és folyóbeszéd)* edited by G. Döbrentei (1842); *Poems of Dániel Berzsenyi (Berzsenyi Dániel versei)* edited by F. Toldy (1860), and *Complete works of Dániel Berzsenyi (Berzsenyi Dániel összes művei)* edited by O. Merényi (1956).

– B: 0883, 1257, T: 7666.→**Kazinczy, Ferenc; Kölcsey, Ferenc; Toldy, Ferenc.**

**Berzy, József** (Joseph) (Pánd, 7 August 1914 - Toronto, 2003) – Historian, editor, librarian. He graduated from the University of Budapest majoring in History (1937). In 1934 he edited the literary review *Central Europe (Középeurópa)*. After graduation he worked at the Gamma Optical Works (*Gamma Optikai Művek*), Budapest. He fought on the Eastern Front in World War II, and was wounded several times. In 1945 he left Hungary for Austria, where he created the Béta Mechanic Company. In 1949 he emigrated to Argentina and founded and headed a company as President. In 1961 he moved to Brazil and settled in Sao Paulo, where he was Editor-in-Chief of the daily *Hungarian Unity (Magyar Egység)*. In 1967 he moved to Toronto, Canada. In Toronto he edited a weekly newspaper the *Hungarian Life (Magyar Élet)* (1968-1971). He was also Editor for a monthly of the Toronto Hungarian House the *Chronicle (Krónika)* (1975-1989). He played a major role in the establishment of the János Halász Library at the Hungarian House (1976-1989). Its collection contains more than 32,000 volumes, the best research library in the Hungarian diaspora. He published papers and books on History, including *In the Service of the Future (A jövő szolgálatában)* (1957), and *The Liberation of Europe (Európa felszabadítása)* (1966). – B: 0893, 1476, T: 7103.

**Besenyők**→**Pechenegs.**

**Besse, János Károly** (John Charles) (Ógyala, now Hurbanovo, Slovakia, 31 August 1765 - Marseilles, France, June or July 1841) – Traveler, researcher of the Caucasus Mountains area and East Asia. He studied at the Universities of Nagyszombat (now Trnava, Slovakia) and Budapest. By 1788 he was Secretary to the Chief Justice of Hungary. In 1790 he took part in the secret negotiations with the King of Prussia about a possible uprising of the Hungarian nobility against Habsburg rule. However, the plot was discovered and he had to flee. In 1791 he explored Germany, Holland, England and France. In 1795-1796 he took part in the Dutch military campaigns as adjutant in the Duke of York's Hussar Regiment. In 1797 he joined the army of the king of Naples in the rank of Captain. He distinguished himself in the defense of Gaeta, where he was seriously wounded. From 1802 to 1810 he was secretary to Charles Decaen, Governor of the Island of Mauritius.

He became interested in the ancient homeland and language of the Hungarians after reading Pál (Paul) Beregszászi's book the "*Ueber die Aehnlichkeit der hungarischen Sprache mit den morgenländischen... (On the similarities between the Hungarian and the Oriental languages...)*" (Leipzig, 1796). In April of 1829 he set out and toured the Crimea, the Caucasus, Turkey, Algiers and East India. Next he took part in a Russian expedition aimed at conquering the Elbrus Peak. Besse also toured the valleys of the Rivers Kuma and Terek, and reached the ruins of the ancient "Madzsar" (*Magyar*) settlement. Upon his return to Hungary he published his experiences in the *Scientific Collection (Tudományos Gyűjtemény)*. However, the lack of interest and appreciation of his endeavours made him bitter and prompted him to leave his homeland forever. First he went to Italy, where he became known as a free-thinker, and consequently was imprisoned in the Castel d'Angelo. He wrote about this experience as "His Holiness treated me as the barbarians treated St. Peter, whose keys He uses so effectively that He is able to lock up even the innocent." Upon his release he settled permanently in Paris, where he embarked on Persian and Turkish studies, became acquainted with the best

Orientalists of the time and taught languages at a college. He wrote: “After Cardinal Mezzofanti, I am the most famous polyglot in Europe. The Cardinal speaks twenty-two languages, I speak thirteen.” He took an active part in local literary life as Editor of the magazine *Mercure Étranger ou Annales de la Littérature Étrangère*. At the same time he became the first propagandist of Hungarian culture, literature and art in France. He was a Bonapartist and kept a close friendship with János (John) Batsányi. He looked to Napoleon for the overthrow of Habsburg rule in Hungary.

His four-volume autobiography and travelogue remained unpublished and was lost after his death. His main publications are *Voyage en Crimée au Caucase, en Géorgie, en Arménie, en Asie-Mineure et en Constantinople en 1829 et 1830 pour servir l’histoire de Hongrie (Travels in the Crimea, in the Caucasus, Georgia, Armenia, in Asia Minor, and to Constantiople in 1829 and 1830 in the service of Hungarian History)* (Paris, 1838) ; *Abrégé de la grammaire turque... et un petit vocabulaire en français, turc et hongrois* (Pest, 1829), and *Mr. János Besse de O-Gyala’s Report from the Environs of the Caucasus Mountains (Ó-Gyalai Besse János Úr jelentése Kawkaz hegyek vidékéről)*. In: *Tudományos Gyűjtemény* (1829. 10, and 1830. 2). – B: 0883, 7617, T: 7456.→**Batsányi, János.**

**Bessenyei, Ferenc** (Francis) (Hódmezővásárhely, 10 February 1919 - Lajosmizse, 27 December 2004) – Actor. He was member of leading Hungarian theaters, among them the City Theater (*Városi Színház*), Szeged in 1940, the National Theater (*Nemzeti Színház*) Miskolc (1942), the Buda Theater (1945), the National Theater (*Nemzeti Színház*) of Pécs and Szeged (1947), National Theater (*Nemzeti Színház*) Budapest (1950, 1981), Madách Theater (*Madách Színház*), Budapest (1963). He was an excellent dramatic actor with an attractive appearance and excellent elocution with a distinguished voice. He appeared in most title roles of classical Hungarian and foreign plays, among them in the role of Zitel in Ibsen’s *Peer Gynt*; title role in Rostand’s *Cyrano de Bergerac*; title roles in Shakespeare’s *Hamlet*, *Othello* and *King Lear*; Ádám in Madách’s *The Tragedy of Man (Az ember tragédiája)*; title role in Kodály’s *Háry János*; Astrov in Chekhov’s *Uncle Vanja (Ványa bácsi)*; Higgins in Lowe’s *My Fair Lady*; Tevje in Bock’s *Fiddler on the Roof (Hegedűs a háztetőn)*; Ferkó Kerekes in Kálmán’s *Gypsy Princess (Csárdáskirálynő)*; Dragomir in *Countess Marica (Marica grófnő)*, and Philip II in Schiller’s *Don Carlos*. He appeared in several feature films and television roles, such as *Fever (Láz)*, *Kid (Kölyök)*; *Judgement (Ítélet)*; *Guns and Doves (Puskák és Galambok)*; *The Baron’s Sons (A kőszívű ember fiai)*; *A Hungarian Nabob (Egy magyar nábob)*, and *Eclipse of the Crescent Moon (Egri csillagok)*. He also appeared in several TV productions. He was a recipient of the Kossuth Prize in 1953, 1955, the Merited Artist title in 1954, the Outstanding Artist title in 1950, the Labor Medal, and the Order of the Banner of the Republic of Hungary; and was made Life Member of the Hungarian National Theater in 1989. In 1994 he received the Order of Distinction 2nd Class of the Republic of Hungary; he was made Life Member of the National Theater in 1997, and received the title Actor of the Nation in 2000. – B: 0871, 1031, 1439, 1445, T: 7684.

**Bessenyei, György** (George) (Bercel, 1747 - Pusztakovácsi, 24 February 1811) – Writer, philosopher. He went to Vienna from County Szabolcs at the age of 18 and became one of the palace guards of Empress Maria Theresa, a position he maintained until 1773. Thereafter he became an administrator of Vienna’s Reformed Church. His life’s work

represents a distinct period in the history of Hungarian literature. He wrote on a variety of topics that had a place in an enlightened literary atmosphere. His works include *The Tragedy of Ágis* (*Ágis tragédiája*) (1772, 1899); *The Life of János Hunyadi...* (*Hunyadi János élete...*) (1778); *The Hungarians* (*Magyarság*) (1778, 1932); *The World of Nature* (*A természet világa*) (1898), and *Journey of Tarimenes* (*Tarimenes utazása*) (1930). He strove to lift up his nation through his own education. His work opened the door for the French Enlightenment to make its way into Hungarian literature. He was one of the leaders of the Age of Enlightenment's first period in Hungary. – B: 0883, 1257, T: 7666.→**Mária Terézia, Queen and Empress.**

**Besser, László** (Leslie) (Budapest, 27 August 1936 - ) – Electrical engineer. He graduated from the Kálmán Kandó Technical School and escaped to Canada after the 1956 Revolution and Freedom Fight. He studied electrical engineering on a scholarship in the USA. At the University of Colorado he received the Pacesetter Award and was selected to be “The Outstanding Engineering Student”, and co-captain of the school's soccer team in 1966. After gaining practical engineering experience at the Hewlett Packard and Fairchild corporations, he created *COMPACT* (*Computerized Optimization of Microwave Passive and Active Circuits*), the world's first commercially successful microwave circuit optimization routine, soon become the industry standard. Then he founded the Compact Software Company, and was active in serving the engineering design needs of the RF/Microwave industry during the next ten years. In 1980 his company merged with Communication Satellite Corporation (COMSAT), where Dr. Besser functioned as Senior Vice President. In 1985 he started Besser Associates, a training organization that has provided training to more than 45,000 engineers, managers, and technicians worldwide. He retired from the company in 2004. He co-authored an influential textbook: *Practical RF Circuit Design for Modern Wireless Systems, vols. i, ii*. He presented short courses at various technical conferences and universities. He received the Microwave Applications Award (1983) and the Career Award (1987), as well as the Third Centennial Medal (2000). – B: 1279, T: 1279, 7103.

**Beszterce Glossary** (*Besztercei szójegyzék*) – The first, more extensive Latin-Hungarian dictionary. Discovered in the archives of the former County Beszterce-Naszód in 1891, this precious Hungarian linguistic record dated from the first half of the 15th century, comprising 15 written pages and contains 1316 words in the handwriting of George “György, the Slavonian”. Based on the characteristics of the handwriting and spelling, a more specific date of its origin is estimated to be between 1380 and 1410. – B: 1150, 1020, T: 7659.→**Schägli Wordlist.**

**Bethania Christian Endeavour Alliance** (*Bethania CE Szövetség*) – It was originally created by 58 young people belonging to the congregation of Rev. F.E. Clark, Presbyterian Minister in the USA, who was dedicated to Christian lifestyle. The Christian Endeavor Youth Movement rapidly grew first in the US, then worldwide. In Hungary Aladár Szabó and István (Stephen) Kecskeméthy, Reformed theological professors founded it in 1903. The movement was instrumental in the mid 20th century's awakening in the Protestant churches in Hungary, thereby contributing to the survival of the Church during 45 years of Communist religious oppression. The association was dissolved by the Communist regime in 1950, but was revived in 1990. – B: 0910, T: 7103.→**Szabó, Aladár; Kecskeméthy, István.**

**Bethlen, Countess Árvá Kata** (Orphan Kate) (Bonyha now Bahnea, Romania, 30 November 1700 - Fogaras, now Fagaras, Romania, 29 July 1759) – Memoir writer. She had a difficult life, lost her first husband, then the second one, and even her children died. She called herself “Orphan”. Nevertheless she had a deep and strong Christian faith and a dedicated life to her Reformed Church. With her faith she succeeded in overcoming all the vicissitudes she wrote about in her memoirs, including her fight for the Church. There was an embroidery workshop in her court. Some of its products, made for churches, survived. She was an expert in the art of embroidery. She collected a significant library with the help of Court Chaplain Péter Bod. The library was bequeathed to the Reformed College of Nagyenyed (now Aiud, Romania) but perished in the fire of 1847. She wrote a book entitled *Strong Protective Shield (Védelmező erős paizs)* (1759). Her other writings and correspondence as well as her autobiography were published in the 20th century. – B: 0883, 1257, T: 7103. → **Péter Bod; Fogaras, Runic Inscription in Church; Hungarian Runic Script.**

**Bethlen, Countess Margit** (Margaret) (Budapest, 6 August 1882 - Budapest, 7 June 1970) – Writer, journalist. She was the wife of politician Count István (Stephen) Bethlen. Her first short novel *Tale About the Sad City (Mese a szomorú városról)* was published in 1916. Novels and short stories followed in the 1920s. The subjects of her works were for the most part women of woeful fate. She was Editor of the biweekly literary magazine *Festival (Ünnep)* (1935-1944). The Communist authorities deported her from Budapest to the countryside in 1951; but later she was allowed to return. Her works include *A Life (Egy élet)* (1921); *The Great Something (A nagy valami)* (1934), and *Between Two Women (Két asszony között)* (1941). She wrote plays as well, including *The Gray Garment (A szürke ruha)* performed at the National Theater (*Nemzeti Színház*), Budapest (1929) and it was also performed in Italy. – B: 0883, 1257, T: 7103. → **Bethlen, Count István.**

**Bethlen, Count István** (Stephen) (Gernyeszeg now Gornesti, Romania, 8 October 1874 - Moscow, Soviet Union, 5 October 1956) – Politician. He received diplomas from the Law School of University of Budapest and from the Academy of Agriculture, Magyaróvár. From 1901 he was a Member of Parliament representing the liberal, independent and conservative parties in succession. He was appointed Royal Privy Councilor. On his initiative the National Unity Party was established in February 1919. During the reign of the Hungarian Council (Soviet) Republic he lived in Vienna and represented the Government of Szeged. He was a member of the Peace Delegation at Trianon-Versailles in 1920. He was appointed Prime Minister on 14 April 1920. After the second failed coup d' état of King Károly IV (Charles), he initiated the dethronement of the House of Habsburg in the parliament. Together with his followers he joined the independent Smallholders' Party of István (Stephen) Nagyatádi Szabó in 1922. He consolidated the economy of the country with the help of loans from the League of Nations and by higher taxation. In 1927 he signed a friendship agreement with Italy. He resigned on 24 August 1931, but remained an influential politician. Regent Miklós (Nicholas) Horthy appointed him a lifetime member of the Upper House of Parliament in 1939. In 1944-1945 he was one of the leaders with political leanings toward the Anglo-Saxon powers. In the fall of 1944 he was kept under house arrest by the Soviet Army and was soon deported to the Soviet Union, where he died in a prison hospital. His main legacy was the successful rebuilding of the economy of mutilated Hungary after the

ravages of World War I, and the subsequent Versailles-Trianon Dictated Peace Treaty (1920). – B: 0883, 1031, 1105, T: 7103.→**Council (Soviet) Republic in Hungary; Károly IV, Emperor and King; Nagyatádi Szabó, István; Horthy, Miklós.**

**Bethlen, Count Miklós** (Nicholas) (Kisbun, 1 September 1642 - Vienna, 27 October 1716) – Chancellor of Transylvania (*Erdély*, now in Romania), writer. He completed his studies in Gyulafehérvár (now Alba Iulia, Romania) and Kolozsvár (now Cluj-Napoca, Romania). He was a student of János (John) Apácai Csere. He continued his higher education in Heidelberg, Germany, Utrecht and Leyden, Holland between 1661 and 1663. He was an eyewitness to the fatal hunt that ended with the death of Miklós (Nicholas) Zrinyi. Later he went to Venice, Italy. After returning home he lived at his Bethlenszentmiklós estate as Captain-General of Udvarhelyszék, where he built a self-designed castle in Venetian style. He distributed many pamphlets against Habsburg suppression and the persecution of Protestants following the Wesselényi movement. Together with Pál (Paul) Béldi, he was imprisoned for suspicion of organizing an uprising against the Habsburgs in 1676. He was released from Fort Fogaras in the Southern Carpathians after a year. He became supporter of the reigning dynasty in 1689; and after the battle of Zernyest (now in Romania) he took a significant part in publishing the *Diploma Leopoldinum* that more or less secured religious freedom. In 1691 he became Chancellor of Transylvania. In 1696 he was given the title of Count. He received an introduction of the Habsburg Counter-Reformation policy in Transylvania with disapproval and blamed it for the outbreak of the Prince Ferenc (Francis) Rákóczi II's Freedom Fight (1703-1711). He published another leaflet, the *Noah's Pigeon Carrying the Olive Branch...* (*Olajágot viselő Nőé galambja...*) against the Habsburgs and was captured by General Rabutin. After having been transported to Vienna, although acquitted from the charge of treason, he was not released. He died in prison. He wrote his memoirs (*Mémoires historiques...des dernier troubles de Transylvanie*) (*Bethlen Miklós emlékiratai*) (1864) in prison. His autobiography written in excellent composition is a literary masterpiece and also a valuable historical source. His *Prayer Book* is a pinnacle of Hungarian laymen's prayer literature. He was protector and promoter of the Reformed Church, helper of the persecuted, and patron of the Reformed Colleges in Transylvania. He was one of the outstanding personalities of his age. – B: 0883, 1257, T: 7668.→**Apácai Csere, János; Zrinyi, Count Miklós; Rákóczi, Prince Ferenc II; Diploma Leopoldinum.**

**Bethlen, Prince Gábor** (Gabriel) (Marosillye, now Iliia, Romania, 1580 - Gyulafehérvár, now Alba Iulia, Romania, 15 November 1629) – Reigning Prince of Transylvania

(*Erdély*, now in Romania). He was one of the greatest statesmen in 17th century Hungarian history. He was educated at the court of Reigning Prince Zsigmond (Sigismund) Báthory (1581-1598). At the tender age of 15, he participated in the war against the Turks in Havasalföld (Wallachia), fought against Voivode Mihael, then against Basta's terror; joined the political party of Mózes Székely, and later escaped into Turkish territory following the Battle of Tövis (now Teius, Romania) in 1602. His military and diplomatic skills soon became apparent and he worked for a Turkish alliance against the Habsburgs. In late 1604 he joined István (Stephen) Bocskai and acquired the assent of the Ottoman Porte to Bocskai's appointment. Bethlen was elected Ruling Prince by the Diet at Kolozsvár (now Cluj-Napoca,

Romania). He secured the independence of his territory from King Mátyás II (Matthias, 1608-1619) and the Porta by seceding the city of Lippa (now Lipova, Romania). He turned his court at Gyulafehérvár into a political and cultural center and established a center of learning in a high school. He sponsored the education of Hungarian students in foreign countries, like Holland and England. He founded an up-to-date army comprised of mercenaries, freedom fighters and Szeklers resulting in Hungary's first permanent army since the days of King Mátyás I (Matthias Corvinus) (1458-1490). His goal was the restoration of the unity of the Hungarian Kingdom. In 1619 he occupied the Habsburg territories in Hungary with the help of the Bohemian nobles. However, as his troops approached Vienna, György (George) Homonnai Drugeth attacked him from behind and forced him to retreat. On 25 August 1620 the district of Besztercebánya (now Baia Bistrita, Slovakia) elected Bethlen as King of Hungary, but he refused the honor. Following the Bohemians' defeat at Fehérhegy (*Weisser Berg*, *Bílá Hora*) near Prague on 8 November 1620, he was compelled to make peace with the Emperor. He was also unsuccessful in establishing an international coalition against the Habsburgs. He married the daughter of the Prince Elector of Brandenburg in 1626, and joined the Westminster Alliance of the Protestant powers. He drove out Ferdinand's Wallenstein troops, but was forced to make peace when the promised foreign relief did not arrive. He succeeded in gaining recognition of Transylvania's independence from both the Habsburg and Turkish realms. His economic and cultural policies made Transylvania the frontier fortress of Western Christianity with the capital city of Gyulafehérvár, as progressive as any European city of that time. He planned to establish alliances with Sweden and Russia to gain the Polish crown; but his death, after only 16 years of rule, prevented it. – B: 0883, 1031, 1122, T: 3312. → **Báthory, Prince Zsigmond; Bocskai, Prince István; Mátyás I, King; Rákóczi I, Prince György; Homonna, Battle of; Székely, Mózes (1).**

**Betrothal** (*Eljegyzés*, *Kézfogó*) – An archaic term signifying the assertion of a marriage promise, involving exchange of a token gift and holding hands. From that moment on the couple was called “affianced” (*jegyesek*). The girl was known as a fiancée and the man as a groom. Conditions of an engagement were spelled out in a financial agreement about

the dowry and trousseau. Customarily it was prepared when the groom asked for the girl's hand in marriage and the important details were set down in writing (*móringos levél*). The engagement ceremony took place at the girl's home in front of the parents, witnesses and relatives on both sides, as well as the best man, who was the master of ceremony. During the ceremony the young couple declared their desire to marry, exchanged gifts and held hands. It was customary for the betrothed girl to give her groom a red kerchief that he wore on festive occasions visibly displayed on his garments. In the old days the groom gave the girl a knife and some coins besides the engagement ring. Custom demanded that in order to assure the success of the marriage the ring had to remain on her finger for nine days. A festive banquet of the two families was an essential part of the engagement ceremony. Formal engagement was a fundamental part of any marriage in medieval Hungary; but its significance became only symbolic from the 19th century on. – B: 1134, 1020, T: 3233.

**Better for Hungary Movement (Better)** (*Jobbik Magyarországért Mozgalom – Jobbik*) – A radical Right-Wing party. Its predecessor, the Right-Wing Youth Community (“Right”) (*Jobboldali Ifjúsági Közösség – Jobbik*), made up mainly of university students, was formed into a political party in 2003. Its aim was to push the Hungarian Life and Justice Party (*Magyar Igazság és Élet Pártja, MIÉP*) to the background, thereby offering an alternative to the radical right-wing voters. At the 2009 European Parliamentary Elections it came in third with close to 15%, not far behind the Hungarian Socialist Party (*Magyar Szocialista Párt, MSZP*). According to their constitution, the aim of the Right is to “bring to a close the political regime change and to create a more just society.” The Party's founding document states that its aims are to create a radical, national Christian society based on value principles and conservatism, endeavouring to represent the nation as a whole.” The Party is nationalistic, but not chauvinistic. They consider both the MSZP and the “extremely liberal” Free Democrats' Alliance (*Szabad Demokraták Szövetsége – SZDSZ*), and their roots in the “bourgeoisie-liberal” Young Democrats' Federation (*Fiatal Demokraták Szövetsége – Fidesz*) as political opponents, although they collaborated with them in a few autonomous local administrations. Since the election of Gábor (Gabriel) Vona as president (2006), they ran together with the Hungarian Life and Justice Party (MIÉP) in “The MIÉP-Right is the Third Way” coalition, but did not win seats in Parliament. In 2007, the Party published its Mandate named after Gábor (Gabriel) Bethlen, according to which there exists a “constitutional crisis” in the land. For its resolution it would be necessary to reinstate the Constitution based on the Holy Crown Doctrine (*Szent Korona Tan*). The Party demands the nationalization of strategically important branches of government and industry, the reviewing of privatization and mass immigration, and the recording of church marriages by the National Bureau of Births and Marriages. It also demands compulsory religious instructions in public and secondary schools and recognition of the red-and-white striped Arpád-flag as a national symbol. Thus the Party created the National Guard; and although it was disbanded by a court order in 2009, it was re-established as the New National Guard, and a Gendarmerie was also formed. At the June 7, 2009 European Parliamentary Elections the Right received 13,77% of the votes and was able to appoint 3 representatives to the European Parliament. At the general election in April 2010, the Party won 17 % of the votes, and captured 47 seats in the Parliament, which success was repeated at the municipal elections in October of 2010. – T: 1031, 2008, T:

7617.→**Vona, Gábor; Morvai, Krisztina; Balczó, Zoltán; Gaudi-Nagy, Tamás; Political Parties in Hungary; Bethlen, Prince Gábor; Doctrine of the Holy Crown.**

**Beyond the Mountain** (*Hegyentúl*) – This is a territory of the historical Provinces of Pozsony (now Bratislava, Slovakia) and Nyitra (now Nitra, Slovakia). Beyond the Little Carpathian Mountains stretches the Morava River valley. Its old Hungarian name is *Búrmező*. The same name was also used in the context of public administration. Its Hungarian inhabitants in the early Middle Ages were partially of Szekler origin absorbed during the same period by the Slovakian population, boosted by Moravian elements. Several geographical names perpetuate their existence. – B: 1134, T: 7677.

**Beythe, István** (Stephen) (Kő, 1532 - Németújvár, now Güssing, Austria, 3 May 1612) – Bishop of the Reformed Church, church historian, naturalist. First he taught at Hédervár, Szabolca, Alsólendva, and later at Sárvár. Then from 1574 to 1576, he preached in Hungarian in Sopron. Next, Boldizsár (Balthasar) Batthány (1543-590, a Protestant nobleman) called him to Németújvár to be his court chaplain in 1576. In 1585, he became superintendent and Bishop for the Protestant churches in Transdanubia between Lake Fertő and Lake Balaton. At the annual Synod of Csepreg in 1584 he issued canons opposed by the orthodox Lutheran pastors. The final separation came in 1591 during the colloquy at Csepreg; he resigned from his episcopal office in 1595. Beythe was an outstanding scientist of his age. He co-operated with the famous Dutch botanist Clausius during his stay in Hungary. Clausius mentioned this in the preface of the Latin-Hungarian botanical dictionary published in 1583 by the printer Marclius at Németújvár, and he learned the Hungarian names of the plants found within Pannonian (*Transdanubian*) territory from István Beythe. Beythe also wrote a botanical work independently: *Stirpium nomenclator Pannonicus* (1583). This is regarded as the first study of botany in the Hungarian language. He also wrote the *Interpretation of the Gospels... (Az evangéliumok magyarázati...)* (1584). – B: 0883, 1257, T: 7682.

**Bezdán, Massacre of Hungarians** (Southern part of Historic Hungary, now Serbia) – An excerpt from a witness' narrative: "The Serbian troops, the partisan squads of Tito, infiltrated Bácska only after the fight in the region ended. The report pays special attention to Bezdán, this Hungarian village on the left bank of the Danube. The villagers, men, women and children alike, were summoned to the soccer field at 9 a.m. on Nov. 3, 1944, under the pretext that important public works should be carried out and therefore everybody must show up under penalty of death. The partisans separated all 18- and 19-year-old men from the crowd including the players of the well-known soccer team, the BFC. By this cynical move the partisan commander wanted to mislead the remaining population and make it possible to drive the group away without disturbance. Equipped with spades and hoes, 122 men were led along the road to Zombor to the edge of the Isterbac Woods. Armed with machine guns, only 15 partisans escorted the obedient but somewhat worried group. Once there, they were forced to dig two large, wide pits, each 2 meters deep. At that point some of them may have begun to suspect the purpose of the work. Their apprehension could have been reinforced by the fact that a kind-hearted partisan tried to send back a 13 year-old boy to the soccer field coming with the group holding his father's hand. The little boy proved to be very affectionate and he could not be separated from his father. Their "job" being urgent, the partisans no longer cared about

him. They forced the men to pile their spades and hoes and shot first the soccer team, then the rest of the group together with the child into the pits. It seems that no one thought of taking up their spade to fight the handful of gunmen. After the last man had been executed they sent a messenger on horseback to the soccer field with the message that “the job is done”. On receiving the news, the partisans, who had so far guarded the unsuspecting crowd, let the new widows and orphans go home. After a few days a division of Bulgarian soldiers arrived to Bezdan. The Bulgarian commander was told of the events of Nov. 3. He gave permission to open the common grave and give the dead proper burial. The funeral into separate graves took place on Nov. 28. The opening of the graves revealed that the victims were tied with a wire in groups of fifteen. Another forty corpses mutilated beyond recognition were found in the cellar of the village council house and in nearby yards, twenty more in the water of the Ferenc Canal. These were buried at the same time as the bodies from the two big common graves. Thirty-two bodies could not be identified due to the horrible mutilations. These were reburied in one common grave. The name of the murder squad was found out. The horrible crimes were committed by the 12th Udarna Brigade of the 51st Partisan Division under the orders of the commander and the political officer.” Some 40,000 to 50,000 Hungarians were murdered with similar bestiality by Serbian Partisans in the fall of 1944 and the spring of 1945. – B&T: 1394.→**Atrocities against Hungarians.**

**Bezerédi, Imre** (Emeric) (Sárospatak, 17 December 1679 -Sárospatak, 1708) – Brigadier of the *Kuruc* forces (name for the Hungarian insurgents). He was a popular and heroic fighter of the Rákóczi Uprising against the Habsburgs (1703-1711). He fought mostly in Transdanubia (Dunántúl) and became well known for his heroism. During the fall of 1707, through the intervention of Imperial Field Marshal Count János (John) Pálffy, he began secret negotiations with the Viennese Court. Although they agreed on the conditions of the changeover on the 7th December of the same year, he only decided to do so in August 1708. His plans were discovered and on 5 September 1708 he was captured at Kőszeg together with the other disloyal officers. The *Kuruc* military court sentenced him to death and he was executed. A Street and a High School bear his name in Budapest. – B: 0883, 1444, T: 7668.→**Kuruc; Freedom Fight of Rákóczi II, Prince Ferenc; Pálffy, Count János.**

**Bible Alliance** (*Biblia Szövetség*) – A recent development within the Reformed Church in Hungary. However, its roots are in the Revivalist Period at the turn of the 19th century: in the Bethania CE Alliance, the Mission Alliance, *Soli Deo Gloria* (SDG) Alliance, and from the Christian Youth Society (*Keresztyén Ifjúsági Egyesület* – KIE, the Hungarian form of YMCA) to a new awakening movement of the mid 20th century. Despite the oppressive measures of the Communist regime the flame was not extinguished. In the late 1980s, when the breeze of political change blew through Hungary, there was a demand for a united, biblical and true Christian movement within the Protestant churches. This is how the Bible Alliance was started in December of 1988, and officially formed but not exclusively by Reformed believers on 1 May 1989. The headquarters and the Bible School are at Pécel, in the vicinity of Budapest. The Alliance furthers the services of dedicated Christians. – B: 0910, T: 7103.

**Bible in Hungarian** – As early as the times of King St István (St Stephen, 997-1038) the law punished those who did not pay attention to the readings during the Mass. This

indicates that at least a partial translation of the Bible must have existed. The Passion was recited in Hungarian to St. Margit (Margaret, daughter of King Béla IV) in the 13th century. The Italian Dominican friar, Jacopo Passevanti noted in 1354 that some Biblical texts existed in Hungarian translation. The oldest surviving Bible texts in the Hungarian language are in the Apor, Viennese and München Codices. Taking note of the date of the calendar in the Munich Codex, the original translation is likely to have been prepared around 1416. Following this but prior to 1480, the Blessed László (Ladislav) Báthori, a Pauline monk, also worked on the translation of the Hungarian Bible. His work was placed in the famous library, the *Bibliotheca Corviniana* of King Mátyás I (Matthias Corvinus) (1458-1490). It was postulated that the Jordánszky Codex is a copy of the Hungarian Bible. The Epistles of St. Paul were translated by Benedek Komjáthy and published under the title of “The Epistles of St Paul in the Hungarian Language” (*Az Zenth Paal leveley magyar nyelven*) in Krakow. This work was based on that of Erasmus and the preface to each Epistle is also his. In 1536 Gábor Pesty Mizsér translated The Four Gospels; the influence of Erasmus of Rotterdam is also felt in his work. The translators did not mention if they had relied on contemporary sources. In 1541 János (John) Sylvester published the complete New Testament in Újsziget. He was the first to use the original Greek text for translation; but he also took notice of the translations of the Vulgate and that of Erasmus. The first complete translation of the whole Bible is credited to Gáspár (Gasper) Heltai. Péter Mélius Juhász published a selection between 1565 and 1567. In 1586 Tamás (Thomas) Félegyházi’s translation of the New Testament was published in Debrecen. Due to his unexpected death, a fellow priest, György (George) Gönczi completed his work. It is without doubt that the Minister of the Reformed Church in Vizsoly, Gáspár Károli translated the Bible entirely independently in 1590. Since then it has been the Bible of Vizsoly (*Vizsolyi Biblia*) after the place of its preparation. Károli’s translation became the most widely read Bible of subsequent generations. The translation of the Bible for the Catholic Church was the work of István (Stephen) Szántó, a Jesuit priest; but it remained in manuscript form due to the sudden death of its translator. György (George) Káldi’s first Catholic Bible translation was published in 1626; it is also an independent work. These Bible translations, even those published in the 16th and 17th centuries, all preceded translations of the Bible into the native languages of most European countries. The equally independent Bible translation of György (George) Komáromi Csipkés was published in Leiden in 1718. The British and Foreign Bible Society was established in 1814. It was involved in the publication of a Hungarian Bible, its translation, printing and distribution. The Society had to leave the country in 1948 due to the political changes. The Sámuel Komáromy version was published in Pest in 1870, and later in Pozsony (now Bratislava, Slovakia). In 1924 Sándor (Alexander) Czeglédy’s and in 1925 Endre (Andrew) Masznyik’s New Testament was published. István (Stephen) Kecskeméthy’s New Testament, a revision based on the Gáspár Károli version, came out in 1931. In 1938 a small number of copies were printed of Sándor Czeglédy’s complete Bible translation. László (Ladislav) Ravasz’ revision of the New Testament was published in 1971. In 1972 an entirely new Roman Catholic Bible, based on the Jerusalem Bible, was prepared. Soon after the departure of the British and Foreign Bible Society, the Protestant Churches and the Orthodox Church established the Hungarian Bible Council. At first they intended to revise the Károli version; but instead, began a new translation from the original Hebrew and Greek. This was

completed in December 1975, followed by a revision on October 31, 1990, on the 400th anniversary of the appearance of the Vizsoly Bible. The Hungarian Bible Council set up the Hungarian Bible Foundation, the Hungarian Bible Society with its 11 member churches. Today more than 12 types of Károli and new Bible translations are available, including an annotated Bible. 650,000 Bibles were published between 1990 and 1996. Of this number 450,000 Bibles are the traditional Károli translation; 200,000 new translations, 100,000 Bibles for children have been published and 2,000,000 Bibles have been sent to Hungarians living in the successor states in the Carpathian Basin since 1920. – B: 1201, 1202, T: 7659, 7682, 7103.→Corvina; **Czeglédy, Sándor; Félegyházi, Tamás; Heltai, Gáspár; Jordánszky Codex; Károli Bible; Károly, Gáspár; Komjáthy, Benedek; Komáromi Csipkés, György; Masznyik, Endre; Ravasz, László; Sylvester, János.**

**Bibó, István** (Stephen) (Budapest 7 August 1911 - Budapest, 10 May 1979) – Political

scientist, politician, writer. He obtained a Doctorate in Law in 1933, and in Political Science from the University of Szeged in 1934. He was a law court clerk between 1934 and 1938. He worked at the Ministry of Justice as reporter for 10 years (1935-1945). He was connected to the University of Szeged from 1940. The Arrow Cross Party (*Nyilas Keresztes Párt*) arrested him in the fall of 1944, later they released him but he was forced to hide. He was Departmental Head of the Ministry of Interior of the Provisional Government in Debrecen from February 1945. He was the leading politician of the Smallholders' Party between 1945 and 1949, appointed professor at the University of Szeged from 1946, Director of the East European Institute of Sciences (1947-1949), librarian; and researcher at the University Library in Budapest from 1951. He was Minister of State in the Cabinet of Imre Nagy in November 1956. On 4 November 1956, when the Soviet Army crushed the Revolution, on behalf of the Government he released a communiqué that called on the Hungarian people for passive resistance. He then worked out a compromise solution for the "Hungarian Question", how the Hungarian problem might be solved. In 1957 he summarized and published in Vienna the lessons to be learned from the Hungarian Revolution of 1956. In May 1957 he was arrested, prosecuted, and sentenced for life on account of his political activities; but was freed by an amnesty in 1963. He was employed as a librarian at the Institute of Statistics' Library until his retirement in 1971. He is regarded as one of the most influential Hungarian political writers of the second half of the 20th century. His writings include *The Question of Sanctions in International Law (A szankciók kérdése a nemzetközi jogban)* (1934); *Pressure, Law, Freedom (Kényszer, jog, szabadság)* (1935); *The Crisis of Hungarian Democracy (A magyar demokrácia válsága)* (1945); *The Misery of the Small East-European States (A kelet-európai kis államok nyomorúsága)* (1946); *The Jewish Question in Hungary after 1944 (A zsidó kérdés Magyarországon 1944 után)* (1948), and *The Third Way. Studies in Politics and History (Harmadik út. Politikai és történeti tanulmányok)* (1960, London). His ideas have a renewal and influential effect in post 1990 Hungary. A college and a high school bear his name. – B: 0894, 1257, T:

7103.→**Nagy, Imre; Freedom Fight of 1956.**

**Bibó, Lajos** (Louis) (Hódmezővásárhely, 20 December 1890 - Hódmezővásárhely, 27 October 1972) – Writer, journalist. Worked for the following newspapers: *The Fire of Szeged* (*A Szegedi Tűz*); *Environs of Szeged* (*Szeged Vidéke*); then at the papers *Dawn* (*Virradat*), *National Newspaper* (*Nemzeti Újság*), *Budapest Newspaper* (*Budapesti Újság*) and *Evening News* (*Esti Újság*). He was noted mainly for his writings about the peasantry, such as *My Mother* (*Anyám*) (1928); *Storm Sowers* (*Viharvetők*) (1933); *The Swamp* (*A láp*) (1944) and his plays: *The Inheritance* (*A juss*) (1925); *Zsigmond Báthory* (1927); *Esther* (*Eszter*) (1937); *Eagle's Nest* (*Sasfészek*) (1940); *The Blamables* (*Hibások*) (1942); *Sun Spots* (*Napfoltok*) (1944), and *Sheepskin Coaters* (*Subásak*) (1968). His books were popular prior to 1945. – B: 0878, 0879, 1257, T: 7103.

**Bicsérdy, Béla** (Budapest, 20 March 1872 - Billings, MT, USA, 7 December 1951) – Nutritionist. He discovered and popularized a natural therapy that was named after him. He was educated in Fogaras, Transylvania (now Făgăraș, Romania). Later he popularized his individual nourishment and vegetarian system all over the country in the Hungarian and Romanian languages. In 1925 his followers published a newspaper in Petrosény (now Petrosani, Romania) with the title *Bicsérdizmus*. Eventually he emigrated to the United States where he founded a church. His life ended tragically when one of his followers shot him dead in his own church. – B: 0832, T: 7660.

**Bicskey, Károly** (Charles) (Budapest, 29 January 1920 - ) – Actor, stage manager. He completed his studies at the Academy of Dramatic Art of Budapest in 1943; and while a student, joined the National Theater (*Nemzeti Színház*), Budapest (1943). He also acted at the National Theater of Pécs (*Nemzeti Színház*) (1944) and at the Art Theater (*Művész Színház*) (1945). From 1947 he worked at the Medgyasszay Theatre, from 1948 at the Hungarian Theater (*Magyar Színház*), Budapest. From 1949 to 1980 he acted at other theaters in the country, among them the theaters of Miskolc, Debrecen, Kecskemét, Szeged, Győr, Veszprém, Békéscsaba and Pécs. His acting is characterized by a sincere, credible and memorable presentation of his roles. He appeared in many classic and modern plays, as well as in operas and operettas. His main roles include Almaviva in Beaumarchais' *Marriage of Figaro* (*Figaró házassága*); Ádám and Lucifer in Madách's *The Tragedy of Man* (*Az ember tragédiája*); Ottó, Biberach and Bánk, Petur in Katona's *Bánk bán*; Caesar in Shaw's *Caesar and Cleopatra*, and Boss Finlay in A. Miller's *Sweet Bird of Youth* (*Az ifjúság édes madara*). He appeared in feature films, such as *Somewhere in Europe* (*Valahol Európában*); *Dialogue* (*Párbeszéd*); *The Witness* (*A tanú*). He stagemanaged plays, such as Jókai's *Golden Man* (*Aranyember*); Katona's *Bánk bán*; Sardou's *Let's Get a Divorce* (*Váljunk el*); Strauss's *The Gypsy Baron* (*A cigánybáró*). There are more than 25 feature and TV films to his credit including *Hot Fields* (*Forró mezők*) (1949); *The Dialogue* (*A párbeszéd*) (1963); *The Witness* (*A tanú*) (1969), and the *Devictus Vincit* (TV 1994). He received the Mari Jászai Prize (1955), the Kisfaludy Prize (1962), and the Pro Urbe Prize (1970). – B: 0874, 1439, 1445, T: 7103.

**Bihar, Earth Fortification of** – Fortification erected in the times of the Carpathian Settlement Period (895-896) in Transylvania (*Erdély*, now in Romania) near the village of Bihar (now *Biharea*). The layout is a 150x50 m. oblong surrounded by a 15-20 m. wide earthen wall. In times of war it could accommodate 3000 people. Even in the 16th century it played a significant role in the war of Reigning Prince Rákóczi II for

Hungary's independence from Habsburg rule (1703-1711). Excavations have disclosed that the original foundation was made out of fluvial deposits, stones embedded in alluvial soil. This earthen fort (*földvár*) has been mentioned twice in the work of Anonymus, the 12th century Chronicler. The first time it was in connection with a raid by the Hungarians on the earthen fort under the captiancy of Marót, overlord of Bihar, at the rim of the settlement. The second time it was when Usu and Velec, captains of Árpád in alliance with the Szeklers besieged and almost took the fort. The siege lasted thirteen days and ended with a negotiated settlement. On 2 November 1897, in connection with the Millennium celebration of Hungary, a memorial column was erected; but the Romanians demolished it after the illegal takeover of Transylvania in 1919, prior to the Trianon Peace Dictate of 1920. – B: 1153, 1020, T: 3233.→**Anonymus; Freedom Fight of Rákóczi II, Prince Ferenc; Millennium Celebration, 1896, Hungarian.**

**Bihar Region** of Transylvania (*Erdély*, now in Romania) – Large area of approximately 10,000 km<sup>2</sup> immediately east of the Great Plain (*Nagyalföld*) encompassing the foothills and central mountainous regions of Transylvania. Under the kings of the Árpád Dynasty (896-1301) the area was referred to as 'Bihar country'. It includes the valleys of the Körös and Berettyó rivers as they descend to the Great Plain from the mountainous center of Transylvania. During the reign of the kings of the House of Árpád, this area was mostly uninhabited. An important cultural, religious and administrative town, Nagyvárad (now Oradea, Romania) developed at the junction of the Great Plain and the Bihar Mountain Complex. King St. László I (St Ladislas, 1077-1095) of the Árpád Dynasty established Nagyvárad as the easternmost Roman Catholic archbishopric in the Carpathian Basin. St. László's legacy is strongly associated with this region. Hungarians now represent only a minority in this area, for as a result of the Versailles-Trianon Peace Dictate of 1920, a large part of the region was ceded to Romania. – B: 1134, 1020, T: 7656, 7456.→**Catholic Church in Romania; László I, King.**

**Bihari, János** (John) (Nagyabony, 1784 - Pest, 1827) – Violin virtuoso, composer of Gypsy origin. At the early age of 17, Bihari was leading his five-member orchestra in Pest (Pest and Buda were officially merged only in 1873, to form the capital Budapest). Later in Vienna, Beethoven often listened to Bihari's music, as did Franz Liszt in 1822. Bihari developed a style known as "*verbunkos*" (recruiting music). 84 compositions are attributed to him. Bihari was a renowned violinist, and he played in the court in Vienna during the entire Congress of Vienna in 1914. – B: 1197, 1153, 1031, T: 7656.→**Verbunkos; Liszt, Ferenc; Csermák, Antal György; Lavotta, János; Erkel, Ferenc; Bartók, Béla; Figura.**

**Bihari, József** (Joseph) (Nagyajta, now Aita Mare, Romania, 14 January 1901 - Budapest, 25 February 1981) – Actor. He was a railway clerk in Transylvania (*Erdély*, now in Romania). After the Versailles-Trianon Peace Treaty ceded Transylvania to Romania in 1920, he moved to the truncated Hungary and worked as a laborer, later as an accountant. He studied acting at the Actors' School of the National Actors' Society, graduating in 1928. He joined the National Art Theater (*Nemzeti Művész Színház*) and from 1935 to 1945 he was member of the Comedy Theater (*Vígszínház*), Budapest. He was member of the National Theater (*Nemzeti Színház*,) Budapest until his retirement in 1965. His characteristics were inner tension of emotions, visualized strength, acerbic sense of humor and pleasant elocution. He gave outstanding performances in many roles,

particularly that of Tiborc in J. Katona's *Bánk bán*. His other important roles include Bálint Újlaki in Kós's *Antal Budai Nagy (Budai Nagy Antal)*; Antal Varga in Házy's *The Bridge of Life (Az élet hídjá)*; Orrondi in Shakespeare's *A Midsummer-Night's Dream (Szentiványéji álmom)*, and Antal Bolyai in L. Németh's *The Two Bolyais (A két Bolyai)*. He had more than 14 feature films to his credit, such as *Men on the Snow-capped Mountain (Emberek a havason)*; *Stolen Happiness (Lopott boldogság)*, *Romantics (Romantika)*, and *Ravine (Szakadék)*. He received the titles of Merited Artist, Outstanding Artist, and the Kossuth Prize (twice). – B: 0883, 1445, T: 7103.→**Trianon Peace Treaty.**

**Bihari, Sándor** (Alexander) (Rézbánya, now Băița, Romania, 19 May 1856 - Budapest, 28 March 1906) – Painter. He spent his childhood at Nagyvárad (now Oradea, Romania). In 1874 he moved to Pest and attended the Art School of Bertalan Székely. From 1876 he worked in Vienna, then studied in Paris and became acquainted with the impressionist and the *plain air* trends. In 1885 Emperor Franz Joseph bought one of his paintings: *In Crossfire (Keresztútúzen)*. From 1886, he worked with Lajos (Louis) Deák-Ébner at Szolnok. In 1887 he visited Venice, then in 1888 Holland and Belgium. With Bertalan Karlovsky he founded an Art School in Budapest in 1890. In the same year he also participated in the foundation of the Artist Colony of Szolnok. He became known as an outstanding painter of Hungarian rural life. His oil paintings include *Before the Magistrate (Bíró előtt)* (1886); *Sunday Afternoon (Vasárnap délután)* (1893); *Old Woman (Öreg asszony)* (1900), and *On the Banks of the River Zagyva (A Zagyva partján)* (1900). His books are *Intellectual Life (Szellemi élet)* (1897), and *About Myself (Magamról)* (1904). He was one of the greatest Hungarian genre painters. He was recipient of the Franz Joseph Prize (1896), the Vaszary Prize (1898), as well as foreign prizes. – B: 0883, 0934, T: 7103.→**Székely, Bertalan; Deák-Ébner, Lajos.**

**Bikcse Clan** – Hungarian clan from the Árpáadian era (997-1301), landowners along the River Zagyva. The clan's ancient home was Tápíó-Bicske in what is now County Pest; the Bikcsey family chose its name from this village, where their origins took root. – B: 0942, T: 7685.

**Bilek, István** (Stephen) (Budapest, 11 August 1932 - Budapest, 20 March 2010) - Chess Grandmaster (GM). He earned his Master title in 1952, his Trainer diploma in 1953, the International Master title in 1957, and the Grand Master title in 1962. He represented Hungary nine times at the Chess Olympic Games. As a member of the Hungarian team, he won 2 Silver and 2 Bronze medals; he also won the European Championship four times with 1 Silver and 3 Bronze. He was Captain of the team in 1978, when they won the Olympic Championship, and also in 1980. He was a three-time Hungarian Champion (1963, 1965, and 1970), and he played in inter-zonals in 1962 and 1964. His most successful tournaments were in Balatonfüred (1960), Salgótarján (1967), and Debrecen (1970). He placed first in all three. Bilek played on the Hungarian team in nine Chess Olympiads from 1958 to 1974, earning three individual medals: Silver on board 4 in 1962, Bronze on board 3 in 1966, and Silver on board 2 in 1972. From 1976 to 1988, he edited the Checkmate Program for Hungarian Television. He was a renowned writer of chess-life. In recent years, he was a columnist for the daily *Hungarian Nation (Magyar Nemzet)*. He was awarded the International Master title in 1957 and the GM title in 1962. – B: 1031, 1704, T: 7103.

**Bilicsi, Tivadar** (Graváts) (Budapest, 6 September 1901 - Budapest, 11 July 1981) – Actor. He matriculated from high school in 1918, worked briefly as a postal clerk, sang in a choir, and played in regional theaters until 1922. He obtained a diploma at the Training Institute of the National Society of Actors in 1925. He acted in Szeged, Miskolc, and later performed at the Inner City Theater (*Belvárosi Színház*) and the King Theater (*Király Színház*) of Budapest. After 1931 he worked at the Capital's Operetta Theater (*Fővárosi Operett Színház*) and the Teréz Boulevard Stage (*Terézkörúti Színpad*). From 1933 for the next 11 years he was member of the Andrassy Street Theater (*Andrássy úti Színház*). Following 1945 he appeared at the Inner City and the Capital's Operetta Theaters, and from 1954 he played at the Comedy Theater (*Vígszínház*). He was an actor of original talent, who could deliver both comic or dramatic roles. His major roles include Ill in Dürrenmatt's *The Visit of the Old Lady* (*Az öreg hölgy látogatása*); Grumio in Shakespeare's *Taming of the Shrew* (*A makrancos hölgy*); Mosca in Ben Jonson's *Volpone*; Vidorov in Ostrovskiy's *The Forest* (*Erdő*); Zsupán in Strauss' *Gypsy Baron* (*Cigánybáró*); the French king in Pongrác Kacsóh's *John, the Hero* (*János vitéz*), and Ragueneau in Rostand's *Cyrano de Bergerac*. He also acted in the Czechoslovak Republic, Yugoslavia, Austria, USA, Canada and Sweden, and played in numerous Hungarian feature films, radio and TV plays. He was awarded the Outstanding Artist and Meritorious Artist titles. – B: 0870, 1445, T: 7684.

**Biosphere Reservations** – Internationally recognized nature conservation areas preserving ecologically valuable land units corresponding to National Parks in the United States, in some respects similar to ecological reserves in the Province of British Columbia, Canada. In Hungary, these include the Hortobágy National Park in northeastern Hungary that preserves the “*Puszta*” ecosystem; the Aggtelek National Park protects the karsts landscape; Lake Fertő in Western Hungary safeguards the marshlands; and the Pilis Land Protection district north of Budapest protects the Danube Bend and the area's rolling hills. – B: 1153, 1020, T: 7656. → **Hortobágy**.

**Birk Codex** – Dated 1474, the only Codex to survive in the original manuscript form of the translator. It consists only of a few pages, but is a valuable Hungarian literary record. The Codex contains the regulations for nuns introduced by St Augustine and St Dominic, originally translated by Pál Váci (*Paulus de, Provincial of the Wacia*), Hungarian Dominicans of Margaret Island (*Margit Sziget* in the River Danube within Budapest) for the Dominican nuns living there. It was discovered in the Court Library of Vienna and was named after the director of the library. – B: 0942, 1150, T: 7659. → **Codex Literature**.

**Bíró, András Zsolt** (Andreas) (Budapest, 10 May, 1972 - ) – Anthropologist, human-biologist. He graduated from the György Dózsa High School, Budapest, in 1990. His higher studies were at the University of Budapest, where he studied biology and geography (1991-1995) and biology (1995-1999). In 1999 he obtained his Degree in Anthropology and Human Biology. He works as a researcher at the Anthropological Collection of the Hungarian Museum of Natural Science. He organizes and leads expeditions beyond the Carpathian Basin. In 2007 he was the organizer and leader of the first expedition to the Hungarian-(Magyar) related Madjar-Magyar Kurultay people in Kazakhstan, for which he received an award from the Minister of Culture of Kazakhstan in 2007. His 17 expeditions include Middle-Anatolia (Turkey, 1998), Csángó-land

(Moldova, Romania, 2001), Dobrudja (East Romania, 2005), Khirgiztan (Issik Kul, 2007), and Baskiria, and the Middle and South Ural region (Russia). Among his publications are: Bíró, A. Zs., with others: *Anthopological Analysis of the 11th-12th Karcsa-Kormoska Cemeteries*, in Biological Symposium (2005); Bíró, A.Zs és mások: *Karcsa-Kormoska XI-XII századi temető antropológiai elemzése*. (2005), in: Korsós, Z. (ed.), IV. (Kárpát-medencei Biológiai Szimpózium), Bíró A. Zs.: *Expedition in the Region of the Madjar Tribe of Kazakhstan. Anthropological and Genetical Examination of the Madjar Tribe of Kazakhstan (Expedíció a kazakisztáni Madjar törzs területén A kazakisztáni Madjar törzs antropológiai és genetikai vizsgálata)* in: *Eleink* (Magyar Ancient Historical Publication) (2007). – B: 1960, T: 7103.→**Khazakstan, Hungarians in.**

**Biró, Lajos (1)** (Louis) (Blau) (Vienna, 22 August 1880 - London, 9 September 1948) – Writer, playwright, journalist. His childhood was spent in County Heves on the Great Hungarian Plain, while his high-school education was completed at Eger and Budapest. He started out as a journalist. First he worked at the magazine *Freedom (Szabadság)*, Nagyvárad (now Oradea, Romania). It was there that he formed a close friendship with the great lyric poet Endre Ady. He was the first to recognize and spread the poet's greatness in literary circles. In 1905 he joined the Budapest paper *Diary (Napló)* and soon became its Executive Editor. He left his position in 1907, moved to Berlin, and only returned to Budapest in 1909. First he joined the newspaper *The News (Az Újság)*; and in the fall of 1913 he became a correspondent for the newspaper *World (Világ)*. In 1914 he took part in the foundation of the Radical Civic Party (*Polgári Radikális Párt*). He was appointed Undersecretary of State for External Affairs in the post World War I Cabinet of Count Mihály (Michael) Károlyi. During the 1919 Hungarian Council (Soviet) Republic, he was a member of the Writers' Directory and President of the Writers' Trade Union. After the fall of the Communist Republic he was forced to emigrate. He lived in Vienna, Rome, Paris, then Berlin, and finally in London. During the second half of his career he scored great successes and world fame with film-scripts. First he wrote for film companies in the USA, and later for Sándor (Sir Alexander) Korda's (S. Kellner's) London Film Company, and remained its contributor until his death. He was a talented dramatist, novelist and an outstanding representative of the bourgeois radical literature and political writing. The influence of the naturalistic school left its mark on the early development of his career. His works include *The Triumphant Woman (A diadalmas asszony)* novel (1910); *The Knight of the Holy Ghost (A Szentlélek lovagja)* novel (1914); *Don Juan's Three Nights (Don Juan három éjszakája)* novel (1917); *Yellow Lily (Sárga liliom)* play (1910, film script, 1914); *The Czarina (A cárnő)* play (1912); *Hotel Imperial*, play (1917, film-script 1918, abroad 1926, 1935, 1943) and *The Private Life of Henry VIII (VIII Henrik magánélete)*, filmscript 1933). – B: 0883, 1068, 1257, T: 7456.→**Ady, Endre; Károlyi, Count Mihály; Council (Soviet) Republic; Korda, Sir Alexander.**

**Biró, Lajos (2)** (Louis) (Tasnád now in Romania, 28 August 1856 - Budapest, 2 September 1931) – Entomologist. His higher studies were at the Reformed Theological Academy, Debrecen; but he did not finish them. He moved to Budapest, worked as a private tutor, thereafter he joined the Entomological Institute (1880-1886). Later he taught at the Reformed High School, Kecskemét. In 1892 he returned to Budapest. In 1895 he traveled to German Papua New Guinea with the help of Otto Herman to continue the work of the prematurely deceased Samuel Fenichel. He spent seven years there

compiling zoological and ethnographical collections of 6000 pieces. He went on collecting trips in Greece (1906) and in Bulgaria (1928). His books are: *Seven Years in New Guinea (Hét év Új-Guineában)* (1923) and *Memoirs of my Travels in New Guinea (Új-Guineai utazás emlékei)* (1928). – B: 0883, 1105, T: 7103.→**Fenichel, Samuel; Herman, Ottó; Madarász, Gyula; Pungur, Gyula.**

**Bíró, László József** (Ladislav Joseph) (Budapest, 29 September 1899 - Buenos Aires, Argentina, 24 November 1985) – Journalist, inventor, designer of the ballpoint pen. Initially he studied medicine at the University of Budapest. He was also a graphologist, car racer, insurance agent, painter and sculptor. He edited the artistic journal *Hongrie (Magyarország)* then worked for the newspaper *Forward (Előre)*. In 1939 he emigrated to Argentina. His main invention was the ballpoint pen. The idea came from his journalist days by observing the rotary cylinders of the printshop. He created a pen with its hand-held ink-filled tube that transferred the ink through a rolling ball to the paper. He patented it in Hungary under the name of *Exact* in 1938. Andor (Andrew) Goy made the first sample in Budapest. Its advanced form was patented under the name *Enterpren* in 1943, and the pen was on the market in Argentina in 1945. A French company was established for its production under the name BIC (Biro Crayon). The inexpensive and popular ballpoint pen is known simply as *Biro pen* in many parts of the world and brought him fame. From 1950 some 100 milliard Biro pens were sold. There are 22 inventions to his credit. Bíró's book is entitled *Silent Revolution (Csendes forradalom)* (1975). Inventors' Day in Argentina is celebrated on his birthday. – B: 1203, T: 7674, 7677.→**Ballpoint Pen.**

**Bíró, Zoltán** (Budapest, 21 April 1941 - ) – Literary historian, writer, politician. He grew up in Pesterzsébet (a southeast suburb of Budapest); after completing high school, he was a research worker at the House of Culture of Dabas, halfway between Budapest and Kecskemét on the Great Plain; later on he worked as Director of the district library. He spent a year as an unskilled laborer, while studying Arts at the University of Budapest, where he obtained an Arts Degree. For a while he was working as a teacher; and worked in the section headed by the Professor of Law, Tibor Király at the Ministry of Education. When Imre (Emeric) Pozsgay took over the portfolio of Culture, he appointed Bíró to be Head of the Department of Literature and Press. Here he often and seriously clashed with the cultural party politics led by György (George) Aczél. As a result, he had to leave this position after two years. Thereafter he became Director of the Petőfi Literary Museum; but due to his opposition to the policy of the Central Party and his writings published in journals, he was forced to leave. For the following twenty years he worked as a teacher of 20th Century Hungarian Literature at the Teachers' College of Szeged. He obtained his Masters Degree in 1994; the title of his dissertation was: *The "Third way" and its Post-1945 Answer's Range of Ideas* (A „harmadik út” és az 1945. utáni Válasz gondolatköre”). He participated in the preparatory work in organizing the Lakitelek Convention of the Hungarian Democratic Forum (*Magyar Demokrata Forum – MDF*). He was also a member of the presidium of the MDF, later becoming its first Executive President. Prior to the first free elections he resigned from his position as President and afterwards he left the MDF as well. Together with Imre Pozsgay he launched the National Democratic Council (*Nemzeti Demokrata Szövetség*), working as its Co-President until the winding-up of the Party. He was editor of the bi-weekly journal *Credit (Hitel)* from the fall of 1988, when it was launched, until 1992. He was a member of the

Board of Trustees of the Gábor Bethlen Foundation (*Bethlen Gábor Alapítvány*). Lately he has been heading the National Political Society (*Nemzetpolitikai Társaság*) together with Sándor Lezsák and the academic István (Stephan) Lovas. He was one of the determining figures of the change in the political system of 1989-1990. His books include *Personal Road (Saját út)* (1988); *Wilted Revolution (Elhervadt forradalom)* (1993); *Fate-poetry of Endre Ady (Ady Endre sorsköltészet)* (1998), and *Two Generations (Két nemzedék)* (2001). – B: 0874, 1941, T: 7456.→**Lakitelek, Consultation at; Pozsgay, Imre; Aczél, György; Antall József; Lezsák, Sándor; Hungarian Democratic Forum; Király, Tibor; Lovas, István (1).**

**Bírócz, István** (Stephen) (Tardoskedd, now Tvrdošovce, Slovakia, 6 February 1942 - ) – Roman Catholic priest. His schooling began at Moravska Třebova (now in the Czech Republic), from where he was deported after World War II (1948-1949). He continued his schooling at the primary school of Tardoskedd with Slovakian as the language of instruction (1949-1950). However, from 1950 to 1956 he was able to study there in Hungarian when it was introduced as the language of instruction. In 1959 he completed high school at Érsekújvár (now Nové Zámky in Slovakia) also in Hungarian. Between 1959 and 1964 he obtained a Degree in Theology from the Faculty of Cyril and Method of the University of Pozsony (now Bratislava, Slovakia). From 1964 to 1969 he was Chaplain in Léva (now Levice, Slovakia) and in Ókomárom (now Komarno, Slovakia) (1969-1971). He was Parish Priest in Tornóc (now Trnovec nad Váhom, Slovakia (1971-1982) and from 1982 in Tallós (now Tomasikovo, Slovakia). He has been a member of the Liturgical Committee of the Nagyszombat (now Trnava, Slovakia) Diocese since 1978. Between 1987 and 1990 he was Instructor in Liturgical Music at the Cyril and Method Faculty of the University of Pozsony. Apart from church music and liturgy he carries out research in Sociology of Religion. His writings include *What is Reflected in One's Face? (Mi tükröződik az ember arcán?)*; *Day (Nap)* (1990); *The Church and the Pope (Az egyház és a pápa)*; *The Fate of Mothers (Anyák sorsa)*; *Hope (Remény)* (1990), and *Peace, Tranquility (Béke, békesség)*, a meditation for Christmas (1990). He is Editor of the song prayer book *Gloria* (1991), and Editor of *Homilia* since 1990, a treasury of sermons for priests, published as a quarterly. – B: 1083, T: 7456.→**Catholic Church in Slovakia.**

**Bisztray, György** (George) (Budapest, 2 October 1938 - Torontó, 19 December 2012) – Literary historian, educator. He received his MA at the University of Budapest in 1962. He left for Norway in 1965 and emigrated to the USA in 1966. He received his Ph.D. from the University of Minnesota in 1972. He taught at the universities of Minnesota and Chicago (1969-1975), thereafter he moved to Canada and taught Comparative Literature at the University of Alberta (Edmonton) (1976-1978). He was Chair of Hungarian Studies at the University of Toronto from 1978 until his retirement in 2004. He was founder of the Hungarian Studies Association of Canada (1984) and co-editor of the *Hungarian Studies Review* (1981-2004). He had published and edited books and research papers in scholarly journals including the *Canadian Review of Comparative Literature*; *Source (Forrás)*; *East European Quarterly*, and *Hungarian Studies Review*. His books include *Marxist Models of Literary Realism* (1978); *Hungarian Cultural Presence in North America* (co-editor with N. F. Dreisziger) (1981), and *Hungarian Canadian Literature* (1987). – B: 0893, T: 4342.→**Canadian Hungarian Literature, Hungarian Studies Association of Canada; Dreisziger, Nándor F.**

**Bitskey, Tibor** (Rákoskeresztúr, 20 September, 1929 - ) – Actor. He completed his acting studies at the Academy of Dramatic Art in 1953 while serving in the Hungarian People's Army, on a scholarship. From 1959 to 1964, he was a member of the National Theater (*Nemzeti Színház*); from 1964 to 1974 a member of the Comedy Theater (*Vígyszínház*); leading actor of the Thalia Theater (*Thália Színház*), and later at the Arizona Theater (*Arizóna Színház*). His appearance and voice rendered him particularly suitable for the interpretation of heroic roles. In addition he took part in numerous film and TV productions. His roles include Cyrano in Rostand's *Cyrano de Bergerac*; Ádám in Madách's *The Tragedy of Man* (*Az ember tragédiája*) (at the National Theater from 15 March, 2002); Csongor in Vörösmarty's *Csongor és Tünde*; Bánk in Katona's *Bánk bán*; Othello in Shakespeare's *Othello* (at the New Theater from 24 September, 1999), and Kreon in Sophocles' *Antigone*. There are 30 feature and TV films to his credit, such as: *The Stone-hearted Man's Sons* (*A köszívű ember fiai*) (1964); *Eclipse of the Crescent Moon* (*Egri csillagok*) (1968); *The Black Town* (*A fekete város*) (1971); *The Fortress* (*Az erőd*) (1979), and *Home-conquest* (*Honfoglalás*) (1996). He received the Mari Jászai Prize in 1959 and 1963, and the Kossuth Prize (2000). – B: 1031, 1445, T: 7456.

**Black Army** (*Fekete Sereg, Legio Nigra*) – The standing army of King Mátyás I (Matthias Corvinus, 1458-1490) of Hungary. It was an imitation of Charles VII's and Louis XI's experiments with free-musketeer regiments to establish a standing army in France. In 1459 King Mátyás brought into his service three Czech captains, commanders of various infantry contingents. In 1462 he made a service contract with Jan Giskra, who commanded his troops in a campaign in Northern Hungary (Upland, *Felvidék*, now Slovakia). During the same year he made a similar contract with Czech leader Komorovszki and his associates at Nagysalló (now Tekovské Luzany, Slovakia). In 1465 his standing army consisted of 20,000 Hussars (light cavalry), 8,000 footsoldiers, 9,000 horse carriages, 200 riverboats and an artillery brigade with about 100 cannons. Its central core was the 6-8000 – Czech and Serb (*Rác*) force. During the reign of King Mátyás, the Black Army proved to be an excellent force in time of war. He occupied Vienna, extended his rule over Lower Austria, Silezia and, with their help, defended Hungary's southern border against the invading Turks. The army was well paid and discipline was maintained. The army earned its "Black" name only after the death of the King, when it came under the command of Jan Haugwitz, whose nickname was "Black". During the reign of King Ulászló II (Wladislas, 1490-1516) the depleted treasury failed to pay the army, the power base of the king's authority. The unpaid mercenaries became a menace to the people in and around the city of Szeged. The looting started in 1492 and various atrocities were committed against the population. To subdue the disorganized mercenaries, Pál Kinizsi, Commander of the Black Army, surprised their camp near the city of Halas and subdued them in a fierce battle. 500 of the Czech mercenaries were killed, the rest captured. Their leaders were hanged on Kinizsi's orders, or were broken on the wheel. On 23 January 1493 the Black Army was officially disbanded by a royal decree. The best soldiers entered the service of the King, the Palatine, or the Reigning Prince of Transylvania. The others were expelled from the country but continued their campaign of plunder in Austria and Moravia, where they were also dispersed. The survivors took service with the French King, and Francis I embarked on his Italian campaign with an army largely composed of the remnants of the former Black Army. In the battle near Pavia on 24 February 1525, they were annihilated to the last man. – B:

1078, 1020, T: 3233.→**Mátyás I, King; Kinizsi, Pál; Ulászló II, King.**

**Black Color** – In ancient Egypt black symbolized the gods of the netherworld, eternal life and rebirth. Black animals were sacrificed to these gods by impaling them on stakes facing westward. The Ural-Altai peoples marked black all things they considered ordinary or subordinate. The sun sets in the West; hence the color of the west was black for them. Colors have been used for the designation of peoples primarily for religious differentiation. The epithet “Turk” or “Black-Ugor”, applied to the Hungarians of the Carpathian Settlement period, was in reference to their custom of fire worship. In Christianity, black is the color of humility, contempt for all things mundane, and of mourning. – B: 0942, T: 7617.

**“Black List”** – This is the name of the register of those civil servants who, for economic or political reasons, were marked for dismissal. In Hungary this method of dismissal was used on two occasions: first in 1920, when the dismemberment of Historic Hungary made it necessary for economic reasons; then in 1945-1946, when the objective was a political purge under Soviet rule. – B: 1153, 1020, T: 3233.

**“Black March” Pogrom** – A severe atrocity against Hungarians in Marosvásárhely (now Târgu Mureș, Romania) took place on 19th-20th March 1990, in the first year of the post Ceausescu new “democratic” political system in Romania. In February, some 100,000 Hungarians demonstrated for the reinstallation of a Hungarian school and a University. The *Vatra Romanesca* nationalist organization regarded this and the observation of Hungarian National Day on 15 March as a provocation against the Romanian state. On 19th-20th March, groups of Romanians rushed upon the demonstrating Hungarians and beat them up, turning the city into a place of street clashes. During this attack the renowned Hungarian writer András (Andreas) Sütő was severely beaten and wounded, and he almost lost his eyesight. The final result of the “Black March” pogrom was three dead and 100 wounded. Not a single Romanian but many Hungarians were arrested, accused and sentenced to prison terms – B: 1031, T: 3240.→**Sütő, András; Atrocities against Hungarians.**

**“Black Soup”** – This was the main course in the Spartan communal mess hall. Its Greek name was *‘haimatia’*. In vernacular Hungarian the expression indicates an impending menace. According to tradition, its origin goes back to the time of the Ottoman Turkish occupation. Folklore links it to a saying of Sultan Suleiman who, after gaining possession of the Fort of Buda in 1541 by a stratagem, told the Hungarian magnate Bálint (Valentine) Török, whom he invited to a lengthy dinner and who was anxious to leave, that *‘The black soup is yet to come’*, meaning that the last course of the feast, the black Turkish coffee would be served later. True to his word, after coffee was consumed, the Sultan ordered his guards to arrest the Hungarian magnate and incarcerated him for life in the Fortress of the Seven Towers (Yedikule in Turkish) in Istanbul. According to the memoirs of András (Andrew) Szirmay, the same expression was used by the Pasha of Nagyvárad (now Oradea, Romania) to delay the departure of Count Imre (Emeric) Thököly insisting that he wait for the coffee. When the coffee was finished, the Pasha ordered his men to put Thököly in chains. – B: 1078, 1020, T: 3233.→**Török, Bálint; Thököly, Count Imre; Szirmay, András.**

**Blága, Károly** (Charles) (Gyimesközéplök, now Lunca de Jos, Szekler part of Transylvania in Romania, 1931 - ) – Folk dancer. He is a son of a humble farmer family

of 10 children, a good-humored family, where everybody wanted to dance. His mother sang songs, to which the children usually danced, the older ones teaching the younger ones, especially the tricky *Gyimes Dance* (consisting of 32 figurations). He started school in 1937, and completed primary school (5 years) at the top of the class. He enjoyed studying, all in Hungarian. He never went to a Romanian school. He had to spend 39 months in the army, which really meant forced labor in building construction, mines, road bitumen work; he understood the others talking to him in Romanian, but he could not speak the language. Thereafter he was sent to high school at Csíkszereda (now Miercurea Ciuc, Romania), but he dropped out, left home, was adopted by his childless godfather, with whom, after 6 years, he fell out; then he lost his mother. He got married in 1956. In 1948 (aged 17) he and others in the village formed a dance ensemble. In 1974 another dance ensemble was created, with him as the leader (by then 43); they used to have competitions with the dance ensemble of the nearby town Csíkszereda; in these competitions their dance group from the little village used to get second prize. To earn a living he worked in the tractor factory of Csíkszereda. His wife became ill, and died in 1989. He remarried, choosing a little widow from the nearby village of Felsőlok (now Lunca de Sus, Romania). It was in 1982 that he had the experience of seeing Hungary for the first time; after 1990 he often went across, and performed not only in Budapest, but also in numerous country towns, featuring his favorite Gyimes type of dancing that cannot be taught, it is inborn. In 2003 he was named as “folk-art master”, and received a bronze medal and a pension from the Hungarian government. He continues to present his 32 figures of the *Gyimes Dance* at dance performances. – B: 1951, 7456, T: 7456.

**Blaha, Lujza** (Louisa) (Ludovika Reindl) (Rimaszombat, now Rimavská Sobota, Slovakia, 8 September 1850 - Budapest, 18 January 1926) – Actress, folk singer, the “Nightingale of the Nation”. After the death of her husband, conductor János (John) Blaha, she took on his surname. At the age of 13 she already played leading roles. First she acted in rural theaters; thereafter she received a contract with György Molnár’s Folk Theater of Buda, where she had immediate success in the role of *Rózsi* in Szigligeti’s *Herdsmen (Csikós)*. After the failure of the Theater she played in country theaters. In Szabadka (now Subotica, Serbia) János Blaha, the conductor of the lancer band and of the Theater Orchestra, soon recognized her singing ability, started to train her, and in 1866 he married her. From then on the actress used the Blaha name until her death. Her husband died in 1870. After acting in Debrecen, Kolozsvár (now Cluj-Napoca, Romania) and Nagyvárad (now Oradea, Romania) she became a member of the National Theater (*Nemzeti Színház*), Budapest in 1871; and a member of the Folk Theater (*Népszínház*), Budapest from 1875. She became a life member of the National Theater (*Nemzeti Színház*). She was one of the greatest personalities of Hungarian Theater. Her wasp-waist figure, her sweet face, her miraculous voice, charming conversations, her irresistibly attractive appearance truly predestined her for folk roles, the type of art she embodied. At guest appearances in the *Theater an der Wien* (1883) the Austrian public and the press also surrendered to this stylized acting. However, Hungarian stage writers adjusted the tone of their plays and methods of performing to her personality, thus limiting the development of true folk dramas. Other than the Folk Theater, her playful, endearing style succeeded well in operettas, in comedies, and later on in silent films. Her outstanding interpretations were *Rózsi Finum* in E. Tóth’s *The Troublemaker of the Village (A falu rossza)*; *Erzsike* (Elizabeth) in Csepregy’s *The Yellow Colt (Sárga*

*csikó*); Hanka in Almási's *The Slovak Girl (A tóth leány)*; Claire in Lecocq's *The Daughter of Madame Angot (La fille de Madame Angot, Angot asszony leánya)*, and Serpolette in Planquette's *The Bells of Corneville (Les cloches de Corneville – A corneville-i harangok)*. Her memoir is entitled *The Diary of My Life (Az életem naplója)* (1920). A main square and a theater in Budapest, as well as a Hotel in Balatonfüred bear her name. – B: 0871, 1105, 1178, T: 7684, 7685.

**Blaskó, Nándor** (Ferdinand) (Szalacs, Transylvania, *Erdély*, now Salacea, Romania, 1918 - Tauberbischofsheim, Germany, 1996) – Sculptor. He attended high school at Zilah (now Zalău, Romania), studied Fine Arts at the University of Bucharest, Romania. He served in the military during World War II. He was school Pincipal at Érmihályfalva (now Valea lui Mihai, Romania); then taught at the Bolyai Lycée at Marosvásárhely (now Targu-Mures, Romania) (1946). He was a teacher at the Institute of Hungarian Arts, Kolozsvár (now Cluj-Napoca, Romania) (1949), then a teacher at the Ion Andreescu High School of Fine Arts, Kolozsvár. In 1960 he organized the Ceramics Department of the Teachers' Training College and became its Chair in 1965. In 1971 he emigrated to Portugal and settled in Sintra. He had made significant sculptures before; but his talent fully blossomed in Portugal. In this period he created statues such as *Motherhood (Anyaság)*; *Triptych Altarpiece (Hármasoltár)*; *Martyrs (Áldozatok)*; *The Hand of the Artist (A művész keze)*; *The History of Iron (A vas története)*, and *Matt Talbot*. His sculptures are scattered all over the world. He held several exhibitions from Paris to New York and is regarded as one of the important sculptors of modern times. – B: 0919, T: 7103.

**Blaskó, Péter** (Budapest, 13 June 1948 - ) – Actor. He graduated from the Academy of Dramatic Art, Budapest in 1970 and was a member of the National Theater, (*Nemzeti Színház*), Budapest (1974, 2002), National Theater, Miskolc (1978), Katona József Theater (*Katona József Színház*), Budapest (1987-1994), Thália Theater (*Thália Színház*) Budapest (1995), Thália Society (*Thália Társulat*) (1996), Petőfi Theater (*Petőfi Színház*), Veszprém, (1998), and the Comedy Theater (*Vígszínház*), Budapest (2001). He appeared in some 35 classical Hungarian and foreign roles, among them Moliere's *Tartuffe*; in the title role of Ibsen's *Peer Gynt*; Higgins in Shaw's *Pygmalion*; Warwick in *St Joan*; Anfidius in Shakespeare's *Coriolanus*; Andrej in Chechov's *The Three Sisters (A három nővér)*; Trepliov in *The Seagull (Sirály)*; Gaiev in *The Cherry Orchard (Cseresznyés kert)*; Azdak in B. Brecht's *The Caucasian Chalk Circle (A kaukázusi krétakör)*; Domingo in Schiller's *Don Carlos*; Mayor in Gogol's *The Inspector (A revizor)*, and Ádám in Madách's *The Tragedy of Man (Az ember tragédiája)*. There are some 36 feature and TV films to his credit, among them the *Shiny Winds (Fényes szelek)*; *The Fortress (Az erőd)*; *Bánk bán*; *Dance of Death (Haláltánc)*; *Black Christmas (Fekete karácsony)*; *The Garden (A kert)*, and *The Bridge Man (A hídember)*. In 2008 he refused to accept the precious Kossuth Prize for political reason from then Prime Minister. He received the Mari Jászai Prize (1981), the Distinguished Artist Prize (1986), the Kazinczy Prize (2001), and the Kossuth Prize (2011). He is one of the outstanding and popular actors among his contemporaries. – B: 0871, 1439, T: 7684.

**Blaskovics, József** (Joseph) (Imely, now Imel, Slovakia, 12 June 1910 - Prague, 6 July 1990) – Linguist, specialist in Turkic studies, and translator of literary works. He completed his high-school education in 1930, obtained a teacher's diploma (Dip.Ed.) in

1931, and taught in primary schools with Hungarian as the language of instruction in an ethnically Hungarian region of Slovakia. He obtained a Teacher's Degree in 1938 in Mathematics and Physics. He taught at the High School of Galánta (now Galanta, Slovakia) between 1939 and 1945. In 1943 he obtained a Degree from the Szeged Teachers' College and enrolled in Hungarian and Turkic studies with Lajos (Louis) Fekete and Gyula (Julius) Németh at the University of Budapest. In 1946-1947 he catalogued the Turkish, Arabic and Persian manuscripts in the Central Library of the University of Pozsony (now Bratislava, Slovakia), and took up Turkic studies at the University of Prague. From 1947 to 1949 he taught mathematics and physics at the High School of Főrév (now Prievoz, Slovakia). In 1949 he obtained a Degree in Turkic and Magyar Studies from the University of Prague, received his Ph.D. in 1950. In the same year he founded the modern Faculty of Turkic Studies at the University of Prague and was Professor there from 1962 to 1975. In 1962, he was a visiting professor at the University of Istanbul. Between 1953 and 1977 he conducted the Hungarian culture and language courses of Radio Prague for 12,000 students. His fields of research were Hungarian grammar, historical phonetics, as well as finding Turkish documents of the era of Ottoman Turkish occupation of Hungary. He also researched the Ottoman Turkish language and modern Turkish literature. He has about 230 published works and about 50 translations to his credit. These include *Entwicklung und Erfolge der gegenwärtigen türkischen Literatur* in *Acta Universitatis Carolinae Orientalia (Development and results of the present Turkish literature in Acta Universitatis Carolinae Orientalia)* (1965); *Beiträge zur Lebensgeschichte des Köprülü Mehmed* (1960), and *Some Toponyms of Turkic Origin (Contributions to the life-history of Köprülü Mehmed)* (1960), and *Some Toponyms of Turkic Origin* (1973), both in *Acta Orientalia*, Budapest; *Chapters from the History of the District of Rimaszombat (now Rimavská Sobota) (Fejezetek a rimaszombati járás történetéből)* Pozsony (1968); papers in *Studia Turcica* (1971) and *Archivum Ottomanicum* (1974); *Textbook of the Hungarian Language (A magyar nyelv tankönyve)* (1955, 3rd. ed. 1957); *Arabische, türkische und persische Handschriften der Universitätsbibliothek in Bratislava (Arabic, Turkish, and Persian Manuscripts at the University Library of Bratislava)* (1961); *Textbook of the Turkish Language (A török nyelv tankönyve)* (1964, 2nd ed. 1970), and *Érsekújvár (now Nové Zámky) under Turkish Occupation 1663-1685 (Érsekújvár a török megszállás alatt 1663-1685)* (1985). As well, he translated from Turkish into Hungarian the *Tárik-i Üngürüs* (*The Story of the Magyars*), written during the Ottoman Turkish occupation of Hungary (1541-1686) by a Turkish interpreter by the name of Mahmud Terdzsüman. The book was published first in Hungary in 1982, then in Cleveland, Ohio, USA in 1988. – B: 1083, 1890, T: 7456. → **Tárik-i Üngürüs; Fekete, Lajos (2); Németh, Gyula.**

**Bláthy, Otto Titusz** (Tata, 11 August 1860 - Budapest, 26 September 1939) – Mechanical engineer, inventor, well-known electro-technical pioneer. He studied at the Polytechnic of Vienna, worked with the MÁV (*Magyar Államvasutak*, Hungarian National Railways) Machine Works (1881-1883), and joined the Electrical Division, established in 1878, of the Ganz Works, Budapest. In the new work environment he recognized the practical application of Ohm's Magnetic Law and with this knowledge designed his own machines, based on his own calculations, ahead of other countries. A list of results of some of his endeavors follows a patent on his Watt-meter in 1884: solution of the problem of parallel-connection of alternating-current generation in 1887,

considered unsolvable before; the first induction Watt-meter (meters of power consumption) was adopted at the end of 1889; significant contribution to the development of the commutator motors in 1891; an automatic rotation-counter for water turbines in 1891; design of four-pole generators in 1903, followed by two-pole generators of gradually increasing performance; patent on a stroboscopic process for the certification of current meters; pioneering role in phase transformer of wide-gauge locomotives. He published about 50 articles in Hungarian and other languages. He was a gifted person who had outstanding abilities for languages and mental arithmetics. As an author of complex chess problems, he published a book entitled *Vielzügige Schachaufgaben* in Leipzig in 1889. He was well ahead of his time. Most of his ideas are still timely. In the early 1800s the majority of experts in this field thought that the future belonged to direct current. Three engineers of the Ganz Industries of Budapest: Ottó Bláthy, Miksa (Maximilian) Déri and Károly (Charles) Zipernovský envisioned the development of alternating current. As early as 1882, they built a generator-producing alternating current. At the Vienna Exhibition of 1883, the 150HP 54 V alternating current generator, feeding 1200 bulbs directly, was such a success that it brought about the adoption of alternating current worldwide. In 1884 he calculated and designed the first transformer together with Károly Zipernovský (1853-1942) and Miksa Déri (1854-1938). They invented water turbines to generate electricity. The electrical system of the City of Rome was built according to their plan. A street in Budapest and a high school in Miskolc bear his name. – B: 0883, 1105, T: 7674, 7390. → **Zipernovský, Károly; Déri, Miksa.**

**Blessed Mother → Madonna the Great.**

**Blessed Virgin (Mary), Cup of the** – (1) An ancient custom of secret initiation for new mothers. On such an occasion the oldest women of importance held out a glass of wine and a piece of cake on a plate, giving thanks to the Blessed Virgin for the successful delivery and asking for the new baby's happiness. If this ceremony were missed for some reason, as a consequence a boy would be unable to find a girl and vice versa. (2) A contemporary version of an initiation ceremony in certain areas, such as Szeged in southern Hungary. Here they toast the new mother after the initiation with a cup that is passed from hand to hand, emptying it to the health of the mother, father and the godparents. – B: 0942, T: 3240.

**Blood Covenant or Treaty** (*Vérszerződés*) – The basic inter-tribal treaty to form a tribal federation of the ten tribes: seven Magyar and three Kabar tribes on the eve of the occupation of the Carpathian Basin at the end of the 9th century. The anonymous notary ("Anonymus") of King Béla III described in the 5th and 6th chapters of his Chronicle (the valuable pre-1200 *Gesta Hungarorum*) how the Magyars, about to move into the Carpathian Basin, initiated a new position by appointing a hereditary Khagan (Prince, Supreme Ruler) while using an ancient custom based on the symbolic blood relationship accompanied by ceremonies held universally among Asiatic peoples. This supreme position was established when the tribal leaders, by slitting their forearms, let their blood flow into a bowl. The collected blood was mixed with wine and then the tribal leaders drank from this, one by one, thus becoming each other's relatives symbolically, according to their ancient beliefs. The seven Magyar tribes and the three dissident Kabar tribes (that at that time seceded from the Khazar Empire) needed a "Blood Covenant", a symbolic kinship agreement to unite them into a single tribal federation. Collectively, this treaty comprised 108 clans. The leading tribe was the *Megyer* (*Magyar*) with its leader

Álmos, later Árpád that supposedly gave the newly formed nation its name, as was customary among the Asian peoples. We learn the names of the tribes from Emperor Constantine VII (913-949) (a.k.a. Constantinos Porphyrogenetos): *Nyék, Megyer, Küirt-Gyarmat, Tarján, Jenő, Kér* and *Keszi*; while Anonymus tells us the names of their leaders: *Álmos (Árpád), Előd, Ond, Kont, Tas, Huba, Töhötöm*.

According to Anonymus, the text of the Covenant was as follows:

(1) *As long as they and their descendants were living, they would elect a leader from the progeny of Álmos.*

(2) *They would all share equally in the land and goods they acquired.*

(3) *The leaders, having elected Álmos to be their leader, made the decision of their own free will. Furthermore, neither they nor their descendants should ever be excluded from the central ruling council and other leadership positions of the country.*

(4) *If anyone among their descendants were to become unfaithful to the king, or conspire against him and his relatives, the blood of the guilty should flow like theirs did at the oath they took to king Álmos.*

(5) *If anyone among Álmos' and the other leaders' descendants were to violate the agreements they sealed with their oath, they should be cursed forever.*

As to how this ceremony took place, the 5th century BC, Greek historian, Herodotus offers a description in his *Histories*. He was probably eyewitness to an oathtaking much like the *Vérszerződés*, for he describes one such event in great detail in his work on the Scythians. He wrote the following: "*...a large earthen bowl is filled with wine and the parties to the oath, wounding themselves slightly with a knife or an awl, drop some of their blood into the wine; then they plunge into the mixture a scimitar, arrows, a battle-axe or a javelin, all the while repeating prayers; lastly, the two contracting parties drink each a draught from the bowl as do also the leaders among their followers.*"

This covenant of blood forged one nation, the Magyar from the ten tribes. They recognized Álmos, the head of the leading *Megyer* tribe and his descendants as their "blood-related" supreme leader. In these critical times for the Magyar tribes, the aging Álmos did not enjoy his position very long as the supreme leader (according to more recent historical research by e.g. Bálint Hóman): "Álmos, being honored as the embodiment of the national totem, the sacred mythical eagle (*turul*), he was sacrificed so that his magic power, wisdom and bravery would move into the soul of his son, Árpád". This occurred when the ten tribes left the interstice area of *Etelköz* ("Atelkuzu" in the writings of the Greek Emperor *Constantinos Porphyrogenitos*, referring to the area between the Dnieper river and the Lower Danube, 830-895) to occupy the Carpathian Basin. The organizational task of this move of the ten tribes in 108 clans, involving about 500,000 people, fell on the new Khagan Árpád. The Petcheneg threat might have been a motive for this decision to move westward beyond the protective mountains of the Carpathians. According to the text of the Blood Covenant as described by Anonymus, the descendants of the tribal leaders were not be excluded from the ruling council of the Khagan, and the goods and land they acquire were to be shared equitably. The text of the Blood Covenant of *Etelköz* became the basic part of the Hungarian constitution, the *Corpus Juris Hungarici*. – B: 0942, 1241, 1242, 1257, 1075, T: 7617, 7456.→**Anonymus; Etelköz; Kabars; Pechenegs; Álmos; Árpád; Homeland Settlement; Constitution of Hungary; Dentu-moger; Hungarians, History of; Hungary, History of; Tripartitum; Corpus Juris Hungarici; Hóman, Bálint.**

**Blue Slip Election** – A nickname of the 1947 fraudulent elections in Hungary that secured the victory of the Communist Party. The Elections Act allowed certain itinerant workers such as railway personnel, election supervisors etc. to vote elsewhere than their place of residency. These persons received “blue slips”, authorizing them to vote wherever they wanted. Tens of thousands of additional blue slips were printed illegally. They were used *en masse* by workers and party members traveling in groups, to vote at many different places. This maneuver was discovered and came under protest by other parties. The official report mentioned only 62,980 fraudulent ballots; however, the true number was estimated to be between 200 and 300 thousand. – B: 0899, T: 7103.→**Karig, Sára; Hungary, History of.**

**Bó Clan** – One of the original Hungarian clans to settle in the Carpathian Basin. It was ahead of the Bogát and Bulcsu clans. The family headquarters were in County Somogy, in the village of Bó at present Alsóbőpuszta. They took no part in the Koppány uprising, therefore King István I (St Stephen, 977-1038) did not punish them. In Zelicse the village of Bőszénfa, in Rábaköz the town of Bősárkány are reminders of this clan. – B: 1078, T: 7685.

**Boat of the Dead** – According to folklore it is a water conveyance used to transport souls to the spirit world. There was always a ferryman. The best known is the Greek Charon (Kharon), who took the souls with his boat across River Styx to Hades. That concept is an ancient one and is supported by the custom of boat-coffin burials among some early peoples. The boats were either placed on the water or were suspended on high poles on riverbanks. It is assumed by some that the present shape of the coffin can be traced back to these enclosed boat-coffins. – B: 1078, 1020, T: 7617.

**Bóbis, Gyula** (Julius) (Kecskemét, 7 October 1909 - Budapest, 24 January 1972) – Wrestler. In the late 1920s he settled in the Capital. He tried a number of branches of sport; he first scored success in wrestling in 1934, winning the championship as light heavyweight among the Greco-Roman wrestlers. At the Berlin Olympics (1936) he was not placed; but in the following two European Championships he was third (at Munich in 1937 and at Oslo in 1939). With a family of five-children he experienced hard times during World War II. By the beginning of the London Olympics (1948) he had put on 10 kg and regained his normal 110-kg body weight. His classical hold in both forms, in technical preparedness and tactical feeling considerably exceeded his physical strength. In the London Olympics he won in free-style, but could not start in Greco-Roman because of his injury. He won an Olympic Gold Medal at the age of 39 and also won 23 Hungarian championships. He worked as a railway official and lived for music. He was an excellent singer. Among his children his daughter *Ildikó* scored successes as foil-fencer, she came second at the Munich Olympics. – B: 1768, 0883, 1031, T: 7456.

**Bobula, Ida** (Budapest, 1900 - Gaffney, SC., USA, 1981) – Educator, sociologist, historian. She completed her higher studies at the University of Budapest, obtained her Ph.D. in History in 1923. She made several trips abroad, also to the USA to further her studies at Bryn Mawr College, and earned a Ph.D. in Sociology. Between 1926 and 1933 she worked for the Hungarian Ministry of Education. She was also the first female reporter in charge of feminine matters. In 1929 she became the first woman in Hungary to

be appointed as Research Fellow at the University of Budapest. From 1934 to 1944 she was Principal of the Sarolta College (for women), Budapest. During these years she wrote about *The Woman in 18th Century Hungarian Society* (1933). Following World War II, she emigrated to the USA in 1947, where at first she worked in the Library of Congress, Washington D.C. In 1947-1948 she worked for the Women's College of New Jersey; and from 1967 to 1981 she taught at the Limestone College, Gaffney, SC. During these years she started to explore the possibility of a cultural and even linguistic relationship between the ancient Sumerians and the Hungarians. She published nine books on the topic, mostly in English. Among them are: *Sumerian Affiliations, A Plea for Reconsideration* (1951 MS); *The Sumerian Goddess Ba-U* (1952); *Sumerian Technology* (1960); *The Problem of the Sumerian-Magyar Relationship (A sumer-magyar rokonság kérdése)* (1961); *Origin of the Hungarian Nation* (1966), and *Origins of 2,000 Hungarian Names (Kétezer magyar név eredete)* (1970). From 1955 to 1957 she was Director of the Hungarian Refugee Program in Philadelphia. She was a member of several scientific societies. – B: 0883, 1105, T: 7456. → **Badiny Jós, Ferenc; Padányi, Victor; Sumerian-Hungarian Language Connection.**

**Bocskai Crown** – An enclosed gold crown decorated with pearls, rubies, emeralds and Persian motifs, reminiscent of 16th century works. On 11 November 1605, Lalla Mehmed received Prince István (Stephen) Bocskai (1557-1606) and his illustrious escort in Pest. He welcomed Bocskai as King of Hungary in the name of the Sultan and handed the crown over to him. Bocskai accepted the crown as a gift, not as a sign of royalty. The cross on top of the crown was added later at his request. After Bocskai's death the crown passed into the possession of the Homonnai Drugeth family; but was later confiscated by the Palatine of Hungary and returned to the Habsburg King to be kept in his treasury in Vienna as a national property. Based on the decision of the 1920 Versailles-Trianon Peace Dictate, although the Hungarian nation claimed the crown as keeper of the legal title, it is still in the Vienna Museum. – B: 0883, 1031, T: 7673. → **Bocskai, Prince István.**

**Bocskai, Prince István** (or Bocskay; Stephen) (Kolozsvár, now Cluj-Napoca, Romania, 1 January 1557 - Kassa, now Košice, Slovakia, 29 December 1606) – Reigning Prince of

Transylvania (*Erdély*, now Romania) (1605-1606), scion of an untitled landed gentry family. He was a page at the Vienna court; and upon returning to Transylvania he became Captain of Várad (later Nagyvárad, now Oradea, Romania) and was a leading member of the anti-Turkish party. In 1595, the Transylvanian and Wallachian (*Erdély* & *Havasalföld*) armies led by Bocskai, defeated the Turks. However, without the assistance promised by Vienna, Transylvania alone could not withstand the might of the Turks. Zsigmond (Sigismund) Báthory abdicated and the entire Principality became a devastated battleground. When Bocskai protested against the reign of terror imposed by the Austrian General Basta in 1602, the Viennese Court interned him in Prague for two years. Disillusioned by the Habsburg rule, he retreated to his estates and observed that the Emperor's troops treated the Hungarians as enemies instead of allies. Prince Gábor (Gabriel) Bethlen, representing those who fled from Turkish rule, urged Bocskai to oppose Vienna and assemble an army with Turkish

assistance. However, the plan was discovered and reported to the Emperor, who sent an army against Bocskai. Surprisingly, with a ragtag army of *Hajdúks* and 5,000 disarrayed troops, Bocskai defeated the Emperor's army between Álmosd and Diószeg, triggering the start of the uprising. In 1605, the Diet of Marossszék elected him Reigning Prince of Transylvania, and later in the same year, the National Assembly of Hungary at Szerencs elected him Reigning Prince of Hungary. Bocskai raised the participating *Hajdús* out of feudal status and settled them in newly created cities with special freedom. The ancient privileges of the Szeklers were also restored. In November 1605 he met the Turkish Grand Vizier, Lala Mohamed in the Vác region. After many hours of discussion about the Transylvanian situation he spoke at a banquet in the presence of the Turkish hosts and the Hungarian guests about friendship with the Turks being more valuable than the forever promising but never delivering assistance of Austria. He was presented with a saber inlaid with precious stones, a royal miter, a flag, as well as a crown that was placed on his head. He immediately removed the crown and declared that Hungary can only have one duly elected royal head. He was an excellent soldier; but at the same time realized that Hungary needed peace above all. Thus he forged the Peace Treaty of Vienna (*Bécsi Béke*) in 1606 with King Rudolf I, whereby he secured the independence of Transylvania, the freedom of the Protestants, and even a peace between the two adversary powers, the Turks and the Austrians, which resulted in Hungary regaining her strength. He stipulated in his will the continued independence of Transylvania that would secure the unity of the country and its status as a national kingdom under favourable circumstances. He died very young in 1606, only after a short reign. Circumstances suggest that he may have been poisoned. – B: 0931, 0883, 1138, T: 3312.→**Hajdús; Bethlen, Prince, Gábor; Basta, Giorgio; Basta Cart, Bocskai Crown; Freedom Fight of Bocskai, Prince István; Bécsi Béke (1606); Bocskai, Prince István, Death of.**

**Bocskai, Prince István, Death of** (Stephen) – There is a poetic reflection in four Hungarian songs on the death of the great ruler of Transylvania (*Erdély*, now in Romania) in 1606. Although their authors remain unknown, all four have survived in manuscript form. The most valuable among them is the one beginning “*Mély álomba merült...*” (He sank into a deep sleep...) in that the merits of the dead hero are enumerated with great poetic flair. Its author acknowledges belonging to the “unpaid servants”, the “ragamuffins” (*Hajdúk*) of István (Stephen) Bocskai and condemns the pomp of the gentlemen attending the funeral. Another song is a farewell poem narrated in the first person: the Reigning Prince speaking about himself. Two songs are about Chancellor Mihály (Michael) Kátay, who was accused of poisoning Bocskai and was lynched. – B: 1136, T: 7659.→**Bocskai, Prince István; Hajdú.**

**Bocskai, Vince** (Vincent) (Szováta, now Sovata, Transylvania, Romania, 16 December 1949 - ) – Sculptor. He studied at the Andreescu Fine Arts Academy (1974). He worked as an art teacher in Szováta between 1976 and 1981. He was member of the Marosvásárhely (now Targu-Mures, Romania) Workshop (1976-1981). From 1994 he taught in the Imre Palló High School of Arts at Székelyudvarhely (now Odorheiu Secuiesc, Romania). His works include the *György Bernády* statue; *Nicolae Bălcescu* bust, *Sándor Petőfi* bust; a *Memorial* of former political prisoners in Székelyudvarhely; *Memorial of the Heroes* of Two World Wars in Szováta; *Kelemen Mikes* bust, and the *Vilmos Apor* bust. He exhibited in Nyíregyháza and in many Transylvanian cities, among them in Székelyudvarhely, Marosvásárhely. He is a recipient of the Kolozsvár Brothers

Prize (1995). – B: 1036, T: 7103.→**Palló, Imre.**

**Bocskor Codex** – Handwritten songbook assembled between 1716 and 1739. János (John) Bocskor collected most of it at Csíkszentlélek (now Lelicieni, Romania) and hence it is named after him. There are many songs of outstanding value among the 80 or so that make up the collection. Most notable are the lyrics from the *Kuruc* era – the times of Prince Ferenc (Francis) Rákóczi II. There is a version of the laments about the battles of Moonlight and Feketehalom; *Pál Csinom* (*Csinom Palkó*), and *A Wandering Highwayman* (*Egy bujdosó szegény legény*). Two of the historic songs are about the battles with the Tartars in 1657. The collection also has a large number of love songs, mostly from the 17th century which, like the songbooks of Transylvania (*Erdély*, now in Romania), are of great traditional value. Also of literary merit are the student songs in Hungarian and Latin. The Codex is now kept in the library of the University of Kolozsvár (now Cluj-Napoca, Romania). – B: 1150, T: 7659.→**Codex Literature; Rákóczi II, Prince Ferenc; Kuruc.**

**Bod Codex** – This valuable literary record contains treatises entitled *On Man's Three Principal Enemies* (*Embernek három fő ellenségéről*) and *About Death* (*A halálról*). Ferenc (Francis) Toldy separated these from the *Cornidus Codex*, in which they were originally found and he dedicated the collection to the memory of Péter Bod. Both reflections were written by Lea Ráskai, a Dominican nun living on the Island of Hares, now Margaret Island (*Margit Sziget*) in the Danube within Budapest) at the beginning of the 16th century. They are now preserved in the Budapest University Library. – B: 1150, T: 7659.→**Bod, Péter; Codex Literature; Toldy, Ferenc; Ráskai, Lea.**

**Bod, Péter** (Felsőcernáton, now Cernat, Romania, 22 February, 1712 - Magyarigen, now Ighiu, Romania, 2 March, 1769) – Minister of the Reformed Church, historiographer. He came from an untitled noble Szekler family. His education began at the Reformed College of Nagyenyed (now Aiud, Romania) in 1724. Between 1729 and 1732, he taught at Nagybánya (now Baia Mare, Romania); thereafter he returned to the College of Nagyenyed, where he was librarian in 1736; then, in 1737, he became an assistant teacher. From 1740 to 1742 he studied at the University of Leiden, Holland, where he read Theology and Eastern Languages. Following his return he became Court Preacher to Countess Kata Bethlen; from 1746 he also served the Olthéviz (now Hoghiz, Romania) congregation. In 1749 he became Minister in Magyarigen, where he served to the end of his life. He also filled higher ecclesiastical offices. His literary activities embraced theology and literary history. His works include *History of the Holy Bible* (*A szent bibliának históriája*) (1748); *History of God's Militant Church* (*Az Isten vitézkező anyaszentegyháza állapotának históriája*) (1760); *Historia universitorum in Transylvania* (1776); *Historia Hungarorum Ecclesiastica vols. i-iii* (1888-1890); the *Hungarian Athenas* (*Magyar Athenás*) (1766) is the first literary history in the Hungarian language. It includes important details of 485 Hungarian writers, their life stories together with the list of their works and some criticism but mostly praise. Even today it is a much-used source book. He was the forerunner of the Age of Enlightenment in Hungary. – B: 0931, 1257, T: 7103.→**Bethlen, Countess Kata Árva; Fogaras, Runic Inscription in Church; Bod Codex; Hungarian Runic Script.**

**Bod, Péter Ákos** (Szigetvár, 28 July 1951 - ) – Economist. He completed his higher studies at the University of Economics, Budapest (1970-1975). He worked at the Institute

of Economic Planning, Budapest (1975-1985) and held its Chair between 1985 and 1990. In the meantime he acted as an economic expert and was dispatched by the UN to Ghana (1986-1987). He was Visiting Professor at the State University of Portland, WA, USA in 1987 and 1988, a Member of Parliament for the County of Veszprém (1990-1991), Cabinet Minister of Industry and Trade (1990-1991), President of the Hungarian National Bank (1991-1994), Acting Director of the European Bank of Reconstruction and Development (WCRD), London (1995-1997), Professor of Economics at the University of Veszprém (1998-2000), and currently teaches at the Gáspár Károli Reformed University, Budapest. He was personal advisor to the President of Hungary, Ferenc (Francis) Mádl (2001-2005). His major works are: *The Enterprising State in the Capitalist Economy of the Times* (1987); *Money, Power, Morals (Pénz, Hatalom, Erkölc)* (1997), and *The World of Money - the Money of the World (A pénz világa - a világ pénze)* (2001). He is one of the leading Hungarian economists. He is recipient the Middle Cross of Merit of the Republic of Hungary (2011). – B: 0874, T: 7456.→**Mádl, Ferenc.**

**Bódás, János** (John) (Tác, 7 February 1905 - Székesfehérvár, 1 May 1987) – Minister of the Reformed Church, poet. He completed his Theological studies at the Reformed Theological Academy of Pápa in 1928, and was Minister in Enying, Szombathely, and from 1939 to 1974 in Székesfehérvár. He published his volumes of sermons and poems under the titles *New Secret (Új titok)* (1926); *Upwards (Felfelé)* (1943); *Today's Preacher (Mai prédikátor)* (1963); *I Will Tell the World (Elmondom a világnak)* a collection of poems (1987), and *Petal and Fruit (Szirom és gyümölcs)*, selected poems (1983). His *Collected Poems (Összes versei)*, was published in 2005. – B: 0879, 0878, 0876, 0877, 1257, T: 7103.

**Bodnár, Gábor** (Gabriel) (Miskolc, 9 September 1920 - Garfield, NJ, USA, 22 December 1996) – Boy Scout leader. He completed his elementary and high school studies at his birthplace. He joined the Boy Scouts in 1935, became a Boy Scout officer in 1939, and was elected member of the Boy Scout Great Council in 1942. He attended the Royal Ludovika Military Academy. In early 1945 he was evacuated with his military unit to the West. In Germany he worked for the reorganization of the Hungarian Boy Scout movement that was banned in Hungary in 1948, and soon became Commanding Officer of the Hungarian Boy Scout Alliance abroad and was its Acting President between 1961 and 1994. In 1951 he moved to the USA and settled in Garfield, NJ. His home became headquarters of the reorganized Boy Scout movement resulting in 80 active groups with 5,000 members in 14 countries. He successfully maintained the continuity of the movement. After 40 years in exile, following the collapse of Communism, the movement was revived in Hungary in 1989, as well as in the neighboring countries with large Hungarian population. He received the Middle Cross of Merit of the Republic of Hungary in 1992. – B: 1037, T: 7103.→**Ludovika Royal Hungarian Military Academy; Boy Scouts and Girl Scouts in Hungary.**

**Bodoky, Richárd** (Biberauer) (Budapest, 6 August 1908 - Budapest, 9 January 1996) – Minister of the Reformed Church, theologian, writer, translator of literary works. After completing his secondary education, he continued his studies at the University of Budapest. For the 1928-1929 semester he was able to study on a French scholarship at Strassbourg. Through his family connections he often visited Switzerland and the Netherlands and learnt German, French, English and Dutch. In 1932 he became Pastor at

the Deaconate Institute (*Diakonissza Intézet*) of Budapest. As a result of his activities the deaconate service gathered strength until the persecutions and the outbreak of World War II. During the anti-Semitic and racial persecutions he worked actively in the rescuing and aiding service and established at Noszvaj (northeast of Eger) an orphanage for the children of forced labor workers. The motherhouse developed into a refuge for the politically persecuted. In the meantime he was President of the Hungarian Evangelical Christian Student Association (*Magyar Evangéliumi Keresztyén Diákszövetség – MEKDSZ*). In 1948 he was a member of the Hungarian delegation at the World Council of Churches – WCC (*Egyházak Világtanácsa – EVT*), Amsterdam. During and after the war years he worked as Director of the Deaconate Institute in Hungary until its dissolution in 1951. Subsequently he became Director of Bethesda Charitable Institute. For his charitable work during the 1956 Revolution and Freedom Fight he was thanked by the presidium; then on 1 March 1959, he was discharged and posted as Assistant Minister to the Congregation of Zugló, a northeast suburb of Budapest, and was not allowed to travel abroad. Later on he was employed as a co-worker at the newly established Reformed Synod Office and as such, he was able to travel and lecture abroad. He and his work went largely unnoticed in Hungary. He worked at the weeklies, *Reformed Life (Reformatus Élet)* and *Christian Family (Keresztyén Család)*, and later the combination of the two: *Life and Future (Élet és Jövő)*, in which he wrote articles and was also a member of the editorial boards. He was the representative of Hungary for the journal *Glaube in der zweiten Welt* published in Switzerland, dealing with the Christian life of eastern countries. His books include *Mother House Deaconate in the Church (Anyaházi diakónia az Egyházban)* and *Life and Work of Livingstone (Livingstone élete és munkássága)*. He translated Stanley's book: *Christ on the Highway of India (Krisztus India országútján)* with Dezső László; and with Teofil Spoerli: *The Sin (A bűn)*. He received an Honorary Doctorate from the Reformed Theological Faculty of the University of Budapest in 1992. – B: 1942, T: 7456.

**Bodonyi, József** (Joseph) (Fülöpszállás, 15 March 1909 - Budapest, 24 October 1965) – Minister of the Reformed Church, Professor of Theology. He received his high school education at Kecskemét and his higher studies in Theology at the University of Debrecen (1928 -1932), at the University of Halle-Wittenberg (1932-1933), and at the University of Aberdeen in Scotland (1933-1934, 1935-1936). At the latter he obtained a Ph.D. in Arts in 1936. In 1938, at the University of Debrecen, he earned a Doctorate in Theology “*sub auspiciis Gubernatoris*”. In 1937 he received his Degree in Education (Dip.Ed.) and became an honorary lecturer (*privatdozent*) at the University of Debrecen. He worked as an assistant minister in a number of places; then, from 1939, as a minister in Orgovány, later in Debrecen. From 1941 until his death he was Professor of Practical Theology at the Reformed Theological Academy of Budapest and, from 1961, was concurrently one of the Ministers at the Kálvin Square Church of Budapest. His articles and studies appeared in learned journals in Hungary and abroad. Apart from his college and university notes he was the author of: *The Spiritual life of English Puritanism and its Influences in Hungary (Az angol puritanizmus lelki élete és magyar hatásai)* (1942), and *The Age of Internal Mission 1896-1918 (A belmisszió kora 1896-1918)* (1955). In 1960 he received an Honorary Doctorate from the University of Aberdeen. – B: 0883, 1160, T: 7456.

**Bodó, Sándor** (Alexander) (Szamosszegi) (Szamosszeg, 13 February 1920 - ) – Painter.

He was born into a peasant family. Following his enlistment in the army he had an opportunity to attend the School of Arts and Crafts. He married his old schoolmate Ilona (Helena) Bodó. He wrote an anti-Communist text on a poster he was preparing that was originally meant to cajole people to buy Peace Loan Bond (*Békekölcsön*) in support of the Communist regime. Bodo got arrested on August 1955 but was released on 30 October 1956 during the Revolution. In December 1956 he left Hungary with his wife and a baby boy for the US and settled in Washington. They became American citizens in 1963, and in the same year they established the Bodo's Art Studio in Nashville, IN. In 1965, during the renovation of the White House in Washington, D.C., they were commissioned to restore its French paintings. This job inspired them to paint pictures with topics of the history of wars. In 1999 the Bodós moved back to Hungary. They opened the Bodó Art Salon and were involved in painting and exhibitions. In 2002, some of their 200 pictures and 24 plaques were exhibited. His wife Ilona (Helen) Bodó died soon afterwards. In early 2006 the artist donated nine of their historical paintings to the Museum of Military History, Budapest including *The Siege of the Fortress of Eger (Az egri vár osroma)*; *Retaking Castle Buda from the Turks (Buda visszafoglalása a töröktől)*, and *The Escape (A menekülés)*. In 2008 there was an exhibition of Bodó's pictures at Felsőzsolca. – B: 1579, T: 7103.

**Bodor, Ádám** (Kolozsvár, now Cluj-Napoca, Romania, 22 February 1936 - ) – Writer. His higher studies were at the Protestant Theological Academy, Kolozsvár. He was a political prisoner between 1952 and 1954. From 1960 to 1968 he worked as a manual laborer. He became a freelance writer in 1968 and has lived in Hungary since 1982. He was Editor for the Magvető Publishing House from 1984. His major works include *The Witness (A tanú)* (1969); *Arrival at the North (Megérkezés északra)* (1978); *Mount Zangezur (A Zangezur hegység)* (1981); *Visit of the Archbishop (Az érsek látogatása)* (1999), and the *The Smell of the Prison (A börtön szaga)* (2001). He is recipient of a number of prizes, including the Prize of the Romanian Writers Union (1970, 1975), the Book of the Year Prize (1985, 1989), the Attila József Prize (1986), the Artistjus Prize (1989), the Sándor Márai Prize (1996), the Lifetime Prize (1996), the Laurel Wreath of the Republic of Hungary (1998), the Kossuth Prize (2003), and the Artisjus Literary Grand Prix (2011). – B: 0874, 0878, 1257, T: 7103.

**Bodor, Péter** (Erdőszentgyörgy, now Singeorgiu de Padure, Transylvania, in Romania, 22 June 1788 - Kolozsvár, now Cluj-Napoca, Romania, 17 August 1849) – Mechanic, a Szekler-Hungarian polymath. Having completed the lower levels at the College of Marosvásárhely (now Targu Mures, Romania) he served initially the noblemen of Transylvania (*Erdély*, now in Romania) and learned the trades of cabinetmaker, watchmaker, gardener and locksmith. In 1806 he studied at the Polytechnic of Vienna and traveled abroad thereafter. He returned to Transylvania in 1815 and worked at the Court of Lajos (Louis) Bethlen (autobiographer, 1782-1867) as an architectural mechanic. He produced numerous machines, such as the automatic distaff, flourmills, water conduits and water fountains. He settled in Marosvásárhely in 1818, where he worked as city engineer. There he constructed his famous “Musical Well” (*Zenélő Kút*). He built the 8-meter wide and 63- meter long Maros Bridge solely from wood and without iron nails. This was the first large bridge in Transylvania, and was in use until 1900. Soon after building the bridge he became entangled in a case of banknote forgery and was condemned to death. Thanks to the City's intervention his sentence was

commuted to seven years' imprisonment; of that he served five years in Szamosújvár (now Gherla, Romania). He was released in 1827. He lived in seclusion and occupied himself mainly by building organs. His last invention was a multi-barreled organ cannon capable of shooting chained cannon balls; it was used in the battles of the 1848-1849 War of Independence. – B: 1078, 0883, T: 7674. → **Freedom Fight of 1848-1849;**

**Bodrogi, Gyula** (Julius) (Budapest, 15 April 1934 - ) – Actor, stage manager, theater-manager. He started as a folkdancer. He studied at the Academy of Dramatic Art, Budapest (1958). He joined the Attila József Theater (*József Attila Színház*), Budapest, and was a member until 1982. From then on he was Director of the Gaiety Stage (*Vídám Színpad*) and from 1996, its manager. He was excellent in character roles in classical and modern plays. He successfully appeared in plays, where there was scope for his musical talent and humor. From 1975 he taught at the Academy of Dramatic Art. His important roles include Tristan in Lope de Vega's *The Gardener's Dog* (*El Perro del Hortelano – A kertész kutyája*); D'Artagnan in Duma's *The Three Musketeers* (*A három testőr*); Truffaldino in Goldini's *Servant of Two Masters* (*Arlecchino servitore di due padroni, Két úr szolgája*); Shakespeare's *Richard II*; Peacock in Brecht-Weill's *The Threepenny Opera* (*Die Dreigroschenoper – Koldusopera*); Gábor Borsos in Csurka's *The Great Clean-up* (*Nagytakarítás*); Robert in Camelotti's *Boeing Boeing* (*Leszállás Párizsban*); Lord McKinsely in Jacobi's *The Marriage Market* (*Leányvásár*), and the French king in Kacsóh's *Hero John* (*János vitéz*). His feature film roles include *Suburban Legend* (*Külvárosi Legenda*); *Smugglers* (*Csempészek*); *Dreamless Years* (*Álmatlan évek*); *Alba Regia*; *Guns and Doves* (*Puskák és galambok*); *Swan Song* (*Hattyúdál*); *Titania, Romeo, Julia and the Darkness* (*Rómeo, Júlia és a sötétség*); *Jaguar, Direction Mexico* (*Jaguar, Irány Mexikó*); *Linda* (series), as well as shows and cabarets. He stage-managed plays as well, among them Feydeau's *The Cat Sack* (*Zsákbamacska*), Balzac-Kaló's *Droll Stories* (*Pajzán históriák*); Katajev-Aldobolyi Nagy's *Crazy Sunday* (*Bolond vasárnap*); Fekete Sándor's *Secret of Lilla's Villa* (*A Lilla villa titka*); Görgey's *Draughty House* (*Huzatos ház*), M. Lengyel's *Ninocska*; Magnier's *The Smile of Mona Marie* (*Mona Marie mosolya*). *Bo Vo Bo* is the title of his record. He wrote stage adaptations, and a book: *The Hunter Sometimes Cooks, too* (*A vadász néha főz is*). He is a recipient of the Jászai Mari Prize (1962, 1967), the Merited Artist title (1973), the Outstanding Artist title, (1983), the Officer Cross of Merit of the Republic of Hungary (1996), and the Prima Prize (2012). He is the Actor of the Nation (2007) – B: 0874, 1031, 1439, T: 7103.

**Bodrog Interstice** (*Bodrogköz*) – This is a small and a unique 500 km<sup>2</sup> land area in the far northeastern part of the Great Hungarian Plain (*Nagyalföld*). This lowland region lies between the rivers Bodrog, Tisza and Latorc. The southern part belongs to Hungary; its upper part has belonged to Slovakia since 1920. An old cemetery, excavated by archeologists in 1986, yielded significant artefacts consisting of objects the early Hungarians brought with them from their previous homeland, Etelköz, in the Black Sea region. The findings comprised decorated hilts and daggers, quivers, bows, fitted belts, splendid harnesses, gold and silver jewelry, ornaments, Italian and Arabic coins, pearls, and goldplated headpieces. Mainly Hungarians (Magyars) inhabited the area and they were able to preserve their ancient folk culture due to its geographical isolation. – B: 1204, T: 7103. → **Etelköz.**

**Bodrogkeresztúr Culture** – A historic culture named after the discovery of an Early

Bronze Age cemetery in 1921 at Bodrogkeresztúr during a highway construction. It is estimated to be around 4,500 years old. The excavations at Tiszapolgár-Basatanya allowed Ida K. Bognár to place this culture in the Bronze Age, at the beginning of the flourishing Tiszapolgár culture. From chronological and genetic studies it appears that the Bodrogkeresztúr culture must have blossomed in the early Bronze Age, much as the Pécel Culture did in the Late Bronze Age. In the burial ritual the body was facing east in a fetal position. The men were laid on their right sides, the women on their left. The men had knives made of stone and brass placed under their heads or in their right hands, while the women had marble beads positioned around their waist, neck and ankles. Most objects in the tombs were made of ceramic; the milk jug was the most popular, while cups and flowerpots came next. Food was placed in the tombs to provide nourishment for the trip to the other world. Evidence from the bones suggests that domesticated animals may have been used for this purpose, for sheep, goat, pig and cattle bones were also found. Ida Bognár has identified an earlier and a later time period within this culture. The ornaments of the later period included motifs with the outline densely filled in with dots, as well as a short neck collar. – B: 1204, 1020, T: 7676.→**Bronze Age in the Carpathian Basin.**

**Bodrog, Miklós** (Nicholas) (Nyíregyháza, 7 December 1929 - Budapest, 19 May, 2009) – Psychologist, Lutheran pastor, writer. His higher studies were at the Lutheran Theological Academies of Sopron and Budapest (1948-1953), at the C. G. Jung Institute, Zürich, and at the University of Lausanne, Switzerland (1970-1971). He served as an assistant pastor (1953-1962), as Pastor in Gyula (1962-1973), and in Rákospalota (1973-1980). From 1979 he worked as a scientific researcher and psychotherapist. Between 1958 and 1988 he intermittently lectured on Pastoral Psychology at the Lutheran Theological Academy, Budapest. His field of research is deep psychology, and the work of C.G. Jung. During the years 1979-1980 he worked as a psychotherapist in Stuttgart, then in Cawl-Hirschau, Germany. He was a hospital chaplain from 1989 to 1991, and Hungarian Pastor in Caracas, Venezuela in 1992-1993. Between 1990 and 2001 he was also President of the Psychology Department at the Protestant Educational Society (*Protestáns Közművelődési Egyesület*), Budapest. He also taught at the Evangelical Theological University, Budapest. His works include *Thoughts on Religion and Christianity (Gondolatok a vallásról és a kereszténységről)* (1996); *Cave-world of our Dreams. In the Footsteps of C. G. Jung (Álmaink barlangvilága. C.G. Jung nyomában)* (1995), and *Lexicon of the Fundamental Concepts of Carl Gustav Jung, vols. I-II (Carl Gustav Jung alapfogalmainak lexikona, I, II)*, (1997-1998). He received the Nívó Prize (1998). – B: 0874, 0878, T: 7103.→**Ferenczi, Sándor; Gyökössi, Endre.**

**Boér, Ferenc** (Francis) (Marosvásárhely, now Targu Mures, Romania, 23 April 1940 - ) – Transylvanian (*Erdély*, now in Romania) – Actor. He completed his higher studies at the István Szentgyörgyi Drama School, Marosvásárhely in 1960. He worked at the Hungarian Theater of Szatmár (now Satu Mare, Romania) (1960-1968), then at the Northern Theater (*Északi Színház*) from 1968. During 1979-1980 he was leader of the Hungarian troupe. From 1980 to 1990 he was at the National Theater (*Nemzeti Színház*) at Marosvásárhely, and taught in the School of Dramatic Art. From 1990 he was a member of the Hungarian State Theater (*Állami Magyar Színház*), and since 1994, he has worked at the Hungarian Drama School of the University of Kolozsvár (now Cluj-Napoca, Romania). His major roles are Trepljov in A. Chekhov's *Seagull (Sirály)*;

Sokrates in Plato's *The Apology* (*Szokráteész védőbeszéde*); Ottó in J. Katona's *Bánk bán*, and Lucifer in Madách's *The Tragedy of Man* (*Az ember tragédiája*). His recitals of poems included mainly those by S. Petőfi, M. Eminescu, J. Dsida, S. Reményik, as well as contemporary poets. He also works for the Radio and TV. He received the Prize for Performance (1978, 1979), the Merlin Prize (1993), the EMKE Prize (1993), (Cultural Society of Transylvanian Hungarians Prize – *Erdélyi Magyarok Kulturális Egyesülete*) (1993), and the Ferenc Sík Prize (1997). – B: 1036, 1445, T: 7103.→**Petőfi, Sándor; Dsida, Jenő; Reményik, Sándor; Katona, József; Madách, Imre.**

**Boeselager, Csilla**, (Frau von, née Fényes) (Budapest, 7 May 1940 - Arnsberg-Vosswinkel, 23 February 1994) – Philanthropist, charity worker, chemist. With her parents she left Hungary aged 3, fleeing from the advancing Soviet forces early in 1945. They first settled in Austria and Germany, from where they emigrated to Venezuela, where her father found employment. Csilla was sent to the local school run by the Franciscan Sisters, where she quickly learnt Spanish. Soon she also learned English, because the family moved to the USA. She became a student of Vassar College, where she earned a Diploma in Chemistry. First she worked as a research chemist, later changing to the commercial field: worked as production manager for Shell Chemical Co. in New York, where she also found some Hungarian friends. Then she was employed by a cosmetic firm; with this firm she moved back to Europe. She met and married the German baron, dr. Wolfhard von Boeselager in 1973. They lived in a south German village with their two daughters; she started local community work, and became the leader of a youth group. Thus she met the German Maltese charity organization, the Malteser Hilfsdienst, where she completed their first-aid course. In 1987 she met Imre Ugron, a Hungarian Hospitaler, then President of the Hospitalers in Germany; from whom she found out that at the time they were organizing a donation of pharmaceuticals and hospital equipment to be sent to Hungary. She joined the organization, soon becoming its most active and leading member. The Baroness went to Hungary, and with the help of a parish priest, Imre (Emeric) Kozma, a good organizer, container-loads of pharmaceuticals and hospital equipment, instruments were transported to Hungary. On a state-secretarial level the Baroness succeeded in obtaining approval from the Hungarian government to establish a Hungarian branch of the Maltese charity service, the Hospitalers that formally started on 4 February 1989 in Budapest. In August 1989 it became their mammoth task to care for the newly arriving East-German refugees in the parish of Father Kozma, where they stayed for months, until finally the Hungarian government made the historic decision to open the western borders, thus starting the demolition of the Berlin Wall and the Iron Curtain, allowing the German refugees to flee to the West. Sub-branches of the Hospitalers were established in a number of country towns in Hungary. In the early 1990s the Baroness became ill with cancer. Toward the end she was working in a wheelchair. – B: 1587, 1031, T: 7456.→**Iron Curtain; Knights of Hospitaller, The; Kozma, Imre.**

**Bogányi, Gergely** (Gregory) (Vác, 4 January 1974 - ) – Concert pianist. He began to study the piano at the age of four. He was six when he won the special Prize at the National Piano Competition in Nyíregyháza, Hungary; and three years later he was awarded 1st prize in the same competition. He later studied at the Ferenc (Franz) Liszt Academy of Music, Budapest, under Zsuzsa (Susan) Esztó and László (Ladislav) Baranyay. Thereafter he studied at the Sibelius Academy in Helsinki with Matti

Raekallio, and at Indiana University in the USA, where he studied with the Hungarian pianist György Sebők. He played as soloist with many European orchestras and has given recitals at numerous festivals and in famous concert halls all over the world. Some of his important performances were with the Hungarian Radio Symphony Orchestra, the Hungarian National Philharmonic Orchestra, the Festival Orchestra of Budapest, the Helsinki Philharmonic Orchestra, the Helsinki Radio Symphony Orchestra, the Netherlands Philharmonic Orchestra, the Leningrad Philharmonia, and the Concertgebouw Orchestra in Amsterdam. He performed under the baton of Tamás Vásáry, Ádám Fischer, Iván Fischer, Leif Segerstam, Vasili Sinaiski and Ken-Ichiro Kobayasi. He appeared in the concert hall of the Liszt Academy, Budapest, the Finlandia-Hall, Helsinki, and at Carnegie Hall in New York City. He is also a chamber musician. His recordings include 7 compact discs of Mozart concertos, Chopin and Liszt works, and the Chopin and Rachmaninov sonatas for cello. He won several national and international prizes, among them 3rd prize in Ettlingen, Germany (1990), 2nd prize in Epinal, France (1991), 1st prize in the Chopin Competition in Budapest. He is three-time winner at the Helmi-Vesa Competitions, Helsinki (1989, 1990 and 1991), and 1st prize winner at the Franz Liszt International Piano Competition in Budapest (1996). He was awarded the Ferenc Liszt Prize (2000), the Cross of Merit of the White Rose of Finland (2002) and the Kossuth Prize (2004). He is an honorary citizen of Vác. – B: 1106, T: 7103. → **Vásáry, Tamás; Fischer, Ádám; Fischer, Iván.**

**Bogár, László** (Ladislav) (Miskolc, 22 April 1951 - ) – Economist, writer. After graduating from the György Kilián High School, Miskolc in 1969, he was admitted in the same year to the University of Economics, Budapest, where he obtained a Degree in Economics in 1973. From 1974 to 1975 he worked as a scientific co-worker at the Technical University of Miskolc. From 1975 he worked at the Planning Department of the City Council, Miskolc. In 1986 he obtained his Ph.D. in Economics, and moved to Budapest. Until 1989 he held various positions at the *Patriotic People's Front (Hazafias Népfront)*. Between 1989 and 1991 he was a columnist at the newspaper *Credit (Hitel)*. In 1987 he was one of the founding members of the *Hungarian Democratic Forum (Magyar Demorata Fórum) (MDF)* and participated in planning its economic program. In 1990 he became a Member of Parliament. Between 1990 and 1994 he was Political Undersecretary in the Ministry of International Economics. He again was a Member of Parliament from 1994, and worked in a number of parliamentary committees, and was also a deputy member of the delegation to the Parliament of the European Union. In 1996 he left MDF and participated in the creation of the *Hungarian Democratic People's Party (Magyar Demokrata Néppárt – MDNP)* fraction. From 2002 he has been teaching at the Gáspár Károli Reformed University, Budapest, and is a leading economist of Hungary. Among his books are *The Price of Development (A fejlődés ára)* (1983); *Attempts of Breakout (Kitörési kísérletek)* (1989); *Hungary and the Globalization (Magyarország és a globalizáció)* (2003); *Challenges and Vision of the Future in the XXI Century (Kihívások és jövőkép a XXI. században)* (2005); *The Liquidation of Hungary (Magyarország felszámolása)* (2008), and the *Fall of the System-change (A rendszerváltás bukása)* (2010). – B: 0878, 1608, T: 7103.

**Bogát** – Tribal leader at the time of the Carpathian settlement era (early 10th century). In 921, when King Berengar of Italy was facing a revolt by his subjects, he asked Hungary for help, and a Hungarian contingent, led by Bogát and Tarhos, was dispatched to the

King's aid. The Hungarians laid waste to the land of the king's rebellious subjects and killed many of them, securing the throne for Berengar. Anonymus, the 12th century Hungarian Chronicler regarded Bogát and Bulcsu as the same person. The memory of Bogát is preserved in the founding charter of the monastery of Tihany of 1055, recording him as "Bagat meze", while his name lives on in Bogát, a town in Vas, and the Somogy County towns of Alsóbogát and Felsőbogát. – B: 0942, T: 3233.

**Bogdány, Jakab** (Jacob) (Eperjes now Presov, Slovakia, cc.1660 - London, England, before 11 February 1724) – Painter. He studied painting in Vienna and Amsterdam (1684). Around 1690 he moved to London. In 1694 he was a court painter and worked for Queen Mary, William III and Queen Anne. He was excellent in painting still life, fruits, exotic flowers, and birds. His paintings include *Birds of England (Angolország madarai)*, *Red Lilies in a Vase (Vörös liliomok vázában)* and *Fruit Still Life with Stone-vase (Gyömolcscsendélet kővázával)*. His paintings were bought by royalty and are now exhibited in museums in London, Stockholm and Budapest. – B: 0833, 0872, 1445, T: 7103.

**Boglár, Lajos** (Louis) (pseudonym: Belovits) (Sao Paulo, Brazil, 1929 - Budapest, 23 September 2004) – Ethnologist. At the age of 13 he settled in Hungary. He completed his high school education and university studies in Budapest with a Degree in Ethnology in 1953, and a Ph.D. in 1969. He worked in the Ethnographical Museum in Budapest from 1953 until 1979, when he became a correspondent to the Orientalist Working Team of the Hungarian Academy of Sciences, and worked there till 1989. He gave lectures at the University of Budapest from 1975. In the position of reader in 1990, he established the Cultural Anthropology Department and gave lectures there until his retirement. He was President of the Hungarian Cultural Anthropological Society and the Brazilian-Hungarian Social Club. He organized a number of anthropological research trips to Latin America to study, among others, the Nambikuara Indians (1959), the Piaroa Tribe (1967-68, 1974), and the Wayana Indians between 1991 and 1997. The results of his investigations were published in several books: *Amongst Tropical Indians (Tropusi indiánok között)*; *Wahari; Myth and Culture (Mitosz és kultúra)*. There are several hundred recordings of sounds and voices and several thousand photographs; as well, a number of documentary films make up his archives. From 1962 he prepared several documentary films: *Woman Carnival (Asszonyfarsang)*, *Tub ship (Bödönhajó)*, and in 1997 he prepared the film *Hungarians in Brazil (Magyarok Braziliában)*. He was a recipient the Soros Foundation Prize in 1999. – B: 0874, 1636; T: 7456.

**Boglári, Zoltán** → **Hungarian Missionary in Swaziland.**

**Bognár, József** (Joseph) (Szombathely, 5 February 1917 - Budapest ?, 3 November 1996) – Economist, politician. After 1945 he was a Smallholders' Party (*Kisgazda Párt*) politician. In 1948 he became Acting President of the Smallholders' Party. He was Minister of Information (1946-1947), Minister of Trade (1949-1956), and Deputy Prime Minister (October-November, 1956). From 1954 he taught at the University of Economics. In 1956 he was Deputy Prime Minister. During the years 1957 -1961, he was Dean of the University of Economics, Budapest. From 1961 he was President of the Institute of Cultural Relations, later Chief Director of the Economic Research Institute of the Hungarian Academy of Sciences, and director of the World Economic Research Institution. Between 1957 and 1990 he was President of the World Federation of Hungarians (*Magyarok Világszövetsége*). He organized the István Dobi Circle in the

1980s, where former Smallholders' Party politicians met secretly. He was regular member of the Hungarian Academy of Sciences. His books include *New Forces and Currents in the International Economy* (1975); *The Perspectives of our Relations with the Developing Countries* (1968); *The Global Problems in an Interdependent World* (1984), and *Europe, the Link between East-West, North and South* (1987). – B: 1122, T: 7103. → **Dobi, István; World Federation of Hungarians.**

**Bogomils** – A heretical movement that originated in the Middle East, was active in the 10-12th centuries, and can be found today in Bulgaria, and the northern regions of the Balkan Peninsula. The movement also became popular in some regions of the Holy Roman Empire. They explained occurrences and incidents in nature as manifestations of the struggle between God's two sons, Good and Evil. They regarded the social order and other institutions of the time as the work of Satan. In the 13th century their center was in Bosnia, and their teachings reached the southern parts of Hungary. Among the Hungarian kings Lajos I (Louis the Great), Zsigmond (Sigismund of Luxembourg) and Mátyás I (Matthias Corvinus) fought against them. – B: 1386, T: 3240.

**Bohemia, Hungarian Minority in** (Bohemia is now part of the Czech Republic) - A Czech Government Decree (Beneš Decree) in 1945 labelled all Germans and Hungarians as "collective war criminals" and wanted to expel about 650,000 native Hungarians from former Northern Hungary (*Felvidék*, now Slovakia) in the spring of 1945; but the Treaty of Potsdam prevented this. However, as a consequence of the Beneš Decrees, the Czechoslovak Government stripped all Hungarians of their citizenship and jobs, confiscated their houses, their tools, their lands, their livelihoods, and seniors lost their pension. Their displacement to farmland in Western Bohemia followed. They were moved to replace the expelled 3.5 million Germans originally of Sudetenland. About 12,000 Hungarians were moved in the first wave. The second wave counted about 32,000. It was a brutal wintertime maneuver. The Hungarians were obliged to move mostly from areas – where they formed the majority – from their original homeland in the Kingdom of Hungary. The Czechoslovak Government wanted to project an image to the Allied Powers that their Hungarian minority in Northern Hungary is similar in numbers to the 100,000 Slovak minority in truncated Hungary. Knowing the real numbers, the Hungarian Government did not want a population exchange and at the same time the Slovakian minority in Hungary was also reluctant to move to Slovakia. In turn, the Czech administration brought new regulations against the Hungarian minority. In view of all this, the Hungarian Government felt obliged to displace some of the Slovak population living in Hungary. That provoked a major Czech propaganda campaign and the repatriation of a limited number of Slovaks, while 100,000 Hungarians from the former Northern Hungary were expelled into the present truncated Hungary. Responding to international pressure, the Czechoslovak Government finally re-established the civil rights to their persecuted Hungarian minority. This was followed by the return of many older Hungarians into the former Northern part of Hungary. Lacking private financial support, the rest of the Hungarian minority stayed in the Czech mining region in Bohemia and was at the mercy of the authorities. Today, their descendants form the remaining local Hungarian minority. – B: 1219, 1020. T: 3240. → **Beneš Decrees; Czechoslovakia, Hungarians in; Trianon Peace Treaty; Paris Peace Treaty.**

**Böhm, Károly** (Charles) (Besztercebánya now Banská Bystrica, Slovakia, 17 September

1846 - Kolozsvár, now Cluj-Napoca, Romania, 18 May 1911, buried at his birthplace) – Philosopher. He was born into a Lutheran family. His father was a blacksmith, who was also healing animals. Educated at his birthplace and at Pozsony (Bratislava, now Slovakia), he was a student of Divinity at the Theological Faculty in Pozsony between 1865 and 1867. He continued his studies in Göttingen (1867-1869) and in Tübingen (1869), Germany. Then he chose Philosophy as his vocation under the influence of the most renowned philosophers of his age. Returning home in 1870, he was employed as a teacher in Pozsony, where he taught both in the High School and at the Theological Academy. Later he worked at the Fásor Lutheran Gymnasium in Budapest from 1873 to 1896. Then, in March 1896, he was appointed to the University of Kolozsvár, where he worked until his death as Head of the Philosophy Department; but also gave lectures at the Teachers' Training College. During the years in Budapest he was the Editor for the *Leipzig Philosophische Monatschrift* (1876-1878); then he started and edited the first Hungarian journal on philosophy: *Hungarian Philosophical Review (Magyar Philosophiai Szemle)* (1882-1885). He also took part in preparing the educational reform of 1882-1891.

Böhm created the first Hungarian system of philosophy and founded the “Kolozsvár School of Philosophy”. His philosophical system is treated in his work *Man and his World vols. i-vi (Ember és világa I-VI)*, the center of his rich lifework. In his lifetime the following volumes of his system were published: *Dialectics (Dialektika)* (1883); *The Life of the Spirit (A Szellem élete)* (1892), and *Axiology (Axiológia)* (1908). The other volumes: *The Value-doctrine of Logic (A logika értéktana)* (1912); *The Theory of Moral Value (Az erkölcsi érték tana)* (1928); *The Theory of Ethical Value (Az etikai érték tana)* (1942) were published by György (George) Bartók Jr.

Böhm was a philosopher of subjectivism from the theoretical point of view. In his *Dialectics*, Böhm defined his fundamental conception of “*öntét*” (*State of Self – the World which exists inside the subject*) by reconciling Kant’s and Comte’s theses by specially adjusting Kant’s ideas. Two mechanisms can be identified in the subject: the world given in the form of an image and its cognition. In *The Life of the Spirit* he analyses the result of cognition, knowledge through the philosophy of Spirit. In his *Axiology* the fundamental idea is the “projection” (*Fichte*) instead of “*öntét*”, and the two worlds are the ontology (the world of “being”) and the deontology (the world of “must” – the world of values). The new program forms the basis of Böhm’s axiology (the theory of absolute, logical, moral and ethical value), the elaboration of which is his most important heritage. His philosophy had a strong influence primarily on the members of the “Kolozsvár School of Philosophy”: György (George) Bartók Jr., László (Ladislav) Ravasz, Sándor (Alexander) Tavaszy, Sándor Makkai, Béla Tankó, Béla Varga. Böhm’s influence could be felt through their lifeworks up to 1945. In 1896 he received an Honorary Doctorat and was a member of the Hungarian Academy of Sciences, (correspondent 1896, regular in 1908). – B: 1254, T: 7689.→**Bartók, György Jr., Ravasz, László, Tavaszy, Sándor, Makkai, Sándor, Tankó, Béla; Horkay, László.**

**Böhm, Vilmos** (William) (Budapest, 6 January 1880 - Stockholm, Sweden, 28 October 1949) – Politician. He trained as a typewriter mechanic and completed his high school studies privately. His political career started in the early trade union movement. From 1913 to 1919 he was one of the leaders of the Social Democratic Party. In October of 1918 he became Undersecretary in the Ministry of Defense responsible for demobilization of the army in the Károlyi cabinet. From July 1919 he was Minister of Defense in the Berinkey Cabinet. During the Council (Soviet) Republic he was Military Commissar and Commander-in-Chief of the Hungarian Red Army. Later he was Ambassador to Vienna and negotiated with the Entente

representatives the overthrow of the Council (Soviet) Republic. He remained in Vienna and worked in a department store. Between 1934 and 1938 he lived in Czechoslovakia; later moved to Sweden and worked as press-reporter at the English Embassy in Stockholm. He returned to Hungary after 1945 and joined the right wing of the Social Democratic Party. From 1946 he was Ambassador of Hungary at Stockholm, Sweden, and did not return to Hungary. His books are: *Hungarian Social Politics (Magyar szociálpolitika)* (1918); *Wartime Sins (A háborús korszak bűnei)* (1919); *The Origin and the Collapse of the Hungarian Council (Soviet) Republic (A Magyar Tanácsköztársaság keletkezése és összeomlása)* (1920); *Between the Fire of Two Revolutions (Két forradalom tüzeiben)* (1923), and *The Great Tragedy (A nagy tragédia)* (1933). – B: 0883, 1031, 1122, T: 7103.→**Council (Soviet) Republic of Hungary.**

**Bojta** (Vajta) – He was a 9th century Cumenian (Kabar) chieftain who, with his tribe, joined Árpád south of Kiev (then Poland). According to the 12th century Chronicler, Anonymus, Bojta defeated Glád in collaboration with Zoárd and Kadocsa, and with the help of Ete, he occupied Baranyavár. He settled in the area of Sárvíz. His memory lives on in the name of the village Vajta. – B: 0942, T: 7668.→**Cumenians; Kabars; Anonymus.**

**Böjte, Csaba O.F.M.** (Kolozsvár, now Cluj-Napoca, Transylvania, now in Romania, 24 January 1959 - ) – Franciscan priest. He was an auto-electric mechanic and a miner. He secretly entered the Franciscan Order in 1982, during the oppressive Communist regime of Ceausescu, and studied Theology at the Catholic Theological Academy at Gyulafehérvár (now Alba Iulia, Romania) and in Esztergom, Hungary, and was ordained in 1989. He was Parish Priest in Szik (now Sic), Dész (now Dej), Marosvásárhely (now Targu-Mures) and Déva (now Deva). He was the “Definitor”, i.e. supervisor of ecclesiastical property for the Franciscan Province of Transylvania. In 1992 he founded the Franciscan Mission at Déva (*Dévai Ferences Misszió*) for destitute children. It has a school with some 400 students. The school provides education for the children in their own language, including religion and ethics. The Mission now runs seven centers for children in Transylvania, including a Kindergarten at Szászvár (now Orastie), and a school at Csángóföld in Moldavia, Romania. For the time being, more than 700 children are under the care of Böjte’s growing Mission. His mission work and the circle of supporters are growing. He is the founder of the St. Francis Foundation of Déva. His books include *I Believe in the Final Victory of Love (Hiszek a szeretet végső*

győzelmében!) (2005); *With God from Nothing Toward the Infinite (Istennel a semmiből a végtelen felé)* (2006); *Window unto the Infinite... (Ablak a végtelenre...)* (2009); *Road into the Infinite... (Út a végtelenbe...)* (2010), and *Compass to the Infinite... (Iránytű a végtelenhez...)* (2011). His numerous distinction include the Man of the Year Prize (2004), Aphelandra Prize (2005), Man of the Patria Prize (2008), Middle Cross of Merit of the Republic of Hungary (2010), and the Civi Europaeo Praemium (2011). – B: 0875, 1031, T: 7103.→**Catholic Church in Romania; Csángós; Gypsies.**

**Bóka, László** (Ladislav) (Budapest, 19 July 1910 - Budapest, 1 November 1964) – Writer, literary historian. He received his Teacher's qualification in Hungarian, German and French Literature from University of Budapest, and until 1945, worked as a librarian. He participated in the Hungarian Resistance Movement during World War II. He served in the army at several different times from 1938 on. From April 1947 to August 1950 he was Administrative Under-Secretary of State at the Ministry of Education, then Professor and Head of the Department of History of 20th Century Hungarian Literature at the Faculty of Arts of Budapest University. From 1930 on he wrote for a number of journals and publishers, among them the Publisher *Athenaeum*, and Journals *Hungarian Star (Magyar Csillag)*, *West (Nyugat)*. In his writings he fought for and defended the progressive cultural life. He also wrote about education and child rearing, and on various problems of literary life. In addition to his scientific activity, he wrote a number of novels. For the third generation of the literary review publication *West (Nyugat)*, he was an important verse and prose-writer with an individualistic style. His works include *Ice World (Jégvilág)*, poems (1944); *The New is Nicer (Szebb az új)* poems (1950); *The Carolingian Throne (A karoling trón)* novel (1960), and *Nandu, vols. i.ii*, novel (1963). He carried out some important research studies as well. He was a corresponding member of the Hungarian Academy of Sciences (1953) and was awarded the Attila József Prize (1960). – B: 0883, 0878, 1257, T: 7456.

**Bókai, János (1)** (John) (Pest, 19 April 1858 - Budapest, 6 June 1937) – Pediatrician. He received his Medical Degree in 1880; from 1883 became Chief-of-Staff of the Stefánia Children's Hospital, Budapest; from 1907 to 1929, he was Professor at the Medical School of the University of Budapest. He made pediatrics compulsory examination for medical students. He introduced the incubation method and serum treatment for healing diphtheria. He established the interdependency between *varicella* (chicken-pox) and *herpes zoster* (shingles) illnesses. He helped establish the pathology of *poliomyelitis* (Heine-Medin disease, infantile paralysis). He wrote an excellent pediatric textbook (1912). He was a member of the Editorial Committee for the German medical journal *Jahrbuch für Kinderheilkunde (Yearbook of Pediatrics)*. He was a member of the Hungarian Academy of Sciences (1923). – B: 0931, T: 7103.

**Bókai, János (2)** (John) (Jónás, Tóbiás Bock) (Igló, now Spišská Nová Ves, Slovakia, 17 May 1822 - Budapest, 20 October 1888) – Pediatrician. He was born in the Cipszer (Ethnic-German) region of the Norther Hungary (*Felvidék*, now Slovakia). In May of 1849 he changed his name to Bókai in sympathy of the Hungarian War of Independence. He first studied Law at the Reformed College of Sárospatak; but he abandoned his legal studies and took on medicine at the Medical School of Pest and at the University of Vienna. He obtained his MD from the University of Pest in 1847. His circle of friends included the poet Sándor (Alexander) Petőfi and novelist Mór (Maurice) Jókai. His first

appointment was at the Hospital of Ágoston Schöpf-Mérei, where he specialized in pediatrics. In 1852 he was appointed Head of the Poor Children's Hospital of Pest. After the 1867 Compromise with Austria, he became a member of the National Public Health Council. In 1882 he helped establishing the 144-bed Stefánia Children's Hospital in Budapest. He became involved in teaching at the Medical School and published in medical journals. B: 1419, T: 7103.→**Schöpf-Mérei, Ágoston; Petőfi, Sándor; Jókai, Mór; Cipszers.**

**Bokály** – Name of a pear-shaped ceramic jug, mostly glazed, with a wide outward flaring mouth (without beak or lip), a loop handle, and a slightly out-flaring foot. The term most probably derived either from the German *pokal*, or the Italian *bocal*, or perhaps the Turkish *bakal*, and came into general use in Hungary around the late 16th to early 17th centuries. Its earliest documented appearance is in 1585. At that time the word had a broader meaning. It denoted not only jugs but cups, ewers, even wall tiles and stoves, all tin-glazed, and was almost exclusively made by the Habans in western or northern Hungary and also in Transylvania (*Erdély*, now in Romania). The *bokály* shape became very popular in the late 18th and the 19th centuries. Outstanding among them are the *bokály*s produced by the Transylvanian Saxon potters, decorated with graffito designs on a dark blue glaze. – B: 1134, T: 7654.→**Habans.**

**Bolberitz, Pál** (Paul) (Budapest, 15 September 1941 - ) – Roman Catholic priest, theologian, philosopher. He matriculated at the Ferenc Toldy High School, Budapest in 1959. He wanted to become a priest; but it was not approved by the State. He worked first as an antique dealer, then as a car mechanic. In 1961 he enrolled at the Seminary of Esztergom and was ordained in 1966. He was Chaplain in Szentendre, then at Pestszentimre (1968-1973), later Professor at the Seminary of Esztergom (1973-1978). In the meantime he studied Philosophy at the Gregorian University, Rome (1974). He became Professor of Philosophy and Dean at the Theological Academy of Budapest (1978-1993), Dean of the Theological Faculty of the Roman Catholic University (1994 – 1996), ecclesiastical judge (1976), titular abbot (1988), papal prelate (1988), President of the Hungarian Kolping Alliance, and Master Chaplain of the Sovereign Order of Saint John of Jerusalem, Knights of Malta, as well as a member of the Editorial Board of the periodical *New Hungary* (*Új Magyarország*). His articles and essays are published in the periodicals *Teologia*, *Vigilia*, *New Man* (*Új Ember*). His books include *Hope and Future* (*Reménység és jövő*) (1972); *God, Man, Religion in the Mirror of Christian Philosophical Thinking* (*Isten, Ember, Vallás a keresztény filozófiai gondolkodás tükrében*) (1981); *Existence and Cosmos* (*Lét és kozmosz*) (1985); *The Theology and Philosophy of Saint Thomas Aquinas* (*Aquinói Szent Tamás filozófiája és teológiája*) with Ferenc Gál (1987); *God in Philosophy* (*Isten a filozófiában*) (1991); *Introduction to Logic* (*Bevezetés a logikába*) (1998), and *The Foundations of Metaphysics* (*A metafizika alapjai*) (2000). He is a recipient of the Vilmos Fraknói Prize, the Széchenyi Prize, and the Middle Cross of Order of Merit with Star of the Republic of Hungary. – B: 0874, 0973, 0944, 1257, T: 7103.→**Catholic Church in Hungary.**

**Bölcskei, Gusztáv** (Gustavus) (Szamoskér 30 July 1952 - ) – Bishop of the Transtibiscan Reformed Church District, Debrecen, theologian. Born into a Reformed Minister's family, he completed his High School at the Reformed College of Debrecen. He studied Theology at the Reformed Theological Academy of Debrecen (1971-1976), later at the

University of Tübingen (1977-1978), obtaining a Ph.D. in Theology. He was Assistant Minister at Téglás and Hajdúhadháza (1978-1984). From 1984 he started to teach at the High School of the Debrecen Reformed College. From 1979 he was also a tutor in Theology at the Debrecen Reformed Academy. He was Director of the Reformed College, Debrecen (1979), Professor of Ethics and Sociology at the Theological Academy, Debrecen (1988), and Professor and Chair of Department (1990). In 1996 he was elected Bishop of the Transtibiscan Reformed Church District (*Tiszántúli Református Egyházkerület*). He is the current Clerical President of the General Synod of the Reformed Church in Hungary. His field of research is Church History, Systematic Theology, and Social Ethics. He participates in the work of the *Collegium Doctorum's* program of the Reformed Church, and is Chair of its Social Ethics section. Böleskei is Executive Committee Member of the World Communion of Reformed Churches, former president of WCRC Europe, and a professor of church sociology at Debrecen Reformed Theological University. He is a presidium member of the European *Societas Ethica*. He has been guest of a number of international conferences. His articles appear in church papers and journals in Hungary and abroad. His works include *At the Light of the Word (Az Ige fényénél)*, with others, selected sermons at the Great Church of Debrecen (Debrecen, 1992); *The Social Question in Theology and the Church – Then and Now (A szociális kérdés a teológiában és az egyházban – akkor és ma)* in *Confessio* 1997/2: 36-40; *The History of the Reformed Church in Hungary 1918-1990 (A Magyarországi Református Egyház története 1918-1990)*, studies (Sárospatak, 1999: 155-172); *In the Footsteps of Christ... (Krisztus követésében...)* in Elemér Sulyok, Mátyás Varga (eds.); *Encounters (Találkozások)* – at the Birthday of Archabbot Asztrik Várszegi (Pannonhalma, 2006. 195-202). His awards include: honorary doctorates from the University of Kolozsvár (now Cluj-Napoca, Romania) (2003), and from the Evangelical-Lutheran Theological University of Budapest (2005). – B: 0874, 1031, 1334, T: 7103, 7456. → **Reformed College of Debrecen; Reformed Church in Hungary.**

**Boldizsár, Iván** (until 1934 Betlen) (Budapest, 30 October 1912 - Budapest, 22 December 1988) – Writer, journalist, literary translator, diplomat. He studied at the Medical School and the Faculty of Arts of the University of Budapest. In 1932 he was a contributor for the journals *Anonym Notar (Névtelen Jegyző)*, the *New Generation (Új Nemzedék)* and the *National Journal (Nemzeti Újság)*. In 1936 he worked for the Cserépfalvy Publishers, and from 1938 he was Editor for the *Pester Lloyd*. In World War II he was a POW in Russia. After returning home he was Editor-in-Chief for the newspaper *Free Word (Szabad Szó)*, then of the *New Hungary (Új Magyarország)*. He was a member of the Hungarian Delegation to the Paris Peace Conference in 1947 that led to a Treaty that truncated Historic Hungary again. After being Undersecretary of the Ministry of Foreign Affairs from 1951 to 1959, he worked for various newspapers, including the *Hungarian Nation (Magyar Nemzet)*, *Monday Newspaper (Hétői Hírlap)* and as Editor-in-Chief for the Hungarian International Pen Club. His works include *Tiborc* (1938); *Winter Duel (Téli párbaj)* (1949); *The Philosopher Lion (A filozofus oroszlán)* (1971); *My Deaths (Halálaim)* (1974); *The School of Fear (A félelem iskolája)* (1977); *The Walking Statue (A sétáló szobor)* (1978), and *To Live Forever (Örökké élni)* (1979). He translated works from German and French. With his pen he mainly served the reigning regime. He received a number of prizes including the Hungarian Liberty Order Silver Class (1947), the Attila József Prize (1970), the State Prize of Hungary (1975) and

the Banner Order of the Peoples' Republic of Hungary (1982). – B: 0884, 0878, 1257, T: 7103.→**Paris Peace Treaty.**

**Boldogasszony**→**Madonna, the Great.**

**Boldogkővár** – Fortress, presumably built after the Mongol-Tartar invasion (1241-1242), first mentioned in a 1282 document. Its original name was *Castrum Boldua*. It guarded the road to Kassa (now Kosice, Slovakia) and the valley of the Hernád River. The fortress exchanged hands many times. During the Ottoman-Turkish occupation of Hungary (1526-1686) it served as ransome for Pasha Achmet. The Drugeth family expanded the old castle. It was renovated in Gothic style towards the end of the 19th century. Its historical exploration took place between 1963 and 1964, when furnaces carved into the rock were found, which proved it to be the oldest site of bronze manufacturing in the Carpathian Basin. Now there is a tourist hotel in the restored wing of the castle. – B: 1205, T: 7103.→**Mongol-Tartar Invasion; Turkish Rule in Hungary.**

**Boldva, Reformed Church** – A twin-steepled church originally built by the Benedictine Order, located in the center of the village Boldva. The first document about the church dates from 1203. There was a monastery beside the church, where the *Funeral Oration and Prayer (Halotti Beszéd és Könyörgés)* was written in the early part of the 14th century. There are some notes in the *Pray Codex* (liturgy book) from 1203: “*monasterium S. Johannis B. comburitur iuxta Bolduam*”. According to the records, the original monastery by the River Boldva, dedicated to John the Baptist, burned down. The last document about the monastery dates from 1270. Supposedly it was destroyed by the second Tartar-Mongolian invasion in 1285. The church was rebuilt in the 14th century. Later, the round foundation of the Gothic church with the contemporary St. Margaret Chapel was also found. It was one of the largest round churches in Hungary, built about 1175-1180. – B: 1153, T: 7663.→**Funeral Oration and Prayer; Pray Codex.**

**Bolgár, György** (George) (Budapest, 15 July 1946 - ) – Journalist, writer, poet. He studied at the University of Economics, Budapest (1964-1968). Till 1988 he worked at the news department of Hungarian Radio; from 1983 to 1987 he was also Program Director. In 1988-1992 he was a radio reporter in New York. In 1994-1995 he was Manager for the Helikon Publisher, Budapest; from 1995 Manager of the Radio Program *Let Us Discuss It (Beszéljük meg)*. From 1971 his poems and short stories appeared regularly; and from 1978 his articles appeared in the literary review *Life and Literature (Élet és Irodalom)*, and in the magazine *New Mirror (Új Tükör)*. Since 1997 he has been Administrator of the *Public Club (Nyilvánosság Klub)*. Since 2000 he is a member of the presidium of the *Association of Hungarian Journalists (Magyar Újságírók Szövetsége)*. He is a popular writer in liberal circles. His works include *Letter Secrets (Levéltitkok)* poems (1981); *Sometimes-diary (Néhanapló)* short stories (1983); *Death of the Deed (A tett halála)* short novel (1987); *New York Times Story (New York Times történet)* (1994), and *The Desire (A vágy)*, novel (2003). He received several prizes, including the Free Press Prize (2000). – B: 0874, 0878, 1257, T: 7103, 7456.

**Bolivia, Hungarians in** – In the 1920s a few hundred Hungarians settled in the city of La Paz and its environs. They sent a delegation to the World Congress of Hungarians held in Budapest in 1938. According to the 1961 estimate, about 150 Hungarians lived in Bolivia. Around the turn of the millennium their number barely changed. – B: 1104,

1020, T: 3240.

**Bologna, Runic Staff Calendar** – One of the most important, authentic and largest relic of a medieval Szekler calendar containing more than 200 words. It is a valuable cultural treasure of the first order. Count Luigi Ferdinando Marsigli of Bologna, a military engineer in Austrian service, found the wooden staff or stick while working in Transylvania (*Erdély*, now in Romania) in 1690. He made an exact copy of it. In his opinion the calendar originated at the time when the Szeklers were converted to Christianity. It shows the celebratory days of baptismal names, personal and geographical names connected with the life of Jesus, and simple Biblical notes in an abbreviated system that follows the rules of the Hungarian language that are still the rules of Hungarian stenography. The first Hungarian to study it was ethnographer Gyula (Julius) Sebestyén. Judging by its language, he dated it to the time of the Árpád Dynasty (11th to 14th centuries). Later, Dezső (Desider) Csallány and Sándor (Alexander) Forrai examined the calendar. Forrai concluded that the stick could have been 150 cm long and 2 cm thick with runes on all four sides. He succeeded in preparing a copy of the stick. Forrai kept the copy; however, the original was lost. Transliterating the text of the calendar reveals 914 runic symbols in all. Of these, the number of larger symbols representing written characters number 671, while the balance of 243 appears to represent numbers. There are 46 ligatures or abbreviations with 103 vocal sounds amounting to a space-saving of some 38%. The stick would have been about half a meter longer had the runic writer not applied abbreviations. The first and the third sides of the stick record the popular holidays of the year to New Year's Eve (*Kiskarácsony*). The second side exhibits personal and geographical names connected with the life of Jesus, while on the fourth side are miscellaneous Biblical notes and the alphabet. The word *Ten*, the ancient root of the Hungarian word *Isten* (God) appears on the fourth side. This runic relic represents in written form antique vocal collocations that have no equivalent in Latin contemporary writings in the Latin alphabet system. – B: 1174, 1020, T: 7669. → **Hungarian Runic Script; Sebestyén, Gyula; Csallány, Dezső; Forrai, Sándor.**

**Bölöni Farkas, Sándor** (Alexander) (Bölön, now Belin Romania, 14 December 1795 - Kolozsvár, now Cluj-Napoca, Romania 3 February 1842) – Economics and political writer. In 1817 he worked as honorary notary at the Transylvanian Chancery. In 1830 he traveled in Western Europe; then in 1831, in North America. In his book *Travel in North America (Utazás Észak-Amerikában)* (1834) he described his experiences, winning thereby the Grand Prix of the Hungarian Academy of Sciences (1834). In 1833 he established the Kolozsvár Club, and in 1836 the weekly *Sunday Newspaper (Vasárnapi Újság)*. He organized reading circles for women and youth, and a Fencing School as well. He was elected secretary of the National Theater (*Nemzeti Színház*), Kolozsvár. Among his writings are *M.B.F.S. Memories (M.B.F.S. emlékiratai)* (1870); *Western European Travel (Nyugat-európai utazás)* (edited by E. Jancsó, 1943), and *At the Dawn of the New Transylvania (Az új Erdély hajnalán)* (edited by E. Jancsó, 1944). He was member of the Hungarian Academy of Sciences (1834). – B: 0883, 1257, T: 7103. → **Jancsó, Elemér.**

**Bolshevization Attempt of Hungary's Culture** – In 1948, schools came under direct state control, including all schools belonging to the churches. The evaluation system to grade student performance was altered to favor those who had the correct social status, i.e. their parents were “good cadres”. This meant that the parents were party members,

peasants, or factory workers. This policy lowered the quality of education and conflicted with the students' sense of justice by undermining their moral values. The children classified as "other" were not allowed to enter university, or even high school, during the worst period of Stalinism. Education became a tool in the class struggle. After 1948 the high quality of Hungarian education was debased by an emphasis on Communist ideology. At all places of work the day began with a compulsory study and discussion of the articles of the Communist Party's official paper, the *Free People (Szabad Nép)*. In this "Free People's half hour" everyone, from university professor to the army private, office workers and research scientist, had to recite what they read in the paper. Everyone was obliged to participate in the Party's or Trade Union's political courses to study the ideology of the Communist Party. In the literary and theater life the Communist Party was determined to create a "proletarian hegemony": in effect, a Soviet hegemony. In theaters the production of two famous Hungarian works, *The Tragedy of Man (Az Ember Tragédiája)* and *Bánk bán* were prohibited. The movie-theaters played mostly Soviet films. The suicides of two respected Hungarian actors: Gizi Bajor and Artur Somlay were a protest against the oppressive cultural policies of the regime that made Hungary a cultural colony of the Soviet Union. Third-rate Soviet writers, artists and scientists were sent to Hungary to instruct and lead their Hungarian counterparts in the emulation of the "superior" Soviet culture. Hungarian writers were obligated to produce works glorifying the Communist system and the Soviet way of life. The works of those unwilling to toe the party line could not be published. József (Joseph) Erdélyi, János (John) Kodolányi, László (Ladislav) Németh, István (Stephen) Sinka, Lőrinc (Lawrence) Szabó, Áron Tamási, Sándor (Alexander) Weöres, and other eminent writers withdrew into self-imposed intellectual quarantine. Their silence was only briefly tolerated and eventually they were forced to glorify the regime. Literary works full of clichés written in the tone of "socialist realism" that allowed only praises for the Communist system, flooded the book market. Copies of the Bible were only printed in drastically reduced numbers; at one time its printing was totally prohibited. The history of the Bolshevik Party of the Soviet Union and the works of Marx, Engels, Lenin and Stalin were published in Hungarian in great numbers, but despite the large numbers prescribed also for public libraries, most of them were shredded. – B: 1075, 1020, T: 7665. → **Bajor, Gizi; Somlay, Artur; Erdélyi, József; Kodolányi, János; Németh, László; Sinka, István; Szabó, Lőrinc; Tamási, Áron; Weöres, Sándor.**

**Bolvári, Antal** (Anthony Bolvary) (Kaposvár, 6 May 1932 - ) – Swimmer and waterpolo player. He was aged two, when his family moved to Budapest; he started to swim at 14. It was the swimming teacher and master, Imre (Emeric) Sárosi, who noted his special abilities and became his trainer. As a swimmer, in the College Group he won two silver medals (1951), whereupon the big clubs tried to register him; but finally he joined the *Honvéd* Club from 1951 till 1956. Later he became a member of the Vasas SC Club (1962-1963), Budapest Spartacus (1963-1964), Ferencváros (1964-1969), and was a member of the Hungarian waterpolo selected team (1955-1968). At the last minute he got into the Olympic pool, and at 20 he was able to go to the Summer Olympics in Helsinki in 1952, where his team won the Olympic Championships. The same team also won the 1956 Summer Olympic Championships in Melbourne, where they fought a great battle with the Soviet Russian team. Following this, he and his wife stayed in the West, returning to Hungary in 1961. He became a trainer, first with the junior selected team

(1971-1981), later with the adult selected team as well (1979-1981). He also won the European championship prize (1954) and was also twice Hungarian champion (1965, 1968), and was twice a cup-winning water-polo player (1965-1967). – B: 2115, T: 7456.

**Bolváry, Géza** (Budapest, 26 December 1897 - Rosenheim, West Germany 10 August 1961) – Stage manager. He completed his studies in the Ludovika Military Academy. As a professional soldier he fought in World War I. In 1919 he worked in Budapest as an extra in the film industry, but got some parts also as a screen actor. In the Star Film Studio he was a contract playwright, later becoming stage manager. Together with his wife, Ilona Mattyasovszky, he opened a film school. At the end of 1923, he was called first to Munich, later to Berlin. His talents blossomed around 1930, at the beginning of the sound-film era. He was then directing films in Vienna, Budapest and Germany. He permanently settled in the Federal Republic of Germany following World War II. He was a master of musicals, comedies and sentimental operettas. His greatest achievements were such feature films as *Lady with Two Faces* (*Kétarcú asszony*) (1920); and *Love at Spring* (*Tavaszi szerelem*) (1921). Among his movies directed abroad are the *Merry Ladies of Vienna* (*Bécsi víg asszonyok*) (1931); *Call Me and I Come* (*Hívjon és jövök*) (1933); *Opera Ball* (*Operabál*) (1936); *Destiny* (*Végzet*) (1940), and *Lonely Heart* (*Magányos szív*) (1955). – B: 1206, T: 7685.→**Ludovika Royal Hungarian Military Academy Mattyasovszky, Ilona; World War I.**

**Bolyai, Farkas** (Wolfgang) (Bolya, 9 February 1775 - Marosvásárhely, now Targu Mures, Romania, 20 November 1856) – Mathematician, the greatest in Hungary prior to his son. He was educated at the Reformed College of Nagyenyed (now Aiud, Romania) from 1781. He was extraordinarily talented. At the age of nine he was writing Latin poems; later on he was writing, reading and speaking eight languages; during one school vacation he memorized Homer's epic works in Greek; and at the age of ten, he was able to extract the cubic root of a 14-digit number by heart. At age twelve he was already a tutor. He was also interested in art and was an able amateur painter; for a while he did acting as well and tried his talents at drama writing. He furthered his education at Kolozsvár (now Cluj-Napoca, Romania), continuing it in Jena and Göttingen, Germany. At the latter place he had talks with fellow student Karl Friedrich Gauss that contributed to the development of his spheres of interest. In 1799 he went home on foot, got married, and ran a farm at Domald in Transylvania (*Erdély*, now in Romania). From 1804 he was lecturer at the Reformed College at Marosvásárhely, a position he held until his retirement. He was interested in applied technology and constructed a self-propelled vehicle. To supplement his meagre salary he made ovens, and worked in the forestry industry. During his long stay at Marosvásárhely as a lecturer, he wrote his main work in two volumes in Latin entitled: *Tentamen iuventutem studiosam in elementa matheseo... introducendi* (Attempt to Introduce Studious Youth into the Elements of Pure Mathematics) (1831-1832), dealing with a number of mathematical and geometrical problems, among them Euclid's Parallel Axiom. Particularly noteworthy are his arithmetical and geometrical ideas, as are those dealing with the foundations of the Theory of Sets, his observations on the convergence of infinite series, and his determination of a finite areal equality. He studied the basic principles of mathematics from novel points of view. In a number of fields, such as integration and the Theory of Sets, he set up principles of lasting value. He studied astronomy and pedagogy and tackled problems of technology as well. He made important studies of the so-called

Bolyai Stoves. He invented a number of heating and cooking stoves famed in Transylvania: these worked excellently not only for heating, but also for the ventilation of a room and could utilize the heat of waste gas. In the 1730s he constructed a cart-house (*szekérlak*). He even investigated the theory of music. – B: 0883, 1257, T: 7456.→**Bolyai, János.**

**Bolyai, János** (John) (Kolozsvár, now Cluj-Napoca, Romania, 15 December 1802 - Marosvásárhely, now Targu Mures, Romania, 17 January 1860) – Son of Farkas (Wolfgang) Bolyai, one of the most original mathematicians in history. His father directed his early education. His extraordinary capabilities became evident already in childhood. He studied at the Reformed College of Marosvásárhely at the age of 12, and by the age of 15 he completed his studies. In 1818, with the aid of his father's friends, he enrolled at the Academy of Military Engineering of Vienna where, at an early stage, he showed signs of extraordinary talent in mathematics and music. In 1823 he moved first to Temesvár (now Timișoara, Romania), then to Arad. While in Arad he suffered a bout of malaria and during his transfer to Lemberg (now Lviv, Ukraine), he contracted cholera. When he reached Olmütz, he suffered a concussion and was forced into retirement due to his poor health. In Marosvásárhely, as a result of his badly impaired nervous condition, he had some unfortunate altercation with his family, and as a result, moved to the small family estate at Domald, where he occupied himself with farm work. In his solitude at Domald, besides dealing with mathematical problems, he also formulated his philosophical views. Already at an earlier stage in his life he invented the basic idea of his geometrical theory; and on 3 November 1823, in a letter to his father, he wrote: "*From nothingness I created a new, different world*" ("*Semmiből egy új, más világot teremtettem*"). He boldly rejected the Euclidean Parallel Axiom based on a new, parallel axiom, in which he first outlined the hyperbolic geometry; then he elaborated the theory. This theory is connected to the general theory of relativity. The great significance of his work was not understood or appreciated by his contemporaries. In 1832 his world-famous work was added to his father's published work *Tentamen...* as an *Appendix*. Its title is *Scientiam Spatii* (The Science of Space). On 18 May 1849 he legally married Rozália Orbán; but on the return of the Habsburg power, his marriage was annulled because it was performed without the permission of the Imperial Cabinet. The collapse of the War of Independence in 1849, family problems and continual ill health was not easy on him. However, he was working on his utopian sociological *Doctrine of Salvation* (*Üdvtan*). In his mathematical study, *The Science of Space* (*A tér tudománya*), he succeeded to get as far as the realization of the inner connection between the physical gravitational field and the geometric field, as he wrote: "*...the gravitational force appears to be intimately and continuously connected with the product, reality and character of space*". Tibor Toró, professor of physics (1931-2010) wrote a 1000-word essay on this single quotation, thereby proving that Bolyai, with his recognition, determined the basis for the general theory of relativity prior to Albert Einstein. The Bolyai theory of non-Euclidean geometry is closely connected with the general theory of relativity in physics. According to the newest statistics, he was one of the ten greatest mathematicians of the world. – B: 0883, 1257, T: 7456.→**Bolyai, Farkas; Toró, Tibor (1).**

**Bolyai, János' Absolute Geometry** (non-Euclidean) – Up to modern times scientific geometry was based on the determinations, axioms and especially on the postulate, found in the beginning of Euclid's elements, which stated that two straight lines on the selfsame

plain always intersects each other, when a third straight line cutting them subtends the inner angles on one side, the sum of the angles being less than two right angles. János (John) Bolyai (1802-1860), independently from the Russian mathematician Lobachevsky, established an alternative system of geometry completely logical and watertight, at least the equal of the 2000-year old Euclidean System. In a paper written in 1823 Bolyai described a geometry in which several lines can pass through the point *P* without intersecting the line *L*. Thus, at the same time and independently of each other, a Hungarian and a Russian mathematician laid the foundations of absolute geometry. The great German mathematician, K. F. Gauss, as well as G.F.B. Riemann concurred with this fundamental finding. Einstein used this non-Euclidean (hyperbolic) geometry to develop his General Theory of Relativity. Bolyai's hyperbolic geometry, the non-Euclidean geometry, where the Parallel Axiom is not valid as demonstrated by János (John) Bolyai, thus heralding a new age for the history of geometry – B: 1078, T: 7456.→**Bolyai, János.**

**Bonfini, Antonio** (Antonius Bonfinius) (Patrignone, Italy, December 1427 or 1434 - Buda, ? July 1502) – Italian historiographer. Bonfini grew up as a humanist in his country of birth and reached the class of magister. He worked for rich families as tutor in Florence, Padua, Ferrara and Rome. From 1478 he taught at Recanta, where he had the opportunity to get acquainted with Beatrix of Aragon, who became the wife of King Mátyás I (Matthias Corvinus) of Hungary (1458-1490). Bonfini met with the future queen in Italy; and in 1486, he visited Beatrix at Buda and became her tutor. The king commissioned him to write the history of Hungary. Bonfini commenced the work, though he made several return trips to Italy. He continued the work even after the death of King Mátyás, in the reign of King Ulászló II (Wladislas, 1490-1516) who bestowed titles of Hungarian nobility on him and his sons. The four-volume work, written in Latin, is entitled *Rerum Hungaricarum Decades*. Originally it was meant to be only for King Mátyás's famous *Corvina* library; however, its copies were spreading and were popular in the Age. The work was translated into German and French and was widely read even in royal circles abroad. However, after 1515, it became almost forgotten, and only after 1541 did it evoke interest again and scholars began to search for its missing parts. The first probably complete edition was published by János (John) Zsámboki in Basel (1568). Much later, even in the 20th century, some fragments, long believed lost, turned up. The modern edition of the work was prepared on the basis of a copy found in Krakow in 1936. Bonfini's monumental work remained unsurpassed for several centuries. – B: 1031, 1150, 1257, T: 7456.→**Mátyás I, King; Ulászló II, King; Corvina; Istvánffy, Miklós; Zsámboki Codex.**

**Bonfire at Dawn** – Ceremonial bonfire on the second day of a wedding feast. It is composed of fast-burning materials in the middle of a courtyard, or somewhere in the village. It was called the “garden of dawn”. Every guest participated in lighting the fire. Sometimes they even danced around it, or the bride jumped over it. This was called “bride scorching”, and on occasions the best man jumped over the fire several times while holding onto the bride. The custom is still alive here and there in the northern parts of Hungary; but elsewhere this ceremonial dance is no more than a distant memory. – B: 1134, T: 3240.

**Bónyi, Adorján** (Hadrian) (Margitta, now Marghita, Romania, 12 December 1892 -

Budapest, 31 January 1967) – Writer. His higher studies were at the Law School of the University of Kolozsvár (now Cluj-Napoca, Romania) (1911-1915). From 1919 to 1944 he was contributor and literary editor at the *Pest Newspaper (Pesti Hírlap)*. Thereafter he worked at the *Little Newspaper (Kis Újság)* and at the *Interesting Newspaper (Érdekes Újság)*. He was a member of the Petőfi and the Kisfaludy Literary Societies. He usually featured the life of the Capital City. He was a prolific writer. His works include *Mirage (Délibáb)* novel (1918); *Bartered Life (Elcserélt élet)* novel (1920); *Blue Idol (Kék bálvány)* story (1931); *Four-in-hand (Négyesfogat)* novel (1942); *A Heart Stops (Egy szív megáll)* novel (1942), and *Vanishing Life (Tűnő élet)* novel (1947). He also wrote plays; some of them were made into films. – B: 0883, 1257, 1719, T: 7103.

**Böök, Fredrik** (1883 - 1961) – Swedish literary historian, university lecturer. He was one of the most multifaceted and prolific Swedish writers in recent times, and played an important part in the cultural life of Sweden. He also wrote some excellent essays on Swedish literature. As a great humanist and pro-Hungarian, he condemned the Peace Treaty of Versailles-Trianon (1920) that dismembered historic Hungary of the Carpathian Basin and the Hungarian nation. He toured the detached Hungarian territories and gave account of his experiences about the tragic fate of 3.5 million ethnic Hungarians, forced to live under foreign rule, in newspaper articles, as well as in his book *Resa till Ungern (Travel to Hungary)*. He wrote in 1931: “*If one wishes success in the fight of Hungarians to amend the peace treaty, then one does so not only because one sympathizes with a brave, unhappy people, but also because one is convinced that the amends which should be made to Hungary for the injustices inflicted on her is inseparably interdependent with saving Europe from chaos*”. – B: 1078, T: 7659. → **Trianon Peace Treaty**.

**Book Publishing In Hungary** – Monks and priests of the West brought to Hungary the first, mostly liturgical books after the conversion of the Hungarian tribes to Christianity in the 11th century. The majority of these books were lost in the Mongol-Tartar invasion of 1241-1242, as well as in subsequent wars. Only some 120 medieval codices survived. In the wake of the Turkish occupation, from 1526 to 1686, only half a percent of the illuminated manuscripts survived. Before medieval book publishing, Hungary was on equal footing with the rest of Europe. The library of King Mátyás I (Mathias Corvinus) (1458-1490) with its magnificent *Bibliotheca Corviniana* was second only to that of the Vatican Library. Today there are only 215 of them extant in 49 various libraries of the world. In 1472 András (Andreas) Hess, a monk, set up the first printing press in Hungary. It was the sixth in the world. The first book was the *Chronica Hungarorum*. With the spread of the Reformation, demands for books grew. In 1690, at the town of Vizsoly, the first complete Hungarian Protestant Bible was translated and published by the Reformed minister Gáspár Károli. It exercised a decisive impact upon the development and the spread of the Hungarian language and was instrumental for the survival of the Hungarian nation and its culture. From 1571 to 1600 some 605 titles were published. In the beginning the printers themselves were the publishers, a common practice in the 17th century. In the 17-18th centuries, as everywhere in Europe, authors published their own works, the printing and publishing expenses being defrayed by friends or patrons. Calendars, compendiums concerning agriculture, weather-conditions, household advices, stories and historical events were published beside ecclesiastical works. Books became cheaper; and even in village markets one could buy it for the price of one kg of beef. From the beginning of the 19th century, with the spread of literacy and national revival,

the demand for Hungarian books grew rapidly. Publishers such as Lample, Emrich, Wodianer and Trattner were active in publishing works of writers and poets, as well as dictionaries, encyclopedias, scholarly and technical books. To establish Hungarian publishing houses became only possible following the 1867 Compromise with Austria. The first publisher was the Athenaeum Co. followed by the Révai Brothers; then in 1873, the Franklin Society, in 1884 the Pallas Co., and soon a number of others emerged. Following the Communist takeover in 1948, the State gradually nationalized the publishing firms, printers and booksellers, and took over the publishing of books. In 1953 a Publishing Council was set up to synchronize publishing plans that later became the Publishing Directorate. Larger firms were organized for various fields of publishing, e.g. for children's and juvenile books, for technical books, for academic publication, for legal and economic subjects, for fiction and poetry, for ideology and textbooks, etc. Thereafter only politically inspected and approved books could be published in Hungary. Following the withdrawal of the Soviet occupying forces in 1991, several private publishers reappeared and resumed business in independent Hungary. In 2008 14,447 book titles were published in Hungary. – B: 1051, 1207, 1020, T: 7673. →**Károli, Gáspár.**

**Bor, Ambrus** (Ambrose) (János Lukács) (Gödöllő, 31 October 1921 - Budapest, 18 May 1995) – Writer, literary translator, publicist. He was born into an Armenian family. His secondary education was at the Premonstrian High School of Gödöllő. He read Political Science at the University of Budapest and earned a Law Degree and a Ph.D. in 1943. His lawyer father was jailed for political reasons by the Communist authorities, and died there. Bor was in the army as a conscript (1944-1946). Between 1947 and 1963 he was a statistician at sugar factories. His cultural career started in 1963 as an Editor-in-Chief for the book-advertising newspaper of the Hungarian Book Publishers Center. From 1969 to 1982 he was Editor and later Editor-in-Chief for the *Magvető Publishing Co.* in Budapest. In the meantime he was a contributor to the literary review *Life and Literature* (*Élet és Irodalom*) and to the daily *Hungarian Nation* (*Magyar Nemzet*). His works include *Glass Cabinet* (*Üvegszekrény*) short stories (1966); *Morion*, novel (1983, Swedish 1986); *The Violin from Meran* (*Merániai hegedű*) novel (1991), and *Eye* (*Szem*), selected short stories (1997). He translated 61 foreign literary works into Hungarian. He was awarded a number of prizes, among them the Attila József Prize (1981), The High-Standard Prize of the European Book Publishers (1988, 1991), and the Austrian Reward-Prize (1992). – B: 0878, 1256, 1257, T: 7103.

**Boráros, Imre** (Emeric) (Pozsony, now Bratislava, Slovakia, 28 February 1948 - ) – Actor. His higher studies were completed at the Theater Department of the Academy of Fine Arts, Pozsony. Between 1965 and 1971 he was member of the Hungarian Regional Theater (*Magyar Területi Színház – MATESZ*). In 1971-1972 he worked as a dancer and singer. From 1972 to 1977 he was a member of the *Thalia Stage*, Kassa (now Kosice, Slovakia), then from 1977 on member of the Komarno troupe. He became member of the CSEMADOK (Czechoslovakian Hungarian Social and Cultural Alliance) in 1965. Between 1977 and 1989 he was member of the Drama Federation of Slovakia, and from 1990 a member of the Czechoslovak Actors' Chamber. His major roles include Major in I. Örkény's *The Tóths* (*Tóték*) (1974); Vladimir Viszockij in P. Siposhegyi's *Before I Became a Star* (*Mielőtt csillag lettem*) (1988), and Péter Kádár in S. Márai's *Adventure* (*Kaland*) (1990). He also appeared in Hungarian and Slovakian feature films. In the 1960s and 1970s he was on stage with his own dancing and singing programs, such as *In*

*the Neck of the Hour Glass (Homokóra nyakában)*, and *From Prague to Cuba (Prágától Kubáig)*. Among his distinctions are: the Sylvanus Prize, the Best Performance Prize of Beyond the Border Hungarian Theaters Festival, the Silver Plaquette of the Merit of Order of Slovak Republic, and the Officer Cross of the Order of Merit of Republic of Hungary. – B: 1038, 1890, T: 7103.

**Borbándi, Gyula** (Julius) (Budapest, 24 September 1919 - ) – Writer, historian, literary historian, editor. He earned a Ph.D. in Political Science at the University of Budapest in 1942. From 1942 to 1945 he was in the army and became a prisoner of war in World War II. Between 1946 and 1948 he worked as district secretary in Budapest, and as city executive committee member of the National Peasant Party. He emigrated to Switzerland in 1949, and has lived in Munich from 1951. He worked for Radio Free Europe between 1951 and 1984; was Editor for the periodicals *Horizon (Látóhatár)*, then Editor-in-Chief for the *New Horizon (Új Látóhatár)* between 1953 and 1989. He was one of the literary organizers of the Hungarian exiles. His works include *Studies in the Hungarian Revolution*, edited with József (Joseph) Molnár (*Tanulmányok a magyar forradalomról*) (1966); *Der Ungarische Populismus* (1976); *The Hungarian Populist Movement (A Magyar népi mozgalom)* (1983); *A Biography of Hungarian Emigration (A magyar emigráció életrajza)* (1985); *Five-Hundred Miles (Ötszáz mérföld)* essays and notes, (1989); *Encyclopedia and Bibliography of Hungarian Literature in the West (Nyugati magyar irodalmi lexikon és bibliográfia)* (1992); *An Anthology of Hungarian Essayists in the West*, ed. (*A nyugati magyar esszéírók antológiája*) (1986); *An Anthology of Hungarian Study Writers in the West*, ed., (*Nyugati magyar tanulmányírók antológiája*) (1987); *Hungarians in the English Garden (Magyarok az Angolkertben)*, *A History of Radio Free Europe* (1996); *Emigration and Hungary 1985-1995 (Emigráció és Magyarország 1985-1995)* (1996); *Hungarian Political Careers 1938-1946 (Magyar politikai pályaképek 1938-1946)* (1997); *Twilight and Dawn (Alkony és derengés)* (1999); *We Didn't Live in Vain (Nem éltünk hiába)*, the story of a monthly (2000); *Populism and Populists (Népiség és népiek)* (2000); *Custody of Values (Értékörzés): Selected Writings (Válogatott írások)* (2001), and *Exiles (Emigránsok)*, literary and political portraits (2002). He was awarded the Middle Cross of the Order of Merit of the Republic of Hungary, the Gábor Bethlen Prize, the Széchenyi Prize, the Ethnic Minority Prize, and the Middle Cross of Order Merit with Star of the Republic of Hungary. – B: 0874, 0877, 0879, 1257, T: 7103.

**Borbás, Antal** (Anthony) (Szentes, 31 July 1889 - San Francisco, CA, USA, 1982) – Minister of the Reformed Church. He studied Theology at Kolozsvár (now Cluj-Napoca, Romania) 1913. After World War I he became an army chaplain and worked with Bishop Elemér (Elmer) Soltész. In World War II he served on the Russian front. He emigrated to the USA in 1950 and served in Detroit, Windsor ON, Canada, Bethlehem, Poughkeepsie and San Francisco in the US. – B: 0906, T: 7103. → **Soltész, Elemér.**

**Border Fortress Battles** – Battles fought at the forts of Hungary's last defense line from the middle of the 15th to the end of the 17th century. The entire nation fought an endless battle against the expanding Turkish Empire. The Turks were defeated at Nándorfehérvár (now Belgrade, Serbia) by János (John) Hunyadi in 1458; but the battles continued, although the Hungarian Kingdom easily repelled the Turkish attacks for the next 50 years. The forces of Suleyman I in 1526 at the Battle of Mohács finally defeated the

Hungarians and the Turks eventually occupied the central two thirds of Hungary, i.e. the Carpathian Basin. The center of Hungary along its temporary borders became a battlefield for the next 150 years. Fortifications changed hands several times. The rest of Hungary, except the Principality of Transylvania (*Erdély*, now in Romania), became part of the Habsburg Empire; and as more and more Hungarian soldiers died, the defense was taken over by soldiers employed by the Viennese Court. In this endless struggle a special form of cavalry evolved and later became known worldwide as *Hussars*: these mounted warriors could match the Turkish cavalry riding on magnificent Arabian stallions. Emperor Ferdinand I recognized their skills. The names of the Hungarian defenders became legendary. Among them are István (Stephen) Dobó, György (George) Szondy and Miklós (Nicholas) Zrinyi. They defended forts under their command with a handful of troops against the numerically superior Turkish forces. – B: 1208, 1020, T: 7656. → **Dobó, István; Szondy, György; Zrinyi, Count Miklós; Hunyadi, János.**

**Border Fortress System** – System of forts as last line of defense. There were two kinds. The first was built by the powerful Hungarian Kingdom against the Turks in the 15th century along the southern part of Historic Hungary, along the lower reaches of the Danube River, including the present Belgrade (Nándorfehérvár in Hungarian) and along the Száva and Dráva rivers (now in Croatia and Serbia). After the lost battle of Mohács against the Ottoman Turks in 1526, Hungary fell into three parts, thus a second defense system became necessary. It was established throughout the central part of Hungary and provided defense against further Turkish expansion. At the beginning of this era 40 fortresses with 10,000 soldiers, including infantry, cavalry and gunners withstood the Turks. This number grew to 200 forts and 150,000 soldiers until the end of the 17th century. Following the takeover of Buda from the Turks in 1686; and after the Turks were gradually expelled from Hungary, most of the soldiers were dismissed from the forts. They became the so-called “exiles” (*bújdosók*). They soon joined the insurgents of Count Imre Thököly and later the War of Liberation led by Prince Ferenc (Francis) Rákóczi II (1703-1711). To prevent future Hungarian uprisings the Austrians blew up most of the fortresses at the end of the 18th century. – B: 1138, 1020, T 7656. → **Thököly, Count Imre; Rákóczi II, Prince Ferenc.**

**Border Fortresses** – Forts forming the last line of defense of Hungary in the Carpathian Basin. The fort of Buda fell into Turkish hands in 1541. At about the same time the military leadership in Vienna decided to build a 300- km long and approximately 100-km wide defense perimeter in a southwest-northeast direction throughout Western Hungary from the northern tip of the Adriatic Sea to about the center of present-day Slovakia. The aim of this defense perimeter was to protect Vienna from the expanding Ottoman Empire. This plan included the fortification or building of about 200 forts; and for this project the Viennese leadership employed about 150 Italian engineers. At the beginning the forts were defended and maintained by Hungarian noblemen and soldiers, e.g. Count Miklós (Nicholas) Zrinyi; but as the decades of Turkish occupation increased, mercenaries paid by the Viennese Court defended more and more forts. Often their pay was neglected and these soldiers started to rob the population of the countryside. This activity created additional pressure on the people already been robbed and ravished by the Turks. Hundred-and-fifty years of this type of life completely devastated this part of Hungary, while countries to the West of this perimeter were able to progress. At the beginning of the “Turkish menace” Hungary’s population was 4 million, the same as that of England

or France at the time; at the end of this period only 2 million inhabitants remained in the devastated country. Nevertheless, this period provided a significant impact on the military history of Europe and influenced the cultural history of Hungary. – B: 1138, T: 7656→**Zrinyi, Count Miklós; Border Fortress System.**

**Border Patrol Territories** (*Határőrvidék*) – From the 16th to the 19th centuries the southern part of Historic Hungary (Southland, now Croatia and part of Serbia) designated as a protective border zone against the Turkish invasions. The area was placed directly under the Viennese Ministry of Defense. After the withdrawal of the Turkish forces, Croats and Balkan Slavs settled in this area and received a separate constitution from the Hungarians in 1849 through Vienna. By maintaining this situation until 1871, the Austrian authorities effectively hindered the Hungarian settlements and influence in this zone. – B: 1138, 1153, 1231, T: 7656.→**Neoaquistica Commissio; Atrocities against Hungarians.**

**Borderland** – After the years 896-900 the settlement in the Carpathian Basin by the Magyars was completed, and an uninhabited zone was established along the western border for defensive purposes. It was called “*gyepű*”. The line was drawn from the present-day city of Moson through Kapuvár and Sárvár, down to Vasvár. The western limit of the *gyepű* was the actual fortified border of the country with established crossing points. Certain clans or tribes were settled nearby to maintain and defend the *gyepű*, while other tribes made treaties with the Hungarian-related tribes, such as the Kabars, Pechenegs and Szeklers. The border zone was patrolled and the entrance gates were securely guarded by the so-called “gate guards”. These border guards used their own weapons and sustained themselves without pay; but received all the privileges of the other free tribes. The King appointed their commander-in-chief, the head guard. In front of the *gyepű* inside the border stretched the ‘*gyepűelve*’, also an uninhabited strip of land. This way Hungary had a double, west-facing guarded border in the Middle Ages. Immediately behind the *gyepű* a chain of earth fortifications were erected in the 11th century, such as Csákány, Ikervár, Sárvár and Vasvár, a pattern common to all European countries of the time. During the 12th century this new line of defense slowly moved westwards. Some other forts were also erected in the region, such as the Benedictine cloister founded in 1157, which was transformed into a permanent fortification by King Béla III (1172-1196) to counterbalance the permanent forts of the united Austria and Steyr. After the Tartar-Mongol invasion of 1241-1242, a chain of forts built of stones became the backbone of the western defense system of Hungary. Border guards continued their duty even after the transformation; but their significance diminished with time. The Eastern and Southern Carpathians defended the eastern border of historic Hungary from 900 on with additional defense provided by the Szekler Magyars of Eastern Transylvania. – B: 1209, T: 3233.→**Gyepű; Pre-Borderland; Burgenland; Szeklers.**

**Bordy, Bella** (Gyula, 21 November 1909 - Budapest, 28 June 1978) – Ballet dancer, actress. She studied with Ede (Edward) Brada and Ferenc (Francis) Nádás. In 1931 she studied Music and Acting with Béla Both. She was in Paris on scholarship in 1935 and studied continuously with Lubov Egorova. Bordy was a member of the Budapest Opera House (*Operaház*) (1924-1965). She toured Western Europe several times. As guest star she appeared in the Operetta Theater (*Operett Színház*); and from 1940 to 1944 she acted

in dramas in the Madách Theater (*Madách Színház*). She appeared in several films between 1938 and 1961. After her retirement she trained actors and opera singers in Vienna and Zürich. She performed in some 25 classical and modern ballet title roles and appeared in more than 50 plays. Her major dance roles were *Matyó Bride* (*Matyó menyasszony*); *Hungarian Fantasies* (*Magyar ábrándok*); *Village Inn Scene* (*Csárdajelenet*); *Mayday in Pozsony* (*Pozsonyi majális*); *The Pitcher* (*A korsó*), and *Dreams of Love* (*Szerelmi álmok*). Her main roles were Örzsi in A. Szirmai's *Honey-cake* (*Mézeskalács*); Colette in M. Eisemann's *Peter Black* (*Fekete Péter*), and Mancsi in K. Komjáti's *Wedding at Ipafa* (*Ipafai lakodalom*). Her feature film roles include *Variety Stars* (*A varieté csillagai*); *Two Girls on the Street* (*Két lány az utcán*); *Old Tokay Wine* (*Tokaji aszú*); *Andrew* (*András*); *Your Loving Son Peter* (*Szerető fia Péter*); *Midnight Express* (*Éjféle gyors*) and *Mirage in All Quantities* (*Délibáb minden mennyiségben*). She received the Merited Artist title (1959). – B: 0883, 1445, T: 7103. → **Both, Béla.**

**Bori, Imre** (Emeric) (Bácsföldvár, now Backó Gradiste, Serbia, 28 December 1929 - Újvidék now Novi Sad, Serbia, 22 April 2004) – Hungarian poet, writer, critic, literary historian in Voivodina (Vajdaság, now Serbia). His secondary education was at the high schools of Nagybecskerek (now Zrenjanin), Becse (now Becej) and Zombor (now Sombor). His higher studies were at the Teachers' Training College, Újvidék, obtaining a Degree in Department of Hungarian Language and Literature from the Department of the University of Novi Sad. He was present at its foundation and worked there throughout his life as Professor and Head of Department. He was a tireless pioneer of Hungarian culture in Voivodina, editor of a number of newspapers, and researcher of the longstanding local Hungarian cultural heritage. His many faceted works include *Under the Sky of Vojvodina* (*Vajdasági ég alatt*), anthology of Hungarian poetry in Yugoslavia (1960); *Reed Pipe. 20th Century Hungarian Short Stories* (*Nádsíp, XX századi magyar novellák*) (1977); *Monographs*, such as *Gyula Krúdy* (1978), *Árpád G. Balázs*; *Ivo Andric* (1992), and *Trends in Hungarian Literature vols. i, ii, (A magyar irodalom irányai I, II)* (1985, 1989). He was a member of the Serbian Academy of Sciences, an external member of the Hungarian Academy of Sciences, and a member of the Pro Cultura Hungarica. He was a recipient of numerous prizes and awards, among them the Híd Literary Prize (1965), the Kornél Szenteleky Prize (1973), the Golden Medal of Labor (1995), and the Széchenyi Prize (2003). – B: 0877, 0878, 1257, T: 7103.

**Borica** – A men's dance of Moldavia's ethnic Hungarians, called "Csángós of the seven villages". In earlier times it was performed during the carnival period; but since 1870, only on Boxing Day. The dancers are decorated with colorful ribbons and with a rattle tied under their knees. Their shoes are fixed with rattling spurs and their costume is rounded out with a pickaxe and a sword carried over the shoulder. The four masked "mutes" (*kuka*) each have a cowbell attached to the waist, a wooden sword at the side, and a whip in the hand. The holder of the "tebe", a pine treetop adorned with golden fruits, leads the dancers. They go from house to house, frolicking in the courtyards. The *borica* is a round dance in four parts made up of repeated fixed steps for the first three parts, and a so-called fast Turkish dance to end it. During the dance the "mutes" clown around and try to steal something, for which the host would later pay a ransom. The decree of Vienna on 6 February 1785 banned the dance under grave punishment by the authorities; but it was ignored and the *borica* is still alive in the town of Pürkerec. Similar carnival motifs are also known in Western Hungary in the *Csallóköz* area (now Zitny

Ostov, Slovakia), and in the County Heves. This dance is part of the winter solstice festivities, having all the elements of the customary autumn sun burial, the rebirth of its former beauty, and the rites of the appropriate initiation. – B: 1134, T: 3240.→**Csángó; Csallóköz.**

**Bornemisza, Géza** (Nábrád, 4 February 1884 - Vác, 3 June 1966) – Painter. First, he studied at the *School of Design (Mintarajziskola)*, Budapest; but from 1902, he regularly attended the Nagybánya Artist Colony (now Baia Mare, Transylvania, in Romania) and studied painting with János (John) Thorma and Károly (Charles) Ferenczy. In 1908, he went to Paris and became a student at the Academy of Henri Matisse, where he got acquainted with the newest ideas in painting, and from then on he became their follower and advocate at Nagybánya. First he painted still-life and landscapes; but later worked in the post-Nagybánya style. In 1910, he joined Béla Iványi-Grünwald for a few years in Kecskemét, and participated in the founding of the Kecskemét Artist Colony. In 1924 he joined the New Society of Artists (*Képzőművészek Új Társasága – KÚT*). His works include *Still-Life (Csendélet)* (1909); *Village Scenery (Falusi tájkép)* (1911-1912); *A View to the Mountain (Kilátás a hegyre)* (1911-1912) and *Springtime on Gellért Hill (Tavaszi a Gellért hegyen)* (1930). In 1960, there was a retro exhibition of his works at the Ernst Museum, Budapest. His works are in private collections, in the National Gallery, Budapest, and in the József Katona Museum, Kecskemét. – B: 0934, 1031, T: 7103.→**Thorma, János; Ferenczy, Károly; Iványi-Grünwald, Béla; Perlrótt-Csaba, Vilmos; Nagybánya Artist Colony; Kecskemét Artist Colony.**

**Bornemisza, Péter** (Petrus Abstemius) (Pest, 22 February 1535 - Nádasfő, now Rohozník Slovakia, early 1584) – Lutheran superintendent and writer. He studied at Kassa (now Košice, Slovakia) (1548-1553); then from 1556, at the Universities of Padua, Wittenberg and Vienna. From 1559 he worked with the reformer and printer Gál Huszár as his student, deacon and printing assistant first at Magyaróvár, later at Kassa. During 1561-1563, he was a scribe at the Vienna Chancellery, then court preacher at the court of János (John) Balassa at Zólyom (now Zvolen, Slovakia) and tutor of the poet Bálint (Valentine) Balassi. It was here that he began writing his famous *Postils*, and where his religious polemics began with the Archbishop of Esztergom, Miklós (Nicholas) Telegdi. From 1569 he was preacher at the court of Julius Salm and Erzsébet (Elizabeth) Thurzó. During 1574-1578 he was superintendent of Csallóköz (now Zitnyostov, Slovakia) and Mátyusföld (now Mat'usvé zemé, Slovakia) districts. Finally, from 1579 on, he worked at Detrekő (now Plavecké Podhradie, Slovakia). His main publications are *Postils (Postillák)* in five volumes; the appendix of vol. iv is entitled *On the Satanic Ghosts (Az ördögi kisirtetekről)* (1579), which he wrote after the death of some family members, as well as various other misfortunes; *Songbook (Énekeskönyv)* (1582) and the so-called *Folio-postil (Foliopostilal)* (1584). – B: 1050, 1257, T: 7456.→**Huszár, Gál; Balassi, Bálint; Csallóköz, Mátyusföld.**

**Born, Ignác** (Ignatius) (Gyulafehérvár now Alba Iulia, Romania, 26 December 1742 - Vienna, 28 August 1791) – Mining researcher, metallurgist. He studied Philosophy and Arts at the College in Nagyszeben (now Sibiu, Romania). From 1755 he studied at the Jesuit secondary school of Vienna, became a member of the order; but left it in 1760. Later he went to Prague and earned a degree in Law. In 1768 he traveled throughout Europe, including Hungary, Germany, Holland, Belgium, France and Spain. During his

journey he acquired knowledge in mining and metallurgy. From 1770 he worked for the Office of Minting and Mining. He traveled the Hungarian mining regions, where he studied the situation of mining and metallurgy. He wrote 23 papers during this journey, published as a book in 1774, translated into English, French and Italian, which eventually became a university textbook. In 1776 Empress Maria Theresa invited him to Vienna to systematize and transcribe the Royal Natural Collection, and appointed him as the tutor to Princess Mary Anne; he was knighted in 1777. His invention of using amalgam with precious metals made him world famous. He conducted the laboratory experiments in Vienna, while the factory experiments took place at Skleno, close to Selmechánya (now Banská Štiavnica in Slovakia). To introduce his plant on 27th September 1786, he invited 27 experts from 8 countries. This occasion marked the first technical-scientific conference in the world. At this meeting he founded the *Mining Association (Societat der Bergbau-Kunde)*, the first international scientific society. In 1774 he established a Learned Society in Prague. In 1791, the Diet of Transylvania (*Erdély*, now in Romania) and of Pozsony (now Bratislava in Slovakia) elevated him to nobility. Among others, he was a member of Royal Society of London, the learned society of Göttingen and St. Petersburg. *Bornite*, a mineral (copper-iron-sulphide) was named after him to honor his work. – B: 1405, T: 1405, 7103.→**Bornite**.

**Bornite** – Peacock ore, a type of copper ore ( $\text{Cu}_5\text{FeS}_4$ ). It is a mineral of low specific gravity: 4.9-5.4. Its freshly broken surface is bronze-colored, but tarnishes rapidly to purple. It is a common and important primary and secondary sulfide mineral of copper and iron in numerous ore deposits (e.g. Cornwall, England and Arizona, USA). Its crystal system is cubic-hexoctahedral with 55% copper content. It was named after its discoverer: Ignác (Ignatius) Born. – B: 1137, T: 7674.→**Born, Ignác**.

**Boros, Attila** (Budapest, 5 April 1934 - ) – Conductor, pianist, musical editor, reporter, writer. Initially he studied Theology at the Reformed Theological Academy, Budapest; but soon opted for a musical career. He learned conducting from Miklós (Nicholas) Lukács and András Kórodi between 1954 and 1959. He worked as a conductor at theaters of Békéscsaba, Szolnok and Budapest. He conducted operas, such as R. Wagner's *Die Meistersinger von Nürnberg*, *Tristan und Isolde*, R. Strauss' *Salome*, and Mozart operas. From 1965 he works for the Hungarian Radio. First he was Editor for light and chamber music, but he soon became engaged in broadcasting. His musical series, such as the *Play and Music (Játék és muzsika)*, *This and That (Ez is - az is)*, contributed to the growth of musical culture and made him well known. He is one of the outstanding musical editors with classical education and much experience. He is the author of books: *Klemperer in Hungary (Klemperer Magyarországon)*; *30 Years of Hungarian Operas (30 év Magyar operái)*, and *I Clearly Remember (Pontosan emlékszem)*, a biography of conductor Karl Böhm. – B: 1438, 1720, T: 7103.→**Lukács, Baron Miklós; Kórodi, András; Meixner, Mihály**.

**Boros, Béla István** (Strephen) (Felsőgalla, now Tatabánya, 20 January 1941- ) – Mechanical engineer, radiologist, business manager. During World War II, his family home in Budapest was destroyed by an aerial bombardment and the family moved back to Felsőgalla. In 1948 they returned to Budapest where he attended the Cistercian' High School. His higher education was at the Budapest Polytechnic where he obtained his degree. During the Hungarians' Revolution in 1956 he was wounded by gunshot. He

worked as a machine designer in Budapest (1960-1965) and designed some Laboratories for the Hungarian Academy of Sciences (1965-1987).

As a sportsman he worked for the Hungarian Sailing Society (*Magyar Vitorlás Szövetség – MVSZ*) and became its presidency member, and chief of the Technical Committee. He wrote three books for the sailing sport. In 1983 he sailed around the Balkans with a Hungarian built sailing test boat, across five seas. From this prototype developed the famous Hungarian ocean-sailing generation e.g. “St. Jupát” with József GÁLL, and Nándor FA, and “Solombo” with István KOPÁR. In 1983 he established the Water Rescuers’ Sport Association (*Vizimentők Sport Egyesület*) and was its president until 1987. In 1987, when the Communist system wanted to amalgamate it into the armed militia (Workers Guard, or Voluntary Police – *Munkásőrség, Önkéntes Rendőrség*) the Boros family asked for and received political asylum in Austria, and later they moved to Australia.

There, in 1988 he founded his own Environmental Research and Development Firm, which was sold in 2002. He wrote articles for Hungarian Life (*Magyar Élet*) weekly in Australia; organized the Scouts-Actors Cultural Society in Sydney, wrote historical dramas, and stage-managed them. Established the first Trianon Society (1993) in the Hungarian Emigration, and was its managing director until 2003. With his co-workers he published 17 books on the Treaty of Trianon, and made known the Beneš Decrees to the public. In 2000 on the request of the Hungarian Alliance of Australia and New Zealand (*Ausztráliai és Új-Zélandi Magyar Szövetség – AUZMSZ*). He represented it at the Hungarian World Federation (*Magyarok Világszövetsége - MVSZ*). He was leading the Continent’s Delegation there in 2003. In the same year he and his family returned to Hungary, settled in Budapest, and withdrew from politics.

He worked as a researcher in environment issues and founded a family business. During this time as an inventor he lodged sixteen International Patents including several Environment-friendly Water Purification Processes, and a Novel Bio-Diesel. He is to snatch a more than 65 international distinctions including first prizes, gold awards as well as recognition awards and medals. Inland hold of Medals: Memorial Medal and Diploma of 1956 from President’ Republic of Hungary (1991); Hero of 1956 from the 1956’ World Federation (1994); Medal and Diploma for Rise of Hungary (1998). Memberships: Secretary’ of Association of Hungarian Inventors, International Federation of Inventor’s Association, Principal of South-Pacific Innovation Transfer Society; and the R&D International Association. – B: 2134, T: 7103.→**Fa, Nándor; World Federation of Hungarians.**

**Boros, Imre** (Emeric) (Csáda, 18 July 1947 - ) – Economist, politician. His secondary education is from Zalaegerszeg, followed by higher studies in the Finance Section of the University of Economics, Budapest, obtaining a Degree there in 1970. Since then, he has lectured there in the Department of Finance; and from 1998 also at the University of Sopron. From 1973 to 1988 he was dealing with foreign exchange policy at the Hungarian National Bank in several higher appointments. In 1988-1990 he was International Deputy Director of the Hungarian Credit Bank, and a member of its Directorate. In the 1990s he was on the Board of Directors of a number of different banks, among them acting as Deputy Chairman of East-West International Bank of Moscow; President of Interbanka of Prague; and Managing Director of Hungarian Banque Indosuez Ltd. From 1988 he was Minister Without Portfolio in the Phare

Program, and President of the Financial Cabinet in the Independent Smallholders' Party, from where he was expelled in 2001. From 1998 he was Member of Parliament. Since 2011, in the Second Orban Government, he fills an important position. Since 1999 has been President of the Hungarian Horse-Breeding and Equestrian Sport Association. His writings and articles also appeared in other languages. He was co-author of the book entitled: *Failure and Collapse of the Foreign Gold Exchange (Az aranydeviza kudarcai és bukása)* (1973). He was presented with the State Prize in 1983. – B: 0874, 1608, T: 7456.

**Boross, Géza** (Kiskunhalas, 5 December 1931 - Budapest, 2 October 2010) – Minister of the Reformed Church, theologian, writer. He completed his high school studies in Cegléd in 1950. He studied Theology at the Reformed Theological Academy, Budapest (1950-1955) and at Wuppertal-Elberfeld, Germany (1957-1958). He was Assistant Professor of Practical Theology at the Reformed Theological Academy, Budapest (1955-1956), Assistant Minister in the Calvin Square Church, Budapest (1958-1963), Parish Minister at the Törökőr Congregation, Budapest (1963-1984), Professor of Practical Theology at the Reformed Theological Academy (1982-1999), thereafter, Professor of the Theological Faculty of the Gáspár Károli Reformed University (1999-2003), Budapest. He is one of the theologians who came from the revival movement of the mid-20th century and put his stamp on Reformed Theology. He published articles and studies in Reformed newspapers and periodicals. His works include *Dynamics of Preaching (A prédikáció dinamikája)* (1970); *History on the Pulpit (Történelem a szószéken)* (1979); *How Should We Preach Today? (Hogyan prédikáljunk ma?)* (1981); *The Practical Theology of H.C. Spurgeon (H.C. Spurgeon gyakorlati teológiája)* (1989); *Bible and Pastoral Care (Biblia és lelki gondozás)* (1991); *Introduction to Practical Theology (Bevezetés a gyakorlati teológiába)* (1995); *Practical Theology of the Apostle Paul (Pál apostol gyakorlati teológiája)* (1995); *Introduction to the Pedagogy of Religion (Bevezetés a valláspedagógiába)* (1996); *The Communication Problems of Reformed Preaching (A református prédikáció kommunikációs problémái)* (1997); *Pastoral Theology (A lelkigondozás teológiája)* (1997); *Practical Theology of John Calvin (Kálvin János gyakorlati teológiája)* (1998); *The Pulpit's Fight Against Community Deviations (Szószéki küzdelem a társadalmi devianciák ellen)* (1999), and *My Lord, Your Word is My Torch in the Darkness (Uram, a te igéd nekem a sötétben szövétnekem)*, sermons (2001). He was a recipient of the Golden Ring of Theology. – B: 0910, T: 7103.

**Boross, Péter** (Nagybajom, 27 August 1928 - ) – Politician, lawyer. In 1938 he attended the Mátyás Hunyadi Military School in Kőszeg. In 1942 he continued his studies at the Miklós Zrinyi Military Cadet School. In 1944 the school was evacuated to Germany; but he escaped and joined a Hungarian fighting unit in the Northern Hungary area (*Felvidék*, now Slovakia). When his unit was to be transported to Germany, he returned to Hungary, continued his high school studies in Kaposvár, and graduated in 1947. Read Law at the University of Budapest and obtained a Ph.D. in 1951. He was refused admission to the Bar for political reasons. He worked at the Finance Department of the Budapest City Administration. During the 1956 Revolution and Freedom Fight he was a member of the Revolutionary Committee of Budapest, and a member of the Revolutionary Committee of Intellectuals. After the crushed Revolution he was arrested and sent to the internment camp of Kistarcsa in January 1957. He was eventually set free; but his police surveillance continued till 1959. From 1960 he worked in the catering trade and became the Manager

of one of its branches in 1971. Before retirement he was involved in setting up the “Country-building Foundation”. On its Board he became acquainted with Árpád Göncz (later President of Hungary) and József (Joseph) Antall, (later Prime Minister), his mentor. On the advise of Antall, he became interested in the Hungarian Democratic Forum (*Magyar Demokrata forum – MDF*). He retired from his civil job in February 1989. He was appointed State Secretary in the Antall Cabinet on 30 June 1990, and became Minister of the Secret Service, and Minister of the Interior from 21 December 1990. He joined the MDF in 1992 and soon became a member of the Party’s Presidium. Following the untimely death of Prime Minister Antall, he was elected Prime Minister on 13 December 1992; but lost the office to Gyula (Julius) Horn of the Hungarian Socialist Party (*Magyar Szocialista Párt – MSZP*) in the July 1994 election. As a Member of Parliament, he served on various committees. In 1995 he resigned as Deputy Chairman of the MDF. After the Fidesz-MPP (*Fiatal Demokraták Szövetsége-Magyar Polgári Párt - FIDESZ*) won the election in 1998, he was appointed Chief Advisor to Prime Minister Viktor Orbán. He is a recipient of the Podmaniczky Prize (1996), the 1956 Memorial Medal and the Great Cross of Merit of the Republic of Hungary (1998). – B: 1013, T: 7103.→**Antall, József; Göncz, Árpád; Horn, Gyula; Orbán, Viktor.**

**Boroszló Manuscript** (Hungarian: Boroszló, German: Breslau, Polish: Wroclaw) – A collection of songs probably from the end of the 16th century, held in the City Library of Wroclaw, Poland. It is bound into the unique volume of Gergely (Gregory) Szegedi’s Songbook of 1569. It contains mostly liturgical songs and old texts without musical notations. Zoltán Kodály used it as a source and drew the text for his oratorio *Psalmus Hungaricus* based on the poem of Mihály Kecskeméti Végh. – B: 0942, T: 7659.→**Kecskeméti Végh, Mihály; Kodály, Zoltán.**

**Borsa Clan** – A Hungarian clan of some influence from the Árpáadian era, probably the same as the Boruksa clan mentioned by the 12th century Hungarian chronicler, Anonymus. Tradition has it that Boruksa descended from Voivode Bojta, a Cumanian leader, who joined forces with Árpád. Their ancient estates were in the counties of Békés and Bihar, between the Rivers Sebes-Körös and Berettyó; the clan had property in Transylvania (*Erdély*, now in Romania) as well. The members of this clan included László (Ladislav) the Cumanian – King László IV (Ladislav, 1272-1290) and King András III (Endre, Andrew, 1290-1301). During the time of the oligarchy, many of the most distinguished aristocrats in the history of Hungary also came from this clan: Roland held the office of voivode in Transylvania several times between 1282 and 1296, István (Stephen) was head wine steward in 1284, Jakab (Jacob) was Master of the Horse in 1284 and later Bán and Palatine of Hungary. Their descendants were the Iklódy, Nadányi and Szentpály families. – B: 0942, T: 7685.→**Anonymus; László IV, King; András III, King.**

**Borsa, Gedeon** (Gideon) (Rene Badogos, until 1941 Janits) (Budapest, 11 October, 1923 - ) – Literary historian, bibliographer. He read Law at the University of Budapest in 1950. He obtained a Ph.D. in Literature in 1989; then worked at the National Archives Center (1950-1951). From 1951 he worked for the Center of National Libraries, then at the National Széchényi Library, Budapest. From 1960 he was Head of the Bibliographical Editorial Board, and a Member of the Literary Committee of the Hungarian Academy of Sciences. His field of research is 16th century printed materials and incunabula. His

works include *Catalogus librorum veterum usque ad annum 1800 in lingua Bohemica et Slovaca impressorum*, with István (Stephen) Kafer (1970); *Writings on the History of Books, vols. i-iv, (Könyvtörténeti írások I-IV)* (1996-2000), and *Inventories of the Jesuit College of Nagyszombat and of the University Press, 1773 (A nagyszombati jezsuita kollégium és az egyetemi nyomda leltára 1773)*, co-author (1997) (Nagyszombat, now Trnava, Slovakia). He is a recipient of the Academy Prize (1972) and Commemorative Medal of Ervin Szabó (1980). – B: 0874, 1878, 1257, T: 7103.

**Borschy–Kerekes, George E.** (Diósgyőr, 9 March 1882 - USA, 1971) – Minister of the Hungarian Reformed Church in the USA. He graduated from junior college in Miskolc and attended the Universities of Debrecen and Budapest. In 1913 he began his studies at the Reformed Theological Academy of Sárospatak. During World War I he volunteered to serve in the Hungarian Army. He was secretary to Bishop Dezső Baltazár, and wrote articles for newspapers. In 1924 he accepted the call of the Hungarian Reformed Church in McKeesport, Pennsylvania. Three years later he was minister of the Hungarian Reformed Church of Youngstown, Ohio. In 1935, while serving the church as Minister as well as Dean, he was elected Field Secretary of the Hungarian Reformed Federation of America, and became the organizer of the movement “Freedom for Hungary”. He was well known as a writer. He became one of the foremost Hungarian newspapermen in the United States. Several of his books were published in Hungary and in the USA, for example *The One and Only Way (Az egy és egyetlen Út)*. In it he defended the independence of the Hungarian Reformed Church in America. – B: 0906, T: 7103. → **Baltazár, Dezső.**

**Borsody, István** (Stephen, Borsody, pen-name János Zabari) (Eperjes now Prešov, Slovakia, 16 September 1911 - Boston, USA, 17 October 2000) – Diplomat, historian, journalist. He studied Law at the Charles University, Prague, Czechoslovakia, and obtained a Ph.D. in Political Science in 1934. He furthered his studies at the Universities of Budapest, Dresden, Rome, Paris and London. He worked as a lawyer for a short while, then worked for the *Hungarian Journal of Prague (Prágai Magyar Hírlap)* (1937) and for the journal *Hungary (Magyarország)*, Budapest (1938). After World War II, like other Hungarian leading intellectuals of Northern Hungary (*Felvidék*, now Slovakia), such as Lajos (Louis) Jócsik, and Rezső (Ralph) Peéry, he too leaned towards the *Folk Movement (Népi mozgalom)* and its political organization, the Smallholders' Party. He became a contributor to the Communist Party's newspaper, the *Free Word (Szabad Szó)*, and the weekly *New Hungary (Új Magyarország)*. In the meantime he was appointed honorary lecturer in East European History at the University of Budapest. He entered the diplomatic service in 1946 and served as Press Attaché at the Hungarian Consulate in New York, where he sought and was granted political asylum. In 1947 he was Professor of Central European History at Chatham College, University of Pittsburgh, until his retirement in 1977. His main field of research was Central European History and the issues of co-operation between peoples of the Danube region, especially Hungarian-Czechoslovak relations and minority rights. He and his friend, Oszkár Jászi, fought for spreading of the idea of Euro-Atlantic Federalism. He was a contributor to the periodicals *Horizon (Látóhatár)* and *New Horizon (Új Látóhatár)*. He wrote books, such as *Hungarians in Czechoslovakia 1918-1938 (Magyarok Csehszlovákiában 1918-1938)* (1938); *The Base-lines of the Hungarian-Slovakian Question (A magyar-szlovák kérdés alapvonalai)*, study (1939); *Beneš* (1943); *Hungarian-Slovak Compromise (Magyar-*

*szlovák kiegyezés*) (1945); *The Triumph of Tyranny* (1960); *The Tragedy of Central Europe* (1980); *The Hungarians: A Divided Nation* (1988); the *European Years (Európai évek)* (1991), and the *New Middle Europe (Az új Közép-Európa)* (1998). He was one of the leading personalities of Hungarian political publications in the West. – B: 0921, 0878, 1690, T: 7103. → **Jászi, Oszkár; Jócsik, Lajos; Peéry, Rezső.**

**Borsos, József** (Joseph) (Veszprém, 20 December 1821 - Budapest, 19 August 1883) – Painter. From 1840 on he attended L. Kupelwieser's class at the Academy of the Fine Arts, Vienna, and F.G. Waldmüller's private School of Arts in 1842. He spent the larger part of his life in Vienna. He was the favorite artist of the aristocracy with his portraits, genre and still life paintings, such as the portraits of *Count Károly Andrássy* and *Ferenc Pulszky*. His typically Biedermeier pictures show realistic texture and suggestiveness, set in representative environments, such as *Young Maids After the Ball (Lányok bál után); Woman with Lace Collar (Nő csipkegallérral)*, and *Pigeon-post (Galambpósta)*. After losing all his possessions on the Stock Exchange, he moved from Vienna to Budapest. In 1861 he started a successful photographic studio "Borsos and Doctor", in partnership with the painter Albert Doctor. Towards the end of his life he owned the restaurant *The Shepherd's Comely Wife (Szép Juhászné)* in Buda. He was an important representative of Hungarian Biedermeier painting. – B: 0879, 0934, T: 7456

**Borsos, Miklós** (Nicholas) (Nagyszeben, now Sibiu, Romania, 13 August 1906 - Budapest, 27 January 1990) – Sculptor. He started to study Arts in Győr; and after his study trip to Florence, Italy (1928), he became the student of O. Glatz in the painting department of the Academy of Fine Arts, Budapest. He went again on a study trip to Italy and France, and returned with hundreds of drawings. His first exhibition was in 1931 at the Fränkel Salon in Budapest. He started to work in sculpture in 1933. His first sculpture exhibition was in 1941 at the Tamás Gallery. In 1946 he moved from Győr to Budapest, and became Professor at the Academy of Applied Arts, (1946-1960). At first he created massive basalt statues and embossed metal plates, e.g. of Lőrinc Szabó (1961); but his art really blossomed through the soft plastic forms of the Pannonian (*Transdanubian*) atmosphere and the environs of Lake Balaton. His sculptures became characterized by massive plastic abstract art of smooth surfaces emphasizing the beauty of the material, e.g. the *Mermaid*, (1959). He made numerous medals of contemporary literary figures, ink drawings, and also statues for public plazas (bust of *Miklós Barabás*, 1972) and for cemeteries (*Bartók Monument*). His works have been shown in a number of galleries, and they appeared also at a Venice Biennial (1966). He has a permanent exhibition since 1979. He was honored with the Munkácsy Prize (1954), the Kossuth Prize (1957) and the title of Merited Artist (1967). – B: 0879, 0883, T: 7456.

**Bortnyik, Sándor** (Alexander) (Marosvásárhely, now Târgu Mureș, Romania, 3 July 1893 - Budapest, 31 December 1976) – Painter, graphic artist. He moved to Budapest in 1910 and enrolled in the Free Art School in Budapest. He was one of the first followers of Lajos (Louis) Kassák, and his lino-engravings were published in the journal *Today (MA)* in 1918. In 1919, after the defeat of the Hungarian Soviet Republic, Bortnyik had to emigrate to Vienna. He broke with Kassák in 1922 and moved to Weimar, where he studied the principles of the Bauhaus. On his return to Budapest in 1924, he established a short-lived avantgarde theatre in 1925. Based upon Bauhaus principles, Bortnyik opened his own art school in Budapest in 1928. Victor Vasarely was among his students. He

created a number of constructivist posters for advertisements in the twenties. Bortnyik became the leading figure of Hungarian advertisement art. His most famous works are the advertising images for the Modiano cigarette firm. During his long career he worked for many Hungarian and international clients. By the mid-1930s, his art had undergone a change in content and style: he painted pictures of workers, peasants and circus showmen in the post-Nagybánya style. From 1949 to 1956, he was Director of the Academy of Applied Arts, Budapest. His paintings include *Portrait of Lajos Kassák (Kassák Lajos portréja)* (1920); *Lamp Lighter (Lámpagyújtó)* (1921), and *Geometrical Composition (Geometriai kompozíció)* (1922). Bortnyik's work was greatly influenced by Cubism, Expressionism and Constructivism, and he is well known for his commercial Posters. – B: 1031, 1124, 2096, T: 7103.→**Kassák, Lajos; Vasarely, Victor.**

**Borza Land** – Known as Barcaság in the 13th century. This is an area in southeast Transylvania with Brassó (now Braşov, Romania) as its capital. To repel the Cumanian (*Kun*) invasion, King András II (Endre, Andrew, 1205-1235) established a local colony of the Order of the Teutonic Knights to defend the nearby border of Hungary. They built five fortresses. However, once the knights defeated the Cumans, they wanted the Barcaság to break away from Hungary and to make it the center of their own empire that reached to the Black Sea. They even obtained the consent of Pope Honorius. However, King András II drove out the knights in 1225, and the political independence of the Land of Borza came to an end. – B: 0942, T: 7676.→**Barca Region; András II, King; Cumans.**

**Borzsák, István** (Stephen) (Monor, 24 December 1914 - Budapest, 9 December 2007) – Classical philologist. His higher studies were at the University of Budapest (1932-1936). From 1932 to 1939 he was member of the Eötvös College of the University of Budapest. In 1941 he was an honorary lecturer at the University of Budapest; but was conscripted into the army and became a POW in the Soviet Union. Between 1949 and 1952 he taught at the University and was Professor between 1953 and 1957. In 1957 he was dismissed on account of a false accusation. Thereafter, he worked as a university librarian until 1963, when he became Professor at the University of Debrecen until 1978. From 1978 he was Professor of Latin and had the Chair of the Latin Department at the University of Budapest. Since 1985 he had been a scientific counselor at the University. His field of research was classics, particularly Latin Literature and historiography, as well as antiquity's impact upon Hungarian literature. He was Editor for the *Antique Studies (Antik Tanulmányok)*, a member of the Editorial Board of *Acta Antiqua*; a member of the Latin Academy, Rome; a member of the Hungarian Academy of Sciences. He was Honorary Doctor of three Universities, including the University of Heidelberg. His main writings include *The Classical Age's Knowledge of the Land of Hungary (Az ókori világ ismeretei Magyarország földjéről)* (1936); *The Spirit of the Latin Language (A latin nyelv szelleme)* (1942); *The History of Roman Literature (A római irodalom története)* (1944), and *Do We Need Latin? (Kell-e latin?)* (1990). He was a recipient of the Academy Prize (1971), the Széchenyi Prize (1993), the Herder Prize (1994) and the Gold Medal of the Academy (1996). – B: 0874, 0878, 1031, 1257, T: 7103.

**Börzsöny Range** – Situated between the Danube and the Ipoly (Ipel) Rivers, it is the westernmost member of the Northeastern Hungarian Central Mountains. Its height is 500-800 m, and its highest point is Csóványos (939 m). The central core of the range is called

High Börzsöny, an extinct Tertiary volcano. The strato-volcanoes of this range consist entirely of andesites and their tuffs (propylites or “greenstones”), quarried in several places (Sághegy, Márianosztra, etc.). In the Middle Ages there were rich gold and silver mines here, as e.g. in the Perecseny and Szokolya areas. Thick loess deposits were formed around the periphery of the range. The slopes and tops are covered with dense forests. It is a favorite mountainous area for tourists. – B: 1068, 7456, T: 7456.

**Bosnyák, Zoltán** (*felsőpataki*) (Somogytúr, 10 October 1861 - Budapest, 19 December 1948) – Writer, playwright. He did his higher studies at the University of Budapest, where he read Law and obtained his Ph.D. in Political Science in 1883. In the same year he was appointed to the Ministry of Home Affairs, where he became the Head of the Department of Child Protection; thereafter he was a counselor and worked as Undersecretary until his retirement in 1918. In 1903 Prime Minister Kálmán Széll commissioned him to write a guideline on the protection of abandoned children. He was first in Europe to outline the rights and responsibilities of the State instead of charitable organizations. He suggested entrusting abandoned children to the care of selected and responsible families. He published his legal system in *Le droit de l'enfant abandonné* (*The Law of Abandoned Children*) (Paris, 1909). His other works include *Le droit de l'enfant abandonné et le system Hongrois de protection de l'enfance* (*The Law of Abandoned Children and the Hungarian Legal System for the Protection of Children*), edited and partly written (1910); *Minimum Landed Property as Agrarian Reform in Hungary* (*A birtokminimum mint agrárreform Magyarországon*) (1885), and *Reform of the Administration of Guardianship* (*A gyámügyi közigazgatás reformja*) (1891). Later in his life he became a successful playwright. Among his plays are: *Sursum Corda*, *Mirette*, *Mary*, *Cleansing Fire* (*Tiszítótűz*) and *Judge of Honor* (*Becsületbíró*), which were staged by the National Theater (*Nemzeti Színház*), Budapest. Some of his plays remained in manuscript form. He wrote the biography of his wife Erzsí Sándor. Imre (Emeric) Balassa used the manuscript in his published work on the renowned coloratura soprano. – B: 1068, 1627, T: 7103. → **Sándor, Erzsí; Balassa, Imre; Széll, Kálmán.**

**Böszörményi-Nagy, Béla** (Sátoraljaújhely, 9 April 1912 - Boston, USA, 31 December 1989) – Pianist. He studied at the Ferenc (Franz) Liszt Academy of Music in Budapest with Ernst von Dohnányi, Zoltán Kodály and Leo Weiner, among others. He also earned a Ph.D. in Law at the University of Szeged. Between 1937 and 1948, he taught piano at the Academy of Music in Budapest. In 1948, he emigrated to Canada, and until 1953 taught at the Royal Conservatory of Music of Toronto. Between 1953 and 1962, he taught at Indiana University in Bloomington, USA. In 1962, he moved to Boston, where he headed the Piano Faculty at the University. Concurrently, during the years 1974-1977, he taught piano at the University of North Carolina, as well as at the Catholic University of Washington. He performed widely in the United States and abroad. He premiered many of Bartók's works, among them the 3rd Piano Concerto. → **Bartók, Béla; Dohnányi, Ernő; Kodály, Zoltán; Weiner, Leó.**

**Böszörményi-Nagy, Iván** (Budapest, 19 May 1920 - Philadelphia, USA, 28 January 2007) – Hungarian-American psychiatrist; one of the founders of family therapy. He was born into a Catholic family with a number of prominent judges among its members. His higher studies were at the Semmelweis Medical University of Budapest. His psychiatric education was at the University of Budapest. For political reasons he left Hungary in

1948. For two years he worked in Austria as a neurologist and psychiatrist for the International Refugee Organization. In 1950, he emigrated to the USA and did scientific research on the biochemical basis of schizophrenia. Later, he was a professor at the University of Chicago, then at the State University of New York. In 1957, he joined the hospital staff of the Eastern Pennsylvania Psychiatric Institute, where he practised family therapy for 20 years. His department became one of the main training centers for family therapists. For 25 years he worked at the Hahnemann University Hospital as Senior Physician of family therapy. He did private practice as well and founded the Institute for Contextual Growth in Philadelphia. After the changed of regime in Hungary in 1989, he visited his home country several times. His contribution to the *Family Therapy* and the *Contextual Family Therapy* was outstanding. This model combined the *subject-related theory, the system theory and the existential philosophy*. He introduced such ideas as the *transgenerative solidarity (transgenerációs szolidaritás)*, *ontic dimension (ontikus dimenzió)* and the *mutual realization (kölcsonös megvalósítás)*. He co-authored books, including the influential Boszormenyi-Nagy, I., & Spark, G.: *The Invisible Loyalty... (A láthatatlan lojalitás...)* (1973, 1984); Boszormenyi-Nagy, I., & Framo, J. (Eds.): *Intensive Family Therapy: Theoretical and Practical Aspects (Intenzív családterápia: teoretikus és gyakorlati aspektusok)*, (1965, 1985), and Boszormenyi-Nagy, I., & Krasner, B.: *Between Give and Take: A Clinical Guide to Contextual Therapy (Venni és adni között: klinikai vezérfonal a kontextuális terápiához)* (1986). Two of his works appeared in Hungarian translation. He received the Gold Medal of the Order of Merit of the Republic of Hungary in 2000. – B: 1031, 1957, T: 7103.

**Both, Bálint** (Valentine) (Nagymagyar, now Velky Mager, Slovakia, 13 November 1943 - ) – Biophysicist. He studied at the local public school (1950-1958), then at the Hungarian High School of Szenc (now Senec, Slovakia) (1958-1961). His higher education was at the Komensky University of Pozsony (now Bratislava, Slovakia) at the Faculty of Natural Sciences, majoring in Physics (1963-1968), and obtained his BSc in Biology in 1982. From 1968 to 1970 he taught at the Hungarian High School of Pozsony. Since 1970 he has been an associate at the Institute of Molecular Biology of the Slovakian Academy of Sciences. His field of research is the molecular structure of enzymes and its effect mechanism. His works include *Metabolism and Enzymology of Nucleic Acids* (1984) and *Structure and Chemistry of Ribonucleases* (1988) – B: 1083, 1890, T: 7456.

**Both, Béla** (Szerencs, 21 November 1910 - Budapest ? 20 February 2002) – Actor, theater manager. His higher studies were at the Academy of Dramatic Art, Budapest, and graduated in 1932. He was contracted by the National Theater (*Nemzeti Színház*), Miskolc. From 1934 to 1941 he was Principal Stage Manager of the National Theater (*Nemzeti Színház*), Budapest, and subsequently that of the National Theater (*Nemzeti Színház*), Szeged. After 1945 he worked as stage manager and theater manager at a number of theaters, including the Magyar Theater (*Magyar Színház*), Budapest, and the Csokonai Theater (*Csokonai Színház*), Debrecen. In 1958 he became the Principal Stage Manager of the Madách Theater (*Madách Színház*), Budapest, later its director. Under his leadership the theater soon became a leading one. Between 1964 and 1971 he was the Director again at the National Theater of Budapest. His numerous stage managements include I. Madách's *The Tragedy of Man (Az ember tragédiája)*; J. Katona's *Bánk bán*; M. Jókai's *The Sons of the Stonehearted Man (A köszívű ember fiai)*; F. Felkai's *The*

*Eaglet of Győr (A győri sasfiók)*; F. Schiller's *Mary Stuart (Stuart Mária)*; E. M. Remarques's *Full Circle (Die letzte Station – Az utolsó állomás)*, and W. Shakespeare's *As You Like It (Ahogy tetszik)*. Amongst his feature and TV films are: *The Witness (A tanú)* (1969); *Adventures of Prix (Prix kalandjai)* (1973); *Black Diamonds i,ii (Fekete gyémántok, I-II)* (1976); *My First Two-hundred Years (Az első kétszáz évem)* (1986); *The Elephant (Az elefánt (TV, 1978)*); *Petőfi, 1-6 (TV, 1981)*; *The Days of Széchenyi (Széchenyi napjai)* (TV, 1985), and *Neighbors (Szomszédok)* (1987-1999). He received the Merited Artist title (1962) and the Outstanding Artist tile (1971). – B: 1031, T: 7103.

**Botond (Botund)** (10th century) – Hungarian military commander. He was one of the legendary figures of the “Age of Adventures” (*Kalandozások kora*). The chronicles named Kölpeny the ancestor of the Botond clan. Beside Lehel (Lél) and Bulcsu, he was also guardian of the young leader, Zsolt. The three leaders fought together in battles, including the victorious one against the invading Germans. (954-955). In a German campaign, when Botond learned about the defeat of his two friends near Augsburg on 9 August 955, he immediately took on the victors, defeated them and recovered most of their booty. In one of the campaigns against the Byzantine Empire in 960, he appeared before the gates of Byzantium and after defeating a giant adversary in a duel, with one stroke of his axe he cut such a big hole on the metal gate of the city that a child could walk through it. Simon Kézai, the 13th century chronicler described the scene and regarded it as fact; while Anonymous, the 12th century chronicler considered it merely a legend. However, this was the origin of the so-called “Golden Gate Legend”. The damaging of the gate meant declaration of war at that time. Botond's intention was to make Byzantium taxpayer to his people; but to no avail. According to tradition, Botond died at home and was buried at Verőce. – B: 0942, T: 7103. → **Anonymous; Era of the Hungarian Campaigns; Kézai, Simon; Lechfield, Battle of.**

**Bottyán, János (1)** (John) (Vak Bottyán) (1643 - Lőrincskáta, 27 September 1709) – *Kuruc* (rebel), military officer in Prince Ferenc (Francis) Rákóczi II's War of Independence (1703-1711). He was known among the troops as “Blind Bottyán”. He came from a family of the lower nobility. He started his studies at Sellye, but later became the gatekeeper of the Jesuit College to earn his keep and tuition. As a young man he enrolled as a frontier soldier. First he served as lieutenant in Fort Sellye; later transferred to the cavalry, and from 1683, served in Fort Esztergom; where he carried out his first daredevil action. He made a bet with his comrades that he would go to Fort Érsekújvár (now Nové Zámky, Slovakia) that was garrisoned by 6,000 Turks; and from the minaret he would throw down the muezzin in broad daylight and come out alive. Disguised as a poor peasant he infiltrated the fort and from the balcony of the minaret he threw over the Muslim cleric. He shot the two sentries at the gate; and his waiting comrades ambushed the pursuing Turks; cutting them all down. In 1685 he valiantly defended his fort against Pasha Ibrahim. He fought in the War of Independence reclaiming the chain of forts of the southern border district from the Turks. He fought so bravely with the Imperial Army against the Turks that Emperor Leopold promoted him to

Colonel and offered him the ownership of a regiment of Hussars. At Gradova in Serbia the valiant charge of his Hussars decided the outcome of the battle. Between 1696 and 1698 he was Military Governor of the districts of Kecskemét, Cegléd and Körös (now Nagykörös). In one of his skirmishes with the Turks he lost his left eye and thus got his nickname “Blind Bottyán”. After the Peace Treaty of Karlóca (1699) (now Sremski Karlovci, Serbia), he retired to his estate and bequeathed an annuity of 3,000 Forints to the Piarist Teaching Order at Nyitra (now Nitra, Slovakia). He was revered in the region as benefactor of the poor. In 1701, during the Spanish War of Succession, he was ordered with his regiment to the River Rhine, from where he was redirected to Hungary to fight against the Hungarian rebels. The Imperial Commander of Fort Esztergom, Baron von Kucklander reported him to the Emperor for making contact with Prince Rákóczi II. For this he was arrested on 16 December 1704, but rescued the very same day by his men. He escaped to Selmecbánya (now Banská Stiavnica, Slovakia), where he swore allegiance to Prince Rákóczi’s War of Independence. Baron von Kucklander, who was bent on revenge, arrested his wife and she died in prison just a few days after her arrest in 1705. János Bottyán became the most admired legendary hero of the Rákóczi War, the *Kuruc War*, as Hungarians know it. His banner led to victory after victory in Northern Hungary (Upland, *Felvidék*, now Slovakia) and in the Transdanubian (*Dunántúl*) districts of Hungary. At the battle of Nagyszombat (now Trnava, Slovakia) on 26 December 1704, his contingent took the lion’s share in the victory. In the spring of 1705 he erected the Fort of Battyán at Dunakömlőd to secure the crossing of the River Danube and in the same year he expelled all Imperial forces from Transdanubia. In 1707, against overwhelming odds, he executed his campaigning with such brilliant strategy that even his opponents, the Imperial generals, paid tribute to his military genius calling him a master tactician of warfare. In 1708 he was promoted to Supreme Commander, and in the same year he became the Military Governor of the region of the mining cities of Northern Hungary (Upland, now Slovakia). In every battle he participated personally at the most dangerous spots and many times his bravado decided the outcome of the battle. His soldiers followed him with utmost enthusiasm. Despite his ripe age he spent all his time in camp and died in his military tent, a victim of meningitis. He was buried in the church of the Franciscan Friars in Gyöngyös. His statue is at the Rotunda in Budapest. – B: 1133, 0883, 1138, T: 3233. → **Freedom Fight of Rákóczi II, Prince Ferenc; Kuruc; Hussars.**

**Bottyán, János (2)** (John) (Belényes, Transylvania, now Beius, Romania, 23 October 1911 - Budapest, 22 January 1984) – Minister of the Reformed Church, writer, journalist. He started school at his place of birth; later studied at Nagyszalonta (now Salonta, Romania) and Debrecen. He studied Theology at the Reformed Theological Academy, Debrecen (1932-1935). He worked for eight months at the Diaconal Institute, Bielefeld, Germany. He was Assistant Minister in Sáp, Körösnagyharsány, Sarkad, Sarkad-Keresztúr, Okány and Baktalórántháza. From 1940 he was Secretary at the weekly *Reformed [Presbyterian] Future (Református Jövő)*, later, its Deputy Editor. He was a contributor for the periodicals *New Hungarian Woman (Új Magyar Asszony)* (1944-1947) and the *Life and Future (Élet és Jövő)* (1947). From 1949 he was an editor for the *Reformed Church (Református Egyház)*, the *Reformed Messenger (Református Híradó)* (1950-1952), from 1937 for the literary monthly *Confession (Confessio)*. He received his Ph.D. from the Reformed Theological Academy of Budapest in 1979. He was a prolific publicist, an Album Editor, and organizer of a number of exhibitions. His major works

include *Our Ruined and Rebuilt Churches 1945-1951 (Rombadöntött és felépített templomaink 1945-1950)* (1950); *Heroes of Our Faith (Hitünk Hősei)* (1971); *History of the Calvin Square Church 1830-1980 (A Kálvin téri templom története 1830-1980)* (1980), and *Centuries of the Hungarian Bible (A Magyar Biblia évszázadai)* (1982). – B: 0883, 0910, T: 7103.

**Bouquet Festivity** – An old festivity performed when a building under construction has reached the height of the roof. Then it is decorated with flowers, tree branches and ribbons, hence the name of the occasion. It is a happy event; the owner gives some gifts to the foreman, and often to the bricklayers. In case of a larger common building, the celebration is more colorful. The builder makes several toasts standing on top of the scaffoldings. After each toast he smashes the glass. The carpenters also have the same “festivity of bouquet” before putting up the roof. – B: 0842, 1020, T: 3240.

**Bow, the Composite** – An advanced type of bow, also called reflex bow. It was developed by the horsemen of Central Asia in the first millennium B.C. Particularly the Scythians, the Huns, the Avars and the Magyars were masters in the making and handling of this fearsome weapon. Compared to other bows, the composite bow was smaller, more powerful, and more practical in hunting or shooting from horseback. An arrow shot from it could travel about half a mile’s distance, was capable of piercing some light body armor, and was lethal at about 300-400 yards. (Western bows had only about half the range.) The warriors of the East were masters at handling these bows and they shot their arrows with great accuracy from their galloping horses. Even in a retreat, real or tactical, the stirrup enabled them to turn facing backwards on their horses allowing them for a very effective use of these weapons. The stirrup was introduced into Europe by the Avars in the 6th century A.D. – B&T: 1241. → **Composite Bow; Hungarian Bow; Scythians; Avars; Huns; Hungarians.**

**Bowring, Sir John** (Exeter, England 17 October 1792 - Claremont, England, 23 November 1872) – English linguist, political economist, diplomat, reformer, hymn writer, and editor. Between 1832 and 1849 he was a member of the British House of Commons. He went to China and was English Consul in Canton; then became Governor of Hong Kong. He visited the Philippines and Java; in Siam (Thailand) he was engaged in commercial negotiations. During his eventful life he traveled practically all over Europe. He had a special talent for languages. According to *The Cambridge Encyclopedia of Languages*, he spoke 100 languages and could read at least 100 more. He translated a vast amount of poetry and the folklore of almost every European country. Among many other works he published *Specimens of Russian Poets* (1820); *Ancient Poetry and the Romance of Spain* (1824); *Sketch of the Language and Literature of Holland* (1829); *Poetry of the Magyars* (1830), and *Cheskian (Czech) Anthology* (1832). He spoke, wrote and read the Hungarian language correctly. A review sketch of “The Language and Literature of Hungary and Transylvania” preceded his “Poetry of the Magyars”. At the end of his essays on the Hungarian language he included excerpts from Hungarian literature, both in the original and in his own excellent English translation. He refers to some writers whom Hungarian history does not mention. One lengthy essay contains 95 Hungarian folk songs in the original, and in English translation. In the introductory essay he outlined the nation’s history, the structure of the Hungarian language and its beautiful system of sounds. He even translated Petőfi’s poems from German: *Translation of Alexander*

*Petőfi, the Magyar Poet* (London, 1830). On several occasions, because of the restrictions imposed by the Habsburg absolutism, a Hungarian writer's work appeared earlier in English in England than in Hungarian in Hungary. In 1829 he was awarded an LL.D. by the University of Groningen, Holland. – B: 0881, 1257, T: 7669.→**Hungarian Language, Opinion on.**

**Boy Scouts and Girl Scouts in Hungary** (*Cserkészlet és Leánycserkészlet*) – This movement started at the initiative of Lord Robert Baden-Powell (Bi-Pi) (1857-1941) by organizing the young boys for the defense of Mafeking town in South Africa in 1897 during the Boer war. The movement grew rapidly. Its first camp was on the Island of Brownsea in 1907. In 1909 the British Boy Scouts' Association was formed, and the Girl Guide movement also began. In 1920 the first Jamboree was organized in London. Today, Boy Scouts are active in some 160 countries.

The beginnings of the Boy Scout movement in Hungary go back to 1910. The first team was formed in the Reformed (Presbyterian) Youth Organization in Budapest. Their association was founded in two years. In 1914 they had 3,000 members. World War I, followed by the Versailles-Trianon Peace Dictate of 1920 truncated Hungary and was detrimental to the development of the movement. It received a new impetus in 1920 with its new Commander-in Chief in the person of Prime Minister Count Pál Teleki. At the 1924 Jamboree in Denmark, a team of 100 were present and in the competition they won third place. In 1926 they organized the Grand Camp at Megyer. The 1938 Jamboree in Gödöllő became another success. There were 900 teams with 53,500 Boy Scouts in Hungary in 1942. During World War II, they helped protecting people.

*The Girl Scouts movement* started in 1919. By 1926 they had 100 teams with 5,000 members. In 1928 the World Association of Girl Guides and Girl Scouts (WAGGGS) were founded at Parád.

After World War II, the Scout Associations were re-established and there were 500 teams with 50,000 members. In 1948, under the Communist regime, the Hungarian Boy and Girl Scout movements were abolished by the order of the Minister of Interior. However, they were reborn in 1990. At the turn of the millennium there were 10 districts with some 300 teams with 20,000 members.

Hungarian Boy Scout teams continued their work in the detached parts of historic Hungary in the Carpathian Basin. In Transylvania (*Erdély*, now in Romania) the movement developed well since 1909. After 1920 it worked within the Romanian Boy Scout movement as its Hungarian unit till 1937, when it was dissolved. It was newly formed in 1990 in Gyergyószentmiklós (now Gheorgheni, Romania). Its name is *Romániai Magyar Cserkész Szövetség* (Hungarian Boy Scout Association of Romania). Its chief protector is Reformed Bishop László Tőkés. In the former *Felvidék* (Northern Hungary, Upland now Slovakia) the Hungarian Boy Scout movement was tolerated; but at the end of World War II it was banned. In 1990 the movement was newly formed. In *Kárpátalja* (now Carpatho-Ukraine) and in the *Délvidék* (Southern Hungary, Southland now Voivodina, Serbia) and in *Horvátország* (now Croatia) the formerly banned Hungarian Boys Scout movements were reestablished in 1990.

*Hungarian Boy Scout Association in Externis* (*Külföldi Magyar Cserkész-szövetség*). This movement started right after World War II in the refugee camps of Germany, Austria and Italy. The first team was formed at Essen, Germany in 1945. Twelve Boy Scout Officers, the *Homeless Eagles* (*Hontalan Sasok*) were the initiators of this

movement. In 1949 more than 40 Western European teams were active with 2000 members. It grew steadily under the leadership of the late Gábor (Gabriel) Bodnár. After the crushed Hungarian Revolution and Freedomfight in 1956, their membership rose to 5000. Today, its 105 teams live in 5 regions (Europe, Latin America, USA, Australia and Canada). The movement during its existence helped some 60,000 Hungarian students to graduate from high schools. Since 1990 they render assistance for rebuilding the movement in the Carpathian Basin. Its Veteran Organization in Hamilton, Ontario, Canada runs a large English language electronic library, the *Corvinus Virtual Library* ([corvinuslibrary.com/hungarianhistory.com](http://corvinuslibrary.com/hungarianhistory.com)). – B: 1132, T: 7103.→**Teleki, Count Pál; Bodnár, Gábor; Tóké, László; Corvinus Library; Magyaródy, Szabolcs.**

**Boys of Budapest** (*Pesti srácok*) – This epithet was given to the boys of Budapest, many only about 15 years of age, who participated in the 1956 Revolution and Freedomfight. They were born under Soviet occupation and from Kindergarten on were subjected to political brainwashing. Nevertheless, in the fall of 1956, they began the fight with stones and pocket-knives against a military power that was feared by the whole world at the time. They fought often with Molotov cocktails, with a belief in victory against the Soviet tanks. Their motto was: “*If you don't have weapons, wait, the enemy will bring you one*”. Many died during the fighting and those who were captured were shot on the spot. After the defeat of the Revolution they were hunted down, many taken to the Soviet Union in railway wagons or sentenced to death; but to maintain a semblance of legality, their execution was postponed until they reached the maturity age of 18. Their memory is only preserved by a symbolic grave in Budapest; many poets have been inspired by their commitment, self-sacrifice and courage – B: 1210, T: 7665.→**Freedom Fight of 1956; Mansfeld, Péter.**

**Bozay, Attila** (Balatonfüzfő, 11 August 1939 - Budapest, 14 September 1999) – Composer, zither and recorder artist. He studied at the Békéstarhos College of Music and at Ferenc (Franz) Liszt Academy of Music, Budapest where he studied composition with Ferenc (Francis) Farkas. He taught harmony at Szeged Conservatory of Music and worked for the Hungarian Radio as music editor. In 1967, he went to Paris on a six-month UNESCO scholarship. From 1979 until his death he taught at the Academy of Music, Budapest. Upon his return to Hungary, he concentrated on composition, used the method of dodecaphony (twelve-note composition). He was Director of the National Philharmonic Society (*Nemzeti Filharmónia*) (1990 -1993). He was one of the founding members of the Hungarian Academy of Art (*Magyar Művészeti Akadémia*) (1992); Presidium Member of the Art of Music Society (*Magyar Zeneművészeti Társaság*); and Vice- President, later President of the Hungarian Chamber of Music (*Magyar Zenei Kamara*) (1991-1996). He has composed mostly instrumental works in the 12-note style. His String Quartet No. 1 brought him international attention when it was performed at the International Rostrum of Composers in 1967 at the UNESCO's headquarters in Paris. Bozay's work contains some elements of Hungarian peasant music, including folk rhythms and strophic folk songs. His works include the operas *Csongor and Tünde*, and *The Tragedy of Man* (lyrics from the last five scenes of I. Madách's work); the one based on *Hamlet* was produced in Budapest in 1984. His other works include *Pezzo Sinfonico* No. 1, 2, 3; *Pezzo Concertato* No. 1, 2, 3; chamber music and solo works, e.g. *Piano Sonata (Zongoraszonáta)* i, ii; *Sonata for violin and piano*; *Sonata for cello and piano (Gordonka-zongora szonáta)*; *Wind Quintet (Fúvósötös)*; *Strin Qquartets* i, ii, iii; Song

cycles for choir and religious songs, and pedagogical works. He was a recording artist. Among his distinctions are the Ferenc Erkel Prize (1968, 1979), the Bartók-Pásztor Prize (1988), the Kossuth Prize (1990), the Pro Art Prize (1992), and the Posthumous Opera Prize (2000). – B: 1031, T: 7103.→**Farkas, Ferenc.**

**Bozsik, József** (Joseph) (Kispest, 28 November 1925 - Budapest, 31 May 1978) – Soccer player. His career started at the Kispest Athletic Club and continued with its successor, the Honvéd Club, Budapest, where he played right halfback. His team was champion in 1949-1950, 1952, 1954 and 1955. He was member of the Olympic Champion Team (1952) and that of the European Cup (1948-1953). He was member of the Hungarian winning team over England in 1953, and of the silver medalist team of the World Championship (Bern, Switzerland) in 1954. He was regarded as the world's best right halfback player of the first half of the 1950s. He was the only one in Hungarian soccer history to become 100 times member of the national team. He was coach of the Budapest Honvéd team and Captain of the Hungarian National team in 1974-1975. The Stadion of Kispest was named after him in 1986. – B: 0883, T: 7103.→**Buzánszky, Jenő; Czibor, Zoltán; Grosics, Gyula; Kocsis, Sándor, Puskás, Ferenc; Golden Team.**

**Brachna, Gábor** (Gabriel) (Szarvas, 30 October 1909 - Cleveland, OH, USA, 10 January 1998) – Lutheran pastor, archdeacon in the USA. He completed his secondary school education in Szarvas, his Theological studies at the Lutheran Theology Academy of Sopron, and was ordained in 1931. He began his duties as Pastor in Csömör. He was awarded a scholarship to New York, where he received M.Theol. from the Union Theological Seminary. He also had the opportunity to serve a Hungarian community, where he was eventually able to establish the one-time Hungarian Lutheran Church. Later he returned to Hungary to serve in Makó. Just before World War II, at the request of the Cleveland, Ohio congregation, the Hungarian mother church sent him back to the USA to be the first pastor of the West-Cleveland Hungarian Lutheran congregation, a post he held for 18 years. In 1954 he was invited to the First Hungarian Evangelical congregation, Cleveland, where he served until his retirement in 1976. He was a founding member of the American Hungarian Lutheran (Evangelical) Conference when it became a branch of the United Lutheran Church in America in 1941. For years he was Editor and publisher of the official paper of the Conference, the *Mighty Fortress (Erős Vár)*. Subsequently he became Archdeaconal President of the Conference. One of his duties was keeping alive the Hungarian Evangelical (Lutheran) Congregation of Toronto, Ontario, Canada, of which he was administrator until 1978. He was also elected member of the Theological Examination Board, was President of the Lutheran Ministers' Association of the Cleveland Diocese, as well as that of the Ecumenical Ministers' Association. The Evangelical (Lutheran) Theological Academy of Budapest bestowed upon him an Honorary Doctorate in 1982. – B: 0906, T: 7617

**Brád, Wooden Rail Track** – Transylvania (*Erdély*, now in Romania) – Some primitive rail tracks used in the mines of Transylvania already in the early 1500s, considered to be the forerunner of today's railways. The mine-cars were mounted on rolling wooden axles outfitted at their ends with stabilizing wheel rims and pushed by men or, when several cars were linked, pulled by horses on wooden rails. One of these simple wooden tracks,

dating from the early days, was still in use in the 19th century in the Apostol Mine No. XII, Brád, County Hunyad. One section of this wooden rail track, complete with switches and a car, ended up in Berlin, where it has survived both World Wars. It is exhibited under Catalogue No. 152 as a carefully kept memento of the history of transportation in the Museum of Transport and Technology (*Museum für Verkehr und Technik*). An English translation follows the original German text, posted in front of the wooden tracks “*Wooden rail tracks from the 16th century. The tracks and car were obtained from a Hungarian gold mine (Apostle Mine, Brád, Transylvania) in 1889. The tracks and ties (sleepers) were made of round timber. The ends of the tracks were flattened. The tracks’ gauge is about 48 cm. The single piece of movable lever, which unites itself with the tongue and heart piece serve to set the switch. The car, which belonged to the tracks, has wheels made of single pieces of wood*”. – B: 1078, 1020, T: 7674.

**Branyiszkó, Battle of** (now Branisko, Slovakia) – This was one of the most brilliant victories of the War of Independence (1848-1849). Marching through the mining towns of Northern Hungary in 1849, the army of General Artur Görgey arrived in County Szepes (now Slovakia) on 1 February 1849. An Austrian Imperial Army unit, garrisoned in the district, tried to surprise the Hungarians at Igló (now Spisská Nová Ves, Slovakia), but they were repelled. After an unsuccessful skirmish, General Schlick sent a division from Kassa (now Košice, Slovakia) under Count Deym to link up with Major Kieswetter’s battalion to build defense trenches at the mountain pass of Branyiszkó to prevent the unification of Görgey’s army with the Hungarian army of the Upper Tisza River. Görgey remained in reserve at Igló and sent Count Richard Guyon, a Scot nobleman, who had joined the Hungarian cause, and a novice battalion to break through the well-fortified enemy line. Due to the icy road and the inexperience of the recruits, the attack ended in failure. Then Captain Cordiesz of the Tyrol Mountaineers, with some Hungarian volunteers carrying two disassembled canons on their backs, climbed the bare rock wall where the Austrians did not suspect any infiltration. On 6 February 1849 Guyon gave orders to renew the attack. The Imperial troops were dismayed to find themselves under canon fire from the so-called “*Ördöglyuk*” (Devil’s Hole) above them and the bugle call of the dreaded Sobri Hussars broke the Austrians’ nerves. Abandoning their trenches they fled pursued by the Hungarians with Guyon at their lead. They occupied 23 enemy strongholds by midnight. Thus the pass was secured and on 6 February Görgey’s army marched through it to Eperjes (now Prešov, Slovakia). This victory secured the unification of the two main Hungarian forces and made possible the execution of the glorious spring campaign in 1849. Years later, General Guyon was credited as one of the first military commanders to use the tactic of “vertical encirclement” that became a familiar tactic in World War II with the introduction of parachute regiments. – B: 0942, T: 3233. → **Guyon, Görgey, Artur; Count Richard; Hussars; Freedom Fight of 1848-1849-**

**Brassai, Sámuel (1)** (Komárom, 23 August 1694 - Nearby Genova, Italy, 18 November 1752) – Jesuit missionary, discoverer. His studies were completed at the College of Nagyszombat (now Trnava, Slovakia) and he became a member of the Jesuit Order in 1714. He was trained at the Mission School of Seville, Spain, and was posted to missionary work in South America. He arrived in Quito, Ecuador in 1722. His missionary work lasted 14 years among the Andoa Indians at the River Marañon, the main tributary of the Amazon. Later he visited the Omagua, Miguiano, Amaono and Parano. He was on

good terms with the Indians and even taught them agriculture. He wrote a catechism in their language. On his missionary trips he drew maps and made the first detailed description of the region at the confluence of rivers Marañon and Ucayali. He was the first European to travel the upper end of the rivers Nanay and Itatay. He also described hitherto unknown plants. In 1744 he was made Provincial to the Jesuit Province of Quito that at the time included Ecuador, parts of Colombia and Peru. In 1743 he embarked on a dangerous expedition in the tropical jungle. After his term expired he went to Rome. His journey lasted for three years. He took with him manuscripts, maps and notes. He wanted to publish his book in Genoa; but on his way from Rome he died and his manuscripts were lost. Only his maps were published later. The title of his book would have been *Marannonensium S. J. Missionum generalis Historia iconibus illustrate*. He was one of the most outstanding Hungarian Jesuit missionaries in South America. – B: 1420, T: 7103. → **Jesuits, Hungarian, in Latin America; Éder, Xavér Ferenc S.J.**

**Brassai, Sámuel (2)** (Welmer) (Torockószentgyörgy, now Colțești, Romania, 15 June 1797 - Kolozsvár, now Cluj-Napoca, Romania, 24 June 1897) – Polyhistor. His father was a Unitarian minister. In his youth he had been living under adverse conditions. At various times he was aristocrats' tutor, language master, music teacher, as well as librarian to Count Bethlen's family. From 1837 to 1848 he was a teacher at the Unitarian College of Kolozsvár; and from 1850 to 1859 teacher at Pál Gönczy's School in Pest. During the 1850s he taught at the College at Kolozsvár. From 1872 until his retirement in 1884 he was Professor of Mathematics at the University of Kolozsvár. From 1834 to 1848 he edited the *Sunday News (Vasárnapi Újság)*, the first popular newspaper in Hungarian. In 1837 he launched a youth-book series called the *Blue Library (Kék Könyvtár)*, and a magazine for young people *Friend of Youth (Fiatalság barátja)* with György (George) Boros (1851). From 1859 to 1873 he was Editor for the *Transylvanian Museum's Yearbook (Erdélyi Múzeum Évkönyve)*. From 1877 to 1890 he published with Hugo Meltzl the *Acta Comparationis Litterarum Universarum (Összehasonlító Irodalomtörténeti Lapok)*. He was dealing with geography, history, statistics and economics, the theory of music, nearly every branch of natural science, and with problems of esthetics, art criticism, linguistics and history of literature. In defense of his idealistic philosophical as well as his linguistic and literary views, he was engaged in acerbic polemics with Miklós Jósika, József (Joseph) Eötvös, and even with the great poet Mihály Vörösmarty. His polemical essay: *Hungarian or Gypsy Music? (Magyar vagy cigányzene?)* (1886), was directed at Ferenc (Franz) Liszt. In this he argued for the originality of Hungarian music. He knew a number of languages, among them Russian, Ottoman Turkish, Hebrew and Sanskrit. He was a school-reformist and popularized science and its latest results. He translated literary works into Hungarian, e.g. some of Gogol's and Sologub's works. His works include *The Hungarian Sentence (A magyar mondat)*, (1860-1863); *On Methodology (A módszerről)*, (1867-1869); *The Religion of the Future (A jövő vallása)* (1886); *The Divinity of Jesus (Jézus Istensége)* (1887), and *Word-order and Accent (Szórend és accentus)* (1888). He was regular member of the Hungarian Academy of Sciences (1865). – B: 0883, 1068, 1257, T: 7456. → **Jósika, Miklós; Eötvös, József; Vörösmarty, Mihály; Liszt, Ferenc.**

**Brauer, Marcel Lajos** (Marcellus Louis) (Pécs, 21 May 1902 - New York, USA, 1 July 1981) – Architect. His primary and secondary studies were at his hometown. In 1920 he studied sculpturing at Vienna. However, he soon moved to Weimar, Germany, where, in

the framework of Bauhaus, he became student of Walter Gropius. In 1925 he obtained his diploma, and with the school he moved to Dessau, Germany. In 1934 he moved to Budapest. Despite the prizes he won, the Chamber of Architects did not grant him membership. In 1935 he went to England; in 1937 he was invited by the Department of Architecture of Harvard University in the USA, where he taught until 1946. In the meantime, together with Gropius, he opened an architect office in New York in 1941, and had an office in Paris as well. He worked as counselor of the universities of Bogota, Columbia, and Buenos Aires, Argentina, having assisted in reorganizing their Department of Architecture. He built a great number of buildings worldwide, including the *Dortelal*, Zürich (1934), *Museum of Modern Art*, New York (1949), *Breuer House*, New Canaan, Connecticut (1951), *UNESCO Headquarters*, Paris (with others) (1953), *De Nijenkorf Department Store*, Rotterdam (1957-1958), and *Whitney Museum*, New York (1963-1966). In his book *Sun and Shadow* he featured his own works. He won a number of prestigious prizes and he received an Honorary Doctorate from the Budapest Polytechnic in 1970. – B: 0883, 1031, 0881, 0896, T: 7103.

**Brazil, Hungarians in** – The first Hungarians appeared in Brazil during the 18th century. Ferenc (Francis) Haller of the Jesuit Order was active at the Maranhac Mission, North Brazil. Ignác (Ignatius) Szentmártonyi worked on mapping the Rio Madeira, commissioned by the Portuguese king. Nelson Hungria, the minister of justice was descendant of a Hungarian family. A significant number of Hungarians arrived after the defeat of the War of Independence (1848-1849). This wave was known as the “soldiers of Kossuth”. Their traces can be found in the telephone directory of Sao Paulo, where a few hundred names, such as Hungaro, Ungaro and Ungheria appear, and they still know where their ancestors came from. In Santa Catarina lived Sándor (Alexander) Lénárd, an eminent Hungarian of the 20th century. After World War I, a large number of Hungarians, about 60,000 arrived in Brazil. Most of them came from parts of historic Hungary ceded to Romania, Czechoslovakia and Yugoslavia. Hungarians in these years organized themselves into societies, even in villages, such as Árpádfalva, Mátyáskirályfalva, Rákóczifalva and Szentistván-Királyfalva. However, they are nonexistent today, their inhabitants dispersed across Brazil. Hungarian life was quite significant in Sao Paulo before World War II. During the war, because Brazil and Hungary became belligerents, the Brazilian government confiscated Hungarian properties in Brazil; but returned them after the war. A major immigrant wave of Hungarians arrived after the crushed 1956 Revolution. The estimated number of Hungarians in Brazil in 1961 was 71,000. Although official census data are not available, according to a reliable estimate, at the turn of the millennium some 80,000 Hungarians lived in Brazil. Two-third of the Hungarians lives in Sao Paulo, the rest in Rio de Janeiro, Curitiba, Brasilia, Belo Horizonte, Porto Alegre and Jaragua. The center of Hungarian life is Sao Paulo, the venue of the St. Gellért (St. Gerhard) Monastery. In cooperation with it is the King St István (St Stephen) Roman Catholic Parish. On the compound of the monastery is the St Imre (St Emeric) College that used to have some 1600 students. The Social Institute, the Hungarian Women’s Association is located there as well. Sao Paulo has the Hungarian Reformed Church of Brazil, established in 1932; the Hungarian Lutheran Parish of Brazil, the latter one hosts the Béla Bartók choir. The Hungarian Baptist Congregation is also in Sao Paulo, as well as the Hungarian-speaking Jewish Congregation. Other Hungarian organizations in this city include the Hungarian House,

the Kálmán Könyves Free University, The Brazilian-Hungarian Benefit Society, the Brazilian-Hungarian Cultural Society, the Transylvania World Organization, the Brazilian Hungarian Chamber of Commerce, the Hungarian Seminary, and the Mindszenty Cultural Society. There is no newspaper in Hungarian anymore in Brazil, Hungarians read the *Argentine Hungarian News*. The members of the Hungarian Benedictine Order, the ministers of other denominations, as well as Hungarian intellectuals played and continue to play a significant role not only in the life of the Hungarians in Brazil but in the life of Brazilian society as well. – B: 1104, 1364, T: 7103. → **Jesuits, Hungarian, in Latin America; Apostol, János, Csákány, István; Lénárd, Sándor.**

**Brennbergbánya Find** – At the end of the 19th century a small column measuring 70x70x60 mm was found 100m below ground level in the town of Brennbergbánya, near the city of Sopron. The object of an unknown metal came to light when a coal seam broke and the column fell out of it. It was immediately turned over to the mine's directors. Károly (Charles) Gurlt, a well-known contemporary geologist, published his opinion in the English journal *Nature*. He determined the age of the coal seam containing the column to be 30 million years old. The corners and edges of the column were undamaged; but in its side was an indentation 1mm wide and as deep, perhaps as a result of corrosion. On the basis of the material and its age, it was not of our planet, therefore Gurlt judged it to be a meteorite. The column was later taken to Salzburg, Austria, where it was displayed in the local Museum until 1944, when the building suffered a direct hit during a bombing raid that destroyed the entire collection, including the column. – B: 0942, T: 7617.

**Brenner, János** (John) (Szombathely, County Vas, 27 December 1931 - Outside Rábakethely and Zsida, east of Szentgotthárd, 15 December 1957) – Roman Catholic priest and martyr. His two brothers also became priests. He studied in the Episcopal Primary School (1941), in the Training School of Pécs, later in the Cistercian High School, and in 1946 in the Premonstrian High School of Szombathely. After the nationalization of the schools (1948), he obtained his maturity certificate as a Cistercian oblate at Zirc. Following the disbanding of the monastic orders (1950) he secretly professed himself as a novice in an Order, receiving the name Anasztáz. For a year he was a civil student of the Theological College of Budapest, then a seminarian in the Seminary of Szombathely and, after its disbanding in 1952, in the seminary of Győr. On 19 June 1955, he was ordained. He was chaplain at Rábakethely. About midnight of 15 December 1957, he was called away from the parish by a 16-year-old boy, Tibor Kóczán, under the pretext that his uncle at Zsida was mortally ill. János Brenner, 26 at the time, donned his surplice and stole, took the Holy Sacrament and holy oil, and departed but he did not get as far as Zsida, because in the outskirts of the village he was murdered with 32 knife stabs and his throat was cut. At his burial service, ninety priests and many hundreds of believers were present. He was buried in the Salesian church of Szombathely. The circumstances of his death and the investigation that followed made it clear that his murder was part of the campaigns of terrorization and intimidation by the Communist regime. Although two people were convicted for his murder: first Ferenc (Francis) Tóka, and after his acquittal, Tibor Kóczán, the actual murderers have never been established. During the course of the investigation, many locals were intimidated. The mother of Tibor Kóczán talked about him and the circumstances of her son's death.

Apparently, a border guard “accidentally” shot him dead in a cornfield. Later on, it was also discovered that the Party Secretary of the village had asked Kóczán to call away the priest. János Brenner’s beatification process began in 1999. At the place of his torture, on top of a hill, a memorial chapel was consecrated on 25 August 1996. At Szombathely his memory is nourished by the names of a kindergarten, a primary school and a college. – B: 0945, 1031, T: 7456.→**Trogmayer, Ottó.**

**Brenta, Battle of** (Italy) – A great victory during the time of the Hungarian Tribal Principality, just after the Magyar tribes settled in the Carpathian Basin (AD 896). It was perhaps the most outstanding proof of the superiority of Hungarian military tactics at that time. In 899, the spearhead of the Hungarian army in Italy was suddenly encircled at the city of Adda by the forces of King Berengar I. Using delaying tactics, the Hungarians avoided decisive confrontation by negotiations as long as it suited their plans. Managing to lure their opponents to a favorable spot at the River Brenta, they attacked and annihilated the careless and over-confident enemy on 24 September 899. Military historians still study the planning of the battle. – B: 0942, T: 3233.

**Brentán, Károly S.J.** (Charles) (Komárom, 23 August 1694 - Near Genova, Italy, 18 November 1752) – Jesuit missionary, discoverer. His studies were completed at the College of Nagyszombat (now Trnava, Slovakia), and became member of the Jesuit Order in 1714. He was trained at the Mission School of Seville, Spain, and was posted to missionary work in South America. He arrived in Quito, Ecuador in 1722. His missionary work lasted 14 years among the Andoa Indians at the River Marañon, the main tributary of the Amazon. Later he visited the Omagua, Miguiano, Amaono and Parano. He was on good term with the Indians and even taught them agriculture. He wrote a catechism in their language. On his missionary trips he drew maps and made the first detailed description of the region at the confluence of rives Marañon and Ucayali. He was the first European to travel the upper end of the rivers Nanay and Itatay. He also described hitherto unknown plants. In 1744 he was made provincial to the Jesuit Province of Quito that at the time included Ecuador, parts of Columbia and Peru. In 1743 he embarked on a dangerous expedition in the tropical jungle. After his term expired he went to Rome. His journey lasted for three years. He took with him manuscripts, maps and notes. He wanted to publish his book in Genoa; but on his way from Rome he died and his manuscripts were lost. Only his maps were published later. The title of his book would have been *Marannonensium S. J. Missionum generalis Historia iconibus illustrate*. He was one of the most outstanding Hungarian Jesuit missionaries in South America. – B: 1420, T: 7103.→**Jesuits, Hungarian, in Latin America; Orosz, László (1); Éder, Xavér Ferenc S.J.**

**Brethrens’ Community, Evangelical** – This is a brake-away community from the Methodist Church in Hungary on account of organizational and doctrinal differences. This religious community has been active in Hungary since 1974; has been officially reorganized in 1981. Its members are engaged in social work, hospital and prison ministry and they fight against alcoholism. Members of the congregation are divided into groups of 10-15 under the leadership of an Elder. – B: 1042, T: 7390.

**Brezanóczy, Pál** (Paul) (Aknaszlatina, now Szolotivno, Carpatho - Ukraine, 25 January

1912 - Eger, 11 February 1972) – Roman Catholic archbishop. He graduated at the Premonstrian High School of Kassa (now Košice, Slovakia), thereafter he studied theology at Innsbruck, Austria. He was ordained in 1935 and became a military chaplain. In 1938 he was teaching theology, and later became a high school principal; bishop's secretary in 1941, and later Vicar-General in Kassa, at that time belonging to the Szatmár Diocese. He organized a training seminary in the priests' country house of Hejce. After serving in several ecclesiastical offices, he was appointed Archbishop of Eger in 1969, and participated in the works of the Vatican Council II (1962-1965), as well as in the preparation of the agreement between the Hungarian Government and the Holy See in 1964, when the Hungarian communist government and the Vatican agreed to cooperate in the appointments of new bishops, who were to take an oath of loyalty to the government instead of the Church. – B: 0945, T: 7103.→**Catholic Church in Hungary.**

**Brezan Proclamation** – Brezan, now Brezhany in Ukraine. At the beginning of 18th century Brezan belonged to Poland, being the estate of the Sieniawskis, supporters of Reigning Prince Rákóczi II. It was in Castle Brezna, on 6 May 1703 that Count Pál Ráday wrote Rákóczi's manifesto, proclaimed on 7 June 1704 to the Hungarian nobility and to the world, giving the reasons for his uprising: "*Recrudescunt inclytæ gentis Hungaræ Patriæ vulnera...*" (Reopened the wounds of the ...Hungarian fatherland...) calling noblemen as well as commoners to arms to restore their country's freedom. This started Hungary's War of Independence against Austrian rule under the leadership of Ferenc (Francis) Rákóczi II (1703-1711). – B: 0883, 0945, 1075, T: 7668.→**Rákóczi II, Prince Ferenc; Freedom Fight of Rákóczi II, Prince Ferenc; Ráday, Count Pál.**

**Briccius de Buda** – A 15th century scientist, also rector of Prague University in 1415. – B: 0861, T: 7675.

**Brigetium** – A town in the Province Pannonia Superior of the Roman Empire, now Szőny-Komárom, on the right bank of the Danube in Transdanubia (*Dunántúl*), Hungary, the ruins of which were excavated. The town was founded in the 1st century B.C. by the Roman legions that had conquered the region from the Illyrian *Azalus* tribe. The town's name derived from the Celtic *Briga*, meaning fortress or stronghold, indicating its strategic importance. The Roman First Legion, *Audiutrix*, was stationed there from the beginning of the Roman rule until its end in the 4th century A.D., when the town was surrendered to the Barbarians invading across from the left bank of the Danube. The military camp was surrounded by a settlement of craftsmen and their families. Roman Emperor Flavio Valentiniano I (364-375) died in Brigetium in the presence of the Quadi ambassadors, who came to sue for peace following his campaign against the Quadi and Sarmatian tribes in 375. – B: 1418, 7617, T: 7103.→**Aquincum; Gorsium; Savaria; Strigonium; Pannonia.**

**Brisits, Frigyes** (Frederic) (Máza, 4 March 1890 - Vác, 7 December 1969) – Literary historian, Cistercian monk and teacher. He completed his theological studies at the Cistercian Bernardium at Zirc, and obtained a Teacher's Degree in Hungarian and Latin Literature from the University of Budapest. In 1913 he was ordained Cistercian priest; from 1914 he taught at the Cistercian St. Emeric High School, where he was Principal from 1939 to 1948. From 1935 he was an honorary lecturer, and from 1946 to 1948 Associate Professor at the University of Budapest. He earned a Ph.D. in Literature in 1957. He was Editor for the *Hungarian Secondary School (Magyar Középiskola)*, a

periodical, from 1919 until 1926. He published numerous articles in the paper *Life (Élet)* and in literary historical journals from 1910 onward. His professional fame rests on his numerous studies of the works of the poet Mihály (Michael) Vörösmarty. He was among the best as a preacher and his critics lauded him for his philosophical profundity, thoroughness and artistic style. His planned Vörösmarty monograph was barely started when he died. He compiled a number of books for high schools. His works include *Saint Francis of Assisi (Assisi Szent Ferenc)* (1926); *The Unpublished Poems of Mihály Vörösmarty, (Vörösmarty Mihály kiadatlan költeményei)* (1926); *The World of Pázmány (Pázmány világa)* (1933), and *History of Hungarian Literature in the First Half of the 19th Century (A magyar irodalom története a 19. század első felében)* (1939). He was a corresponding member of the Hungarian Academy of Sciences (1934-1949). – B: 0883, 1068, 1257, T: 7456. → **Vörösmarty, Mihály.**

**British Columbia (Canada), Hungarians in** – In this most western province of Canada the first Hungarians arrived mostly from the USA in the 1880s; they emigrated to the New World searching for jobs. A second wave of migrants arrived after the Versailles-Trianon Dictated Peace Treaty (1920), which ceded two thirds of Hungary's territory to the newly created neighboring states in the Carpathian Basin. The new rulers accorded such harsh treatment to Hungarians, now in minority, that many of them rather emigrated to foreign countries. They found employment as industrial workers in Vancouver, in the orchards of the Okanagan Valley, and as dairy farmers at Abbotsford-Huntingdon, some 50 locations mostly at Britannia Beach, Creston, Enderby, Fort St John, Kelowna, Fort Ladner, Lumby, Oliver, Osoyoos, Pentington, Powell River, Revelstoke, Trail, Willow River, Vancouver and Victoria. They started organizing themselves in the 1930s. The next group came to Canada after World War II in 1945. This wave was different, for it consisted mostly of intellectuals. After the crushed Hungarian Revolution of 1956, another wave arrived. Canadians were sympathetic towards Hungarian refugees and the government even hired charter flights to transport them from Europe to Canada. With this wave some 7,000 Hungarians arrived in British Columbia. Among them was a significant part of the Sopron Forestry Academy, teachers and students, who left Hungary *en bloc* and settled in Vancouver, where they successfully integrated into the University of British Columbia's Forestry Faculty. There was a smaller influx of immigrants after the communist system collapsed in Hungary in 1989. According to 1981 statistics some 8,100 Hungarian-Canadians lived in Vancouver. Altogether 27,850 Hungarian-Canadians live in British Columbia, mostly in the Vancouver area. According to the 2001 Census Canada, their number was 43,515. – B:1211, 1104, T:7103.

**Broad Sword (pallos)** – A double-edged sword first used by the Sarmatians. It was a common weapon of the Huns and Onogurs. It later became a common weapon of the heavy cavalry of the German army. In the Middle Ages a *pallos*-like sword was used for beheading convicts. – B: 0942, T: 7656. → **Sarmatians; Huns.**

**Brocky, Károly** (Charles) (Temesvár, now Timișoara, Romania, 22 May 1807 - London, England, 8 July 1855) – Painter. He studied in Vienna; and after years of preparation, took a study trip to Italy, and Paris, France. From there he moved to London by the invitation of an English lord. His paintings reflect a serious psychological analysis of the human physical form; and with his true-to-life portraits he became a favorite of the English aristocracy. He spent two more years in Vienna before returning to London in

1846, where he painted numerous attractive and delicate female portraits. He also painted the portraits of *Queen Victoria* and *Prince Albert*, as well as *György (George) Kmety* and *László (Ladislás) Mészáros*, two prominent Hungarian personalities living in exile at that time. In the 1850s he painted several voluptuous nudes, half nudes and mythological characters, works that reflected his fine artistic qualities. His last self-portrait, dressed in red, is a gem of 19th century Hungarian fine art. Some of his other pictures include *Poverty (Szegénység)*; *Woman in Yellow Dress (Sárgaruhás nő)*, and *Amor and Psyche* and *Resting Psyche*. He is regarded as one of the most famous Hungarian artist of the first half of the 19th century. His works are to be found in many English private collections and in the British Museum in London, as well as in the National Gallery in Budapest. – B: 0883, 1124, 1285, T: 7653. → **Kmety, György**.

**Brody, Adrien** (New York City, 13 April 1973 - ) – Actor. He is the son of the well-known Hungarian photojournalist, Sylvia Plachy. He attended the High School for Performing Arts and the American Academy of Dramatic Arts. As an only child, he used to accompany his mother on assignments for the Village Voice. He experienced some years of no success as a film star – until Roman Polanski called him to portray a celebrated Jewish pianist in Nazi-occupied Warsaw. His performance was outstanding in the film *The Pianist*, where he was drawing on the heritage (and rare dialect) of his Polish grandmother. – B: 1081, T: 7456.

**Bródy, Imre** (Emeric) (Gyula, 23 December 1891 - Mühldorf, Germany, 20 December 1944) – Physicist. His higher studies were at the University of Budapest, where he earned a PhD. He first taught at a high school, thereafter became an assistant professor at the University of Budapest. Early in his career he accomplished valuable theoretical work, investigating specific heat and molecular heat. He emigrated to Germany in 1919; and for a short period he worked with Max Born as his assistant at Göttingen University. They jointly worked out the dynamic theory of crystals. He returned to Hungary in 1923 and worked for the United Incandescent Works (*Egyesült Izzó*), Budapest, as an engineer until the end of his life. His most important achievement was the invention of the long-life “krypton bulb”. It was well known that an incandescent body radiates its energy mostly in the form of heat and only a small part as light. By using krypton gas he developed an up-to-date lightbulb with longer life and better performance. The advantage of the krypton electric bulb was to emit more light without increased energy consumption. Its display at the Budapest Industrial Fair in 1936 was a technical sensation. He also developed a new process to ascertain the krypton content of air. Based on his experiments, the world’s first krypton factory was built in Ajka, Hungary in 1937. He died as a victim of Nazism. The Loránd Eötvös Society of Physics named a Prize after him, thus commemorating his life's work. – B: 0883, 1279, T: 7674, 7103.

**Bródy, István** (Stephen) (Nagykároly, now Carei in Romania, 1 May 1882 - Budapest, 4 January 1941) – Theater manager. His first staging of an operetta was at Győr in 1904. Soon he moved to Budapest, where he managed musical works in the Hungarian Theater, the Opera House, and in the Theaterette of Margaret Island in Budapest. In 1907 he became manager of the Vaudeville (*Vígszínkör*), later manager of the Margaret Island Theaterette, then the Revue Theater from 1918, still later manager of the Scala Theater, later that of the Theater of Eskü Plaza (*Eskü téri Színház*) from 1920. He had the Island Stage (*Sziget Színpad*) built and he also managed it in 1922. Later he moved to Vienna,

where he was the manager and director of the Metropol Theater. – B: 0883, T: 7456.→**Vajda, László.**

**Bródy, János** (John) (Budapest, 5 April 1946 - ) – Musician, composer, lyricist. He studied electro-engineering at the Budapest Polytechnic (1964-1969), but switched to a musical career. He was a member of the Illés Band (1964-1973), then a member of the Fonográf Ensemble (1974-1984). From 1979 he gave solo performances. He participated in more than 60 recordings, composed more than 100 songs, and wrote more than 500 lyrics. He composed music for films and plays. He is President of the Music Department of the Hungarian Creative Artists' Union, that of the *Artisjus* Society, Spokesman of the Democratic Charta, and chargé de affaires of the Anti-Conscription League. His major works include *Clement, the bricklayer (Kőműves Kelemen)* (1981); *István the King (István, a király)* (1983); *Anna Fehér* (1988); *The Cursed (A kiátkozott)* (1997), and *With You, Lord (Veled, Uram)* (2000). Books written by him are: *Hungarian Blues* (1980); *Sign Talk (Jelbeszéd)* (1983); *Keep Silent, My Mouth (Ne szólj szám)* (1984); *Without Sound (Hang nélkül)* (1988); *On the other Side of the Street (Az utca másik oldalán)* (1994); *Ballads and Life-Scenes (Balladák és életképek)* (1998), and *When I Was Still a Little Kid (Amikor én még kis srác voltam)*, children song lyrics (1999). He is regarded as the creator of Hungarian pop-music, and is a well-known and popular artist. He is a recipient of several prizes and awards, among them the Special Prize of the Hungarian Art Foundation (1990), Jenő (Eugene) Huszka Prize, Ferenc Liszt Prize (1996), and a shared Kossuth Prize (2000). – B: 0974, T: 7103.

**Bródy, Sándor** (Alexander) (Eger, 23 July 1863 - Budapest, 12 August 1924) – Novelist, playwright, journalist. His high-school studies were left incomplete, and he worked as a clerk for a solicitor in Gyula, where his first articles appeared in the local paper. He also wrote short stories. By 1884 he moved to Pest and became known by his novels *Squalor (Nyomor)* and *Doctor Faust (Faust orvos)*. He got a position at the journal *Hungarian News (Magyar Hírlap)*. In 1888 he went to Kolozsvár (now Cluj-Napoca, Romania) and was Editor at the *Transylvanian News (Erdélyi Híradó)* (1888-1889), *Transylvanian Illustrated News (Erdélyi Képes Újság)* (1889), and *Kolozsvár Life (Kolozsvári Élet)* (1889); then edited the journal *Hungary (Magyarország)* (1889-1890). In 1890 he returned to Budapest as a correspondent for the *Hungarian News (Magyar Hírlap)*. For a year in 1900 he published the literary and political monthly *White Book (Fehér Könyv)*, every issue written by him. From 1903 to 1905 he edited his own weekly *Future (Jövendő)*, in which he criticized the social absurdities of the time. As a writer he had a romantic disposition, regarding Mór (Maurice) Jókai, the great novelist of the 19th century, as well as the naturalist Émile Zola as his models. He lived a tough life. In the summer of 1905 on the Semmering Pass, Austria, he tried to commit suicide, but recovered and became the correspondent at the journals *Pest Journal (Pesti Hírlap)*, *The Day (A Nap)*, *The News (Az Újság)*, and later *The Evening (Az Est)*. He sympathized with the Hungarian Soviet Republic, but did not play a role in it. He emigrated to Vienna, but returned to Hungary in 1923. He was an important pioneer of the Hungarian naturalistic novel. His works include *The Schoolmistress (A tanítónő)*, play (1908); *Lyon Lea*, play, (1915); *The Lover (A szerető)* play (1917); *The Students of Eger (Az egri diákok)*, novel (1854), and *The Knight of the Day (A nap lovagja)*, novel (1902). A street in Budapest and a library in Eger bear his name. – B: 1160, 1068, 1257, T: 7456.→**Jókai, Mór; Council (Soviet) Republic in Hungary.**

**Bromberg, J. Edward** (a.k.a. Joe Bromberg) (Temesvár, Hungary, now Timișoara, Romania, 25 December 1903 - London, 6 December 1951) – Actor. His family moved to the USA in his infancy. From his boyhood he was determined to pursue an acting career, first working in odd jobs, like silk salesman, candy maker and laundry worker to finance his training. He studied with the Moscow Art Theater and made his first American stage appearance at the age of 23 at the Greenwich Village Playhouse. He worked extensively with the Theater Guild. With his play *Men in White* he won the Pulitzer Prize in 1934 and attracted Hollywood's attention. In 1936, with his film *Under Two Flags*, he began his long association with 20th Century-Fox playing a vast array of foreign villains, blustering buffoons, and the occasional gentle philosopher. Short, dark and stocky, he played father figures, villains and ethnic types. The corpulent Bromberg conveyed a perpetual air of middle-aged tension, allowing him to play characters much older than himself. His other Hollywood films include *Jesse James*, *The Return of Frank James*, *Phantom of the Opera*, *Cloak and Dagger*, *Son of Dracula*, and *Mark of Zorro*. He gained critical acclaim on Broadway in 1948 in Clifford Odets' *The Big Knife*. Elia Kazan described him as an immensely talented actor who could play a great variety of character parts. He refused to answer questions before the House Committee on Un-American Activities; but others testified that he was a member of the Communist Party. He refused to cooperate in the enquiry, was blacklisted from Hollywood, and he was forced to seek work in England in 1950, where he died. – B: 1081, T: 7456.

**Bronze Age in the Carpathian Basin** (1) *Early Phase*. From about 2000 BC, the appearance of migrating peoples formed a characteristic culture that persisted throughout the Bronze Age and became mixed with the indigenous Copper Age culture of Bodrogresztur. (2) *Late Phase*. By about 1000-800 BC the advantage of bronze over copper was increasingly exploited; trade in the scarce, but necessary tin was getting organized and led to the rapid diffusion of technological improvements and rapid change of tools, especially weapons. There are several sites of Late Bronze Age culture in the Carpathian Basin. The excavations at Füzesabony (18 km south of Eger) is the best known archeological site, represented by graves and settlements containing a hoard of urns, vessels of various sizes, swords, daggers, axes, ornamental needles, fibulas and sleeve protectors. Other well-known sites are Tószeg (south of Szolnok, near the Tisza River), Vátya puszta (part of Újhartyán, east of Budapest), both on the Great Hungarian Plain. Zagyvapálfalva (south of Salgótarján) is in the hills north of the Great Plain, while Ottomány (now Otomani, Romania) is in former County Bihar, Transylvania, in the eastern part of the Carpathian Basin. Excavations of the Megyaszó culture (20 km northeast of Miskolc on the northern edge of the Great Plain) show that the dead had been cremated, although at certain stages they had been buried. One of the graves shows a skeleton in a fetal position, lying on its side, arms held in front, legs pulled up. A large clay dish and smaller clay vessels containing provisions for the "journey" of the dead surround it. In the Carpathian Basin the migration of peoples started in the early phase of the Bronze Age (after 2000 BC), became mixed with the indigenous Middle Copper Age Bodrogresztúr Culture (3100-2700 BC), and gave life to a very characteristic culture persistently surviving there for centuries. B: 1138, 1068, 1020, 1459, T: 7456. → **Bodrogresztúr Culture**.

**Brózer, István** (Stephen) (17th century) – Goldsmith from Kolozsvár (now Cluj-Napoca, Romania). Prince Rákóczi György (George) I. also used his expertise. In 1840 he made

the golden goblet for the Farkas Street Reformed Church in Kolozsvár. The technique used for making the goblet shows that translucent encrusted enameling was known and used in contemporary Transylvania (*Erdély*, now in Romania). – B: 0942, 0883, T: 7673.→**Rákóczi I. Prince György.**

**Brunner, Erzsébet** (Elizabeth) (Sass-Brunner) (Nagykanizsa, 1 July 1910 - Delhi, India, 2 May 2001) – Painter, moved and settled in India. Her parents, Ferenc (Francis) and Erzsébet Sass-Brunner (née Farkas) were both painters. The mother and daughter (who was 18 years old at the time) settled in India on the invitation of Rabindranath Tagore at the Tagore University of Santiniketan in 1930. She joined the avant-garde trend of the School of Bengal. She is considered as one of the classics of the 20th century Indian painters. The young girl's paintings were focused on portraits and Buddhist subjects, while her mother painted the fabulous Himalayan sceneries. Their first domestic exhibition was held in 1981. The mother's grave is located at Nainital in the Himalayan foothills. The daughter, an excellent portrait painter, created portraits of several Indian politicians, who fought for India's independence, such as Rabindranath Tagore, Mahatma Gandhi and Jawaharlal Nehru. Gandhi's portrait is considered to be one of her best works. She also painted landscapes, nature, and ancient Indian sculptures. Her works include *Portrait of My Mother (Édesanyám portréja)* (1930); *The Birth of the Ganges (A Ganges születése)* (1934); *Shiva, God of the Himalaya (Shiva, a Himalaya istene)* (1944), and *Birth of Siddhartha (Siddharta születése)* (1956). In 1981 the Indian Government bought more than twenty of her portraits, while more than sixty are in the Museum in Barada. She was a recipient of the Padmashri Prize. – B: 0883, 0932, T: 7653.→**Sher-Gil, Amrita.**

**Brunszvik, Countess Teréz** (Theresa) (Pozsony, now Bratislava, Slovakia, 27 July 1775 - Martonvásár, 17 September 1861) – A pioneer in the women's rights movement. She got acquainted with Johann Heinrich Pestalozzi, the Swiss pedagogue and educational reformer, who exercised great influence upon her. A *Women's Society of Pest and Buda* was founded on her initiative. She established the first kindergarten in Buda under the name of Angels Garden (*Angyalkert*), on 1 June 1828. In the same year she started an industrial school for girls. In 1836 there were 14 kindergartens in the country. In the 1840s she worked for an institute for young ladies. She was one of the promoters of equal rights for women. Her family was in close contact with Ludwig van Beethoven, who sojourned at their Kismarton manor house. Her works include *Call for Setting Up a School... (Felszólítás egy tanintézet felállítására iránt...)* and *Mein halbes Jahrhundert (My Half Century)*, memoirs. A College and a Kindergarten Computer Program bear her name. – B: 0883, 1031, T: 7103.

**Bubik, István** (Stephen) (Budapest, 19 May 1958 - Ceglédbercel, 28 November 2004) – Actor. He graduated from the Academy of Dramatic Art, Budapest (1981). He was a member of the following theaters, at Budapest: National Theater (*Nemzeti Színház*) (1981), Artists Theater (*Művész Színház*) (1993), Thália Theater (*Thália Színház*) (1995), Thália Society (*Thália Társaság*) (1996), László Kelemen Theater Circle (*Kelemen László Színházi Kör*) (1997) and the New Theater (*Új Színház*) (1998). Bubik appeared in most of the classical Hungarian as well as foreign plays, among them Ádám in Madách's *The Tragedy of Man (Az ember tragédiája)*; Mercutio in Shakespeare *Romeo and Juliet (Rómeó és Júlia)*; title role in *Richard II*; title role in Molière's *Tartuffe*; Armand Duvall in Dumas' *The Lady of the Camélias (Kaméliás hölgy)*; Antipov in Szikora-Pasternak's

*Doctor Zhivago*; Max the Knife (*Bicska Maxi*) in Brecht's *Beggar's Opera* (*Koldusopera*); Count Almaviva in Beaumarchais' *The Marriage of Figaro* (*Figaró házassága*); Pozzo in Becket's *Waiting for Godot* (*Godotra várva*), and title role in Kodály's *Háry János*. He also appeared in several feature films and television productions. Bubik also played the drum in the Actors' Orchestra, and was an avid sportsman (basketball, football and pentathlon). In 1985 he received the Mari Jászai Prize, the Rajz János Prize and the Farkas-Rajkó Prize. In the same year the National Theater Convention awarded him first prize as the best male actor. In 1989 he received the Society for Hungarian Arts Award. – B: 0871, T: 7684.

**Bucharest Peace Treaty** – When World War I broke out in 1914, Romania stayed neutral, only entering the war on 19 August 1916 under the leadership of Romanian Prime Minister Ion Brătianu. Already at an earlier stage the Allies promised support for the fulfillment of a Romanian “national unity”, which would include the regions of Wallachia, Moldavia and Transylvania (*Erdély*). The latter was part of Hungary for a thousand years, a part of historic Hungary, with considerable number of ethnic Hungarians, including Szeklers, as well as German Saxons. These two ethnic groups made up almost half of Transylvania's population. The sudden offensive of Romanian forces did allow quick progress for them in Transylvania. However, the Romanian forces were repulsed by a Central Powers' offensive, beginning in September 1916. By the end of the year all of Wallachia and much of Moldavia were occupied by German and Austrian forces, and Dobruđa by the Bulgarian forces; they even entered the Capital, Bucharest. Romania accepted defeat and this resulted in the Treaty of Bucharest on 7 May 1918 between Romania and the Central Powers, ratified by the Austrian *Bundesrat*, the German *Reichstag*, the Romanian Chamber and Senate; but after the armistice on 11 November 1918, Romanian forces again occupied Transylvania, and on 1 December 1918, by an *ad hoc* people's assembly of Romanians at Gyulafehérvár (now Aiud, Romania), they unilaterally declared Transylvania (*Erdély*) as part of Romania. The Versailles-Trianon Peace-Dictate Treaty endorsed this on 4 June 1920. – B: 1212, 1020, T: 7103. → **Bucharest, Secret Agreement of; Trianon Peace Treaty.**

**Bucharest, Secret Agreement of** (17 August 1916) – For the first two years of World War I, Romania did not join any of the belligerent parties, but waited cautiously for the right opportunity. During these years the Central Powers were leading militarily on all fronts. The war was then being waged on Entente territory and the Allied Powers tried to win the confidence of the Romanians. The Russians promised them all of Transylvania (*Erdély*), as well as the Hungarian Great Plain (*Nagy Alföld*) as far as the River Tisza, if they would join forces. Although Romania's king was not practicing pro-Russian politics, the victorious Brusilov offensive helped him to decide. In a secret agreement concluded in Bucharest, the Allied Powers promised him Transylvania, the Bánság, and Voivodina, with a large portion of the Great Plain of Hungary, if Romania would enter the war on their side. Romania was to pay France the 20-year revenue of the three richest gold mines of Transylvanian. On 27 August 1916, they declared war on the Central Powers, and a half-million Romanian troops attacked the undefended borders of Transylvania and occupied its southern section. In the fall of 1916, the Central Forces drove the Romanians out and a German force, led by General Mackensen, occupied Bucharest on 6 December. This forced the Romanians to make a special peace treaty with the Central Powers on 7 May 1918. Although the Romanians broke article 5 of the Secret Agreement not to enter

into any special agreement, as the result of the Versailles-Trianon Peace Treaty in 1920, they annexed the territories defined in the Bucharest Secret Agreement occupied illegally well before the Peace Treaty. – B: 1212, 1020, T: 7668.→**Bucharest Peace Treaty.**

**Bucsay, Mihály** (Michael) (Tarcál, 8 July 1912 - Budapest, 8 July 1988) – Minister of the Reformed Church, church historian. He came from a teacher's family and was educated in Reformed orphanages in Budaörs and Hajdúböszörmény. He studied Theology at the Reformed Theological Academy of Sárospatak and at the Universities of Debrecen, and Halle, Germany (1930-1934). He received a Ph.D. in Philosophy in 1935, and in Theology in 1944 in Debrecen. He taught Philosophy and Church History at the Reformed Theological Academy of Budapest from 1948, and was Professor of Church History from 1956 until his retirement in 1980. Shortly afterwards he became the Chief Director of the Ráday College, Budapest. He was also Minister of the German-speaking affiliated church in Budapest from 1946. He organized the Southeastern Research Station in Dresden, Germany in 1938, and edited the Central Danubian Protestant Library series. His books and articles appeared at home and abroad. In his works he treated philosophical and Hungarian Reformed Church history themes. His main works are: *The Question of Reality Within Criticism and Beyond Criticism (A realitás kérdése a kriticismuson belül és a kriticismuson túl)* (1935); *The Crisis of Kantianism (A kantiánizmus válsága)* (1942); *Reformers' Debates Over the Lord's Supper (A reformátorok úrvacsora vitái)* (1942); *Gergely Belényesi, the Hungarian Pupil of Calvin (Belényesi Gergely, Kálvin magyar tanítványa)* (1944); *Gergely Szegedi, Reformer of Debrecen...(Szegedi Gergely, debreceni reformátor...)* (1945); *The History of the Reformed Church in Hungary (A Magyar Református Egyház története)* (1949); joint author of *The History of Protestantism in Hungary (Geschichte des Protestantismus in Ungarn)* (1959), and *Protestantism in Hungary 1521-1978, vols. i, ii (Der Protestantismus in Ungarn 1521-1978, I,II)* (1977-1979), its abridged Hungarian edition appeared in 1985. He was one of the leading church historians of the Reformed Church in the second half of the 20th century. – B: 0879, 0911, T: 7456.

**Bucsin** – Chief Captain of the Szeklers. Upon the death of Chief Zandirhám (ca. end of 9th century) the Szeklers unanimously elected him to the office. Later he was converted to Christianity under the influence of the *gyula*, who brought the new faith from Constantinople. However, the sons of Apolt, remaining faithful to the old religion, started a religious battle and defeated him at the valley of Sasmező. He fled abroad and married Victoria, daughter of the King of Thracia. The Bucsin Mountain in Transylvania (*Erdély*, now in Romania), where the road leads from Gyergyó to Parajd, preserved his name. – B: 1220, 0942, T: 7682.→**Szeklers.**

**Buda** (in Western literature known as Bleda, - 445) – According to Hungarian legends Buda was one of the Hun leaders, and with Etele (Attila) and Keve (Reuva) he was the son of Bendeguz from the Érd Clan. After the battle of Cesumaur, near *Mont Cetii* in the Tula region, where five leaders fell, only Etele and Buda survived. The Huns made Etele their king. Buda ruled the eastern part of the realm from the River Tisza to the Don, while Etele fought on the West. Buda named Sicambria (Aquincum, now Óbuda, part of Budapest) after himself Buda-Fort. Sixth century Gothic historian Jordanes states in his book "Getica" that the victoriously returning Etele killed Buda, because he breached an agreement between them, had his body thrown into the River Danube, and named the fort

after himself. However, this has never been proved. History preserved its German name *Etzelburg* (Attila-Fort), but Hungarians named the place after Buda. Today it is part of Budapest. – B: 0942, T: 7103.→**Bendeguz; Attila; Aquincum; Huns.**

**Buda, Béla** (Budapest, 2 April 1939 - ) – Physician, psychiatrist. He attended the Medical Faculty of the University of Budapest. He worked at the Psychotherapy Center and also at the National Neuropathological-Psychiatric Institute, both in Budapest. He was Editor for the *Medical Weekly (Orvosi hetilap)* for 25 years; Editor-in-Chief for the *Psychiatria Hungarica* 1986-1996, the *Psychoterapy (Pszichoterápia)* from 1992, and the *Addict Illnesses (Szenvedélybetegségek)*, from 1993. He was Scientific Director of the *National Drug-Preventive and Methodological Research Institute (Nemzeti drog-megelőzési és módszertani kutatóintézet)* and Vice-President of the *Hungarian Psychiatric Society*. He is a regular lecturer at international conferences. His fields of research are mental hygiene, psychotherapy and social psychology. His works include *The Modern Theory of Sexuality (A szexualitás modern elmélete)* (1972); *The Rules of Intimate Human Communication (A közvetlen emberi kommunikáció szabályszerűségei)* (1974); *The Psychology of Empathy (Empátia, a beleélés lélektana)* (1993); *The Socio-psychology of Personality Development and Education (A személyiségfejlődés és nevelés szociálpszichológiája)* (1994), and *Mental Hygiene (Mentálhigiéna)* (2000). He is one of the best-known psychiatrists in Hungary. He is a recipient of the Soros Prize (2001). – B: 0879, T: 7456, 7103.

**Buda Castle** – The Royal Castle area is one of the most attractive sites of Budapest. It is built on the top of Buda Hill, on the right side of River Danube. Buda and its environs were inhabited from time immemorial. The area is known for its Celtic settlements from the 3rd century BC. In the first decades BC, Transdanubia (*Dunántúl*) was conquered by the Romans, who incorporated it into the Roman Empire under the name of Pannonia. Aquincum, now Óbuda, was the capital city of Pannonia Province. Following the Romans, it was occupied by the Huns, then by Eastern Goths, Longobards and Avars. The Magyars settled here in 896-900, and established their first settlements on the island of Csepel and in Aquincum. In the 13th century King Béla IV (1235-1270) built a fortified castle on the hill for protection against the Tartar-Mongol attacks. This castle was made into a Gothic-style palace. Aquincum was given the name Óbuda (Old Buda). It was named after Prince Buda, brother of Etele. During the reign of King Mátyás I (Matthias Corvinus, 1458-1490) it became a Renaissance-style royal residence. The castle was enlarged and reshaped, and churches were erected on the site (Mátyás Church, Maria Magdalena Church). After the Turks captured Buda in 1541, the town deteriorated rapidly until its recapture in 1686. The three-month-long siege caused significant damage to both the castle and the town itself. Just some baths, chapels and bastions remained from the Turkish times. Rebuilding started on the medieval ruins. The new Royal Palace was built in the French Baroque style between 1748 and 1777, designed by József Hillebrand. During the second year of the War of Independence in 1849, the retaking Hungarian forces again caused considerable damage, but it was repaired in the next decade. After the 1867 Compromise with Austria, significant development took place in the castle. It reached its peak at the Millennium year of 1896. Towards the end of World War II, first Allied bombings, then the Soviet Army's siege from 24 December 1944 to 13 February 1945 ruined most of the buildings, seriously damaged the Castle, being the last stronghold of the German and Hungarian defence force. The reconstruction was slow,

completed only in the mid 1980s. The palace was completely rebuilt, its dome heightened, the whole complex modernized. Today it is the country's most important cultural center. It houses the Budapest Historical Museum, the Hungarian National Gallery, the Ludwig Museum, and the Széchenyi National Library. Most of the buildings are designated as historical heritage sites. – B: 0942, 7103, T: 7103.→**Huns; Avars; Aquincum; Buda Castle District; Várpalota; Budapest; Budapest Siege.**

**Buda Castle District** – This district in Budapest is the ancient kernel of the capital city's right-bank settlement. The Royal Castle was built at the southern end of the hill, the civic town to the north. The building of the castle began just before the Tartar-Mongol invasion (1241-1242) by King Béla IV (1235-1270). Its golden age was under the Renaissance king Mátyás I (Matthias Corvinus, 1458-1490). The Turks occupied it in 1541 by trickery and remained under their rule until 1686. The three-month long siege heavily damaged it; but from the mid 18th century it slowly recovered. During the War of Independence (1848-1849), it was under Hungarian siege to recapture it from the Austrian forces, which caused considerable damage. After the 1867 Compromise with Austria, the district developed again until the Soviet siege in 1945, when it was almost completely destroyed. It has since been slowly rebuilt. The district has been part of World Heritage since 1987. Its famous sites are the *Trinity Square (Szentháromság tér)*, its architecture is a mixture of Neo-Gothic and Neo-Romanesque, and of the romantic baronial castle styles; the Cathedral, *Our Lady Church*, a.k.a. *Matthias Church (Mátyás templom)* gained its present form at the end of the 19th century. It was the site of the coronation of Ferenc József (Franz Joseph I) as king of Hungary in 1867, and of king Károly IV (Charles) in 1916. The *Fishermen's Bastion (Halászbástya)* was built in the neo-Romanesque style upon the medieval castle walls. It received its name from the Fishermen's suburb. Behind the Fishermen's Bastion stands the equestrian statue of the first Christian king and founder of the Royal Hungarian state, King István I (St Stephen, 1001-1038), by Alajos (Aloysius) Strobl. Famous buildings include the *Royal Palace (Királyi vár)*, now housing the *Széchenyi Library*; the *Military History Museum (Hadtörténeti Múzeum)*, the *Sándor (Alexander) Palace (Sándor Palota)*, now the office of the state president, as well as the *Hilton Hotel*, built in the 1970s onto the ruins of the medieval Dominican monastery. The *András Hess Square* bears the name of the printer, who printed the first book in one of its houses. The *Táncsics Street* once had a military barrack, where Lajos (Louis) Kossuth, Mihály Táncsics and Count Lajos Batthyány were imprisoned in the mid 19th century. The so-called *Vienna Gate (Bécsi kapu)* provides access from the north. The district is a major tourist attraction and frequented by the citizens of Budapest. – B: 1213, T: 7103.→**Buda Castle; Budapest, History of; Budapest Siege; Most of the persons and events have their own entry.**

**Buda Castle, The ancient** (Hungarian: *Ősbudavár*, Latin: *Sicambria*) – Sicambria, as mentioned in old historic sources and depicted in woodcuts, is the so-called ancient Castle of Buda, built originally by the Scythians is located in the Pilis Range, above Buda (northwest of Buda) in the area of the Pauline friars. The map of the region shows that the course of the Danube forms a heart-shaped triangle with the Danube Bend and the valley along the southwest foot of the Pilis Range. Once there must have been a small river in this valley, because the old sources talk about a Pilis Island. In the center of the heart-shaped area is one of the highest points of the Range: *Dobogókő*. The area also includes the town of Esztergom, the birthplace of the first king of Hungary, István I (St. Stephen,

997-1038); *Dömös*, where once King Béla I (1060-1063) lived; and *Visegrád*, where king Matthias Corvinus (1458-1490) spent some time. Researchers suspect that in the entrance of the Pilis Range, beside *Budakalász*, there stood the ancient Buda Castle, the seat of Attila, the king of the Huns. It later became the center of the Hungarian kings of the House of Árpád. And there is also *Fehérvár*, the great ancient

town that existed up to the time of the Ottoman Turkish occupation. Of the many, who searched for the whereabouts of this town, most recently was Imre Lánszki, an agricultural engineer, who was certain, he found Sicambria, the ancient Buda Castle. The traces of Attila's castle are preserved there, the one-time seat of Attila and Árpád. It was this castle in which, according to the report of Anonymus, Khagan Árpád, on his arrival in the Carpathian Basin, was much taken with its magnificence, and set up residence there. According to Anonymus, Attila was buried next to the ancient castle, at the source of a creek. Reputedly, Árpád's grave was nearby. The Italian humanist historian Antonio Bonfini (ca. 1425-1502), who served the Hungarian royal court from 1484 to 1502, wrote in the late 15th century that king Matthias Corvinus, on his return journey from Visegrád to Buda, rested a few days in the Ancient Buda Castle. Professor of ecology, Imre (Emeric) Lánszki, considers that the latest available woodcut of the castle must have been prepared in 1685. Much later, on the military maps of Emperor-King Joseph II (1780-1790), there was nothing that would refer to the existence of the ancient castle. It is quite probable that subsequent to the expulsion of the Turks, after 1686, the Habsburg authorities had it pulled down. Once the find is proven as valid, more historic monuments could be unearthed on the site, showing the presence of the Magyars in the Carpathian Basin, the Scythian-Magyar historic continuity, and also the history of Hungary during the Árpád Dynasty era. – B: 1031, 1950, T: 7456.→**Scythians; Attila, Árpád; István I, King; King Béla I; King Mátyás I; Anonymus; Bonfini, Antonio; Esztergom.**

**Buda Chronicle** – This is the first book printed in Hungary. Today there are seven known copies of it. It is the *Chronica Hungarorum*, also referred to under the name of *Chronicon Budense*. Printing the chronicle began in András (Andrew) Hess's printing works in Buda in 1472, and was completed on 5 June 1473. Its author presents the history of the Hungarians in Latin, from the times of the Huns to 1472. Its editor made use of the chronicles of Márk Kálti and János (John) Minorite from the Angevin period; also of the biography of King Lajos I (Louis the Great) by János Küküllei. – B: 1150, 1078, 0942, T: 7659.→**Hess, András; Lajos I, King; Kálti, Márk; Kálti, Márk's Illuminated Chronicle; Dubnic Chonicle.**

**Buda, Codex Workshop** – The Renaissance king, Mátyás I (Matthias Corvinus, 1458-1490) not only established and developed the famous *Bibliotheca Corviniana* (*Corvinian Library*) with some 5,000 magnificent codices at Buda, the capital of Hungary, but he set up a workshop where the copyists and miniaturists worked, which became famous from 1470 on. According to the testimony of Archbishop Miklós (Nicholas) Oláh, there were "thirty copyists working for the King". There are three names mentioned in connection with the illumination of Corvinian manuscripts, notably Blandius, Cattaneo, Abbot of

Madocsa, and Felix (Petancius) Ragusinus. The King alluded in a letter to Blandius as ‘*miniator noster* (our miniator). In a speech in 1489 Ransanus praised King Mátyás I for employing carpenters, sculptors, silversmiths, painters, and ‘*transcriptores librorum*’ (book copyists) from every part of Europe. The archbishop said: “Nearly every Greek and Latin manuscript was the work of these scribes. At their head was the Dalmatian Felix Ragusinus, whom I knew personally as an old man, who knew not only Greek and Latin, but also Chaldean and Arabic. Moreover, being well versed in painting he took very good care that the copying of books should be faultless”. The workshop declined after the sudden death of the king and ceased to exist when the Turks occupied Buda in 1541. There are 194 Corvinas in various libraries around the world,– B: 1215, T: 7103.→**Mátyás I, King; Corvina; Oláh, Miklós.**

**Buda, Ferenc** (Francis) (Debrecen, 3 November 1936 - ) – Poet, translator. He studied at the University of Debrecen, obtaining a Degree in Hungarian Literature (1958-1968). He was imprisoned because of his poems (1957-1958). Thereafter he was an unskilled laborer at the Chinoin Pharmaceutical Factory (1958-1963). Later he became a teacher in Pusztavács, Kecskemét and Kerekegyháza (1963-1970). He worked at the Archives of Bács-Kiskun County (1970-1986). He was Chief Contributor for the magazine *Source* (*Forrás*), and acted as secretary of Bács-Kiskun County’s Writers’ Association. His poems have been published since 1955. His understanding of lyrics is based on his childhood experiences and the world of his village and farm. He is a translator of Finno-Ugric and Inner-Asian folk poetry. His major works include *Example of the Grasses* (*Füvek példája*) poems (1963); *Wake Up to the Tune of the Golden-Pipe* (*Ébresszen aranyásíp*) poems (1970); *Magic Song* (*Varázssének*) translation (1973); *The Invisible Thief* (*A láthatatlan tolvaj*) - *Kazak Folk Tales*, translation (1988); *Country of Silence* (*Csöndország*) (1991); *Uttered Word, Shot Arrow* (*Kimondott szó, kilőtt nyíl*), *Turkish proverbs* (1998); *Beyond the Wall* (*Túl a falon*) (2006), and *What is Lacking?* (*Mi hiya van?*) (2006). He received a number of awards and prizes, among them the Attila József Prize (1973), the Hungarian Arts Prize (1993), the Book of the Year Award (1992) and the Kölcsey Prize (2000). – B: 0874, 0879, 0878, 1257, T: 7456, 7103.

**Buda, Medieval Painters from** – Several documents contain the names of artists from Buda, who worked under Magister H. (Henricus) with the title “*Pictor Domini Nostri Regii*”. Two tombs dating from the middle of the 14th century and from 1370 are known to be the graves of painters Ábel and János (Abel and John). Other documents make reference to a master Miklós (Nicholas) Meggyesi, who lived at the Royal Court of King Lajos I (Louis the Great, 1342-1382). At the time of King Zsigmond’ reign (Sigismund of Luxembourg, 1387-1437) painter Bertalan (Bartholomew) was living in his own house in Buda. There is documentation that in 1424 a painter from Buda painted the portrait of Prince Erik of Denmark. – B: 1185, T: 7653.→**Lajos I, King; Zsigmond, King;**

**Buda, reconquest of, in 1686→Reconquest of Buda in 1686.**

**Buda Synods** – (1) On 14 September 1279, the last day of the Council, Fülöp (Philip), the papal legate announced its decisions. They were to control the actions of the clergy, determine their morality, the clothes they wore, the scope of their authority, and to forbid the clergy’s participation in ordeals. It prohibited the people to dance in churches and cemeteries. By the goodwill of Christians, the Jews living peaceably among them had to wear a red circle on their left breast, while the Ishmaelites and the Saracens had to sew a yellow circle onto their clothing for identification. It also controlled their participation in

tax and customs cases.

(2) The General Synod of the Reformed Church was held from 10-13 September 1791. The Diet, by Act XXVI of 1790/1791, after decades of persecution, declared the freedom of religion for the Protestant Churches, although still with some restrictions. In this new situation the Synod's task was to define the church's form of government and worship. – B: 0942, T: 7668.→**Jews in Hungary.**

**Budai, Ézsaiás** (Isaiah) (Pét, 1 May 1796 - Debrecen, 14 July 1841) – Bishop of the Reformed Church, historian, classical philologist. He was educated at the Reformed College of Debrecen; later, between 1792-1794, studied in Göttingen, Germany, Oxford, England, and Holland. He became a professor at the Reformed College of Debrecen in 1794. He was much respected for his great knowledge and high intelligence. He fought for the use of the Hungarian language in education that became compulsory in 1797. He wrote a number of books, among them his main work, the *Common History* (*Közönséges história*) (1800-1808); *History of the Old Knowledgeable World* (*A régi tudós világ históriája*) (1802), and *History of Hungary vols. i,ii,iii* (*Magyarország históriája I,II,III*). In it he used all sources available to him; it is regarded to be the first scientific Hungarian history handbook, and Budai as the vanguard of Hungarian classical philology. He was consecrated bishop in 1822. The poet Mihály (Michael) Csokonai Vitéz was among his students. – B: 0883, 1031, T: 7103.→**Csokonai Vitéz, Mihály; Budai, Ferenc; Uri, János.**

**Budai, Ferenc** (Francis) (Pét, 1760 - Szovát, 1802) – Historian, older brother of Ézsaiás (Isaiah) Budai. He pursued his education at the Reformed College of Debrecen, and was Minister in the Reformed Church at Szovát (Magyarszovát, now Suatu, Romania) until his death. He was an intensely keen student of the scientific and literary life of his time with a great knowledge of the Hungarian language; he was among the first expositors and critics of Emmanuel Kant's philosophy. Many 19th century writers, including János Arany used his historical encyclopedia as a source for their epic stories. – B: 0883, 1257, T: 7659.→**Arany, János; Budai, Ézsaiás.**

**Budai, Gergely** (Gregory) (Dunavecse, 3 March 1887 - Budapest 8 January 1974) – Minister of the Reformed Church, theologian, writer. He completed his high school studies at Kunszentmiklós and Csurgó (1897-1905). He studied theology at the Reformed Theological Academy, Budapest (1905-1909). He was an assistant minister and teacher of religion in Szolnok (1909-1911) and Budapest (1911-1918), then Director of Religious Education, Budapest (1918-1935). In the meantime he read Philosophy, Classical Philology, Pedagogy and Linguistics at the University of Budapest (1917-1924), and obtained a Ph.D. in Education. He was Lecturer, then Professor of New Testament Sciences at the Reformed Theological Academy of Budapest (1935-1954). He edited the *Reformed Church Library* series. His major works include *Why and How do We Study the Bible?* (*Miért és hogyan tanulmányozzuk a Bibliát?*) (1925); *Principle of Practical Theology in the New Testament* (*A gyakorlati teológia alapelve az Újtestamentomban*) (1925); *Our Religion* (*A mi vallásunk*) (1927); *Main Rules of the New Testament's Hermeneutics* (*Az újtestamentomi hermeneutika főbb szabályai*) (1941), and *The New Testament, a Complete Translation from the Greek Original* (*Az Új Testamentum, Görögből magyarra fordítva*) (1969). He was appreciated mainly for the education of generations of ministers. – B: 0910, T: 7103.

**Budai, László** (Leslie) (Bednarik, Budai II, nickname: humped) (Budapest, 19 July 1928

- Budapest 2 July 1983) – Soccer-player and coach. Budai started his career on the Huttler team, and moved to Ferencváros TC, later to the Honvéd Army team and the National Team, and played as a midfielder and forward. During the 1950s, he was a member of the legendary Hungarian national team known as the *Golden Team*. He was a winger with Sándor (Alexander) Kocsis. During his career, Budai won four Hungarian League titles. The first of these came at the Ferencváros TC in 1949. During the Communist regime he was conscripted into the Army Team, the Honvéd, together with Czibor and Kocsis. While at Honvéd, Budai won a further three league titles and the Mitropa Cup. As one of the Golden Team, he helped Hungary become Olympic Champion in 1952 and Central European Champion in 1953. He also played on the Hungary side that defeated England 6-3 at Wembley Stadium in London. During the 1954 FIFA World Cup, he played in the group stage. However, he was dropped for the final. After his retirement, he was coach of the Army's Football Division. The Stadium of Rákospalota, REAC, was named after him. – 1031, 1105, T: 7103.→**Kocsis, Sándor; Czibor, Zoltán; Golden Team.**

**Budai, Livia** (Esztergom, 23 June 1950 - ) – Opera singer (mezzo-soprano). Her higher studies were at the Ferenc (Franz) Liszt Academy of Music, Budapest, where she was the student of Olga Révhegyi and András (Andrew) Mikó. After she won a prize in Sofia, singing by the hand sign method introduced by Zoltán Kodály, she made her debut in 1973 as Mamma Lucia in P. Mascagni's *Cavalleria Rusticana (Parasztbecsület)*. From 1973 to 1977 she was member of the State Opera House, Budapest, and was also a concert and oratorio singer. Soon after she went to West Germany and joined the City Theater in Gelsenkirchen (1977), where she had success in the role of Eboli in Verdi's *Don Carlos*. Great successes followed, which include guest appearances in Hamburg and at Covent Garden in London, at the Opera of San Francisco (1979), at the Deutsche Oper Berlin, at the Teatro Liceo in Barcelona (1979), at the State Opera of Munich, whose member she was in 1980; at the Teatro Comunale of Bologna (1983), at the Théâtre de la Monnaie in Brussels (1984), at the Opéra de Wallonie, Liège (1984), at the Opera of Monte Carlo (1987), at the State Opera of Vienna (1987), at Teatro Regio, Torino (1987), and at the Metropolitan Opera, New York (1987). Her roles include Preziosilla in G. Verdi's *La forza del destino (The Force of Destiny)*; Flora in G. Verdi's *La Traviata*; Azucena in G. Verdi's *Il Trovatore*; Laura in Ponchinelli's *La Gioconda*; Fricka in R. Wagner's *Die Walküre*; Kundry in R. Wagner's *Parsifal*; Dalila in C. Saint-Saëns' *Samson et Dalila*; Cassandre in H. Berlioz's *Les Troyens*; Clytemnestra in R. Strauss' *Electra*; Herodias in R. Strauss' *Salome*; title role in G. Bizet's *Carmen*, and Gertrude in F. Erkel's *Bánk bán*. Memorable is her rendition of Verdi's *Requiem*. Her recordings are under the labels of Qualiton, Ariola, Plate, Denon, Helicon and CBS. Livia Budai is one of the renowned vocalists of the world. She lives in Montreal and Budapest. Among her distinctions are the Kodály Prize (1976) and the Pro Culture Hungarica Prize (2010). – B: 1031, T: 7103.→**Kodály, Zoltán.**

**Budai Nagy, Antal** (Anthony) (Antal Nagy de Buda) (? - Kolozsvár, now Cluj-Napoca, Romania, 10 or 14 December 1437) – Military leader, politician, leader of the 1437 Transylvanian (*Erdély*, now in Romania) peasant uprising. His family got their name from the township Nagybuda (Bodonkút, now Vechea, Romania) in Transylvania. The higher nobility of Transylvania weighed down the peasantry with increasingly excessive taxes in the 1430s. In particular, the debasement of the currency under King Zsigmond

(Sigismund of Luxemburg, 1387-1437) caused considerable outcry and hostility. What is more, Bishop György (George) Lépés anathematized from the Church those peasants and gentry, who were not willing to pay the tithe. As a result of the cruel suppression of the gentry, many peasants and members of the lesser nobility became believers in the doctrines of Ján Hus. Antal Budai-Nagy, together with many of the gentry, affected by the excessive tithe, joined the gathering peasants on Mount Bábalona. All those present elected him their leader. After the Voivode László (Ladislav) Csáki had the envoy of the peasants killed, Budai-Nagy gathered the Hungarian and Wlach (now called Romanian) peasant armies and had some of them organized into wagon barricades; at Dés (now Dej, Romania) they defeated the mounted forces sent against them by the nobility. The nobility was forced to enter reluctantly into negotiations with the insurgents and their leader, and made an agreement at Kolozsmonostor (now Cluj-Mănăştur, Romania); lessened the amount of tithe, abolished the ninth, the serfs received the right of free movement from one estate to another, and the right of making their own wills; the peasants could also hold annual general meetings. But as soon as the nobility could gather a stronger military force, they broke the agreement, and attacked the peasant army. But at Apáti (now Apateu, Romania) Budai Nagy's peasant army again defeated the army of the nobility and successfully marched into Kolozsvár. A second agreement was made at Kolozsmonostor, followed by more clashes. The protracted engagements led to a weakening of Budai-Nagy's forces by losses and withdrawals. The forces of the Transylvanian nobility moved against Kolozsvár, the peasants fought valiantly, but their leader, Budai Nagy fell, after which the resistance soon collapsed. Some centers of resistance continued fighting on in northern Transylvania and in some parts of the Trans-Tisza River area, until the fall of Kolozsvár on 8 January 1438. A high school in Budapest and a special high school at Nagykálló bear his name. – B: 1031, 1122, T: 7456. → **Zsigmond, King.**

**Budai, Simon** (16th century) – Writer of poems at the beginning of the century. As an exiled minstrel, he and his lute were also known in Spain, where he performed his poems at the royal court, written in seven different languages (Hungarian, Latin, Greek, German, Polish, French and Turkish) and enjoyed an enthusiastic reception. – B: 0942, T: 7659.

**Budapest** – The Capital City of Hungary with 2 million inhabitants spreads on both banks of the River Danube with Buda on its right and Pest on its left bank. The two towns and Óbuda were united under the name of Budapest in 1873. This is the largest city in the Carpathian Basin. The area has been populated since prehistoric times. The first town was built by the Celts along the slopes of Gellért Hill. It was called *Ak Ink*, meaning spring rich in water. Romans occupied the town at the beginning of the 1st century. In 106 AD *Aquincum* (nearby Óbuda) became the capital of the province *Pannonia Inferior*. The headquarters of the governor and important military forces were stationed there and its population increased to about 20,000. The city was frequently involved in wars on the border of the Roman Empire. In the early 5th century the Huns replaced the Goths, who broke the Roman *limes* (defense lines); and after the collapse of their empire, Gepids, Longobards and Avars occupied it, the latter for 200 years. The Franks followed the Avars. The Hungarians (*Magyars*) appeared in 895; however proto-Magyars were there much earlier. The Magyars established the seat of their Ruling Prince (Leader) Árpád at the nearby Csepel Island. The princely seat was moved to Esztergom in 973,

and returned to Obuda only in the thirteenth century. After the Tartar-Mongol invasion

(1241-1242) significant fortification work began by King Béla IV (1235-1270) all over the country, including Buda, and a walled city was built on Castle Hill. In the Middle Ages Buda gradually emerged from among the Hungarian towns and it reached its peak during the rule of the Renaissance King Mátyás I (Matthias Corvinus, 1458-1490). At that time the rule of the

Hungarian Crown extended from the Baltic to the Adriatic Sea, with Buda as the center of the Kingdom. At the turn of the 15-16th centuries the population of the present Hungarian Capital stood at roughly 25,000-30,000 – a big city in Central Europe in those days, ranking with Vienna, Prague and Krakow. At that time on the Balkans there was no city of comparable size that had a population over 5,000. A long decline followed the city's prosperity when it came under Turkish occupation for 145 years. When Buda was liberated from Turkish rule in 1686, it became a provincial center. Even the Diet moved to Pozsony (now Bratislava, Slovakia) and stayed there until 1848. During the 18th century the city slowly recovered and the population began to grow. The 19th century was dominated by the nation's struggle for independence. Its culmination was the Revolution and War of Independence against the Habsburgs that began in the Capital in 1848; but was defeated with Russian help a year later. Compromise was reached in 1867. This made the city the twin capital of the Austro-Hungarian monarchy. With it a new phase of development started, lasting until World War I. This was the period of rapid industrialization, urban growth and cultural enrichment. After World War I, as a result of the Versailles-Trianon Dictated Peace Treaty (1920), Budapest was the capital of a country one-third of its former size. Despite this, the city developed until World War II. Following the heavy aerial bombardments by the Allied forces, it suffered the siege of the Soviet army from Christmas 1944 to 13 February 1945, leaving the city in ruins. No sooner had the city recovered than an uprising broke out against the oppressive Communist regime on 23 October 1956, developing into a revolution and freedom fight. It was crushed by the Soviet military on 4 November 1956, causing heavy damage. During the ensuing Kádár era the city recovered and improved. Since 1990, the Capital City is having a moderate development under democratic governments. – B: 1216, 7103, T: 7103.→**Aquincum; Attila; Mátyás I, King; Buda Castle; Buda Castle District; Budapest Siege.**

**Budapest Glossary** – This is a renowned literary record from the 15th century. Marginal and interlinear notes explain the Latin text and phrases. It does not provide a coherent text; but the size of the work is relatively large and is therefore significant. There are many rare and archaic words and word forms in the notes. – B: 1141, T: 7659.

**Budapest, Peace Treaty** – Peace Treaty between the United States of America and Hungary, signed on 31 August 1921. The Hungarian Government enacted this as No. XLVIII/1921. The rationale was that the United States had not recognized the Versailles-

Trianon Peace Treaty of 1920. In this new agreement Hungary secured for itself the same rights as allocated to the Allies and their coalitions. The United States of America did not guarantee the new state borders created by the Versailles-Trianon Treaty; but in 1947 they subsequently gave recognition to its decisions in the Paris Peace Treaty. – B: 1078, T: 7668.→**Trianon Peace Treaty; Paris Peace Treaty.**

**Budapest, Siege of** – During World War II, on 16 December 1944, the Soviet Army's 2nd and 3rd Ukrainian Division under the leadership of Marshalls Malinovszkij and Tolbuchin, encircled Budapest and the siege of the Hungarian capital began. 200,000 German and Hungarian soldiers defended it against the superior enemy power. After Pest fell into the hands of the Soviets, the defenders retreated to Buda on 18 January 1945. The retreating German units blew up the bridges over the River Danube. Buda fell on 13 February 1945, after the surrounded defenders from the Buda Castle tried a breakthrough, which failed with terrible losses, and with it the siege of Budapest ended. The siege lasted 59 days, involving street-to-street and house-to-house fighting, the defenders being without any new supply of ammunition or food, even for the civilian population and without public services. During the siege, 19,718 Hungarian and German soldiers were killed in action, including more than 3,000 Hungarian policemen in addition to the 25,000 civilians. The Soviet Army lost 70,000 soldiers and officers in action. After the battle, 138,000 Hungarian and German soldiers were taken prisoners. During the siege, 32,753 houses were completely demolished, while most of the office buildings and almost all buildings of any kind were damaged; all the seven Danube bridges were blown up. The sacrifice in the defense of the Hungarian capital caused a significant delay in the advance of the Soviet army. – B: 1217, T: 7668.→**World War II, Hungary in; Hitler, Adolf; Horthy, Miklós; Szálasi, Ferenc.**

**Budavár, Recapture of** – On 18 June 1686, the army of the Holy League consisting of volunteers from all over Europe, led by Charles of Lotharingia, began the siege of the Fortress of Buda. Some 65,000 were engaged in the attack, 15,000 of them Hungarians. Although this was a small portion of the attacking troops, the majority of the cavalry were Hungarian Hussars, who had a decisive role in the defeat of the Turkish troops when they arrived to liberate the fortress. Among the Hungarian commanders were Miklós (Nicholas) Bercsényi, János (John) Bottyán, János (John) Fiáth and Dávid Petneházy. 10,000 Turks defended the fort under the command of Arnót Abdurraman. Three attacks were launched against the fortress, the last occurring at 6 am on 2 September; by 7 pm the fortress was liberated from 145 years of Turkish rule. This event was also an important turning point in the Ottoman-Turkish rule of Central Europe. – B: 1218, T: 7668.→**Bercsényi, Count Miklós; Bottyán, János; Fiáth János; Marsigli, Count Luigi Ferdinando; Lothringen, Prinz Karl Leopold von; Savoyenor, von Eugen; Sobieski III, John; Thököly, Prince Imre; Esztergom; Reconquest of Buda, in 1686; Petneházy, Dávid.**

**Buday, Árpád** (Marosgeze, now Gheja, Romania, 17 January 1879 - Szeged, 7 April 1937) – Archaeologist. His higher studies were at the University of Kolozsvár (now Cluj-Napoca, Romania). From 1900 he worked at the Antiquity Department of the Transylvanian Museum; later he became its Head. He made extensive study trips to Russia, as well as to the Greek islands and Asia Minor, the sites of former classical cultures. In 1910 he led a research expedition to Albania. His main field of research was

the *Limes Dacicus* of the Roman age. He published his works while a professor at the University of Szeged. The main body of his work is a study on *Roman Scriptology (Római felirattan)* (1914). – B: 0883, 1091, T: 7103.

**Buday, György** (George) (Kolozsvár, now Cluj-Napoca, Romania, 1 April, 1907 - London, 12 June 1990) – Graphic artist, stage and book-designer, typographer, wood engraver and journalist. He obtained a Ph.D. in Law from the University of Szeged in 1924. He was one of the founders of the College of Art of the Szeged Youth, where under the leadership of Ferenc (Francis) Hont, he also dealt with the problems of modern drama and theater. During 1931-1933 he was stage designer for several performances of the Szeged City Theater, as well as for the first open-air performances in Szeged, beginning with the great universal drama *The Tagedy of Man (Az ember tragédiája)* by Imre (Emeric) Madách. In 1936 he was on a scholarship in Rome. In 1937 he was awarded the artistic Grand Prix at the Paris World Exhibition. From 1939 he lived in London. His graphics and designs are characterized by strong intellectual energy. His style is rooted in Hungarian traditions, and the sharp contrast in the light-shadow effects. His wood engravings decorate several books of Gyula (Julius) Ortutay and the volumes of Radnóti, Mauriac and others. Outstanding are his illustrations for the books of such greats of the Hungarian literature as János (John) Arany, Imre Madách and Áron (Aaron) Tamási. Created magnificent series of illustrations and wood engravings for ballads and dramas. He participated in the anti-fascist émigré movement during World War II. He was an honorary freeman of the City of Szeged (1990). – B: 1257, 1445. T: 7456.→**Arany, János; Madách, Imre; Radnóti, Miklós; Ortutay, Gyula, Tamási, Áron; Hont, Ferenc.**

**Budenz, József** (Joseph, Josef) (Rasdorf, Germany, 13 June 1836 - Budapest, 15 April 1892) – Hungarian linguist of German origin. His higher studies were at the Universities of Marburg and Göttingen. His field of research was Greek-Latin Philology, and Indo-European Comparative Linguistics. In 1858, by the invitation of Pál Hunfalvy (Hunsdorfer), he came to Hungary for studying the Hungarian language. For two years he worked as a teacher at the Cistercian High School of Székesfehérvár. He moved to Pest in 1860, and worked as a teacher. In 1861 he became a librarian at the Hungarian Academy of Sciences Library. From 1868 he was an honorary lecturer at the University of Budapest, where he became a professor of the Ural-Altai Linguistic Department (1872-1892). He introduced the hypothesis of the Finn-Ugric (Finno-Ugrian) language relationship, which has never been conclusively proven. He fought a literary battle with Áron Vámbéry over Hungarian-Turkish language relations. He was a member of the Academy of Sciences (corresponding 1861, regular 1871). He was also member a number of learned societies abroad. His many articles appeared in the *Linguistic Review (Nyelvtudományi Közlemények)*. His books include *Hungarian-Ugric Comparative Dictionary (Magyar-ugor összehasonlító szótár)* (1871-1881) and *Comparative Morphology of the Ugric Languages (Az ugor nyelvek összehasonlító alaktana)* (1884-1894), edited by Zs. Simonyi. A school in Budapest bears his name and there is a memorial tablet featuring him on the wall of University of Szeged. – B: 0883, 1031, T: 7103.→**Sajnovics, János; Hunfalvy, Pál; Vámbéry, Áron; Finnish - Hungarian Language Relation; Tarih-i Üngürüşz.**

**Bugár, Béla (1)** (Pozsonyeperjes, now Jahodna in Slovakia, 18 April 1931 - Rév-

Komárom, now Komarno, Slovakia, 20 May 2011) – Actor. From 1950 to 1952 he was actor at the Hungarian section of the Traveling Theater of Pozsony (now Bratislava, Slovakia). He was one of the founders of the Hungarian Regional Theater (*Magyar Területi Színház – MATESZ*) of Rév-Komárom, and its actor from 1954 to 1991 (from 1989 that of its successor the Jókai Theater). Between 1977 and 1990 he was member of the Slovakian Drama Association. His roles include Lucentio in W. Shakespeare's *Taming of the Shrew* (*Makrancos hölgy*); Ferdinand in F.J. Schiller's *Love and Intrigue* (*Ármány és szerelem*), Komárom (1958); George in J. Steinbeck's *Of Mice and Men* (*Egerek és emberek*), Rév-Komárom (1964); János Korponay in Mór Jókai's *The White Woman of Lőcse*, (*A lőcsei fehér asszony*) (now Lovice, Slovakia), and Zoltán Szakhmáry in Zsigmond Móricz's *Gentleman's Fun* (*Úri muri*), Rév-Komárom (1966). From 1953 he has acted in radio plays for the Hungarian broadcasts of Radio Pozsony, while from 1970 on he performed leading roles in Slovakian films. He was a lifetime member of the Jókai Theater of Révkomárom. He received the title of Model Worker of Culture (1988), and he was Life Member of the Jókai Theater (2008). He was a renowned Hungarian actor of Northern Hungary (Upland, *Felvidék*), now Slovakia. – B: 1083, 1890, T: 7456.

**Bugár, Béla (2)** (Pozsony, now Bratislava, Slovakia, 7 July 1958) – Politician, mechanical engineer. He graduated from the secondary school of Somorja (now Somorin, Slovakia) in 1977. He obtained a Degree in Mechanical Engineering from the Mechanical Academy of Pozsony in 1982. From 1983 to 1990, he worked as designer technician for the Heavy Mechanical Firm, Pozsony. From 1990 he was a member of the Czechoslovak Federal Parliament, Prague, on behalf of the Hungarian Christian Movement. He was one of its founders in 1990. He was a member of the Attila József Youth Club, Pozsony (1977-1983), and from 1984, was member of *CSEMADOK* (Czechoslovakian Hungarian Social and Cultural Alliance – *Csehszlovákiai Magyar Társadalmi és Kulturális Szövetség*). Following Slovakia's independence on 1 January 1993, he was soon elected President of the Hungarian Coalition Party of Slovakia (*Szlovákiai Magyar Koalíciós Párt - MKP*) (1998-2007); he was a member of the Slovak National Assembly (Parliament), and Deputy President of the National Assembly of the Slovak Republic (1998-2006), and was its acting president in 2005-2006. After the election of 2006, the MKP lost its former status and became one of the opposition parties. In 2009 he founded the new *Most – Híd Party* (*Bridge – Bridge Party* (*Most* – in Slovakian: *Bridge*)). The Party won 14 seats at the Parliament in the 2010 election, and has three ministerial positions in the Government. His book entitled *I live In Such a Country...* (*Olyan országban élek...*), with L. Szigeti (2004). – B: 1083, 1890, T: 7103.

**Bugát, Pál** (Paul) (Gyöngyös, 12 April 1793 - Pest, 9 July 1865) – Physician, language reformer. He graduated in 1818 and obtained his Medical Degree from the University of Pest. He practiced medicine first in Bakabánya, later in Selmecebánya (now Banská Stiavnica, Slovakia). Between 1824 and 1849 he was professor of Theoretical Medicine and twice Dean of Pest University. The Committee of National Defense appointed him National Chief Physician in 1848, but was deprived of his university chair after the collapse of the War of Independence of 1848-1849. He developed the Hungarian language for the professions of medical and natural sciences (appetite, nerve, muscle, fever, abscess, etc). He was an outstanding personality not only for Hungarian medical history but also for the whole history of Hungarian science. – B: 0883, 1257, T: 7660.→ **Freedom Fight of 1848-1849.**

**Building Site Sacrifice** – According to popular belief not every place brings good luck; therefore not every place is suitable for a home or a building. This belief was evident not only among primitive tribes but also among contemporary European nations. Jordanes, 6th century Roman bureaucrat wrote concerning the Huns that when they reached the border of Sycythia they drew lots who should be the first to enter; then they sacrificed him in order that the nation should be fortunate in conquering the land. According to the chronicles this was the fate of chieftain Álmos when his people arrived to the chosen land. He was sacrificed as appeasement in order that his people should be fortunate when conquering the chosen land, their future home. Nowadays the ceremonial immurement of various scripts or objects in the foundation (corner) stone of a building is the remnant of former blood sacrifices. At one time through propitiation man bought the right to build the property from the guardian spirit of the soil. Human sacrifice was customary through immurement, especially in castles and fortresses, but also in other buildings. In Hungarian folklore the story of the wife of stonemason Kelemen Kőmives is preserved in a folk ballad. She was immured in the fortress walls of Déva, Transylvania. B: 0942, 1078, T: 7682. → **Huns; Álmos; Jordanes; Kőmives, Klemen, Mrs.**

**Bujtor, István** (Stephen Frenreisz) (Budapest, 5 May 1942 - Budapest, 25 September 2009) – Actor, stage manager. His higher studies were at the University of Economics, Budapest, where he graduated in 1965. At first he worked as manual laborer and waiter. He received his first film role in 1964. He was on the stage of the Circle Theater (*Körszínház*) in 1966. Soon he was acting in the Kisfaludy Theater (*Kisfaludy Színház*) at Győr and, in 1968, he worked at the Attila József Theater (*József Attila Színház*), Budapest. In 1971, he was with the National Theater (*Pécsi Nemzeti Színház*), Pécs; in 1976, he acted at the Comedy Theater (*Vígyszínház*), Budapest; from 1978 to 1988 he worked with the Mafilm troupe; between 1989 and 1998 he was with the Vörösmarty Theater (*Vörösmarty Színház*), Székesfehérvár and from 1990 he was manager of the Bujtor Film Co. His major stage roles include Stanley Kowalski in T. Williams' *A Streetcar Named Desire* (*A vágy villamosa*); Petrucchio in Shakespeare's *The Taming of the Shrew* (*Makrancos hölgy*), and Lennie in Steinbeck's *Of Mice and Men* (*Egerek és emberek*). There are some 48 filmroles to his credit, including *The Baron's Sons vols. i,ii* (*A köszívü ember fiai I, II*) (1964); *Boys from the Square* (*Fiúk a térről*) (1967); *I am Jerome* (*Én vagyok Jeromos*), (1970); *The Pendragon Legend* (*Pendragon legenda*) (1974); *Magellán* (1977); *The Pagan Madonna* (*A pogány Madonna*) (1980); *The Three Muskeeters in Africa* (*A három testőr Afriában*) (1980), and *Comedians* (*Komédiások*), (1999). He also stage-managed a number of plays, including Steinbeck's *Of Mice and Men* (*Egerek és emberek*), Kerr's *Mary, Mary*; Molnár's *Liliom* (later adapted by Rodgers and Hammerstein as the musical *Ceausel*); and Calude Magnier's *Oscar*. He was national sailboat champion in 1977 and Co-President of the National Basketball Association. He was a popular actor, half-brother of actor Zoltán Latinovics, who died tragically. He was a recipient of the Béla Balázs Prize (1979) and the Film Critics' Prize (1979). – B: 0874, T: 7103. → **Latinovics, Zoltán.**

**Bükk National Park** – No less than 90% of this National Park (located in northeast Hungary bordered by Slovakia on the north, covering over 43,200 hectares, was established in 1976) is covered by forest. The limestone surface making up the Bükk Hills is varied and hides between 500-600 caves in its depths. The total length of these caves extends to some 35 km. Bükk karst water requires neither filtration nor

chlorination, for this reason it is a vital water supply for towns and villages in the region. Crags and rocky cliffs, particularly attractive formations in the National Park, afford excellent vantage points from where to view the landscape near and far. One particularly famous site is the stepped waterfall (with a fall of 17 metres) on the Szalajka stream. The forests are mostly beech (*Fagus sylvatica*). One area is the renowned Ancient Forest, where there has been no deforestation for a century now. Fossilised flora dating back to the Ice Age has also been found; many of the caves have yielded up rich collections of Stone Age tools. Many local museums display natural and historical artifacts of the area. It has well-developed tourist facilities dominated by the *Palota Hotel* of Lillafüred. Its forest railway system is widely used by tourists. – B: 1051, 1546, T: 1546, 7656.

**Bukovina** – A historical land area east of the Carpathian Mountains towards the River Dniester in the Ukraine and Moldavia. In the Hungarian language the name means “beech forest” or “beech country”. During the Roman Empire it was part of the province of Dacia. In 375 the Huns occupied the land. In the 6th century Slavic Ruthenian pastoral tribes settled the region. The Mongol invasion in 1271 was begun against Hungary from Bukovina; but they were successfully rebuffed. The Hungarians also repulsed the next attempt from Bukovina by the voivode of Moldavia in 1330. During the reign of King Lajos I (Louis the Great, 1342-1382) the area was part of the Kingdom of Hungary. The region had a turbulent history and involved numerous foreign occupations. It became part of the Habsburg Empire under Empress Maria Theresa after the division of Poland in 1774. At the conclusion of World War I, it became part of Romania. In the aftermath of World War II, its northern section became part of the Soviet Union. After the dissolution of the USSR, that part of Bukovina passed into the possession of Ukraine, while the southern portion, including several Hungarian villages, became part of Romania. – B: 0942, 1138, T: 7656.→**Huns; Lajos I, King; Mária Terézia, Empress and Queen; Bukovina, Hungarians of; Csángó.**

**Bukovina, Hungarians of** – From time to time small groups of Hungarian settlers left the Carpathian Basin and moved back to Bukovina, on the eastern slopes of the Eastern Carpathian Mountain range. The rampaging Mongol-Tartars caused great devastations among the Hungarian settlers during the 13th century. Later the Wlach (now Romanian) voivodes, by overtaxing the original Hungarian population, caused a large-scale emigration. The “Mádéfalva Peril” (*Mádéfalvi veszedelem* or *Seculicidium*) in Transylvania (*Erdély*, now in Romania) took place on 7 February 1764. The triggering event was the village’s resistance to forced conscription of its men into the Imperial Army. On that day Imperial Governor, General Siskowicz ordered Lieutenant-Colonel Carato to storm Mádéfalva with his troops. After a deadly barrage of canons, some 200 innocent villagers were massacred and many others seriously wounded. This cruel punitive action caused a mass exodus, when tens of thousands of Szeklers fled to Bukovina from the spreading terror in Transylvania. Empress Maria Theresa laid hands on the Bukovina region in 1775. To remedy the vast population loss following the Turkish occupation, the Imperial Throne sought settlers to repopulate Bukovina. Count András (Andrew) Hadik, governor of Transylvania successfully petitioned the Viennese court and obtained pardon for the Szeklers and Hungarians, who previously fled, in order to encourage their resettlement in the sparsely populated areas, a process which took place between 1784 and 1786. In Bukovina they established 11 villages, *Istensegíts* and *Fogadjisten* among them. In 1785 the villages of *Hadikfalva* and *Józseffalva* were

created. There were Ukrainians, Germans, Romanians and Jews in their neighbourhood. In 1883 a movement began in Hungary to resettle in Hungary those Hungarians who lived in Bukovina. At this time most of the population from around *Fogadjisten* village, totalling around 4,000 people, was repatriated and settled along the lower Danube region, where they became the “lower Danube Szeklers”. By 1903 the number of Hungarians left behind in Bukovina totaled approximately 12,000. Between 1900 and 1910 further groups, numbering between 2,000 and 3,000, were settled in different parts of Transylvania. A new, significant emigration took place between 1904 and 1914, this time to Canada and the United States, where they settled as farmers. In Canada’s Saskatchewan Province such villages as *Esterházy*, *Máriavölgy* and *Seklerland*, among others, were founded. The emigration following World War I resulted in the founding of *Boldogasszonyfalva* in Brazil, South America, whose settlers were Szeklers originally from Bukovina. In 1940, according to local Church sources, the number of Hungarians remaining in Bukovina was over 17,000. During June 1941, another repatriation movement resulted in bringing back 13,500 Hungarians and settling them in the Bácska region, south of the city of Szabadka, Hungary (now Subotica, Serbia), in 10 abandoned Serbian villages. While Bukovina was under Austrian jurisdiction, Hungarian students received education in their native language. After the end of World War I, the Hungarian teachers were replaced by Romanians. After World War II, Hungarians from Bukovina were resettled in villages of Hungary, such as Hidas, Bonyhád, Kakasd, Újlengyel, etc. Folk traditions and ways of life in these Hungarian villages remained somewhat archaic due to their long isolation. Today, they form a substantial and solid ethnic block together with the Moldavian Hungarians, in their fight against assimilation efforts by the Romanians, who falsely consider the Csángós as “Hungarianized Romanians”. Recently, an international team found that the Csángós are indeed from archaic Hungarian stock. After the political change in the 1990s, Hungarian elementary schools are beginning again to operate in the Csángó settlements of Bukovina. – B:1042, 1230, 1134, 1270, T: 7103.→**Csángó; Mádéfalva Peril (Seculicidium); Maria Terézu. Empress and Queen; Canada, Hungarians in; America, Hungarians in the USA.**

**Bulak People** (*Blaci, Blakok*) – When the Hungarians arrived in the Carpathian Basin in 895, they found the remnants of some former ruling peoples scattered around: Avars, Szeklers, Bolgars, Slavs, and among them the Bulaks (or Blachi, Blacki, Blachus, Bulaq). The Bulaks were living in Transylvania (*Erdély*, now in Romania) on mountain slopes. Anonymus, the late 12th century Chronicler called them “*blacus*”; Simon Kézai, the 13th century Chronicler refers to them as “*blacki*”. King András II (Endre, Andrew, 1205-1235) named their land as “*Terra Blacorum*”. They belonged to a Karluk-Turkish tribe originating from the Talas River Valley of present day Khyrgistan. They used a type of runic writing somewhat similar to the Hungarian-Szekler runes. They led a pastoral life and resisted the Hungarians. Finally, their two leaders, Menumorut (Ménmarót) and Gelu were defeated. Romanians claim that the Blachi people were Wlachs, ancestors of the present-day Romanians, because they lived in Transylvania before the Hungarian conquest. Thus, by right of priority, Transylvania was their land. However, historical documents show that the Wlachs appeared only in the 13th century in Transylvania, fleeing from the invading Tartars forces. – B: 1219, 2019, T: 7103.→**Anonymus; Kézai, Simon; András II, King; Daco-Roman Theory.**

**Bulányi, György Sch.P.** (George) (Budapest, 9 January 1919 - Budapest 6 June 2010) –

Piarist priest, teacher. During 1936-1938 he completed an Arts course at the Piarist Teachers College, majoring in Hungarian and German; then, during 1938-1943, he took the same course at the University of Budapest. He was ordained priest in 1943 in the Piarist Order. From 1943-1948, he was a teacher in the Piarist high schools of Sátoraljaújhely, Tata and finally Debrecen. From 1948, he became University Pastor in Debrecen. It was here that he began organizing the "small-fellowship" activity, widely becoming known as "Bush" (*Bokor*). This was considered an illegal, anti-state organization by the authorities of the hard-line Communist regime of the Stalinistic era. In 1952 he was sentenced to life imprisonment. He was freed in 1956, and served as an auxiliary priest at the Inner City Parish Church, Budapest. He was arrested again in 1958, and released only in 1960. He worked as a transport employee until his retirement in 1979. After that he was preoccupied with writing his "heretical" work, the *Church System (Egyházrend)*. Then in 1982, an ecclesiastical court condemned his theological tenets and the Episcopacy deprived him of his right to carry on public pastoral activity. His teachings (which included refusal of military service on religious principles) were reviewed by the Theological Congregation of the Holy See; its prefect was Joseph Ratzinger (the present Pope Benedict XVI), who charged him in a letter to withdraw his "erroneous, dangerous and ambiguous tenets", that Bulányi put forward in his writing *Church System (Egyházrend)*. In it he was suggesting that the Church of the future could have a structure other than the present one, namely a system built on *basic* communities or "small fellowships", with the amendment that "one can only obey one's conscience". Bulányi finally signed the 12-point papal document with a compromise only in February, 1997. The Hungarian Catholic Episcopacy informed the public of Bulányi's rehabilitation on 10 September, 1997. His other works include *Holy Orders – Is Obedience a Virtue? (Egyházrend – Erény-e az engedelmesség?)* (1989); *Where shall I Go? (Merre menjek?)* (1991); *Shall We Inherit the Earth? (Örököljük a Földet?)* (1992); *Good Friday Letter (Nagypénteki levél)* (1993); *They Laid Him in the Manger (Jászolba fektették)*, (1993); *The Theology of Saint Paul, vols. i-v (Szent Pál teológiája, I-V)* (1995-96), and *The Spirituality of a Bush (A Bokor lelkisége)* (1995). He received the *Pro Humanitate et Libertate* Prize (1996) and the Pál Demény Commemorative Medal (1997). – B: 0874, 1031, T: 7456, 7617. → **Basis Communities.**

**Bulcsu** (a.k.a. *Vérbulcsu*) ( - 10 August 955) – He was the son of Kál, and like his father, was third in rank to the Leader (*Vezér*, or Khagan) and held the military rank of *horka*. In Byzantine chronicles he is called Bultzus or Bolesodes, and in German sources his name is Pulszi. In 937, at the head of 10,000 mounted warriors, he plundered Austria, the Frankish Kingdom and Rome; then returned home by way of Otranto, in three months covering roughly 3,000 km. In 945, in alliance with a Bavarian prince rebelling against his father the German Emperor Otto, he fought his way through Lotharingia, reached Cambrai, and returned home by way of Northern Italy. In 948, together with his partner Tormás, as an emissary to Byzantium where he was baptized, he made a peace treaty with Emperor Constantine VII. In 955 he was invited to Germany a second time in alliance with the rebelling forces of Otto's son and his father-in-law. The rebels were defeated before his arrival, changed sides and the united German forces entrapped Bulcsu's troops. Bulcsu, hopelessly outnumbered, fought back and was killed in the ensuing battle at Augsburg. His corpse was hanged next day from the bell tower of Regensburg. His name has been commemorated at his settlement *Horka*, near the town of

Sopron. It was renamed Mártonfalva after World War II. – B: 0883, 1078, T: 3233.→**Campaign Era; Brenta Battle; Botond; Augburg Battle; Lehel, Horn of; Lehel Legend.**

**Bulgars** – Originally a Turkic ethno-linguistic group, related to the Magyars, but assimilated by the south Slavic people in the Balkans over the last thousand years. They adopted a Slavic dialect and the Greek Orthodox form of Christianity. Their original Turkic language fell into oblivion. They first appeared in history in the early 600s as the Khanate of Great Bulgaria. By 679, as the neighbors of the powerful Khazar Khanate, they settled in the Lower Danube area, in present-day Wallachia and Moldavia, next to the Avar Khanate to the west. From there the Danube Bulgars moved south across the Danube during the 8th century into the area of present Bulgaria and became neighbors of the Byzantine Empire in the south, and of the Magyars in the north across the Dnepr River. Also, during 8th century, another branch of the Bulgars established the powerful state of the Volga- or Eastern Bulgars at the confluence of the Volga and Kama Rivers. The Magyars in the west, the Khazar Khanate in the south, and another Turkic people migrating westward from Asia in the east surrounded them. From the late 9th to the end of the 11th century they had to accommodate the Pechenegs (Patzinaks) south of their territory. Later on the Cumanians settled south of them until the arrival of the Tartars. The Volga Bulgars persisted until about 1240, when the Khanate of the Golden Horde, the Tartars, swept them away together with the Cumanians. From the 11th century a Bulgarian Empire developed south of the Danube, when it was at the height of its power, up to the appearance of the Ottoman Turks about 1400. During these centuries the assimilation by the south Slavs (Serbians) converted the Turkic Danube Bulgars into a Slavic-speaking people, with prosperous trading in their towns. They expanded into part of Transylvania as well, from where the Hungarians under King István I (St. Stephen, 997-1038) pushed them out during the 11th century. Although the Danube Bulgarian Empire was destroyed by the Mongol-Tartar Invasion in 1237, it flourished again until its final disappearance in 1400. From centuries of oppression by the Ottoman Turks, a modern state of Bulgaria emerged south of the Danube. They are an industrious, hardy people, mainly engaged in agriculture, horticulture and animal husbandry. They are well known for their tobacco cultivation and their rose gardens, producing rose-oil and good wine. – B: 1068, 1647. 1648, T: 7456.→**Khazars; Cumanians; Pechenegs; Avars; Mongol-Tartar Invasion.**

**Bull** – Scholars of ancient Hungarian-Pecheneg mythology, such as Arnold Ipolyi, and Károly (Charles) Szabó insisted that in ancient beliefs the forces of Life-and-Death, Light-and-Darkness and Fire-and-Water are perpetually at odds. These six factors are in constant turmoil fostering birth, growth, death and destruction throughout the Universe. According to mythology, the elk and the bull of death represent the personification of life. – B: 0942, T: 7682.→**Ipolyi, Arnold; Szabó, Károly.**

**Bulla, Elma** (Selmecbánya, now Banská Stiavnica, Slovakia, 26 August 1913 - Budapest, 14 May 1980) – Actress. She was educated in Pozsony (now Bratislava, Slovakia) and studied Ballet. In her early years she toured Europe as a dancing child prodigy. Film producer Max Reinhardt recognized her acting talent. At the age of 13 she played Puck in Shakespeare's *A Midsummer-Night's Dream* (*Szentiványéji álom*). She acted in Berlin (1928-1934); thereafter, she returned to Hungary and joined the Inner-city

Theater (*Belvárosi Színház*) (1934-1938). From 1938 to 1945, and from 1952 till her death she was a member of the Comedy Theater (*Vígszínház*), Budapest. Her fragile figure and her voice predestined her to intellectually suffering roles of women and mothers. Her breakthrough came in 1936 with her role in Shaw's *St. Joan*. She acted in many plays, including Bettina in G. Hauptmann's *Before Dawn* (*Naplemente előtt*); Mrs Alving in H. Ibsen's *Ghosts* (*Kisértetek*); Kay in B. Priestly's *Time and the Conways* (*Conway család*), and Giza in Örkény's *Cat's Play* (*Macskajáték*). Her film-roles include *Temptation* (*Kísértés*) (1941); *Festive Dinner* (*Ünnepi vacsora*) (1956); *Sleepless Years* (*Álmatlan évek*) (1959) and *Death of the Doctor* (*Az orvos halála*). She was a recipient of the Kossuth Prize (1956), the titles of Merited Artist (1954), and Outstanding Artist (1960). – B: 0883, 1445, T: 7103.

**Bulla Oratorum** – A Bull of Prayers, a papal edict, proclaimed on 29 June 1456 by Pope Callixtus III to initiate a spiritual crusade against the Turks, who were menacing Europe. On this occasion he celebrated a Mass in Rome's St Peter's Basilica, the Cardinal of Venice reading the document to the public with the intent of organizing a spiritual crusade against the Ottoman Empire. As it was customary to ring the bells at the Angelus, he ordered that “*In every Church of all cities, territories and settlements, between the time of Nona and Vespers, before Vespers all the great sounding bells should ring in unison, three times a day, in order that their sound be carried afar*”. It was the first time that all the bells of Rome were sounded at the same time announcing the Turkish threat. After the Bull's proclamation it became customary in all Christian realms to ring the church bells at noon. While the *Bulla Oratorum* was being proclaimed in Hungary, the uncertain fate of the battle of Nándorfehérvár (now Belgrade, Serbia) was favorably settled. The heroic resistance of the Hungarian nation in defence of Europe is a historic reality, recognized most splendidly by Pope Callixtus when he gave the title “Supreme Commander of Christianity” to János (John) Hunyadi, Governor of Hungary, hero of the battle, even intending to award him a special victor's crown, a plan that was prevented by the untimely death of Hunyadi in 1456. The sounding of the bells was intended to announce a spiritual crusade that, after the victory, turned into a sign of thanksgiving throughout Christendom. – B: 1178, T: 3233.→**Bells Toll at Noon; Hunyadi, János.**

**Bunyevácz, Zsuzsa** (Susan) (Szombathely, 25 May 1955 - ) – Biochemist, historian and writer. In 1978, she completed her higher studies at the Semmelweis Medical University's Pharmaceutical Faculty, Budapest and received her Ph.D. in 1982. She worked at the same University as a research worker (1980-1985). From 1985 to 1994 she was Assistant Professor at the Biological Faculty of the Berzsenyi Dániel Teachers Training University, Szombathely. She was Managing Director for Intermédia Plusz Kft and Eastergate Agency Ltd. in London (1995-1999). From 1999 on, she was Editor-in-Chief of several papers and a reporter for the Sunday News at the Kossuth Rádió, Budapest. In spite of having a scientific background and practice in the greater part of her life (biophysics, biochemistry), her interests soon directed her toward history and the arts. For a long time, she did not feel ready to make the change in this latter direction but all of a sudden, she changed the course of her life profoundly. The years of study began all over again. She traveled extensively (Africa, the Near East, the Caribbean, etc.). Later, she was able to secure a job in London, England, and moved there with her three children. She learned the language and began to read extensively and visit museums in order to

learn as much as possible. Her topics of research were the age of Nimrod, the first kings, the traditions of the Holy Grail, the history of the House of Árpád, etc. She edited the Elixir Magazine for six years, where she introduced a segment for ancient history, in which she wrote articles about ancient symbology and holy places. She has published several scientific articles and studies. Her books include *In the Footstpes of Nimród (Nimród nyomában)*, a report-book in connection with Hungarians; *The Message of the Holy Grail (A Szent Grál üzenete)*, the silenced Hungarian relations, and *The Ten Commandments of the New World Order, Or the Theft of the Holy Grail? (Az új világrend tízparancsolata, Avagy a Szent Grál elrablása?)*. She is interested in current politics and deals with problems of national interest, such as population decline, immigrants, and a national army, both on the radio and in the press. – B: 1935, T: 7690.

**Burgenland** – The western strip of land in the Kingdom of Hungary annexed to Austria after the Versailles-Trianon Dictated Peace Treaty in 1920, except the town of Sopron and environs, which remained with Hungary as a result of a referendum. This region is 3,967 km<sup>2</sup> with the administrative center of Eisenstadt, formerly Kismarton. – B: 1078, T: 7656. → **Borderland; Gyepü; Lajta-Banat (Bánság); Sopron.**

**Bustard** (*Túzok - Otis tarda Lin*) – The largest land-bird in Europe and one of Hungary's famous bird species. It is more than 1 meter long, its wing span is ca. 70 centimeters, the two wings spans sometimes reaching 2.2-2.4 meters; its tail length is 28 cm, and the cock weights 14-16 kg, the smaller hen weighs 6-8 kg. It has some similarity to the turkey, but its body is stockier and the color of its plumage is lighter. Its back is a bright brownish-yellow, while the breast is white. It lives in larger or smaller flocks of various sizes; its behavior is peaceful, its gait is dignified and holds its neck straight. It is difficult to approach it, for it is extraordinarily cautious. While eating, one of them does not graze but is on the lookout, and in case of danger, signals to the others. During rutting time in the mating season, the cock loosens its feathers, turns its wings inside, folds its tail feathers onto its back, looking like a large white ball; bustard rutting is a special spectacle of nature. It scratches a shallow depression for its nest where, at the end of April, the hen lays 2-3 eggs. After four weeks of incubation the chicks hatch, becoming flight-ready at the age of 35-40 days. Its stock has been declining considerably because of intensive farming, destructions caused by World War II, and the hunting of the cock. In ancient times the bustard was the bird of the lowlands from Asia to Spain. Now it is already on the list of endangered species, threatened with extinction. According to the decision of the International Council of Bird Preservation, Hungary is the administrator of the world program of saving the bustard. On the basis of this decision the “Dévaványa Environmental Protection District” was established in 1975, introducing organized bustard rescue. The picture of a bustard is shown on the emblem of the Hungarian Ornithological Society; and more recently it appears also on the emblem of the Hortobágy National Park. – B: 1105, T: 7456.

**Bütösi, János** (John) (Nyírgyulaj, 18 December 1919 - Shelton, CT. USA, 12 July 2010) – Reformed Bishop in the USA. After completing his high school and university education in Hungary, he was ordained in 1943. In 1943-1944, during World War II he served as Assistant Minister in Munkács (now Mukacheve, Ukraine); later he served in the army. Between 1945 and 1947, he was Traveling Minister with the Bethania Alliance; then he went with a scholarship to the United States, where he pursued his postgraduate

studies. From 1950, he ministered in several localities. He was Bishop of the Calvin (Hungarian) Synod for twelve years, and past President of the Hungarian Reformed World Federation. Many of his ecclesiastical and sociological studies were published, among them: *A Half Century in the Balance* (1958). He was also Chief Editor and publisher of several publications of the Reformed Church. He was a key member and leading official of various church and international organizations. After retirement he spent a couple of years lecturing in Hungary. – B: 0906, T: 7682.

**Búza, Barna** (Barnaby) (Vésztő, 30 December 1910 - Budapest, 16 October 2010) – Sculptor. He completed his studies at the Academy of Fine Arts, Budapest under F. Sidló and I. Szentgyörgyi in 1933. He was in Rome on a scholarship (1935-1936), and took part in the Venice Biennial of 1937. He was a Member of the Hungarian Parliament (1971-1975) and a city-advisor in Baghdad, Iraq (1976-1978). His many-sided plastic art, sculptures and sepulchres as well as his church art works are characterized by a realistic approach, simple, compact forms, smooth surfaces and a varied use of material (wood, marble, bronze, pyrogranite). He created numerous portraits, plastic art for public places, and cemetery monuments. His works include *Presidential Palace, Holy Trinity Statue (Elnöki palota, Szentháromság szobor)*, Budapest; *Mounted Kuruc (Kuruc lovas)*, Kazincbarcika; *Ferenc (Francis) Rákóczi*, Kisvárd, Berettyóújfalu; *Márton (Martin) Luther* statue; and *János (John) Kálvin* statue, which stands at the Calvin Square, Budapest; *Main Altars* of the Prohászka Church, the Cathedral of Székesfehérvár; *Sepulchres* of Lajos (Louis) Báros and Hilda Gobbi. Several of his works are housed in the National Gallery in Budapest, and in private collections abroad. He had more than 30 exhibitions of his works at Kecskemét (1957), Kiskunhalas (1967), Gyula (1974), Esztergom (1979), and at the Csepel Gallery (1985). He is one of the last of the Hungarian classical sculptors. He was a recipient of prestigious prizes, among them the István (Stephen) Ferenczy Prize (1934), the Ede (Edward) Balló Prize (1936), the György (George) Zala Medal (1941) and the Nuschloss Medal (1997). A Prize bears his name. – B: 0883, 0879, T: 7456, 7103.

**Buzánszky, Jenő** (Eugene) (Újdombóvár, 4 May 1925 - ) – Soccer-player, coach. His education was at the Officer Training School of the Hungarian State Railways (*Magyar Államvasutak - MÁV*) (1945-1946) and the School of Physical Training, Budapest (1961-1964). He worked at the MÁV (1943-1947) and at the coalmine of Dorog (1947-1978). He played with various soccer teams (Vasutas of Dombóvár, PVSZ, Dorogi Bányász) between 1942 and 1960. He played 274 matches in the First National League and played as right halfback in the National Team 48 times between 1950 and 1956. He was a member of the Olympic Champion Team (1952), and the Silver Medalist Team of the World Championship Bern, Switzerland in 1954. He was Coach (1960-1973) and President of the Komárom Esztergom County Soccer Association (1993-1997). Since 1973 he has been a presidium member of the Hungarian Soccer Association and its Vice-President from 1996. He received the Ferenc (Francis) Csík Prize in 2001, the St. Stephen Prize (2007), the Prima Primissima Prize (2010), and he was elected the Sport-man of the Nation (2011). He is Freeman of Dombóvár and Dorog. – B: 0874, 1031, 1105, T: 7103. → **Boszik, József; Czibor, Zoltán; Grosics, Gyula; Kocsis, Zoltán; Puskás, Ferenc; Golden Team.**

**Buzás, Pál** (Paul) (Kolozsvár, now Cluj-Napoca, Romania, 3 March 1939 - ) – Concert

pianist in Transylvania (*Erdély*, now in Romania). He studied at the H. Dirna Music Academy in Kolozsvár (1962). He was resident pianist at the Philharmonic Society, Kolozsvár (1962-1964). He taught piano at the Toduta Music Secondary School, Kolozsvár (1963-1999). Since 1969 he has given piano recitals in major towns in Transylvania and performs abroad as well. He appears on radio and TV and conducts choirs. His articles are being published in the newspaper *Kalotaszeg*, where he works as deputy editor. His repertoire includes: *Piano Pieces of Romania's Hungarian Composers (Romániai Magyar szerzők zongoraművei)*; *Piano Pieces of Zoltán Kodály (Kodály Zoltán zongoraművei)*; *Adaptation of Kalotaszeg Folk Songs (Kalotaszegi népdal feldolgozások)* (1993); *Constellations (Csillagzatok)* (1993), and the *Literature of Kalotaszeg (Kalotaszeg irodalma)* series. He is past Vice-President of the Hungarian Association of Musicians in Romania, and a member of the Kalotaszeg Foundation. – B: 1036, T: 7103.→**Kodály, Zoltán.**

## C

**Camerata Hungarica** – Instrumental ensemble, founded in 1969 by the recorder artist László Czidra, who became its first artistic director. The ensemble specializes in Renaissance and early Baroque secular instrumental music from Hungary and Transylvania of the 16th to 17th centuries. The repertoire is played mainly at concerts abroad; its first concert tour was in Italy in 1973, followed by concerts overseas, from Mexico to Japan and from Sweden to Sicily. The ensemble presented mediaeval music on a number of CD records on the Hungaroton label, including the *Vietoris Tablature, Collection of Bártfa* (now Bardejov, Slovakia); *The Gems of Renaissance Music; Danserye* (dances from the Susato Collection), and *Music to Entertain the Kings of Hungary 1490-1526*. They feature also Polish, Czech and Western European mediaeval music, as well as Baroque chamber music, recorded in the medieval atmosphere of Buda Castle in Hungary's Capital. Medieval ensembles use contemporary keyboard instruments, like the virginal and spinet, widespread in Northern Hungary (Upland, *Felvidék*, now Slovakia) and Transylvania (*Erdély*, now in Romania) in the 17th century. One of the records, the double album of the *Vietoris Tablature*, was awarded the Grand Prix of the Paris Academy in 1975. During the 1990s Czidra was also engaged in teaching, as well as in publishing of music scores, including those for his beloved instrument, the recorder, played in groups and in consort, as in the 16th and 17th centuries, using different varieties of the instrument, like the tenor, treble and bass recorder. The ensemble received very favorable critique in music magazines in the West. In the 1970s similar ensembles were formed, such as the *Musica Historica* (1974) and the *Musica Antiqua Hungarica* (1977). – B: 1068, 1927, 7456, T: 7456. → **Czidra, László; Musica Historica; Musica Antiqua Hungarica; Schola Hungarica.**

**Campagna, Axe with Runic Inscription** – The axe (held in a case) estimated to be more than 3,000 years old with runic writing, believed to be of Scythian origin was found in a field in Campagna, Italy. It was kept in the Jesuit Museum in Rome but disappeared during World War II. Sir John W. Lubbock (1865), an English statesman and scientist, noted in his book “Prehistoric Times” that it was made in the Carpathian Basin, an opinion shared by many scholar, among them Sándor (Alexander) Forrai, who examined it later. Lubbock was unable to decipher the inscription. Debreczeny and Pataky have given two different Hungarian readings. According to Debreczeny, in modern Hungarian it reads: “*segít is, üt is, ró is*” (*it also helps, also hits and carves*), while Pataky's reading: “*ékesít is, üt is, ró is*” (*it also decorates, also hits and carves*). – B: 1174, 1020, T: 7669. → **Hungarian Runic Script; Forrai, Sándor.**

**Campaigning Era** (Hungarian) - In the history of Hungary this era represents the establishment of the Hungarian State in Central Europe that lasted from 862 to 955. During this period some Magyar military units “raided” Western European countries and Byzantium, as it has been briefly referred to in western sources for centuries. First they appeared in smaller detachments, in alliance with the Avars still living in the Carpathian Basin, and later alone. From 892 to 894, they invaded Moravia and Pannonia (*Transdanubia, Dunántúl*) gaining important knowledge about their future homeland. During 894-895, three Magyar (Hungarian) forces were already operating in the Carpathian Basin: one in the south against the Bulgars in alliance with Byzantium, one in

the west against the Moravians, allied with the Franks, and the third main force, the invading one, conquering from the east, led by Khagan (Prince) Árpád through the Verecke Pass of the Eastern Carpathians, followed by the whole nation into their new homeland. After the occupation of the Carpathian Basin (895-900), the armies of two tribes, usually the westernmost ones, had the task of defending the western borders, while the bulk of the nation started to settle down. While they were settling down in the new homeland in 899, Magyar forces launched their first expedition against the rest of Europe and continued to do so during the following decades. One explanation for these raids or sorties is that, in most cases, the Magyars were in alliance with one or another belligerent western ruler against their opponents. Other reasons were to keep the unfriendly and even hostile western nations fragmented (e.g. in 908, 913, 910, 911), in order to defend the new borders of Hungary in the Carpathian Basin (e.g. in 907, 949, 950). There were some large-scale preventive wars and raids to collect taxes, while a few of the raids were of an adventurous nature. There were apparently some campaigns to recover the Avar treasures taken away by the victorious Franks as booty after Charlemagne finally defeated the Avar political state (the Avar Empire) in 797. Hungarians regarded the Avars as their kinsfolk; therefore they were legal owners of the former Avar treasures. Their raiders reached southern Italy, France, Spain, northern Germany, Greece, and even the gates of Constantinople. However, the raids against Western Europe ended when, in 955, the Hungarians suffered a disastrous defeat at Lechfeld, near Augsburg in Bavaria against a coalition force headed by the Holy Roman Emperor, Otto II. Hungarian raids against Southern Europe ended by 890. - B: 1221, 1528, T: 7456.→**Brenta Battle; Botond; Lechfeldt (Augsburg), Battle of; Bulcsu; Lehel, Horn of; Lehel Legend.**

**Campaign of the Hungarian Red Army (1919)** – After World War I, during the rule of the Council (Soviet) Republic of Hungary (*Tanácsköztársaság*, 21 March 1919 - 1 August 1919, a total of 133 days) with French endorsement, Czech and Romanian forces launched a combined attack on the demilitarized Hungarian state. The Hungarian Communist Government's plea for help to the Soviet Union was to no avail. The Romanian army began its offensive on 16 April, the Czech forces began their incursion from the north on 27 April, and captured the town of Miskolc, aiming for the heavy-industrial town of Salgótarján, and even planned to take the capital, Budapest. The hastily organized Hungarian Red Army, composed of young workers, professional and reserve veteran soldiers, was more than willing to fight under either a red or a white flag, to preserve the integrity of even the newly truncated Hungary, let alone Historic Hungary, which covered the entire Carpathian Basin. Three talented military leaders emerged and organized an army almost overnight to face the intruding Czech and Romanian forces: Colonel Aurél Stromfeld (1878-1927), former member of the Habsburg Monarchy's army staff, who was made Commander-in-Chief; Jenő (Eugene) Landler (1875-1928), an anti-war leader and a Communist jurist; and Vilmos (William) Böhm (1880-1949), a leader of the workers. By 1 May the Romanian troops were halted at Szolnok, and the Czechoslovak forces were soon stopped at Miskolc, averting the threat to Salgótarján, as a result of the heroic defense by weak army units, armed miners and workers. As early as 20 May, the Red Army was strong enough to launch its counter-offensive, which for a while scored success after success. On 21 May, Landler's Division 1 of the IIIrd army corps (made up of workers from Budapest) entered Miskolc

after fierce resistance by the Czechs. When Tiszalúc was taken on 1 June, the connection between the Czech and the Romanian forces had been cut. Soon it became clear that the expected attack from the south of Hungary would not occur, in spite of the fact that the best divisions were present there, while Divisions 4 and 6 had been transferred to Northern Hungary. On 6 June the largely Magyar-populated Kassa (now Košice, Slovakia) was taken; then on 9 June, Eperjes (now Prešov) was reached, where a Slovak Council Republic was proclaimed. The Hungarian Red Army surged as far northeast as Bártfa (now Bardejov) by 10 June, hoping to link up with Soviet troops, though that did not materialize. Within three weeks the strengthened forces of the Red Army had taken the towns of Érsekújvár (Nové Zámky, Slovakia), Aranyosmarót (now Zlaté Moravce, Slovakia), Léva (now Levice, Slovakia), Zólyom (now Zvolen, Slovakia), Losonc (now Lučenec, Slovakia) and Rozsnyó (now Rožňava, Slovakia), in addition to Kassa and Eperjes. Most of the central and northeastern part of Northern Hungary (now Slovakia) was liberated as far north as the famous mining town of Selmecebánya (now Banská Štiavnica, Slovakia). The Czechoslovak interventionist army had been seriously defeated. The Entente Powers, seeing the success of the Hungarian Red Army and embarrassed by the failure of the Czechs and Romanians to overthrow the Hungarian Council (Soviet) Republic, used diplomatic means to stop the Red Army's push toward the historic Hungarian borders in the north. French Prime Minister Clemenceau, in the name of the Versailles-Trianon Peace Conference and in full knowledge of the newly planned borders of a truncated Hungary, but fearing that the Red Army might frustrate the peace-dictate of the Conference, issued a note demanding the withdrawal of the Red Army from the "occupied" areas behind the new northern and eastern borders marked out by the dictate of the Peace Conference. The Red Army Command obliged and ordered the withdrawal of the Hungarian forces from the Northern Hungary area on 30 June 1919. However, Romanian interventionist army units did not withdraw behind the newly marked-out eastern borders of truncated Hungary. The Red Army, with some 50,000 men crossed the River Tisza (main force at Szolnok, smaller forces at Tokaj and Csongrád) in mid-July and successfully advanced east toward Nagykároly (now Carei, Romania) until 23 July, though it was facing much larger, better equipped and rested Romanian forces. The spearhead of the Red Army became nearly encircled by the counter-attacking Romanian forces on 24 July, and was forced to hastily retreat. On 29 July the first Romanian army units crossed the River Tisza. By then the Red Army was not able to prevent the much stronger Romanian army's push against Budapest, eventually occupying and looting it disgracefully. By the end of July, the Hungarian Red Army, as well as the Council (Soviet) Republic of Hungary, disintegrated and handed over the government to the Peidl cabinet. – B: 1031, 1138, T: 7103, 7456.→**Council (Soviet) Republic of Hungary; Soviet Republic in Hungary; Lenin Boys; Clemenceau, George; Peidl, Gyula; Hungary, History of.**

**Campaign, Prolonged** – This lasted during the reign of King Ulászló I (Wladislas, 1440-1444). In 1395, the Turks occupied County Bánát. The united Polish and Hungarian forces, led by János (John) Hunyadi (1408-1456), were victorious in several battles and repulsed the enemy beyond the mountain passes of the Balkans. The campaign was the first, and for centuries the last and deepest thrust into Turkish territory. The Sultan was forced to negotiate and to sign the Peace Treaty of Szeged in

1444. Its conditions favored the Hungarians. The six-month-long winter warfare, resulting in extraordinary accomplishments, was the first phase of the three-hundred-and-twenty years of Hungarian warfare against the invading Turks. However, later this region fell under Turkish rule. Finally, Prince Eugene of Savoy took it back in 1716 in the last phase of Hungary's liberation from Turkish rule. – B: 1138, 1020, T: 7677.→**Ulászló I, King; Hunyadi, János.**

**Canada, Hungarians in** – Although Hungarians lived and were scattered all over Canada, the Canadian Government has kept records of Hungarian ethnic groups of immigrants only since 1886, the year when the first Hungarian settlement of *Kaposvár*, Saskatchewan was established. Immigrants arrived in several waves. The first wave was led by Pál (Paul) Esterházy and Lord Stephen Mount, who arrived to the western Canadian province of Saskatchewan with 35 families. Those and others who followed them arrived from the industrial districts of the United States. They came to the lands bordering the Canadian Pacific Railway to do pioneer agricultural work, forestry and mining. To commemorate the name of the founder, they called the town *Esterházy*. One of the oldest Canadian Hungarian settlements is *Békevár (Castle of Peace)*. Slowly, a loose network of settlements with Hungarian names referring to the old country came into existence: *Mátyásföld, Szent László, Hunsvally, Otthon, Székelyföld*. In time, most of them lost their Hungarian identity and their name but, in some, the ethnic life flourished. In 1911 there were 11,648 Hungarian immigrants in Canada on record.

Hungarians of the second wave settled during the 1920s after World War I. They were refugees from the huge territories, ceded from the Historic Kingdom of Hungary by the Versailles-Trianon Peace Treaty on 4 June 1920 to the neighboring states: Transylvania (*Erdély*) to Romania; Upper Hungary or Uppland (*Felvidék*, and Sub-Carpathia, *Kárpátalja*) to Czechoslovakia; Vojvodina and Croatia (*Délvidék* and *Horvátország*) to Serbia. Altogether 2/3rd of the territory of historic Hungary were taken away and every third ethnic Hungarian fell under the authority of the newly created successor states, inevitably maltreated. When the USA decided to limit the number of refugees, 28,000 new Hungarian refugees arrived in Canada. In most of the Hungarian settlements, churches and societies were established in order to satisfy the social, cultural and spiritual needs of these people. These communal organizations did a great service to the immigrant Hungarians. English language courses were started, also Hungarian schools and libraries were established. In 1941 there were more than 40,000 Hungarians in Canada, and their number grew in the 1940s to more than 80,000, according to estimates.

The third wave arrived after World War II in 1945-1950, when more than 10,000 Hungarian refugees chose Canada as their new country. Among them, no one represented the agricultural (farm) laborers because the majority was high-school educated and university graduates.

The fourth wave arrived after the suppression of the Hungarian Revolution and Freedom Fight of 1956, when Canada accepted 37,565 political refugees. Canada surpassed all other countries with its \$25-million-dollar support for these refugees. According to J.W. Pickersgill, the Minister of Citizenship and Immigration, these people were the most valuable of all refugee groups. By a Hungarian journal's estimate the number of Hungarian inhabitants of Canada was 97,358 in 1961. In 1969, the number reached 100,000, according to reports of Hungary's Department of Statistics. In 1986, according

to Canadian statistical data of Census Canada, 189,000 people stated that they were of Hungarian origin.

The fifth wave arrived after the collapse of the Communist systems in East-Central Europe around 1989. Hungarians from Hungary and its successor states (Romania, Slovakia, Ukraine and Yugoslavia, where they suffered discrimination) arrived in a steady flow to Canada.

According to the 2001 Canadian census, the number of Hungarians in Canada was 267,255. Their distribution among provinces and territories is as follows: Newfoundland and Labrador: 245; Prince Edward Island: 225; New Brunswick: 860; Ontario: 128,575; Manitoba: 8,900; Saskatchewan: 24,340; Alberta: 41,535; British Columbia: 43,515; Yukon: 345; North West Territory: 210; Nunavut: 35. Two provinces, Quebec and Nova Scotia, did not provide numbers but, based on an earlier data, the estimated number of Hungarians in Quebec is around 15,000 and in Nova Scotia 1,500. The majority of Hungarians live in and around Toronto and southern Ontario, and in provinces of Manitoba, Saskatchewan, Alberta and British Columbia. – B: 1134, 1222, T: 7684.→**Parmenius, István of Buda; Trianon Peace Treaty; Paris Peace Treaty; Atrocities against Hungarians; Freedom Fight of 1956.**

**Canadian Hungarian Bibliography** – This work goes back more than half a century. There are English compilations (*Canadiana*) and other book reviews, such as *Canadian Periodical Index*, *University of Toronto Quarterly*, and *Canadian Ethnic Studies*, preceded by some Hungarian publications. Among them *The History of Canadian Hungarians (A kanadai magyarság története)* (1942) is noteworthy, written by Rev. Jenő (Eugene) Ruzsa, a Lutheran Pastor of Hamilton, Ontario. The booklets of Iván Halász de Béky were published early in the 1960s, tallying the Hungarian collection of the John Robarts Research Library of the University of Toronto. These booklets also list some well-known Hungarian literary and historical persons, such as Endre Ady, János Arany, Lajos Kassák, Lajos Kossuth, István Széchenyi, and they give important details of some historical subjects, e.g. historiography, information on denominations, sociography, etc. and József Teleki's *History of Hungary and Hungarians 1848-1977*, in two volumes based on the University of Toronto's library collection as well. Its more than 10 thousand citations include all related literature in different languages. The first complex special review is the *Canadian Studies on Hungarians* (1987) authored by János Miska. He itemized subjects related to Hungarian publications, monographs, studies, dissertations, criticism and literary works, including history, sociography, immigration, demography, religious denominations, and school-related chronicles under 30 headings. It includes the Hungarian contents of Canadian archives, and the list of all Canadian-Hungarian periodicals and associations. Many books, e.g. Nandor F. Dreisziger's *Struggle and Hope*, George Bisztray's *Hungarian-Canadian Literature* also have useful bibliographies. Some other publications about Canada's many languages embody a special bibliography, e.g. János (John) Miska's *Ethnic and Native Canadian Literature*, Judy Young's *Some Thoughts about the Present State of Bibliography*. – B: 0892, T: 3240.→**Ady, Endre; Arany, János; Kossuth, Lajos; Széchenyi, István; Kassák, Lajos; Béky-Halász, Iván; Bisztray, George; Dreisziger, Nándor; Miska, János.**

**Canadian-Hungarian Folk Music** – Hungarian folk music in Canada, although geographically at a great distance from Hungary, could be considered as identical with

that of Hungary. Its beginning reaches back to 1885, coinciding with the time of the first Canadian Hungarian settlements. Its occurrence appears to be three-fold: (1) Traditional vocal and instrumental form. (2) Form to be used in school and church education, (3) Collections.

(1) At Church-festivals, during the wake, led by the best singers. These church songs were still around as the last musical activity of the older generation. During the years at the turn of the 19th century the *harvesters' song* could still be heard on the western prairies; and in the 1930s the *worksong* on the tobacco farms in southern Ontario Province. They live today only in the memories of older people. During communal or family events, out of consideration for those who don't understand Hungarian anymore, the songs of Canadian Hungarians are gradually being phased out of the life of these people. Folk choirs have been active in the past as well as today in many places.

(2) Children's games, songs referring to customs, choral works, folk dancing and songs in folk plays, taught by qualified instructors in Hungarian schools, churches and cultural institutions have an educational and entertaining purpose.

(3) Besides songbooks of folk music in manuscript form, Hungarian song collections emerged. The collections containing Hungarian folk music material in the National Museum of Canada were recorded in 1963-1975 in Saskatchewan and those from the southern part of the province of Ontario were recorded in 1971. The recordings of the 1980s were collected in Quebec and southern Ontario. These recordings were based on the collections of individuals including Linda Gergely and George Demmer. – B: 7688, 1356, T: 7646.→**Demmer, George.**

**Canadian Hungarian Literature** – In 1988 there were roughly 50-60 Hungarian writers living in Canada, who were actively publishing in national and other periodicals. Hungarians hold an important place in Canadian ethnic bibliography. Between 1960 and 1980 they published more than 200 poems, novels, short stories and plays. Due to the Hungarian writers' active participation in literary and cultural events, they often become the focus of their host country's interest. There are more and more Hungarian-related poems and novels in English and French anthologies and prestigious periodicals. Most of the Hungarian authors' works will stand up to the test of the time. Although influences of the new environment are evident in many of their literary works, nevertheless the Canadian Hungarian writers are part of the global Hungarian literature.

There are three literary periods: the pioneer period of the 1930s, the activities after the World Wars, and the group of 1956. The second generation, along with many of the first generation with their familiarity in English or French, was absorbed by the host country's literature. János (John) Égly, Kálmán (Colman) Kováchi, Béni (Bernie) Szakács and János Szatmári recorded the history of the first Hungarian immigrant farmers of the prairies in prose and naïve epics in the 1930s. Following World War II, Hungarian writers in Canada represent the urban literature. The poets Ferenc (Francis) Fáy and Béla Irsa, also prose writers Imre (Emeric) Naphegyi, Imre Székely-Molnár and László (Ladislav) Szilvássy, wrote about the era's soul-stirring events. The poet group of 1956: György (George) Jónás, László Kemenes-Géfin, Ödön (Edmund) Kiss, Ernő (Ernest) Németh, Ilona (Helen) Szitha, Tamás (Thomas) Tűz, György (George) Vitéz, Róbert Zend; and prosaists Sándor (Alexander) Domokos, József (Joseph) Juhász, János (John) Miska, Lajos (Louis) Simon, Gábor (Gabriel) Szohner, István (Stephen) Vizinczey and

others became the new blood of Canadian literature. Since Canadians embraced this generation with open arms, new periodicals, newspapers and radio broadcasts in Hungarian were established. Tamás Hajós, Szabolcs Sajgó, Éva Sárvári, János Szanyi and Éva Kossuth followed and further enriched the Canadian Hungarian literature with new artistic creations. The Canadian Hungarian Writers' Association was established in Ottawa in 1968, their anthology series already published seven Hungarian and two English volumes. Most of the Canadian Hungarian writers are obliged to finance their own publications. – B: 0892, 1020, T: 3240.→**Domokos, Sándor; Fáy, Ferenc; Hajós, Tamás; Kossuth, Éva; Miska, János; Tűz, Tamás.**

**Cancionale** – The title of Gáspár Heltai's work published in 1574. It is a collection of secular epic songs. – B: 1150, T: 7659.→**Heltai, Gáspár.**

**Cantate** – title of the work by István Kázmér (Stephen Casimir) Greksa (1864-1920). It is a collection of ancient Hungarian and classical prayers and sacred hymns based on his studies of original codices and other sources. They were harmonized by music teacher Ernő (Ernest) Lányi. (1861-1923) – B: 1078, T: 7659.

**Cantio de Militibus Pulchra** (Song about the Handsome Soldiers) – A chronicle in verse form by an unknown author from the 1560s. Its topic is one of the battle adventures of the soldiers of Gyula, a town in southeastern (truncated) Hungary. Their captain, László (Ladislás) Kerecsényi accused them of cowardice. Wounded in their pride, the 150 soldiers mounted their horses, crossed the River Tisza and joined in the battle against a Turkish force four times their number, at Bugac Pusztá (steppe). They then returned to Gyula with the dead, and a captured voivode, whom they presented to their captain on a cart, strongly reproaching him for his greed. The only reason for shedding their blood, they said, was to prove how wrong their captain had been. This typical Hungarian border fortress story is an epic song reminiscent of folk songs presented in a lively and in some ways naïve manner, placing it among the most beautiful poetic works of the 16th century. The text is known only from a copy of a manuscript dated to 1621. It is probable that, from the time of its completion to the time it was recorded, the verbal presentation of the text became somewhat modified; what began as an epic song became metamorphosed into the form of a Ballad. – B: 1136, 1020, T: 7659.

**Cantionale Catholicum** – This work of more than 800 religious hymns is a compilation by János (John) Kájoni, published in Csíksomlyó, Transylvania (now Miercurea Ciuc, Romania) in the mid 1600s, known as the Kájoni Kodex. – B: 1223, T: 7659.→**Kájoni, János; Codex Literature.**

**Cantionale Hungarico Latinum** – Title of the collected works of János (John) Kájoni, a “*cseri*” (red robed) monk of Csíksomlyó (now Miercurea Ciuc, Romania). It contains several hundred medieval songs from Transylvania (*Erdély*, now in Romania). The runic characters of the Szekler-Magyar inscriptions and its liturgy are listed on page 46 of the collection. – B: 1078, T: 7659.→**Kájoni, János; Hungarian Runic Script.**

**Cantus Catholici** – The oldest printed hymnbook of the Hungarian Catholic Church, published at the expense of Benedek (Benedict) Kisdy, Bishop of Győr. No place of publication is given; but most likely it was at Nagyszalonta (now Salonta, Transylvania, Romania) in 1651, edited by Benedek (Benedict) Szőlősy. In accordance with the directives of the Diocesan council held at Nagyszombat (now Trnava, Slovakia) in 1650, the hymns of the first edition were selected from ancient sacred songs more than a hundred years old; but also include more recent hymns. György (George) Szelepcsényi, Archbishop of Esztergom, sponsored a second edition, printed in 1675. It has gone through subsequent editions with its content significantly enlarged. – B: 1150, T: 7659.→**Szelepcsényi, György.**

**Capa, Robert** (Endre Fiedmann) (Budapest, 1913 - Vietnam, 24 May 1954) – War photographer. He left Hungary for France and, in 1933, settled in Paris. In 1936 he was in Spain capturing the civil war on film. His photograph of a soldier at the moment of death has become a classic. In 1938 he covered the Japan-China war. During World War II, he was present at the North African and the Italian campaigns, and the European theater of war. He was killed in Vietnam by a land mine while photographing French troops. He was an outstanding war photographer. His main works include *Death in the Making; The Battle of Waterloo Road; Slightly out of Focus; The Russian Journal* (with J. Steinbeck), and *Report on Israel* (with I. Shaw). He received the Medal of Freedom Citation. – B: 0883, 1344, T: 7103.→**Plachy, Sylvia.**

**Capella Savaria** – Founded in 1981 by Pál (Paul) Németh, Capella Savaria is situated in the western Hungarian town of Szombathely. The orchestra took its name from the area's Roman name, Savaria. The core ensemble is its famed string section, which plays on original instruments of the seventeenth and eighteenth centuries. The orchestra's repertory is wide, ranging from early opera, and the choral and operatic works of Handel through to the symphonies of the First Viennese School. Concert appearances outside of Hungary have taken the ensemble to 22 European countries, as well as to Israel, South America and the United States. They have appeared at important festivals in Europe, such as those held in Brugge, Innsbruck, Regensburg, Göttingen, Halle, Utrecht and Zerbst. The artistic director of Capella Savaria is Zsolt Kalló, who is also its concertmaster. In 1999, Dr. Mary Térey-Smith was appointed the orchestra's artistic advisor and guest conductor. The Capella Savaria has made nearly 60 recordings since its foundation, five of which have won the “Record of the Year” status in Hungary. They have recorded with several labels including Hungaroton, Quintana, Harmonia Mundi, Dynamic, Naxos, Centaur and Dorian Records. The ensemble has no state subsidy, but works with the help of the Savaria Museum Friends of Early Music. In 1991, the orchestra was awarded the Franz Liszt Prize in recognition of its outstanding achievements. In 2006, the ensemble was voted the “Prima, Primiissima” title, an award in arts given by the National Commerce and Trade Association to professional groups. – B: 1031, 1735, 7617, T: 7617.→**Kalló, Zsolt; Térey-Smith, Mary; Szombathely.**

**Cár, Jenő** (Eugene) (Dobronak now Dobrovnik, Slovenia, 24 May 1944 - ) – Actor in Slovenia. His primary education was at his place of birth, his secondary at Muraszombat (now Murska Sobota, Slovenia), he graduated in 1963. His higher education was at the *Akademija za gledališče, radio, film in televizijo – AGRFT*, (1968-1979). From 1968 until

1979 he was a member of the *Maribor Theater (Maribori Színház)* and since 1980 he has worked at the *Mestno gledališče, City Theater (Városi Színház)* in Ljubljana. He appeared as a guest performer in other theaters all over Slovenia. He has more than 120 roles to his credit with some 4000 appearances, including Házibarát in Rudi Šeligo's *Lepa Vida*; Don Lunardo in Carlo Goldoni's *The Boors* (a. k.a. *The Cantankerous Men*); Advokat Alfieri in A. Miller's, *A View from the Bridge (Pogled z mostu)*, and Kleant in Molière's *Tartuffe*. He appeared in a TV series in 1995. He is member of the ZDUS, the Alliance of Dramatic Artists of Slovenia. He wrote in Hungarian the *Colorful Peasant (Színes paraszt)*, elegy (2003). He is recipient of the Prešeren Alap Prize (1980), and the Dnevnikova Nagrada (1995). – B: 1169, T: 7103.

**Caraffa, Count Antonio** (Naples - Vienna, 9 March 1693) – On arrival at the Viennese Court, he received rapid promotions. In 1686, as the commanding officer of the Habsburg Imperial Army in Northern Hungary, he persecuted the followers of Count Imre (Emeric) Thököly; and in 1687, liberated the fortified town of Eger from Turkish rule. When Emperor Leopold I announced a general amnesty, Caraffa reported to Vienna that he had discovered a conspiracy against the Emperor and he set up a regime of martial law in the Hungarian city of Eperjes (now Prešov, Slovakia). He ordered a scaffold mounted under his window and tortured the town's rich citizens by breaking them on the wheel, impaling them, and used other methods of torture hoping for a ransom. Emperor Leopold I recalled Caraffa in response to the protest of the Palatine and the high nobility, but conferred honors on him. Caraffa besieged the fortress of Munkács (now Mukachevo, Ukraine) without success; but eventually its defender Ilona (Helena) Zrinyi was forced to surrender as a result of treason, on 15 January 1688. From there, Caraffa was sent to Transylvania (*Erdély*, now in Romania) to establish it as a province of Austria. The defiant city of Brassó (now Brasov, Romania) was taken by siege and Caraffa executed many of its citizens. He never returned to Hungary after 1690. Tradition says he died, persecuted by terrifying visions of his innumerable victims. – B: 0788, T: 7680.→**Thököly, Count Imre; Zrinyi, Ilona.**

**Carelli, Gábor** (Gabriel) (Krausz) (Budapest, 10 March 1915 - New York, N.Y. U.S.A., 22 January 1999) – Singer (tenor). He was born into a well-to-do family. His higher studies were at the Law School of the University of Budapest. A talented singer, he soon studied singing, first in Budapest, then in Rome (1933-1936). Beniamino Gigli was his master and mentor. He changed his name in 1939, when he debuted at the Florence Opera, Italy. Before the outbreak of the war, he moved to the United States of America. At first he worked with small ensembles. He even trained choirs to sing Zoltán Kodály's *Psalmus Hungaricus* in Hungarian. He received his first important role as Falstaff, under the baton of Toscanini at the New York Metropolitan Opera. This event opened the way to the Metropolitan Opera in 1950, where he stayed for life. He also taught at the Music Academy of Manhattan. From the 1960s he appeared at the Budapest Opera House. He also had a successful series on the History of Opera on Hungarian Radio. He had 1079 performances in 56 roles in 39 operas. – B: 1422, B: 7103.

**Carmen Miserabile** (Lamentations) – Chronicle written in 1243-1244 by the Italian Rogerius, Archdeacon of Várad (now Oradea, Romania) to Cardinal Jakab (Jacob),

Bishop of Praeneste. This work is about the Mongol-Tartar invasion of Hungary (1241-1242), based chiefly on his personal experiences. He described the devastation of Hungary and he found that internal politics was the cause of the defeat of the Hungarian Army in the battle of Muhi at the River Sajó in 1241. It was printed in 1488 as an appendix to the Chronicle of János Thuróczi. – B: 0942, T: 7659.→**Mongol-Tartar Invasion; Thuróczy Chronicle.**

**Carolina Resolutio** – Order issued by Emperor Károly III (Charles) on 21 March 1731, regulating issues with regard to the Protestant Church. Its major points: Protestant worship to be exercised in specially appointed places, where they could employ a minister but would need prior royal permission. Non-Catholics living outside these designated places would remain dependent on a Catholic priest. Apostasy – abandoning the Catholic faith – was to be a punishable offense. Mixed marriages were to be performed only in front of a Catholic priest. The Catholic holidays were to be respected by non-Catholics as well. The official oath taken by judges, civil servants and lawyers of whatever religion, known as the “decretal swearing in”, was compulsory in a form set by the Catholics. – B: 0942, T: 7668.→**Károly III, King; Reformed Church in Hungary; Dobsina Coalition.**

**Carpathia, RMS** – A Cunard Line transatlantic passenger steamship built in a shipyard of Newcastle upon Tyne, England. *Carpathia* weighed 8,600 tons, was 165 m long and 18 m wide. *Carpathia* became famous for rescuing the survivors of RMS Titanic, after she sank on 15 April 1912. *Carpathia* arrived at the scene and was able to save 705 people. – B: 1031, T: 7456.

**Carpathian Basin** – A Central European geographic region of about 300,000 km<sup>2</sup>. In the north, northeast, east and southeast it is surrounded by the Carpathian Mountain Range. In the south it extends to the Drava-Szava river-line; in the southwest bordered by the Dinarid Range; in the west it reaches the Alps; but the junction between the two geographical units is blurred. Geomorphologically, it is extraordinarily uniform and self-contained. Only the River Danube flows through it, the Poprád and Dunajec rivers leave it in the north, and the River Olt in the south. The River Tisza, the greatest tributary of the Danube is confined to the Basin in its entire length of 963 km. From mid-Paleozoic times (542 to 251 million years ago) up to Mid-Tertiary times (approximately 25-40 million years ago), the Carpathian Basin was part of a large Mediterranean-type sea, the *Tethys Sea*. During the later part of the Tertiary Period, from Pliocene times onward (starting 11 million years ago) the *Tethys Sea* broke up into a string of shallow inland seas and one of them was the Pannonian Sea. It was during these times that sedimentary beds of a considerable area formed, enclosing natural gas, petroleum and thermal water bodies, generated during millions of years. The structure of the Carpathian Basin is extremely complex, forming many different rocks of sedimentary, volcanic and deep-seated origin from Paleozoic times to the Pleistocene glaciations, when the Pannonian Sea already dried up and was filled with young sedimentary beds of a vast thickness. The present surface of the Basin is divided into partial basins and other geomorphologic units, as the Great Hungarian Plain, Transdanubia, the Transylvanian Basin, the Little Hungarian Plain, and the Zagreb Basin in the Drava-Szava Interstise. Extensive river-flat woodlands accompany the river floodplains. The climate of the Basin is temperate and

mildly continental in character. The historical-ethnographical regional names within (and adjoining) the Carpathian Basin are as follows: *Aranyosszék* (*Aranyos Seat*), *Avasság*, *Bácska*; *Bakony Mtn.*; *Bakonyalja* (*Bakony foothills*); *Bánság*; *Bányaság*; *Barcaság*; *Bereg*; *Bihar*; *Fekete Kőrös Völgy* (*Black Kőrös Valley*); *Bodrogköz* (*Bodrog Interstice*); *Bukovina*; *Bükkalja* (*Bükk foothills*); *Csallóköz* (*Csalló Interstice*; *Cserhát Mtn*; *Csík*; *Délvidék* (*Southland, South Hungary, Southern Hungary*); *Duna mellék* (*Danube Flats*); *Duna-Tisza Köze* (*Danube-Tisza Interstice*), *Drávaszög* (*Dráva Triangle*); *Ecsedi Láp* (*Ecsed Marshland*); *Erdőhát* (*Woodland Heights*), *Erdővidék* (*Forest Land*), *Érmellék* (*Ér Flats*); *Felvidék* (*Upland, Northern Hungary, northern part of the Historic Kingdom of Hungary, now Slovakia*); *Fenyér*; *Galga mente* (*Galga Flats*); *Garam mente* (*Garam Flats*); *Göcsej*; *Gömör* (*Gemer*); *Gyergyó*; *Gyímes*; *Hajdúság*; *Hanság*; *Háromszék* (*Three Seats*); *Havasalföld* (*Wallachia*); *Hegyalja* (*Foot of the Mount, in Transylvania*); *Hegyalja* (*in Northern Hungary, present-day Slovakia*); *Hegyalja* (*in the Tokaj region of Hungary*); *Hegyentúl* (*Beyond the mountain*); *Hegyföld* (*Mount Land*); *Hegyhát* (*Mountain-crest*); *Hegyköz* (*Mountain Gap*); *Hetés*; *Hétfalú* (*Seven villages*); *Hortobágy*; *Nagyalföld* (*Great Hungarian Plain*); *Hunyad*; *Ipoly mente* (*Ipoly Flats*); *Jászság*; *Kalocsa-Sárköz* (*Kalocsa-Sár Interstice*); *Kalotaszeg*, *Kászon*, *Kemenesalja* (*Foot of Kemenes*); *Kemeneshát* (*Kemenes Ridge*); *Királyföld* (*King's Land*); *Kiskúnság* (*Little Cumanian Land*); *Kőrösköz* (*Kőrös Interstice*); *Küküllő mente* (*Küküllő Flats*); *Kisalföld* (*Little Hungarian Plain*); *Marosszék* (*Maros Seat*); *Máramaros* (*Marmures*); *Mátra Mtn.*, *Mátraalja* (*Mátra foothills*); *Mátyusföld* (*Mátyus Land*); *Mecsek Mtn.*; *Mecsekalja* (*Mecsek foothills*); *Mezőföld* (*Meadow Land*); *Mezőség*; *Moldavia*; *Muraköz* (*Mura Interstice*; *Nagyerdő* (*Great Forest*); *Nyírség*; *Ormánság*; *Őrség*; *Palócföld*, *Rábaköz* (*Rába Interstice*); *Rétköz* (*Rét Interstice*); *Rézalja* (*Réz Mtn. foothills*); *Sárköz* (*Sár Interfluve*); *Sáros*; *Sárrét* (*Sár-Meadow*); *Slavonia*; *Sokoróalja* (*Sokoró Foothills*); *Somogy*; *Sóvidék* (*Salt-district*); *Szamoshát* (*Szamos-ridge*); *Székelyföld* (*Szekler Land*); *Szepesség*; *Szerémség*; *Szigetköz* (*Sziget Interstice*); *Szilágyság*, *Tápió Mente* (*Tápió Flats*); *Temesköz* (*Temes Interstice*); *Tiszahát* (*Tisza Ridge*); *Torockó*; *Transdanubia*; *Transylvania* (*Erdély*); *Tiszántúl* (*Trans-Tisza or Transtibiscan Region*); *Udvarhelyszék* (*Udvarhely Seat*); *Vendvidék* (*Vend District*); *Viharsarok* (*Storm-Corner*); *Völgység*; *Zobor-vidék* (*Zobor-district*); *Zselicség*. – B: 1134, 1138, 7456, T: 7456.

**Carpathian Mountains** – They constitute a 1500 km long, 50 to 150 km wide semi-circular fold-mountain system, surrounding the Carpathian Basin. The Carpathian Mountain Arc forms part of the Tertiary Alpine mountain system. It is a geologically complex mountain system, composed of a number of heterogeneous elements. Geologically it begins from the Vienna Basin in the west, where the folding movements began, and ends at the Törcsvár Pass South-West of Brassó (now Brasov, Romania) in the east; extending down to the Lower Danube stretches in the Southern Carpathians (*Carpatii Meridionali*, with the Negoj peak 2536 m), it is geologically quite different, wholly made up of crystalline rocks. Geographically the Carpathian arc begins in the form of the Little Carpathians, then continues as the Western Beskids on the outside, and the Little Fatra, Great Fatra and Low Fatra on the inside, continuing in form of the Eastern Beskids (now part of Slovakia). Further east the mountain arc narrows into a single range in the Northeast Carpathians (now part of the Ukraine). In Transylvania the Carpathians branch out again into several belts, such as the Radna and Kelemen Ranges on the inside, and the Eastern Carpathians on the outside, extending as far south as the

Brasso (Brasov) Range, then the arc turns west, forming the Southern Carpathians (now mostly part of Romania). Geologically, in cross-section, the Carpathians consist of four parallel zones, which are fully developed in the Northwest Carpathians (now in Slovakia): (1) Sandstone belt, including the so-called Flysch deposits; it is the widest and outermost belt; (2) Limestone cliff belt, a little more inwards, the so-called Pieniny Klippen Belt; (3) Crystalline belt, the so-called “core mountains” or “Internides”, inside the main Carpathian arc (e.g. the High Tatra, 2655 m); (4) Volcanic belt, the innermost belt (on the inside periphery) of the Carpathians (e.g. the Tokaj Range, Vihorlat, Gutin and Hargita). In addition there are the *relict mountains*, composed of ancient (Variscan-age, 542 to 251 million years) crystalline rocks in the inner, peripheral parts of the Carpathian Basin, e.g. the Vepor Mountain, the Slovakian Ore Mountain in the North, the Radna Alps in the Northeast, and the West-Transylvanian Island Mountains (the Bihar Massive), which includes the Transylvanian Ore Mountain. (Muntii Metaliferi). – B: 1068, 7456, T: 7456.

**Carpatho-Ukraine** (*Kárpátalja*, Sub-Carpathia, Ruthenia, now belonging to the Ukraine, first time in history) – (1) *Geography*. This was the northeastern part of the historic Kingdom of Hungary, and is now divided between the Ukraine and Romania. It consists of two parts:

(a) *The Northeastern Carpathians*, a short 160 km long section of the Carpathian Mountain Arc from the Uzsok (Uzhok) Pass (859 m) in the west, to the Cserna Hora Range in the east, made up of the Máramaros (Marmarosh) Alps, composed of several parallel ranges (Polonina Ranges) of sandstone (flysch). On the outer Ukrainian side the sandstone belt is rich in oil and rock salt. Along the internal periphery of this section of the Carpathians looking toward the Great Hungarian Plain, there is a belt of volcanic mountains: the Vihorlát, Szinyák (Kéklő), Borló and Nagyszöllős (Vinohradiv), composed of lava flows of Miocene andesites and their tuffs and some rhyolites. The nearby salt belt includes such salt mines as Sóvár, Sókút, Máramarossziget (now Sighetu Marmatiei, Romania), Aknaszlatina (now Solotvyna) and Aknasugatag (now Ocna Şugatag, Romania) in the Maramarosh Basin (an inter-mountain basin). The main rivers flowing toward the center of the Carpathian Basin as tributaries of the River Tisza, are the Laborc in the west, and the Ung, Latorca, Borza, Talabor, Tarac and the upper course of the Tisza itself in the east. The rivers issuing from the outer, northern slopes are the San, the Dnestr and the Stry. The mountain forests are largely composed of oak (*Quercus*) and hornbeam (*Carpinus*).

(b) *The northeastern margin of the Great Hungarian Plain (Pannonian Plain)* made up of Quaternary deposits: loess, shift-sand, soda-rich soils (*szikések*) and Holocene alluvium. In medieval times this formed swampy, impenetrable lowlands. It has a variety of mineral springs: (i) Saline springs at Aknaszlatina, Rónaszék (now Costiui, Romania) and Királymező (now Usty Csorna, Romania); (ii) Sulphurous springs at Breb; (iii) Alkaline springs at Szaplónca (now Sapanta, Romania); (iv) Iron-rich springs such as Gyertyánliget (now Kobilecka Polana, Ukraine) and Borsabánya (now Băile Borşa, Romania), near Máramarossziget.

The population of Sub-Carpathia or Transcarpathian Ukraine is composed mainly of *Ruthenians* (or Rusyns, now officially called Ukrainians) in the mountains, and *Hungarians* at the foot of the mountains on the northeastern edge of the Great Plain. The

Ruthenes up to recent times did not form a uniform ethnic or linguistic unit. They live in the valleys, inter-mountain basins, forest clearings and mountain slopes of the Northeastern Carpathians. These areas were uninhabited at the time of the Magyar settlement of the Carpathian Basin at the end of the 9th century. They gradually settled in these mountainous regions and built fortified castles. From the 12th century onward the Ruthenes were encouraged by the Hungarian landowners to settle in the area. They were either transplanted from Galicia as a cheap source of labor, or infiltrated from beyond the Carpathians, migrating from Podolia and Volhynia. From the middle of the 19th century, many Galician Jews settled in Sub-Carpathia after their emancipation by the Habsburg Emperor Franz Joseph I (*Ferenc József*); but their arrival in the region had begun as early as the 17th century.

The Ruthenians are mainly farmers growing barley on the mountain slopes, where they also tend their flocks of sheep. In the forest clearings they work as woodcutters. Homemade preparation of beer is widespread, as is alcoholism. Their lodgings are built of timber, and their folk-art typically consists of woodcarvings; their clothing is mainly woollen. The Hungarian population on the flatland of the plain is composed mainly of farmers growing wheat, rye and maize; they keep cows and raise pigs; their towns are centers of learning and culture. The main urban centers are Munkács (now Mukachevo), Ungvár (now Uzhgorod), Beregszász (now Beregovo) and Nagyszöllős (Vinohradiv).

(2) *History*. Near the end of the 9th century, when the Magyars, led by Prince Árpád took possession of the Carpathian Basin, it was in this uninhabited mountainous area of the Northeastern Carpathians, where Árpád's forces, followed by his people, moved in mainly through the Verecke Pass (841 m) and down the valley of the River Latorca.

During the centuries of the Árpád Dynasty (1001-1301) the area of Sub-Carpathia was largely Crown Land, a favorite hunting ground for the king and nobles. It formed an important defensive belt, as shown by the quite early establishment of castles, fortified places like Munkács and Ungvár, while others formed earthen fortifications such as Borsova. Its ruins are still visible in the outskirts of the present-day township of Vári (now Vary in Carpatho-Ukraine). Among the 44 counties established by King István I (St Stephen, 997-1038), were the two early counties of this region: County Ung, with the town of Ungvár (*Ung Castle*), and County Borsova, with the towns of Munkács and Borsova. In 1085, the Pechenegs (*Besenyők*), who burst into the Carpathian Basin over the Tatar Pass near Kőrösmező in the upper reaches of the Tisza River, were driven out of Hungary by King László I (St Ladislas, 1077-1095). In addition to the autochthonous Hungarians, King Béla IV (1235-1270) in the earlier phase of his reign settled Ruthenians from Galicia, Saxons from Germany, as well as Cumanians (*Kunok*), Pechenegs, Flamands, Ishmaelites and Italians in the region. All this population was annihilated during the Mongol-Tartar invasion of 1241-1242, led by Batu Khan. Béla IV's rehabilitation of this region involved completely new settlers, who were transferred from the landed estates (fiefs) of feudal lords from other parts of the realm. King Lajos I (Louis the Great, 1342 - 1382) once again began to settle Ruthenians in Sub-Carpathia in 1365.

When the Kingdom of Hungary was split into three during the Ottoman Turkish occupation of the central part of the kingdom (1526-1686), a large section of Sub-Carpathia passed into the possession of the Habsburg kings; but in 1567, the Máramaros area was ceded to the Principality of Transylvania, then an independent state. Sub-

Carpathia was the winter quarters of the exiles in the struggle for independence led by Prince István (Stephen) Thököly (1678-1683). An important period in Ruthenian history was Prince Rákóczi's Freedom Fight (1703-1711). Many Ruthenians joined the Prince's army, who called them "my dearest Ruthenes". Another Mongol incursion in 1717 once again decimated the population of Sub-Carpathia and, in the period of recovery, two main ethnic groups emerged: the Hungarians and the Ruthenians, who increasingly gained ground. During the War of Independence against Habsburg rule (1848-1849), the Ruthenians enthusiastically sided with the Hungarians, including their intellectual class. Ruthenian-Hungarian solidarity became increasingly strong. So much so, that after the collapse of the Austro-Hungarian Monarchy in 1918, there was an interim period, before the signing of the Treaty of Versailles-Trianon (4 June 1920), when the Ruthenians enjoyed autonomy within Hungary from 21 December 1918 to 20 June 1920 and, during this period, they officially expressed their wish to remain within Hungary.

After the Peace Treaty of Versailles-Trianon dismembered the Historic Kingdom of Hungary, Sub-Carpathia passed to the newly created "successor" state of Czechoslovakia. The First Vienna Award on 2 November 1938 returned the Hungarian-populated flatland region of Sub-Carpathia to Hungary. When the state of Czechoslovakia collapsed in March 1939, all Sub-Carpathia united with Hungary with full autonomy. Toward the end of World War II, when the Soviet army took over the region, some 40,000 ethnic Hungarians, men and women, were removed for forced labor to the Soviet Union. Many years later only a few returned, the majority perished. After World War II, the Peace Treaty of Paris in 1947 ceded all of Sub-Carpathia to the Soviet Union. With the collapse of the Soviet Union, Ukraine simply "inherited" Sub-Carpathia from the Soviet Union, on 1 December 1991, although it had never historically been a part of the Ukraine. At the turn of the millennium, there were 183,000 ethnic Hungarians in Carpatho-Ukraine. Since 1920, the Hungarian historical Churches have played a major role, particularly during the Soviet era, in protecting, preserving and upkeeping the religious, cultural and folk tradition of their respective people. – B: 1085, 7456, T: 7456.→**Trianon Peace Treaty; Paris Peace Treaty; Atrocities against Hungarians; Kozma, Miklós.**

**Carthausian Nameless** (Anonym) (first half of 16th century) – A monk, the oldest representative of Hungarian Codex Literature. He originated from southern Hungary, visited Rome, but lived in the monastery of Lövöld (*Városlód*) near Veszprém. His most important work, finished in 1527, survived as part of the extensive Érdy Codex. It is a collection of sermons and gospels for Sunday and special days, dedicated to saints by treating their lives and legends. Its Latin foreword shows some humanist characteristics; it urges the introduction of a vernacular Bible and mentions the spreading of Luther's heresy. His main resources were the works of Pelbárt Temesvári; but he also mentions old chronicles in the legends of Hungarian saints. He wrote true Hungarian history for the first time in Hungarian. – B: 1150, 1020, T: 3240.→**Codex Littrature; Érdy Codex; Temesvári, Pelbárt.**

**Carul** – *Kar-ulu* totem bird, whose probable meaning is giant eagle. It is part of the Nagyszentmiklós Gold Treasure. On the No.1 pitcher it is holding the ancestral mother in its claws. As late as the 19th century, the *Obi-Ugors* tattooed its image on their bodies, thereby signifying their clan. The bird is illustrated with four-four wing feathers and three tail feathers. In the Hungarian language it is known as *karvaly* or *károly* bird. It is on the

ancestral coat-of-arms of the Kaplony family, who trace their origin to the arrival of the Magyars in their present land (895). The Count Károlyi family traces its origin to this clan. On documents, the ancestral name of their property is *Carul* the present name of the place is Nagykároly (now Carei, Romania). – B: 1020, T: 7682. →**Nagyszentmiklós Gold Treasure.**

**Cassandra Letter** – An open letter to Ferenc (Francis) Deák written on 22 May 1867 by Lajos (Louis) Kossuth in Paris protesting about the Compromise of 1867. He warned followers of the Compromise with Austria in 1867 that if Hungary's future were to depend on Austria, the final outcome would be fatal. – B: 1035, T: 3240. →**Kossuth, Lajos; Deák, Ferenc; Compromise of 1867.**

**Castiglione, László** (Ladislás) (Budapest, 14 November 1927 - Budapest, 2 April 1984) – Archeologist, art historian. Between 1945 and 1949, he studied Archeology of the classical period. From 1949, he was a fellow at the Museum of Fine Arts' Antiquities Division, preparing its collection for publication. In 1957 he obtained a Ph.D. in History. In 1958 he became a founding member of the Archeological Research Team of the Hungarian Academy of Sciences; then, from 1964-1980, acted as Director of the Department of Archeology. From 1968 until his death he was Editor for the *Acta Archeologica*, as well as founder and publisher of the Department's scientific publications. On his study tours he visited all major European collections and spent a considerable time in Egypt. His main field of interest was Greek and Roman art, sociology, and especially the history of religion. He was an internationally acknowledged expert on Egyptian, Greek and Roman cultures. His works include *Roman Art (Római művészet)* (1971); *Notabilities of Antiquity (Az ókor nagyjai)* (1971, 1982), and *Hellenistic Art (Hellenisztikus művészet)* (1955, 1971). His publications on these topics received international recognition. In 1964, he headed an archeological excavation team in Abdallah Nirqi, Nubia under UNESCO's auspices. His scientific findings were of vital importance not only to the archeology of the classical period, but also to the research of related areas of ancient history. He was a member of numerous Hungarian and foreign scientific societies. – B: 0883, 1178, T: 7617.

**Catalaunum, Battle of** →**Hun Battle; Attila.**

**Cathode Rays** (Cathode Emission) – Fast electrons that can be diverted into an electromagnetic field. Hittori noticed it first in gas discharge tubes. The application is wide ranging: cathode ray tube, oscillograph and television screen. Fülöp (Philip) Lénárd's scientific investigations paved the way for the discovery of X-ray. For these results he received the Nobel price in 1905. – B: 1138, T: 7675. →**Lénárd, Fülöp.**

**Catholic Church in Hungary, History of** – (i) BEGINNINGS and DEVELOPMENT. Christianity already had a history of about eight hundred years in Pannonia, a Roman Province, and Christianity survived in Pannonia long after the fall of the Roman Empire in 476. Christian communities survived through Hun and Avar rules up to the Slavs, who passed some of that heritage to the Hungarians. Quite a few early Hungarian Christian expressions like *milost* (Slav), *malaszt* (Hungarian), *templum* (Latin), *templom* (Hungarian) meaning temple or church in English, illustrate that. Following the Roman ecclesiastical system, King István I (St Stephen, 997-1038) organized the Church into

dioceses and parishes. He created two archdioceses, Esztergom and Kalocsa; and eight dioceses: Győr, Csanád, Vác, Eger, Pécs, Veszprém, Bihar and Erdély (Transylvania), the last two being now in Romania since 1920. Although borders changed, the names remained the same to this day. In addition to dioceses he founded three Benedictine abbeys and confirmed the Archabbey of Pannonhalma of the Benedictine monks. After a thousand confusing years the incorrupted right hand of the first Christian King is still kept in the Saint István Basilica, Budapest honored as the “Szent Jobb” (Holy Right Hand), while the Holy Crown of the House of Árpád is in the Parliament Building in Budapest.

To bring the Catholic Church closer to the people, King István I (St. Stephen) prescribed the building of a church for every ten villages in the country. To strengthen the Christian faith even more, he invited missionaries from Germany and Italy. The best known was Gerhard of Venice (*St Gellért*), who was killed by the Hungarians in 1046, in the hope of arresting Christianization. His statue stands on the Gellért Hill of Buda holding high the cross for the people of Pest. Moreover, to encourage his Hungarian subjects to visit the Holy Land, King István I (St Stephen) built inns on the way to Jerusalem, in Jerusalem, one in Rome, and one in Constantinople for lodging pilgrims. He was a pious but strong ruler.

After having lost his son and heir to the throne with the untimely death of Prince Imre (St Emeric), King István I progressively became dedicated to the Virgin Mary (*Szűz Mária*), naming many churches in her honor. Before his death, according to the Great Legend of King István, he offered his country to the patronage of the Virgin Mary as Patroness of Hungary. Since that time, reverence and devotion to Mary, the “Great Lady of the Hungarians” (*Magyarok Nagyasszonya*), an old Hungarian title for a leading woman of great dignity, has been a characteristic of the Hungarian Catholic people. Fifty years after his death in 1038, King István was canonized. He was the first canonized king of the Roman Catholic Church. His cult spread quickly in the universal Church. Recently Bartholomew, Orthodox Patriarch of Constantinople also proclaimed him a saint. Out of the about 113 churches built by Catholic Hungarians in the USA and Canada, twenty are dedicated to Saint István and twenty to Mary, Patroness of Hungary.

For establishing and organizing the church in Hungary, King István was known to his chroniclers as an “apostolic king”, a title inherited by his successors with some privileges, like naming bishops. The Christianization of the Hungarian people was considered to be completed by the time of King László I (St Ladislas, 1077-1095), who later was also canonized.

The 14 saints and blessed descendants of the Royal Dynasty of Árpád: István (St. Stephen), Blessed Gizella, St Imre [Emeric], St Margaret of Scotland, St László (Ladislas), St Piroska (Eirene), St Erzsébet I (St. Elisabeth) (1207-1231), Blessed Gertrúd, Margit (St. Margaret), St Kinga, Blessed Jolánta, St Erzsébet II (1292-1336), Blessed Csáky Mór (Maurice), St Hedvig, as well as the great number of hermits and members of religious orders of those days, indicate how quickly Christianity captivated the soul of Hungarians and their only native dynasty. The peoples of the Asian steppe, who raided Western Europe for six decades, accepted Christianity and became its bulwark for many centuries. Religious orders are to be credited to a great extent for achieving it.

After the early arrival of the Benedictines, came the Premonstrians from Germany in 1130. Before long the number of their monasteries and cloisters reached 41. The Cistercians, arriving from France in 1142, introduced an advanced agricultural method and, within a century, had 25 abbeys in Hungary. The Order of the First Hermits, the Paulines (*Pálosok*), founded in Hungary in 1250, spread to Italy, Germany, Austria, Poland, Lithuania and Sweden. Yet more successful were the mendicant orders, the Franciscans and Dominicans. The sustenance for the churches and religious communities was provided by the serfs of the land donated by the Hungarian kings to bishops or religious communities. In the absence of a university in Hungary before 1367, talented religious and secular young men went to Paris, Bologna, Padua, Vienna, Krakow and Prague to gain university education.

Hungary, during the Anjou dynasty (14th century) and under Zsigmond (Sigismund of Luxembourg) King of Hungary (1387-1437) and Holy Roman Emperor (1433-1437), as well as king of Bohemia and Italy, was still a significant country for keeping the Constantinian heritage alive, more in memory though than in political life. During the Renaissance, instead of unification, the world became more diversified and the temporal power increased its strength. And so did the challenge of Islam. Reform movements raised their voices; but none of them could unite interest among classes and fractions.

The leaders of the Church, inside as well as outside of Hungary, became more secular without concern for the faithful. Some of them spent ecclesiastical revenues to increase their own influence in order to accumulate power and wealth. The Fifth Lateran Council (1512-1517) lamented that it was not able to do anything about it. The kings of Hungary appointed bishops and archbishops, like László (Ladislás) Szalkai who, in spite of the pope's insistence, refused to be ordained, though he was already appointed Archbishop of Esztergom in 1524. Landlord bishops headed their own armies. Thus it became possible that in 1526, at the Battle of Mohács, seven bishops, half of the Hungarian Catholic hierarchy, among them Archbishop Pál (Paul) Tomori, leader of the Hungarian army died, and so did King Lajos II (Louis, 1516-1526), the last non-Habsburg king of Hungary. With him, the history of the foundational Hungarian Church ended. Yet renewal remained a lasting vocation for both the Catholic and Protestant Churches, as well as for the world.

(ii) RENEWAL: 1526-1920. The new era of renewal, the time of Reformation and the beginning of the Habsburg Dynasty, which lasted until 1920, the year of the Versailles-Trianon Peace Treaty. The era of renewal was not just a renewal of the Catholic Church, thanks to the Reformation. It was a renewal of the world at that time. It was a time of turning from the objective *res* "thing" to the subjective, to the individual, by emphasizing the internal instead of the external, the private instead of the public.

After the collapse of the Medieval Hungarian Kingdom, the country was divided; the northwestern part became a province of the Habsburg kingdom, the central part was under the Ottoman Turkish Empire; and the eastern part was the Principality of Transylvania, (*Erdély*, now in Romania). The political division of the country also brought about the division of the Church. That the Church survived in Turkish-occupied Hungary was due to the Franciscan and Jesuit missionaries, who ventured to visit Hungarian communities illegally at the peril of their lives. The Licentiati shared their work. The Licentiatus was a lay apostolate of a new form of evangelization, created to serve Turkish occupied Hungary. The members were Catholic laymen commissioned by

bishops as substitutes for parish priests. They baptized, witnessed marriages, preached, buried the dead, led communal prayers and taught children. The long list of those nameless heroes and martyrs will never be compiled.

The political division implied further divisions. One of them was not new. The Mongol and Turkish invasions just deepened it more. Pannonia was already a land of different linguistic families. During the devastating invasion of the Mongols under Batu Khan in 1241-1242, half the population of Hungary was massacred. King Béla IV (1235-1270), remembered as the second founder of the country, welcomed Germans, Bohemians, as well as Orthodox Ruthenians and pagan Cumanian immigrants from the East to repopulate the devastated Carpathian Basin. As time passed, Hungary became more and more a country of many nationalities. Due to the never-ending fights between Christian and Moslem forces, particularly around the borders between the Turkish and Royal Hungary, the deportation of Hungarians sold into slavery or recruited by the Ottoman Turks for their own army, all this in addition to plagues and starvation of the overtaxed peasants by both the Turks and Royal landlords, many Hungarian villages and towns became emptied again. The Habsburg kings of the time welcomed first the Wlachs (early Romanians) and Serbs to repopulate the vacated villages. Emperor Károly III (Charles, 1711-1740) promoted Catholic German and Slovak immigration to Hungary.

The second division was a social one. To the earlier divisions between Waldenses and Hussites, as well as the various forms of Lutheran and Calvinist congregations, the increasing estrangement between the exploited serfs and the rich feudal landlords was added. In 1514, a group of peasants, under the leadership of György (George) Dózsa, called to fight against the Turks, turned against the aristocrats. Following the expulsion of the Turks in 1686, the same class willingly joined the nobles in rebellions against the Habsburg kings, who happened at the time to be the “defensores” of the Catholic faith. István (Stephen) Bocskay (1604-1606), Gábor (Gabriel) Bethlen (1613-1629), György Rákóczi I (1630-1648), Ferenc (Francis) Rákóczi II (1703-1711) and Lajos (Louis) Kossuth (1848-1949) rebelled against the Habsburg kings and Austrian rule. Yet the political revolutions represented social and religious unrest as well. It was always the mission of the Church to cultivate concord and mutual respect among the various ethnic groups, reminding each that all are members of the same country and the same Christian Church. However, the mission of these times became almost impossible and most often failed.

The third religious division was a new one. Protestantism arrived just when the Medieval Hungarian Kingdom collapsed. It was first welcomed as a reaction to the Renaissance humanism of the Roman Catholic Church, calling Christians to return to the spiritual faith of the first Christians.

In Transylvania the Protestants, the Catholics and Unitarians were equally strong, so they agreed for the first time in Europe to grant religious liberty to each other in 1557. However, the application of religious freedom remained in the hands of the rulers. Three Catholic priests: two Jesuits, one Polish, one Hungarian and one Croatian Canon of Esztergom, were murdered in Kassa in 1619 (now Košice, Slovakia) for being “papists”. Pope John Paul II canonized them on 2 July 1995, as symbols of the unity of peoples living in the Carpathian Basin. On the day of the canonization, the Polish pope paid homage and asked for forgiveness for the 60 Hungarian Protestant ministers condemned

to galley-slavery by the Catholic royal court with the co-operation of the Primate of Hungary in Esztergom, George Szelepcsényi, in 1674.

When Hungarian Protestant theologians, trained in German universities, returned to Hungary with the new Hungarian translation of the Bible, published in 1590 by the Calvinist Gáspár Károli, they were able to convert the Hungarian Catholics to Protestantism. At the beginning of the 17th century, about 85% of the population of Habsburg Hungary was Protestant, mostly Calvinist. According to some statistics, there were no more than about 300 Catholic priests in Habsburg Hungary, whereas in the Reformed Churches 2000 ministers were preaching in powerful Hungarian, and the faithful were impressed by sermons inspired by the Hungarian Bible. By the end of the 16th century, out of the 900 parishes of the Archdiocese of Esztergom, 800 were not Roman Catholic. Out of 230 monasteries, only the Hermits of St. Paul had some left. The Calvinists had about 22 presses to publish Calvinist books, whereas the Catholics had only one. There were 134 Protestant high schools compared to 30 Catholic.

The Catholic renewal in Hungary started with Miklós (Nicholas) Oláh, Archbishop of Esztergom, who invited in the Jesuits in 1561. At that time, the Catholic Habsburg King Miksa (Maximilian, 1564-1576) forbade the solemn promulgation of the decrees of the Council of Trent (1545-1563). The Archbishop established a seminary in 1566. The Catholic renewal became more intensive with the new primate of Esztergom, Cardinal Péter Pázmány (1570-1637). He was an eloquent speaker, who mastered the Hungarian language as no one before him. Pázmány founded numerous educational and monastic institutions, including the University of Nagyszombat (now Trnava in Slovakia) in 1635, and a seminary in Vienna in 1624. He preached, disputed, published books with success, and was so influential that, in his lifetime, the Catholic Church regained its strength and the majority of the faithful returned to Catholic Christianity. Also, the shift was certainly due to a law that the subjects should practice the religion of the landlords (*cuius regio eius religio*).

Unlike Emperor Leopold I (1655-1705), who forcefully promoted the Catholic faith, not all Habsburg kings supported the Roman Catholic Church. Some of them were not even religious. Károly III (Charles) granted religious liberty in his countries; but József II (Joseph, 1780-1790), influenced by the rationalism of the French Encyclopaedists, suppressed 134 male and 4 female religious orders, affecting about 1700 members and closed all seminaries, except one. In 10 years he passed 6,000 laws affecting religious life.

What helped Church renewal, both Protestant and Catholic, were the schools, particularly universities, presses that printed Bibles, prayer-books, hymn-books and the Baroque arts. By the 18th century, the Jesuits directed about 40 schools and their Baroque churches were popular as in all Catholic countries. (In South America, there were at least 30 Hungarian Jesuits converting the natives). In Hungary, about 800 Jesuits taught and published books, including some sciences until their suppression by Pope Clement XIV in 1773, only to be reinstated in 1814 by Pius VII. At the time of Enlightenment, the local churches, as well as the universal church, were losing their prestige and autonomy, yet the popular devotion of the faithful deepened, thanks to prayerbooks and pilgrimages. And when poor Catholics and Protestants had to leave their homeland in the 19th and early 20th centuries, such devotion was their heritage that encouraged them to build their Hungarian Churches in North America throughout the 20th century.

Just before World War I, in 1910, the Roman Catholic Church in Hungary, in addition to the ten dioceses founded by the first king, had eight more dioceses (Besztercebánya, Erdély, Kassa, Nyitra, Rozsnyó, Szepes, Szatmár, Várad) together with eight more for the Greek Catholic Churches (Eperjes, Gyulafehérvár, Hajdúdorog, Körös, Lugos, Munkács, Nagyvárad, Szamosújvár). The number of parishes was over 6000. The total population, together with Croatia, was 20,886,457, out of which 61%, that is, 12,913,647 were Catholics. After the war – according to the census of 1920 – Hungary lost 63.6% of its total population, having left only 7, 980,143, of which 66 % were Catholic, i.e. 5, 271,976.

For the history of Hungary and for the Catholic and Protestant Churches, the Peace Treaty of Versailles-Trianon on 4 June 1920, was as devastating as another defeat at Mohács (1526). Like the disaster at Mohács, Trianon was a devastating outcome of a war lasting for four years, which brought about the abdication of the last Catholic Habsburg king, and the loss of two-thirds of the country. But like Mohács, Trianon meant the inauguration of a new era, which, with a phrase borrowed from Pope John Paul II, we would like to call a time of “Creative Fidelity” in three periods.

(iii) CREATIVE FIDELITY I. (1) *First Period: In the truncated country between 4 June 1920 (Treaty of Versailles-Trianon) - 19 March 1944 (Day of the German occupation).*

The period following the great loss after World War I (1914-1918) was another time of awakening. Both the nation and the Church looked back to their traditions. The Roman Christian Church reclaimed its place in the 20th century. The saints of the Árpád era electrified young and old, poor and rich. The first major event in the country was the celebration in 1930 of the 900th anniversary of St Imre's (St Emeric's) death. For its commemoration festive programs were held on 5-17th April. On 26-29 May 1938, the Eucharistic World Congress was held in Hungary with Cardinal Pacelli as papal legate, later Pope Pius XII, who in 1942 canonized Margit (Margaret) of Hungary, the daughter of the second founder of the country, King Béla IV (1235-1270).

The Benedictines, Carmelites, Capuchins, Dominicans and Jesuits lost many houses but gained in membership. Processions to Marian shrines were popular. More and more influential Catholic leaders emerged. Among them there was Ottokár Prohászka (1858-1927), Bishop of Székesfehérvár, an intellectual and popular speaker, who reminded the faithful of the Church's social doctrine and challenged liberal and Communist ideas. There were others creative in Catholic traditions, like Bishop Gusztáv Károly (Gus Charles) Majláth, Sándor (Alexander) Giesswein, the apostle of youth, Tihamér Tóth, also the laymen Nándor Zichy, Móric (Maurice) Eszterházy and Sándor Barkóczy. Equally creative were the members of various religious congregations, among them the Piarist Sándor Sík, the Jesuit Béla Banga (1880-1940), Ferenc (Francis) Bíró (1869-1938), promoter of the Catholic press; Jenő (Eugene) Kerkai, the rural youth KALOT (*Katolikus Legények Országos Testülete – The Catholic Youths' Association*) organizer. Various associations were established, such as the EMSZO (Egyházközségi Munkás Szakosztály, *Labour Department of the Parish*) for workers, the KIOE (*Katolikus Iparos Ifjak Országos Egyesülete – National Association of Catholic Industrial Youth*) for young workers; the KALASZ (*Katolikus Lányok Szövetsége – Catholic Girls' Association*) for young women, and the Guard of the Sacred Heart (*Szívgyárda*) for elementary school children. New Hungarian religious communities were formed for education and social work like the Sisters of Social Service founded in 1923 by Margit Schlachta and the

Society of the Heart of Jesus (*Népleányok*) by P. Bíró in 1921, to give unconditional priority to the Church's spiritual vision and mission and to compete at the same time with a materialistic world, where profit seemed to be the only way of survival.

Yet *Creative Fidelity* was not and could not be creative enough. It needed more time. The relationship between the lord bishops, still members of the Upper House of the Hungarian Parliament, and priest-ministers was not cordial, and later served well the Communists' interest to further subjugate the Church. A more equitable distribution of the extensive lands owned by the Church in Hungary involved the same difficulty; one that Pope Pius IX had to face in his encounter with the Italian revolution. He said "Non Possum"; "I cannot do it". ("It was not given to me"). But were it taken away by force, he would never use force to take it back, because again "he could not do it".

The first period of Creative Fidelity ended when the first anti-Jewish law was passed in the Hungarian Parliament on 25 May 1938, under the pressure of German National Socialism. – B: 1107, T: 7456.

(2) SECOND PERIOD: *Persecutions during German National Socialism (19 March 1944 - 4 April 1945) and the Russian Communist Occupation (4 April 1945 - 23 October 1989)*.

The period of German National Socialism and Russian Communism could be viewed also as a time of renewal. It was a time of turning from the single individual to the collective, be it the community of a nation or the oppressed proletariat of the world. Both, German National Socialism and Russian Communism were the creations of a lost war and both hated the Church, seen by them as a rival, a competitor and an enemy.

(2.1) *Persecution during the German National Socialism (19 March 1944 - 4 April 1945)*.

The German influence in Hungary increased from the year 1933, when Hitler became German Chancellor. To prevent Nazi occupation, the Hungarian Government became more and more submissive and introduced the first anti-Jewish law, passed under pressure from the German National Socialist sympathizers in the Hungarian Parliament, on 25 May 1938. Under this law and under the subsequent anti-Jewish laws, not only Jews, but at least 61,548 Christians by religion having one, two or more Jewish ancestors, were "deprived of their civil rights and socially ostracized", humiliated, persecuted and indicted. Whatever was done to one person in Hungary it was done also to the Hungarian Christian Church.

Before the actual German occupation of Hungary on 19 March 1944, a large number of Jews of the neighboring countries (Poland, Austria, Czechoslovakia, Romania, Croatia), where deportations were already in progress, took refuge in Hungary. So did the German speaking French soldiers of Alsace, who visited the Champagnat, a French school in Budapest. They were provided with civilian dress and forged documents to return to France by one of the Marist brothers, Nándor Fischer. The Gestapo arrested the brother when an agent provocateur uncovered his action. By the Consul of Israel in Vichy he was awarded posthumously the Medal for the Righteous Among the Nations on 10 January 1982. Priests, like Fr. András (Andrew) Egyed and Religious, like Sára (Sarah) Salkaházy, a member of the Sisters of Social Service were shot by the Hungarian pro-Nazi Government on 27 December 1944, for sheltering Jews in their houses. The process of her beatification is now being evaluated in Rome. There is also the case of Fr. Jakob Raile, S.J., who saved about 150 Jews, hiding them in the cellar of the Jesuit Residence of 25 Mária Street, Budapest. He was awarded the Medal for The Righteous Among the

Nations, together with his name inscribed on the Honour Wall in the Garden of the Righteous at Yad Vashem, Jerusalem. Károly Varga Hetényi documented many more cases in his five volumes on Priests and the Faithful during the Eclipse of the Arrow-Cross and the Red Star.

József (Joseph) Mindszenty, Bishop of Veszprém, at the time was imprisoned by the Hungarian pro-Nazi government for encouraging the faithful, the clergy and religious communities to save the persecuted Jews. The Soviet Army freed him. Others acted similarly. Among them were the Bishop of Győr Vilmos (William) Apor and Kelemen (Clement) Krizosztom, Arch-abbot of Pannonhalma. However, this was not enough to save the Hungarian and Central European Jews, wearing the yellow Star of David, as marching on the street of Hungarian cities, led by the Gestapo and the Hungarian Nazis toward an uncertain future, yet certain destination. A few months later another group of men and women were driven by Soviet soldiers to another uncertain yet certain destination, some as far as Kazakhstan in the East.

(2.2) *The Communist persecution (4 April 1945 - October 23 1989).*

(a) The first was the nationalization of all Catholic Schools in 1948. Expressed in numbers this includes 3,148 educational institutions, 436,000 students, 3,597 professors and 9,092 teachers. Following an agreement between the Catholic Church and the State in 1950, six schools for boys and 2 schools for girls were returned to four religious orders.

(b) Cardinal József (Joseph) Mindszenty (1892-1975) was arrested, humiliated, put on trial and accused of subversion, treason, spying and currency manipulation, and then indicted. His death sentence was commuted to life imprisonment in 1949. He believed that he could not consent to injustice. His life was a revelation of his Church to the world; and his sufferings were an indication of what injustice can do. The Hungarian Freedom Fighters liberated him in October 1956, when he fled to the American Embassy. He remained a lasting witness to their success.

(c) Except for some members of the three male (Benedictine, Franciscan, Piarist) and one female (Poor School Sisters of Notre Dame) religious teaching communities for running their schools, all religious orders were suppressed, and about 2500 male and 9000 female religious were accused of being enemies of the Communist regime. They were forced to leave their houses (about 700) in June 1950 in a most brutal way and confined in far away locations. The Secret Police made its way into the houses during the night; the occupants were pushed around, beaten, given a short time to take necessary clothes and belongings, gathered all in a corridor or common room, herded them into trucks and were taken to concentration camps, where they were kept for months before they were released to start a private life with a job, unless they were indicted and imprisoned for years.

(d) Most of the Seminaries were closed. The police only let a limited number of candidates for the priesthood to study in those allowed to stay open. There were always one or two agents among them as spies.

(e) Church properties were confiscated and the Church could never reclaim the approximately 1,513,500 hectares.

(f) Church activities and functions were controlled. Bishops were named and priests ordained only with the approval of the State. This also applied to appointments and transfers from one parish to another.

(g) Schools from elementary to university level expounded Communist doctrines and provided Communist education. For a young woman or man higher education was prohibited if he or she did not enjoy the confidence of the system.

(h) No books, except Communist ones were promoted. All other books were removed from schools and public libraries.

(i) All associations were illegal except the ones formed by the State and everybody had to be a member of a Communist association corresponding to age and profession.

(j) During over forty years (1945-1989), as Károly (Charles) Hetényi Varga documented, an unknown number of priests, religious and faithful were indicted and imprisoned for being members of an illegal organization, like a religious order; or simply for not being supportive of the spirit of the people's democracy. In prison they were beaten, tortured, humiliated and deprived of any self-esteem. Fr. Antal (Anthony) Pálos described it as a life in anxiety and fear of moral death and then, after having lost all honor, living with constant shame of oneself, humbled and waking in the midst of the human race, waiting for the physical death which finally liberates one from the crucifying pain of self-contempt. From 1945 to 1964, some estimate that 34 priests were executed or died in prison. Nevertheless, the system could and did kill the spirit and bring about a way of existence where self-destruction appeared as a redemptive act. It was so terrible that the system itself could not stand it any more. Stalinist Communism destroyed itself progressively. It was a redemptive act both for communism and the human species.

At the beginning, Hungarian Communism with its first leader, Mátyás (Matthew) Rákosi assumed that the time had come to terminate the Church. Its survival was just a question of time. "It is a matter of the number of coffins", Rákosi used to say. Yet it turned out otherwise. It was human nature that defeated Communism. After over forty years a strong religious feeling was still alive and growing. The number of underground illegal religious groups increased from a dozen to 4000 with a membership of 100,000, according to some sources. As time passed the second, third and fourth generations of the Hungarian Communist party leaders realized that their time was over and they prepared the way for a change. The prisons were being gradually emptied. The time of persecutions came to an end on 23 October 1989, when the New Constitution was announced from the window of the Hungarian Parliament in Budapest. Hungary became a democratic republic and the time of Creative Fidelity returned, more experienced, stronger and hopefully lasting longer. – B: 1055, 7648, T: 7648, 7643.

(iv) CREATIVE-FIDELITY II. *At the Dawn of the Millennium.*

After World War II, Hungary, with other Central-Eastern European states, came under the Soviet sphere of interest, as was decided at the Yalta Conference on 4 - 11 February 1945. With the presence of the Red Army, the forced transformation of the country according to Communist ideology started in full force and lasted for forty-five years with a short break during the Revolution and Freedom Fight from 23 October - 4 November 1956. The persecuted Catholic and Protestant Churches had to find methods of survival. Despite many accusations, they succeeded.

The dictatorship suddenly collapsed and, in 1989, the Communist system changed unexpectedly with a bloodless revolution. Before the change, there were signs of political thaw, among them an invitation to the Pope in 1989 to visit Hungary, and a resumption of diplomatic ties between the Holy See and Hungary, which had been severed in 1945. In 1990, the Statutum of the Hungarian Catholic Bishops' Conference was endorsed and it

elected for a 5-year term Archbishop István (Stephen) Seregély to be its president. In the same year, the Parliament passed a bill granting Freedom of Conscience and Religion (Acts IV, 1990). It stipulates, among other things, the separation of Church and State. Since then Church activities are free. Its weak points include e.g. the founding of new religious communities. In 1991 a new, vital bill passed with regard to the actual ownership of former Church properties confiscated by the Communist regime (Acts XXXII, 1991).

Between 16 and 20 August 1991, Pope John Paul II visited Hungary. He met not only leading, but also common church-people, statesmen and other church-leaders. Besides celebrating Mass, he participated in an ecumenical service in Debrecen in the Great Reformed Church, and laid a wreath at the Protestant Martyrs' Memorial. The Pope visited Hungary for a second time in 1996, on the 1000th anniversary of the founding of the Pannonhalma Abbey.

An important event was the gradual rebuilding of the religious orders and spiritual movements. After the political change, renewed activities were started by many religious orders. It was a difficult new beginning; but they prevailed. At present there are some 90 active religious orders in Hungary. The new Sapientia Academy was founded for training young members of religious communities. New spiritual movements came into existence, such as Opus Maria (*Mária Műve*), Married Couples' Weekend (*Házasság Hétféje*), the Cursillo, the Schön Stadt, the Neokatehumanatus and the Ark (*Bárka*).

As for the old societies: the Actio Catholica is not yet active. The KALOT, the KALÁSZ and the Boy Scout movements were renewed, although in principle only. Quite active are the Kolping Association, the Christian Intellectual Association (KÉSZ) and the Pax Romana.

The Church has some 300 educational institutions, among them the Péter Pázmány Catholic University in Budapest-Piliscsaba with 7500 students. There are two teacher-training academies at Zsámbék and Esztergom, 50 secondary schools (*gimnáziums*), preparing students for the university. The Church dioceses were rearranged and two new ones were created (Debrecen-Nyíregyháza and Kaposvár). Thus the Church has 14 Ordinaries and, since 1994, one Ordinary for the Military. In the '90s Diocesan Synods were held. The number of clergy is not yet sufficient and pastoral aids are employed.

The foreign relations of the Church were extended and strengthened not only with Rome and the members of the Western churches, but with sister churches in the neighboring countries as well. Pilgrimages were organized to Rome and to the Holy Land.

The situation of Christian literature has been good. New publishers are at work and they publish monographic and lexical works, as well as new literature. There is no Catholic daily newspaper but there are two significant weeklies: the *New Man* (*Új Ember*) and the *Christian Life* (*Keresztyén Élet*) to reach Hungarians beyond the borders. Among the monthlies, the Jesuit *Perspectives* (*Távlatok*) and the *Vigilia* are important.

In 1997, an agreement was made between the State and the Vatican with regard to the financial support of the Church. According to the agreement, taxpayers may offer one percent of their income to support their respective church.

The only positive result of the Communist persecution of the Church is that Christians of different denominations pulled together. Since the Second Vatican Council, the idea of Ecumenism has become more popular. There is a good working relationship between

leaders of the historical churches. Their statements with regard to church-life and community services are unanimous.

As for Christian heroism, the Pope canonized the martyrs of Kassa (now Košice, Slovakia), Saint Hedvig (Hedwiga) in Krakow 1997, and Saint Kinga at Ószandec (Stary Sacz, Poland) 1999. The processes of beatification of Cardinal József Mindszenty and others have been initiated.

The year 2000 signified the great jubilee of Christianity and the millennium of the foundation of the Hungarian state.

According to the 2001 census, 75% of a population of 10 million stated that they are Christian and of that three quarters are Catholic. It is remarkable that, according to the census, only 887 individuals considered themselves explicitly atheist without further qualification. The proportion of all those who, on their own way decide what religion they belong to, is too important to ignore. The Church has now some 2200 clergymen and 5000 churches including 200 new ones.

Thus Catholic Church is prepared to fulfill its pastoral duty at the beginning of the new millennium. – B: 1009, T: 7103.

(v) *Pastoral Care of the Hungarian Roman Catholics in Sub-Carpathia (now Carpatho Ukraine), Transylvania (now Romania), Northern Hungary (now Slovakia) and Voivodina (now Serbia).*

The Great divides of the 20th century were National Socialism and Communism tearing families, peoples and nations apart, only to let them again come together to form part of the European Union. It was a century of emigration of masses. Peoples and religions were forced to cross borders to form minorities in their new homes, or to become a minority in their own homes. The popes beginning with Leo XIII, Pius X, Benedict XV and Pius XI expressed concern for the refugees. Pius XII in his encyclical “Exul Familia” on August 1, 1952, asked and directed the local hierarchies of the Roman Catholic Church to provide priests, who can speak the languages of the Catholic refugees. John Paul II went further and asked minorities to pray for priestly vocations from among their own people. He insisted on “native” clergy and not just language-speaking priests. In the time of National Socialism and Communism, any pastoral care for Hungarian Roman Catholics was very difficult who, without moving, found themselves overnight in a foreign country. But after the collapse of Communism, freedom had a chance again. In all those regions with a painful past, there is hope for a better future in a European Union where everybody will be home again.

(a). *Sub-Carpathia (Kárpátalja or Ruthenia, now Ukraine).*

This former Hungarian region was awarded to Czechoslovakia in 1920, but recovered by Hungary in 1939, and kept it until the end of 1944. Between 29 June 1945 and 1990, Sub-Carpathia belonged to the Soviet Union. In 1910, the Hungarian population was 183,000; in 1989, 163,000. Under the politics of population “leveling”, many of the Hungarian Catholics were deported as far away from their home as Kazakhstan. The Greek Catholics were under extra pressure to give up their religion and join the Orthodox Church. The indictments of some of the Hungarian Catholic priests of the diocese of Munkács (now Mukacheve), who were persecuted for their church during the years prior to 1989, are documented in Hetényi’s “Papi Sorsok” I (*Priestly Fates*).

After the break-up of the Soviet Union, Ukraine became independent on 17 October 1990. Since then Sub-Carpathia has belonged to the Ukraine. After the Communist

oppression, the Catholic Church became free to serve its faithful. Sub-Carpathia now has two Hungarian Greek Catholic bishops and one Roman Catholic. There are about 40.000 Hungarian Roman Catholics living there. Since 1996, beside the Roman Catholic Bishop, there are 16 Hungarian priests and one deacon with 58 churches. Children from 2 years to 18 can conduct their studies in Hungarian in 66 schools. They have 3 Catholic High Schools and in one of them the teaching is in Hungarian and also in one vocational school. In addition there are 27 Hungarian and Ukrainian bilingual schools. Various religious orders from Hungary provide pastoral visits to various cities and regions. The Jesuits care for Ungvár (Uzhhorod), the Dominicans for Munkács (Mukacheve) and the Franciscans for Beregszász (Berehove), Huszt (Khust) and Nagyszőlős (Vhinovradiv). Bishop Antal (Anthony) Majnek, apostolic vicar who, in the name of the Pope, directs the pastoral care of all the Roman Catholics in Sub-Carpathia. – B: 1027, T: 7643.

(b). *Transylvania (Erdély, now Romania).*

This historic region of Hungary, greater than the present day truncated Hungary, was occupied by Romanian forces in late 1918. The Versailles-Trianon Peace Dictate of 1920 ceded it to Romania with some 2,500,000 native Hungarians. Since then, their life has been grim systematic suppression.

The year 1989 was the beginning of a new era for Transylvania. Two world wars, the Nazi and Communist occupation with the accompanying exodus decreased the number of the Roman Catholics living in Transylvania. Now they are about 892,400. According to the *Annuario Pontificio* in 2002 the Diocese of Gyulafehérvár (Alba Iulia) had 491,763, Temesvár (Timișoara) 182,649, Nagyvárad (Oradea) 108,012 and Szatmár (Satu Mare) 110,000 faithful. There are about 620 Roman Catholic churches with 392 parishes where about 499 diocesan and 40 religious priests serve the people. Furthermore about 66 religious and 237 nuns support the priests in their pastoral care. In Transylvania there are 6 Hungarian bishops and 2 archbishops for 892,400 faithful. Áron (Aaron) Márton who courageously defended his faith and the Church was Bishop of Gyulafehérvár from 1939 to 1980. Antal (Anthony) Jakab was his successor. Now Msgr. György (George) Jakubinyi is the Archbishop of Gyulafehérvár.

In the priesthood Seminary of Gyulafehérvár there are 108 seminarians. This number does not include those seminarians in Hungary or in other European countries preparing themselves to serve the faithful of the Roman Catholic Church in Transylvania. Now that they were free, religious orders increased in number and in their activities. So, the Franciscans appeared in Déva, Dese, Csíksomlyó, Vajdahunyad, the Minorites in Arad, Premonstrians in Nagyvárad, the Franciscan Sisters in Nagyvárad and Székelyudvarhely (Odorheiu Secuisc) Sisters of Szatmár in Szatmár and the Ursulines also in Nagyvárad. The Institute of Fr. Csaba Böjte that helps poor children is well known in Europe and North America.

In the years 2001-2002, 187,156 Hungarian students were studying in Hungarian schools. There are 9 Roman Catholic High Schools. Sapientia is the only private university where all instruction is in Hungarian. It is recognized as a private university. Besides these there are nine other universities offering certain courses in Hungarian. Since 1996 the University of Kolozsvár (Cluj-Napoca) has a Roman Catholic Theological Faculty. – B: 1060, T: 7643.

(c). *Northern Hungary (Upland, Felvidék, now Slovakia).*

The Northern Hungary (Felvidék) was part of Historic Hungary, ceded to Czechoslovakia in 1920, and from 1 January 1993, it became Slovakia. According to the 1991 census, the Hungarian-speaking population was 608,000 and of that 368,000 were Catholics. They were living in 250 parishes; one third of them had neither Hungarian speaking priests nor Hungarian speaking bishops. The persecution of the Church started in earnest in 1944 when Communists mounted an offensive campaign against bishops, priests and the religious. In 1945, Church schools were nationalized, religious organizations disbanded and the press impeded. In 1972 nuns were removed to farms and mental hospitals.

During the Communist era the head of one of the underground Christian youth organizations was László (Ladislav) Bokor. The name Bokor means “bush” in English, and is the symbol for a covered unit. It became the collective designation for underground Catholic youth movements in Croatia and Hungary. In the latter Fr. György (George) Bulányi, a Piarist, set up a similar youth organization. He was punished and imprisoned for many years in Hungary. László Bokor was beaten and became crippled for the rest of his life. The indictments of some of the priests of Besztercebánya (Banska Bistrica), Eperjes (Prešov), Kassa (Košice), Nagyszombat (Trnava), Nyitra (Nitra), Rozsnyó (Roznava), Szepes (Spis), persecuted prior to the year 1989, are documented in Hetényi’s “Papi Sorsok I, III” (*Priestly Fates I, III*).

Since 1991, the Center of Hungarian Religious Instruction (Magyar Hitoktatási Centrum) has offered a three-year program for teaching religion. By now there are more than 100 graduates from the Centrum qualified in the Christian faith. Gloria Publishers has printed liturgical and religious books since then. Párkány (Sturovo) has a Catholic kindergarten. Marianum in Komárom (now Komarno) opened a kindergarten, elementary school and high school. Ipolyság (Sahy) has an elementary and high school. In Gúta there is a high school with a program for eight years. At two locations, private high schools could be constructed provided the Church could recover their formerly nationalized lots. Komárom is the center of the Association of Christian Youth (KIK Keresztény Ifjúsági Közösségek). The catalogue of Attila Miklósházy, SJ, Bishop for Hungarian Catholics living outside Hungary (except Ukraine, Romania, Slovakia, Serbia and Austria) lists 3 bishops in Slovakia who speak Hungarian (2002, Toronto). Since 2006 Bishop Ferenc (Francis) Cserháti serves the Hungarian Catholics in the West.

The Good Shepherd Association (*Jópásztor Társulat*) of Rév-Komárom (now Komarno, Slovakia) was inspired by Pope John Paul II’s visit to Pozsony (now Bratislava) in 1991, when he asked Hungarian Catholics to pray for priestly vocation among the Hungarian youth in Slovakia. The main objective of the Association is the yearly prayer-days in Komárom praying for a Hungarian bishop for the Northern Hungary (Felvidék). In 1995, the Association presented a petition with 53,000 signatures in Rome to John-Paul II. During the last 13 years the Association has celebrated consecutively 13 prayer-days. – B: 1056, T: 7643.

(d). *Voivodina, (Vajdaság, Southland, Délvidék, now Serbia).*

In 1920, the Versailles-Trianon Peace Dictate ceded this former southern region of Hungary to the Kingdom of Serbs, Croats and Slovenes, later known as Yugoslavia. This region includes parts of Bácska, Bánát and Szerémség. After Yugoslavia fell apart during the Balkan War in the ’90s, they became part of Serbia. In 1948, some 459,000 Hungarians lived here in minority status. Now their number is 350,000. There are

312,000 Hungarian Roman Catholics. 2 bishops and 82 priests serve them in 170-180 churches. Msgr. László (Ladislás) Huzsvár is Bishop of Bánság and Dr. János (John) Pézes is Bishop of Bácska. There is no Hungarian school. Private schools again could be constructed at two locations provided the Church could recover their formerly nationalized lots. In Nagybecsberek (Zrenjanin) there is a college for student accomodation but no teaching. For the young seminarians there is a high school in Szabadka (Subotica) but the teaching is not in Hungarian. Hetényi's "Papi Sorsok" III documents the indictments of some of the priests of Kalocsa-Bács Diocese persecuted prior to 1989. – B: 1022, 1057, T: 7643.→**Greek Catholic Church in Hungary; Religious Orders in Hungary, Roman Catholic; Atrocities against Hungarians.**

**Catholic International Bible Conference** – Established in 1989 for Christian Bible scholars in the Carpathian Basin and for Bible scholars and university professors of Western European countries. The conference established contact with 70 universities. Some 120 participant theologians, scholars, priests, teachers of religion and journalists attend its yearly meetings. Scholars involved in research of Biblical Sciences give lectures. So far there have been some 15 conferences. The conference proceedings are published yearly in separate books. The chief patron of the conferences is Bishop Endre (Andrew) Gyulay of Szeged; its co-patron is Archbishop György (George) Jakubinyi, Gyulafehérvár (now Alba Iulia, Romania); its director is György Benyik (Szeged 6 Dóm tér, Hungary). – B: 1008, T: 7103.

**Catholic Song Writing** – a literary collection of ancient Christian and some Catholic religious texts from the 16th and 17th century. Catholic song writings in Hungarian were found in medieval codices. The oldest of them is the *Old Hungarian Maria-Lamentation (Ómagyar Mária-siralom)*, dating from the beginning of the 14th century. It was found in the Codex of Louvain. Well-known are the hymn translations of the Döbrentei Codex together with the Song to King László I (St Ladislás), and Maria Vásárhelyi's Song to the Virgin Mary. – B: 1150, T: 3240.→**Codex Literature.**

**Caucasus Mountains** (Russian: Kavkaz, Kaf-dag) – An Eurasian fold-mountain system, extending from the Black Sea in the west, to the Caspian Sea in the east, with a length of 1280 km and width 100-225 km, covering an area of some 84,000 km<sup>2</sup>. It is bordered in the north by the Kuban and Terek River basins, in the south by the river flats of the Kura. Its highest peak is Elbrus, 5633m; other main peaks include Dys-tau 5211 m, and Skara 5182 m; also Kostan-tau 5151 m, among which there are 3000-4000-meter-high passes. In the east, there is the great mass of the Adai-Koh, 4643 m, which the Ossetian military road crosses along the 2862-meter-high Mamison Pass and the Gruz military route along the Cross Pass at 2332 m; not far from it is the volcanic peak of Kazbek, at 5045 m. It consists of parallel ranges; its core is made up of crystalline rocks, overlain in the west and north by sedimentary strata. Along the fault lines large volcanic cones are lined up. Its valleys are narrow; its passes are high; in early medieval times it was invaded by Khazars, Arabs, Huns, Turco-Mongols, and later by Russians, giving the region its ethnic and linguistic complexity, with more than 40 languages spoken. In the great migration period, the Caucasus formed a significant obstacle to movements of peoples. The Ossetians, Kabardinians, Circassians and Daghestani are the major groups in the north, the Armenians, Georgians, Kurds, Tats, Mingrelians and Azerbaijani the better-known

ethnic groups in the southern, Transcaucasian part of the Caucasus. Some small ethnic groups left behind include the Chechnis and Cherkess. Famous researchers of the ethnic wealth include Nikolaj Danilevsky, Wilhelm Abich, Alexander Cunningham and Gottfried Merzbacher. The Hungarian Mór Déchy organized seven expeditions from 1884 to 1904, together with specialists like Dezső (Desider) Laczkó, Károly (Charles) Papp and Ferenc (Francis) Schafarzik. Oil is the most important economic product of the Caucasus with oilfields in Baku, Grozny, Maikop, etc. On the southern slope, there is cultivation of figs, almonds, grapes, tea, rice, cotton, and various fruit trees. In the West there are oak and pine forests. It is rich in ores of iron, copper, lead, silver and gold.

In the middle of the 9th century, for a while, the early Magyars (Hungarians) lived north of the Caucasus foothills and had settlements like Little Madzhar, and Ulu-Madzhar. As a result of their sojourn in that area, numerous Caucasian loan words remained in the Hungarian language, like the Ossetian loan words *kígyó* (snake), *gyík* (lizard), *asszony* (married woman), *szén* (coal), *híd* (bridge), *ezüst* (silver) among others; Ossetian was a language of Iranian origin of a people who at one stage in their history lived in the Caucasian region. It is possible also that the Uralic peoples and their languages could have been strongly influenced by the metallurgical and horsebreeding practices of some Caucasian peoples. B: 1068, T: 7456.→**Ural-Altai Languages; Déchy, Mór; Laczkó, Dezső; Papp, Károly; Schafarzik, Ferenc.**

**Caux, Mimi de** (?1823 - Újpest, 12 August 1906) – Opera singer (soprano), actress. She is a descendent of an old family of French nobility settled in Hungary during the Huguenot wars. She was admitted to the National Theater (*Nemzeti Színház*), Budapest at the age of seventeen. Then she went on to Milan and became prima donna of the La Scala. At the time of Austrian General Haynau's rule in Lombardy, the Hungarian officers stationed in Milan organized a patriotic demonstration for her as a fellow Hungarian. In return she sang the Hungarian National Anthem (*Himnusz*) but had to escape the authorities as a result. Her main roles include Cordelia in Shakespeare's *King Lear* (*Lear király*); Marcsa in David Hirschfeld's *Fairy Castle in Hungary* (*Das Zauberschloss in Ungarn – Tündérkastély Magyarországon*); title role in G. Donizetti's *Lucrezia Borgia*; title role in G. Donizetti's *Semiramide*, and title role in V. Bellini's *Norma*. She enjoyed significant success in Paris, London and Berlin. The biggest part of her wealth was used to support Hungarian veterans. With her daring and stylish art of singing she popularized Hungarian songs wherever she went. She returned to Hungary in the 1880s and settled down in Újpest. – B: 1078, 1445, T: 7685.→**Haynau, Baron Julius Freiherr von.**

**Cavallier, József** (Joseph) (Budapest, 23 February 1891 - Budapest, 31 January 1970) – Journalist, editor-publisher. He studied at the University of Budapest; earned his Ph.D. in Philosophy from the University of Pécs in 1923, where he became an associate professor. He was a contributor for several newspapers. From 1936-1944, he was Editor and Publisher of the journal *The Diver* (*A Búvár*), and during 1939-1944 he headed the office of the Holy Cross Society (*Szent Kereszt Egyesület*) that protected the Jews, looked after their rights and welfare. On 11 November 1944, the pro-Nazi Hungarian Arrow Cross Party attacked and destroyed the Society and he was wounded in the head. The Ministry of Foreign Affairs employed him following World War II from 1946 on with

ambassadorial rank as Professor and Secretary-General of its National Socio-Political Department. – B: 0883, 1549, T: 7617.

**Cege, Anonymous of** – Schoolmaster at Cege in Transylvania (*Erdély*, now in Romania) in the mid-1500s, author of the romances *Effectus amoris* (*The Power of Lovers; A szerelmesek ereje*), published in Debrecen in 1588. – B: 1150, T: 7659.

**Celebi**→**Evliya Çelebi**.

**Celladam** – An anti-cancer drug used with success since 1985, for the prevention and the treatment of certain forms of cancers through the restoration of the immune system. It was invented by the Hungarian Ádám Kovács, but not officially recognized until 1990. – B: 1225, T: 7660.

**Cement Blower** – The Torkret Process. The liquid cement is blown by high-pressure compressed air onto the surface to be covered, producing layers of concrete of variable thickness. It was invented by József (Joseph) Vass and used all-over the world. – B: 1226, T: 7674.

**Censorship** – Investigation of written material before printing for religious, political and moral considerations. Its purpose is to silence any criticism against the existing social and political system – in fact, to do away with everything deemed to be dangerous to it. Pope Alexander VI (1431-1503) used it first to silence those who took a stand against the official teaching of the Roman Catholic Church. It was introduced in Hungary in 1574. At first entrusted to the bishops; from 1623 it was developed by the Jesuits of the University of Nagyszombat (now Trnava, Slovakia). During the reign of Empress Maria Theresa (1740-1780) the state took it over from the Church and gradually it became a political tool managed in the larger cities by officially appointed censors. The abolition of censorship to gain freedom of the press was the main objective of many political and literary movements, a goal that was first achieved in Hungary on 15 March 1848. – B: 1150, T: 7668.

**Central Pole** – A wooden pole in country houses providing support for the wide-span crossbeam of the roof structure. It was in general use throughout Hungary; but its name varies from region to region. The poles provided structural support for the long, rectangular rooms built to accommodate extended families, members of several generations. It also had to support the great weight of the attic storeroom, where large quantities of wheat, fodder and various household items were stored. Typically it was always placed in the proximity of the hearth, the oven-stove. Forming the building's inner central part, it lent itself to decorations and carvings, and often became an ornamental feature of the dwelling. It was seldom used in more modern constructions from the second half of the 19th century. – B: 1134, T: 7617.

**Ceremonial March** – A ceremonial or parade march, developed from the secular victory parades of Rome and from the medieval processions of the Church. The Italian dukes of the Renaissance, the German emperors, the French kings all tried to outdo the spectacle put on by the others. Memorable among such parades were the entry of Emperor Charles

V into Antwerp, King Mátyás's I (Matthias Corvinus, 1458-1490) arrival in Buda after his coronation; and the entry parade of Emperor Joseph II into Frankfurt am Main. The carrying of the Hungarian Holy Crown from Vienna to Buda was also an extraordinary procession. There was a gala parade in 1896, commemorating the settlement of Hungarians in the Carpathian Basin a thousand years ago (896). It was so spectacular that it outshone any similar parade in Europe. The foundation of the thousand-year-old Hungarian Christian state was magnificently observed in Hungary and worldwide by the Hungarians in 2000. Nowadays the military organizes parade marches on national days or in honor of highranking military persons, marching to the music of military brass bands. – B: 1078, T: 3233.

**Cerro Pelado Cave, Runic Inscriptions, in Paraguay** – The cave is located northeast of Asuncion near the Brazilian border in an almost impenetrable jungle. It served as a home for the Hungarian Pauline missionary monks, who made maps of South America. There are several inscriptions in the cave, showing strong similarity to runic signs carved into stones in the Pilis Mountains in Hungary. Possibly those living in the Cerro Pelado caves took the ancient Hungarian runic writings there. Beside the runic inscriptions, on one branch of a carved cross in one of the caves the monks depicted their small Paraguayan shipwrecked boat. The visible R.I.P. and FR signs are religious: the former is a Christian cemetery abbreviation (*Requiescat in Pace / Rest in peace*), while the other specifically refers to a certain monk. There are many early Christian motives among the runic symbols. Nearly all of these relics are on gravestones. – B: 1174, 1020, T: 7669. → **Hungarian Runic Script.**

**Ceuta** – A fortified city and harbor in Spanish Morocco with a population of about 10,000 in 1920. France and Austria signed a Peace Treaty at Campo Formino in 1797. It stipulated that all prisoners of war held in Ceuta were to be freed. However, the French held onto some 20,000 prisoners, among them 10,000 Hungarians, later sold into slavery to the Spanish colonies in Africa. In 1806-1807, a few of the survivors managed to send letters home. After the Hungarian War of Independence of 1848-1849 was lost, some of those survivors volunteered to fight with the insurgents in Cuba; it was also a lost battle. Those who were captured were returned to the fort-prison of Ceuta, where all of them perished. – B: 1078, 1020, T: 3233. → **Freedom Fight of 1848-1849.**

**Chain Bridge of Budapest (*Széchenyi Lánchíd*)** – The first permanent span between Pest

and Buda across the River Danube, built between 1842 and 1849. It was designed by an English engineer, William Tierney Clark, and built by a Scottish engineer, Adam Clark (the Square at the Buda end of the bridge is named after him). The official name of the bridge is *Széchenyi Chain Bridge (Széchenyi Lánchíd)*, but is simply called the *Chain Bridge (Lánchíd)*. It is named after Count István (Stephen) Széchenyi, who initiated the idea of the

bridge and organized its construction. In 1836, he gave the project to William Clark and Adam Clark, the builders of the Thames Bridge in London. The 375-meter long and 16-meter wide bridge was opened on 20 November 1849. In 1857, Adam Clark bored a 350-meter long tunnel through Castle Hill to connect the bridge with the Buda hinterland. The Bridge made the provincial towns of Pest and Buda into a fast-growing metropolis. During the War of Independence (1848-1849) the Austrians tried to blow up the bridge; but the charges failed to detonate. In 1945, the German army succeeded in blowing it up toward the end of World War II. The bridge was quickly rebuilt. – B: 1341, T: 7103.→**Clark, Adam; Széchenyi, Count István.**

**Cházár, András** (Andreas Császár) (Jólész, now Jovice in Slovakia, 6 June 1745 – Rozsnyó, now Roznava, Slovakia, 28 January 1816) – County Chief Clerk, legal writer, pioneer of special education for handicapped children in Hungary. After finishing his law studies, he became a lawyer in Rozsnyó. When Emperor József II (Joseph, 1780-1790) obliged all lawyers to use German as the official language, Cházár rather resigned from his post. In 1790, he became the Chief Clerk of County Gömör (now in Slovakia). He wrote a booklet supporting the freedom of the press that made him known all over the country. He had an important role in movements for the official recognition of the Hungarian language. In 1799 he started action to establish an institute for the deaf and mentally handicapped. The first institute was opened in Vác in 1802. He also made a recommendation for the foundation of the Hungarian Society of Sciences. A Street in Budapest, a kindergarten and a high school in Vác bear his name. – B: 0883, 1257, T: 7660.

**Cheer-up Songs from Sárospatak** – Eleven handwritten volumes of 18th and 19th century folk songs make up this collection. From earlier sources, Károly (Charles) Nánásy Oláh (lawyer and writer, 1826-1875) gathered them in the County of Hajdú between 1842 and 1830, but more songs were added until 1848. Today, it is part of the Reformed Scientific Collection, Sárospatak. – B: 1134, T: 3240.→**Reformed College of Sárospatak.**

**Chest** – A storage chest with a lid. It came into being in ancient Near-Eastern cultures and its use gradually spread to Europe. It was known among Hungarians already at the time of the Carpathian settlement. Two varieties developed: one built of wooden framework, and one made of planed or shaved wooden planks. During the Middle Ages, the chests were in common use, clothing was often stored in them, also food-stuff was kept in them, and at the same time they could be used as furniture to sit on. Used originally as a hope chest or dowry chest (*kelengyész láda*), they were decorated with painted flowers, in some cases with runic script, carvings, and on the uplands of Lake Balaton, with wood inlay. The hope chest was also called the bride's trunk, or, according to its decoration, tulip chest (*tulipános láda*). The son-in-law's trunk, then partly the housemaid's trunk, and later the military trunk followed the pattern of the dowry chest. On the journeymen's and on some shepherds' and fishermen's trunks, drawings referring to the profession of the owner were found. A common characteristic is a small compartment, or drawer inside the chest. Small chests, with strong metal enforcement, called letter chests, served to keep family documents or money, in which case it was not uncommon to contain a secret drawer. Symbolically, it was was a place to keep secrets,

but mainly a female symbol. The Greeks consider the cradle of the Sun-Hero or Lykia, which floats on the surface of the water, the same as the Christians' hereditary Noah's Ark. In Hungarian-speaking lands, the dowry or hope chest, which was carried over to the bridegroom's house in public view, represented the bride. Through this they foretold the blessings of children. However, it could also serve as a coffin. – B: 0942, 1134, 1336, T: 7684.

**Chile, Hungarians in** – Before the Hungarian Revolution of 1956, some 3,000 Hungarians lived in Chile and most of them emigrated there after World War II. After the crushed Revolution of 1956, many Hungarian refugees went to Chile. The estimated number of people of Hungarian origin living in Chile was 12,261 in 1961. Their number had decreased to a couple of thousand at the turn of the millenium; but it is still considerable. Most of the Hungarians live in the Capital, Santiago. There is a Chilean Hungarian Cultural Society, registered in 1994. Its aim is to hold together the Chilean Hungarians and to promote economic and social ties between Chile and Hungary. The Cultural Society publishes a bimonthly paper, the *Chilean Hungarian Gazette (Chilei Magyar Értésítő)*. – B: 1104, 1364, T: 3240.

**Cholnoky, Jenő** (Eugene) (Veszprém, 23 July 1870 - Budapest, 5 July 1950) – Geographer. He completed his higher studies at the Budapest Polytechnic then, for a while, worked there as demonstrator. He carried out hydrographic and geographic research, while on a field trip in China and Manchuria. In 1905 he became Professor of Geography at the University of Kolozsvár (now Cluj-Napoca, Romania). During several wide-ranging expeditions that he organized, he studied mountain structures and the nature of rivers. Following his return to Hungary, he became Professor of Geography at the University of Budapest in 1921. He also became Director of the Geographical Institute and participated in the scientific investigation of Lake Balaton. The results of his morphological research on the movement trends of drifting sand and the European monsoon phenomenon are some of his many important contributions to science. In addition, he successfully studied human geography and his scientific publications were popular because of his colorful, enjoyable style. He aroused widespread interest in natural sciences. His published works include *General Geography, vols. i,ii. (Általános földrajz, I,II)* (1924); *Geography of Hungary (Magyarország földrajza)* (1924, 1937); *Cholnoky Atlas* (1927-1934), and *Lake Balaton (A Balaton)* (1936). The Cholnoky Cave in County Hunyad (now in Romania) is named after him. – B: 0883, 7456, T: 7456.→**Almásy, György; Lóczy, Lajos; Prinz, Gyula.**

**Cholnoky, László** (Ladislás) (Ozora, 29 May 1899 - Pécs, 12 June 1967) – Chemist, pharmacist. In 1924 he earned a Doctorate in Pharmaceutics from the University of Budapest, and in 1930 he obtained a Ph.D. in Chemistry at the University of Pécs. From 1924 to 1946, at the latter University, he worked as a demonstrator, assistant lecturer, institute lecturer, and from 1946 to 1948 he was an associate professor. From 1948 to 1967 he was Professor at the Medical School of the University of Pécs, where he was Vice-Chancellor during 1960 to 1964. In the field of organic chemistry Cholnoky was mainly dealing with the chemistry of carotenoids: ascertaining the structure of a number of new carotenoid pigments isolated by him. Particularly notable are his research dealing with the plant-physiological role of carotenoids. In the field of carotenoid problems he

published 75 papers in Hungarian and in international journals. It is also to his credit that working with Professor László Zechmeister, he was amongst the first to introduce the chromatographic method into preparative organic chemistry. His work co-authored with Zechmeister is entitled: *Die Chromatographische Adsorptionsmethode (The Chromatographic Adsorption Method)* (1937, 1938). – B: 0883, T: 7456.→**Zechmeister, László.**

**Cholnoky, Viktor** (Veszprém, 23 December 1868 - Budapest 5 June 1912) – Writer, journalist. His secondary studies were at the Reformed High School of Pápa, and at the high school of Veszprém. He was Editor-in-Chief for the *Veszprém Newspaper (Veszprémi Hírlap)*. In 1898 he launched the *Balaton Newspaper (Balatoni Hírlap)*. In 1898 he moved to Budapest and worked, among others, at the newspapers *Pest Diary (Pesti Napló)* and at *The Week (A Hét)*. He was a journalist with a clear view of politics and of high intelligence. He was an eminent short-story writer with an eloquent linguistic style. His works include *Smoke Rings (Füstkariák)* (1896); *Tammuz* (1908), and *Kaleidoscope* (1913). – B: 0932, 1257, T: 7103.

**Chorezm** (Khorezm, Horezm, Chorezmia) – A city state that first appeared in the Delta area of the Amu-darja River in the 13th century BC. It was one of the oldest centers of civilization in Central Asia. It became the center of the ruling dynasty of a “Turanian-Indo-European” type, incorporating also Scythians, Kabars, Hurrians, Massagetae, the fusion of whom formed the ancient Turanian-Scythian culture and mentality. They were responsible for the construction of the famous irrigation canals during the 8th–6th centuries BC. The independent Khorezmian state was destroyed by the Kushans, and was regained only during Sassanid times. Their empire eventually passed under the rule of the White Huns (Ephthalites), an agricultural people until, in 710, the Islamic Arabs conquered it. During the 7th to 8th centuries AD, a close relationship developed between the peoples of Khoresm and Khazaria, and their people moved to the Carpathian Basin with their numerous clans, as reported by Al-Tabari and Al Masudi. – B: 1958, T: 7456.→**Scythians; Kaliz; Kushans.**

**Chorin, Ferenc** (Francis) (Budapest, 3 March 1879 - New York, NY, USA, 5 November 1964) – Industrialist. He completed his secondary and higher studies in Budapest, Vienna and Berlin and earned a Ph.D. in Law and Political Science in 1901. In 1919, he became the President of the Salgótarján coalmine and then President of the National Alliance of Hungarian Industrialists (*Magyar Gyáriparosok Országos Szövetsége – GYOSZ*). He assisted the Bethlen Government in reorganizing the economy of dismembered Hungary after the Versailles-Trianon Peace Dictate in 1920, and defended the country against the impact of the global economic crisis in 1929. He became a member of the Upper House of Parliament and the confidant of some leading politicians. After the German occupation of the country in 1944, he was arrested for being Jewish. After negotiations, he and 45 leading industrialists with their families were allowed to leave Hungary for Portugal in exchange of their properties and wealth. In 1947 he moved to the USA, where he became a successful financier and investor. He regularly helped Regent Miklós (Nicholas) Horthy in his exile in Estoril, Portugal, and supported many Hungarian causes. He was a recipient of the Cross of Merit, First Class in 1934. – B: 1037, T: 7103.→**Horthy, Miklós.**

**Chovan, Kálmán→Záborszky, Kálmán.**

**Christian Brethren Congregation** – They appeared in Hungary at the turn of the 20th century as foreign missionaries. An essential element of their faith is the teaching of the Second Coming of Jesus Christ. They are tolerant of members of other religious communities, do not keep a record of their membership, and are not firmly organized. They call communion “breaking of bread” and do not require adult baptism or baptism by immersion as a requirement of membership. They regard everybody who believes in Christ a brother and sister. They number about 2,200. – B: 1042, T: 7390.

**Christian Democratic People’s Party→Political Parties in Hungary.**

**Christian Intellectuals, Association of** (*Keresztény Értelmiségiek Szövetsége-KÉSZ*) – Founded in 1989 by Béla Csanád, Professor at the Department of Liturgy of the Roman Catholic Theological Academy, Budapest. The aim of the Association is the evangelization of intellectuals in order to become more familiar with the Christian faith. This purpose is served by free university lectures, round table conversations, and by representing Christian values in every area of public life. The main forum is the periodical *Sign (Jel)*. The Association’s activity embraces Hungarians living outside the country’s borders. The Association has 64 local groups and more than 5000 members. Since 1996 the new president is Rev. Zoltán Osztie. – B: 1250, T: 7103.→**Csanád, Béla.**

**Christian Peace Conference (CPC)** (*Keresztyn Békekonferencia – KBK*) – This was an ecumenical movement formed by some 40 Protestant and Orthodox clerics mainly from Eastern European Churches, on the initiative of the Ecumenical Council of the Czechoslovakian Churches in Prague on 1-4 June 1958. (Sometimes called the *Prague Peace Conference*). It had a president, a general secretary, vice-presidents, international secretaries, working committees, and regional organizations. It organized conferences and Christian World Peace Assemblies. The founding charter stated: “*The CPC is an ecumenical movement by which the responsibility of Christians for peace, social justice and a humane life for all men is expressed. It fights against discrimination, exploitation, oppression and all forms of imperialism. It declares solidarity with peoples’ liberation movements. It strives for co-operation with other world religions and secular organizations having the same goals*”. This self-definition shows that it was basically the Christianized form of the Socialist block’s ideology. Its first crisis occurred after 1968, when the Warsaw Pact armies had overrun Czechoslovakia, ending the Prague Spring. The Hungarian Churches left it in 1991. Its activity declined during the 1990s. – B: 0910, T: 7103.→**Bartha, Tibor; Tóth, Károly.**

**Christian Youth Association** (*Keresztyn Ifjak Egyesülete – KIE*) – The Hungarian equivalent of Young Men’s Christian Association (YMCA), founded by George Williams in London in 1844. In Hungary it was established on 31 October 1883, at the Hall of the Reformed Theological Academy, Budapest under the name of Christian Youth Association (*Keresztyn Ifjak Egyesülete-KIE*, on the initiative of Charles Fermoud, YMCA secretary 1855-1937). Aladár Szilassy, Aladár Szabó, Béla Kenessy and András (Andrew) Plichta were the founding members. From the beginning, the Reformed and the

Evangelical-Lutheran Churches participated in its work. Its aims were evangelizing the young, especially the agrarian and industrial youth, providing social assistance, shelters and organizing conferences. The movement spread steadily and its groups were present in many congregations. It worked in co-ordination with the Public Academies (*Népfőiskolák*) movement with the SDG (*Soli Deo Gloria*) student movement, the Boy Scouts and leading intellectuals. Church leaders soon realized its importance and provided assistance. Its leaders were among others: Rev. Béla Megyericsy, Sándor (Alexander) Merétey, Rev. István (Stephen) Pógyor, Rev. Zoltán Töltéssy, Rev. János (John) Victor Jr., Sándor (Alexander) Karácsony, András (Andrew) Koczog, Rev. Bálint (Valentine) Kovács, Rev. Dezső (Desider) Ábrahám, Péter Balla, Ferenc (Francis) Balogh, Dénes (Dennis) Batiz, Rev. Károly (Charles) Dobos and Rev. István Hegyi-Füstös. Due to the political climate change and political pressure after 1945, KIE declared its dissolution on 16 May 1950. Some of its leaders were indicted for high treason. In 1951 István Pógyor received 15, while László (Ladislav) Teleki 12-year prison terms. The KIE movement lived underground during the decades of the Communist dictatorship. There was another trial in 1967. Rev. Bálint Kovács, Dr. Dénes Batiz and Máttyás (Matthew) Bugárszky were arrested and indicted on the charge of trying to revive the KIE. However, they were soon released. With the changing political situation, the KIE was reorganized on 31 October 1990 in the church hall of the Budapest district Józsefváros Reformed Congregation. The old headquarters in the Hornyánszky Street building were returned to KIE. Its groups were reorganized nationwide and once more they carry on their traditional work. – B: 0948, T: 7103.→**Ábrahám, Dezső; Dobos, Károly; Hegyi-Füstös, István; Karácsony, Sándor; Kovács, Bálint; Megyericsy, Béla; Pógyor, István; Töltéssy, Zoltán; Victor, János Jr.**

**Christmas Traditions** – The holiday season starts with the Advent in Hungary, as elsewhere in Christian Europe. There are religious and folk traditions. Many folk traditions have disappeared in the last fifty years; but some are still alive in small villages. A popular folk tradition during Advent in the country started on December 13<sup>th</sup>, on the name day of St. Lucia or Luca (*Luca napja*). On that day the young men in the villages started to make a small chair out of wood, which had to be finished on Christmas Eve. They had to work on it a little every day. They took the small chair to Midnight Mass and, during the service, stepped on it to look around to see who was a witch in the gathering. Another old Hungarian tradition starts on St. Luca's Day: growing wheat for the Christ Child. Wheat seeds are planted in small pots, watered every day, and with luck they would start to sprout and grow. On Christmas Eve the pots are placed beside the little manger, and the by Christmas tree in churches and in family homes. The plants symbolize that Christ is coming in the Bread of Life.

The biggest Christmas tradition is the "Nativity or Bethlehem play". Usually young people in costumes perform a short play about the birth of Jesus with songs and poems. They carry a small manger with the baby Jesus in it. An angel, Mary, Joseph, and a few shepherds are the performers. They go from house to house in the villages around suppertime. They start to perform the nativity play a week before Christmas Eve. People offer sweets to the players after the performance. In the cities, the play is usually staged in schools as part of the Christmas celebration. This tradition was first documented in 1600.

Hungarians don't decorate the Christmas tree before Christmas Eve or Holy Night. It is a private family celebration. They set up the tree in late afternoon and open presents after supper. The Christmas tree is supposed to be a surprise for the children and they are told an angel brings it. The gifts are from the Baby Jesus. Before opening the presents the family sings few religious Christmas carols, the same one as they sing in the church. The menu for Christmas Eve is usually fish and the special poppy seed and walnut pastries called "beigli".

The birth of Jesus is celebrated at Midnight Mass and the next day at High Mass. Christmas ends with the celebration of two important name days: István (Stephen) and János (John) on December 26 and 27 respectively. People with those names are widely celebrated by their families and friends. – B&T: 7663.

**Chronica Hungarorum** – Chronicle of the Hungarians. The work of János Thúróczi (Johannes Tworocz) published in Augsburg in 1488. It covers the history of the Hungarians from their origins to August 1487. Besides the Illustrated Chronicle (*Képes Krónika*), the Buda Chronicle (*Budai Krónika*), and the works of Lorenzo de Monaci II about King Pepin the Short, it is mainly about the times of King Zsigmond (Sigismund of Luxembourg) and the Hunyadis, relying on his original research, as well as on eyewitness accounts. Thúróczi popularized the belief that the Huns and Hungarians were one and the same people. The work reflects the political stand and worldview of the Hunyadi House. In his views and use of sources he continued the traditional methods of chronicle writing; but the influence of the humanistic way of history writing can also be felt in his style. *Carmen Miserabile*, written about the Mongol-Tartar invasion of Hungary in 1241-1242 by Rogerius, Archdeacon of Várad, later Archbishop of Spalato is in the appendices of this work. – B: 1227, T: 7659.→**Illuminated Chronicle, Vienna; Carmen Miserabile; Codex Literature; Thuróczy, János.**

**Chronicle About the Notable Things of The World** – (*Krónika a világnak jeles dolgairól*) – A Hungarian world history by István (Stephen) Bencédi Székely (1500?-1563?), dating from 1559. It is one of the very first books written in Hungarian. He interpreted the Biblical notions of world history through literary examples of his age. In the part dealing with Hungarian history he followed the identity belief between Huns and Magyars. According to him, Attila was king of the Hungarians. The book was prepared in Krakow, Poland, where the author studied. It was already in the small format that became accepted in the 16th century, and in which the pages were numbered. – B: 0883, 1133, T: 7659.→**Székely, István (Bencédi).**

**Chronicle Gesta Ungarorum** – A chronicle dating from the middle of the 11th century, probably from around 1066 or 1067. The work is based on written sources and oral traditions compiled by a Hungarian cleric. The original chronicle did not survive; its references can be inferred from later chronicles only by means of textual analysis. It formed the basis for Master Ákos' chronicle and the work of Anonymus. – B: 1153, T: 7614.→**Anonymus; Codex Literature; Illuminated Chronicle, Vienna.**

**Chronophotograph** – Movie camera that was produced by the Gaumont factory based on the patent of György (George) Demény. It was later improved by the company and

was released as the Chronophon Gaumont in 1902. This was the first sound film recording device. – B: 1226, T: 7674.→**Demény, György.**

**Chrudinák, Alajos** (Aloysius) (Budapest, 29 March 1937 - ) – Journalist. His higher studies were at the Institute of International Relations, Moscow (1955-1956) and at the University of Budapest, where he read Semitic Philology (1956-1957, 1962-1965). In 1957, he was banned from all universities in Hungary. Between 1957 and 1962 he worked as a private language tutor. From 1965 to 1968 he taught Semitic Philology at the University of Budapest. From 1966 to 1972 he was a reporter for the Hungarian State Radio. Between 1972 and 1994 he worked for Hungarian Television, first as Deputy Editor, later as Editor of its foreign department and a correspondent in the Near East from 1994 to 1998. He was Editor-in-Chief of the *Diplomatic Magazine* during 1998-1999. He also filled high positions at the College of Nationals, the World Federation of Hungarians, the Transylvanian World Federation, and the Hungarian Journalist Community. He made some 70 documentary films. His works include *War During Ramadan (Háború Ramadánkor)* (1972); *Oil War (Olajháború)* (1980); *Invasion* (1985); *Iron Curtain (Vasfüggöny)* (1989), and *Revolution at Temesvár (A temesvári forradalom)* (1989). He is the recipient of a number of prizes, among them the Béla Balázs Prize (1982), Golden Nymph Prize (Monte Carlo, 1980) and the Opus Prize (1990). – B: 0874, T: 7103.

**Chudy, József** (Joseph) (Pozsony, now Bratislava, Slovakia, 14 June 1753 - Pest, 1 March 1813) – Composer, conductor, inventor. He was the conductor of the Theater of Pozsony. In 1790 he worked with the German Theater in Buda, then at the Pest-Buda Hungarian Theater. He composed the music for the first Hungarian opera *Prince Pikko and Jutka Perzsi (Pikko herceg és Jutka Perzsi)* (1773). In 1796 he wrote a one act opera. He invented the optical distant signal even before Claude Choppe, and later the acoustical distant signal: *Beschreibung eines Telegraphs (Description of a Telegraph)* (1787). – B: 0883, 1445, T: 7684.

**Church Bell Legends** – Historical legends about traditions and local folklore linked to church bells. The most widespread in Hungary are: church bells that were hidden in Nagyszeben (now Sibiu in Romania) from the Turks; the bells that start ringing on their own at Christmas time in every 7th year. These types of legends are often linked to the “sunken village” motif. There are other legends about church bells ringing on other than customary occasions. For instance bells are rung in the town of Kőszeg to commemorate the moment when the Turks were chased out of the town. – B: 1134, T: 7614.

**Church Buildings in Hungary** – Among all types of buildings, churches have the richest architectural traditions in Europe, including Hungary. Churches are more than buildings for religious rituals; they also embody the spirit of the Middle and Baroque Ages. Churches were prestigious buildings, demonstrating the most advanced architectural, technical and artistic achievements. Strict religious rules dictated the building codes for the designs of the churches during the centuries and the most beautiful specimens of different art forms are concentrated in them. Besides the beauty of their architectural design, sculptures, paintings, reliefs, hand carved wooden pews, these are also the artistic products of goldsmiths who decorated them. The church was

the center of spiritual life for medieval people. The populace did not speak, write or comprehend Latin, but understood the Biblical stories from the paintings. The puritan simplicity of the Reformed churches was an important novelty in church architecture after the Reformation. However, it was partly due to the fact that in Protestant churches the service was conducted in the vernacular. The churches were the strongest buildings in the villages and often they were fortified. In times of enemy attacks or disasters it served as a place of refuge. Great churches in the cities were also places of important events in the nation's history. The importance of church architecture decreased from the 19th century. – B: 1228, T: 7663. → **István I, King; Fortress Churches.**

**Church of God** – A Protestant type of religious community. Originally it was the name of more than two hundred American religious communities that came into existence since 1830. They considered themselves Adventists, Pentecostal, and followers of the Piety Movement. In the 20th century, the Rev. Herbert W. Armstrong, a minister dismissed from the Adventist Church, started the movement. He preached through the Radio Church of God, called the Worldwide Church of God since 1968, as well as through his own periodical the *Plain Truth*, advocating the approaching end of the world, wars, hungers and havoc, caused by forces of nature. Adults are baptized by immersion. Their article of faith is based on the Book of Revelations, God, the Holy Trinity and the Creation. Their rites are set following Jewish holidays and religious customs. The Bible is the guide not only of faith but economics, political life, education and health; it also regulates family relations and the selection of mates for life. Their church organization is theocratic. According to their faith, every member belongs to the invisible body of Christ from birth. They reject Original Sin. According to them, every man sins by his own acts. Besides baptism by immersion and Holy Communion, they practice the rite of the washing of the feet. They have been active in Hungary since 1910 and have been an independent denomination since 1949. They do not keep records of their 200 members. – B: 1042, T: 7390.

**Churchill, Sir Winston** (Blenheim Palace, 30 November 1874 - Chartwell, 25 January 1965) - English politician. He was a descendant of the great Duke of Marlborough. Educated at the Royal Military Academy at Sandhurst, he was posted to India and elsewhere, including Cuba and Sudan. As a correspondent, he participated in the Boer War in South Africa. He fell into Boer captivity but escaped. After returning to Britain, he began taking part in political life. He became First Lord of the Admiralty, a post he would hold during World War I (1911-1915). He gave impetus to military reform efforts and sought Britain's naval expansion toward the Central Powers that would have especially affected the Austro-Hungarian Monarchy. He designed a plan of pushing British forces northward through the Balkans. However, nothing came of this strategic plan; but his role in the disastrous Dardanelles campaign forced him to retire from his position. He was Prime Minister twice: during 1940-1945, as the head of an emergency all-party wartime administration for the duration of the Second World War; and again from 1951-1955. He was a great admirer of the Hungarian Prime Minister Count Pál (Paul) Teleki, whose suicide in 1941 touched him so deeply that he promised an empty chair to be kept for him at the post-war peace conference. However, at the Paris Peace Conference in 1947 the promised chair was not there, just the reinstatement of the Trianon Peace Dictate of 1920. He wrote two monumental works, *The Second World*

*War*, vols. i-vi (1948-1953), and *A History of the English-Speaking Peoples*, vols. i-iv (1956-1958). He received the Nobel Prize for Literature in 1953. During the Potsdam Conference (17 July – 2 August 1945) Churchill, Truman and Stalin made the fateful decision of abandoning the eastern part of Europe, east of the Oder and Neisse rivers and east of Vienna, leaving it to the sphere of influence and domination of the Soviet Union, thus handing over Hungary to Soviet military occupation and Communist rule lasting for 45 years. Churchill soon started to realize the consequences of handing over the eastern part of Europe to Stalin's insatiable appetite for expansion and domination. In 1946, during a visit to the USA, he made a controversial speech warning the US of the expansive tendencies of the USSR, rather favoring a close Anglo-American alliance. He also coined the term "iron curtain". He was the prophet of European unity in form of a "United States of Europe" as he said. – B: 1031, 7456, T: 7456.→**Hitler, Adolf; Horthy, Miklós; World War I; World War II; Ciano, Count Galeazzo; Roosevelt, Franklin Delano; Stalin, Joseph; Paris Peace Treaty 1947.**

**Ciano, Count Galeazzo** (Livorno, 15 March 1903 - 11 January 1944) – Italian politician. He was the son-in-law of Mussolini (his wife was Mussolini's daughter Edda). He served as a diplomat in South American countries, in Beijing (Peking at the time), Shanghai and the Vatican. He took part in the war with Abyssinia (now Ethiopia) as a fighter pilot captain. He was Foreign Minister from 1936 to 1943. He paid important diplomatic visits not only to Vienna and Berlin, but also to Budapest in 1936, where he realized the need for a revision of the borders with the newly created "successor states". Ciano became negotiator in the First Vienna Award at the Belvedere Palace, Vienna, on 2 November 1938, with his counterpart, German Foreign Minister von Ribbentrop. After discussions with the delegates of the involved countries, whose foreign ministers were arguing over a map, Ciano protected the Hungarian interests and prevailed. The First Vienna Award returned to Hungary the Hungarian inhabited southern strip of the Northern Hungary area of Historic Hungary (Upland, *Felvidék*, then and now Slovakia). By this decision, Hungary was able to recover 12,103km<sup>2</sup> area of its lost territory with 1,057,323 mostly ethnic Hungarian inhabitants. Hungarian army units completed the take-over of the area between 5 and 11 November 1938.

After the Soviet Union successfully reclaimed Bessarabia and North Bukovina from Romania, Hungary decided to claim Transylvania (*Erdély*) from Romania, a historic part of Hungary. The negotiations started on 16 August 1940, in Turnu Severin (*Szörényvár*), but soon came to an impasse. However, both countries agreed upon arbitration about the border question. The Foreign Ministers von Ribbentrop of Germany and Count Ciano of Italy announced an award in favor of Hungary at the Belvedere Palace on 30 August 1940, in Vienna. Thus, the Second Vienna Award handed back to Hungary the northern 2/5 of Transylvania (part of Romania since 1920), an area of 43,492 km<sup>2</sup> with a population of 2,577,291, of them 1,380,500 Hungarians, native inhabitants for a thousand years. Hungarian army units occupied the reclaimed northern part of Transylvania from 5 to 13 September 1940.

Three years later, Ciano distanced himself from Mussolini and voted against him in the Fascist Grand Council on 25 July 1943 that overthrew the dictator. Ciano was arrested by the Germans and handed over to the Fascist authorities in northern Italy where, in a mock trial, he was sentenced to death for high treason, tied to a chair and

executed. – B: 1031, 1312, 7456, T; 7456.→**Vienna Award I; Vienna Award II; Hitler, Adolf; Horthy, Miklós; Churchill, Sir Winston; Roosevelt, Franklin Delano; Stalin, Joseph.**

**Cifraszűr**→**Szűr Mantle.**

**Cigaja Sheep** (*Csigája*) – An indigenous sheep in Hungary, probably originating from Asia Minor, by now spread along the Carpathian Mountains and the Balkans. Its numbers were diminished by the middle of the 20th century, only a few thousand being left in the Carpathian Basin. It yields a good quantity of milk; but its wool is not of fine quality. The whitish-yellow wool is interlaced with black and brown stripes. Its head and the ends of its feet are covered with shiny black or brown stripes and it seldom has horns. – B: 1229, T: 7680.

**Cimbalom** (Dulcimer) – The cimbalom (Tseem-bah-lohm) is a Hungarian instrument made of wood and strings and is played with mallets that are wrapped in cotton wool. It is played the same way a person would play a xylophone, marimba, or hammer dulcimer. If a person used wrapped mallets to play on the strings of a grand piano or a harpsichord, it would sound similar to a cimbalom.

The cimbalom belongs to the dulcimer family of musical instruments. Dulcimers of every shape and size have been around for hundreds of years, and are called by various names in Poland, Belarus, the Ukraine, Latvia, and Lithuania. These days, a cimbalom is considered a Hungarian dulcimer. There are two types of cimbalom, a small, portable one, and a much larger one that has a pedal similar to those on a piano. The smaller cimbalom has been widely used in Hungary for hundreds of years. The larger cimbalom was invented by József (Joseph) V. Schunda in Budapest, in 1874.

The large cimbalom is sometimes used in orchestral music. In 1876, Hungarian composer Franz Liszt included the cimbalom in an orchestral version of his Sixth Hungarian Rhapsody for Piano. Other composers who used the cimbalom in their compositions include Béla Bartók, Zoltán Kodály, and Igor Stravinsky. Today, gypsy virtuoso cimbalom players can be heard in the cafés of Hungary, Romania, Poland, the Czech Republic, Russia, and Yugoslavia.

Cimbalom makers use wood from the spruce tree to make the main part of the instrument because the wood produces a resonant sound. Woods from maple or beech trees are used, too. The cimbalom has many strings that, when played, produce a range of pitches from very low to very high. One or two bridges (a small wooden piece that holds the strings away from the instrument body) divide the strings of the cimbalom. This allows more possible pitches to be produced.

Instrument makers often add beautiful carvings or drawings to cimbaloms. A cimbalom also has a cover that can be removed so more sound can escape from the instrument. This is similar to the effect of raising the lid of a grand piano for a performance. – B: 1031, T: 7617.→**Zither; Bartók, Béla; Kodály, Zoltán; Liszt, Ferenc.**

**Cipszer Anthem and Hymn** – The translation of this hymn: *The Deity who was leading/ Our ancestors to Szepesség/ Our children and grandchildren here/ Gained a homeland,*

*we weren't mislaid/ This we call our Szepes-land/ In the Basin of the Carpathians/ With fruitful trees in the valleys./ Mountain-peaks are forest-green,/ The woods and fields reverberate/ With songs and joys as in a dream/Chamois out there, never afraid/ Trout in rivers in the vale./ Little brooks from rocky hills/ Run unceasingly fresh and clean./ Flower-carpet on wet dale thrills/ Every place here without fail./ The sky's a giant parasol/ Overhead, cerulean blue./ Sunrays seem to gild rocky shore,/ Almost pure gold, a land ours to tend./ Oh such beauty, our Szepes-land/ With your high cliffs and the summits/ We are grateful for God's kind hand/ This place for us to send.* (As reported by István Tarpataky and translated by George de Kova).

*Cipszer Hymn* is a verse of 3x8 lines in German, the work of an unknown composer. It was sung in the churches and at festivities in the County of Szepes by the Cipszer population before the Czechoslovakian takeover of Upper Hungary (Northern Hungary, Upland or *Felvidék*, now Slovakia), After 1918, when the area was ceded to Czechoslovakia, it could be sung only secretly in private homes. – B: 7675, 1020, T: 7675, 7684.→**Géza I, King; Cipszers.**

**Cipszers** (*Zipszers*) – Originally the German inhabitants of the eastern Slovakian region (before 1920 it was called Northern Hungary/*Felvidék*, now Slovakia) called *Zipser Sachsen*. Between 1146 and 1162, King Géza II settled some groups of Saxons in Hungary. They became known in the Szepesség region as *Cipszers*. Their territory was a large area from the northern Polish border to the Branisko Pass in the east, the Gölnic valley in the south and Csorba in the north, thereby enclosing the entire mountain range of the High Tatra Mountains forming part of the Northern Carpathians. They enjoyed the same privileges as the Saxons of Transylvania (*Erdély*, now in Romania) although they had nothing in common with them. In 1271 King István V (Stephen) recognized their autonomy governed by the *Landgraf*, who simultaneously was the Count of 24 Szepesség towns. Their settlements prospered; Lőcse (now Loviče, Slovakia) became a town in 1321, followed by many others. To finance his war against Venice, on 8 November 1412, King Zsigmond (Sigismund of Luxembourg) initially mortgaged 3, later 13 towns of the Szepesség to Poland for 80,000 golden coins. These were *Lublo, Podolin, Gnězda-Igló, Leibic, Durand, Ruszkin, Béla, Ménhárd, Szepesszombat, Strázsa, Matheóc, Felka, Poprád, Olaszi and Váralja*. Despite their German heritage, the Cipszers identified themselves with the Hungarians who had given them their land. When Prince Imre (Emeric) Thököly took up arms for religious freedom, the Cipszers were allied with him; and again with Prince Ferenc (Francis) Rákóczi II in his insurrection against Austrian domination. The mortgaged towns retained their independence even under Polish rule. After the division of Poland on 5 November 1772, they reverted back to Hungary. The mortgaging had a disruptive effect on their development; some of the Cipszers moved away and the much less demanding Slovaks settled on their properties. Following repossession of the mortgaged towns by Austria, Empress Maria Theresa tried to administer them as free estates and to re-Germanize them. Her attempt met with much resistance, especially when she declared German as their official language. In defiance the Cipszers declared Latin as their official language; but switched back to Hungarian in 1845. The Czechoslovaks, applying the Beneš Decrees after 1945, interned all Cipszers and eventually deported them to East Germany and Hungary, resulting in their virtual

disappearance from the Szepesség. – B: 0883, 1230, T: 3240.→**Géza I , King; Cipszer Anthem and Hymn; Hain, Gáspár; Heckenast, Gusztáv; Beneš Decrees.**

**Civis** – (1) The name of a person in ancient Rome having full citizenship. (2) The Latin name of the town dwellers in feudal times. (3) In Hungary, the name was used in the 11th and 12th centuries for those servants who did duty in their county's stronghold or the fort of the bishopric. (4) In the towns of the Great Hungarian Plain (*Nagyalföld*) the Hungarian dialect used that name (*cívís*) for those well-to-do peasants who became rich by farming, cattle breeding or commerce. After the Turkish occupation, this expression was first used for the citizens of Debrecen in 1686. – B: 1231, T: 3233.

**Civitas Fidelissima** (*Most Faithful City*) – Referring to the town of Sopron in western Hungary. In a referendum held between 11 and 13 December 1921, the people of Sopron (town on the Austro-Hungarian border) and 10 western Hungarian villages were returned to Hungary in 1923, after a stiff resistance by the people of Sopron and the villages against their annexation to Austria under the terms of the Versailles-Trianon Peace Dictate of 1920. Besides Sopron, these were Kisnarda, Nagynarda, Alsócsatár, Felsőcsatár, Horvátkeresztes, Németkeresztes, Olmód, Pornóapáti, Horvátlövő and Szentpéterfa. For this, by Act 29 of the Hungarian Parliament in 1922, the emblem of the city was embellished with a ribbon at its base bearing the inscription "*Civitas Fidelissima*". – B: 1353, T: 7668.→**Trianon Peace Treaty; Lajta-Banat (Bánság).**

**Clark, Adam** (Edinburgh, Scotland, 14 August 1811- Buda, 23 June 1866) – Engineer of Scottish origin, who came to Hungary with Count István (Stephen) Széchenyi in 1834 with the purpose of regulating the flow of the River Danube. After its completion, he returned to Britain. In 1839, he was invited back to build a bridge on the Danube between Pest and Buda. He completed the Chain Bridge (*Lánchíd*) between 1842 and 1849. He then permanently settled in Hungary. During the Hungarian War of Independence (1848-1849), Austrian General Hentzi planned to blow up the Chain Bridge. Clark opened the gates of the chain chambers and destroyed the pumps. Consequently General Hentzi had to explode the gunpowder barrels on the surface of the bridge, causing no significant damage. Between 1853 and 1857 Clark built the Tunnel of Buda – B: 0883, 1031, T: 7663.→**Chain Bridge of Budapest; Széchenyi, Count István.**

**Clemenceau, Georges** (Vendée, France, 28 September 1841- Paris, 24 November 1929) – French politician. As a result of his aggressive debating style Clemenceau was given the nickname "The Tiger". Clemenceau was prime minister of France from 1907-1910. At the outbreak of World War I, as Editor of the journal *L'Homme Libre*, he became an outspoken opponent of the pacifists. In November 1917, he was appointed Prime Minister. He immediately clamped down on dissenters and on senior politicians calling for peace. At the Versailles Peace Conference, Clemenceau clashed with Woodrow Wilson and David Lloyd George about how the defeated powers should be treated. They told Clemenceau that his proposals were too harsh, but to no avail. He was one of the masterminds in forcing upon Hungary the Peace Conference's most severe dictate by dismembering the thousand-year-old Kingdom of Hungary into five pieces in such a way that 3.5 million ethnic Hungarians became victims of hostile nations (June 4 1920). Apparently he had a personal grudge against Hungarians, and obviously he wanted to

create a new Europe under French hegemony. After retiring from politics, Clemenceau wrote his memoirs *The Grandeur and Misery of Victory* (*Grandeurs et misères d'une victoire*). In the book Clemenceau warned of further conflict with Germany and predicted that 1940 would be the year of the gravest danger. Indeed, the Versailles Peace Treaties in 1919-1920 were dictates and had sown the seeds of World War II (1939-1945). – B: 1312, 1313, T: 1312, 7103. → **World War I; Trianon Peace Treaty.**

**Climate of Hungary** – Moderate. In spite of the country's distance from the Atlantic Ocean the effect of it is fairly strong due to the prevailing winds. Hungary has about 1800-2000 hours of sunshine annually. This is higher than that of Western Europe and is favorable for the ripening of fruits and other crops. Humidity is generally average; but the distribution of the annual 400-800 mm precipitation is changeable. Storms can form suddenly with the occasional hail, and torrential rains can be damaging. The uneven distribution of 2-3 m/sec average wind speed means that it cannot be used to a great extent. Although Hungary has a temperate climate, great extremes can also occur. The highest temperature of + 41°C was recorded in 1950 in Pécs; and the coldest day was –34°C in the city of Baja on 24 January 1942. – B: 1051, T: 7456.

**Coach** (*kocsi*) – A four-wheeled vehicle drawn by horses used primarily for passenger transport. In the 15th century the Wheelwrights of the township of Kócs in County Komárom first built a vehicle of lightly constructed wheels, curved sides and an under-carriage with steel springs, further developing the Hungarian versions of the cart (farm-wagon) at the same time. In November 1457, when a delegation of King László V (Ladislav) of Hungary arrived in Paris accompanied by a cavalcade of horsemen in state uniforms, the town people could see for the first time a light-coach of unusual appearance that has become adopted all over the world since then. Even the Hungarian word “*kocsi*” passed into the English language in the form of “coach”, and similarly into other western languages. In symbolism the *kocsi* represents power; in China and India it is also the symbol of the universe. For the Greeks the *kocsi* was the personification of Helios, the Sun God, and the Bible also mentions the coach and horses of the Sun. The gods of ancient times could be recognized by the animals harnessed to their coach. These carriages had allegorical meaning as well; the carriage of Mars was the triumphal cart of war, while that of Venus was the cart of love. Warriors of high rank fought on coaches, and even after their death it was their due, therefore these coaches became the means of transport to heaven for the deserving. In Hungarian the heavenly representation of the soul cart is the “coach” of the Great Bear constellation (*Göncöl szekér*). – B: 0883, 1778, T: 7645, 7456.

**Coat of Arms, Hungarian** – This has three basic types: the small, the medium and the large coat of arms. (1) *The Small Coat of Arms.* This was determined by a royal order on

9 February 1874. The heraldic right side of the coat of arms is divided by seven red and white stripes representing the seven Hungarian tribes that arrived in the Carpathian Basin in 896 A.D. and are called the *Árpád-stripes* (*Árpád sávok*). The four white stripes represent the four main rivers of the historic Hungary: Duna, Tisza, Dráva, Száva. On the heraldic left side, the three green hills symbolize the three main mountains of Historic Hungary: Tátra,

Fátra, Mátra. On the middle hilltop, from an open golden crown, the “Apostolic” double-cross emerges, which was awarded by Pope Sylvester II to István I (later St Stephen), the first Hungarian king, in 1000 A.D., in recognition of his mission to convert the pagan Hungarians to Christianity. Branches surround the entire coat of arms. The oak branch on the right is for “glory”, and an olive branch on the left is for “peace”. The red background, the white “apostolic” double-cross and the three green hills constitute the colors of the Hungarian national flag: red, white and green. After the fall of Communism in Hungary, this coat of arms became the official Hungarian coat of arms in 1990. (2) *The Middle Coat of Arms*. This consists of the “small coat of arms” in the middle, and the additional coat of arms of the Hungarian Crown Lands of Dalmatia, Croatia, Slavonia (now independent states) Transylvania (now part of Romania) and Fiume (now Rijeka, Croatia). A more beautiful version is where two angels support the middle coat of arms on both sides. The Hungarian “middle coat of arms” was established by a Royal Decree in 1896 to mark the millennial anniversary of the Hungarian State. In 1916, the official coat of arms of the kingdom of Hungary became the “middle coat of arms with angels”. In its center is the “small coat of arms” surrounded by the coat of arms of the territories, which were the member states of the Hungarian Holy Crown until the Versailles-Trianon Peace Treaty (1920). In the upper right is *Dalmatia* in a blue background facing three crowned golden lion heads. In the upper left is Croatia in a checkered field with 25 red and white squares. In the middle right is *Slavonia* in a red stream edged with white stripes on the top and bottom, with a marten running to the right. The two white stripes at the edge of the red stream represent two of the major rivers of Historic Hungary: the Dráva and Száva. Above, in blue background, is a six-pointed golden star symbolizing their brave fights against the Turks. In former times tax was to be paid in marten furs in Slavonia and the running marten symbolizes this. In the middle left there is *Transylvania (Erdély)*. Divided by a horizontal red ribbon, above there is a black eagle with the sun on the left and the crescent Moon on the right; below are seven bastion towers. The sun and the moon are the symbols of the Székelys (*Szeklers*), the original inhabitants of Transylvania. The eagle is the symbol of the Hungarians and the seven bastion towers are the symbol of the Saxons. These were the three major ethnic groups of Transylvania until the New Era. The sun and the moon are “watching over the land”. On the bottom there is *Fiume* on a red background, and a two-headed eagle stands on a cliff as it emerged from the sea. It rests its left leg on a fallen jar from which water is pouring into the sea. Above the eagle, the imperial Habsburg crown is suspended. The two-headed eagle is the sign of the Habsburg Dynasty. The Hungarian Holy Crown is resting on the top and is held by two angels on both sides. This formation is called the Hungarian “medium coat of arms with angels”. (3) *The large coat of arms of Hungary*: the Habsburg king Leopold II (1790-1792) used it for the first time. On the top row there are the coats of arms of Croatia, Dalmatia and Slavonia; in the second row, Rama (Bosnia) and Serbia; in the third row Cumania, Galicia, Lodomeria and Bulgaria. At the base of the shield are the Hungarian and the Transylvanian coats of arms. – B: 1277, 1020, T: 1277, 7103.

**Coconut Chalice** – Chalice made from the coconut palm tree’s hard-shelled fruit. The so-called *Saracen* chalices were made in the 16-17th centuries. The Eastern trade routes toward Poland and other European countries passed through Transylvania (*Erdély*, now in Romania); thus the goldsmiths of Kolozsvár (now Cluj-Napoca, Romania) and Nagyszeben (now Sibiu, Romania) were engaged relatively early in the making of these

coconut chalices. They were secured onto chalice bases, turned out according to goldsmith techniques by finely worked silver- or gold-plated bands. In most cases the chalices were made without lids, except those elaborately decorated that were commissioned by the aristocracy for use on the Lord's Table during Holy Communion. They were primarily decorative vessels, as their narrow top made them rather difficult to clean. Today they are no more in use. A few exceptionally fine chalices from the 17th century are known from the Great Plains area (*Nagy Alföld*) and from Karácsonyfalva (now Craciunel, Romania) in Transylvania. A goldsmith of Buda made the one of Komoró in the middle of the 19th century. That indicates their use on the Lord's Table occasionally during the 1800's. – B: 1078, T: 7676.

**Codex Albensis** – Oldest musical manuscript, dating from the 12th century, with musical notations prepared in Hungary, compiled at Székesfehérvár between 1100 and 1150. It comprises the earliest Latin verse from Hungary, the laudatory and entreating antiphony and responsory to King István I (St. Stephen, 997-1038). – B: 1230, T: 7659. → **Codex Literature.**

**Codex Bandinus** – Oldest authentic written record of the Hungarians living in Moldavia (a region east of the Carpathian Mountain Range, now Romania) written by Márk Bandinus, Croatian Archbishop of Marcianopolis, who became Bishop of the Roman Catholic Diocese of Moldavia in 1646. It is known as the Codex Bandinus. In it he wrote: “*Bakó: the number of Wallachians [i.e. Romanians] was less. Earlier the number of Hungarians was so great that twelve monks were sent to look after them*”. The Codex contains numerous ethnographic descriptions of Hungarians and Wallachians. The attempt to Wallachianize the population becomes increasingly evident from the reports of the heads of missions. In its appendix, the Codex enumerates the names of Moldavian Catholics (i.e. Hungarians) of that year. Scientific research has made use of this Codex ever since the Reform Age. Several copies of it survived. – B: 1133, 1134, T: 7659. → **Csángó; Codex Literature; Reform Age.**

**Codex Cumanicus** – A linguistic manual dating from 1303, designed to help Catholic missionaries communicate with the Cumans (*Kunok*), a nomadic Turkic people, who settled in Hungary in the 13th century. It is in the possession of the Library of St. Mark in Venice (Biblioteca Nazionale Marciana, Cod. Mar. Lat. DXLIX). It was discovered by Count Géza Kuun, who translated it into Latin and published it in 1880. The Codex is generally regarded as accurate, but it differs slightly from other sources in the Kipchak language, which is similar to Turkish. The Codex's *Pater Noster* (Our Father) reads: “*Atamız kim köktesiñ. Alğışlı bolsun seniñ atıñ, kelsin seniñ xanlığıñ, bolsun seniñ tilemekiñ – neçik kim kökte, alay [da] yerde. Kündeki ötmegimizni bizge bugün bergil. Dağı yazuqlarımızni bizge boşatqıl – neçik biz boşatırbız bizge yaman etkenlerge. Dağı yekniñ sınamaqına bizni quurmağıl. Basa barça yamandan bizni qutxarğıl. Amen!*.” In the mid 20th century in Hungary there were old people of Cumanian origin in the central region of Hungary (*Kiskunság*) who still knew the *Pater Noster* in their mother tongue. – B: 1031, T: 7103. → **Kuun, Count Géza.**

**Codex Literature** (Hungarian) – Most of the codices was copied in the workshops of Dominican and Franciscan monks. 17 Dominican and 17 Franciscan codices have survived.

The *Dominican Codices* were probably written for the nuns of Margaret Island. The oldest of them is the *Birk Codex* from 1474, which was written by Paul Váci, a Dominican monk. The first part contains St. Augustine's regulations, while the second contains instructions concerning the life style of Dominican nuns.

The huge *Winkler Codex* (1506) was written by three persons. It contains prayers and litanies in Latin and Hungarian. It also contains different parts of the Gospels, Mary's laments, and prayers. Certain parts of it are original Hungarian works. The most outstanding ones are the Lea Ráskai Codices. The best known is the *Margaret Legend* from 1510, which tells of King Béla IV's daughter, St Margaret's (of the Árpád Dynasty) life. The original text of the legend was written by Marcellus, the head of the Dominican order, Margaret's confessor for the investigation of the canonization. The Codex was divided into three parts. The first one describes Margaret's lifestyle in the nunnery, the second part tells of her miraculous deeds; and the third one contains the statements of her fellow nuns made in front of the canonization committee. The legend describes Margaret's humble and self-sacrificing life, and there are parts about everyday life of contemporary monasteries.

Lea Ráskai's second outstanding biographical Codex was the *Dominican Codex* of 1517. In this she describes St. Dominic's life in detail. She commemorates the fact that St. Dominic sent Master Paul (Paul of Hungary) to Hungary to preach. The Codex tells of several miracles, parables and visions from the saint's life. Its style is very impressive and powerful. The subjects of teaching, science and education are also mentioned, e.g. student, dean, master, school, science, learn. Lea Ráskai copied the major part of the Book of Parables in 1510. The other two copiers of the Codex are unknown. Its Latin source was a collection of religious parables from the 15th century, which contained moral teachings and parables. The most significant of its parables are the conversation on life and death, and the so-called death dance.

In the first part of the *Cornides Codex*, which was copied between 1514 and 1519, there are sermons for the ecclesiastical year. The main source of these was a collection of speeches from the 15th century. The second part of the Codex tells of the legends of female saints, who died as martyrs in the first centuries of Christianity. At a certain place Lea Ráskai noted down the date of copying and she also revealed her name. The different notes at the end of certain units of the text provide information about the events of the age and the life of the monastery: about the re-consecration of the chapel, the death of Imre (Emeric) Perényi, and the György (George) Dózsa Peasants' Revolt of 1514.

The *Jordánszky Codex*, compiled between 1516 and 1519, is a thick Dominican Codex. Its content, similarly to the Hussite Bible, is a Bible translation, but independent of the latter. It included certain parts of the Old Testament, the four Gospels, the Acts, and other parts of the New Testament. Its spelling and language show similarities with the *Érdy Codex*. Its copier is not known.

The *Codex About the Honors of the Saint Apostles* from 1521 describes a contest between the apostles and other saints in a conversational form, imitating living speech. It enlists the reasons why the apostles are more honorable than other saints. The original version of the Codex was an unknown Latin essay. The text mentions Dante, and the first

lines of metrical poetry appeared here for the first time in the Hungarian language. The Codex must have been copied by a Dominican nun in the nunnery of Margaret Island.

The greatest Dominican Codex is the beautiful *Érsekújvár Codex* dating from 1529-1531. It was copied by three persons and was decorated with painted pictures. Most of it was written by the nun Martha Sövényházi. Its content is mixed: it contains gospels for Lent and Easter, as well as short teachings and parables. Its most famous part is the legend of Saint Katharina of Alexandria in verse. It is a scientific work full of theological essays. The main source was Pelbárt Temesvári's sermons, and a mediaeval Latin book of sagas. The translator did a very good job putting the text into Hungarian with a good sense of rhythm, independent of the original Latin text.

Other Dominican codices are: the *Horváth Codex* from 1522 (Lea Ráskai's writing), the *Gömöri Codex* (1516), the *Virginia Codex* (1529), the *Kriza Codex* (1532), and the *Thewrewk Codex* (1531).

The majority of the codices copied by *Franciscan monks* contain parts of the gospels, sermons as well as legends, essays and songs. Most of them were copied in the rich Clarissa Convent in Óbuda.

The earliest of them is the *Guary Codex* from around 1490. Its copier might have been Lucas Segödsi, the head of the Order at that time. It was copied precisely, and had a nice look with beautiful language. It contains religious essays and teachings. Certain parts are parallel with the text of the *Nádor Codex*. Its spelling partly follows the spelling of the Hussite Bible.

The *Nádor Codex* was also copied for the Clarissa nuns of Óbuda by an unknown copier in 1508. It contains meditations, legends, holy songs, and a list of sins for confessions. Certain parts of it are identical with texts of the same topic of other codices (for instance, the Winkler Codex, the Érdy Codex, the Kazinczy Codex). In this Codex we can find the oldest Hungarian song in musical notation. Its songs are Hungarian folk songs - one of them was still being sung even in the 17th century.

The copier of the long *Nagyszombat Codex*, made in 1512 and 1513, is also unknown. A large part of the Codex is devoted to meditations and essays. It also includes the Ten Commandments, the Lord's Prayer, the "I believe" (Credo) prayer and the explanation of the salvation - and also a list of sins. For example, it states that the Sun is eight times bigger than the Earth, there is five times more water on Earth than soil, and there is a heaven above the starry sky.

The greatest Franciscan Codex is the *Debrecen Codex*, copied in 1519. The first part tells of the legends of the saints, who are celebrated from St Andrew's Day (November 30) till March 25. The second part includes teachings and legends of other saints.

The *Kazinczy Codex* was compiled for a very long time: the dates 1526, 1527 and 1541 are noted in it. So it must have been finished after the defeat at the battle of Mohács in 1526, but before the occupation of Buda by the Turks in 1541, and the escape of the Clarissa nuns of Óbuda. It was copied by three unknown monks. This Codex contains sermons, as well as valuable romantic proverbs and legends (e.g. the St Anna legend, the St Elek legend, and the legend called Barlam and Josafa). Its copier asks for an Ave Maria from the reader.

Other Franciscan Codices made in Óbuda and Buda are the *Simor Codex* (1508), the *Weszprémi Codex* (1512), the *Lobkovitz Codex* (1514), the *Bod Codex* (around 1520), the

*Sándor Codex* (around 1518), the *Vitkovics codex* (1525), the *Miskolc Fragments* (1525), and the *Tihany Codex* (1532).

Franciscan codices made in Trans-Danubia (*Dunántúl*) contain translations of psalms. The *Keszthely Codex* was copied in 1522 by Gregory Velikei in Léka, in county Vas for the Sisters of the Third Order of St. Francis. The copier noted down the date and his name onto one of the pages of the Codex. The *Kulsár Codex*, made in 1539, was written by Paul Pápai, a Franciscan monk in Ozora, in County Tolna.

Some Franciscan Codices were made in Transylvania (Erdély, now Romania). The most outstanding of these is the *Székelyudvarhely Codex*. The first two parts of it - The Book of Judith and the Catechism - were translated and written down by the monk Andrew Nyujtódi in 1526. He translated it - as he wrote - for his "beloved sister, Judith Nyujtódi", a nun from Tövis. He asked his sister not to consider his "peasant style, but the real meaning of it". The translation of the Book of Judith from the Old Testament existed in the Hussite Bible, as well as in the *Vienna (Bécsi) Codex*, but this is independent of them. Its text shows a lot of similarities with today's Székely (Szekler) dialect. We can also find the first Hungarian catechism in this Codex. The other parts contain meditations and parts of the gospels. The copier of these parts may have been Judith Nyujtódi herself, the owner of the Codex. The note on a page refers to this: "This book belongs to the virgin Judith: it was written in the year 1528 in Tövis".

The *Teleki Codex* was made for the Beguine nuns of Marosvásárhely (now Târgu Mureș, Romania) (1525-1531). Its legends are romantic stories written in an imaginative style. The *Zelma Lázár Codex* might also have been copied in Marosvásárhely after 1525. The *Festetics Codex*, written around 1494, and its supplementary book, the *Czech Codex* from 1513, are the works of Pauline monks, and are two old books of prayers. Both of them were made in the Pauline monastery of Nagyvázsony (County Veszprém) for Mrs Kinizsi, a Hungarian Beguine nun. The *Festetics Codex* is a beautifully decorated book of prayer. Its special value is that it contains the first Hungarian translation of Petrarc's seven repentance psalms. In the *Czech Codex* we can find private prayers besides the offices. The most significant of them are St Brigitte's 15 prayers and a beautiful poem: St Bernard's hymn to the crucified Christ.

The *Peer Codex* most probably originates from the monastery of the Pauline Order of Nagyvázsony from around 1518. It is a work of six persons; its writers are unknown. It contains legends, prayers and poems. Andrew Vásárhelyi's beautiful song is a prayer in verse to the Virgin Mary, the patron saint of Hungary. The poet included his initials in the starting lines of the verses. The other beautiful poem of the Codex is a song about King St Ladislas. We can find the Cantilena here too, a mocking, jeering song about priests written by Francis Apáti. The Codex also includes an eternal calendar, the so-called *csízió*, which is a translation of a calendar written in verse, very popular throughout Europe. A similar calendar has survived from earlier times; it was preserved in a Latin Codex, the *Thuróczi Codex*, written after 1462.

There are very few codices from *Premonstrian* monks. One of them is the *Döbrentei Codex* from 1508, which was copied by Bartholomew Halábori, a priest and royal clerk. It contains translations of psalms, sermons, parts of the gospels and hymns. But we can also find a tale in it, - simply called "Tale". The *Lányi Codex* is also from the Premonstrians, It was copied in 1519. Written for the nuns of Somlóvásárhely, it describes the rules, regulations and religious ceremonies of the Premonstrian Order.

The best-known Hungarian Codex - and also the largest collection of Hungarian legends – is the *Érdy Codex*. It was written and translated by an unknown Carthusian monk between 1524-1527 in Lövöld (Városlőd). The Codex was compiled for “all monks and nuns”. Besides its Latin preface it also has a Hungarian preface; this is the first preface in Hungarian in Hungarian literature. The book is a collection of speeches based on Pelbárt Temevári's sermons: it contains Sunday sermons, legends about the life of saints and explanations of the gospels. The legends about Hungarian saints are quite significant. The unknown Carthusian was an independent, brave translator; his vocabulary was very rich. The language he used was the most developed dialect of the age. – B: 1150, 2112, 7617, T: 2112, 7617.→**Most of the codices and persons have their own entry; Codices, list of.**

**Codices, list of** – Apor Codex (15th-16th c.); Bécsi Codex→Vienna Codex; Birk Codex (1 October 1474); Bod Codex (first half of the 16th c.); Cornides Codex (1514-1519); Czech Codex (1513); Debrecen Codex (1519); Dominicas Codex (1517); Döbrentei Codex (10508); Érdy Codex (c. 1526); Érsekújvár Codex (1529-1531); Festetics Codex (1492-1494); Gömör Codex (1516); Guary Codex (before 1508); Gyöngyösi Codex (beginning of the 16th c.); Horváth-kódex (1522); Jordánszky Codex (1516, 1519); Jókai Codex (around 1441); Kazinczy Codex (between 1526 & 1541); Keszthely Codex (1522); Kriza Codex (1532); Kulcsár Codex (1539); Lányi Codex (1519); Lázár Zelma Codex (beginning of the 16th c.); Lobkowicz Codex (1514); Munich Codex (1466); Nádor Codex (1508); Nagyszombat Codex (1512, 1513); Peer Codec (first quarter of the 16th c.); Pozsony Codex (1520); Sándor Codex (first quarter of the 16th c.); Simor Codex (beginning of the 16th c.); Székelyudvarhely Codex (1526-1528); Teleki Codex (1525-1531); Thewrewk Codex (1631); Tihany Codex (between 1530 & 1532); Vienna (Bécsi) Codex (15th c); Virginia Codex (1515); Vitkovics Codex (1525); Miskolci Fragments (1525); Veszprémi Codex (first quarter of the 16th c.); Winkler Codex (1506). – B: 2112, T: 7617.→**Codex Literature; Most of the codices have their own entry.**

**Coetus Theologorum** (*Református Theológusok Munkaközössége*) – Working team formed in Debrecen in October 1939, by the initiative of Professor Béla Vassady (1902-1992). Its aim was to cultivate theological disciplines. It had, as “active” members, theology professors, resident fellows, ministers with doctoral or other degrees, and others, who actively pursued a theological discipline. It also had “supporting” members, who were interested in promoting theology. The *Coetus* was involved in book publishing as well. Its members received a volume yearly. In 1944, it took over the editing and publishing of the *Theological Review* (*Theológiai Szemle*). After World War II the *Coetus* could not continue its work. In the summer of 1947 it tried to resume its activities; but the political climate was unfavorable. On 9 March 1949, the *Coetus* declared its dissolution. However, after the political changes the *Coetus Theologorum* was reborn and it renewed its activities on 21 September 1990. – B: 0910, T: 7103.→**Vassady, Béla.**

**Coherence** (coherency) – is the name of the interference capability of electromagnetic waves in physics. Waves emanating from two different sources are coherent if their frequency is the same (same number of oscillations) and their phase difference is constant. Therefore, only those light waves are coherent, which are derived from the

same atoms and molecules and from the same light-source, and only if their path difference is not greater than the length of the individual elementary waves (1-2 m). The now obsolete “coherer” for detecting radio waves: the rectifier of the wireless telegraph apparatus was invented by Károly (Charles) Zipernowsky. – B: 1138, T: 7456.→ **Zipernowsky, Károly.**

**Coin Hoards** – A large collection of coins that was either hidden, or found its way underground by some means. In Hungary, apart from barbarian silver drachmas and Roman coins, medieval Frisach coins, Viennese pennies, as well as Polish, Prussian, Silesian and Dutch coins are the most numerous. Conversely, Hungarian coins found their way into foreign soil during the time of the Árpád Dynasty (10th to early 14th century), as well as during the rules of subsequent foreign kings. – B: 1078, T: 7617.

**Collectivization of Agriculture in Hungary** – Two years after the Communists gained complete control of the government in May 1950, in their Order-in-Council No.33/1950, they outlined their plans for the collectivization of agriculture based on the Soviet *kolkhoz* system. This mostly affected the middle-size land holdings (those above ca. 20 acres). The policy of collectivization was also resented by the small landholders, many of whom had recently received their lands through the post-war land reform, as proscribed by the Communist Party. To ensure the success of their program, the Communists initiated an intensive propaganda campaign in January/February 1954. The government-controlled press endlessly harped on the enthusiastic response of the peasantry and reported on the large numbers of those who joined the collective farms. In reality, behind these numbers were repeated threats by party propagandists or organizers sent to the villages, and often the exercise of police powers. Since collectivization was not proceeding as smoothly as had been expected at the Second Congress of the Hungarian Workers’ Party (the Communist party appears in Hungarian history under various synonyms, partly to mislead the public and the international public opinion), held in February/March, resolutions were passed to improve “party work” in the villages and to enforce the “iron discipline” of the Party. Due to the implementation of the collectivization program, agricultural production fell drastically; and six years after the war the Government was forced to re-introduce food ration coupons. In its Order-in-Council (No. 253 500/19519) of 28 June 1951, the minister of food supplies made the size of food rations for anyone owning land dependent on his fulfillment of his prescribed production. The prescribed quotas of grain or any other agricultural products were collected by the State without any, or only at nominal compensation. There was so much resentment against this system, applied even to collectivized land, that the President’s Council, in its Order-in-Council of No.10/1953 dated 12 July 1953, was forced to cancel all the unfulfilled quota obligations of the collective farms and reduce their existing quotas by 10%. As in the Soviet Union, the collective farm system was unsuccessful in Hungary as well, and its introduction significantly contributed to the indebtedness of the country. Soon after the collapse of the Communist regime in 1989, the unpopular collective farm system dissolved voluntarily. – B: 1230, T: 7665.→ **Compulsory Collection System; ‘Kolkhoz’ in Hungary; Soviet Rule in Hungary (1944-1989).**

**Collegium Hungaricum** – Institutions formed abroad for the purposes of scientific research and studies, being attended mostly by university students with scholarships, or by those who have been educated at universities. The Hungarian Parliament enacted its establishment by the Act of 27 May 1927 and, as a result, institutions were formed in Berlin, Vienna, Paris and Rome. Since World War II, their activities have included propagation of Hungarian culture and the promotion of cultural exchange. – B: 1078, 1138, 1230, T: 7675.

**Colombia, Hungarians in** (South America) – Following World War I, about 15-20 Hungarians arrived in this country; while some of them moved on, others integrated into the community. Just before World War II, about 25-30 Jews came from Hungary. Between 1945 and 1955, about 150 Hungarians arrived in Colombia. However, half of them moved on to the United States. Most of the immigrants were doctors, teachers and engineers. The skilled laborers earned a decent living; but agriculturalists had a hard time. After the Hungarioan Revolution and Freedom Fight of 1956, Colombia promised to accept 3,000 Hungarian refugees; but only 300 were accepted and almost half of them left the country later. The old-timers helped the newly arrived refugees. The majority of them live in Bogotá, the rest reside in Medellin and in Cali. The standard of living of the Hungarians in Colombia is rather high. At the turn of the millenium a reliable estimate puts the number of Hungarians in Columbia at 150. – B: 1104, 1365, 7103, T: 3240, 7103.

**Colorophon** – A color film device that was shown in 1929 by Ferenc (Francis) Tarján in Berlin. – B: 1226, T: 7674. → **Tarján, Ferenc.**

**Comenius, Ámos János** (Jan Amos Komenesky, Szeges) (Magyarbród, Uhersky Brod, Moravia, 28 March 1592 - Amsterdam, 15 November 1670) – Writer, teacher, last bishop of the Denomination of the Czech-Moravian Brethren. His original name was János (John) Szeges; but he also used the name Jan Amos Komensky. The Czech professor, A. Skarka, ascertained his Hungarian origin and this claim was affirmed during a public lecture by Josef Polisensky, also a professor from Prague. Comenius was orphaned at an early age; but the Congregation of Brethren secured his education. He studied Theology at Herborn and Heidelberg, Germany. During the turmoil of the Thirty Years War, he led a life of great difficulties. In the course of his wanderings, he spent a considerable time in Poland, and also lived in England, Sweden and Prussia. In his activities in the service of peaceful coexistence between nations and religions, even world peace, he reached and made contact with people in high places. At the invitation of the Polish king he acted as an arbitrator between Roman Catholics and Protestants at the Colloquy of Thorn. He acted as a judge in the presence of French and Danish delegates at the Conference of Breda in 1667, deciding in the life and death struggle for sea power between England and the Netherlands. After much persecution he returned to Hungary and accepted an invitation to Sárospatak. He wrote his most famous pedagogic works during his four years of stay under the patronage of Zsuzsanna Lorántffy and Zsigmond (Sigismund) Rákóczi. Among these was his widely known *Orbis Pictus* (*The Visible World*). He was the foremost pedagogue of his age, father of the modern science of education. He introduced teaching in the native tongue for both sexes and for all classes of society,

using illustrations and character development. His views laid the foundation for today's scientific pedagogy and for the organization of teaching (school year, hours for teaching, system of school grades), gaining great respect with all of them. At his own request he was buried near the Dutch capital in Naarden, in a small church that had been converted into a Mausoleum. – B: 0883, 1257, T: 7675.→**Lorántffy, Zsuzsanna; Reformed Colleges: Reformed College of Sárospatak; Protestant School Dramas.**

**Comico Tragedia** (Comic Tragedy) – An untitled blank verse drama by an unknown author from 1646. By the end of the 17th century it already had three printed editions and many manuscript versions were known to exist. The author presents the death of three felonious men in the framework of the allegorical struggle between virtues and sins: the Biblical Rich, the Famous Poor Rascal, and Bailiff Szász, the exploiter of peasants; three felons who embody the enemies of society. The author marked individual scenes with prompts for popular songs, apparently suggesting that the entire work might be presented as an opera. – B: 1150, T: 7659.

**Commander-in-Chief** – (1) In the first half of the 15th century a suitable person, occasionally appointed by the king as Commander-in-Chief to lead the royal army. From the 15th century onward until the 17th century, it was the title of the leader of Northern Hungary (Upland, *Felvidék*, now Slovakia), Kassa (now Košice, Slovakia), Lower Hungary, Slavonia, and the Maritime districts. (2) The Commander-General was the supreme commander of the forces of Transylvania (*Erdély*, now in Romania) in the 16th and 17th centuries. (3) A Jazyg-Cumenian (*Jászkun*) Commander-General was also invested with administrative and judiciary powers. (4) When the civil administration was finally introduced towards the end of the 19th century the law enforcement became the duty of organizations like the Royal Gendarmerie and the Royal State Police, each with its respective supreme commander. – B: 1153, T: 3233.→**Jazygs; Cumanians.**

**Communism, Arms Supported** – One of the characteristics of the first six days from 24 to 30 October of the Revolution and Freedom Fight of 1956. After the outbreak of the Revolution the Hungarian Communist Party desperately hung onto its power with the support of the Soviet armored divisions that has been stationed “temporarily” in Hungary since 1945. The Communist Government, without hesitation, ordered the army to open fire on the people on the first day. The second day, the Communist Party sacrificed its General Secretary, but would not yield an inch of its power. The third day, it named a new General Secretary, but was still unwilling to share power. The fourth day it talked about a “National Front”. The Communists, including two non-Communists in the Government, still would not allow the formation of other parties. On the sixth day, the Hungarian Communist Party accepted defeat and disintegrated. – B: 1230, 1078, 1366, 1373, T: 7665.→**Freedom Fight of 1956; Soviet Rule in Hungary (1944-1989).**

**Compactor, Bálint** (Valentine) (Gevers) – a Hungarian book printer in Kassa (now Košice, Slovakia) in the 17th century. Originally he was a bookbinder and this is why he was later named Compactor. He was an itinerant journeyman on arrival to Kassa, but was already a master craftsman in 1642. As book printing had ceased in the city some two years before his arrival, the City Council commissioned him to take charge of and revive the city's printing works. In two years, his workshop produced six books, all in the

Hungarian language, except for a German calendar. He died at the beginning of 1656. – B: 0942, T: 7659.

**Composite Bow** – Also called the reflex bow or lever arm composite bow. It was developed by the horsemen of Central Asia in the first millennium B.C., particularly the Scythians, Huns, Avars and Magyars. It was made of two or more parts. Its belly was made of horn and glued together with animal sinew. Both horn and sinew are very light in weight and the flexibility of the sinew could withstand considerable bending on the back of the bow and horn. It differed from the so-called selfbows made of a single stave of wood that had been shaped to taper from the middle toward the ends. The average length of the later composite bow was 110 cm. (3’8”), half the size of the selfbow, and it could outshoot the latter by more than 2 to 1. From horseback it was possible to shoot arrows several hundred meters distance with relatively great precision. According to a Turkish document of 1798, Sultan Selim shot an arrow to a distance of 894 m. (972 yards) in the presence of Sir Robert Ainslie, British Ambassador to Turkey (*see*: Klopsteg, Paul E.: *Turkish Archery and the Composite Bow* 1987, p.18). Its preparation required considerable skill and plenty of time; therefore a well-made bow could easily be worth several horses or heads of cattle. The earliest illustration of a bow can be seen on the 3000-year-old Sumerian lion hunt stele. To protect the arrows from the rain they were encased in a leather case with a cover often decorated with embossed, painted or gilded designs. The Hungarians (Magyars) inherited the art of bowmaking from the Scythians and the Huns. The Hungarians were masters in the making and handling of this fearsome weapon. Compared to other bows, the composite bow was smaller and more powerful and more practical in hunting or shooting from horseback. An arrow shot from it could travel about half a mile's distance, was capable of piercing some light body armor and was lethal at about 300-400 meters. (Western bows had only about half the range.) The warriors of the East were masters in handling these bows and they shot their arrows with great accuracy from their galloping horses. Even in a retreat, real or tactical, the stirrup enabled them to turn facing backward on their horses allowing for a very effective use of these weapons. When the Magyars settled in the Carpathian Basin at the end of the 9th century, migrating peoples who used the composite bow stretched from Central Europe to Persia and beyond to Korea. The distinct superiority of the Hungarian equestrian armies is ascribable to the mastery of their composite bows. – B: 1153, 1020, T: 7456, 7617.→**Bow, the Composite; Hungarian Bow.**

**Compromise of 1867** (*Ausgleich, Kiegyezés*) – The formation of the Austro-Hungarian Dual Monarchy. In the 1866 Prusso-Austrian War, Austria suffered great defeats at Königgrätz and Solferino, thereby losing her influence in both Germany and Italy. These losses forced the Emperor to accept the inevitability of a compromise agreement with Hungary. On the Hungarian side, Ferenc (Francis) Deák-led negotiations resulted in the formation of the Austro-Hungarian Monarchy. The Compromise was legalized and ratified on 28 July 1867 in 69 paragraphs of Bill XII of 1867. The Bill stated that legal connection between the “Countries of the Hungarian Crown” and “His Majesty’s other Countries and Provinces” are based on the *Pragmatica Sanctio*, (1713, issued by Habsburg King Charles III, 1711-1740). The Bill also recognized Hungary's independence with respect to internal, legal and administrative affairs and stated that the Ruler had also introduced a constitutional system of government in his other possessions.

Foreign affairs, defense and management of finances became a joint operation. Hungary subscribed to the establishment of a common currency and a common monetary policy.

The Compromise contained the minimum of the nation's demands and the maximum of what the ruler was willing to grant. At first it was welcomed with sincere joy; but it proved to be a disappointment, because instead of a personal union, the arrangement meant a dual monarchy that pushed the country into a semi-colonial status. The common ministries for foreign affairs, defense and finance in fact meant complete dependence on Austria. However, the Compromise did result in the industrialization and development of Hungary.

The Dual Monarchy lasted until the end of World War I in 1918. The war eventually led not only to the dissolution of the Dual Monarchy, but also to the dismemberment of Historic Hungary at the Versailles-Trianon Peace Treaty on 4 June 1920. – B: 1230, 1267, 1031, T: 7665.→ **Pragmatica Sanctio; Deák, Ferenc; Cassandra Letter; Austro-Hungarian Monarchy; Croat-Hungarian Compromise; Trianon Peace Treaty.**

**Compulsory Collection System** (*Beszolgáltatási rendszer*) – This was in effect in Hungary between 1945 and 1956. Farmers' produce had to be handed over to the state at a much lower price than the free market price. The system was justified in the name of better distribution of the food supply, providing for the Soviet troops stationed in Hungary and the reorganization of the agricultural system. The result was that the farmers left approximately 1.5 million hectares of arable land uncultivated and handed them over to the State. From 1953 onward the Government reduced the compulsory delivery of farm products and it was abolished in 1956. – B: 1231, T: 7668.→**Collectivization of Agriculture in Hungary; Soviet Rule in Hungary (1944-1989).**

**Congregation of the Living God** – A Pentecostal-type Protestant community active in Hungary since the 1920s. Elected leaders govern the congregation. The title of minister is not recognized. The exclusive source of their teachings is the Bible. The foundation of their faith is the teaching about the Holy Spirit, grace, new birth and baptism. Members can be only those who were baptized by immersion. They reject prophecy and prophesying. They believe in the Second Coming of Christ like the Adventists and celebrate the Sabbath on Saturday. Their moral principles and dietary laws are strict. They control the private and public life of their members. Besides communion they practice the rite of the washing of feet. In Hungary they number about 3,200 members. – B: 1042, T: 7390.

**Conoscope** – A tape of polarizing microscope where the light rays gathered conically reach the microscopic specimens (such as thin-sections of rocks) through a condenser. As a result, in the case of crystals, whose section is perpendicular to the optic axis, they become visible, giving the so-called axial picture. The conoscope may be regarded as the forerunner of the modern picture tube invented by Kálmán (Coloman) Tihanyi in 1928. – B: 1123, T: 7456.→**Tihanyi, Kálmán.**

**Conspiracy Trials** – On 21 January 1947, under pressure from the Soviet security forces and on the demands of the Hungarian Communist Party, the Council of Ministers suspended the right of immunity from prosecution of 7 members of the Hungarian

Parliament. They were immediately arrested by the AVH (*Államvédelmi Hivatal* – the Hungarian State Security or Secret Police). Then 8 leaders of the “Hungarian Community” (*Magyar Közösség*) and in several waves about 200 more people were arrested and charged with “conspiracy against the Republic”. On 16 April 1947, in a partially closed trial, the People's Court sentenced the 8 main accused and 140 lesser figures to death or imprisonment, ranging from life to several years of forced labor. The trial was in essence part of the *salami tactics* of the Rákosi Communist regime to destroy its opponents one by one and to avoid a possible uprising. At first it led to the weakening of the Hungarian Smallholder's Party (*Magyar Kisgazda Párt*), the chief opponent of the Communist Party; and later to the complete take-over of Hungary by the Communist Party. – B: 1230, 1020, T: 7665.→**Front, Hungarian; Smallholders' Party; State Security Police; Soviet Rule in Hungary (1944-1989).**

**Constantinople, Pantocrator Monastery** – This monastery was the most important one in Medieval Constantinople. Byzantine Empress Piroska-Eiréné, daughter of Hungarian King László I (Ladislav, 1077-1095) and wife of Emperor John II Komnenos, established it around 1100. There were three churches and 50 monks in the monastery who taught and nursed the sick. It had the first modern hospital with surgery. Empress Eirene made arrangements in the form of a deed for the foundation for all the medical equipment and other hospital essentials. Besides the doctors, it had a large nursing staff. A senior doctor was in charge of training the younger ones. The monastery had a special wing for the disabled, and a special live-in wing for crippled people. The procedures in tending to the sick were laid down, which was exceptional at the time. The policy of the hospital was modern and unique for the 12th century. In the Ayasofya (Hagia Sophia) Museum of Istanbul there is a mosaic picture of St. Eiréné with the deed of foundation in her hand. – B: 0883, 1020, T: 7663.→**Piroska-Eiréné of Hungary (St. Irene).**

**Constantinople, Runic Inscription in** – A record of historical importance dating from 1515. János (John) Dernschwam, while visiting the Sultan's court with a commission from the Austrian Emperor, found it in 1553, carved on the wall of the stable. He copied in his diary exactly what was carved on the white marble sheet near the ground on the outer wall. The text, as recorded in the diary, was found by Philip Babinger in 1913, who sent it to the Danish scientist W. Thomson, who knew Hungarian. Thomson guessed it was Hungarian runic writing, but could not decipher it, therefore sent it to Gyula (Julius) Sebestyén. Sebestyén proved it was indeed a Szekler-Magyar runic relic. Gyula (Julius) Németh somewhat modified the reading. The correct text is as follows: “*Ezer öcáz tizenöt esztendőben irták eszt; László király öt kevetét váratták itt; Bilai Barlabás kettő esztendeig itt vált; nem lőn császár; Keteji Sékel Tamás irta eszt; Szelimbok császár ittében száz lóval*” (It was written in the year 1515; King László's five ambassadors stationed here; Barlabás Bila was here for two years and did not see the Emperor; Tamás Keteji Sékel wrote it; in the life of Emperor Selimbok, with hundred horses). The writer, Tamás (Thomas) Keteji noted in this inscription and ligatures the most unique traditions of Hungarian runic writing. Researchers until now saw these as deficiencies in the stenography-like ligatures, not recognizing the connection between the two writing systems. The orthography of the inscription is so much like stenography, as if the runic writer had known the logic of today's stenography methods. – B: 1020, T: 7669.→**Hungarian Runic Script; Sebestyén, Gyula; Németh, Gyula.**

**Constitution of Hungary** – When the Blood Treaty of *Etelköz*, (between A.D. 830 and 895 AD) a region occupied by the Hungarian tribes (comprising the area embraced by the rivers Dneestr, Bug, Prut and Seret), besides the establishment of the tribal confederation, common laws for all the tribes were created, and the constitutional character of it is proved by several data. At this event, as Anonymus, the Chronicler recorded in detail, the newly formed National Assembly elevated these laws to statutory force.

Following the Hungarian (Magyar) settlement in the Carpathian Basin in 896, at the historical National Assembly at *Szer* (now *Ópusztaszer*) laws common for all were created. Although the texts of these statutes are not extant, Anonymus unmistakably refers to them: “*At that place the leader and his nobles arranged all the customary laws of the country, as well as all laws (statutes) as to which should serve the leader and his chief men, or in what manner to mete out justice for whatever offence committed. At the same time the leader donated diverse localities, together with all the inhabitants, to the nobles. The place where all these were arranged, the Hungarians in their language called Szeri, because there they organized the ‘szer’ or laws of the country on every matter*”. Following this the reigning prince called together his nobles every year for meting out justice on certain days and this remained a legal custom during the time of the Leaders (Khagans).

After 1000 AD, King István I (St Stephen) published his first Code, followed by the second Code around 1030. These were aimed partly at strengthening Christianity and they formulated laws on judicial matters. The Code of King László I (St Ladislas) increased the severity of King István’s laws, while King Kálmán (Coloman) enlarged and partly alleviated them.

The *Corpus Iuris Hungarici* is the collection of statutes passed since the reign of István I. Besides these the constitutional statutes of the centuries following the Blood Treaty of *Etelköz* and the National Assembly at *Szer*, as well as accepted customs, have retained the force of law. The weak rule of King András II (Endre, Andrew) caused discontent in the country and, at the demand of the common nobles in the Diet, convoked in 1222, the king issued the Golden Bull (*Bulla Aurea*) in Latin, according to the practice of that age. This statute enacted the customary laws of the time that became part of the *Corpus Iuris* and foundation of Hungary’s feudal constitution until 1848.

István (Stephen) Werbőczy collected the legal customs, together with statutes passed later on the basis of them, and published them under the title of *Tripartitum* (Three-Part Book) in 1514. Until the end of the feudal era, statutes were passed on this basis in Hungary. The first Constitution in its modern meaning was enacted in the United States of America in 1787, then in Poland in 1791, and in the same year in France.

Statutes enacted during the 1848-1849 War of Independence laid down the foundation of a civil constitution; but these were annulled after the defeat in 1849. After the Compromise between Hungary and Austria in 1867, they were reenacted in a scaled-down form. The collection of statutes published in 1896 in Latin and Hungarian as *Magyar Törvénytár* (Compilation of Hungarian Laws) was later enlarged with statutes passed until 1948. This also included Werbőczy’s *Tripartitum*.

The National Assembly on 20th August 1949 enacted statute No. XX of Hungary’s new Constitution that aimed at promoting socialism according to the interests of the occupying Soviet power.

Act No. XXXI of 1989 amended the socialist constitution, whereby the rule of law was reestablished in Hungary. The remodeled Constitution declared that it is only a “Temporary One”, until a New Constitution will be created. This Act introduced a multi-party system, parliamentary democracy, and declared the Republic of Hungary an independent democratic state. However, after decades, growing number of Hungarians feel that the “Temporary Constitution” of 1989 is not adequate any more, and they demand a return to the modernized Historic Constitution. For more than 1000 years, the Hungarian State had a Diet to exercise legislative power. The people of Hungary have always been imbued with a sense of constitution; they defended the ancient constitution against foreign kings; they respect the infrastructure of state institutions, but developed them to fit the changing times. According to Hungarian sentiments, the totality of the nation’s constitution lies in the Holy Crown of Hungary as the symbolic legal basis of state, country and nation.

The Second Orban Government, installed in 2010, promised the long awaited New Constitution, which was worked out after a broad consultation and the Parliament accepted it as Basic Laws of Hungary on 25 April 2011, and will come into force on 1 January 2012. The New Basic Laws invalidated the 1949 Communist Constitution and restored the continuity with the Thousand Year Old Historic Constitution, which ceased to exist on 19 March 1944. The New Basic Laws triggered criticism of the opposition parties, as well as that of the European Parliament. – B: 1230, 1232, T: 7669.→**Anonymus; Blood Covenant or Treaty; Tripartitum; Corpus Juris Hungarici; Constitution of Hungary, Development of.**

**Constitution of Hungary, Development of** – In the beginnings of Hungarian constitutional development, its constitutionality was conveyed in five points of the *Blood-Covenant (Vérszerződés)*, i.e. treaty of the Hungarian tribal leaders, formally sealed with blood, which took place in 851 AD, shortly before the Hungarian entry into the Carpathian Basin in 896 AD. These five points summarize the fundamental order of the Constitution for all time: (1) *The community forming the nation possesses all the powers of the State.* (2) *Some of these powers, to which the Head of State is entitled, are transferred to him; these powers are clearly defined and proscribed.* (3) *These powers are in the position to punish both the community and the Head of State in the event the compact is broken.* (4) *Any member of the community may oppose the Head of State without being punished for it, if the Head of State breaks his oath.* (5) *The agreement is sanctioned with an oath.* In course of the development of Hungarian Constitutional Law, the Constitution was embodied in the *Concept of the Holy Crown*, summarized in 5 points: (1) *Hungaria semper libera*; (2) *Sacra Corona radix omnium possessionum*; (3) *Una et eadem libertas*; (4) *Sub specie Sacrae Coronae*; (5) *Ius resistendi et contradiscendi*. The Holy Crown symbolizes the Hungarian constitutionality, which guarantees national sovereignty and transmittal of the concept of Hungarian independence. The sources of the Hungarian historic Constitution are: the written documents, such as the acts of parliament, also the sources not in writing, e.g. the customary unwritten law, the written customary law, as well as judicial decisions in the law courts. The acts of parliament (*lex*) and the customary law (*consuetudo*) are considered equal in force (value, rank), as it is laid down in István (Stephen) Werbőczy’s *Tripartitum* (1514); in the continuity of the law, with its guarantees of independence,

lawfulness and liberty. The great orator, founder of modern Hungary, Lajos (Louis) Kossuth declared during the 1848-1849 Revolution against Habsburg oppression, that the reformed constitution was based on the ancient Hungarian Constitution made available to the entire population of the country. In the interwar years of the twentieth century, under Regent Miklós (Nicholas) Horthy, the historic Constitution was restored fully and it lasted for two decades. But, after World War II, the Communist regime suspended it, introduced the Stalinist basic law, and called it the Hungarian Constitution (1949). A sham legitimization was developed in a dictatorial system, attempting to render the autocratic arbitrariness lawful and referring to it as “democracy”. The absence of legal continuity damaged the national self-determination, automatically leading to impairment of universal human, international and national laws. Various governments, even since 1989, have neglected the re-introduction of the Historic Constitution, have not convoked a Legislative Parliament, and have not restored the legal continuity; the ancient legal system of the nation was not restored. Since 1989, certain acts were passed, based on the Stalinist basic law, which would never have been passed with a historic constitution, e.g. allowing national soil, assets, gas etc. to pass into foreign ownership. Only with the Hungarian Historic Constitution as a base, will it be possible to build a legislation that serves national (not international and selfish) interests and to establish a respectable public life; it would also help to build a national self-identity, which is so important. In constitutional law, the *Holy Crown* (now returned to Hungary) actually represents the Hungarian nation. Misappropriation of the Historic Constitution would lead to genocide and would render Europe so much the poorer. The Concept of the Holy Crown assured for a thousand years all the laws dealing with toleration, liberty, multi-ethnicity, religious toleration of all faiths, administrative self-government, and in all these measures, Hungary far outstripped the rest of Europe. The New Basic Law of Hungary, accepted on 25 April 2011, and will be effective on 1 January 2012, restored the continuity with the Historic Hungarian Constitution. – B: 2074, 7456, T: 7456.→**Blood Covenant or Treaty; Tripartitum; Werbőczy, István; Crown, Doctrine of the Holy; Kossuth, Lajos; Horthy, Miklós; Corpus Juris Hungarici; Constitution of Hungary.**

**Contact Lens** – Eye lens directly in contact with the eyeball. It can be fitted directly onto the cornea of the eye substituting spectacles and even correcting visual defects of which the glasses are not capable. Earlier it used to be made from ground and polished glass, instead of unbreakable and transparent synthetic material that was used for the first time by István (Stephen) Györfly. Due to its obvious advantages, his method was soon adopted all over the world. The diameter of these modern lenses is small, generally 7 mm. and they are fastened to the surface of the cornea by means of a layer of tears. – B: 1138, T: 7456.→**Györfly, István (2).**

**Control Stick** – Universal steering column facilitating the vertical and horizontal movements of airplanes. Ernő (Ernest) Horváth (1883-1943) invented it in the early 1940's. – B: 0883, T: 7674.→**Horváth, Ernő; Pioneers of Hungarian Aviation.**

**Converter Tube with Deflection Control** – Invented in the late 1930s by the physicist-engineer Ernő (Ernest) Winter. It is a new type of converter tube, where the modulator grid works with space-charge control, while the oscillator grid works with deflection

control. A characteristic of these tubes is that tail noise resistance is decreased to a quarter compared with those used until then. – B: 1226, T: 7456.→**Winter, Ernő.**

**Conveyor** – Endless bucket-carrying installation pulled by rope or chain. Ottó Cséti (1836?-1906) invented it and it was first used in the German brown coalmines. It also spread to other technical areas. – B: 1226, T: 7674.→**Cséti, Ottó.**

**Copper Age in the Carpathian Basin** – Copper was first used by Neolithic man during the Late Stone Age, about 8000 BC. It was used as an improved substitute for stone. As early as 5000 BC, weapons and other implements of copper were left in graves for the use of the dead in Egypt. Man fashioned crude hammers and knives, and later other utensils from copper. Copper was produced on Cyprus about 3000 BC, in China 2500 BC.

*Late Phase* – The *Baden-Pécel Culture* (Pécel is about 22 km east of Budapest) represents the late phase of the Copper Age, dated to 2500 - 2000 BC, although some date it to 3000 BC. Copper was in full use by then, side by side with stone. It is known from numerous sites in Central Europe (Poland, Germany, Czech Republic, Austria, Hungary and Transylvania, now in Romania). It is characterized by dealing with the dead: whether the body was buried or cremated. Among the metal tools are axe-hammers and torques of twisted copper wire. The pottery is plain and dark, sometimes with channeled decoration and handles of “Ansa Lunata” type. The horse was already domesticated and there were carts mounted on four solid disc-wheels, introduced by then into Central Europe. The farming culture of Danubian III was in full development. The graves excavated along the banks of the Bodza River, south of the town Brassó in Transylvania, in the easternmost corner of the Carpathian Basin, are a particularly important Late Copper Age finds. It is extraordinarily rich in material unearthed at the Balog farm, including a shrunken skeleton accompanied by ten dishes: apart from the six larger ones and some downward-turned plates, there are two smaller speckled plates that must have had cultic use (the two plates are joined with an “ear”), suggesting a clan-leader’s grave, who also acted as Shaman. A double plate of this kind was most probably one of the accessories of the sacrificial ceremony. The decorations with speckled lime inset indicate a second level of settlement in the Baden-Pécel Culture. The people of the Late Copper Age believed that a downward-turned plate would confine the evil spirits, believed to be corruptors of men and animals. Joseph Korek maintains that this belief, including sacrificial pits, originated in Anatolia and can be traced in similar cultures throughout the Balkan Peninsula reaching even the Ossarn settlements in Austria. Other Copper Age finds from the Carpathian Basin are from lower, older levels (8000 to 2500 BC), such as the ones from Tiszapolgár, Bodrogkeresztúr, Szelvény, Pusztaistvánháza, Kiskőrös and Jászládány, and the graves holding bell-shaped milk-jugs introduced from Western Europe; marble pearl jewellery, rings made of gold, and also needles and some tools already made from copper. The famous axes and mining picks of Bányabükk (now Valcele) in the Gyalu Alps of the Bihar Mountain Chain of Transylvania may be of the latest phase Copper Age, discovered in 1927. Altogether 42 axes were excavated from this site. At the time of their manufacture, they supplied the whole of Europe with mining tools of copper as far as Crete and the Caucasus region. – B: 1068, 1459, T: 7456.

**Corinthian Canal** (Canal of Korinthos, Greece) – Artificially constructed navigable canal. It was made by cutting through the Corinthian Isthmus between the Gulf of Corinth and the northern Saronic Gulf arm of the Minoan Sea. Periandros, the tyrant of Corinth, was the first to plan to cut through the isthmus. Emperor Nero actually began constructing the canal and made the first blow with his golden hoe. Others were also playing with the idea. Finally, in 1881, politicians turned to General István (Stephen) Türr, who sent the Hungarian engineer Béla Gerster to Greece. He was known for his plan to cut through the isthmus between Panama and Darien (Central America). Gerster obtained the permission and ratification of the Greek Government and prepared the work-plan. It consisted of a series of construction sites formed by work on several levels on top of each other, with forward-shiftable galleries and loading shafts. This method was used successfully all along the construction. The building of the canal was started in 1881, and completed in 1893. The canal, in its finished state, is 6345 meters long with a bottom width of 25 m, between the ramps reaching 80 m in height with a water depth of 8.5 m. – B: 1078, T: 7456.→**Gerster, Béla; Türr, István.**

**Cornides Codex** – Hungarian manuscript copied by Lea (Leah) Ráskai between 1514 and 1519. It contains sermons for the notable feasts of the ecclesiastical year and the legends of the saints, particularly the well-respected saints. It was copied at the convent on Margit (Margaret) Island in the River Danube, what is now a part of Budapest. The copying took a long time and the individual parts of the Codex are quite easily separated. The Codex has a distinguished place among the Ráskai codices. The original was composed of 215 letters. Unfortunately, a strange fate befell it at the University Library of Budapest, where it was taken apart and made into five separate codices. These are: (1) Cornidus Codex, (2) Book of Examples, (3) Booklet on the Dignity of Holy Apostles, (4) Sándor (Alexander) Codex and (5) Bod Codex. All are kept at the University Library, Budapest. – B: 1150, 1078, T: 7659.→**Alexander Codex; Codex Literature; Ráskai, Lea.**

**Coronation, Insignia of** – Objects symbolizing authority and dignity given to the ruler during the coronation ceremony. The nature of these insignia differs from country to country and also changes with time. However, the most important of them is the crown.

The Hungarian coronation insignia is the most complete set in Europe, originating in the Middle Ages. They include the Royal Golden Orb, the Royal Robe, the Royal Sword, the Hungarian Holy Crown, and the Royal Scepter. These insignia were guarded in the Castle of Buda between the two World Wars, in an iron chest made in 1608. The monogram of Mátyás II (Matthias, 1608-1619) in a crowned armor, and Hungary's crowned coat of arms decorate the iron chest.

In March 1945, at the end of World War II, the entire collection was shipped to the West to prevent the Soviet Army from capturing it.

At the end of April 1945, the nation's leader, Ferenc (Francis) Szálasi, chaired the Crown Council's last meeting in Salzburg, Austria. The Council justifiably worried that the occupying armies might confiscate the crown jewels as war booty. Therefore they decided to bury the national relics. This was done near Mattsee, Austria. Colonel Ernő (Ernest) Pajtás, in charge of the Crown Guards, gave the royal robe to the parish priest of Mattsee for safekeeping, to prevent the textile from perishing underground. The priest later returned the royal robe safely to Hungary. The Holy Crown, the Golden Orb and the Scepter were carefully wrapped and placed into a holder fashioned from a gasoline barrel. Crown Guards Ernő Pajtás, József (Joseph) Bunda and Ferenc Kocsis buried it in an abandoned military trench. Only the royal sword was left in the iron chest, and was shipped to Augsburg, where it was handed over to the Americans. On 27 July 1945, Colonel Pajtás revealed the location of the buried relics to the American army authorities. The relics were deposited in a bank in Frankfurt-am-Main, Germany, and later shipped to Fort Knox, USA. The relics were in the possession of the American Government for 33 years. On 6 January 1978, the US Foreign Ministry returned the entire collection to Hungary. The crown was exhibited at the National Museum, and since 2000, it has been displayed and guarded beneath the Dome of the Parliament, Budapest. – B: 0942, 1078, T: 7662.

**Coronation Golden Orb** (*Arany Alma*) – The Royal Golden Orb is an emblem of authority and sovereignty. The Orb's perfect shape symbolizes the universality and absoluteness of royal authority. The upper and lower hemispheres, often separated by a belt, refer to the harmony between spiritual and material existence and to the inseparableness of divine and earthly might. At first, only the Roman emperors used it as the emblem of divinity; later it was adopted by the Emperor of the Holy Roman Empire, but with a cross on the globe.

The Hungarian Royal Orb is one of the emblems of sovereignty, symbolizing the king's authority as supreme commander. It has been in use since István I (St Stephen, 997-1038). On the coronation mantle, used by Hungary's first king, the sovereign is portrayed with the orb. Subsequently, the orb also appears on royal seals. The Hungarian Orb, the surviving coronation insignia, is not the original one. It was made in the 14th century as a substitute for the lost original. It is made of gold-filled silver plates and the coat of arms of the Anjou family is on its side. During the coronation ceremony the king held the globe in his left hand. In formal processions the Croatian *bán* carried it in front of the king. The orb is guarded together with the other Hungarian coronation insignia. – B: 0942, T: 7662.

**Coronation Robe** – According to tradition, the coronation robe was made in 1031 in a Veszprém valley convent with the participation of Queen Gizella, the consort of King István I. The scarlet silk fabric of Byzantine origin is decorated with gold thread and silk embroidery, forming pictures and Latin texts (*leoninuses*). A V-shaped ribbon divides the robe into a lower and an upper part. The heavenly kingdom is depicted on the upper part. Christ, the King, and the nobles of his earthly empire are represented below the 'V'. A golden ribbon runs across the robe below the row of the prophets. On the golden ribbon the following text is embroidered with blue silk: "ANNO INCARNACIONIS XPI: MXXXI; INDICIONE: XIII A STEPHANO REGE ET GISLA REGINA CASULA. HECOPERATA – (est) ET DATA ECCLESIAE SANCTA(e) MARIAE SITAE IN CIVITATE ALBA" (This Mass Robe was Made in 1031th Year of the Incorporation of Christ, in the

14th Inictio and was Given to the Maria Parish of Székesfehérvár by King István I (St Stephen) and Queen Gizella.) A 'V' shaped ribbon, decorated with angel heads divides the robe into a heavenly and an earthly region. Jesus and Mary are above in heaven, and Jesus as Christ, the King is below in the center surrounded by the three earthly orders (prophets, apostles and the martyrs). In the lower center are the pictures of King István I and Queen Gizella with an inscription. Between them is a medallion without inscriptions, probably representing their son and heir, Prince Imre (Emeric). The fabric and the motives of embroidery on the collar are different from the rest of the robe. The embroidery and the beadwork on the collar depict *arbor vitae* and animal motives. The one-headed four-bodied lion, the *arbor vitae*, the eight-petalled rosette and new moon motives are all pre-Christian emblems. The collar is older than the rest of the robe and, according to the archeologist and historian, the late Gyula László, it was converted from a textile crown. The measurements of the collar support this supposition. – B: 0942, T: 7662.

**Coronation Sword** – The sword of King István I (St Stephen), believed to be one of the Hungarian coronation insignia, is in the possession of the St. Vitus Cathedral in Prague, Czech Republic. It is not mentioned in the 1354 inventory of the cathedral, but is described in the 1367 and 1387 inventories as: "*Item gladius St Stephani regis Ungariae cum manubrio eburneo*". The handle of the double-edged sword ends in a three-segmented bone pommel, and the blade is separated from the handle by a braided wire wreath. Its bone guard-plate is decorated with two intertwined dragon-like animals. The heavily worn sword, suggesting a long period of use, was made before the reign of King István I (St Stephen). Anna, daughter of King Béla IV (1235-1270), shipped the sword, together with other Hungarian royal relics (coronation jewels, insignia) to Prague in fear of the approaching Tartar (Mongol) forces under Batu Khan. Anna, widow of Prince Rastislav of Halics (Galicia, southern Poland), later the Bán of Macsó (south of County Szerém, now in northern Serbia), fled to Prague to her daughter Kunigunda, consort of the Czech King Ottokar II, and granddaughter of Béla IV after the death of Anna's father, King Béla IV. Although the blade is called the sword of St. István, it was made in the first half of the 16th century. This double-edged, Renaissance style sword tapers into a sharp point and has a red velvet sheath. – B: 1078, T: 7607.

**Holy Crown** – Among royal crowns the Hungarian Holy Crown has outstanding significance. It is the most argued piece of the Hungarian coronation jewels. It consists of two parts, sent from different places, which date from different times. The so-called *Corona Latina*, the upper part of the crown, is composed of two bent cross-bands with enameled plates, in a delicate setting studded with gems. At the meeting point of the plates is the enthroned Christ; on the four wings, placed one upon the other, stand two apostle's images with inscriptions. The cross, placed there at a later date, perforates the picture of Christ on the top. Pope Sylvester II sent this upper hoop crown to the coronation of King István I (St Stephen, 997-1038) on Christmas of the year 1000. Later, the King was canonized and bestowed with the title of 'Apostolic Majesty'. The lower part, the *Corona Graeca*, is a band made of Byzantine enameled sheets with a pearl-studded frame on the upper and lower ends. Over the band at the front and the back two large arched, partly enameled plates rise. On the right and left of the first plate, in varying order, are peaked and closed arches with 8 fish-scaled, pearl-decorated transparent enamel plates lined with pearls at the back. On the two sides there are 3-and-3, while at

the back there is one hanging chain with threefold framed jewels. The lower crown's front plate again shows Christ on the throne; on the two sides there are the portraits of Archangels Michael and Gabriel, St George and Demeter, St Kozma, and Hungarian King Géza I (1074-1077). The higher placed back plate represents Greek Emperor Michael Dukas. Originally, this crown was the princely crown of Géza I in 1072. According to tradition, King Kálmán (Coloman, 1095-1116) had the two crowns joined together when he united the royal power with that of the prince, expressing the king's unified majesty as ruler and supreme army commander. The diameter of the present crown is 20-21.5 cm and it weighs 1056 grams. It is the most important piece of the coronation jewels. B: 1231, 1343, 1020, T: 7669.

**Royal Scepter** – One of the symbols of imperial authority bestowed upon the kings during the crowning ceremony. The Hungarian royal scepter, the oldest of the Hungarian coronation insignia, originated from the pre-Christian era. Its wooden handle is covered with filigree-decorated gold plated silver. The total length of the scepter is 38.5 cm, including the 7-cm diameter globe. The handle, made by a 12th century goldsmith, terminates in a smaller sphere at the lower end. The large crystal sphere is drilled through to facilitate the mounting. The three cleft gold mountings are held together at the bottom and at the top by ten-leafed gold rosettes, decorated with filigrees. The center of the top rosette is decorated with a magic knot. From the mounting 10+10+6 small gold spheres hang on short chains. (Crystal or metal spheres and magic knots are characteristic of the late “Chuvash” graves.) The crystal sphere has three flat faces, each decorated with a sitting lion, a symbol of the monarch. This scepter, as part of the coronation insignia is guarded together with the Holy Crown of Hungary. – B: 0883, 1020, T: 7662. → **Holy Crown, Hungarian; Most of the persons in the article have their own entry.**

**Coronation Oath** (Royal Oath) – Oath to uphold the Constitution registered among the laws of the country, made by the king at his crowning ceremony. Even when the heir of the throne was crowned in the life of his predecessor, he also had to take the Royal Oath that was sanctified by the king. The Royal Oath is based on an ancient Hungarian custom and it is very probable that it was not merely a religious pledge. It is known from a 13th century document that King László IV (Ladislav, 1272-1290) took three oaths: one in Latin and two in Hungarian. In his oath the King generally pledged the safekeeping of God's Church, the upkeep of peace, and a just rule. Beginning with King András II (Endre, Andrew, 1205-1235), the guardianship of the constitution is also mentioned in the Oath. – B: 1078, T: 3240.

**Corpus Juris Hungarici** (*Magyar Törvénytár*) - Collection of Hungarian laws and statutes over the centuries, reaching back as far as the first Hungarian monarch, King István I (St. Stephen, 1000-1038); in fact, it is the collective title of two legislative collections.

(1) The older collection, called *Corpus Juris Hungarici*, begins with the laws of King István I, to which King St. László I (St. Ladislav, 1077-1095) added some harsher laws, while King Kálmán (Coloman the Beauclerc, 1095-1116) relaxed them somewhat. All these early laws and royal decrees (*decreta*) actually accumulated right up to 1848, when the free Hungarian Parliament, during the War of Independence from Habsburg rule, started to enact new, more modern statutes and laws. The old laws had been collected

into a legislative body of statutes by the Bishop of Nyitra (now Nitra, Slovakia), Zakariás (Zachary) Mossóczy and the Bishop of Pécs, Miklós (Nicholas) Telegdy (the precursor of Pázmány), and published it at Nagyszombat (now Trnava, Slovakia) in 1584. This collection of laws expanded further over a number of centuries and went through numerous editions. Various additions have been incorporated in it, such as István Werbőczy's *Tripartitum* (approved by the Diet of 1514, first published in 1517 by its author, then first published in Hungary by Balázs Veres at Debrecen in 1565); two municipal statutes of Slavonia; the so-called clauses of the Lord Chief Treasurer; the book of criminal law, the *Praxis Criminalis* enacted by Emperor-King Ferdinand III for Lower Austria in 1656; the procedural rules of the knightly court of the royal Curia (*Curia militaris*); the military regulations (*Regulamentum militare*) of Empress-Queen Maria Theresa in 1747; and the works of János (John) Kosztaniczai Kithonich, concerning the judicial practice of the realm. Legal experts only more recently discovered a number of statutes enacted prior to 1847 that were left out from the old Corpus.

(2) The aforementioned new *Corpus Juris Hungarici* is composed of annually enacted Hungarian statutes, published and officially authorized since 1867, the year of the *Compromise* (*Kiegyezés*) with the Habsburg Dynasty and the creation of the Austro-Hungarian Empire. The 20-volume millennial (1896) memorial edition, entitled *Corpus Juris Hungarici* (*Magyar törvénytár*), edited by the Justice of the Supreme Court, Dezső (Desider) Márkus. About the validity of the laws not incorporated in the *Corpus*, the most authoritative view is put forward by the eminent legal expert Gusztáv (Gus) Wenzel (1812–1891): “Those laws that do not contradict current, established legal and constitutional practice, may be considered valid”. – B: 0942, 1068, T: 7456. → **Werbőczy, István.**

**Corvin** – It is the surname of King Mátyás I (Matthias Corvinus, 1443-1490) used by humanist writers to relate various artefacts to his reign as patron of the arts. – B: 1144, T: 7659. → **Corvina.**

**Corvina** (*Bibliotheca Corviniana*) – The largest manuscript library of the time after that of the Vatican, belonging to King Mátyás I (Matthias Corvinus, 1458-1490). The king established it at the apex of his power in the second half of the 15th century. He inherited a small part of it, received a few volumes as gifts; but he purchased most of it. In 1488, the library consisted of 2500 volumes. With the exception of a few printed works, it is entirely a collection of handwritten codices. This huge collection was placed in the library wing built on the eastern side of the royal fortress and was organized according to languages. Most of the librarians were Italian humanists. King Mátyás I allegedly spent some 33,000 gold pieces per annum on the library. Following his death, and even more so after the occupation of Buda by the Turks in 1541, the library was dispersed and most of it lost. In 1869, in the interest of improving Turkish-Hungarian relations, Sultan Abdulzazis returned four volumes; then Sultan Abdulhamid II a further 35 volumes. The National Library of Austria, formed from the Royal Library, returned 16 Corvina manuscripts to Hungary in 1933. Prime Minister Mussolini gave

back one of the Corvinas before 1927, which had turned up in Italy. There are 194 Corvinas in various libraries around the world, all of them jealously guarded as treasures. Today an unknown number of Corvina manuscripts probably still lie hidden among the codices of Turkish museums and libraries. – B: 1230, 1153, T: 7659.→**Mátyás I, King; Bonfini, Antonio; Buda, Codex Workshop; Mussolini, Benito; Corvinus Codices.**

**Corvin Chain, Wreath and Badge** – Awards established on 11 October 1930 by Regent Miklós (Nicholas) Horthy, and the Minister of Education and Culture, Count Kunó Klebelsberg, for those who “*achieved outstanding merits in enhancing Hungarian science, literature and arts, as well as Hungarian culture*”. The solid gold *Corvin Chain* is 51 mm long. Its medal’s diameter is 35 mm. This is a copy of a 15th century Italian medal with the portrait of King Mátyás I (Matthias Corvinus, 1458-1490). It has the following inscription: “*Mathias Rex Hungariae*”. The silver and enamel pendant is 100 mm long. On two of its sides there are two female figures standing on dolphins. There is an inscription on the top: “*Pro scientia - litteris - et artibus*” (For science – literature – and art).

The *Corvin Wreath* is made from silver laurel leaves; its diameter is 80 mm. The number of holders of the chain was limited to 12 individuals; but at one time in 1940, its number grew to 15. The number of holders of the wreath was originally limited to 60 individuals; but from 1940, its number grew to 80. The *Corvin Decorative Badge* was reserved for foreigners. The first awards were granted on 24 February 1931, the last in 1942. During the Communist era the Corvin awards were forgotten. However, the Antall Government (1990-1993) wanted to re-establish the Corvin Chain award. The Orbán Government (1998-2002) modified it. Now the Prime Minister presents it. The first such award was presented again on 20 August 2001. – B: 0951, T: 7103.→**Horthy, Miklós; Klebelsberg, Count Kunó; Antall, József; Orbán, Viktor.**

**Corvin Goblet** – An ornamental cup, 80 cm high, complete with lid. The well-proportioned piece has a ribbed design and an encrusted body. The cup, its leg prop and lid are decorated with wire-rope enamel. King Mátyás I (Matthias Corvinus, 1458-1490) presented this 1462 work of a Hungarian goldsmith to Emperor Frederick III at their Peace Treaty, and it is kept in the archives of Wiener Neustadt, Austria. – B: 1187, T: 7673.

**Corvinus Codices** – Codices manually written or copied in Latin, Greek, Arabic and Hebrew were held in the *Bibliotheca Corviniana*. They cover literature, history, mythology, rhetoric, philosophy, astronomy, geography, botany, medicine, architecture, military tactics, as well as ecclesiastical and linguistic interests. The collection mainly contains works of ancient and Christian authors. Characteristically they are written on parchment, bound in dark leather and in a manner peculiar to the binding of Corvinus manuscripts. Some of the codices were given a red, blue, green or lilac silk or velvet cover, the mountings and clasps adorned with silver-gilt and enameled coat of arms. The engraving of these volumes is also characteristic: colorful floral motifs and gold plating of this kind cannot be seen anywhere else in the world. The binding of every single volume was individually planned with great diversification, each being a unique work of art. Only those are regarded genuine Corvinus codices that have the portrait of King Mátyás I (Matthias Corvinus, 1458-1490) or his wife Beatrix, their coat-of-arms

with the raven or their individual symbols (beehive, barrel, etc.). – B: 1150, 1231, T: 7659.→**Corvina; Codex Literature.**

**Corvinus Library** (Hamilton, Ontario, Canada) – A collection of English-language books and CD-s on Hungarian history, culture and heritage, founded by Szabolcs Magyaródy, who, at present, is also its president. The library has been operating for decades under the auspices of the Hunyadi Veteran Scouts Cooperative, Hamilton, Ontario, Canada. Its aim is to improve the image of Hungary throughout the English-speaking world, since there are regrettably few books available on Hungary, which are fair and objective. The Library has also been distributing thousands of books and CD-s on the above subjects to the libraries of universities, research institutes, media and government departments. More recently, in addition to English, books have been published also in Romanian, Serbian, Slovakian and Ukrainian. <http://www.hungarianhistory.com> – B: 2037, T: 7456.→**Magyaródy, Szabolcs.**

**Costa, Rica, Hungarians in** – There is a small Hungarian cluster in Costa Rica. Hungarians moved to this country from various parts of historic Hungary at different times. However, a common culture and language ties them together. This is why they established the *Hungarian Costa Rican Friendly Society (Magyar-Costa Ricai Baráti Társaság)* in the capital city of San José in April 1992. Its aim is to foster ties between Hungary and Costa Rica and to promote harmony between Costa Ricans and Hungarians living in the country. Not only Hungarians belong to the Society, but native Costa Ricans as well, usually family members, many of whom speak Hungarian because they were educated in Hungary. Since the Hungarian Embassy closed down in 1994, the Society holds the Hungarians together. There has been an honorary Hungarian Consul in the country since 1988. The main activities of the Society include organizing programs for the great festivals, such as Christmas and Easter; organizing Hungarian ethnographic exhibitions in cultural centers, literary lectures at the University, and inviting folk-dancers and music ensembles from Hungary. There is a demand for teaching Hungarian language to the new generation. The Society has a library, organizes film screenings, poetry recitals, and issues a quarterly newsletter. – B: 1380, T: 7103.

**Cottonwool** – Hairy fibre of the seed of the plant *Gossypium*, used as stuffing material for lining or cushioning, or for surgical purposes. French physician of Hungarian origin Dávid Gruby (1809-1898) (physician of e.g. A. Dumas, F. Chopin, H. Balzac, H. Heine) used for lining or cushioning. Physician Dávid Gruby used it first in 1859 as bandages for dressing wounds. Later Francois Marine Guerin, a French surgeon used cotton bandages during the French-Prussian war in 1870-1871; but the German physician Victor Bruns perfected it. – B: 0883, 1031, T: 7660.→**Gruby, David.**

**Council of Free Churches of Hungary** (*Magyarországi Szabadegyházak Tanácsa, SZET*) – A co-ordinative organization for the services of small churches. It was not to interfere or influence theology, doctrine, or worship and ceremonies of the member churches. Each of them was independent and elected its own leadership. The Council was established in 1944 under the name of *Alliance of Free Churches (Szabadegyházak Szövetsége)*. The State Office for Church Affairs endorsed its charter in 1980. In 1984, the Council had the following member churches *Congregation of the Living God (Élő*

*Isten Gyülekezete*), *Evangelical Pentecostal Community (Evangéliumi Pünkösdi Közösség)*, *Seventh Day Adventist Church (Hetedik Napi Adventista Egyház)*, *God's Church (Isten Egyháza)*, *Baptist Church of Hungary (Magyarországi Baptista Egyház)*, *Hungarian Christian Sister-Congregations (Magyarországi Keresztyén Testvérgyülekezetek)*, *Methodist Church in Hungary (Magyarországi Methodista Egyház)*, *Ancient Christian Apostolic Church (Őskeresztyén Apostoli Egyház)*, *Free-Christian Congregation (Szabadkeresztyén Gyülekezet)*. In 1981 the *Christ-Believer Nazarenes (Krisztusban Hívó Nazarénusok)* joined the Council. The state in the Communist era tried to use the Council for controlling the free churches. The Council was dissolved in 1990 after the political change in Hungary. – B: 0910, T: 7103.

**Council (Soviet) Republic of Hungary** – Name of the political regime in Hungary between March 21 and August 1, 1919. The failure of Count Mihály (Michael) Károlyi's Government to deal with the problems of the lost war and the dissolution of the Austro-Hungarian Empire, especially the Entente's territorial demands outlined by French General Vix's Ultimatum, brought about its formation. Károlyi resigned after six months in power, in favor of the young Hungarian Communist Party, in order to deal with the difficult matters. The Party was organized in a Moscow hotel with a group of Hungarian prisoners of war and sympathizers, on November 4, 1918. Its leader, Béla Kun, dispatched party-members to Hungary to recruit new members and propagate the Party's ideas. By February 1919, the party members numbered 30,000 to 40,000, including many unemployed ex-soldiers and young intellectuals. Kun was soon imprisoned for incitement against the Károlyi Government; but he emerged from jail and the "People's Commissars" proclaimed the Hungarian Soviet Republic on March 21, 1919. The Communists guaranteed, among other rights, freedom of speech and assembly, free education and language and cultural rights to minorities. On June 25, Kun's Government proclaimed a dictatorship of the proletariat, nationalized industrial and commercial enterprises, and socialized housing, transport, banking, medicine, cultural institutions and all landholdings of more than 40.5 hectares; they also promised to restore Hungary's borders. Kun hoped that Lenin would intervene on Hungary's behalf. In order to secure its rule, the Communist Government resorted to arbitrary violence. Revolutionary tribunals ordered about 590 executions, including some for "crimes against the Revolution." Severe atrocities were committed against civilians by Red terrorist groups including the notorious *Lenin Boys (Lenin fiúk)*. The government also used "red terror" to expropriate grain from peasants. This violence and the regime's moves against the clergy shocked most Hungarians. In late May, the Hungarian Red Army marched northward and reoccupied part of Northern Hungary (*Felvidék*, now Slovakia) from the occupying Czech army. However, Kun withdrew his troops when the French threatened to intervene. Consequently, he lost his popular support. Kun then unsuccessfully turned the Hungarian Red Army against the Romanians, who broke through Hungarian lines on 30 July, occupying eastern Hungary, including Budapest, which they looted. Finally, Kun's Soviet Republic disintegrated on 1 August 1919. Kun and his comrades fled by train first to Vienna; but Kun moved on to Soviet Russia, where he was executed during Stalin's purge of foreign Communists, in the late 1930s. – B: 1398, T: 7103. → **Soviet Republic in Hungary; Károlyi, Count Mihály; Kun, Béla; Samuely, Tibor; Lenin Boys in Hungary; Prónay, Pál, Ragged Guard; Hungary, History of.**

**Counter-Revolution** – A movement to oppose a victorious revolution, its government and institutions in order to uphold or restore the previous regime. Recent history is replete with examples such as the French Revolution with the revolt in Lyons, Marseille, Toulon, but especially with the one in Vendee in 1793, whose simple folk took to arms in defense of religion, church and royalty. The monarchist counter-revolution in 1911 in Portugal was similar. In the Soviet Union attempts at reversing the consolidation of Communist power were made by Kolchak Denikin and Yudenich; but their efforts were in vain without financial aid and cooperation among them, as well as the indifference of the Western Powers. The Communists similarly suppressed an attempted counter-revolutionary uprising by members of the Ludovika Military Academy in Budapest on 24 October 1919. – B: 1078, 0942, T: 7661.→**Ludovika Royal Hungarian Military Academy, Insurrection of the Officers.**

**Counter-Revolutionary Committee** – After the Communist revolutionary take-over of Hungary, a Counter-Revolutionary Committee was organized in Vienna, in April 1919. Recognizing the danger of revolutionary activities spreading to neighboring countries, it submitted a Memorandum to the Entente Powers. Their work bore fruit and, on 11 May 1919, the Counter-Revolutionary Government was organized under Count Gyula (Julius) Károlyi in Arad (in Transylvania, now Romania) that set about organizing a national army. Archduke Joseph appointed Admiral Miklós (Nicholas) Horthy leader of the National Army in Szeged; and with his troops Horthy marched into Budapest on 16 November 1919. Horthy found the country devastated, not only by the war, but also by 133 days of Communist terror and the disastrous Romanian invasion. Horthy ruled as Regent for 25 years over Hungary, truncated by the Versailles-Trianon Peace Treaty in 1920. – B: 1078, T: 7661.→**Horthy, Miklós; Trianon Peace Treaty.**

**Crane** (*Darú*) – One of the wild birds highly esteemed by Hungarians. There are written instructions from the 16th century about keeping tamed *darus* and *daru*-keepers in the manor houses of noblemen. In the early 1900s tamed *darus* were still kept in farmyards as pets. Their behavior forecast the weather; their loud shrieks announced the presence of strangers. Folklore kept alive the memory of how tame flocks of *darus* on the walls of fortresses announced the arrival of the marauding enemy. In cultures of the East and elsewhere, the *daru* is the symbol of long life and alertness. At the time of the great flood at Deucalion (ca. 1460 BC), Zeus's son, Megaros was saved by the alertness of *darus*. (Deucalion is parallel to Biblical Noah and to Utnapishtim, the survivor of the Sumerian flood that is told in the Epic of Gilgamesh.) With their regular migration these birds became the heralds of gods and protectors of wayfarers. According to tradition, the wedge-shaped formation of flying *darus* inspired Hermes to create letters of the same shape. Christianity regarded *darus* as symbols of faithfulness, alertness, virtuousness and monastic life. According to Otto Herman, the renowned Hungarian ornithologist, the *daru* was highly esteemed by old Hungarians and used often as a heraldic bird. Its beautiful feathers, cost as much as a calf, were worn on the caps of noblemen and later by young farmers. – B: 1134, T: 7680.→**Herman, Ottó; Sumerians.**

**Craniometer** – An instrument used in anthropology for measuring skulls. Aurél Török (Ponori Thewrewk) designed it at the end of the 19th century. It is used worldwide. – B: 0883, T: 7674.→**Török, Aurél.**

**Crank Case** – The serial manufacturing of Bánki-Csonka's engines was initiated in the Ganz factory in Hungary, in 1893. These engines had a closed crankcase and side roll. With the use of valves, designers of crank case preceeded even Otto, the inventor of "Otto motors". Bánki and Csonka were the first to adopt the asymmetric crankcase of the Westinghouse steam engines for the design of internal combustion engines. Application of this design became worldwide. – B: 1226, T: 7662.→**Bánki, Donát, Csonka, János.**

**Croat-Hungarian Compromise** – Compromise that followed the Austro-Hungarian agreement between the Andrassy government and the unionist (pro-Hungarian) majority of the Croat Diet in 1868. It was agreed upon by the Hungarian governing class, the Croat aristocracy and the Roman Catholic Church leaders and was accepted by the Croat National Party in 1873. The Compromise stated: "Hungary, Croatia and Dalmatia constitute one common state". The matters concerning the city of Fiume (now Rijeka, Croatia) and Dalmatia were left pending. The Compromise was valid until 1918. – B: 1138, T: 7677.→**Compromise of 1867.**

**Croatia** – During the 6-7th centuries AD, Slavic tribes settled between the Drava and Sava rivers, and they were in constant conflict with the Byzantine Empire, with the Bavarian princes, and the Longobards. At the end of the 8th century, Charles the Great (Charlemagne) annexed the newly formed Croat principality to the Frank Empire. The Croat tribes adopted the western form of Christianity and the Latin alphabet. The Croat kingdom, formed in the 10th century, started to decline in the 11th as a result of factionalism. Venice took advantage of the situation and seized the cities in Dalmatia with the exception of Fiume (now Rijeka, Croatia). Queen Ilona (Helena), widow of the Croat king was the sister of the Hungarian King László I (St Ladislav, 1077-1095). In order to prevent Croatia falling into chaos, she requested King László to extend his rule over Croatia in 1091. By taking the major Dalmatian cities, King Kálmán (Coloman, 1095-1116) completed the unification of Croatia and Hungary. The Croat nobles crowned Kálmán as their King in 1102. The government created the new provinces of Kőrös, Varsad and Zágráb within the Transdanubian section of Croatia (Slavonia in the Middle-Ages) and gave self-rule to Croatia-Dalmatia. The country was devastated by the Mongol-Tatars in 1242. After prolonged hostilities, Venice conquered the Dalmatian cities in the early 15th century. Toward the end of the 15th century, Croatia was attacked by the Turks and overpowered by them in the 16th. Hoping for a strong alliance against the Turks, the Croat nobles crowned King Ferdinand I (1526-1564); but their disillusionment with the Habsburgs brought them closer to the Hungarians, also opposing the Habsburgs and fighting the Ottoman Turks. Several families of the Croat aristocracy have partially assimilated into Hungarian society and distinguished themselves in fighting the Turks (Zrinyi, Frangepán, Draskovich, Batthyány). After the Turkish defeat began in 1686, a defensive border zone was created; and in 1745, Empress Maria Theresa annexed the territory to Croatia and established the provinces of Pozsega, Szerém and Verőce (all Hungarian counties). In 1779, Fiume (now Rijeka, Croatia) was ceded to Hungary as a separate entity. The Croat and Hungarian positions

regarding the politics of Emperor Joseph II were similar: both accepted that as of 1790, Croatia was placed under the jurisdiction of the Hungarian Governing Council. Nationalistic consciousness increased in the first half of the 19th century, encouraging the unification of the Southern Slavs. Fearing a revolution, the Croat government tentatively endorsed Jelacić, the nominee of the Austrian Court and, with his support, fought against the Hungarian Revolution and War of Independence (1848-1849). Emperor Franz Joseph separated Croatia from Hungary in his Olmütz Declaration. Between 1849 and 1867, the country also fought against absolutism that resulted in the unpopular Croat-Hungarian Compromise. They wanted equal status, tripartite with Austria and Hungary. In July 1917, the Declaration of Corfu announced the birth of a Southern Slav state; and in 1918, the Kingdom of Serbia-Slovenia-Croatia was formed, and took the name of Yugoslavia in 1929. It was occupied by Germany in 1941, and was placed under German-Italian protection with Ante Pavelic as leader, and declared the State of Independent Croatia. It became an Allied Republic within Yugoslavia in 1945. The deteriorating alliance culminated in an armed conflict in 1991, resulting in UN intervention and separation. The new Croatia declared its independence from Yugoslavia in 1991. It took four years of sporadic, but often bitter fighting before the occupying Serb army was cleared from Croatian territory. Under UN supervision, the last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998. In 2003, Croatia voted in favor of joining the European Union. – B: 1134, 1138, 1153, T: 7677.→**Most of the persons in the article have their own entry under their name.**

**Croatia-Slavonia** – The Hungarian Crown Territory of Croatia and Slavonia. It was the result of the 1868 Croat-Hungarian Compromise. Their united coat-of-arms was topped by the Holy Crown of Hungary until 1918. Today they are independent states. – B: 1078, T: 7677.

**Crown, Doctrine of the Holy** – Doctrine of the Holy Crown (*Corona Sacra*) is unique in the depth of its legal system and comprehensiveness in Hungary. Although similar legal views can be found in several European states, nowhere else is there such a legal system associated with a crown. The essence of the Doctrine is that instead of the king, the Holy Crown is the source of power. Kings rule, decree and issue orders by the authority of the Holy Crown.

The evolution of this doctrine probably began with the reign of King Kálmán (Coloman the Beauclerc, 1095-1116). He commissioned Bishop Hartvik of Győr to write the life story of King St. István I (St Stephen, 997-1038), the founding father of the Christian Hungarian state. One of the St. István legends was based on it. The veneration of St. István gathered strength during the reign of Kálmán, and possibly the final fashioning of the Holy Crown's construction may also be linked to King Kálmán's name.

In the wake of King Kálmán's reign, the Holy Crown was not only revered as a sacred royal symbol, but also a mythical *person* put above the royal power, unique in itself, to whom the entire realm owes allegiance. This is how this sacred relic developed into a spiritual power over everything, even over the king.

During the 13th century, following the end of the Árpád Dynasty, the Holy Crown was conceived of as the property and heritage of the king, a person appointed by God; its possession implied transmission of the sacral properties of the Crown onto his descendants. The importance of being crowned with the Holy Crown started with King

St. István, and its role in constitutional law was well demonstrated by a passage from a letter written by King András III (Endre, Andrew, 1290-1301) to Bishop Theodor of Fehérvár: “The enemies of our coronation and reign were first secretly, then openly scheming against our ascension to the throne by withholding the Crown of the divine monarch so as to render questionable the prestige of our reign and the welfare of the people of the realm”. Along these lines, the exclusiveness of the property of the Holy Crown, the faith in the power of preserving the kingdom and the land was becoming embedded in the psyche of the Hungarian historical consciousness and the legal system.

In the 15th century, the doctrine already had a legal form. When the barons of the land clashed with King Zsigmond (Sigismund of Luxemburg, 1387-1437) and they themselves took over the exercise of royal power, they were able to do it by the constitutional authority of the Holy Crown. On this basis the Crown was made the executor of power in place of the king. They were taking measures by the authority of the Crown.

About a century later István (Stephen) Werbőczy included the Holy Crown Doctrine in his famous “Triple Book” (*Tripartitum, Hármaskönyv*, Vienna, 1517). According to him, the source of power is vested in the Crown and not in the reigning king. The Holy Crown is the “body” of the nation; the members are the lords, prelates, barons, noblemen, and the crowned ruler. From this power, the serfs and the early urban population were excluded, though they formed the majority of the nation. Conferral of titles of nobility and endowment of properties were the right of the Crown not the prerogative of the king. Transylvania, the partner-kingdom of Croatia, and the annexed provinces of Dalmatia and Slavonia were lands of the Holy Crown. In case of forfeiture of property, it reverted to the Crown and only the king had the right to pass on such properties, as the rights of the Holy Crown had been transferred onto him through his coronation.

Péter Révay’s memorandum “*Commentarius De Sacra Regni Hungariae Corona*” (*Explanation of the Holy Crown of the Kingdom of Hungary*) was published in 1613. In this work, as well as in a later work, the “On the Hungarian State and the Hungarian Holy Crown”, he put into words the Doctrine of the Holy Crown in an exalted style. He called it the law of laws.

The theory of the Doctrine has survived unchanged within the Kingdom of Hungary up to recent times. It still existed in the years between World Wars I and II under the Regent representing a king. After World War II, the Hungarian Kingdom, as a constitutional entity, ceased to exist. After the war, the crown was locked up for more than 30 years in the vaults of the Treasury of the USA at Fort Knox, Kentucky, and only returned in 1978. It was displayed in the National Museum for the following 22 years. However, the veneration of the Holy Crown, its constitutional standing and dignity did not lose anything from its abstract glow and content. For the people of Hungary the Holy Crown remains the heritage of the first state-forming monarch, St. István I (St Stephen) as long as Hungarians live in the Carpathian Basin. Since 2000, the Holy Crown is kept in Budapest on the banks of the Danube in the Hungarian Parliament Building (held in state below the cupola). – B: 1238, 1231, 1020, T: 7456. → **Holy Crown Doctrine.**

**Crown Lands** – In some countries lands, having considerable political independence and autonomy are called Crown Lands. Horváth-Szlavónia (Croat-Slovenia) and Dalmácia (Dalmacia) were Hungary’s Crown lands, i.e. territories of the Hungarian Holy Crown. – B: 0942, T: 3240.

**Crowning Mound** (King's Hill) – A man-made small hill of soil originating from different areas of the country, symbolizing the historical standing of provinces, counties and cities. It usually has three sides or three ramps epitomizing the power over the clans or the provinces. In Hungary, following the crowning ceremony the king, in his ceremonial attire rides at full speed to the top of the mound, cutting to the four cardinal directions with King István I's (St Stephen's) sword as a sign that, as the ruler, he will defend his territory from attacks coming from any direction. – B: 1078, T: 3240.→**Holy Crown, Hungarian.**

**Crowning Oath**→**Coronation Oath.**

**Crowning of a Hungarian king** – The validity of crowning of the Hungarian king depended (1) on the crown used; it had to be the “Hungarian Holy Crown”, the crown of King István I (St Stephen, 997-1038) the first Christian king of Hungary. (2) The customary location of crowning was Székesfehérvár. (3) The exact application of rules as the order of crowning called ‘*ordo*’ had to be observed. Prior to anointing the king, a lay nobleman led the ceremony and asked the people present three times whether they wanted the chosen one to be king. The usual answer was yes. – B: 1233, T: 7103.→**Holy Crown, Hungarian.**

**Csaba** – An ancient Hungarian personal name. Its variants are Ernák/Irnák, Chaba, Choba, Ceba and Soba. Its origin is rooted in the Csaba legend, according to which Csaba (Irnák) was the youngest son of Attila the Hun. Its first written form is in the Charter of the Pannonhalma Abbey, where a certain Caba is among the witnesses. – B: 0942, T: 7103.→**Csaba, Legend of Prince; Pannonhalma Abbey.**

**Csaba, Gyula** (Julius) (1882-1945) – Lutheran pastor, martyr. He completed his secondary education at the Lutheran High School of Békéscsaba. After studying Theology, he became pastor at Péteri in County Pest. On the night of 1st May 1945, he was abducted from his home and his family never saw him again dead or alive. Historical research later discovered that he was one of the victims of the so-called “Gyömrő killings” in a village near Budapest and tied to the activity of the leftist National Committee that came into existence after the Soviet occupation of Hungary in 1945. Rev. Csaba was killed with extreme cruelty. He was tortured, and nailed onto a cross. When he pleaded for mercy, his torturers replied: “Now you go to your God” and killed him. In 2006, a commemorative plaque was placed on the wall of the Lutheran High School of Békéscsaba. There is a documentary film on the “Gyömrő Killings”. – B: 1507, T: 7103.

**Csaba, László** (Ladislav) (Budapest, 27 March 1954 - ) – Economist. He graduated from the Budapest University of Economics (BUES) in 1976. From 1976 to 1987 he was associated with the Institute for World Economy of the Hungarian Academy of Sciences, finally as a senior fellow. He earned his second MA in 1978 and his Ph.D in 1984 at the Hungarian Academy of Sciences. From 1988 to 2000 he was BUES associated with Kopint-Datorg Economic Research. In 1996 he earned a professorial degree (D.Sc) at the Hungarian Academy of Sciences. In 1997 he earned an additional doctoral degree from the BUES (now Corvinus University). From July 1997 he was Professor of Comparative Economics at the same institution. From 1991 to 1997 he was Honorary Professor of International Economics at the College of Foreign Trade, Budapest. From 1990 to 1994,

and from 1996 to 1998, he was Vice President, in 1999 and 2000 President of the European Association for Comparative Economic Studies. From 1997 he was appointed a regular professor at Budapest Corvinus University, Department of Comparative Economics. Since 1999 he has been Professor of Economics at the University of Debrecen; and was in that year the founder of its Ph.D. program. In July 2000 he joined the Central European University (CEU), Budapest, as a professor of International Political Economy and its Department of International Relations and European Studies. From 2002 to 2006 he chaired the doctoral subprogram; and since 2004, he is a member of the Ph.D. program in Economics at CEU. He was a visiting professor at the private Bocconi University of Milan, Italy (1991), at the University of Helsinki, Finland (1993), the Europa Universitaet Viadina of Frankfurt-an-der-Oder, Germany (1997), and the Free University of Berlin (1998-2000). In 2007 he was elected a corresponding member of the Hungarian Academy of Sciences. He is a member of a number of domestic and international scientific societies and boards of academic journals. He published over 200 articles and chapters in academic volumes in 22 countries, which drew independent citations of over one thousand in academic books and scholarly journals. He published 9 books, 5 edited volumes, and over 200 articles and chapters in books, which received over 1300 citations. His books include *Eastern Europe in the World Economy* (1990); *The Capitalist Revolution in Eastern Europe* (1994); *The New Political Economy of Emerging Europe* (2005), and *Crisis in Economics - Studies in European Political Economy* (2009). His awards include the Prize of the Ministry for Foreign Economic Relations (1994), the Bezerédi Foundation for Europe (2003), the Popovics Best Economist Prize of the National Bank of Hungary (2004), and the Grand Prize of the Academy Publisher (2005). Professor Csaba is an acclaimed Hungarian economist of the younger generation. – B: 0874, 1031, 2109, T: 7103.

**Csaba, Legend of Prince** – Part of the Hun-Hungarian-Szekler legend cycle. Attila died suddenly in 453 without naming his successor. After his burial, Hun leaders could not agree on Attila's successor and a war broke out among the Huns. The Gepids seized the opportunity, occupied the Hun capital, and expropriated Attila's treasury. They forced the Huns to withdraw from the territory. According to Szekler legends, the 15,000 surviving Huns, following the disastrous battle of Sicambria (Óbuda) under the leadership of Prince Csaba (Ernák/Irnák), the favorite son of Attila, fled to Csaba's grandfather in Byzantium. However, a fragment of his people, some 3000 men, ran to the Csigle meadow in Transylvania's mountains, and are considered to be the ancestors of the Szeklers (*Székelys*), who are still living there (under Romanian rule since 1920). After spending a few years in Byzantium, Prince Csaba took the main body of Huns back to Scythia, where the Hun people were living, and he joined the ancestors of the Hungarian Szeklers. In difficult times, they are still hoping that Prince Csaba will return to save them from perils with his legendary army "on the path of the stars" (Milky Way). This belief is also the theme of the Szekler (Székely) Anthem. – B: 0942, T: 7103.→**Attila; Csaba; Irnik; Path of the Armies.**

**Csajághy, György József** (George Joseph) (Pécs 24 July 1950 - ) - Musician, researcher of folk music. He studied clarinet at the Ferenc (Franz) Liszt Academy of Music in Pécs and graduated in 1972. He has performed at the Pécs National Theater as member of the Philharmonic Orchestra (clarinet, bass-clarinet and oboe). He has taught music in

the music schools of County Baranya. Besides classical music, he is also a soloist in different wind and folk music ensembles, performing on the clarinet, saxophone and oboe. He has participated in several tours with different groups as a soloist in Austria, Bulgaria, France, Yugoslavia, Poland, Germany, etc. He has been a Professor of Music since 1979; he also completed his studies at the Department of History at the School of Philosophy of the University of Pécs. Csajághy is interested in folk music and research into Hungarian ancient history. He has been studying the literature of folk music, ethnography, Oriental studies, history, archaeology and anthropology of different regions. His field of interest includes the tunes and musical instruments of the early equestrian peoples of Central- and Inner-Asian. He is also studying the musical instruments of the Huns, Avars and the various Turkic peoples, and the music of the Finno-Ugric peoples in connection with the Magyar (musical) folklore, and thereby their ancient history. Since 1993, he has frequently delivered lectures in Hungary and abroad. He publishes regularly, has lectured at conferences (some of them abroad), and has also organized similar programs. He has been invited to lecture at universities at home and abroad. His publications include five volumes and several articles on music-history. His CD entitled *Tárogatómuzsika (Shawm Music)* was published in 2000. He is a member of several scientific societies. In 1971 he received a special honor at the Siklós Castle Festival (*Várfesztivál*) as a clarinet soloist. In 2001 he was honored with the title of Knight of the Magyar Culture (*Magyar Kultúra Lovagja*). – B: 1935, T: 7690, 7103.

**Csajka** – Either (1) an armored river vessel or (2) a small riverboat or (3) a mess tin: an easy to clean light container for meals prepared under field conditions, a standard issue for soldiers, but also handy for tourists; or (4) large riverboat equipped with canon or mine thrower, used in the past for the defense of the river border of Austro-Hungary. The riverboats' headquarters were in the city of Titel, Hungary (now in Serbia). Their unit had battalion strength. During the Turkish invasion and occupation (1526-1686) they played a significant defense role; (5) primitive box-shaped river transport vessel mainly used for one-way trips. It was used to transport inexpensive materials and goods such as clay tiles. – B: 0942, T: 3233. → **Csajkás Region**.

**Csajkás Region** – Name of the Southern border district of Hungary, established by Empress Maria Theresa in 1763. It included the border district of Pétervárad, the center of which was in the city of Titel, Hungary (now in Serbia) of more than 34,000 inhabitants. Armed riverboats, *csajka*-s served as the defense along the Danube, Tisza and Dráva river border. This form of border defense ended in 1873. – B: 1078, T: 3233. → **Csajka**.

**Csák Clan** – Ancient Hungarian clan. According to 13th century Hungarian chronicler Simon Kézai, they originated from the leader Szabolcs, son of Előd of the settlement era. Namegiver of the clan was Csák, a landowner in the upper-northern part of County Fejér in Western Hungary, Transdanubia (*Dunántúl*), who built Csákvár at the foot of the Vértes Mountains. In the 13th century, the clan separated into several branches. The most distinguished member of this clan was Máté (Matthew) Csák. Their national coat of arms is the lion. – B: 1138, T: 7685. → **Csák, Máté; Kézai, Simon; Mátyusföld**.

**Csák, Gyula** (Julius) (Nyíregyháza, 12 January 1930 - ) – Writer, sociologist. The son of a single mother, he was raised by his grandparents at Püspökladány. He was a trade apprentice, lived and studied at the Csokonai College, Debrecen, while completing his commercial course. After 1945, he worked with the local secretary of the Peasant Party. Thereafter, he was a blacksmith' apprentice, a barber' apprentice, and a messenger boy in Budapest. Later he became a contributor to the *Transtibiscan People's Journal (Tiszántúli Néplap)* (1948-1950); worked for the journal *People's Army (Néphadsereg)* (1950-1953); was Editor of the *Free Land (Szabad Föld)* (1953-1957); a columnist of the literary review *Life and Literature (Élet és Irodalom)* (1956-1969), and a freelance writer (1969-1970). He worked as a foreign secretary at the *Hungarian Writers' Union (Magyar Írók Szövetsége)* (1976-1984); was Director of the *Hungarian Cultural and Information Center (Magyar Kulturális és Tájékoztató Központ)* (1984-1987). He authored more than 20 books, including *In Friendly Consensus (Baráti Egyetértésben)* (1957); *Deep-sea Current (Mélytengeri áramlás)* (1963); *Men on the Stone (Ember a kövön)* (1969); *Evergreen (Örökzöld)* (1975); *The Hunter (Vadász)* (1981); *Deep Well of our Emotions (Érzelmek mély kútja)*, (1984), and *Common Loneliness (Közös magány)* (1986). He is recipient of the Attila József Prize (1975) and the Lajos Nagy Prize (1991). – B: 0876, 0878, 1257, T: 7103.

**Csák, Ibolya** (Violet) (Mrs. Lajos Ládár) (Budapest, 6 January 1915 - Budapest, 10 February 2006) – Athlete. She competed for the *National Gymnastic Club (Nemzeti Torna Egylet)* (1929-1939); a gymnast (1929-1932) and an athlete (1932-1939). She won several competitions and became Olympic Champion in highjump at the Berlin Olympic Games in 1936. In 1938 she was European Champion in Vienna. She also performed well in long jump. She was called Queen of Hungarian Sport History. She received the Ferenc Csík Prize (2001). – B: 0874, 1178, T: 7213

**Csák, Máté** (Matthew) (ca 1250 - 18 March 1321) – Nobleman, oligarch. He first came into notice in 1292 when, acting on the order of King András III (Endre, Andrew, 1209-1301), he recaptured Castle Pozsony (now Bratislava, Slovakia) from the Kőszegi family. He was Palatine between 1293 and 1296. Then he established an independent province from his vast, landed properties, with Trencsén (now Trencin, Slovakia) as its capital and moved against the King in 1297. He exercised royal rights over his territory. He was excommunicated in 1311 for his attack on Buda, and succeeded holding the town of Visegrád for a short time. Despite losing the battle at Rozgony, he managed to maintain his power over the northwestern part of the country until his death. His followers were engaged in a resettlement program. His name survived in the name of Mátyusföld (now Mat'úšové žemé, Slovakia). – B: 0883, 1031, T: 7668.→**Csák Clan; Mátyusföld; Bajmóc.**

**Csákány** (*Cakan or Sakan*) – A recorder, the Hungarian version of the Western European flageolet (in France). The first data relating to it appeared in an advertisement, dated 13 August 1807. According to a concert program in Veszprém of 28 May 1816, its inventor is Anton Heberle, a resident of Pápa. According to Sachs, the *csakan* is a high A-flat recorder with 6 openings and one or more keys. Its use spread also to Austria. In Hungary János (John) Keresztély Hunyadi transcribed dance music to *csákáns*. Count István

(Stephen) Széchenyi played it even in Döbling, Austria. – B: 1197, T: 7684.→**Széchenyi, Count István.**

**Csákány, István** (Stephen) (Budapest, 5 January 1934 - Istanhaven, Brazil, 10 January 1977) – Minister of the Reformed Church, missionary and agricultural engineer. He studied at the Lónyai Street Reformed High School, Budapest, and at the Agricultural College, receiving his diploma in 1957. He also studied Theology at the Reformed Theological Academy, Budapest. In 1961, he was assistant minister in Seregélyes, Izsák, Pomáz, Fót and Érdliget, and Parish Minister in Érdliget in 1962. Then in 1970, the Reformed Church posted him to Kenya, East Africa, for missionary work. There he worked among the Massai herdsmen and taught them agriculture. He built a bamboo church and held services in Massai, Swahili and English. In 1972, he worked with lepers in Ethiopia. He returned to Hungary in 1973, and resumed pastoral work in Érdliget in 1974. In 1975, he was posted to Brazil for missionary work. He was inducted to the ministerial position of the Sao Paulo congregation. Besides ecumenical work, he served Hungarian communities as well. He drowned while rescuing youngsters from the ocean. – B: 1017, T: 7103.→**Brazil, Hungarians in; Apostol, János.**

**Csákányi, László** (Ladislav) (Zsigovits) (Németújvár now Güssing, Austria 13 January 1921 - Budapest, 3 November 2002) – Actor. His father sent him to a Catholic School, hoping that his son would become a missionary; but instead he became an actor. In 1939 he studied at the Academy of Dramatic Art, Budapest. He was conscripted into the army, fell into Soviet captivity and was a P.O.W. for four years. When he returned to Hungary in 1948, he became a member of the Pest Theater (*Pesti Színház*); then he worked at the Pioneer Theater (*Úttörő Színház*) and the Youth Theater (*Ifjúsági Színház*,) and from 1953 at the Operetta Theater (*Operett Színház*). After being a member of the Petőfi Theater (*Petőfi Színház*) (1956), the Comedy Theater (*Vígszínház*) (1963), and the Attila József Theater (*József Attila Színház*) from 1974, until his death he was member of the Gaiety Stage (*Vidám Színpad*). He was an outstanding actor, excellent both in dramatic and comedy roles. His major film-roles include *Photo Haber* (1963); *The Heir* (*Az örökös*) (1969); *There is Time* (*Van Idő*) (1985); *Good evening, Mr. Wallenberg* (1990), and *We Never Die* (*Sose halunk meg*) (1993). His voice-over roles in cartoons were also memorable, such as in Foxi-Maxi and Fred in *Flinstones*. He received the Mari Jászai Prize (1959) and the titles of Merited Artist (1979) and Outstanding Artist (1984). – B: 1439, 1445, 1105, T: 7103.

**Csáktornyai, Mátyás** (Matthias) (16th century) – Protestant preacher and author of romantic literature in Transylvania (*Erdély*, now in Romania). He translated the Trojan Legend to his readers based on Ovid's original in the instructional poem: *A Grobián verseinek magyar énekbe való fordítása* talking about well-mannered behavior in satirical form. – B: 1150, T: 7659.

**Csáky, Count István** (Stephen) (Uncsukfalva, Transylvania, now Unciuc, Romania, 18 July, 1894 - Budapest, 27 January 1941) – Diplomat. He completed his consular studies in Vienna and completed his law studies in Budapest. As foreign ministry delegate, he was present in 1920 at the Peace Conference in Versailles-Trianon following World War I. After different foreign diplomatic posts, as the Foreign Ministry's delegate, was again

present as observer at the Four-Power negotiations in München in 1938, then at the First Vienna Award (1 November 1938, when the Hungarian inhabited southern part of Slovakia was returned to Hungary). From 10 December 1938, he was Minister of Foreign Affairs. He took part in the decision-making that tied Hungary to the Anticomintern Pact on 13 January 1939; the preparations for the Second Vienna Award (on 30 August 1940, when northern Transylvania with a majority of Hungarian population was returned to Hungary from Romania) and Hungary joining in the Tri-partite Agreement on 20 November 1940. On 21 November 1940, he signed the Friendship Treaty between Hungary and Yugoslavia in Belgrade. He tried to hammer out a neutral but strong Polish-Hungarian-Yugoslav military block. The circumstances of his untimely death are not clear. – B: 0883, 1518, T: 7668.→**Vienna Award I; Vienna Award II; Teleki, Count Pál.**

**Csáky, József** (Joseph) (Szeged, 18 March 1888 - Paris, France, 1 May 1971) – Sculptor. He studied with Lajos (Louis) Mátrai in 1906, then worked at the studio of László (Ladislav) Kimnach and at the Zsolnay factory, Pécs. He arrived in Paris in 1908, where he barely survived on a scholarship; later he studied in private Academies. In 1913 he was a contributor to the literary journal *Montjoie* and joined the circle of Stravinsky, Apollinaire, Picasso and Cendrars. In 1913-1914 he visited New York and Buffalo, USA. During World War I he fought in the French army; during World War II he joined the Resistance movement and became member of the Communist Party. After 1918 he became a well-known artist and had a number of exhibitions: London (1930), New York (1931), Paris (1935), Budapest (1936, 1959). He became a French citizen. He designed the Rákóczi memorial in Grosbois, France in 1937. In his art, after the initial naturalistic style, he adopted Cubism. His works include *Standing Woman (Álló nő)* (1913); *Head (Fej)* (1914), and *Abstract Sculpture (Absztrakt szobor)* (1919). Most of his works are in private collections. The Museum of Fine Arts, Budapest, has five of his creations. – B: 0883, 1122, T: 7103.

**Csáky, Pál** (Paul) (Ipolyság, now Šahy in Slovakia, 21 March 1956 - ) – Politician, chemical engineer. Between 1975 and 1980 he studied at the University of Chemical Sciences, Pardubice, Czech Republic. Between 1980 and 1990 he was a chemical technologist, later technologist in charge of textile works at Léva (now Levice, Slovakia). Since 1990, he has been a Member of Parliament; and since 1994 he has been section leader of the Hungarian Christian Democratic Movement. In 1998, he became Vice-President of the Hungarian Coalition Party (*Magyar Koalíció Pártja-MKP*) and Deputy Prime Minister of the Slovak Republic. After the 2006 elections, the MKP withdrew in opposition, and he became its leader in 2007. After the MKP lost the 2010 election too, he resigned as its president. His works include *Book of Recollections (Emlékek könyve)* novel, (1992); *As a Hungarian in Slovakia (Magyarként Szlovákiában)* (1994), and *Between Two Worlds (Két világ között)*, political essays (1998). – B: 0874, T: 7456.→**Bugár, Béla (2).**

**Csáky's Straw** – A popular expression, meaning unclaimed property in nobody's care. According to old lore, Lord Chief Justice Count László (Ladislav) Csáky, as a gesture of generosity, allowed the people living around his estate in Léva (now Levice, Slovakia) to

take as much straw as they wanted for their own use resulting in complete disappearance of his crop. – B: 1078, T: 3240.→**Csáky Clan.**

**Csallány, Dezső** (Desider) (Szentes, 10 November 1903 - Nyíregyháza, 31 March 1977) – Archeologist, museum director. In 1932, he obtained a Law Degree at the University of Budapest. In 1933, he graduated from the Archaeological Department of the University of Budapest, and obtained a Ph.D. Then he served as a trainee at the National Museum and at the Ethnographic Museum in Budapest, and was on a scholarship at the *Naturhistorisches Museum* in Vienna. In 1936, he became an employee of the Somogyi Library, as well as that of the City Museum in Szeged, of which he became director in the same year. During World War II, he was conscripted into the army, served on the Russian front, and was taken prisoner. After his return, the post-war Szeged City Council put him on the political B-list and he lost his position. Until 1954, he worked at various other jobs. Then, later in the year, he was reinstated in his former position, and he organized the Avar deposits of Central Europe, and prepared their full list. From 1954 to 1972 until his retirement, he was Director of the András Jósa Museum of Nyíregyháza, where he was the founding editor of its *Yearbook* (1958). He processed many finds of the Hungarian Conquest Period and published them in the columns of the *Acta Archaeologica* in the 1960s. He published the finding list of the Avar period of County Szabolcs-Szatmár in the Museum Yearbook (1960). His works include *Archäologische Denkmäler der Awarenzeit in Mitteleuropa. Schrifttum und Fundorte (Archeological Memories of the Avar Period in Central Europe. Description and Finding Places)* (Budapest, 1956); *András (Andrew) Jósa (1834-1918) Literary Works (Jósa András [1834–1918] irodalmi munkássága)*, compilation (Budapest, 1958); *The Mementos of the Szekler-Magyar Runic Script (A székely-magyar rovásírás emlékei)* in the András Jósa Museum Yearbook (1960); *Our Byzantine Connections in the Migration-Conquest Period (Népvándorlás-honfoglaláskori bizánci kapcsolataink)* (Nyíregyháza, 1965), and *Avar Tribal Organization (Avar törzsszervezet)* (András Jósa Museum Yearbook, 1965-1966). – B: 0883, 1031, T: 7103.→**Bologna, Runic Staff Calendar; Hungarian Runic Script.**

**Csallóköz** (now Zitny ostrov, Slovakia) – The largest river island in Europe in the northwestern part of historic Hungary. The Versailles-Trianon Dictated Peace Treaty of 4 June 1920 ceded this Danube Island, entirely (100%) Hungarians inhabited, to Czechoslovakia without a plebiscite. Now it is part of the Slovak Republic. This area is the largest fertile island of the Danube, as the river enters the Carpathian Basin from the west. It is an area of 1885 km<sup>2</sup>, bordered on the south by the main river, while in the north by a side branch of the Danube. It extends from Pozsony (now Bratislava, Slovakia) in the west to Komárom (Komarno) on the east. The island has been settled entirely by Hungarians ever since they settled in the Carpathian Basin in 895-896. The ground water supply to this fertile land is greatly threatened by the artificial rechanneling of the Danube by the Slovakian Government. This project was initiated by the Warsaw Pact during the Communist era. Since the collapse of Communism, the Hungarian Government has abandoned this project; but the Slovakian Government is still actively pursuing this ecologically dangerous project. After the end of World War II, those Hungarians who declared their ties to Hungary were relocated to present (truncated)

Hungary in cattle cars by the Czechoslovakian authorities. Moravian settlers occupied their villages. – B: 1230, 1153, T: 4032.→**Trianon Peace Treaty; Paris Peace Treaty.**

**Csanád** (10/11th century) – A celebrated tribal leader according to Anonymus' 13th century *Gesta Hungarorum*. He was the son of a nobleman from Doboka, lord of the primeval forest region; his wife Karoldu (Kalotha's younger daughter), was related to King István I (St Stephen, 997-1038). The Gellért legend relates that at first he was Ajtony's supreme commander; but after falling out with him he joined the king, became a Christian and, commissioned by King István I, led a victorious campaign against Ajtony in 1028. He received all of Ajtony's vast estate, named it Csanád with Marosvárad (now in Romania) as its center and made him its lord lieutenant. – B: 0883, T: 7668.→**Ajtony; Csanád; István I (St Stephen) King; Gellért, Bishop Saint.**

**Csanád, Béla** (Akasztó, 9 November 1926 - Budapest, 25 November 1996) – Priest, poet, literary translator, publicist. He was a Roman Catholic priest and Professor of Practical Theology at the Roman Catholic Theological Academy, Budapest. János (John) Pilinszky's poetry influenced him. In his poetry he talked about the inner events of the human soul. Later he approached Christian mysticism. His works include *Fly Lark! (Pacsirta szállj!)* poems (1963); *Veronica's Veil (Veronika kendője)* poems (1977); *Windows of Cosmos (Kozmosz ablakai)* poems (1987), and *Christian Catechetics (Keresztény valláspedagógia)* (1996). He was the founding president of the *Association of Christian Intellectuals (Keresztény Értelmiségiek Szövetsége-KESZ)* in 1989. – B: 0876, 0878, T: 7103.→**Pilinszki, János, Christian Intellectuals, Association of.**

**Csanád Clan** – Tribal Leader Csanád, son of Doboka, was the ancestor of the Csanád Clan. He was the cousin of King István I (St Stephen, 997-1038)). The clan's ancestral properties, seized from Ajtony, were located in the region of the Maros, Tisza and Harangod Rivers. Their domicile and their burial site were in Oroszlánmonostor. This family has three main branches: the Bézi, Kajmáti and Telegdi branches. The Kanizsai, Makay and Telegdy families also originated from them. – B: 1343, T: 7685.→**Csanád.**

**Csanádi, Imre** (Emeric) (Zámoly, 10 January 1920 - Budapest, 23 February 1991) – Poet, writer, translator of literary works. He studied at the Györfly College of the University of Budapest. In World War II, he did military service on the Russian front, became a prisoner of war, returning to Hungary in 1948. He became a correspondent for the journals *Free Land (Szabad Föld)*, *Disseminator (Magvető)*, and *Free Youth (Szabad Ifjúság)*. From 1951 he worked as an Editor for the publishing firms *Literary Publisher (Szépirodalmi Könyvkiadó)* (from 1951), and *Magvető Publisher (Magvető Kiadó)* (from 1955). From 1960 to 1980 he was Editor-in-Chief for the weekly *New Mirror (Új Tükör)*. In his writings and poems he derives confidence for the present age from the old folk- and general cultural values. His volumes of poetry include *Forest Games; Heavenly Birds (Erdei vadak, égi madarak)* (1956); *On the Cart of Devils (Ördögök szekerén)* (1963); *Verses of Hungarian Reality, vols. i, ii (A magyar valóság versei, I-II)*(1966), and *Collected Poems (Összegyűjtött versek)*(1975). His honors include the Kossuth Prize (1975), Attila József Prize (1964, 1973), and the Book of the Year Reward (1990). – B: 1031, 1257, T: 7456.

**Csanád Legend** – The oldest version of this legend can be found in the 11th century Gellért Legend. According to it, King István I (St Stephen, 997-1038), gave the tribal leader Csanád the task of putting down the rebellious Ajtony. Before the battle, St. George appeared in Csanád's dream in the form of a lion, exhorting him to attack. He conquered Ajtony and, as a mark of his victory, cut out Ajtony's tongue. However, on his return to camp, he found that the Leader Gyula was celebrated in front of the king as victor, having offered the severed head of Ajtony to him. Csanád pointed out to the king that the tongue from the head was missing and then he showed it to the king. He built Oroszlánmonostor as a memorial to the victory and it became the hereditary burial place for his clan. – B: 1134, T: 7659. → **Ajtony; Csanád; Csanád Clan.**

**Csángó** (Plural: Csángós; Csángó Hungarians) – Collective designation for a detached sister group of the Hungarians, an ethnic fragment, composed of some 50 villages, with a population of about 240,000 east of the Eastern Carpathian Mountains, situated in Bukovina and Moldavia and a few villages in easternmost Transylvania. It is still a controversial question who the Csángós really are, because their identity is rather involved historically, ethnographically and linguistically.

Their first mention as a small Hungarian-related ethnic group dates from 1443. The earliest occurrence of the word *csángó* is found in a Transylvanian document dated 1553, in which, significantly, there are separate mentions of Moldavian Hungarians, Csángós and Szeklers. The first Hungarian group settled in Moldavia by King András (Andrew, Endre) II in 1225 (to replace the ousted Teutonic Knights), forms one of the oldest Csángó layers. They adopted Christianity and, in the middle of the 12th century, the Bishopric of Milkov was founded for the Csángó community by the Archbishop of Esztergom; this Hungarian bishopric was destroyed by the Tartars in the 13th century. In 1352, more Hungarian settlers arrived in the Seret River valley, after the Transylvanian *ispán*'s, Andrew Lackfi's forces drove out the Tartars from the area east of the Carpathians. The Moldavian Walachian (Romanian) state was first formed in the 14th century. In 1381, another Hungarian bishopric was created at Curtea de Argeş under the control of the Archbishop of Kalocsa. The flourishing Catholic life lasted until 1550. From the end of the 16th century the Csángó Catholics were cared for by the bishopric of Bákó (Bacau). During the reign of King Zsigmond (Sigismund of Luxembourg, 1387-1437) the Hungarian Hussites, fleeing from County Szerém in Southern Hungary, settled among the Moldavian Hungarians under the benevolent rule of the Moldavian Princes. Szeklers, escaping the brutality of the Transylvanian voivode István Báthori, also found home among the Moldavian Hungarians toward the end of the 16th century. The Ottoman Turkish rule of the 16th-17th centuries devastated the Csángó population. To this was added, in 1620, the appearance of Italian priests (speaking no Hungarian) to take care of the spiritual life of the Csángós, introducing Romanian (Wallachian) prayers and songs into Hungarian Catholic churches, thus starting the Romanianization process of the Hungarian population. By the end of the 17th century, Moldavia, as a distinct Principality, disappeared under Turkish rule. There was a brief Russian occupation of the area of Moldavia (1806-1812), and the Turkish rule ended only in the middle of the 19th century, with the reestablishment of the principality of Moldavia. By 1859, it had united with the Principality of Wallachia to form the new state of Romania, with the official policy of assimilating the Csángó minority. The state of Wallachia received the name

Roumania (now Romania) at the Berlin Conference in 1878, on the suggestion of the Foreign Minister of the Austro-Hungarian Monarchy Gyula (Julius) Andrassy, who was present.

The appellation “Csángó” has been considered to mean “wandering, vagrant, derived from the verb *csángál* = to wander, to live apart, implying their semi-nomadic way of life, in contrast to the bulk of Hungarians already living a fully settled life at the same time in the 13th century, more than three centuries after the Carpathian Basin conquest and may be represented by the *Hétfalusi Csángós* (the Seven Villagers). The name *Csángó* could also mean that the ancestors of the Csángó Hungarians had been a cut-away remnant from the main ethnic body of the Magyars (Hungarians) who migrated from their ancestral birthplace (*Urheimat*) westward. They might well have been the *Bukovinian* and *Moldavian* Csángó Hungarians, who did not move with the bulk of the Magyars, led by Árpád into the Carpathian Basin, but stayed behind in Moldavia. According to another theory the word *csángó* is derived from the word “csonk” (related to “csonka”), meaning stump or stud, also suggesting a remnant ethnic group. Yet another theory maintains that *csángó* is derived from the verb *csángat* (to sound alarm bells) suggesting their rear-guard role for the Hungarian state in the Carpathian Basin. Surprisingly, many of the Csángós think that they are the lineal heirs of the Hun conqueror Attila, hearkening back in their subconscious to their Asian connections, having in mind Avars, Cumanians, Oguz and Uyghurs.

The *Hétfalu Csángós* (the Seven Villagers), the smallest group of Csángós, live inside the Carpathian Basin, in the Szeklerland (in the easternmost corner of Transylvania). Their villages are Bácsfalu, Türkös, Csernátfalu, Hosszúfalu, Tatrang, Zajzon and Pürkerec. The kings of Hungary settled them there for frontier defense of the east of the realm in the 11th century. Their language is characterized by the use of *í* instead of *é* (ajándik); the suffix *-val, -vel* does not become assimilated to the consonant preceding it, as in *mosolyval* (instead of *mosollyal*); they articulate a *j*-sound (like in the English word *yet*) in front of the sounds *s* (sh in “show”), *sz* (s in “see”), *z* (as in “zeal”), and *zs* (as in “measure”), for example *mojsa, hojszú, ajzon, hájzsártos*. To this day the Hétfalu Csángós have kept their Hungarian identity and language. István Zajzoni Rab was their poet in the 19th century, writing Csángó verses.

The *Gyimes Csángós* live in the source area of the Tatros River and its upper tributaries. Their ancestors settled there from Transylvanian Szekler and Moldavian villages. There are three Hungarian-speaking villages in the Gyimes area: Gyimesbükk, Gyimesfelsőlok and Gyimesalsólok.

The *Moldavian Csángós* represent the oldest and most purely preserved group of the Csángós who, during the Carpathian conquest, might have been left outside, east of the Carpathian Basin, to defend the eastern frontier of Hungary. They form one of the ancestral ethnic groups of Moldavia: fragments of the Magyars left behind in Etelköz. Genetically they are identical with the Magyars of the settlement time. In their present form they have been living in the same area for at least 750 years, unique in Europe. On basis of dialect differences they consist of three groups: Northern, Southern and Szekler Moldavian Csángós.

The *Northern Moldavian Csángós* live in the confluence area of the Moldova and Seret Rivers, near Románvásár (Romania). They are the most archaic group, whose Hungarian mother tongue and Roman Catholic faith has been best preserved. Their dialect is eerily

reminiscent of the 13th century Hungarian language relic of the *Funeral Oration* or the *Lamentation of the Virgin Mary*. They speak in Old Hungarian to this day, preserving the 13th century vocabulary and grammar. They also use sibilant sounds in their speech, as in the *Hétfalu* dialect, saying *s* sound instead of *sh* and *ts* instead of *ch*. They live in the villages of Szabófalva, Újfalu, Kozmafalva, Kelgyeszt.

The *Southern Moldavian Csángós* live in the Romanian County Bákó, between the Seret and Tâztló Rivers, in the villages of Bogdánfalva, Gyoszény, Újfalu, Trunk and Nagypatak.

The *Szekler Csángós* are settled around the Aranyos, Beszterce and Tatros Rivers and in the valleys of the Uz and Ojtoz Rivers in the villages of Klézse, Lészped, Forrófalva, Diószeg, Pusztina, Magyarfalva, Külsőrekecsin, Lujzikalagor. This is the youngest (latest to arrive) of the three Moldavian groups.

The *Bukovinian Szeklers* do not consider themselves Csángós; they refer to themselves as Szeklers (Székelys). Many of them are descendants of those who fled to Bukovina after the massacre at Mádéfalva (the so-called *siculicidium*) on 7 January 1764, when several hundred unarmed Szeklers were killed by the Austrian army.

The *Catholic Csángó* population (240,000) lives encircled by a sea of Orthodox Christian Romanians (4.7 million) and their religion seems to unite them more than their Hungarian origin and identity. Their customs, their dress, their music and their archaic Hungarian language unmistakably point to a Hungarian origin. Their language is characterized by sibilance: the *sh* sound (like in *ship*) is pronounced as *s* sound (like in *sea*) and the *ch*-sound as *ts* sound (like in *tse-tse*). There is similarity with the Cumanian language. In fact there are linguists, who consider the Csángós as Magyarized Cumanians.

The 19th century Church documents mention 50 000 Hungarian Catholics in Moldavia. Early in the 20th century there were 90 000, of whom 60 000 spoke Hungarian, according to an estimate. But another source for the same period states 40 000 Csángós of who only about 18 000 could speak Hungarian as a result of the strong Romanianization policy.

According to the 2002 census, 120,000 Roman Catholics live in the County Bákó (Bacau) of Romania. They constitute 17% of the county's population, of which 4500 declared themselves Hungarians, and 847 stated their Csángó nationality. It is estimated that some 60,000 might still speak Hungarian in County Bákó. In the 2005/2006 school-year 1,187 pupils attended the Csángó Education program: 725 children studied in Hungarian schools, 369 children participated in non-compulsory extracurricular school programs. A scholarship supported the high school education of 93 pupils. During the time of the Groza government, from 1948-1953, many Csángó villages had Hungarian primary schools. However, until 1960, Hungarian secondary school existed only at Lészped. – B: 1068, 1078, 1134, 1582, 1754, T: 7103, 7456. → **Zsigmond King; Szeklers; Cumanians; Etelköz; Attila; Mádéfalva's Peril; Iancu Laura.**

**Csángó Literature** – related to or produced by the Hungarian Csángó ethnic group living east or west of the main divide of the Eastern Carpathians. Their settlements can be divided into four literary groups: (1) Moldavia (2) Bukovina (3) Barcaság (4) Gyimes.

(1) *The Csángó literature of Moldavia.* Over the last two centuries there has been an immense amount written about the origin, language, ethnography, growth of the population, as well as of the history of settlements of the Moldavian Csángós. Their historical, linguistic and ethnographic aspects are often closely interwoven. Between

1910 and 1936, Bálint (Valentine) Csúry was the most competent scholar of the Csángó dialect. From 1918 to the mid 1920s Árpád Bitay wrote many articles and essays on the subject in the *Transylvanian Literary Review (Erdélyi Irodalmi Szemle)*. In the mid 20th century, a large number of articles set out to present a clearer picture of the level of the history, ethnography and folk poetry of the Csángós. Among the historical appraisals, the best information available even today is the work of László (Ladislás) Mikecs' study: *Csángós Beyond the Carpathians, Linguistic Atlas (A Kárpáton túli Csángó magyarság, Nyelvatlasz)*. The most tenacious researcher of Csángó issues was Pál Péter Domonkos, whose outstanding work *I Wanted to Serve My Sweet Motherland (Édes hazámnak akartam szolgálni)* was published in 1979.

(2) *The Csángó Literature of Bukovina*. Péter Balla's collection of popular poetry of the Szekler-Csángó settlements in Bukovina is significant, as is Elemér Jancsó's series of articles documenting their history.

(3) *The Csángó Literature of Barcaság*. As far as the Csángós of Barcaság are concerned, the most significant is the literary work of Lajos (Louis) Kolumbán, as is the research of József (Joseph) Árvay in the 1940s. His book *The Place Names of Hétfalu in the Barcaság (A barcasági Hétfalu helynevei)* analyses not only the names of settlements but also the popular Csángó character of Hétfalu, based on detailed bibliographies. In more recent times Sándor (Alexander) Szilágyi has investigated the Khabar-Khazar origin of the Csángós in his *A New Approach to a Question (Egy kérdés újabb megközelítése)* and 'What has not been told about the Csángós' (*Amit még nem mondtak el a csángókról*). Since 1979 has been TV report, also a proof of interest shown in literature about the Csángós.

(4) *The Csángó literature of Gyimes*. The first study of the Csángó origins of Gyimes was by Lajos (Louis) Erdélyi. Géza Vámszer's treatise 'The Csángós of Gyimes' (*A gyimesi csángók*) was published in the 1939 issues of the *Eastern Newspaper (Keleti Újság)*. – B: 1234, T: 7659.→**Borica; Maria's Lamentation, Old Hungarian; Mádéfalva Peril; Bukovina, Hungarians of; Csúry, Bálint; Jancsó, Elemér; Szilágyi, Sándor.**

**Csányi, Sándor** (Alexander) (Budapest, 19 December 1975 - ) – Actor. He always wanted to become an actor. Following his basic education, he enrolled at an architectural engineering school but remained very much interested in acting. After completing his secondary education, he became an extra at the Gergely (Gregory) Csíki Theater (*Csíki Gergely Színház*), Kaposvár. Finally, he registered at the Academy of Dramatic Art, Budapest in 1997. After completing his studies he became a member of the *Chalk Circle Theater (Krétakör Színház)*. Since 2002, he is a member of the *Radnóti Színház*, Budapest, and is an actor with growing popularity. His major roles include Father Kristóf in Kosztolányi-Bezerédi's *Dearest Anna (Édes Anna)*; in the title role of Molnár's *Liliom* (the basis for the Rodgers and Hammerstein musical *Carousel*), and Irele in P. Kárpáti's *The Fourth Gate (A negyedik kapu)*. His film roles include *The Man Who Was Left Out (Az ember akit kihagytak; I Love Budapest; Lemon-Head (Citromfej); The True Santa Claus (Az igazi Mikulás)*, and *The Paths of Light (A fény ösvényei)*. He is recipient of the Üstökös Prize (2001), the Sugó Csigá Prize (2004), the Prize of Film-critics (2004) and the Fringe Report (GB). – B: 1267, 1524, T: 7103.

**Csányi, Vilmos** (William) (Budapest, 9 May 1935 - ) – Biochemist. His studies were at the University of Budapest, where he studied Chemistry (1953-1958). Between 1958 and 1973 he worked as a biochemist at the Medical School of the University of Budapest. From 1973, he was professor at the University of Budapest, where he organized the Laboratory of Behavioral Genetics, the Department of Ethology, eventually becoming its Chairman (1973-2000). He teaches Ethology, Human Ethology and Theory of Evolutionist Systems. He is an editorial board member of *Acta Biologica Hungarica*, the periodical *Life and Science (Élet és Tudomány)*, and that of the *Pedagogical Review (Pedagógiai Szemle)*. He is Editor-in-Chief of the *Scientific Review (Tudományos Szemle)*. Since 1994 he has been a member of the European Academy of Science and Art, and a member of the Hungarian Academy of Sciences. He has written some 200 scientific publications and 18 books including *Behavior Genetics (Magatartásgenetika)* (1977); *General Theory of Evolution (Az evolúció általános elmélete)* (1979); *Evolutionist Systems: General Theory of Evolution (Evolúciós rendszerek: Az evolúció általános elmélete)* (1980); *Ethology (Etológia)* textbook (1994), and *Is Somebody There? (Van ott valaki?)* (2000). – B: 0874, T: 7103.

**Csaplár, Vilmos** (William) (Újpest, 29 June 1947 - ) – Writer. His higher studies were at the University of Budapest, where he studied Political Science for two years, followed by Hungarian Literature (1966-1972). He was Editor for the *New Mirror (Új Tükör)* (1976-1983) and *The Journal (A Lap)* (1988-1990). He was spokesman for the *Democratic Charta* group (1993-1995). He wrote novels, short stories and film-scripts, including *The Age of Chivalry (Lovagkor)* (1971); *The Ways of Doubting (A kételkedés útjai)* (1982); *Desire for the Blood of the Fox (Vágy a róka vére után)* (1989); *I (Én)* (1995), and *Nothing, Forever (Semmit, örökké)* (2000). – B: 0875, 0878, 1257, T: 7103.

**Csapodi, Csaba** (Budapest 28 September 1910 - Budapest 30 April 2004) – Historian, literary historian, librarian. His higher studies were at the University of Budapest, where he acquired a Teacher's Degree in History and Geography and obtained a Ph.D. in 1933. In 1934, he was in Vienna on scholarship for archival research. He was appointed to the Library of the National Museum; thereafter, he became Secretary to the Director of the National Historical Museum. From 1942, he worked at the Pál Teleki Historical Institute until its closure in 1949. In 1946, he became an honorary lecturer (*privatdozent*). Thereafter he worked at various libraries in Budapest, finally having important positions at the Library of the Hungarian Academy of Sciences from 1951 until his retirement in 1975. He authored more than 450 articles and studies, published in Hungary and abroad. Among his works are *The Management of the Alsólendva Estate of the Esterházy in the First Half of the 18th Century (Az Esterházyak alsólendvai uraldalmának gazdálkodása a XVIII század első felében)* (1933); *The Hungarian Baroque (A magyar barokk)* (1942); *The History and Collection of the Corvina Library (A Corvina Könyvtár története és állománya)* (1974), and *The Janus Pannonius Text Heritage (A Janus Pannonius-szöveghagyomány)* (1978). He received a number of prizes, including the MTA Presidential Prize (shared with his wife) (1976), Officer Cross of Honor (1993), Széchenyi Prize (1995). – B: 0874, 0878, 1257, T: 7103.

**Csárda** (Inn) – In past centuries a wayside inn or tavern fitted out with coach-horse stables, customarily located on the outskirts of villages or near the highways and trade

routes, but far from the control of authorities. It is thought to have originated shortly after the expulsion of the Turks in 1686. In the 19th century, these establishments were characteristic of rural Hungary, serving as rest stops for travelers and a center of amusement for the rural population. – B: 0942, T: 3233.

**Csárdás** – A traditional Hungarian folk dance. The name derived from “csárda” (old Hungarian term for tavern). It originated in Hungary and was popularized by Gypsy (*Cigány*) music bands in Hungary and neighboring lands. The origin of the Csárdás is in the 18th century Hungarian and it developed from the *Verbunkos*, a recruiting dance of the Hungarian army. The Csárdás is characterized by a variation in tempo: it starts out slowly (*lassú*) and ends in a very fast tempo (*friss*, “fresh” or “fast”). There are other tempo variations, called *ritka csárdás*, *sűrű csárdás* and *szökős csárdás*. The dancers are both male and female. Classical composers who have used csárdás themes in their works include Imre (Emeric) Kálmán, Ferenc (Franz), Liszt, Johannes Brahms, Léo Delibes, Johann Strauss, Pablo de Sarasate, Pyotr Ilyich Tchaikovsky, and others. Probably one of the best-known csárdás is by Vittorio Monti written for violin and piano. – B: 1031, T: 7103. → **Gypsy Music; Verbunkos; Kálmán, Imre; Liszt, Ferenc; Hungarian Dances, Traditional.**

**Csaroda Church** – It is located in northeastern Hungary in the town of Csaroda (between Beregszász and Vásárosnamény). The single-nave church was built during the Árpád-era by the local landowner *Gábor* (Gabriel) *de genre Kata*. In the 16th century, the Protestants took over the church when the population of Csaroda converted to the Calvinist (Reformed) faith. In 1642, on the order of Gábor (Gabriel) Perneszi, the frescoed walls of the church were whitewashed and the Byzantine-style frescoes replaced with polychrome floral designs. The 1901 and 1973, restorations revealed the original wall frescoes of saints and apostles painted between 1350 and 1400. The recovered and restored frescoes are of Apostles Peter and Paul and Sts. John of Damascus, Damian and Cosma. Beneath the sacristy, several graves of the Árpád-era cemetery were found. The northern wall and Triumphal Arch of the church are of the same age. – B: 0938, 7617, 1031, T: 7617.

**Császár, Elemér** (Elmer) (Budapest, 27 August 1874 - Budakeszi, 3 July 1940) – Literary historian. His higher studies were at the University of Budapest. At first he taught at a high school (1896-1908); from 1908 he was an honorary lecturer, and from 1916, Professor at the University of Budapest. He also taught History of Literature at the universities of Pozsony (now Bratislava, Slovakia) and Pécs. He was a member of the *Kisfaludy Society* (*Kisfaludy Társaság*) and of the *Petőfi Society* (*Petőfi Társaság*). His articles and essays appeared in reviews and literary journals. He was a conservative literary historian. He was a member of the Hungarian Academy of Sciences. His works include *Pál Ányos* (1912); *Shakespeare and Hungarian Poesy* (*Shakespeare és a magyar költészet*) (1917), and *History of the Hungarian Novel* (*A magyar regény története*) (1922). – B: 0883, 1257, T: 7103.

**Csáth, Géza** (József Brenner) (Szabadka, Hungary, now Subotica, Serbia, 13 February 1887 - Szabadka's vicinity, 11 September 1919) – Writer, musicologist, physician. He

obtained a Degree in Medicine in Budapest in 1909. From 1910 he worked at the Moravcsik Neurological Clinic and became addicted to morphine. He was on the Serbian and the eastern front in 1915-1917, but was demobilized because of his illness. In 1928 he was a village doctor. In a nervous breakdown he killed his wife and poisoned himself. His suicide attempt was unsuccessful. His uncle, Dezső Kosztolányi encouraged him to write. He took the advice and found time for writing. His short stories and music critiques appeared in the *Budapest Diary (Budapesti Napló)*, the *World (Világ)*, and in the literary review *West (Nyugat)*. In his short stories he wrote about people with tormented soul and sickly mind. His works include *Johnny (Janika)* drama (1911); *The Horváths (Horváték)* drama (1912); *The Garden of the Magician (A varázsló kertje)* short novel (1964), and *The Forgotten Dream (Az elfelejtett álom)* selection (1987). – B: 1105, 1257, T: 7103. → **Kosztolányi, Dezső.**

**Csath, Magdolna Anna** (Újpest, a working-class northern suburb of Budapest, 15 December 1943 - ) – Economist. She completed her studies at the University of Economics, Budapest in 1966. Then in 1967-1968 she studied Applied Mathematics at the University of Budapest. Later on (1972-1973) she completed the Master of Business Administration (MBA) course of the London Business School. From 1996 she worked as a lecturer in Economic Studies at the University of Economics, Budapest. She was awarded a Doctorate in Economics by the Hungarian Academy of Sciences. She lectured at the State University and the Technical College of Virginia, USA between 1987 and 1990. She was also a Buchanan professor at the Old Dominion University, USA (1989-1990), and a professor at the Stirling University of Scotland (1990-1992). Later she worked in high positions in various Hungarian and international universities and bureaux; she was a member of the editorial board of four international professional journals. She became a professor at the St Stephen University; a member of the Batthyány Circle of Professors, and also a member of the “Council of the Hundreds” (*Százak Tanácsa*) and the “Trianon Society” (*Trianon Társaság*); furthermore, she is Vice-President of the USA organization “International Forum on Globalization”, led by J. Mander and D. Korten, as well as Vice-President of the National Christian-Social Forum. She often gives talks on TV-programs. She is an adherent of social market economy. She contends that it is economics that exist for humans and not humans for economics. Therefore she emphatically opposes the liberal, monetary economic policy. She especially supports the possibility of building on economic knowledge, technical development and social development in Hungary. There are more than 100 published works to her credit in Hungary and abroad. Her books include *Strategic Planning and Management (Stratégiai tervezés és vezetés)* (1994), which won a prize; *An Inquiry into Management Learning* (1995), and *Way out from the Dead-end of Globalization (Kiút a globalizációs zsákutcából)* (2001). Other prizes include “Buchanan Distinguished Professor” Title and Prize, USA (1990-1991). – B: 0874, 1031; T: 7456.

**Csathó, Kálmán** (Coloman) (Budapest, 13 October 1881 - Budapest, 5 February 1964) – Novelist, playwright and writer. He studied Law at the University of Budapest, after it he studied Theater Art in Berlin. After his return to Budapest in 1906, he became a civil servant at the Ministry of Culture; then with a government grant he went to study in Paris. From 1909 he was an assistant stage director, later Director of the Hungarian National Theater (*Magyar Nemzeti Színház*) in Budapest. After 1945 he dedicated all his

time to writing. His light and entertaining short stories, plays and novels were very popular in their time and have been translated into several languages; he depicts the struggles of the Hungarian middle class, he is also a keen observer, his psychography is exemplary. Among his stage works the most successful are *The New Relative* (*Az új rokon*) (1922); *Marriages are Contracted in Heaven* (*A házasságok az égben kötnek*) (1924); *My Daughter is not Like that* (*Az én lányom nem olyan*) (1936). He also published the history of the Hungarian theater. His numerous novels include *Crow on the Clock of the Steeple* (*Varjú a toronyórán*), his first novel (1916), *Keep Smoking Your Pipe, Ladányi*. (*Te csak pipáld Ladányi*), novel and play (1916, 1927), *The Beautiful Mrs Juhász* (*A szép Juhászné*), novel (1936), *Girls, Mothers, Grandmothers* (*Leányok, anyák, nagyanyák*), novel trilogy (1926-1927) and *From Spring to Spring* (*Tavasztól tavaszig*), hunting-stories (1962). His short stories include *The Secret of Women* (*A nők titka*) (1917), *House with a Girl in 1931* (*Leányos ház 1931-ben*) (1931). He was a member of the Hungarian Academy of Sciences from 1933 to 1949, and Vice-president of the Kisfaludy Society. – B: 0883, 1068, 1257, T: 7617, 7456.

**Csáti, Demeter** (? - ? after 1542) – Franciscan monk, songwriter. He studied in Krakow, Poland, and was living in Kustály in 1526, when he wrote his verse chronicle *Song About the Taking of Pannonia* (*Ének Pannonia megvételéről*) based on the Thuróczy Chronicle of 1488. His work is based on chronicles and folklore. Csáti also adapted the legend of the *White Horse* (*Fehér Ló*). – B: 0883, T: 7659. → **Thuróczy Chronicle**.

**Csáti Gradual** – Written before 1602 and incomplete in its present day state, it is a handwritten Protestant liturgical hymnal. The text is in Hungarian and its tunes are Gregorian chants. Its name comes from the Mezőcsát Township, where it was discovered in 1795. The original gradual was lost in 1945, but a perfect copy is preserved at the Hungarian Academy of Sciences. – B: 1197, T: 7659.

**Csávossy, Elemér Béla S.J.** (Bobda, 24 October 1883 - Pannonhalma, 22 October 1972) – Jesuit priest, teacher, writer, Provincial. Completed his high school studies at Kalocsa and Kalksburg, Austria; entered the Jesuit Order at Sankt Andrä, Austria in 1903; studied Philosophy at Pozsony (now Bratislava, Slovakia), and Theology at Innsbruck, Austria. In 1911, after his ordination in Budapest and his third probation year in Belgium, he studied Natural Sciences and acquired a Degree from the University of Budapest. He taught Philosophy at Kalocsa and helped the China mission. He was Professor and Rector of the Jesuit Philosophical Academy, Kassa (now Kosice, Slovakia), and Director of the *Manréza* in Buda. In 1938 he helped to organize *Unum*, a secular institute inspired by a devotion to the Trinitarian unity for promoting unity in a divided world (*Unum Testvérek*). He became Provincial Superior of the Hungarian Jesuits on September 3, 1949. He was arrested on 7 May 1951 and charged with conspiracy. He was sentenced to seven and half years in prison. He was released during the Revolution of 1956, and from 1961 he lived at the Abbey of Pannonhalma. He will be remembered for having initiated the beatification processes for István (Stephen) Kaszap, László (Ladislav) Batthyány-Strattman and Vilmos (William) Apor. He was the most productive Jesuit writer in Hungary. His writings include *Die Wonne der Schöpfung* (*The Joy of Creation*) (1909); *Social Democracy, Communism and Christianity* (*Szociáldemokrácia, Kommunizmus és Kereszténység*) (1920); *The Social Strength and Tasks of Catholicism* (*A katolicizmus*

*társadalmi ereje és feladatai*) (1932); *Eternal Truths (Örök igazságok)* (1935); *Ut sint unum (May they be one)* (1936), and *Word and Life (Ige és élet)* (1941). – B: 0945, T: 7103.→**Pannonhalma Abby; Kaszap, István; Batthyány-Strattman, Prince László; Apor, Baron Vilmos.**

**Cséfalvay, Eszter** (Esther) (Somorja now Šamorín, Slovakia, 16 May 1947 - ) – Writer. She completed her high school studies in Hungarian as the language of instruction in Somorja in 1965. Between 1965 and 1970 she studied at the Faculty of Arts of the University of Pozsony (now Bratislava, Slovakia) and obtained a Hungarian-Slovakian Teacher's Degree. From 1 November 1970 she was Editor of the Madách Publishing House (*Madách Kiadó*). In 1989 she was member of the Independent Hungarian Initiative; in 1990 member of the Hungarian Christian-Democratic Movement. She translated novels and fairy-tales from Czech and Slovakian into Hungarian; wrote articles of literary nature. In the newspaper *New Word (Új Szó)* she published articles including *The Impatient Singing Bird (A türelmetlen énekes madár)* (1976) and *Clay Violin (Agyaghegedű)* in the *Sunday New Word (Vasárnapi Új Szó)* (1982). Her translation works include *Igor Will Grow Big (Igor nagyra nő)* by Michal Babinka (1972); *The Mole in Seventh Heaven (A vakond a hetedik mennyországban)*, by Hana Doskočilová, (1985), and *The Mole and the Umbrella (A vakond és az esernyő)* by the same author (1991). – B: 1083, 0878, 1890, T: 7456.

**Cseh, László** (Ladislas) (Budapest, 3 December 1985 - ) – Swimmer. His father was also a well-known swimmer. When he was four years old, his father took him to the Spartacus Sport Club and asked the trainer to teach his son to swim. László Cseh was asthmatic in his childhood. After completing high school he went to study Engineering Informatics at the Budapest Polytechnic. Preparing to take part in the 2004 Athens Summer Olympics, he broke his right foot, but he still received a Bronze Medal. After this followed a series of great successes: he became World Champion, 15-time European Champion, and five-time Hungarian Champion. In the 2007-2008 season his results included European champion in the short-course EB 200 m medley in Debrecen (1:52.99) - a new world record; also at Debrecen in the 400 m medley European Champion (3:59.33) – a new world record, and in the 200 m butterfly European Champion (1:51.55). Among the recognitions he has received are: Youth Sportsman of the Year (2003) and the best Hungarian male swimmer of the year (2005). According to the *Swimming World Magazine*, he was the European male swimmer of the year in 2005. László Cseh is the most successful Hungarian male competing swimmer active at present. – B: 1031, 1105, T: 7456.

**Cseh, Tamás** (Thomas) (Budapest, 22 January 1943 - Budapest, 8 August, 2009) – Actor, singer, composer. Up to the age of 13 he lived at Tordas, southwest of Budapest, did his high school studies in Budapest; studied at the Teachers' Training College of Budapest and the Teachers' College of Eger, as well as the Academy of Fine Arts in Budapest. Between 1967 and 1974 he was an art teacher in a secondary school in Budapest. In 1970 he began composing songs (their text mostly by Géza Bereményi). From 1974 he gave individual evening performances in the 25th Theater (*25. Színház*), and the Castle Theater (*Várszínház*), Budapest. In the József Katona Theater (*Katona József Színház*), Budapest, he worked for 16 years. From 1998 he was a member of the

Ark Theater (*Bárka Színház*) Company. His first disc appeared in 1974 entitled *Letter to my Sister (Levél Nővéremnek)*; he made a total of 13 recordings. His one-man evenings included *Without the Song (A dal nélkül)*; *Antoine and Désiré*; *Prophecy (Jóslat)*; *New Songs (Új dalok)*, and *Western Railway Station (Nyugati pályaudvar)*. His book is entitled *On the War Path (Hadiösvényen)* (1997). He appeared in 23 films, for some he wrote the music; among them are: *Cyclists in Love (Szerelmes biciklisták)* (1965); *Hajdús (Hajdúk)* (1975); *In the Wild (Vadon)*(1988); *Blue Box* (1993), and the *Thomas Cseh Film (Cseh Tamás film)* (2001). He was a recipient of the Pro Urbe Prize (1998), the Officer's Sword of the Republic of Hungary (1992), the Ferenc Liszt Prize (1993), Kossuth Prize (2001), and the Middle Cross of Merit of the Republic of Hungary (2009). – B: 0874, 1031, 1482, T: 7456.→**Bereményi, Géza.**

**Cseh, Tibor** (Alsócsernáton, now Cernaton de Jos, Romania, 28 February 1925 - Midland Park, NJ. USA, 1 September 2004) – Chemical engineer, Boy Scout leader. His higher studies were taken at the Budapest Polytechnic (1947). In 1949, he emigrated to Brazil and was involved in soil research. He made the first soil-map of Brazil. In 1962 he worked as an engineer at the Cyanamide Company and moved to the USA. In 1951 he joined the Kálmán Könyves Free University (Sao Paulo) – founded by the Benedictine Order – as a lecturer, later becoming its Dean. He organized the first overseas Hungarian Boy Scout team in Rio de Janeiro, Brazil in 1949. His articles on Transylvania (*Erdély*, now Romania) appeared in the Hungarian press in the West from 1950. He was co-founder of the *Hungarian Brotherly Community (Magyar Baráti Közösség)*, USA, and was a co-editor of the periodical *Here-and-There (Itt-Ott)*. From 1991 he edited the periodical *Transylvania*. He was one of the great and talented leaders of the Hungarian Boy Scout Movement in exile. He was honored with the Árpád Vezér, the Pál Teleki and the Áron Márton memorial medals. – B: 0875, T: 7103.

**Csehi, Ágota** (Agatha) (Rév-Komárom now Komarno, Slovakia, 27 March 1966 - ) – Concert pianist. Her primary education was in Komárom with Hungarian as the language of instruction (1972-1980). She completed her high school studies at the State Conservatory of Music, Pozsony (now Bratislava, Slovakia) (1980-1985). She obtained a pianist's qualification from the Faculty of Music of the Pozsony College of Fine Arts in 1989. From 1989-1990 she was on a scholarship at the Franz Liszt Academy of Music, Budapest. Since November 1990, she has been a lecturer in the Hungarian Section of the Faculty of Music in the Teacher's College of Nyitra (now Nitra, Slovakia). She has been a member of academic and Hungarian societies since the early 1990s'. As a concert-pianist she is well known throughout Slovakia and the Czech Republic, both as a recitalist and a soloist with symphony orchestras, e.g. Kassa (now Košice, Slovakia), Budapest, Kijev (Ukraine). Her book is entitled *Béla Bartók and Northern Hungary (Bartók Béla és a Felvidék)* monograph (1994). She wrote a music series in three parts *My Journey to Bartók (Utam Bartókhoz)*. Her magazine articles include *The History of Hungarian Music from the Conquest of the Country until the 20th Century (A magyar zene története a honfoglalástól a 20-ik századig)* and *The Life and Work of Béla Bartók (Bartók Béla élete és munkássága)* (both in Hungarian, 1991). She is author of *History of Music from Ancient Times until the End of the 16th Century*, college notes (1991). She has been one of the organizers of Piano Concertos of Pál (Paul) Kadosa at Léva (now

Levice, Slovakia). She was awarded 3rd place in a Slovakian piano competition and she is a recipient of the Diploma of Merit. – B: 1083, 1890, T: 7456. → **Bartók, Béla**.

**Csekey, Sándor** (Alexander) (Alsóvárad, 21 April 1896 - Budapest, 11 February 1956) – Minister of the Reformed Church, theologian, writer. He studied Theology at Budapest (1914-1918), at Edinburgh, Scotland (1922-1923), at the Vrije Universiteit, Holland (1922-1923), and at Göttingen, Germany. He obtained a Ph.D. in Systematic Theology from the University of Debrecen (1925). He was a resident fellow in Old Testament Sciences at the Reformed Theological Academy, Budapest (1928), then in Church History at Sárospatak (1929). He was Assistant Minister at the Calvin Square Church, Budapest (1918-1920), then bishop's secretary and chief contributor to the *Calvinist Review* (*Kálvinista Szemle*) (1923-1925). He was Minister of the Home Mission (1925-1928), then Minister in Szalkszentmárton (1926-1928), and Professor of Church History at the Reformed Theological Academy, Budapest (1928-1956). He was the founder of the *Paul Ráday Circle* (*Ráday Pál Kör*) and Director of the Ráday Library. His articles and studies appeared in religious newspapers and periodicals. His main writings are: *Priest or Preacher?* (*Pap vagy prédikátor?*) (1934); *The Importance and Effect of the Institution* (*Az institucio jelentősége és hatása*) (1936); *Book of the Prophet Amos* (*Ámos próféta könyve*) (1939), and *Word and Spirit* (*Ige és lélek*) (1940). He was one of the main representatives of the Historical Calvinism trend. – B 0910, T: 7103. → **Sebestyén, Jenő**.

**Cseklész Carriage**, also called “Esterházy Carriage” – horse-drawn coach on high springs with front and back seats at the same level, and covered with a half roof that can be shifted over the front or back seats. It has two-rung steps. It spread all over Europe from Hungary. – B: 1078, T: 7674.

**Csemelyi Clan** – They were first mentioned in a 1339 document. The clan had a period of great prosperity in County Bodrog. They owned Aragyán and Szentgyörgy villages and they also claimed Csentej. – B: 0942, T: 7685.

**Csémy, Lajos László** (Louis Ladislav) (Alsógellér, now Holiare, Slovakia, 15 July 1923 - ) – Minister of the Reformed Christian Church in Slovakia, theologian. He completed his high school studies at the Benedictine High School, Komárom (1942), and studied Theology at the Reformed Theological Academy, Pápa, from 1942-1947. He continued his education at the Evangelical Theological Faculty, Pozsony (now Bratislava, Slovakia) and at the Hus Theological Faculty, Prague (1947-1948). He was Assistant Minister in Kassa (now Košice, Slovakia) (1948-1949) and Minister in Ekele (1949-1964). He became an honorary lecturer (*privatdozent*) at the Comenius Evangelical Theological Institute, Prague in 1954, and Professor of Systematic Theology at the same Institute from 1973. He was Professor of the Protestant Theological Faculty of the Charles University, Prague in 1990, and retired in 1993. Next year he came out of retirement and became professor of the János Calvin Reformed Theological Academy, Rév-Komárom (now Komarno, Slovakia) in 1994. He was member of the European Regional Committee of the World Alliance of Reformed Churches and member of the Working Committee of the Conference of European

Churches. His articles and essays appeared in Hungarian, Czech, German, Slovak journals and periodicals. His works include *Religious Individualism of Prophet Jeremiah* (*Jeremiás próféta vallási individualizmusa*) (in manuscript) (1947); *Sermons with Liturgy 1960-1982* (*Igehirdetések liturgiával 1960–1980*) (1982), and *Homiletics* (*Homiletika*) notes (1992). He wrote a history of the Reformed Christian Church in Slovakia, and compiled two Old Testament vocabularies. He received an Honorary Doctorate from the Gáspár Károli Reformed University, Budapest. – B: 0910, 1890, T: 7103. → **Reformed Church in Slovakia.**

**Csendes, Imre** (Emeric) (Boroszló, 24 October 1886 - Toronto, Canada 1958) – Minister of the Reformed Church, pioneer missionary on the Canadian prairies. He attended school in Zilah (now Zalău, Romania) and Debrecen, later he taught at Zsibó (now Jibou, Romania). Because of his Hungarian patriotism the Romanian Government expelled him from Transylvania (then under Romanian rule) with other compatriots from Zsibó. He emigrated to Canada and lived the hard life of immigrants first in Winnipeg then at Békevár, Saskatchewan. Later, he studied Theology at Saskatoon. Meanwhile, he was appointed as interim minister at Otthon, Saskatchewan. He stayed there as an ordained minister but his ministry also extended to Lestock and Halmok and to the scattered Hungarians of the districts. Finally, between 1951 and 1956, he was the mentor of the Hungarian congregation at the United Church in Toronto within the Church of All Nations. – B: 0906, T: 7682.

**Csenger Synod** – A Reformed Synod was held there on 26 July 1570 under the presidency of Péter Melius-Juhász. It dealt mainly with the definition of the Doctrine of the Holy Trinity and articles in connection with the Doctrine. The Confession of Faith edited by Péter Melius-Juhász was unanimously accepted. This Confession is included with other famous confessions in the collection of Reformed Churches abroad in the so-called *Syntagma Confessionum*, but mistakenly, under the title *Confessio Polonica*. The confession formulated at the Synod was published also in Hungarian translation. – B: 1078, T: 7682.→**Melius-Juhász, Péter, Reformed Church in Hungary.**

**Csengery, Antal** (Anthony) (Nagyvárad now Oradea, Romania, 2 June 1812 - Budapest, 13 July 1880) – Politician, historian, publicist. He studied at Nagyvárad and Debrecen. From 1843, he worked as a contributor to the *Pest Journal* (*Pesti Hírlap*) and was its Editor between 1845 and 1849. In 1849 he was appointed Counselor to the Ministry of Interior and sided with the Peace Party. Thereafter he worked as a teacher and writer. Baron Zsigmond (Sigismund) Kemény's policy influenced him and Csengery became a leading figure of the "Literary Deák Party". He edited the *Budapest Review* (*Budapesti Szemle*) of the Hungarian Academy of Sciences (1857-1869). As a confidant of Ferenc (Francis) Deák, he had a significant role in working out the Compromise of 1867 between Austria and Hungary. He initiated the introduction of the *Lower Secondary School* (*Polgári Iskola*) system in Hungary. From 1868, he was Member of Parliament representing the Deák Party, and Vice-President of the Hungarian Academy of Sciences (1871-1880). His works include *His Collected Works, vols. i-iii* (*Összegyűjtött munkái, I-III*) (1870-1874) and *Posthumous Writings and Notes* (*Hátrahagyott iratai és feljegyzései*) (1918). – 0883, 1257, T: 7103.→**Kemény, Baron Zsigmond; Deák, Ferenc; Compromise of 1867.**

**Csenki, Imre** (Emeric) (Püspökladány, 7 August 1912 - Budapest, 15 July 1998) – Choirmaster, composer, folklorist. His higher studies were at the Ferenc (Franz) Liszt Academy of Music, Budapest (1935-1937). Among his teachers were Zoltán Kodály, Jenő (Eugene) Ádám, Artúr Harmat, Viktor Vaszy, Zoltán Vásárhelyi and Lajos (Louis) Bárdos. He obtained music teacher degree in high schools and teacher training colleges. From 1937 to 1940 he was music teacher at the high school of Mezőtúr. From 1940 to 1950 he taught voice and music at the Teacher's College of the Reformed College of Debrecen, later he was music lecturer at the University of Debrecen. In 1950 he was one of the founders, choirmaster and artistic leader of the Hungarian State Folk Ensemble (*Magyar Állami Népi Együttes*) until 1972. Between 1964 and 1966 he was Choirmaster of the Hungarian Radio's Choir (*Rádióénekkar*). With his choirs he staged many choir pieces including that of Kodály and Bartók in Hungary and abroad. As folklorist he collected Gypsy songs and music. His works include operas, choirpieces, folksongs and dances. He received the Kossuth Prize, the Outstanding Artist title, and the Csokonai Prize of Debrecen. The Music School of Püspökladány bears his name. – B: 1031, T: 7103.→**Folk Ensemble, Hungarian State; Bartók, Béla; Kodály, Zoltán; Bárdos, Lajos; Harmat, Artúr; Ádám, Jenő; Vaszy, Viktor; Vásárhelyi, Zoltán; Rába, Miklós; Timár, Sándor.**

**Csépe, Imre** (Emeric) (Kishegyes, Hungary, now Mali Idoš Serbia, 23 September 1914 - Szabadka now Subotica, Serbia, 18 May 1972) – Hungarian poet, writer, journalist in Vojvodina (Vajdaság, now Serbia). At age 11 he was a swineherd, later an apprentice, farmhand, factory worker, broom-maker, construction worker, also performing other manual works. His first writings appeared in the 1930s. In 1956, he became a contributor to the journal *Hungarian Word* (*Magyar Szó*). His poems appeared in journals and magazines. Later in his life he wrote prose. In his poetry he gave an authentic account of the peasantry's hard life between the two World Wars. His works include *Sunny Side* (*Napos oldal*), collected poems (1949), *On May's Fields* (*Májusi mezőkön*), poems (1952), *White Silence* (*Fehér csönd*), short novels (1959), *The Wind Turns* (*Fordul a szél*), novel (1965), *Border Mound* (*Határdomb*), confessions (1973). – B: 0878, 1169, T: 7103.

**Csepreg Devastation** – An epic song by an unknown scribe about the devastation of the town of Csepreg in 1621. The Protestant citizens of this town in Transdanubia (*Dunántúl*) supported Prince Gábor (Gabriel) Bethlen's fight for independence. The mercenaries of Emperor Ferdinand II retaliated by burning down the town and killing more than 1200 people, including the students of its renowned school, and those who found refuge in the two Lutheran churches. They destroyed 220 buildings between 7 and 12 January 1621. This devastation and massacre occurred because the town of Csepreg belonged to Count Pál (Paul) Nádasdy, supporter of Gábor Bethlen, Reigning Prince of Transylvania, instead of the Emperor of Austria. The song, which first appeared in manuscript, is known in modern versions from Sándor (Alexander) Farkas' *History of Csepreg Town* (*Csepreg mezőváros története*), contained in the *Mementos of Ecclesiastical History* (*Egyháztörténeti emlékek*). A day of commemoration was held on 16 January 1995, and a memorial was erected. – B: 0898, 1150, T: 7659. → **Bethlen, Prince Gábor**.

**Csepreg Synod** – held under the chairmanship of István (Stephen) Beythe, superintendent of the Transdanubian (*Dunántúl*) Evangelical and Reformed Churches, still united in March of 1587. The twenty-seven canons, proposed by István Beythe, dealt mainly with the moral and proper conduct of ministers and teachers. – B: 0942, T: 7682. → **Beythe, István**.

**Cs. Erdős, Tibor** (Berettyóújfalu, 27 February 1914 - ) – Painter, graphic designer. He studied at the Academy of Applied Arts, Budapest between 1940 and 1945, where he also acted as assistant in the Department of Graphic Design. Between 1945 and 1949, he was Professor in the Art School of Nagyvárad (now Oradea, Romania), then graphics Professor in the Art School of Kolozsvár (now Cluj-Napoca, Romania). Later, between 1959 and 1974, the State Theater of Kolozsvár contracted him as stage designer. In 1955 he held his first individual art exhibition in Nagyvárad, followed by numerous art exhibitions in Kolozsvár, Budapest, Nagyvárad, and other Hungarian towns. His works were shown "in group" exhibitions all over Europe and even in Beijing, China. Among his outstanding monumental works is a 20-square-meter mural decoration in Dés (now Dej, Romania), made by using a special ceramic technique, as well as a 70-square-meter needlepoint tapestry that can be seen at the University of Kolozsvár. – B: 0875, 1445, T: 7653.

**Cs. Szabó, László** (Ladislás) (Csíkcekefalvi) (Budapest, 11 November 1905 - Budapest, 28 September 1984) – Writer, essayist, critic. He was raised in Kolozsvár (now Cluj-Napoca, Romania), where he attended the Reformed High School of Farkas Street. His family moved to Budapest in 1918. His higher studies were at the University of Economics, Budapest, and at the Sorbonne of Paris (1925-1926). He obtained a Ph.D. in History of Economics in 1931 from the University of Budapest. His first writings appeared in 1927, and he became a contributor to the literary review *West (Nyugat)*. From 1935 to 1944, he was the Chairman of the Literature Department of the Hungarian Radio. After 1945, he taught Literature and Cultural History at the Academy of Applied Art, Budapest. In 1948, he was in Italy on scholarship. He remained there and lived in Rome and Florence until 1951, when he moved to England. Until 1972 he was a contributor to the Hungarian language broadcasts of the BBC. After retirement, he worked as an outside contributor for the BBC and Radio Free Europe. His articles appeared in the *Literary Journal (Irodalmi Újság)*, the literary review *New Horizon (Új Látóhatár)* and the *Catholic Review (Katolikus Szemle)*. He traveled and lectured extensively and helped the activity of young Hungarian writers in exile. His personal experiences appeared in essays such as the volume *Winter Journey (Téli utazás)* (1956); *Huns in the West (Hunok Nyugaton)* (1968); *Music of Rome (Római muzsika)* (1970), and *Between Two Mirrors (Két tükör között)* (1977). His short novels appeared in *Mercy (Irgalom)* (1955) and *Bleeding Phantoms (Vérző fantomok)* (1979). He also published his poems in *Hell's Veranda (Pokoltornác)* (1974). From 1980 on, he visited Hungary several times, where his books were published, including *Near and Far (Közel s távol)* short stories (1983); *Guards (Őrzők)* essays (1985), and *The Snake (A kígyó)*, short stories (1986). He was a prolific writer. Between 1935 and 1947 he published 14 books. He was involved in organizing the emigrant Hungarian Literature and he was one of the cultural leaders of Hungarians in exile. He received the Baumgarten Prize (1936), and posthumously, the Kossuth Prize (1990). – B: 0883, 0921, 1257, T: 7103.

**Cser, Ferenc** (Francis) (Budapest, 17 March 1938 - ) – Researcher in ancient Hungarian history, chemical engineer. His original Degree was in Chemical Engineering, which he obtained from the Budapest Polytechnic in 1961. He received his Dr. Techn. Degree in 1970, defended his candidature thesis (Ph.D.) in 1974, and his D.Sc. thesis in 1991 at the Hungarian Academy of Sciences. Soon he was engaged in research and he was a Research Associate, then a Research Fellow of the Research Institute of Plastic Industry (*Műanyagipari Kutató Intézet*), Budapest. (1962-1974), where he became Senior Research Fellow (1974-1982); Thereafter, he was Head of Department for Syntheses of Polymers (1982-1988) and Principal Research Scientist (1988-1989) in the same Institute. In 1969 he was on leave to the Institute of Metal-organic Compounds Academy of Sciences, Moscow, USSR; in 1977 and 1980 to the Institute of Physical Chemistry, Martin-Luther University of Halle-Wittenberg, GDR, and in 1984 to Hokkaido University, Sapporo, Japan. In 1989 he left Hungary for Australia, where he accepted research work. He worked as Senior Research Fellow in GIRD project managed by MONTECH at the Department of Materials Engineering, Monash University, Clayton, Vic., Australia (1990-1993); then he was Senior Scientist at the Cooperative Research Centre for Polymers (1993-1999); in 2000-2003 he was Post-doctoral Fellow at the Department of Chemical and Metallurgical Engineering, RMIT University, and finally Project Leader at the Singapore Institute of Manufacturing Technology, Singapore (2004-

2005). He retired from there in 2005, and lives in Australia. Dr. Cser started research on the culture, language and ancient history of the Magyars (Hungarians), while he was still in Hungary. Later, he continued the data collection in this field in Melbourne, and as a result, his books include *Roots (Gyökerek)* (2000) and *Roots of the Hungarian Origin* (2006). Another work ~~is~~ dealing with the cultural history of humanity is *Benjamin (Benjámín)* (2006), available only on the Internet. He has collaborated with Dr. Lajos (Louis) Darai in writing several studies and books: *Human – Society – Humanity (Ember – Társadalom – Emberiség)* (2005); *Hungarian Continuity in the Carpathian Basin (Magyar folytonosság a Kárpát-medencében)* (2005); *The People of the New Stone Age Revolution (Az újkőkori forradalom népe)* (2004); *We are Europe... vols. i,ii (Európa mi vagyunk, I, II)* (2007, 2008); *Carpathian Basin or Scythia? (Kárpát-medence vagy Szkítia?)* (2010), and *Hungarian Antiquity in the Carpathian Basin (Kárpát-medencei magyar ősiség)* (2011). Their other co-authored studies were presented at the ZMTE (*Zürichi Magyar Történelmi Egyesület, Hungarian Historical Association of Zurich*), at symposia of the World Federation of Hungarians, and appeared in their publications. – B: 1935, T: 7690. → **Darai, Lajos Mihály.**

**Cserepka, János** (John) (Püspökszilágyi, 4 February 1919 - Kelowna, BC., Canada, 10 March 1999) – Baptist pastor, missionary. He was born into a Roman Catholic family as its tenth child. The Baptist Faith attracted him early on. After his conversion at a conference, he met Mária Molnár, a missionary of the Reformed Church, in Papua New Guinea, and decided to become a missionary himself. He studied theology (1937-1942). After a short military service in a hospital train in 1941-1943, he was posted to Szilágyballa (now Borla, Transylvania (*Erdély* in Romania), where he served from 1943 to 1948. Because of Romanian rule, he had to move back to Hungary, and became Pastor in Pesterzsébet (1949-1956). He joined the national awakening movement and its nationwide evangelizing work. He even went to Transylvania, under Romanian rule, for evangelizing. In 1956 he married Margit (Margaret) Ilonka, a medical doctor, and in December they left Hungary to find a field of mission. They ended up in Toronto, Canada, where they founded a Hungarian Baptist congregation. Finally, the Canadian Baptist Church sent them to Bolivia for missionary work. They served there in three missionary periods. Their first was in 1963-1967, serving among the aboriginals in Chapare. The second mission was again in Chapare, (1968-1973). They traveled with a hospital ship along the River Grande and its tributaries, healing and evangelizing. The third one was in Jacuiba (1979-1983). After this they retired and settled in Kelowna, BC, Canada, where he organized a congregation. – B: 1118, T: 7103. → **Molnár, Mária.**

**Cseres, Tibor** (Portik) (Gyergyóremete now Remetea, Romania, 1 April 1915 - Budapest, 24 May 1993) – Writer. He pursued his secondary studies in Marosvásárhely (now Targu-Mures, Romania) and Budapest. Thereafter he studied Law, Veterinary Science, and finally obtained a Degree in Economics at Kolozsvár (now Cluj-Napoca, Romania). He started in journalism; but after working for a year, he was conscripted into the Hungarian army in 1938, and served 56 months in World War II. He was a lieutenant when he escaped from the army at the end of 1944. Between 1945 and 1946 he worked as a journalist in Békéscsaba and, in 1947, he was appointed ministerial advisor in Budapest. Soon he became a free-lance writer. From 1963 to 1970, he was contributor to the literary review *Life and Literature (Élet és Irodalom)*. Between 1986 and 1990, he

was President of the *Writers' Association*, (*Írószövetség*). He started his career as a poet, but soon became a novelist. His works include *Without Farewell* (*Búcsú nélkül*) novel (1964) and *Cold Days* (*Hideg napok*) novel (1964). In this successful book he wrote about the atrocities at Újvidék (now Novi-Sad, Serbia) that took place in 1942. This work was made into a feature film. His other historical works are *Garden of our Ancestors, Transylvania* (*Őseink kertje, Erdély*), novel (1990) and *Vendetta in Bácska* (*Vérbosszú Bácskában*), novel (1991). Some of his works appeared on stage. He received the Attila József Prize (1951, 1955, 1985) and the Kossuth Prize (1975). – B: 0878, 1257, T: 7103.

**Cserey, Erzsi** (Elizabeth) (Budapest, 1932 - Budapest, January 2008) – Actress and stage manager. From childhood she loved acting, and was advised to join the Studio of the National Theater in Budapest. The 1956 Revolution and Freedom Fight intervened, and with her husband she emigrated to the USA, where she decided to become an actress. Frank Sinatra became aware of the blond beauty and had her contracted to the Dean Martin – Sinatra Musical-Dancing Revue at Las Vegas. Sinatra christened her “Blond Paradise”. Soon she moved to New York, where she completed the famous Lee Strassberg College of Dramatic Art. Under the name of *Elizabeth de Charay* she first appeared on stage in Bertold Brecht’s musical piece *The Informer* (*Spicli*); after its success, she played in Off-Broadway stage plays, among them Arkagyna in Chekhov’s *Seagull* (*Sirály*), and Marta in Albee’s *Who’s Afraid of Virginia Woolf* (*Nem félünk a farkastól*). Soon she was noticed in Hollywood. She appeared in about 18 films. Her first leading role was in the film „68” by István (Stephen) Kovács. She also played in the film *King of Comedy*. She played with a number of famous actors, such as Robert de Niro, Michael J. Fox and Robert Stanton. On one occasion, she was invited for a guest performance by the Director of the Hungarian Theater of New York, the lawyer, politician and writer László (Ladislav) Varga. This determined her subsequent career: she stayed there, and for 17 years she became the Actress-Director after Varga returned to Hungary. Here she played 35 leading roles, and stage-managed 40 works. Annually she produced 5 to 8 presentations. Her roles included Éva in Imre Madách’s *The Tragedy of Man* (*Az ember tragédiája*); Anne in Ferenc Molnár’s *The Play is the Thing* (*Játék a kastélyban*), and Princess in Imre Kálmán’s *Csárdás Queen* (*Csárdáskirálynő*). She produced on stage the career of the greats of Hungarian theater: Imre Kálmán, Sári Fedák, Lujza Blaha, Hanna Honthy, Mária Mezey, Katalin Karády, Zoltán Latinovits, Klári Tolnay, Jenő Horváth, Gyula Kabos and Pista Dankó. She invited renowned artists as Imre Sinkovics, Eszter Bíró, Edit Domján, Krisztina Kiss, József Gregor and Károly Szíki. Her company presented the life of three great actresses (Sári Fedák, Katalin Karády, Mária Mezey), traveled through North America and Europe, including Hungary. She appeared several times in Budapest, also in the Gárdonyi Theater of Eger, and at the Festival of Kisvárdá. She was an important figure in the History of American Hungarian Theater. She was a recipient of the Pro Cultura Hungarica (1999), Festival Prize (2000), Gloria Victis (2006), and the posthumous Freedom Cross (2008). – B: 1445, 1938, 1939, T: 7456. → **Most of the artists in the article have their own entry.**

**Cserhalom Battle** – In 1068 the *Pecheneg* (*Besenyő*) leader Osul joined forces with the Cumanians and the Uzbeks of Moldavia, and broke into Transylvania (*Erdély*, now Romania) through the Borgo Pass. From there, through the Gate of Meszes, he reached

Bihar, leaving a wake of destruction behind him. Finally through Szatmár and Szamos, he returned to Transylvania. Here, King Salamon (1063-1064), together with the Princes of László (Ladislás) and Géza, defeated and scattered his army at Cserhalom (also known as Kerlés). Adjacent to Kerlés, on a hilltop, is the castle of the Counts of Bethlen. On the steep rock wall there are many valuable pictographs about the battle. The life of King László I, (St Ladislás, 1077-1095) and the Battle of Cserhalom made a great impression on the Hungarian chivalry of the age, commemorated in the songs of the minstrels, and in many forms of the visual arts. János (John) Aquila commemorated detailed episodes of the battle of Cserhalom on a fresco; the abduction of a Hungarian maiden overpowered by a Cumanian knight is immortalized on the walls of many Szekler churches. The great poet, Mihály Vörösmarty wrote about this historical event in his epic, *Cserhalom*. – B: 1078, 1230, T: 7668.→**Aquila, János; Vörösmarty, Mihály.**

**Cserhát Hills** – Are members of the Northeast Hungarian Central Mountains, north of the Great Hungarian Plain, a group of low hills, the highest point being Nagyszál (652 m) near Vác, consisting of Dachstein Limestone; the Cserhát Hill (s.s.) near Szécsényke is 340 m. All these hills are volcanic cones. Creeks issuing from them include the Galga, Guta and Szuha. In the east there is an andesitic volcanism; in the west are the marine deposits of the Oligocene Age (34 million to 23 million years ago) to Miocene Age (24-5 million years ago) All these hills form fault-block relicts of limestone around Vác, Csővár and Romhány, exclusively of Triassic Age (from 251 to 200 million years ago) followed by tertiary sediments and some brown-coal beds. The Cserhát Hills are separated from the Mátra Mtns. by the valley of the Zagyva Creek; and from the Börzsöny Range by the Lókos Creek. In the north they slope towards the Nógrád Basin, while in the south they continue as the hillocks of Gödöllő. Forests cover the higher levels, the valleys are densely populated. – B: 1068, 7456, T: 7456.

**Cseri, Kálmán** (Coloman) (Kecskemét, 30 April 1939 - ) – Minister of the Reformed Church. He completed his studies at the József Katona High School, Kecskemét and studied Theology at the Reformed Theological Academy, Budapest. He was Assistant Minister in Cece, Budahegyvidék, and also of the Pasarét Congregation, Budapest, where he was parish minister from 1971 until his retirement in 2010. His writings include articles, studies and more than twenty books, among them: *Apostle Paul (Pál apostol)* (1979); *I Know Whom I Believed (Tudom kinek hittem)* (1989); *How Does God Grant Victory? (Hogyan ad Isten győzelmet?)* (1992); *Noah Walked with God (Noé Istennel járt)* (1998); *What Does the Bible Teach About Suffering? (Mit tanít a Biblia a szenvedésről?)*; *The Ten Commandments (A Tízparancsolat)* (2000); *God is Asking (Isten kérdez)* (2002), and *Love Each Other! (Szeressétek egymást!)* (2003). He is one of the influential preachers of his Church. – B: 0910, 1031, T: 7103.→**Joó, Sándor.**

**Csermák, Antal György** (Anthony, George) (Hradsin, Bohemia, ca. 1774 - Veszprém, 25 October 1822) – Violinist, composer. His early life is not known. Around 1790 he was a violin teacher in Vienna. In 1795 he was the first violinist of the National Theater Society (*Nemzeti Színtársulat*) of Pest-Buda. He soon left the Society and lived at the residence of a noble family. He became an itinerant musician traveling around the country, and frequently performing abroad as well. He was captivated by the “Verbunkos” music of the Gypsy violin virtuoso and composer János (John) Bihari. He

had heretofore spent his life combining classical techniques, structures and abilities with the passions of the “verbunkos”, originally a Hungarian recruiting dance with alternating slow and fast tempos. The ideas of Csermák, and gypsy composers, were employed by Ferenc (Franz) Liszt, particularly in his *"Hungarian Rhapsody No. 4"*. Csermák with Bihari and J. Lavotta are the primary representatives of the ‘Verbunkos’ music. He died in poverty. – B: 1031, 2131, T: 7103→**Keszthely Manuscript; Verbunkos; Hungarian Dances, Traditional; Bihari, János; Liszt, Ferenc; Lavotta, János.**

**Csernák, László** (Ladislas) (Chernák) (Pápa, 11 September 1740 - Deventer, Holland, 5 May 1816) – Mathematician, physicist. During 1755-1762 he studied at the Reformed College of Debrecen. From 1767, he studied at the universities of Vienna, Basel, Turin, Utrecht and Groningen. In 1773, he received a Doctorate in Medicine, and in 1775 a Ph.D. in Philosophy. In the same year, he was invited to become Professor of Philosophy and Mathematics at the Deventer Academy in Holland where, between 1777 and 1782, he served as Rector as well. His main opus is the table for the dissolution of whole numbers by prime factors: *Cribrum arithmeticum* (Daventriae, 1811). It is the first work that gives the factors up to one million. In another study he discussed Franklin’s theory *Dissertatio Physica de Theoria Electricitatis Franklini* (Groningen, 1771). – B: 0883, 1031, T: 7617.

**Csernus, Imre** (Emeric) (Verbász, now Vrbas, Serbia 2 March, 1966 - ) – Psychiatrist, physician. His father was a physician, his mother a dentist. He originally wanted to become a priest but changed his mind. At the age of 18 he moved to Budapest and studied Medicine at the University of Budapest. He prepared to become an obstetrician; however, he decided to become a psychiatrist instead, because he realized he had a feeling for getting psychologically close to troubled persons, including drug-addicts. He frequently appears in TV talkshows, and gives lectures and papers. He has become a leading psychiatrist with growing recognition and popularity. His books include *Drug Today (Drog ma)* (2004); *Will You Undertake It? (Elvállalja?)* (2004); *I Undertake It! (Elvállalom!)* (2004), and *Who Eucates in the End? (Ki nevel a végén?)* (2005). – B: 1634, T: 7103.

**Csernus, Tibor** (Kondoros, 27 June 1927 - Paris, 7 September 2007) – Graphic artist and painter. At first he attended a Commercial College. Always finding drawing pleasurable, in 1943 he studied graphic art at the Industrial School, Budapest, and concurrently worked as a lithographic apprentice in the Posner Printing House, where he was trained in the elements of drawing, by András (Andrew) Benkő. In 1945 he was enlisted in the army and became a prisoner of war. After World War II he was trained in graphic art by Loránt (Roland) Sárkány in the School of Industrial Art; later he moved to the painting department of the Academy of Applied Arts, where Aurél Bernáth was his master. At this stage he painted landscapes in a socio-realistic style until 1956. Thereafter he followed an individual path, characterized by cubism and by studying the modern French painting style. In 1957 he moved to Paris, where he became acquainted with the French style of painting of the interwar years with calligraphy and surrealism. In the summer months he worked in the Szigliget artist colony in Hungary. André Derain influenced his landscape painting. His paintings of the 1958-1964 years are characterized by a creative course of nature mysticism and surrealism. During this period he prepared a number of monotypes

and book illustrations. From 1964 he lived and worked in Paris. In the 1970s his hyper-realistic works were untitled. In the 1980s he painted multiform, pseudo-academic nude compositions, biblical scenes, still-life and animal pictures in the style of Caravaggio. From the 1990s the monumental series entitled the *Szajha útja (The Way of a Harlot)* proved a remarkable creation. He exhibited in Paris, Chicago, Budapest, and at other places. In Hungary he established a school. Among his works are: *City Scene with the Parliament (Városkép az Országházával)* (1952-1953); *Saint Tropez* (1958-1959); *Triptichon* (1954-1956), and *The Way of a Harlot (A szajha útja)*, series from the 1990s. His awards include the Munkácsy Prize (1952, 1963), the Gyula Derkovics Scholarship (1955), the Premio Lissone (Italian, 1967), the *Chevalier d'Arts et Lettres* (French, 1986), the Outstanding Artist title (1990), and the Kossuth Prize (1997). – B: 1031, T: 7456.→  
**Bernáth, Aurél.**

**Cservenyák, Tibor** (Szolnok, 5 August 1948 - ) – Water polo player, trainer. From the age of ten, he has played water polo, first in the Dózsa Sports Club of Szolnok; from 1973 in the Dózsa Club of Újpest (northern suburb of Budapest), and from 1983, he played in Volán SC for two years, in the latter as goal-keeper. Between 1970 and 1984, he defended the goal of the Hungarian National Team 134 times. He became a classic goalkeeper with his outstanding leg stroke and excellent reflexes. In addition, he was one of the fastest water polo players of all time. He was a member of the team in the 1976 Summer Olympic Games in Montreal, winning an Olympic Champion title for the Hungarian team. Side by side with his sporting career, in 1970 he obtained a Chemical Engineering diploma from the Budapest Polytechnic. In 1976, in the Water Polo Department of the School of Physical Education and Athletics he obtained a diploma in Water-Polo Training. After his retirement from sport, he worked as a chemical engineer at Solothurn of Switzerland from 1984 to 1990, and he was active as trainer and, until 1992, he was the Federal Captain of the Swiss Water Polo National-Team. His best results in water polo sport were: Olympic Champion (1976), World Champion (1973), European Champion (1974), and twice winner of the Hungarian Cup (1968, 1975). In more recent years, he has worked at the Central University of Zürich, doing research work; he has visited Hungary several times. – B: 1031, 1768, T: 7456.

**Csete Szemesi, István** (Stephen) (Bácsfeketehegy, now Feketic, Serbia, 1937 - ) – Reformed Bishop of the Reformed Christian Church in Serbia. He completed his high school studies at Szabadka (now Subotica, former Yugoslavia, now Serbia), then read Law at Zágráb (Zagreb, now Croatia) and received a degree in Theology in Ireland and Scotland. He was Assistant Minister in Pacsér (now Pacir), Minister in Maradék (1968-1970), in Debelyacsa (1970-1997), and in Feketics from 1997. He has been a Bishop of the Reformed Christian Church in Yugoslavia/Serbia since 1997, and Editor of the *Reformed Life (Református Élet)* monthly since 1977. His works include *The 200-Year History and Roots of the Debelyacsa Reformed Congregation (A debelyacsai református egyház 200 éves története és gyökerei)*, and *The History of the Southern Reformed Church from its Independence in 1920 until 2000 (A Délvidéki Református Egyház története 1920-ben történt önállósulásától 2000-ig)*. He has been Vice-President of the World Alliance of Reformed Churches from 2001, and a member of its European Regional Council since 1995. – B: 0910, T: 7103.→**Reformed Church in Yugoslavia.**

**Cséti, Ottó** (until 1884 Chrismar) (Buda, 1836 - Lucsivna, now Lučivná, Slovakia, 9 August 1906) – Mining engineer, professor of mining. Worked as a factory laborer before graduating from the Polytechnic of Vienna in 1862, later becoming a professor of the School of Mining and Forestry in Selmezbánya (now Banská Štiavnica, Slovakia). He was editor for the *Journals of Mining and Metallurgy* (*Bányászati és Kohászati Lapok*) between 1892 and 1894. He constructed numerous geodetical and mine survey instruments such as the *Cséti mineshaft plummet*, *tachymeter*, *theodolite*, and the *plane table*. – B: 0883, 1405, T: 7674. → **Conveyor**.

**Csetri, Elek** (Alec) (Torda, now Turda, Romania, 11 April 1924 - Kolozsvár, now Cluj-Napoca, 24 January 2010.) – Historian in Transylvania (*Erdély*, now Romania). He graduated from the University of Kolozsvár (now Cluj-Napoca) in 1947. Between 1947 and 1949 he taught at the Hungarian Secondary School in Nagyszeben (now Sibiu) and in Marosvásárhely (now Targu Mures). He was an assistant professor at the University of Kolozsvár between 1949 and 1952, and in 1959, then an adjunct professor until 1962. From 1962 until his retirement in 1968, he was a full professor there. Since 1990 he has been a professor again at the University of Kolozsvár. He was on scholarship in Göttingen, Germany (1992-1993) to pursue his research work on Alexander Csoma de Kőrös. He was guest professor at the University of Budapest from 1991. He was Editor for the periodical *Transylvanian Museum* (*Erdélyi Múzeum*) (1994-1998). His works include *Studies on the Beginnings of Transylvanian Capitalism* (*Tanulmányok az erdélyi kapitalizmus kezdetéről*), co-author (1956); *The Setting-out of Sándor Kőrösi Csoma* (*Kőrösi Csoma Sándor indulása*) (1979); *Life-Course of Gábor Bethlen* (*Bethlen Gábor életútja*) (1992); *Together in Europe* (*Együtt Európában*) (2000), and *Europe and Transylvania* (*Europa és Erdély*) (2006). He has also edited several books. Since 1990 he is an external member of the Hungarian Academy of Sciences. He is member of professional as well as civic societies. He was a recipient of the Sándor Kőrösi Csoma Memorial Medal (1984). – B: 1036, 1031, 1257, T: 7103. → **Kőrösi Csoma, Sándor; Bethlen, Prince Gábor**.

**Csezmicei, János** → **Janus Pannonius**.

**Csia, Lajos** (Louis) (Királyháza now Karoleve, Carpatho-Ukraine, 18 February 1887 - Budapest, 3 February 1962) – Minister of the Reformed Church, organizer of Independent (Protestant) Churches, book publisher, Bible translator. He completed his secondary studies at the Reformed High School in Budapest; then studied Theology at the Reformed Theological Academy, Budapest (1905-1909). From 1921-1924, and again in 1929 he took up Germanic Studies and English Literature. In 1930 he went to Cologne, Germany to study History and Linguistics. From 1911-1912 he served as Curate for numerous congregations. In 1912, he broke off with the Reformed Church and served in several independent Protestant churches. In 1917 he founded a publishing company (functioned until 1948) to publish chiefly his own works. He also founded a Biblical Museum. In 1923, he rejoined the Reformed Church. He taught religious studies between the years 1937 and 1945. From 1925 on he also served as prison chaplain. He was an active writer, and translated many works from English and German into Hungarian. He wrote about Biblical psychology and a Biblical exegesis. His views

differ considerably from the views and teachings of the established churches. His most important work is the translation of the New Testament. – B: 0883, 1031, T: 7617.→**Reformed Church in Hungary.**

**Csicsery-Rónay, István** (Stephen) (Budapest, 13 December 1917 - Budapest, 22 April 2011) – Writer, politician, publisher. His higher studies were at the Consular Academy, Vienna (1937-1939), at the University of Budapest, where he read Political Science (1935-1940), at the Technical and Agricultural Universities of Budapest (1939-1943), where he read Agriculture, and at the Catholic University of Washington, USA (1954-1957), where he studied Library Science. In 1942 he was conscripted into the Hungarian Army and fought on the eastern front, participated in the Don-Bend fighting, was wounded and decommissioned. From 1943 to 1947, he was acting Vice-President of the Pál Teleki workshop. In 1944 he was a member of the Independence Movement and Editor of an underground newspaper, as well as Commander of the Rákóczi Partisan Group. From 1944 to 1948, he was a secretary at the Ministry of Foreign Affairs, Budapest. From 1945 to 1947, he was Chairman of the Foreign Relations Department of the Smallholders' Party. In 1947 he was arrested and charged with high treason; while temporarily freed, he escaped to the West. From 1947 he lived in Austria, Switzerland and France and, from 1949 to 1990 he lived in the USA. He worked as a political analyst at the Free Europe Committee; published supplements to *Our Reputation in the World* (*Hírünk a világban*). He worked as a librarian and was the owner of the Occidental Press. Since 1983 he was Secretary General of the Democracy International, and from 1985, of the Béla Bartók Collection. He resettled in Hungary in 1990 and became President of the Mihály Zichy Foundation; since 1996, he has been the Vice-President of the Sándor Veress Society. Among his works are: *Russian Cultural Penetration in Hungary* (1950); *Revolution of Poets 1953-1956* (*Költők forradalma 1953-1956*) anthology (ed. 1957); *The First Book of Hungary*, (New York, 1967); *Pál Teleki and his Age* (*Teleki Pál és kora*) (ed. 1992), and *Hungary in the Second World War* (*Magyarország a második világháborúban*) (2001). He was awarded the Pulitzer Memorial Prize (1992), the Officers' Cross of Merit of the Republic of Hungary (1993), the Imre Nagy Memorial Plaque (1994), the Gábor Bethlen Prize (2002), the Gold Medal of the Hungarian Arts Academy (2006), and the Medal of the Order of Merit of the Republic of Hungary (2010). His worldview was Christian and patriotic, his life work is an example for future generations. – B: 0875, 0878, 1257, T: 7103.

**Csiha, Kálmán** (Coloman) (Érsemlyén, now Simian, Romania, 17 September 1929 - Kolozsvár, now Cluj-Napoca, Romania, 7 November 2007) – Bishop of the Reformed Church of Transylvania (*Erdély*, now Romania). He was educated at the schools of Érmihályfalva (now Valea lui Mihai, Romania); Sárospatak, Debrecen, and later at Nagyvárad (now Oradea, Romania). His last school years were spent under homeless conditions and he had to earn his living, as his parents were deported to a labor camp by the Romanian authorities. He received his certificate for the ministry at Kolozsvár in 1954. First he was Assistant Minister in Arad, where he organized the congregation of Arad-Gáj as its first minister. In 1957, the Romanian authorities had him arrested, charged him with fabricated offenses, and sentenced him to 10 years in prison. He served his prison sentence in Kolozsvár, Marosvásárhely (now Tirgu Mures), Szamosújvár (now Gherla) and Ilava, the forced labor camps of Periprava, Luciu-Giurgeni, Salcea and

Galac. As a result of the primitive sanitary conditions in the last camp, he became seriously ill and was freed by a general amnesty after six and a half years in 1964. After regaining his freedom, his first place of ministry was Gogánvára, later Marosvásárhely, where he ministered for 20 years. From there, he organized five congregations. In 1975, he received a Doctorate in Theology from the Reformed Theological Academy, Debrecen, and in 1993 an Honorary Doctorate from there. After the political changes in Romania in 1990, the Transylvanian (*Erdélyi*) Hungarian Reformed Synod elected him their Bishop. The Consultative Synod of the Hungarian Reformed Churches (*Magyar Református Egyházak Tanácskozó Zsinata*), a Hungarian Reformed diaspora with a 43 countries, elected him to ministerial presidency in 1995. He was a Central Committee member of the World Council of Churches since 1991, but he resigned in 2001. His articles and studies appeared mostly after 1990. Some of his books are *Light on the Bars (Fény a rácsokon)* prison diary; *From the Table of God (Isten asztaláról)* sermons (1993), and *The Dialectics of Preaching (Az igehirdetés dialektikája)*. In 2000 a *Memorial Book* was published of his service (*Emlékkönyv Csiha Kálmán püspök szolgálatáról*) – B: 7103, T: 7682. → **Reformed Church in Romania.**

**Csihák, György** (George) (Budapest, 22 July 1934 - ) – Economist, historian. He received his higher education at the University of Economics, Budapest completing it with two BAs and a Ph.D. in 1961. In 1968, he left Hungary as a political refugee and settled in Switzerland, working as a business administrator. His writings on economic analysis and organization were published in German. He works as an economic counselor. In Switzerland he was helping refugees from Eastern Europe. He is a founding member and, from 1986, he has been President of the Hungarian Historical Society of Zürich. His books include *The Wheel of History Rotates (Forog a történelem kereke)*, *Sacra Regni Hungarici Corona...*, and *The Past of the Hungarian Nation (A magyar nemzet múltja)*. – B: 1104, 1519, T: 7456.

**Csík, Ferenc** (Francis) (Lengvári) (Kaposvár, 12 December 1913 - Sopron, 29 March 1945) – Athlete, swimmer. His father died in action in World War I, and he was raised by his uncle. In 1924, the family moved to Keszthely, where he graduated from High School in 1931. His higher studies were at the Medical School of the University of Budapest. He became a swimmer in the *Athletic Club of the Budapest University (Budapesti Egyetem Atlétikai Klubja)*. In 1933, he won the Hungarian Champion title, and in 1934, the first prize at the Grand Prix, Paris. He was double gold medalist at Magdeburg, Germany in 1934. Up to 1939 he won 13 Hungarian championships in various swimming styles. His greatest achievement was at the Berlin Olympic Games, where he became Olympic Champion in free-style swimming (100 m). He received his MD in 1937 and settled in Budapest. Beside his profession he was also active as a sports coach. He became the victim of the last Soviet air raid bombing in Hungary during World War II. His ashes were laid to rest at Keszthely on 24 April 1947. A High School, a Promenade and a Sports Club bear his name in Keszthely. – B: 0833, 1477, T: 7103.

**Csíksóbotfa Manuscript** – A manuscript dated between 1651 and 1675. It is possibly the work of János (John) Kájoni, containing probably a collection of Catholic hymns. It is perhaps a copy of the preparatory notes written in the author's handwriting to János Kájoni's *Cantionale Catholicum*. It was discovered and made known in 1929 by Pál

Péter Domokos. – B: 1197, T: 7659.→**Kájoni Codex; Codex Literature; Kájoni, János; Domokos, Pál Péter.**

**Csikesz, Sándor** (Alexander) (Drávafok, 8 January 1886 - Debrecen, 18 February 1940) – Minister of the Reformed Church, theologian, writer. He completed high school studies at Siklós and Kecskemét; read Law, then studied Theology at the Reformed Theological Academy, Budapest. In 1908, he was on a scholarship at the University of Berlin. He was Assistant Minister in Csányoszló (1911). He worked as a military chaplain in World War I (1914-1918). In 1921 he became Professor at the Reformed Theological Academy, Debrecen, and from 1923 he was a professor at the University of Debrecen. He was General Secretary of the National Reformed Ministerial Association (*Országos Református Lelkészegyesület – ORLE*) for 15 years. He organized exhibitions, edited ecclesiastical newspapers, wrote a military prayer book, and published studies in the *Theological Review (Theológiai Szemle)*. His works include *The Village Youth Worship Service (A falusi gyermekistentisztelet)* (1926), and *Hungarian Reformed Practical Theology (A magyar református gyakorlati teológia)* (1934). His sermons, lectures and essays were published during 1940-1943. He was given an Honorary Doctorate from the University of Pécs. – B: 0940, T: 7103.

**Csikesz, Tibor** (Arad, now in Romania, April 1913 - USA, 1996) – Minister of the Reformed Church, theologian in the USA. After World War I, his family moved from Transylvania (*Erdély*, now in Romania) to Hungary. He completed his high school studies at Budapest, where he studied Engineering. However, he wanted to be a minister and took up Theology in Debrecen, then went to the Protestant University, Strasbourg, France. Back in Hungary, he was Secretary of the *Soli Deo Gloria* student movement. He studied Theology at the Presbyterian Theological College, Philadelphia, USA (1938-1939). During this time he served the Phoenixville congregation. He returned to Hungary for a visit; but the outbreak of World War I prevented his return to the USA. He became Assistant Minister in Kisújszállás, and obtained a Ph.D. from the University of Debrecen (1941), then acquired a teacher of religion qualification from the University of Kolozsvár (now Cluj-Napoca, Romania). He taught in this capacity at Nagyvárad (now Oradea, Romania), Budapest and Kisújszállás. At the invitation of the congregation of Phoenixville, USA, he returned to the USA with his family (1947-1958). He was minister of counseling at Pittsburgh for the American Presbyterian Church (1958-1961). From 1960 to 1983, he was Professor of Counseling at the Wesley Seminary, Washington, DC. He published articles and studies. His major work is *Lord, Let Me Receive my Sight (Uram, hagyd hogy lássak)*, sermons (1943). – B: 0906, T: 7103.

**Csiki, László** (Ladislav) (pen names László Czábár, András Luczai) (Sepsiszentgyörgy, now Sfintu Gheorge, Romania, 5 October 1944 - Budapest, 2 October 2008 ) – Writer, poet, dramatist, literary translator in Transylvania (*Erdély*, now Romania) and in Hungary. He graduated from the University of Kolozsvár (now Cluj-Napoca, Romania) in 1967. He was a reporter for the journal *County Mirror (Megyei Tükör)*, Sepsiszentgyörgy (1968-1971). From 1971 to 1980, he was an editor for the *Kriterion Publishers* in Bucharest, later in Kolozsvár. He was a columnist for the weekly *Our Way (Útunk)* Kolozsvár (1980-1982). In 1984 he settled in Hungary, and was Editor at the *Magvető Publisher (Magvető Kiadó)* Budapest (1984-1989); a manager of the magazine

*Hungarian Diary (Magyar Napló)* Budapest (1989-1990). Since 1991, he has been a freelance writer. He was a productive and characteristic representative of Transylvanian Hungarian literature. His works include *Rain Mower (Eső kaszáló)* poems (1968); *The Alien Town (Az idegen város)* tales (1974); *Innocents (Ártatlanok)* five plays (1981); *The Christening (A keresztelő)* poems (1993), and the *Ghosts of the Place (A hely szellemei)*, plays, film stories (1998). Some of his stories were adapted to feature films; others were translated into English, German, Polish, Bulgarian and Romanian. The Soros Foundation awarded him a scholarship. He received the Romanian Writers Association Prize (1978), the Milán Füst Prize (1987), the Literature of Future Prize (1988), the Attila József Prize (1990) and the Tibor Déry Prize (1998). – B: 1036, 0878, T: 7103.

**Csikós of Hungary** – There is a variety of names for herdsmen in Hungary, and there is a hierarchy among them. Hierarchically, the *gulyás* is the highest-ranking herdsman: cattle-herdsman (cowboy in the USA); then comes the *csikós* herdsman, served by young boy-herdsman (*bojtárs*); lower down the scale is the shepherd (*juhász*); and still lower in rank is the swineherd (*kondás*).

The herdsman of horses (*csikós*) sleep in the open air at night, looking after the herd of horses on the steppe wasteland (*puszta*) areas of the Great Hungarian Plain. These herdsmen are descendants of the Magyar horse-riding nomadic tribes who settled in the Carpathian Basin over a thousand years ago. The horse-riding Magyars were expert bowmen and born light cavalymen from the Asian Steppes, and their horses were mostly the Turkmen type. It was they, who were at the root of Hungary's great horse traditions. From these fast, lightly equipped mounted warriors, the “Hussars” (light cavalymen) of the 18th and 19th centuries evolved, who in turn became the

pattern for light cavalry the world over. The *csikós* herdsman is a fiery, unruly, brave man; his vital element is freedom. He always goes (moves) on horseback, looks after his herd on horseback, never travels on foot. His high-boots are fitted with thorny spurs. A blue shirt is popular among them, over which they wear a long embroidered felt cloak (*szűr*) and a fur-coat. Indispensable to him are the oak crook, the whip, and the halter for lassoing for picking out a horse from the herd. Depending on the type of horse-breed, there are three ways of keeping them: reared wild in the open air all year round; in a partially wild way, or in a tractable way. The herdsman's food and clothes are carried after him by the youngest (wheelbarrow-pusher) *bojtár*. His food mainly consists of cereals, milk and dairy products. His most common dish is the fried pastry soup (*lebbencs*), and bread spread with lard. The meat is prepared gulash-like.

The Hungarian Plains – especially the *puszta* areas – form the homeland of herdsmen (*csikós*), the traditional Hungarian horse herders with a unique style of horsemanship and fierce code of independence, as much the spiritual embodiment of a Hungarian, as the cowboy is of an American. As they have done for centuries, the *csikós* still graze their horses loose across the plains from early spring to late autumn and they themselves live, almost the whole year round in the open. The whips of the *csikós* popping like revolvers, their bodies stretched along their galloping horses' necks, culotte-like riding trousers

flapping, hats with very wide rims pulled low – ride the herd's flanks, turning the horses in a stream across the plains, and milling them to a halt in front of the long, thatched barn. The herd is corralled in an enclosure for the night.

The *csikós* are masters of horse-riding. For example the *puszta five-in-hand* (*puszta ötös*) involved a *csikós* standing on the rumps of two horses and driving three more before him at a full gallop. As “Roman riding”, it is a trick practiced in circuses and rodeos across the world, but the Hungarians have raised it to an art form, and made it their own expression of ecstatic horsemanship.

The *csikós* herdsmen were the hired horse herders whose clothes, riding style and equipment reflected a life spent accompanying the free-grazing horses across the *puszta*. The *csikós* spent day and night with one catch, - horses always bridled and close to hand, ready to ride down strays and stampedes. Their saddles were girthless and simple, so they could be thrown onto a horse's back and mounted within seconds; the *csikós* of the Bugac region speed things up even more by always riding bareback. Perhaps it is the boredom of long hours alone that motivated the herdsmen to teach their saddle horses amazing tricks; however, the *csikós* claim a practical purpose for all those. Whatever the case, the *csikós* herdsman became a by-word for superbly trained horses, and bare-back riding skills. – B: 1068, 1134, 1640, T: 7456.→**Hussars; Kincsem; Driving and Coaching; Coach.**

**Csíksomlyó Pilgrimage** – One of the most important national and cultural festivals of the Hungarian people: the Transylvanian pilgrimage of Csíksomlyó (now Miercurea Ciuc, Transylvania, Romania). Every year hundreds of thousands go on pilgrimage at Whitsuntide, (Pentecost) to this little village (pop.: 1414 in 1941). At the time when Northern Transylvania was returned to Hungary by the Second Vienna Award in 1940, two local villages, Csobotfalva and Várdotfalva were combined and renamed Csíksomlyó. Hungarian pilgrims go there, not only from the present-day truncated Hungary and other parts of the Carpathian Basin, where millions of Hungarians live in a minority status, but from every part of the world where Hungarians live.

At Whitsuntide, the devotional church in the valley becomes filled to capacity, where the statue of the “Lady dressed in the Sun”, e.g. the Virgin Mary (*A napba öltözött asszony: Babba Mária*) stands, and thousands are milling in the courtyard of the church and on the surrounding hills. The focus of the cult is a late-Gothic, gold-painted wooden statue of the Virgin Mary, over two meters tall, presumably the work of a Hungarian woodcarving center from the 16th century. The miraculous character of the statue was the object of several Episcopal investigations during the 18th century. On 20 September 1798 it was officially declared a miraculous image and was crowned. The pilgrimage has been revived several times and it continues today. The pilgrims would come together for the Eve of Pentecost on top of the Lesser Somlyó Hill where the pilgrims cover the Stations of the Cross and await the dawn of Pentecost in order that, according to their ancient faith, they may be able to see the Holy Spirit in the rising sun. As to the church: the Benedictine Order built a Romanesque-style church,

later to be taken over by the Franciscans. In 1444, Pope Eugene IV, in a papal circular, encouraged the population of the village to assist in the building of a new Gothic church on the site, in exchange for permission to hold pilgrimages there. The high altar was decorated with a statue of the Blessed Virgin holding the infant Jesus in her arms, as well as statues of King István I (St Stephen, 997-1038) and King László I (St. Ladislav, 1077-1095). The picture of the triptych (winged altar) was painted after 1520. In 1601, the Ottoman Turks burnt down the church, but could not destroy the statues. The St Anthony devotional picture dates from 1661. In 1664, the church was rebuilt and the Franciscans run a cloth factory, a primary school, a high school, a teachers' college and a seminary in the village. The present-day Baroque church of Csíksomlyó was built in 1838; the outdoor altar was built on the plans of architect Imre Makovecz.

Year-after-year, 500-600,000 pilgrims visit the church and the chapel of Kissomlyó Hill of this Transylvanian village. The pilgrims returning home take with them birch-tree branches, remembering that in 1567, the victorious Szeklers (*Székelyek*) descended from the Hargita Mountain holding flags decorated with birch-tree twigs. The road leading to the devotional church is covered with the stalls of vendors selling everything, including devotional articles, as well as gingerbread, the most typical symbol of the pilgrimage, regarded as a cultic food in times past.

During the 400 years of its existence, the pilgrimage center served as an important spiritual and cultural meeting place for the so-called Csángó-Hungarians, who had settled in Moldavia, as well as for the Catholic Hungarians of Transylvania. The place has an important role in the preservation of their national identity. – B: 1068, 1235, 1940, T: 7456.→**Madonna the Great; István I, King; László I, King; Szeklers; Makovecz, Imre; Vienna Award II.**

**Csíkszék** – Area in Transylvania (*Erdély*, now Romania) in the southeastern corner of the Carpathian Basin surrounded by the Eastern Carpatians. It contains the headwaters of two major rivers of Transylvania: the Maros and the Olt. The area of County Csík is divided into three parts: Csík (*Felcsík, Alcsík*), Gyergyó and Kászon, inhabited by the Szeklers (Transylvanian Hungarians). The oldest written reference to this area is in a donation document issued by King Róbert Károly I (Charles Robert, House of Anjou) in 1324. A list of names for its major settlements is in a Vatican registry (1332-1337); it corresponds to a document from the region's provincial library dated 1555. The yearly festivities on the Somlyó Mountain commemorate the Szeklers' victory against the armies of Reigning Prince János Zsigmond (John Sigismund) in 1567, when they retained their freedom and religion. Ali Pasha's Turkish invaders devastated the area in 1661. Mirza Khan's Tatar army invaded this area in 1694, but was defeated by the Szeklers led by Nizet and Benedek (Benedict) Santus, who also celebrated the major victory of 1764 at Mádéfalva. – B: 0942, 1336, T: 7656.→**Csíksomlyó Pilgrimage; Szeklers; Mádéfalva Peril.**

**Csíkszentmihályi, Mihály** (Michael) (Fiume, now Rijeka, Croatia, 29 September 1934 - ) – Psychologist, polymath, writer. He is of Transylvanian (*Erdély*, now Romanian) descent. World War II brought his family to the West and, since 1956, has lived in the USA, where he completed his higher education. Between 1965 and 1971 he was Head of the Department of Sociology and Anthropology at Lake Forest College. From 1971

to 1987, he was Professor of Human Development, later research Professor of Human Behavior at the University of Chicago. He was a member of the Advisory Board of the Encyclopedia Britannica, as well as the J. P. Getty Museum. He taught in Brazil and, in 1984, was on a Fulbright Scholarship in New Zealand (1990). He is Professor Emeritus, Department of Psychology and Education, University of Chicago. His fields of research are human creativity, socialization, social and cultural systems, and behavior in work and play. In his best-selling book *Flow: The Psychology of Optimal Experience* he refers to the importance of creativity as a force in human lives. His ideas have revolutionized psychology and have been adopted in practice by national leaders, as well as top members of the global executive elite who run the world's major corporations. His other books include *Beyond Boredom and Anxiety* (1975); *The Creative Vision* (1976); *The Psychology of Optimal Experience* (1990) (in Hungarian: *Az Áramlat*, 1997); *Creativity* (1996); *Finding Flow in Everyday Life* (1997) (in Hungarian: *És addig élték amíg meg nem haltok*, 1998), and *Becoming Adult* (2000). He is a recipient of the Thinker of the Year Award (2000), and the Hungarian Széchenyi Prize (2011). He is an external member of the Hungarian Academy of Sciences (1988). – 0874, 1279, T: 7103.

**Csiky, Gergely** (Gregory) (Pankota, 8 December 1842 - Budapest, 19 November 1891) – Writer, literary translator, playwright, creator of the Hungarian critical realist drama. He possessed an exceptionally retentive memory and an enormous working capacity. While he passed his theological examinations with the most outstanding results as a seminarian, he also obtained a very thorough secular erudition and command of languages. Besides the Latin, Greek, Hebrew and German, inevitably necessary for a priestly career, he mastered French, English, Italian and Spanish as well. At age thirty, he was already a Professor of Theology and Diocesan Attorney of the Holy See at Temesvár (now Timișoara, Romania). From his student days on, he secretly wrote lay poems, dramas and short stories published under a pen name; later, also under a pseudonym. A volume of his poetry was published that already showed the path leading him to part with the Church. His prize-winning play *Prophecy (Jóslat)* is decidedly anticlerical, and it was this play that started him on the road to literary success. Five years passed before he began to speak in terms of critical realism that characterized him and signified the break with the Church. In 1879 he left his Church, and joined the Evangelical (Lutheran) Church, got married, and took up literature. Ultimately he became a successful playwright. In his *Irresistible (Az ellenállhatatlan)*, he showed the main features of his talent: directness, freshness, realistic vigor, and highly individual style. In rapid succession he enriched Hungarian literature with realistic genre pictures, such as the *Proletariat (A Proletárok)*; *Bubbles (Buborékok)*; *Two Loves (Két szerelem)*; *The Bashful (A szégyenlős)*; *Family Stomfay (A Stomfay család)*; *Spartacus*; *Athalia*, and the *Grandma (Nagy mama)*. He wrote some 30 dramatic works. Among his translations are Sophocles and Plautus, which proved to be the most successful of Hungarian translations of the ancient classics. His best known novels include *Arnold*, and *The Atlas Family (Az Atlasz család)*. He was member of the Kisfaludy Society (*Kisfaludy Társaság*), that of the Drama Committee of the Hungarian Academy of Science, dramaturgist of the National Theater, Budapest (1889-1891), and he taught Dramaturgy and Psychology at the Academy of Dramatic Art, Budapest (1882-1891).

The Csiky Gergely Theater of Kaposvár and Kolozsvár (now Cluj-Napoca, Romania) bear his name. – B: 0883, 1257, 1031, T: 7103, 7659.

**Csízio** (calendar) – a perpetual calendar consisting of 24 lines of poetry in Latin, where every two lines denote the feasts of each month in an abbreviated form. The first *csízio* in the Hungarian language was prepared between 1475 and 1500. It was later copied into the Peer Codex (1462) in manuscript form. This already contained a dream-book, horoscopes and weather lore. The peasant vernacular retained this name for all calendars even in the middle of the 20th century. The saying “*érti a csíziót*” (understands the calendar) describes a person who is regarded as wise, good and competent. – B: 1134, T: 7659. → **Codex Literature.**

**Csobánc Castle** – It is located in the Lake Balaton hills in Transdanubia (*Dunántúl*). The 376-meter-high hill on which the castle was built had already been settled since prehistoric times. Relics of the late Bronze Age and of the early Iron Age were found here. The name of Csobánc was first recorded in a document of 1272, in the possession of the Gyulaffy family for 400 years. It became a border castle after the disastrous Battle of Mohács against the Turks in 1526. The Turkish army first occupied Csobánc Castle in 1554; but later, when the Turks tried to reoccupy it, they were unsuccessful. At the time of the siege, the owner and captain of the castle was László (Ladislav) Gyulaffy. In 1690, Ádám Béri Balogh, the famous army officer of the Rákóczi Freedom Fight (1703-1711), lived there. There was a great victory over the Austrian army in 1707. Captain Márton (Martin) Szász, defender of the castle, led only a small army of 30 troops, 30 refugee noblemen, some serfs and women against the enemy, while the Austrian generals Rabutin and Kreuz led an army of 1000 troops. The enemy lost 400 soldiers but could not take the castle. After the siege they renovated the castle; but when Prince Rákóczi II's freedom fight was lost, the Austrians destroyed it. On the 250th anniversary of the siege in 1957, a plaque was put on the wall of the old tower ruin to commemorate the event. Károly (Charles) Kisfaludy wrote a novel about Csobánc in the 19th century. – B: 1078, T: 7663. → **Mohács Battles; Freedom Fight of Rákóczi II, Prince Ferenc; Gyulaffy, László; Kisfaludy, Károly.**

**Csobánka Clan** – A branch of the Aba clan, probably originated from Csaba or Csobán bailiff. During the period of King István III, (St. Stephen, 1162-1172) and King Béla III (1172-1196) he was Lord Lieutenant and “*bán*” of Esztergom and presumably the forefather of the Rédey family. – B: 1079, T: 7685.

**Csobolyó** – Drum-shaped wooden vessel in different sizes (from 5 to 20 liters) used for carrying drinking water for peasants working in the fields. It was also used for storing wine or brandy. This wooden cask was usually carried by a strap, chain or cord attached to its sides. It was used either with a straw attached to the top to drink the liquid through a hole on top of the vessel; or the cask was held high directly over the drinker's mouth. This vessel was still widely used in the first half of the 20th century, but has lost its popularity since then. – B: 1134, T: 3240.

**Csodaszarvas→Wondrous Stag.**

**Csohány, János** (John) (pen names: László Tedeji, Historiisto, Bánki) (Hajdunánás, 25 June 1934 - ) – Minister of the Reformed Church, church historian, journalist. He studied Theology at the Reformed Theological Academy of Debrecen (1956-1961), at the Philosophy Department of the University of Debrecen (1965-1970), as well as at the Protestant Faculty of Theology of the University of Vienna (1974-1975). He studied at the School of Journalism at Nyíregyháza (1995-1996). He was Assistant Minister in Debrecen between 1961 and 1970. In 1970-1971, he was head of the archival team of the Cistibiscan Reformed Diocese. From 1971, he worked as demonstrator of church history at the Reformed Theological Academy of Debrecen. From 1983 he was Head of the Church History Department; from 1990 to 1995 Professor of Church History. He earned a doctorate in Theology in 1981. From 1983 to 1985 he edited lecture notes of the Department of Church History; from 1998 he was Editor of *Hungarian Reformed Church Historical Essays (Magyar Református Egyháztörténeti Dolgozatok)*; while from 1964 to 1971, he held second position as librarian and archivist; from 1977 to 1991 he was working in the central library of the diocese, becoming its Head Librarian. From 1995 he served as a lecturer of the Theological and Mission Institute of Miskolc. From 1997 to 1999 he was a columnist of the paper *Meadow-saffron (Őszike)*; from 2000 Editor-in-Chief of *Pensioner Herald (Nyugdíjas Híradó)*. He is a member of the Community of the Hungarian Academy of Science; the Community of Hungarian Journalists; the Mission Society of the Hungarian Reformed Church; the Ferenc Kazinczy Society, and the Pro Patria Foundation. His numerous works include *Hungarian Protestant Church History 1849-1918* (1973); *Universal Church History of Recent Times (A legujabb kor egyetemes egyháztörténete)* (1974); *Universal Church History of the Age of Enlightenment (A felvilágosodás korának egyetemes egyháztörténete)* (2nd ed. 1979); *The First Millennium of Christianity (A keresztyénség első évezrede)* (1990); *The Path of Life of Jesus Christ (Jézus Krisztus életútja)* (1991); *Careers (Életpályák)* (2001); *The Protestant Military Chaplaincy in Hungary (A protestáns táborigazgatás Magyarországon)* (1994); *Studies in Church History (Egyháztörténeti tanulmányok)* (2004), and *Studies on Debrecen and on the Past of the Reformed Congregation, vols. i-iv (Tanulmányok Debrecen és a reformátusság múltjáról, I-IV)* (Debrecen, 2004, 2005, 2006, 2007). – B: 1271, 1959, 0910, T: 7456.

**Csók, István** (Stephen) (Pusztægres, 13 February 1865 - Budapest, 1 February 1961) – Painter. He studied at the School of Decorative Art (*Mintarajziskola*) Budapest, where he was student of János (John) Greguss, Bertalan (Bartholomew) Székely and Károly (Charles) Lotz. In 1886-1887, he was at the Academy of Munich and studied with Löffitz and Hackl. In 1888-1889, he was a student of Bouguereau and Robert Fleury at the Julian Academy of Paris. He lived in Munich for years and won international prizes. In 1896, he returned Hungary and joined the Artist Colony of Nagybánya (now Baia Mare, Romania) led by Simon Hollósi. He spent the summers in Nagybánya but lived in Budapest. In 1906, he settled in Paris and, under the influence of French post-impressionists, he moved toward impressionism from his earlier realism. He was a popular representative of the newer age of Hungarian painting. He was professor at the Academy of Applied Arts, Budapest (1921-1932). Among his famous paintings are *Do*

*This in Remembrance of Me (The Lord's Supper) (Úrvacsora) (1890); Baptism (Keresztelő) (1907); Thamar (1909); Züzü (1912); Still Life with Flowers (Virág Csendélet) (1929), Amalfi (1937), and a landscape series of Lake Balaton. His paintings are in the museums in Rome, Budapest and the Uffizi Gallery of Florence, Italy. He was President of the Szinyei Society (1921), the Society of Hungarian Fine and Applied Artists (Magyar Képzőművész és Iparművész Szövetség) (1949). He wrote his Memoirs (Emlékezéseim) in 1957. He won several medals, among them the Grand State Prize (1911) and was twice awarded the Kossuth Prize (1948, 1952), and the Outstanding Artist title. – B: 0872, 0934. T: 7103.→Székely, Bertalan; Lotz, Károly; Hollósi, Simon; Nagybánya Artist Colony.*

**Csókás, Ferenc** (Francis) (Bény, now Biňa, Slovakia, 23 February 1927 - ) – Farmer, engine fitter, ethnographer and folk ensemble leader. He studied at the Agricultural College of Párkány (now Štúrovo, Slovakia) and worked as a farmer from 1944 to 1952 and at Zseliz (now Želiezovce, Slovakia) and Oroszka (now Pohronský, Slovakia) between 1952 and 1960. In 1964, he studied at the College of Štětí, in the Czech Republic. From 1964 to 1966, he was an engine fitter, then production controller in the automation center of Párkány (1966-1987). After World War II, he was the first to introduce Hungarian basic education in Czechoslovakia in 1949. He was a distributor of Slovakian-Hungarian publications and wrote poems as well. In 1974, he was a leader of the Folk Ensemble at Bény, and was researching the ethnography of the Lower-Garam valley for the so-called “short skirt” (*kurtaszoknyás*) custom. His numerous prize-winning studies include *Christmas Customs in Bény (Karácsonyi szokások Bényben)* (1989); *Sagas and Legends of Bény (Mondák, legendák Bényben)*, and *Folk Customs at Bény (Népszokások Bényben)* (1990). He received the Gold Medal of Outstanding People's Artist of CSEMADOK (Czechoslovakian Hungarian Workers' Cultural Federation) (1986). – B: 1083, T: 7456.

**Csokonai Vitéz, Mihály** (Michael) (Debrecen, 17 November 1773 - Debrecen, 28 January 1805) – Greatest poet of the Hungarian Enlightenment era. He came from a Transdanubian (*Dunántúl*) Protestant minister's family. He studied first at the Reformed College of Debrecen, and later at Sárospatak. As a student he was already in contact with the literary world through Ferenc (Francis) Kazinczy and János (John) Földi. In Pozsony (now Bratislava, Slovakia), where the Hungarian Parliament was in session, he published a newspaper in verses entitled *The Diet's Magyar Muse (Diétai Magyar Múzsza)*. He was disappointed in a love affair with Julianna Vajda, he called Lilla, and left for County Somogy to teach there. He visited many places, among them Keszthely, Komárom, Kassa (now Košice, Slovakia), Debrecen, Csököly, Kisasszond, Csurgó, Pécs. His works include *Tempefői*, a satirical play, *The Widowed Mrs. Kanyó*

(*Az özvegy Kanyóné*), play, *Dorothy (Dorotya)*, comedy. His collected poems were published posthumously. His world-view fed on the ideas of the Enlightenment, especially on that of Rousseau. His exceptional ability to forge rustic and Rococo (late Baroque) elements into his artistic language as well as the perfection of his literary form

made him the most significant forerunner of the 19th century's democratic literary efforts. His lyrical poetry, like his love poems, stands out with its great spiritual and emotional richness, a wide variety of moods and refined melodiousness. – B: 0883, 1257, T: 7659.→**Kazinczy, Ferenc; Fazekas, Mihály.**

**Csollány, Szilveszter** (Sylvester) (Sopron, 13 April 1970 - ) – Gymnast. Since 1980, he has been a sportsman in the Concordia Gymnast Class of Győr (*Győri Egyetértés Torna Osztály – ETO*) From 1986 he was a gymnast in the Dózsa Club, from 2000 in the Dunaferr Club, from 2001 in the Honvéd Club of Budapest. At the European Championship in Lausanne, he earned a bronze medal on the still rings in 1990. In the final of the Europe Cup in Brussels, he was first in pommel horse in 1991. At the Barcelona Olympics, he received a sixth place on the still rings, in the vault seventh in 1992. In the same year he earned a trainer qualification at the Institute of Further Studies of the School of Physical Education. At the Paris world championships he earned a Silver Medal for still rings. In 1996, at the San Juan World Championships and at the Atlanta Summer Olympic Games he received a Silver Medal on the still rings. In 1995 he settled in the USA, working as a trainer from 1995 to 1998, when he moved back to Hungary. In 1998 he won the Gold Medal for Men's Rings at the European Championships. He continued to be a trainer at St. Louis, MO, and Sacramento, California. In the Lausanne World Championships of 1997, he again obtained a Silver Medal. He was Gold-medal winner in April 1998 at the European Championships of St. Petersburg, as well as in May in the World Cup finals at Sabae, Japan. He was Silver medallist at the Tientsin World Championships and at the European Championships in Bremen, Germany. He was also Champion at the Sydney Summer Olympic Games: Gold Medal for Men's Rings, with a score of 9.85. He was declared Sportsman of the Year 2000. He settled in Hungary during the summer of 2000. He received a Silver Medal at the Gent World Championship, Bronze Medal at the European Championships in Patras, Greece in 2002, while he was World Champion in the rings in the Fónix Hall World Championship in Debrecen, Hungary in 2002. He lived in Nagytarcsa and more recently in Sopron. Since his retirement from sports, he worked as a contractor. The new multi-purpose sports center in the Csengery Supermarket of Sopron is named after him and he founded a gymnastics school, which is also named after him. – B: 1031, 1937, T: 7456.

**Csolt Clan** – The first documented mention of the clan originates from 1221, when Csolt, the son of Csolt Senior, with the help of the castle-people of Békés, seized the Szilas land and half of the marshland that belonged to the castle and to the ancestor of the clan. Although the clan's tribe originally came from Békés, they soon settled into Zaránd and Arad Counties as well, where several Csolt place-names are still to be found. The Ábrahámffy family originated from this ancient clan. – B: 0942, T: 7685.

**Csoma Codex** – A 17th century songbook in manuscript form. István (Stephen) Csoma compiled this small, 250-page booklet in 1638 in one of the Transdanubian settlements occupied by the Turks. Similar in content to the Lugossy Codex, it is very conservative with 15 of its songs from the 16th century. It is one of the valuable sources of ancient Hungarian song-poetry and the only resource of the lyrics of many 16th century Hungarian epic songs. – B: 1150, T: 7659→**Lugossy Codex; Codex Literature.**

**Csomasz Tóth, Kálmán** (Coloman) (Tóth) (Tapolcafü, 30 September 1902 - Budapest, 20 November 1988) – Minister of the Reformed Church, music historian and hymnologist. After completing high school in Pápa (1914-1920) he studied Theology at the Reformed Theological Academy, Pápa (1920-1922), later in Dayton, OH, USA (1922-1924). He was Assistant Minister in Dayton, Lorain and Detroit, USA, then in Mezötúr and Budapest. He studied at the Eötvös College of the University of Budapest (1928-1932). He was Minister in Sárkeresztes (1932-1938) and in Csurgó (1938), and at the General Convent of the Reformed Church, Budapest (1950). He was Professor of Church Music at the Reformed Theological Academy, Budapest from 1951 to his retirement in 1979. He obtained a Ph.D. from the University of Budapest (1963) and was member, and later President of the Committee of Musicology of the Hungarian Academy of Sciences (1973-1976). He published a number of articles and essays. His works include *Reformed Hymnbook (Református énekeskönyv)* (1948); *Reformed Congregational Singing (Református gyülekezeti éneklés)* (1950); *Sixteenth Century Hungarian Tunes (A XVI. század magyar dallamai)* (1958); *The Humanist Metric Tunes in Hungary (A humanista metrikus dallamok Magyarországon)* (1967); *O wahres Wort. Fünfzig ungarische Lieder aus der Reformationzeit (Oh, True Word. Fifty Hungarian Songs of the Reformation Period)* (1983), and *Praise the Lord... (Dicséjétek az Urat...)* (1995). He was one of the leading Hungarian Reformed hymnologists in the 20th century. – B: 0910, 0878, T: 7103. → **Reformed Church in Hungary, Hungarian Academy of Sciences.**

**Csomós, József** (Joseph) (Eger, 19 June 1956 - ) – Bishop of the Reformed Church. He completed his secondary and theological studies at the Reformed College of Debrecen, between 1970 and 1980. He started his work at the Congregation of Gyula, and in the Office of the Békés Deanery. Then, together with his wife Ildikó Barta (with pastoral training), they served in Gagybátor for 16 years, as well as in 9 villages belonging to three congregations, together with affiliated church groups. In 1991 the congregation of Gönc invited him to become their minister. From 1991, in two cycles, he served as the Dean of the Abaúj Deanery. In 2003, the Cistibiscan Reformed Diocese (*Tiszáninneni Református Egyházkerület*) elected him Bishop, though he still remained at Gönc as a minister. In 2004 the congregation of Gönc established a second pastoral position, for which his wife was elected, thus securing leave from the daily congregational work for her husband. In 2009 he was re-elected bishop of the diocese, and he is also the Deputy Ministerial President of the General Synod of the Reformed Church in Hungary. – B: 1613, T: 7456.

**Csonka Antiphonale** – A 17th century liturgy and hymn collection in manuscript form carefully preserved in the library of the former Unitarian College in Kolozsvár (now Cluj-Napoca, Romania). 25 of its pages contain musical notation, the rest only lyrics. It is on microfilm in the library of the Hungarian Academy of Sciences. – B: 1094, T: 7659.

**Csonka, János** (John) (Szeged, 22 January 1852 - Budapest, 27 October 1939) – Inventor, founder of the Hungarian automobile industry. He furthered his technical knowledge in his father's blacksmith workshop and in his travels through the large factories of Vienna, Zürich, Paris and London. He became Supervisor of the Polytechnic

of Budapest, where he worked almost half a century. He constructed the first Hungarian internal combustion engine in 1882, a gas motor based on his own ideas. His experiments drew Donát Bánki's attention, later a university professor, then still a student, who started to collaborate with him. With their motors they were virtually pioneers, keeping themselves independent of the solutions of foreign factories still struggling with concepts inherited from the steam engine. With the use of valves, they preceded the German Otto-motor. Later, ahead of Daimler and Maybach, they invented the carburetor with a constant level of fuel that they patented on 11 February 1893. The principle of this patent is the basis of the carburetors of today's internal combustion engines. Csonka developed a safe ignition device called "automatic tube-ignition". Soon afterwards, together with Bánki, he constructed the first Hungarian motorcycle and motorboat. For the Royal Hungarian Postal Service, he developed a motorized tricycle in 1900, and a gasoline-driven automobile in 1904, used for quarter of a century. After his retirement in 1925, he set up a small mechanical workshop and returned to his traditional interest: the making of engines. The enlarged workshop adopted the name: János Csonka Machine Works Ltd. (*Csonka János Gépgyár RT*) in 1941. A Polytechnic High School in Budapest bears his name. – B: 0883, 1105, T: 7674.→**Bánki, Donát.**

**Csontváry Kosztka, Tivadar** (Theodore) (Kisszeben now Sabinov, Slovakia, 11 June 1853 - Budapest, 20 June 1919) – Expressionist painter. He was

originally a pharmacist, who took up painting at the age of 41. After an auto-didactical beginning, he studied at the private school of Simon Hollósy in Munich in 1894. His extravagant nature later compelled him to make adventurous trips to such places as Egypt, Greece, Lebanon, Syria, France and Italy, where he painted following his instincts alone. During most of his life he suffered from the delusion that he was misunderstood. This contributed to the steady worsening of his mental state. His pictures include *Ruins of the Jupiter Temple in Athens* (*Jupiter templom romjai Athénban*); *The Great Temple in Baalbeck* (*Nagytemplom Baalbekben*); *The Lonely Cedar* (*A magányos cédrus*), and *Pilgrimage to the Cedar Tree* (*Zarándoklás a cédrusfához*). He was a prolific painter producing large-scale works, exhibited a number of times in Budapest, although he never intended to sell any of them. He was discovered only in the 1930s, and became gradually recognized as one of the best Hungarian expressionist painters. Since then, his works have been successfully exhibited in Hungary and abroad. Most of his works are in the Gerlóczy private collection, and some in the Hungarian National Gallery. – B: 0883, 0934, T: 7653.→**Hollósy, Simon.**

**Csoóri, Sándor** (Alexander) (Zsámoly, 3 February 1930 - ) – Poet, writer, politician. He came from a farmer family and pursued his secondary studies at the Reformed College of Pápa. He started his higher studies at the Russian Institution of the University of Budapest (1951-1952). He left it for political reasons after three terms. In 1953-1954 he was a journalist at the *Free Youth* (*Szabad Ifjúság*), then at the *Literary Journal* (*Irodalmi Újság*) (1954-1955), and Editor of the *New Voice* (*Új Hang*) (1955-1956), where he was administrator. From 1968 he worked as Assistant Director at *Hungarian Film Studio* (*Mafilm*). He became active in intellectual and political opposition movements from

1980. He was one of the organizers of the Lakitelek Conference (1987), a founding member of the *Hungarian Democratic Forum (Magyar Demokrata Fórum – MDF)*, and later member of the party presidium (1988-1993). He had many responsible positions, including President of the *Credit's (Hitel)* Board of Editors (1988-1992). From 1991 to 2000 he was President of the *World Federation of Hungarians (Magyarok Világszövetsége – MVSZ)*. Since 1956 he has gradually become one of the most productive Hungarian writers, who sided with those who sought national renewal both in society and in politics. His first volume of poems appeared when he was 24. He wrote novels, essays, articles, and volumes of poetry including *Escape from Loneliness (Menekülés a magányból)* (1962); *Memories of the Visitor (A látogató emlékei)* (1977); *Green Branch in My Hands (Kezemben zöld ág)* (1985); *With Swans in Bombardment (Hattyúkkal ágyútűzben)*; *Fugitive of the Future*, collected poems (*A jövő szökevénye, összegyűjtött versek*) (2000); *The Mantle Lost at the Card Game (Az elkártyázott köpeny)*, selected poems (2004), and the *Bells Toll In Me (Harangok zúgnak bennem)*, newest poems (2009). His works in prose include *Report from the Tower (Tudósítás a toronyból)* (1963); *From Wall to Wall (Faltól falig)* (1969); *Journey During Somnolence (Utazás félálomban)* (1974); *The Half-confessed Life (A félig bevallott élet)* (1982); *The Sea and the Walnut Leaf* vols. i-ii (*Tenger és diólevél I-II*) (1994); *Twelve Stones on the River Bank (Tizenkét kő a parton)*, essays (2007), and *On the Armrest of Hell (A pokol könyöklőjén)*, anthology of poems and prose (2010). He also wrote film scripts. He was awarded a number of prizes, among them the Herder Prize (1981), the Kossuth Prize (1990), the Eva Joenpelto Prize (1995), the Hungarian Heritage Prize (*Magyar Örökség Díj*) (1997), the Gáspár Károli Prize (1997), the Balassi Sword (2006), and the Kossuth Grand Prize (2012). – B: 0874, 0878, 1257, T: 7103. → **Lakitelek, Consultation at: World Federation of Hungarians.**

**Csorba, Győző** (Victor) (Pécs. 21 November 1916 - Pécs, 13 September 1995) – Poet, literary translator. His higher studies were at the University of Pécs, where he obtained a Ph.D. in Political Science. From 1947-1948 he was in Italy on a scholarship. With his book of poems *Complaint of the Bridge (A híd panasza)* (1943), and *Release (Szabadulás)* (1947), he became a well-known poet nationwide. The main features of his *Ars Poetica* are the death-motif, the meaning of life, love and loneliness, and nature. His works include *Awakening Years (Ócsúzó évek)* biographical poems (1955); *Soul and Autumn (Lélek és ősz)* (1968); *Anabasis (Anabázis)* (1974); *The Thresholds of the World (A világ küszöbei)* (1981), and *Two Types of Time (Kétfajta idő)* (1995). His literary translations are significant. He was a recipient of a number of prizes, among them the Baumgarten Award (1947), the Grand Prix of the Literary Foundation (1991), the Kossuth Prize (1985) and the Middle Cross of Honor of the Republic of Hungary (1991). – B: 0878, 1178, 1257, T: 7103.

**Csordás, Gábor** (Gabriel) (Székesfehérvár, 24 June 1920 - New York, 4 January 1992) – Minister of the Reformed Church, theologian in the USA. He graduated from the Reformed Theological Academy of Budapest. After spending one year in Basel, Switzerland on a scholarship, he continued his studies in the United States. While he was still in College, the Dean of the Independent American Hungarian Reformed Church assigned him to serve the Hungarian congregation of Poughkeepsie, N.Y. After receiving a Master's Degree in Theology, he continued his work among the Hungarian

congregations along the Hudson River. When the position of minister became vacant at the Hungarian Church in Bronx, N.Y. he accepted the unanimous call of the congregation. However, due to a shift in the demographic pattern of the Hungarians, he found it necessary to relocate. Between 1958 and 1960, a new church was built in New York's East Side. He also took an active part in the life of the Hungarian community. He regularly reached out to the oppressed people of Hungary through Radio Free Europe. In addition, he organized radio broadcasts of church services for the Hungarian community in New York City and surroundings, where thousands listened every Sunday morning. – B: 0906, T: 7617.→**Reformed Churches in America.**

**Csörgő, Miklós** (Nicholas) (Egerfarnos, 1932 - ) – Mathematician, statistician. He graduated from the University of Economics, Budapest with a BA degree (1955). He was lecturer at the University between 1955 and 1956. He moved to Canada in 1957, and continued his education at McGill University, Montreal. He obtained an MA (1961) and Ph.D. (1963). He was a Post-doctoral Fellow in Mathematics at Princeton University, NJ (1963-1965). He was a NRC Canadian Graduate Student Scholar, McGill University (1960-1963) and Associate Professor from 1968. He was a Canada Council Fellow (1976-1977) and a Killam Senior Research Scholar (1978-1980). He was visiting professor teaching mathematics at various universities, including the University of Vienna (1969-1970) and the University of Utah (1990-1991). His field of research is probability and statistics. His books include *Quantile Process with Statistical Applications* (1983); *Strong Approximations in Probability and Statistics* (1981); *An Asymptotic Theory for Empirical Reliability and Concentration Process* (1986), and *Weighted Approximations in Probability and Statistics* (1993). He is a member of the Hungarian Academy of Sciences, the Canadian Mathematical Society, the American Mathematical Society, and the Bernoulli Society of Mathematics and Statistics. – B: 0893, T: 4342.

**Csörsz Trench System** – An extensive channel system built on the Great Hungarian Plain (*Nagyalföld*) on the northern and eastern borders of the Sarmatian settlements after 294 AD. It has two branches: the northern one runs from the River Tarna to the River Tisza, while the longer, southern line runs from Gödöllő to the River Tisza. It served as border for the land of the Sarmatians until 375. – B: 0942, 1230, T: 7676.

**Csortos, Gyula** (Julius) (Munkács, now Mukacheve, Carpatho-Ukraine, 3 March 1883 - Budapest, 1 August 1945) – Actor. His instructors predicted a great future for him even before he completed his studies at the Academy of Dramatic Art of Budapest in 1903. After Debrecen, Szeged and Temesvár he joined the relatively new Folk Theater (*Népszínház*), Budapest. Soon he worked at the Hungarian Theater (*Magyar Színház*), where he performed twelve leading roles in a single year, including Kormos in Drégely's *Son of Fortune* (*Szerencse fia*), and Flambeau in Rostand's *The Eaglet* (*A sasfiók*). Then he achieved great success for two years at the Comedy Theater (*Víg Színház*) as the Actor in Molnár's *Guardman* (*Testőr*); János in Bródy's *The Medical Student* (*A orvos*), and Felix in Szomory's *Györgyi, Dear Child* (*Györgyike gyermek*). In 1922, he was with the Renaissance Theater (*Reneszánsz Színház*), and in 1923 he was playing at the Inner City Theater (*Belvárosi Színház*). He continued this nomadic life until 1927. Later, he entered into a contract with the National Theater of Budapest (*Nemzeti Színház*); however, at the

same time he also accepted roles elsewhere. At the National Theater his most important roles were Shylock in Shakespeare's *The Merchant of Venice* (*A velencei kalmár*), and Falstaff in *The Merry Wives of Windsor* (*A windsori víg nők*). From 1929, he was again with the Hungarian Theater (*Magyar Színház*). In 1932, he was offered the two most important roles of his career: the leading role in Molnár's *Liliom* (adapted into the Rodgers and Hammerstein musical *Carousel* in 1945); and Counselor Clausen in Hauptmann's *Before Sunset* (*Naplemente előtt*). After that it was at the National Theater again where he played in roles worthy of his abilities: Ezra Mannon in O'Neill's *Morning Becomes Electra* (*Amerikai Elektra*), and Lucifer in Madách's *The Tragedy of Man* (*Az ember tragédiája*). He was outstanding and popular as a film-actor as well, e.g. in *Hyppolit, the Butler* (*Hyppolit, a lakáj*) with Gyula (Julius) Kabos. After 1938 he acted less and less. His hectic lifestyle wore out his health; he was already seriously ill at the end of World War II in 1945. His last performance was in the role of Smyrnov in Chekhov's *The Bear* (*A medve*). He was one of the greatest of Hungarian actors. His acting career comprises two hundred and fifty plays. He appeared always in the most versatile, attractive and interesting roles. – B: 0870, 1445, T: 7684. → **Molnár, Ferenc; Bródy, Sándor.**

**Csuka, Judit** (Zágorec) (Muraszombat, now Murska Sobota, Slovenia, 24 March 1967 -) – Poetess, educator, journalist, librarian. She studied in Göntérháza (now Genterovci, Slovenia) and Lendva (now Lendava, Slovenia), where she matriculated in 1986. Then, in 1991, she started her higher studies at the University of Budapest, where she read Hungarian Language and Literature and Library Sciences. Between 1991 and 1994, she worked as a journalist at the *People's Newspaper* (*Népújság*). From 1995 she was a Hungarian language teacher, first at the bilingual primary school, then at the bilingual high school in Lendva. Since 2000 she has been a school librarian, continuing also her postgraduate studies. Her writings appeared in newspapers in Slovenia and in Hungary. Among her writings are *Storm-stricken* (*Viharverten*) for friends (2001); *Her Selected Poems* (*Válogatott versei*) poems (2003); *In the Footsteps of the Zrinyis* (*A Zrinyiek nyomában*) studies (2003), and *Driven out of Eden* (*Kiűzve az Édenből*) poems (2003). She wrote a handful of studies on linguistics and literary history, library essays, interviews and reviews. She is the recipient of seven prizes, among them the National Prize of Literary Composition (1999), the Acknowledgement of the Amaro Drom Poem-writing Competition (2000). – B: 1169, T: 7103.

**Csuka, Zoltán** (Zichyfalva, 22 September 1901 - Érdliget, 23 March 1984) – Poet, translator of literary works. He received his education in Pécs, where he launched his career as a writer and publisher. His first volume of poetry appeared in 1920. In 1921 he emigrated to Újvidék (now Novi-Sad, Serbia-Montenegro) in the Voivode district that was ceded to what was to become Yugoslavia. In 1922, he joined the newspaper *Voivode* (*Vajdaság*) and concurrently started an activist paper called *Road* (*Út*). At the end of the 1920s, he began to organize the Hungarian literary life of the Voivode region and founded several literary publications. Between the two World Wars, he became an important spokesman for and promoter of Hungarian literature and culture in Yugoslavia. He returned to Hungary in 1933, and settled in Érd, where he published the journal *Horizon* (*Láthatár*) until 1944, as well as the *Yugoslav-Hungarian Review* (*Jugoslavensko-Madarska Revija*), a quarterly scientific journal. From 1945 he devoted

his time to translating Serbian, Croatian and Slovenian novels into Hungarian. From 1950-1955, the Communist regime imprisoned him, based on trumped-up charges. Following his rehabilitation in 1955, he devoted his time to poetry and the dissemination of Yugoslav literature. His book, *The History of Literature of the Peoples of Yugoslavia (A jugoszláv népek irodalmának története)*, was the first to provide an overview in Hungarian on the development of Serbian, Croatian and Slovenian literature, from their beginnings until 1945. With the donation of his book collection in 1976, he founded the *Good Neighborhood Library (Jószomszédság Könyvtára)* in Érd. He published a wealth of articles, books and poetry. He was a recipient of the Attila József Prize (1965), the Prize of the Association of International Translators (1977) and the Matica Srpska Commemorative Medal of Yugoslavia (1981). – B: 0883, 0878, 1257, T: 7617.

**Csukás, István** (Stephen) (Kisújszállás, 2 April 1936 - ) – Writer, poet. His higher studies were at the University of Budapest, where he read Political Science and Law. He did not complete his university studies; instead, he became a free-lance writer of juvenile books, film-scripts, TV- and radio plays. He was a contributor to the Hungarian Television (1968-1971) and was Editor-in-Chief at the Móra Publishing House (1978-1985). He has been an editorial board member of the magazin *New Time (Új Idő)*, and at the *Kid's Magazine: (Kölyök Magazin)* from 1993, and Editor-in-Chief of the magazine *Red Point (Piros Pont)* since 1993. He has been Honorary President of the Kun Society since 1998. His works include *Foreword to Love (Előszó a szerelemhez)* poems (1965); *Tales of a Winter Cricket (A téli tücsök meséi)* fable-novel (1974); *Elegy of an Empty Paper (Az üres papír elégiája)* poems (1980); *Süsü Falls into a Trap (Süsü Csapdába esik)* fable-novel (1988); *Adventuring in Letter-Country (Kalandozás betűországban)*, fable-novel (1990), and *Collected Poems (Összegyűjtött versek)* (1996). He is the recipient of a number of prizes, among them the Grand Prix of Hollywood for the best film of the year for children (1977), the Andersen Prize (1984), the Life-time Prize (1996), and the Kossuth Prize (1999). – B: 0875, 0878, 1257, T: 7103.

**Csupó, Gábor** (Gabriel) (Budapest, 1952 - ) – Film animator, musician. He received his animation training at the Pannonia Studio, Budapest. He left Hungary for political reasons in 1975 and went to Stockholm, where he helped produce Sweden's first animated feature film and met his future partner, American graphic designer Arlene Klasky. Together, in 1981, they formed Klasky Csupo, Inc. They have guided their animation studio to a position of leadership in the animation and entertainment industry. Known for innovation and imagination, Klasky Csupo Inc. has created and produced some of the most popular animated television series, including *The Simpsons*, *Rugrats*; *Duckman*; *Aaahh!!!*; *Real Monsters*, and *Santo Bugito*. A multiple Emmy Award and Cable Ace Award winner, Klasky Csupo, Inc. is one of the world's leading animation studios. Beside his worldwide success with animated films, Csupó demonstrated his love for music by leaving all his belongings behind, except his collection of 500 record albums, when he left Hungary for Sweden in 1975. He formed Tone Casualties in 1994, and released two CDs in collaboration with the *avant-garde* Accidental Orchestra and his first solo recording. – B: 1279, 1282, T: 7103.

**Csupor Clan** – An old Hungarian clan, died out during the Mongol-Tartar invasion of Hungary in 1242. Their estates were near the castle of Csongrád. – B: 0942, T: 7685.

**Csurgó Gradual** – A late Hungarian Protestant liturgical hymnbook from the second half of the 1630s. It is in manuscript form and the last part is heavily worn, indeed mutilated. Some of the text is regarded as primary source and is named after the place of its discovery. – B: 1197, T: 7659.

**Csuri, Charles** (USA, 4 July 1922 - ) – Artist, teacher, pioneer in computer art, formerly an “All American college football” player. He is of Hungarian ancestry, co-founder of Crenston and Csuri Productions. Directed over 25 major research projects for the National Science Foundation, Navy and Air Force, and his findings **are** applied to flight simulation, computer-aided design and the special effects industry. His works are exhibited at the Smithsonian Institution in Washington, D.C. and at the Institute for Contemporary Art in London. He is also represented in a number of collections, including the New York Museum of Modern Art (where his computer films are also held). Ever since 1964, he has been experimenting with computers as an artistic medium, especially in digital computer imaging, making many important contributions to this field. Hence he is called the “Father of Digital Art”. He is a professor emeritus at the Ohio State University. In 2000, Charles Csuri received both the 2000 Governor's Award for the Arts for the best individual artist, and The Ohio State University Sullivant Award for his lifetime achievements in the fields of digital art and computer animation.– B: 1031, T: 7456.

**Csurka, István** (Stephen) (Budapest, 27 March 1934 - Budapest, 4 February 2012) – Writer, politician. He graduated from the István Szegedi Kis Reformed High School, Szeged (1952). He studied dramaturgy at the Academy of Dramatic Art, Budapest. He was a Commander in the National Guard at the Academy during the 1956 Revolution. After its fall he was sentenced for 6 months in the Kistarcsa internment camp. For a while he worked as a freelance writer; then became contributor to the journal *Hungarian Nation* (*Magyar Nemzet*) (1973-1986). He was a member of the editorial board of the journal *Credit* (*Hitel*) (1988-1989). He became Editor-in-Chief for the weekly *Hungarian Forum* (*Magyar Fórum*) (1989-1990). He made his debut as a writer in 1954 and, in 1956, his first volume of short novels *The Fire Jump* (*Tűzugratás*) was published. He wrote feature film scores such as the *Seven Tons of Dollars* (*Hét tonna dollár*), radio-plays, short novels and plays such as *Deficit* (1970), and *Dead Mines* (*Halott aknák*) (1971). In 1972, he was silenced due to his anti-government statements, and again in 1986 for his essay, the *Unacceptable Reality* (*Elfogadhatatlan realitás*), published in New York by Püski Publisher. In it he argued for the case of the Hungarian minorities in neighboring countries of the Carpathian Basin. In September 1987, he delivered one of the keynote lectures in the Lakitelek meeting at the founding of the *Hungarian Democratic Forum* (*Magyar Demokrata Fórum – MDF*). As its Vice-President, he became one of its leaders. When on account of a disagreement he was expelled from the Hungarian Democratic Forum Party (*Magyar Demokrata Fórum – MDF*), he founded the rightist *Hungarian Truth and Life Party* (*Magyar Igazság és Élet Pártja – MIÉP*) in 1993. He became its President and a Member of Parliament in the 1998 elections. At the 2002 and 2006 elections his party did not secure enough seats to remain in Parliament. Nonetheless, he remained a characteristic writer and politician. In October 2011 he was appointed Superintendent and actor György (George) Dörner Director of the New Theater (*Új*

*Színház*), Budapest. He was a recipient of the Attila József Prize (1969, 1980), The Alföld Prize (1980), and the Theater Critics' Prize (1979-1980). – B: 1018, 0878, 1257, T: 7103. → **Political Parties in Hungary; Lakitelek, Consultation at.**

**Csúry, Bálint** (Valentine) (Egri 13 February 1886 - Debrecen, 13 February 1941) – Linguist. His higher studies were at the University of Kolozsvár (now Cluj-Napoca, Romania), where he acquired a High School Teacher's Degree in 1911, and a Ph.D. in philosophy in 1917. From 1910, he taught at the Reformed High School, Kolozsvár. From 1932, he was Professor at the University of Kolozsvár. In 1938, he established the Hungarian Language Research Institute in Debrecen. His field of research was primarily on dialects. He published with A. Kannisto, a Y. Wichmann's inheritance, the *Dictionary of Hungarian North Moldova Csángó and Hétfalu Csángó Dialects* (*Wörterbuch des ungarischen Moldauer Nord Csángó und Hétfaluier Csángódialektes*) (1936). Among his works are: *Count József Teleki as Linguist* (*Teleki József gr. mint nyelvész*) (1909); *Epistemological Research in Linguistics* (*A nyelvtudomány ismeretelméleti vizsgálata*) (1913), and *Einführung in die ungarische Sprache* (*Bevezetés a magyar nyelvbe*) (1936). He was a corresponding member of the Hungarian Academy of Sciences. – 0883, 1257, T: 7103.

**Csutoros, Elek** (Alec) (Kismarja, 1865 - 1950) – Minister of the Reformed Church in the USA. He studied in the Reformed College of Debrecen and at the Reformed Theological Academy of Debrecen, graduating in 1889. He later assumed the position of chaplain and school principal; but did not receive any call to a Parish in Hungary. Therefore, he applied for Parish ministry position at the Hungarian Reformed Church in Cleveland, Ohio. On 7 October 1898, he set sail for the New World with his wife and child. Over a period of thirty-eight years, he worked tirelessly as an American-Hungarian pastor. He had a unique ability for organizing churches and societies, and he played an important role in American-Hungarian public life. He was President of the Hungarian Reformed Federation from 1899 to 1905. He was elected again in 1910. However, he resigned a year later when he received an invitation to follow in his father-in-law's footsteps as pastor in the town of Sitke, in County Bihar, Hungary. However, the family was unable to get used to the simple quiet life, and a year later, the family returned to America and went to southern Ohio to carry on missionary work among the Hungarian miners. In 1913, Rev. Csutoros became Pastor of the Cleveland West Side Church, a post he held for 13 years. In 1926, he resigned and accepted the invitation of the church in Columbus, Ohio. In 1930, the István Tisza University of Debrecen granted him an Honorary Doctorate. – B: 0906, T: 7684. → **Reformed Churches in America.**

**Csutoros, Stephen W.** (New York, NY, 1900 - 1992) – Minister of the Reformed Church in the USA. He was born in the parsonage of the Hungarian Reformed Church in New York, led by his father, who distributed food to needy immigrants struck by the economic panics in 1903 and 1907. The food lines left a lasting impression on him. Although he was born in the United States, he devoted his life to helping another generation of immigrants. In 1915, work began on the First Hungarian Presbyterian Church on Buckeye Road. It is the church that eventually became his parish. He did not make an immediate decision to enter the ministry. In World War I, he was flying companion of Captain Eddie Rickenbacker on the Western Front. In 1922, he entered the

US Military Academy at West Point, N.Y. A year later, he chose the ministry over the military. The scenes of his childhood were repeated at his church during the Great Depression. After the Hungarian Revolution and Freedom Fight in 1956, the State Department chose him to work with Hungarian refugees due to his familiarity with American customs and his knowledge of Hungarian traditions. He went to Vienna and “with the crisp incisiveness developed by his West Point training, procured visas for 510 relatives of Clevelanders”, as one reporter wrote. – B: 0906, T: 7684.→**Reformed Churches in America.**

**Csütörtökhely** (now Spissky-Stvrtok in Slovakia) – Long ago, it was a town, today it is a village. Originally, it was settled by border-guard Szeklers after the Magyar settlement of the Carpathian Basin in 896 AD. Its Szapolyai Chapel is the most beautiful Gothic Chapel in the former Northern Hungary (Upland, *Felvidék*, now Slovakia), built in 1473. Its stained glass windows preserved the pictures of famous Hungarian historical figures. The altarpiece, dated from 1450, depicts the Ascension of the Virgin Mary. In 1668, Count István (Stephen) Csáky II (1635-1699) founded a Franciscan monastery in the vicinity of the chapel in order to be its caretaker. Architect Frigyes (Frederick) Schulek renovated the building in the 19th century. – B: 1236, T: 7103.→**Schulek, Frigyes.**

**Csuz, János** (John) (14th century) – Commander-in-Chief. He was in the service of King Lajos I (Louis the Great, 1342-1382). During the campaign against the Neapolitan kingdom in 1347, he took upon himself the thankless defense of the Castel San Angelo in Rome, and broke the siege of Manfredonia. He became *Bán* (viceroy) of Croatia and Dalmatia. He fought successfully against the Venetian Republic. Partially by the power of arms, partially by voluntary submission, he re-conquered most of the Dalmatian coastal cities for the Hungarian Crown. – B: 1078, T: 3233.

**Cukor, Adolf** (Zukor) (Ricsé in northeastern Hungary, 7 January 1878 - Los Angeles, USA, 6 October 1976) – Film producer. Completing his high school studies at Mátészalka, he became an apprentice in the village grocery store. In 1898 he emigrated to the United States of America. He worked in a soda water plant in Chicago, and later owned a furrier shop. He opened his first cinema in 1904; and in 1910 founded the film company which later became world famous as Paramount Pictures. His name was immortalized in Los Angeles on the Walk of Fame. – B: 0883, 1105, T: 7685.→**Cukor, György.**

**Cukor, György** (George Zukor) (New York, NY, USA, 7 July 1899 - Los Angeles, January 24 1983) – Producer. He was born into an immigrant Hungarian-Jewish family. His career started in Chicago, USA in 1918, where he worked as an assistant theater director. The following year he directed plays on New York’s Broadway. He worked with Adolf Zukor at the Paramount Film Company in 1929, then worked for Metro Goldwin Mayer Studios in 1932. He became one of the greatest film directors in Hollywood. He directed 34 feature films, among them: *David Copperfield*, *Dinner at Eight*, *Women*, *Philadelphia Story*, *A Star is Born*, *My Fair Lady*, *Gas-Light*, and *Blue Bird*. He worked with Greta Garbo, Ingrid Bergman, Judy Garland, Katharine Hepburn, Jane Fonda, Ava Gardner, Marilyn Monroe, Liz Taylor, Rex Harrison, Yves Montand, Charles Boyer and Spencer Tracy. He won the Oscar Prize in 1964. He never visited

Hungary but was fluent in the Hungarian language. – B: 1037, 1031, T: 7103.→**Cukor, Adolf.**

**Cult of the Dead** – A basic form of religious cults. Among its components are love, at other times fear, still at other times compassion. As to paying of last respects, ideas and customs have differed: cremation, burial, shriveling, embalming, and burial under water have all been employed. Due to their nomadic way of life, the ancient custom of the Hungarians was cremation; but there are memorials of underwater burials as well. Of these customs, Christianity first adopted burial and later cremation. The cult of the dead is primarily for the individual, but is also manifested by the observance of *All Saints Day* (*Mindszentelek*) appointed by the Catholic Church, and in some nations by the commemoration of heroes on certain days. – B: 1138, T: 7677.

**Cumania, Greater** (*Nagykunság*) – This is a huge region between the middle course of

the River Tisza and the Hortobágy steppe – the Great Hungarian Plain - to the East. It was named after the Cumanians who were settled in the area after the Tartar-Mongol invasion of 1242. Place-names also refer to them: Kunhegyes, Kunmadaras, etc. The House of Habsburg sold this area in 1792 to the Order of the Teutonic Knights to cover their war

expenses, and this started the fight of the Three Districts: the *Jászság* (Jazyg Land), *Kiskunság* (Lesser Cumania) *Nagykunság* (Greater Cumania) to regain their former privileges. Greater Cumania is the successor of the Three Districts. Its best-known settlements are now fast-developing towns: Karcag, Kisújszállás, Kunszentmárton, Mezőtúr, Túrkeve. It is one of the important grain producing areas of Hungary; and considerable rice cultivation is also flourishing on its irrigated areas. – B: 1134, 1138, T: 7456.

**Cumania, Lesser** (*Kiskunság*) – This area is situated between the southern approaches of Budapest and Szeged, 140 km to the southeast, diagonally across the Danube-Tisza interstice. It got its name after the Cumanians (*Kunok*), who were settled in this area by King Béla IV (1235-1270) after the Tartar-Mongol Invasion in 1241-1242. It was formed by the amalgamation of the Seats of Halas, Kecskemét and Mizse, consisting of three towns, eight large villages, and numerous *pusztas* (steppes). Its center is the town of Halas, now Kiskunhalas, the name probably going back to the time of the first settlement of Cumanians in the area in the 13th century. Its medieval inhabitants had become largely Hungarians by the 16th century and developed a high level of cultural life. The 150-year-long Ottoman-Turkish occupation caused large-scale devastation and extensive abandonment; and later, in more peaceful times, widespread ethnic mixing occurred. By the early part of the 18th century, there were only five larger towns in the Cumanian region: Fülöpszállás, Kiskunhalas, Kiskunlacháza, Kunszentmiklós and Szabadszállás, while Kiskundorozsma and Kiskunfélegyháza were formed later. – B: 1134, T: 7456.

**Cumania, Lesser, National Park** (*Kiskunsági Nemzeti Park*) – The second National Park in Hungary, in the Danube Tisza Interstice, established in 1975. Its total area is

30.625 hectares (75.602 acres) in six separate areas: (1) An autochthonous forest and a fringe forest of the Tisza backwater; the historic Alpár's Field (*Alpár mezeje*) occurs here. (2) The sodic-soil *puszta* (steppe) of Lesser Cumania, the second largest *puszta* in Hungary after the Hortobágy, is also the habitat of the protected bustard (*túzok*) bird. Ethnographic treasures of the area include the traditional building structures of the shepherd's world. (3) Sodic lakes of Lesser Cumania providing hatching and/or resting places of 70-80 species of birds. (4) Sand dunes of the primeval Danube at Fülöpháza, the only existing sand dunes in Central Europe, still formed by the wind. (5) Lake Kolon of Izsák and the world of reeds and meadows of the low-lying moorlands of the Great Plain. This marshland is the home of ash (*Fraxinus*) and alder (*Alnus*) trees and includes the Kargala marshland of Orgovány. It is the last continuous indigenous area in its original state, once so characteristic of the Great Plain. (6) *Bugac*, the place of the breeding studs of the Hungarian cream-colored horses. Its outstanding natural assets include plants that are characteristic of shifting dunes. An entrancing area is the juniper grove where the original organic world is in its primeval and undisturbed state among the hill-sized sand dunes. Hungarian gray cattle and the Hungarian variety of the *racka* sheep graze on the surrounding Plains (*puszta*). – B: 1237, T: 7456.

**Cumanian Codex** (*Kun*) – *Codex Cumanicus*, originally and erroneously known as *Petrarca Codex*, written between 1303 and 1362 for the Crimean Tartar missionaries, who spoke the Kipchak language. This is a long-standing problem: what language did the Cumans speak in the 13th century? According to György (George) Hazai, professor of Turkic studies at the Eastern Institution in Berlin, their language had a Turkic character. He came to this conclusion based on his analysis of the “Cumanian Lord's Prayer”. – B: 0178, T: 7659. → **Codex Literature; Cumanian Lord's Prayer.**

**Cumanian Ethnic Regions** – The collective name for the parts of the Great Plain of Hungary inhabited by the Cumans and Jazygs (*Jászok*). Historically, three larger areas developed independently of each other: the *Jászság* (Jazyg Land), the *Kiskunság* (Lesser Cumania) and the *Nagykunság* (Greater Cumania). – B: 1138, T: 7456. → **Jászság (Jazyg Land); Lesser Cumania; Greater Cumania; Jazygs.**

**Cumanian Language** – It is a dead language of Turkic origin belonging to the Kipchak language group. The most important language record is the *Codex Cumanicus* of the 14th century, preserved in Venice, although the Codex says this language is not Cuman but Tartar. At the end of the 12th century, a significant number of *Kipchak* speaking people joined the Cumans; the Cumanian Codex possibly preserving their language. Some loan words in the Hungarian language preserved its memory. – B: 1138, T: 7669. → **Cumanian Codex.**

**Cumanian Lord's Prayer** – Several Turkic-Tartar language Lord's Prayer fragments are known by this name. Experts already studied them in the 18th century. Copies are preserved at the library of the Debrecen Reformed College, and at the municipal archives of Kunszentmiklós, together with a few song fragments. The so-called *Cumanian (Kun) Codex* preserved its text. The Cumanian Lord's Prayer was still used by elderly people in the Kiskunság region in the mid 20th century. – B: 1078, T: 7682. → **Cumanian Codex.**

**Cumanians (Cumans) (*Kuns*)** – Turkic people, who first appeared around 900 A.D. in the area of the Volga and Jalk rivers and in the Caucasus region. They were made up of Oguz-Turkic-speaking and remnant Hun tribes. In 1068 the Cumanians settled immediately east of Transylvania (*Erdély*, now in Romania) at the outer, eastern foothills of the Carpathian Mountain Range, where they established their country, Cumania, thus becoming Hungary's neighbour.

The new neighbour attacked Hungary three times. The first time was in 1071, at Kerles (Cserhalom), the second time in 1085, at Bokony, and the third time in 1095 at Pogányos, on the shores of the River Temes. On every occasion the Hungarians defeated the Cumanians, reclaiming their properties and freeing the prisoners. When the Byzantines defeated the Pechenegs (*Besenyők*) with the help of the Cumanians, the attack was so powerful that it frightened even the assisting Cumanians. Thereafter, they kept as much distance from Byzantium as possible and withstood repeated attacks in Cumania, in present-day Moldavia for 150 years. Hungarian missionaries regularly visited them and the Pope created a bishopric at Milko in 1228.

The Mongol army defeated the Cumanians in Russia in 1238, which marked the end of the Cumanian Empire. Some Cumanians accepted Mongol authority; but some 40 thousand families, under the leadership of Kötöny, asked permission from King Béla IV (1235-1270) to settle in Hungary. It was granted and they settled down, scattered over the royal estates. The Mongol-Tartar hordes devastated Hungary in 1241-1242. When the Hungarians realized that Cumanian auxiliary units fought together with the Tartars, they turned against the Cumanians and killed their leader, whereupon the Cumanians left Hungary, causing much devastation. However, King Béla IV called them back to Hungary in 1246, and settled them between the Rivers Danube and Tisza in areas devastated by the Tartars. By the beginning of the 15th century, they became part of the Hungarian population. – B: 1078, 1230, T: 7684. → **Cumanian Codex; Cumanian Ethnic Regions; Cumanian Language; Pechenegs; Hungary, History of.**

**Cumanian Tumulus, Mound Grave** – Mounds erected over the graves of important people of the Migration Period. Some 13th century writers, such as Alberichus, Monachus and Rubruquis, unanimously show that the Cumanians used to erect large mounds above their graves, called *kurgan* (korhan), Hungarians usually called them "*kunhalom*", i.e. "Cumanian mound". Originally, an east-facing stone statue was placed on top of the mound, the statue holding a cup in its hands at navel level. The people of the Great Hungarian Plain call various hills also Cumanian mounds, even if they are (as they sometimes indeed are) simply natural geomorphological phenomena. However, they are mostly artificial man-made structures occurring everywhere from the Great Plain across Eurasia, as far as Korea. Some have survived from the Copper Age. Various nomadic peoples erected them and used them for settlements or burials. Excavations proved their origin and use. Their height varies from half a meter to several meters. In Hungary one of the most interesting mound is Mágó Hill near Vésztő, where nine settlement levels have been excavated, stretching from Neolithic times to the Bronze Age. 36 Cumanian tumuli occur in the Nature-Protection Area of Szabadkígyós. – B: 0942, T: 7456.

**Cumans** → **Cumanians.**

**Curse of Turan** (*Turáni átok*) – There is a wide-spread belief and saying among Hungarians that the nation is under the ancient curse of "Turán", and all sorts of misfortunes, discords and national disasters that struck Hungary in its 1100-year history are attributed to it. Turan is the Hungarian name of an Asian steppe where the ancestors of the Hungarians are believed to have come from. According to legend, it all started when Vajk, that is István I, the first Christian king of Hungary (later St. Stephen, 997-1038) forced the Christianization of Hungarians, and the *Shamans* (*Táltosok*), priests of the old religion imposed a curse upon the Hungarians. According to one version, the curse was that Hungarians should quarrel with each other for a thousand years. According to another version there should be discord among Hungarians while they remain "followers of Rome", i.e. the Christian religion. – B: 1350, 7617 T: 7617.

**Curtis, Tony** (Bernard Schwartz) (Bronx, New York, NY, USA, 3 June 1925 - Las Vegas, Nev., USA, 29 September 2010) – Actor. His Jewish parents emigrated from Mátészalka, Hungary to New York. He spoke only Hungarian until the age of six. During World War II, he joined the Marines in 1943. After the war he studied acting at the New Society Academy, New York and entered the world of acting. He was a member of the Greenwich Theater, New York, the Empire Players Theater, the Cheery Lane Theater, and the Drama Workshop of the Walter Whitman Company. Finally he ended up in Hollywood and was contracted by Universal Film Studio in 1949, where he remained. He emerged as one of the finest actors of his era. He acted in more than 123 movies, some of which are: *Houdini*, *Spartacus*, *Murder in Three Acts*, *The Boston Stranglers*, *Lepke*, *Sextet*, *Tarzan in Manhattan*, *The Mummy Lives*, *Vega*, *Goodbye Charlie* and *Some Like it Hot*. He was also a skilled painter in oil and had several exhibitions. He wrote about his own life *Tony Curtis: An Autobiography* (1993). The Hungarian National Gallery holds some of his paintings. He visited Budapest in 1996, in 2003, and in 2009. He established a foundation for the renovation of the Dohány Street Synagogue, participated in a Hungarian tourist film, introduced his autobiography, and exhibited his paintings. Curtis was one of the famous film-legends of Hollywood in the second half of the 20th century. He earned many prizes and awards, among them the Officer Cross of the Republic of Hungary in 1996. – B: 1037, T: 7103.

**Curtiz, Michael**→**Kertész, Mihály**.

**Cyprian, Jaisge** (1704 - 16 April 1775) – Physician, inventor. An orphan, he was raised by the monks of the Red Monastery in the foothills of the Carpathian Mountains in what was then Northern Hungary (Upland, *Felvidék*, now Slovakia). He was trained by a surgeon at Lőcse (now Loviče, Slovakia) and later, after some study tours abroad, he returned to the Monastery, where he was physician, barber, pharmacist and chef of the monks. He constructed a mechanism in 1768, considered to be the forerunner of the glider plane. He made several successful glides with it from the nearby Crown Mountain. No data have remained about the mechanism, as the Bishop of Nyitra (now Nitra, Slovakia) labeled it as a contraption of the devil, and was burned. The Bishop even started court proceedings against Cyprian charging the inventor with devilish machinations. Cyprian was saved from serious punishment only by the edict of Emperor József (Joseph) II (1780-1790), who dissolved the religious orders. He can safely be considered as the inventor of the modern glider. Similar efforts were made only many

years later. Documents pertaining to the experiments were found by Tivadar (Theodore) Ács in the archives of the Abbey of Zoborhegy (now in Slovakia). – B: 0883, 1226, T: 7674.→**József II, King and Emperor.**

**Czakó, Gábor** (Gabriel) (Csaba) (Decs, 14 September 1942 - ) – Writer, playwright. His higher studies were at the University of Pécs, where he read Law (1961-1965). He worked as a lawyer between 1965 and 1972. He was a contributor to the weekly *New Mirror* (*Új Tükör*) (1978-1979), and to the literary journal *Moving World* (*Mozgó Világ*) (1979-1983); afterwards he worked for other journals and reviews. In 1990 he became a counselor to Prime Minister József Antall. From 1990 he was Editor-in-Chief of the *Hungarian Review* (*Magyar Szemle*). Between 1997 and 2001 he was a representative of the *Hungarian News Agency* (*Magyar Távirati Iroda*). Since 1997 he has worked for Hungarian TV. His works include *The Room* (*A szoba*) novel (1970); *Saviour* (*Megváltó*) novel (1975); *Várkonyi Chronicle* (*Várkonyi krónika*) novel (1978); *The Smile of the Creator* (*A Teremtő mosolya*) essays (1991); *Golden Gate* (*Aranykapu*) novel (1999), and *Initiation* (*Beavatás*), essays (2000). He is recipient of the Kortárs Prize (1994), the Attila József Prize (1995), and the Kossuth Prize (2011). – B: 0876, 0878, T: 7103.

**Czakó, Jenő** (Eugene) (Czmorek) (Kétfodony, 21 December 1901 - Cegléd, 5 August 1958) – Minister of the Reformed Church, church historian. He studied Theology at the Reformed Theological Academy, Budapest (1921-1922). He spent three years studying abroad at the *Faculté Libre de Théologie Protestante*, Montpellier, France (1922-1923), and at Budapest again (1923-1924). In 1924-1925 he finished his studies at the University of Geneva, Switzerland. In 1925, sponsored by the United Scottish Church in Scotland, he studied at New College, Edinburgh. On 14 September 1928 he received his qualification as a minister. In 1929 he moved to Cegléd, where he established a family, and from 1929 taught religion at the Lajos Kossuth High School. He was also District Supervisor of Religious Education and, as a British Council member, he organized international conferences with Sándor Csia, Sándor Czegléy, Baron Pál Podmaniczky, Sándor Karácsony, Aladár Ecsedy, and others. He studied and wrote essays on the life of Saints, such as St. Theresa of Avila, St. Augustine, and St. Francis of Assisi, and later, on Blaise Pascal, Martin Luther, John Calvin, George Fox, and John Wesley. He prepared an abridged translation of John Bunyan's autobiographical work, the *Grace Abounding*. He also made a translation of the *The Pilgrim's Progress* of John Bunyan. His *Chapters from the History of Modern Revivalism; Universal Church Historical Studies* (*Fejezetek az Újabbkori Ébredések Történetéből; Egyetemes egyháztörténelmi tanulmány*) was published by György (George) P. Szabó in 2002, in Budapest. He wrote a standard work on Jansenism. His various writings, including manuscripts, are kept in the Ráday Library of the Reformed Church in Hungary, Budapest. He translated many religious songs from English, and composed original songs as well. Jenő Czakó was an outstanding figure of the revivalist movement in the 20th century. – B: 0883, 1162, T: 7684.→**Csia, Sándor; Czegléy, Sándor Sr; Karácsony, Sándor; Ecsedy, Aladár; P. Szabó, György; Reformed Church in Hungary.**

**Czapik, Gyula** (Julius) (Szeged, 3 December 1887 - Budapest, 25 April 1956) – Printer, Roman Catholic prelate. His father owned a bookstore and a printing workshop. He was trained as a printer and for a while he was the manager of the Korda Printing and

Publishing House. He attended high school at his place of birth, studied Theology at Temesvár (now Timișoara, Romania) and Vienna. He earned a Ph.D. in 1912, became a chaplain, professor of theology, attorney of the diocese, and tutor of the children of Regent Miklós (Nicholas) Horthy. He edited the *Monthly Gazette (Havi Közlöny)*; *Die Zeitung (The Newspaper)* and the *Temesvár Newspaper (Temesvári Újság)*. When Transylvania (*Erdély*) was ceded to Romania in 1920, in order to avoid Romanian occupation, he moved to Budapest and edited the publications *Churchly Newspapers (Egyházi Lapok)*; the *Hungarian Culture (A Magyar Kultúra)*, and *The Heart (A Szív)*. In 1933, he was appointed Bishop of Veszprém, and in 1943, became Archbishop of Eger. He played a prominent role in the preparation of the agreement between the State and Church after 1946. Some of his works are: *Novena to the Heart of Jesus (Novéna Jézus Szívéhez)* (1922); *The Christian State (A keresztény állam)* (1923); *Have Mercy Upon Us My Lord! (Könyörülj rajtunk, Uram!)* (1934), and *Funeral-book (Temetőkönyv)* (1960). – B: 0932, 0945, T: 7456, 7103. → **Horthy, Miklós.**

**Czardas** → **Csárdás.**

**Czech Codex** – A Codex with records in the Hungarian language, written in 1513. It is one of the most decorated Hungarian codices, adorned with colorful embellishments. The Codex is a companion volume to the Festetics Codex. Its sources are the well-known Latin prayerbooks of the Middle Ages: *Hortulus animae*, *Antidotarius animae*. It was Mrs. Pál (Paul) Kinizsi's (née Benigna Magyar) book of prayers. It consists of 98 leaves and includes psalms, prayers, a litany, and the hymn of Saint Bernard. János (John) Czech discovered it in the library of the Franciscans at Érsekújvár (now Nové Zámky, Slovakia) from where it was donated to the Hungarian Academy of Sciences. The Codex is named after its discoverer, János Czech. – B: 0942, 1150, T: 7659. → **Czech, János; Festetics Codex; Codex Literature; Kinizsi, Pál.**

**Czech János** (John) (Győr, 20 June 1798 - Pest, 1 November 1854) – Lawyer, historian. Following completion of his legal studies, he worked as a notary public, councilor, mayor and later Chief Justice of Győr. He was mainly concerned with collecting historical memoirs, manuscripts, documents, medallions, and local history. He established the first open-air Roman-age *lapidarium* in Győr. He discovered the Czech Codex, which was named after him, as well as Mrs. Pál (Paul) Kinizsi's (née Benigna Magyar) book of prayers and the so-called Érsekújvár Códex (now Nové Zámky, Slovakia). – B: 1078, 0883, T: 7659. → **Czech Codex; Codex Literature; Kinizsi, Pál.**

**Czechoslovakia, Hungarians in** – In 1910, the number of native Hungarian population of the Northern Historic Hungary (*Felvidék*, now Slovakia) was 1,070,871. In 1920 there were 740,431 Hungarians in Czechoslovakia. In 1969, their number was 730,000, according to the estimate by the Hungarian National Bureau of Statistics. On 1 January 1993, Czechoslovakia was separated into the Czech Republic and the Slovak Republic. The bulk of ethnic Hungarians live in the southern part of Slovakia, in one block, alongside Hungarian border, by the virtue of the Versailles-Trianon (1920) and the Paris (1947) Peace Dictates. In 2001 their number was only 521,000 in Slovakia.

Between 1920 and 1939, in the Czech part of Czechoslovakia, the number of Hungarians was low. However, right after World War II, some 44,000 ethnic Hungarians were deported there from southern Slovakia, only because they were Hungarians, and they were settled as forced laborers in the farmsteads of the expelled 3.5 million Sudeten Germans. Some of them remained there, while newcomers joined them. In 1991, their number was 19,930. They founded the Alliance of Hungarians in Czech and Moravian lands with Chapters in major towns. They erected a memorial for Count János (John) Esterházy unjustly imprisoned after World War II. They publish the magazine *Prague Mirror (Prágai Tükör)* five times a year. They organize yearly summer camps. According to the Czech census of 2001, there were 14,737 persons of Hungarian extraction in the Czech Republic. – B: 1078, 1104, 1264, T: 3240, 7103. → **Trianon Peace Treaty; Parish Peace Treaty; Esterházy, Count János; Bohemia, Hungarian Minority in; Beneš Decrees; Atrocities against Hungarians.**

**Czeglédi, István** (Stephen) (Perény, now Perín, Slovakia, 19 November 1619 - Nagyszombat, now Trnava, Slovakia, 5 June 1671) – Preacher of the Reformed Church. He pursued his higher and theological studies in Debrecen, Sárospatak, as well as abroad at Franeker, Utrecht and Leiden. He returned to Hungary in 1647, and became Principal at a high school in Kassa (now Košice, Slovakia), later working as a minister in Tállya, Beregszász (now Berehove, Ukraine) and Kassa. After the Wesselényi conspiracy he was became an object of persecution, was tortured, imprisoned, and his property was confiscated. In 1671, he was summoned to Pozsony (now Bratislava, Slovakia), charged with of conspiracy, but died en route. He was buried in Pozsony. He often took part in theological polemics, e.g. with Mátyás (Matthias) Sámbar and Imre (Emeric) Kiss and he committed them to writing. He was one of the outstanding Protestant preachers of his age; he officiated at the funeral of Prince György (George) Rákóczi II. Some of his orations appeared in print. His writings on history include *On the Destruction of Countries... (Az országok rombolásáról...)* (1659). – B: 0883, 1257, T: 7456. → **Rákóczi, Prince György II; Wesselényi Conspiracy.**

**Czeglédy, István** (Stephen) (Nagysalló, now Tekovské Lužany, Slovakia, 18 August 1910) - Budapest, 1 December 1966) – Minister of the Reformed Church, theologian, son of Bible translator Sándor (Alexander) Czeglédy Sr., and brother of Károly (Charles) and Sándor (Alexander) Czeglédy Jr. He studied Theology at the Reformed Theological Academy Budapest (1928-1932) and the University of Utrecht (1930-1931, 1933-1936). In Budapest, he obtained a pastoral diploma in 1934, and Ph.D. from the University of Utrecht in 1936. From then on until 1944, he served as a minister. Toward the end of World War II, he served on the Eastern Front, where he became a prisoner of war (1945-1947). Returning to Hungary he worked as an Assistant Minister in Cegléd, Minister of the Deaconess Institute in Nyíregyháza, Deputy Professor (1952), later Professor of the New Testament Studies at the Reformed Theological Academy of Budapest (1953). He was also Minister in the congregation of Józsefváros, District VIII of Budapest. He was one of the founding members of the Christian Peace Conference at Prague, in 1958. His articles and studies were published in church journals. Some of his works were duplicate notes of his theological lectures. His works include *Exegesis of St. John's Gospel (János evangéliumának exegézise)* (1955), and *Bible Study (Bibliaismeret)* (1965). – B: 0883, T:

7456.→**Czeglédy, Sándor Sr; Czeglédy, Sándor Jr; Czeglédy, Károly; Christian Peace Conference.**

**Czeglédy, Károly** (Charles) (Pápa, 21 December 1914 - Budapest, 20 June 1996) – Linguist, orientalist. He studied Oriental linguistics at the Universities of Belfast (1934-1935), Utrecht (1936-1939) and Vienna (1940-1941), completing them in the Arts Faculty of the University of Budapest as a member of the Eötvös College. In 1946, he became an honorary lecturer of Semitic Linguistics there and, from 1960, Professor of Semitic Philology and Head of the Department of Arabic Studies. He went into retirement in 1985. He was co-author of the publications *The Problems of Hungarian Ancient History (A magyar őstörténet kérdései)* (1955), and *Studies in Hungarian Ancient History (Magyar őstörténeti tanulmányok)* (1977). He obtained a Masters Degree in 1952, and a Ph.D. in 1976. His main field of study was the Arabic, Syrian, Iranian, Armenian and Byzantine Historic and Geographic Literature, especially the history of early nomadic peoples of the Eurasian steppe belt, with regard to those ethnic groups which could have been in closer contact with the Magyars prior to their settlement in the Carpathian Basin. His works include *Ethnic-demographic Movements on the Steppe in the 4th to 9th Centuries (IV - IX. századi népmozgalmak a steppén)* (1954); *Movement of Nomadic Peoples from the Orient to the Occident (Nomádnépek vándorlása Napkeletről Napnyugatig)* (1969); *Ogurs and Turks in Kazaria (Ogúrok és turkok Kazáriában)* (1981), and *Studies in Ancient Hungarian History (Magyar őstörténeti tanulmányok)* (1985). – B: 1257, T: 7456.→**Czeglédy, István; Czeglédy, Sándor Sr; Czeglédy, Sándor Jr.**

**Czeglédy, Sándor Jr.** (Alexander) (Nagysalló, now Tekovské Luzany, Slovakia, 16 June 1909 - Debrecen, 19 October 1998) – Minister of the Reformed Church, theologian, writer. He completed his high school studies in Pápa in 1927; then studied Theology at Pápa and Budapest. Later, he moved to Dayton, OH, USA (1927-1931), where he obtained a B.A. Degree. Thereafter, he studied at the University of Princeton, received a M. Theol. in 1932, and obtained a Ph.D. in Systematic Theology from the University of Debrecen in 1936. He also studied Theology at the University of Halle-Wittenberg, Germany (1936-1937), and received a special qualification in Practical Theology from the Theological Academy, Pápa (1938). He was Minister in Middletown, OH (1929-1932), Assistant Minister at the Scottish Mission, Budapest (1932-1943), at the Calvin Square Church, Budapest (1934-1935) and in Cegléd (1937-1938). He was a professor at the Theological Academy, Budapest (1938-1939), then at the University of Debrecen from 1943. He was Professor of Practical Theology at the Reformed Theological Academy, Debrecen from 1950 to 1983, when he retired. His articles and studies appeared at home and abroad. He published in foreign languages as well. His major works include *Faith and History (Hit és történelem)* (1936), *The Congregational-comfort Preaching (A prédikáció gyülekezetszerűsége)* (1938) and *The Chosen People (A választott nép)* (1940). He was Honorary Doctor of the Reformed Theological Academy of Budapest, a recipient of the Higher Education Prize (*Magyar Felsőoktatásért Díj*) and the Csokonai Prize. – B: 0910, T: 7103.→**Czeglédy, Sándor Sr.; Czeglédy, Károly.**

**Czeglédy, Sándor Sr.** (Alexander) (Nádasladány, 28 March 1883 - Cegléd, 23 December 1944) – Minister of the Reformed Church, theologian, writer. He completed his high school studies in Pápa (1901), studied Theology at the Reformed Theological Academy,

Pápa (1901-1906), and earned a higher degree in New and Old Testament studies. He was Assistant Minister in Pápa, then a missionary in Velika Pisanica, Croatia (1906-1909); Minister in Nagysalló (now Tekovské Luzany, Slovakia) (1909-1914), Professor at the Theological Academy, Pápa (1914-1920), Minister in Győr (1920-1928), Dean of the Tata Diocese (1920-1928), Minister in Cegléd (1928-1944). He was editor of religious newspapers. He published a *Biblical Handbook vols. i-v (Bibliai kézikönyv I-V)* (1926-1928); translated and published the *Works of John Calvin vols. i,ii,iii (Kálvin János művei, I,II,III)* (1907-1910); translated the *New Testament (Újszövetség)* (1924, 1930), and published with others the *Biblical Lexicon (Bibliai Lexikon)* in two volumes (1931). He was one of the outstanding Reformed theologians in the first half of the 20th century. – B: 0910, T: 7103. → **Czeglédy, Sándor Jr; Czeglédy, Károly; Bible in Hungarian.**

**Czeizel, Endre** (Andrew) (Budapest, 3 April, 1935 - ) – Physician, geneticist. He studied Medicine at the Semmelweis Medical University in Budapest (1953-1959). Since 1959 he has been a researcher of the causes of congenital abnormalities at the National Public Health Institute, and Chief Physician of the Department of Human Genetics and Teratology, as well as Director of the Center for World Health Organization. Until 1973, he was the family planning adviser of the Szent János Hospital, Budapest. Since 1973, he acts as an advisor in genetics. He worked out the Hungarian Optimal Family Planning Model. He was editor of eight popular educational TV series on sexuality and family planning. He is a sought-after lecturer and a world-renowned geneticist. He wrote 20 books, among them the *Congenital Abnormalities (Veleszületett rendellenességek)* (1973); *Human Genetics (Emberi öröklődés)* (1976); *Multiple Congenital Abnormalities*, in English (1988); *The Right to be Born Healthy*, in English (1988); *The Genetics of Hungarians (A magyarság genetikája)* (1990), and *The Secrets of Genes (A gének titkai)* (1991). He is a recipient of the Youth Prize (1987), the Outstanding Physician title (1988), the Elek Fényes Commemorative Medal (1988), and the Markusovszky Prize twice. – B: 0874, 1031, T: 7103.

**Czelder, Márton** (Martin) (Ugornya, on the eastern banks of the Tisza River, east of Vásárosnamény, 11 November 1833 - Nagybánya, now Baia Mare, Transylvania (*Erdély*) in Romania, 23 August 1889) – Minister of the Reformed Church, missionary, religious writer. He attended high school in Sárospatak where, at the age of 15, enlisted with one of the freedom fighters' unit during the War of Independence (1848-1849). On one occasion, with a guerrilla unit of 1600 men, he defeated an Imperial Army unit of 2500 soldiers. He was twice wounded. He was ordained in 1857; then in 1860 he moved to Moldavia (Wallachia, now Romania), where he ministered to Hungarians of the Reformed faith for ten years. During that time, he set up several congregation schools and built numerous churches. He organized 26 congregations with about 4400 members. The Austrian authorities in 1865 regarded him a dangerous person and wanted to arrest him, but he went abroad. He returned to Hungary in 1871. In 1884, he was minister in Kecskemét. In 1889, an ecclesiastical court removed him from his parish. He did not appeal, and died five months later. He was the author of several works, poems, studies, prayers and critical works, mainly of religious nature. His activities form a golden page in the history of 19th century Hungarian Reformed Church life. – B: 0883, 0942, 1520, T: 7682. → **Freedom Fight of 1848-1849; Reformed Church in Hungary.**

**Czelder, Orbán** (Urban) (Merény, now Nálepkova, Slovakia, 9 July 1674 - Kassa, now Košice, Slovakia, October 1717) – *Kuruc* army officer. With his rebels he joined the *Kuruc* uprising led by Prince Ferenc (Francis) Rákóczi II (1703) and became commander of the first regular regiment. One of the most outstanding *Kuruc* generals and a distinguished military organizer, the main area of his military operation was ~~the~~ Northern Hungary (Upland, *Felvidék*, now Slovakia). In 1704, he took the fort of Bajmóc, participated in the conquest of the fortress of Trencsén (now Trencin, Slovakia), and was promoted to colonel in 1705. His regiment covered the retreat in the disastrous 1708 Battle of Trencsén and, in 1709, he was promoted to the rank of general. Between 1709 and 1710, his regiment defended the city of Lőcse (now Loviče, Slovakia) against the Austrian generals Heister and Löffelholtz. The city magistrates, in collaboration with the traitor István (Stephen) Andrassy and his mistress, Mrs. János (John) Korponay (the “White Woman of Lőcse”), delegated Czelder as negotiating envoy to the camp of the Imperial General Löffelholtz, who arrested him. After the capitulation of Lőcse, he was imprisoned in Késmárk but freed in 1711. In 1714, together with Colonel János (John) Pongrácz of the Hussars, he organized armed resistance against the Austrians in the region of Szepesség, where he soon managed to recruit 1200 insurgents under his banner. The Austrian Imperial Army suppressed the insurgency and, in 1715, he was sentenced to death. He was regularly tortured for two years and was executed at Kassa in 1717. – B: 0883, 1031, T: 3233. → **Freedom Fight of Rákóczi II, Prince Ferenc; Kuruc.**

**Czetz, János** (John) (Gidófalva, now Ghidfalau, Transylvania (*Erdély*), now in Romania, 8 June 1822 - Buenos Aires, 6 September 1904) – General of the 1848-1849 War of Independence of Hungary against Austria, and founder of the first modern military officer training school in Argentina. He was a graduate of the Military Academy of Wiener Neustadt, Austria, where he graduated as full lieutenant instead of the usual second lieutenant, an exceptional promotion, recorded only twice during the Academy’s 95-year history. Then he was accepted by the Academy for General Staff and, at 26, he became a captain of the Imperial Army of Austria. When hostilities broke out between Austria and Hungary in 1848, he offered his services to the Hungarian Government. First he served in the Ministry of War, later as Chief of Staff to General Joseph Bem in his campaign in Transylvania. He was barely 27 years old when, after the decisive victory of Piski, he was promoted to the rank of general. His extraordinary organizational ability was proven during the severe winter of 1849, when his army remained well supplied and intact, while his opponent, the Austrian General Puchner, was forced to retreat. In the last battle, fighting valiantly against the invading Czarist army of Russia, he was gravely wounded. After the Hungarian army had laid down its arms at Világos he escaped to Hamburg, Germany, with false identification papers, where, in 1850, he published the history of General Bem’s Transylvanian campaign. He moved to Paris, to Turkey, and then to Switzerland, where he worked at the construction on the Mont Cenis railway and began organizing a Hungarian legion; but after the Peace Treaty of Villafranca, he emigrated to Argentina. President Mitre of Argentina gave him the rank of colonel in the Argentine army in 1864. Acquiring a diploma as a surveyor, he was entrusted to survey and fix the Argentine-Paraguay border. In the same year, he organized the first military engineering brigade. Under President Sarmiento, he was charged with the defense of the southern border section of Argentina. Soon he had a new task: to organize a Military

Academy for Argentina. Neither the President nor his Minister of Defense had the least confidence that the task could be done successfully. Despite enormous obstacles and with hard work, he managed to raise a well-trained military elite for Argentina, the majority of whom served as the highest military leaders of the country. He was fluent in five languages: Hungarian, German, French, English and Spanish. In 1884, he became the founder of the Geographical Institute in Buenos Aires, was its first Director, and served in this capacity for 12 years. His life-size portrait in the Institute commemorates his various accomplishments. For 10 years he was Director of Water Management in the District of Ente Rios. He retired in 1895. His wife was a member of the Rosas family; and when he died, he was buried in the Rosas family crypt. His earthly remains were transferred to the Argentinian Military Academy's new chapel with full military honors in 1970, and it has been his resting place ever since. It is marked with a plaque that shows his Transylvanian origin. His bronze statue stands in the central square of the Academy's parade ground. A city square in Buenos Aires was named after him. His bust stands in front of the Institute named after him; and the Argentine Postal Service issued a stamp in his honor. To commemorate the 75th anniversary of his death, a commemorative plaque was unveiled for him and for Sándor (Alexander) Asbóth, next to the Hungarian Heroes Memorial. In Budapest a street bears his name. – B: 0883, 1133, 1020, T: 3233.→**Freedom Fight of 1848-1849; Argentina, Hungarians in; Armenians; Bem, József; Asbóth, Sándor.**

**Czibor, Zoltán** (Komárom, 23 August 1929 - Komárom, 1 September 1997) – Soccer player. His career began with the team of Komárom MÁV (Hungarian State Railways – Magyar Államvasútak) in 1945. After 1948, he played on the Ferencváros Team (FTC). In 1951, he was a member of the Csepel Vasas Team; and from 1953 on he played with the Budapest Honvéd. He played left halfback. He was member of the Olympic Champion Team (1952) and the Hungarian winning “Golden Team” over England in 1953, also of the Silver Medalist Team of the World Championships in 1954, Bern, Switzerland. Between 1949 and 1956, he scored 17 goals in the National Team. He was “goal-king” in 1955 by scoring 20 goals in a tie with Ferenc Machos. During the 1956 Revolution he was in contact with the resistance fighters and soon left Hungary and played for the AS Rome. The following year, he joined the team of FC Barcelona and achieved the greatest successes of his life. He returned to Hungary in 1990 and settled in Komárom. He was a recipient of the Hungarian Olympic Committee's Awards in 1995. – B: 1105, 1031, T: 7103.→**Bozsik, József; Buzánszky, Jenő; Grosics Gyula; Kocsis, Zoltán; Puskás, Ferenc.**

**Czidra, László** (Ladislav) (Budapest, 10 February 1940 - Budapest, 21 January 2001) – Musician, recorder artist. His higher studies were at the Ferenc (Franz) Liszt Academy of Music, Budapest, where he studied oboe (1959-1963). Besides the recorder, he played on several early woodwind instruments as well. He taught at the Academy until 1988. From 1993, he was professor of the Leó Weiner Music High School, Budapest. He founded the renowned *Camerata Hungarica* ensemble and was a member of the *Ex-Antiquis* ensemble. He went on a number of concert tours abroad, wrote studies, and recorded Renaissance and Baroque music. He made 6 solo records and 12 with his ensemble, among them the *Music for the Court of King Mátyás I (Matthias Corvinus)*; Handel's *Recorder Sonatas*, and Vivaldi's *Complete Recorder Concertos*. He was one of the best

recorder players of our time. He was a recipient of Ferenc Liszt Award (1981). – B: 0886, 1239, T: 7103.

**Cziffery, József** (Joseph) (Aranyosmarót, now Zlatne Moravce, Slovakia, 29 December 1902 - Salto, Uruguay, 1964) – Painter. His higher studies were at the Academy of Fine Arts of Budapest (1927-1931). Among his teachers were Béla Berényi and János (John) Vaszary. At the end of the 1920s, he went on a study trip to Germany, and for a short while worked in Berlin. Later he went to Paris and opened an art school. The British Museum bought one of his paintings after his solo exhibition in London. In 1931, the National Salon, Budapest, organized an exhibition from his collected works. Around 1933 he emigrated to Brazil, and was soon invited to Uruguay, where he settled in Salto and opened an art school. His paintings made him well known in the artistic life in Uruguay. After his death, there was an exhibition of his paintings in Montevideo, and a Monument was erected in Salto. János Vaszary influenced his work. He mainly painted still life in watercolor. – B: 0883, 1521, T: 7653. → **Vaszary, János**.

**Cziffra, György** (George) (Budapest, 5 November 1921 - Senlis, France, 17 January 1994) – Piano virtuoso. He was born into a Roma musician family. He completed his studies at the Academy of Music in Budapest, with the help of Ernő Dohnányi. He was noticed already as a child prodigy because of his virtuosic playing. Later, he became a well known bar pianist. His outspoken behavior made it impossible for him to perform on the concert stage. He attempted to flee from Communist Hungary, but was caught, arrested and tortured. His torturers shattered his hands and afterwards he was able to play only with a wrist support. Between 1950 and 1953 he was imprisoned. However, afterwards he was allowed to perform. He had enormous success in his own country as well as abroad. In October 1956, he played the Rákóczi March of Franz Liszt for ten times as an encore. At the end, the police came and emptied the concert hall. He left Hungary during the 1956 Revolution. After a short period of performing in Vienna, he settled in Paris. He became a celebrated piano virtuoso filling concert halls to capacity. He became master of mainly Romantic piano music, such as Chopin, Grieg, Liszt and Schuman. From the 1980s he organized the Cziffra Festive Performances with the aim of supporting gifted young musicians. The *Canons and Bells (Ágyuk és harangok)* is his autobiography. He was one of the outstanding piano virtuosos in the second half of the 20th century. – B: 0938, 1178, T: 7684. → **Liszt, Ferenc; Dohnányi, Ernő**.

**Czigány, Dezső** (Desider) (Budapest, 1 June, 1883 - Budapest, 31 December, 1937) – Painter. He studied at the Munich Academy in 1901, and at Simon Hollósy's artist colony in Nagybánya (now Baia Mare, Romania) in 1903. He was in Paris on a scholarship from 1904. He was a student of Károly Ferenczy in Budapest in 1906. He was an honorary member of “The Independent” Group. As a founder and representative of “The Eights”, an avant-garde Hungarian group, he played an important role in the introduction of post-impressionistic art in Hungary, got in touch with the progressive journal *West (Nyugat)* and, as a result, he met poet laureate Endre Ady and painted a portrait of him. He lived in Paris and in southern France in the years after World War I. His early paintings showed the influence of Gauguin and Cézanne. In his late period, he painted colorful, bright, sunny scenes and self-portraits. He committed suicide. His works include *Portrait of a Girl (Leányarckép)* (1903); *Landscape (Tájkép)* (1906); *Portrait of Poet Endre Ady*

(1907); *Still-life with Apples (Csendélet almákkal)* (1910), and *Self-portrait (Önarckép)* (1912). His works are in the National Gallery, Budapest and in private collections. – B: 1068, 1124, 1160, T: 7103.→**Hollósy, Simon; Ady, Endre; Berény, Róbert; Czóbel, Béla; Kernstovk, Károly; Pór, Bertlan; Ferenczy, Károly; Eight, The Group of.**

**Czigány, György** (George) (Budapest, 12 August 1931 - ) – Poet, writer. He started writing short stories before 1945, then studied music as a student of Pál (Paul) Kadosa and others, and received a diploma in piano performance in 1956. Instead of a musical career, he chose to follow educational work in music, and he became a great success. He also followed a literary life: editing programs for the Hungarian Radio, showing the relationship between the great Hungarian writers and the musical world, while in his free time writing poems. In his volume, *Asphalt Rivers (Aszfaltfolyók)* (1974) he appears as a strongly intellectual lyric poet, who passionately questions the problem of existence and the transitoriness of life. Similar to the great works of composer Béla Bartók, his works indicate that, step by step, he achieved the harmony of a solitary man's life in closeness with nature. His poems present a feeling of anguish about the absence of a complete and humane earthly life. He was strongly influenced by the existentialist philosophy, often featuring the dramatic questions of a man left alone, cast out into the reality of life. On the screen of his soul, the agonizing visions of the Second World War appear again and again. The aspirations of the *Newmoon Circle (Újhold Kör)* also influenced his taste and the nature of his lyrics. His works include *On the Wavelength of Music (A muzsika hullámhosszán)* essays, with Eszter Lázár (1970); *Who Wins Tomorrow? (Ki nyer holnap?)* interviews (1972); *Dreams of Ninive (Álmok Ninivéről)* poems (1983); *I have Dinner with Mozart (Mozarttal vacsorázok)*, essays, short-stories (1992), and *Lights on the Water (Fények a vizen)* poems (1995). He received the Ferenc Liszt Prize (1970), the Attila József Prize (1996) and the Pro Literatura Prize (1997). – B: 0878, 1257, T: 7456.→**Bartók, Béla; Kadosa, Pál.**

**Czigány, Lóránt** (Roland) (pen name Antal Girnóczy) (Sátoraljaújhely, 3 June 1935 - London, 8 November 2008) – Literary historian, diplomat. His higher studies were at the University of Szeged, where he studied Hungarian Literature and History (1954-1956). As a member of the National Guard, he participated in the revolutionary events of 1956. After the Revolution he moved to England and studied at Oxford University (1957-1958) and at London University (1958-1960). Between 1962 and 1969, he worked in the British Library and set up a Hungarian Literary Collection. From 1969 to 1972, after emigrating to the United States, he taught Hungarian Language and Literature at Berkeley University, Calif., USA. He was a contributor, then Head of the Hungarian Section of the BBC, and an external contributor to the newspaper, *The Times*. He surveyed the centers of Hungarian intellectual life in the West and of Hungarian-Hungarian dialogue, giving an almost chronological account of the Szepesi Csombor Circle in London, the Kelemen Mikes Circle in the Netherlands, and of Hungarian as a Native Language Conference. From 1970 to 1990, he was a member of the Protective Body of the Hungarian Mother-tongue Conference. In 1990-1991, he was Minister Plenipotentiary at the Hungarian Embassy, London. His works include *The Béla Iványi-Grünwald Collection of Hungarica* (1967); *The Oxford History of Hungarian Literature. From the Earliest Times to the Present* (1984); the first non-Marxist synthesis of Hungarian Literature is the *Look Back*

*in Anger! The History of Nationalized Literature in Hungary 1946-1988*, (*Nézz vissza haraggal! Államosított irodalom Magyarországon 1946-1988*) (1990), and *Where I Stand, Where I Go (Ahol állok, ahol megyek)* (1998). He published a good number of works of fellow writers. He was a recipient of the Géza Bárczi Prize (1981), the Endre Szirmai Prize (1988), the Pro Literature Prize (1997). and the Attila József Prize (2000). – B: 0874, 0878, 1257, T: 7103.

**Czímer, József** (Joseph) (Rákoscscaba, 24 October 1913 - ) – Dramaturgist, writer. His higher studies were at the University of Budapest (1937). From 1937 to 1942, he worked at the Psychological Institute, Budapest. From 1942 he went underground and was a contributor to the newspapers *Resistance (Ellenállás)*, *Freedom (Szabadság)*, and *New Hungary (Új Magyarország)*. In 1948 and 1949 he was at the National Film Office (*Magyar Filmhivatal*). In 1949 he worked for the weekly *Theater (Színház)*, and was dramaturgist at the Hungarian Film Industry (*Mafilm*). Under suspicion of spying he was dismissed from the *Ministry of Metallurgy and Machinery (Kohó és Gépipari Minisztérium)*, but was later rehabilitated. From 1951 to 1956, he was dramaturgist at the Youth Theater (*Ifjúsági Színház*), acted in the same capacity at the Comedy Theater (*Vígszínház*) (1956-1968), and at the National Theater (Nemzeti Színház), Pécs (1968 until his retirement). His works include *The Jewish Epistemology (A zsidó ismeretelmélet)* (1937); *Fables of Aesop (Aisophos meséi)* translation (1943); *The Witches of Hollywood (A Hollywoodi Boszorkányok)* (1948); *Interlude (Közjáték)* (1992), and *Changing onto the Same Train (Átszállás ugyanarra a vonatra)* (1996). He is a recipient of a number of prizes, among them the Order of Hungarian Freedom (*Magyar Szabadság Rend*) (1946, the Merited Artist title (1977), the Thália-Ring (1980), the Outstanding Artist title (1983) and the Prize for Hungarian Art (1993). – B: 0876, 0878, 1257, T: 7103.

**Czine, Mihály** (Michael) (Nyírmeggyes, 5 April 1929 - Budapest, 21 January 1999) – Literary historian, critic. He was born as the ninth child of a shepherd family and spent his childhood at Hodász. On the insistence of his teacher, he was registered at the Teacher Training College of Nyíregyháza. In 1948, he was admitted to the Eötvös College of the University of Budapest. After its closure by the State, he continued his higher studies at the University of Budapest, where he studied Hungarian Literature and received his Degree in 1953. He continued with postgraduate studies until 1955, and worked as a columnist for the periodical *New Voice (Új Hang)*. Between 1956 and 1964, he was a contributor to the Institute of Literary History of the Hungarian Academy of Sciences. From 1964, he was a university lecturer, and from 1974 Professor, and Department Chair from 1988. In his writings, he sided with national and social problems. This stance led him to conflicts with the official policy of culture. However, he is regarded as the representative of a certain life-principle of literary history. He was the Chief Curator of the Danubian Reformed Church District (1989), and Lay President of the National Synod of the Reformed Church (1991). His writings include *The Journey of Zsigmond Móricz to the Revolution (Móricz Zsigmond útja a forradalomig)* monograph (1960); *People and Literature, vols. i, ii (Nép és irodalom, I,II)* studies, critiques (1981), and *Minority and Literature (Kisebbség és irodalom)* studies (1992). He was a recipient of the József Darvas Prize (1986), the Banner Medal of the Hungarian Peoples' Republic

(1989), the Krúdy Memorial Medal (1990), the Zoltán Kodály Prize (1994), and the Széchenyi Prize (1994). – B: 1165, 0878, 1257, T: 7103.

**Czingel, László** (Ladislav) (Pozsonypüspöki now Podunajské Biskupice, Slovakia, 1 September 1944 - ) – Folk dance choreographer. He completed his Hungarian high school studies at Somorja (now Šamorín, Slovakia) (1962). In 1966, he studied Electro-Mechanics, and in 1977 completed a course in Adult Education. From 1962 to 1969, he was a storeman, later an electrician. From 1969 to 1970, he was a special lecturer of the *Czechoslovakian Hungarian Workers' Cultural Federation (Csehszlovákiai Magyar Dolgozók Kulturális Szövetsége – CSEMADOK)* on folk dancing. He was also working for the *CSEMADOK* (1970-1973); he was again special lecturer at the Institute of Adult Education of Pozsony, on Hungarian folk dancing (1973-1980). From 1967 to 1977 he was leader of the *Lesser Danube Dance Ensemble (Kis Duna Táncegyüttes)*; and from 1983, leader of *Folk-Dancing Ensemble*. From 1977 on, he was the leader of the ensemble in the *Adult Education Civic Center* of Somorja. So far he has prepared 40 choreographies, such as *The Dances of Gömör (Gömöri táncok)*. His articles on folk dancing appeared in the papers *Week (Hét)*, *New Word (Új Szó)*, *Adult Education (Népművelés)*, and the *Woman (Nő)*. He is author of a book of program guides for dance-group leaders (1974), and a TV-film script on the traditions of the Csallóköz area (now Titny ostrov, Slovakia) (1991). He is winner of the 2nd Prize in the National Choreographic Competition (1982), and was presented with the Gold Memorial Plaque of the Slovakian Ministry of Culture, 1984. – B: 1083, T: 7456.

**Czinka, Panna** (Sajógömör, now Gemer, Slovakia, 1711 - 1772) – Gypsy musician. Her father and grandfather were court musicians of Prince Ferenc (Francis) Rákóczi II, Prince of Transylvania. Already at the age of 9, she played the violin so clearly that her overlord János (John) Lányi sent her to school to Rozsnyó (now Rožňava, Slovakia) at his own expense, where she soon surpassed her teacher. She got married to a double-bass player and, together with his brother, she formed a band that soon gained fame. Her overlord not only had a small house built for them on the shore of the Sajó River (now Slana River, Slovakia), but also regularly supplied the band with new clothes. She lived there happily, and at the end, her orchestra consisted of her sons. She made a lot of money and left it for her children. She was buried in Sajógömör, dressed in a festive costume, and with her Amati violin, given to her at one of her performances. Only three of her compositions remained for posterity; for most of the others only the titles are known. – B: 0883, 1031, T: 7684. → **Rákóczi II, Prince Ferenc.**

**Czóbel, Béla** (Budapest, 4 September 1883 - Budapest, 31 January 1976) – Painter. He studied painting at the artist colony of Nagybánya (now Baia Mare, Romania) as a student of Béla Iványi-Grünwald in 1902. He studied in Munich in 1902-1903. Still in the same year he went to Paris and befriended Picasso and other members of the group, *les Fauves*. Since 1907 and 1912 he spent the summers on Károly (Charles) Kernstock's estate in Nyergesújfalu. Between 1914 and 1919 he lived in Berg, Holland. During World War I, many of his pictures were lost. From 1919-1925, he worked in Berlin, later moved again to Paris. From 1936 he spent the summers on the County Heves estate of Ferenc (Francis) Hatvany. From 1939 on, he lived mainly in the artist colony of Szentendre. His first works were studies of *plein air* with secessionist impact.

His later works show his nature-principle. He assisted in setting up the impressionist and neo-impressionist circle. His rich lifework includes *Sitting Peasant (Ülő paraszt)* (1904); *Little Girl in Front of the Bed (Kislány ágy előtt)* (1906); *Muse (Múzsza)* (1930), and *Madonna* (1937). His themes were still-life compositions, *enterieurs*, landscapes and nudes. He had many exhibitions including Paris, Venice, New York, Geneva, Budapest and Szentendre. His paintings are in the possession of Hungarian institutions and in private collections. He was member of the Szinyei Society (1932). He is regarded as an eminent representative of the *École de Paris*. He was a recipient of the Kossuth Prize (1948), and the titles of Merited Artist (1958) and Outstanding Artist (1963). – B: 0883, 0934, T: 7103.→**Nagybánya Artist Colony; Szentendre Artist Colony; Iványi-Grünwald, Béla; Kernstock, Károly; Czigány, Dezső; Berény, Róbert; Pór, Bertalan; Eight, The.**

**Czóbel, Minka** (Anarcs, 8 June 1855 - Anarcs, 17 January 1947) – Poetess, writer. Her writings began to appear in the early 1890s, first in newspapers. However, the leading literary figures of her age did not notice her talents. Her lyric poetry shows intellectual character as well as picturesque features. She wrote volumes of poems and novels as well, including *White Songs (Fehér dalok)* (1884); *Songs of the Dawn (A virradat dalai)* (1895); *Opals (Opálok)* (1903), and *Spider Web (Pókháló)* short stories. She translated Imre Madách's *The Tragedy of Man (Az ember tragédiája)* into German. – B: 0883, 1257, T: 7103.→**Madách, Imre.**

**Czuczor-Fogarasi Dictionary** – Based on Count József (Joseph) Teleki's 1818 competition essay, the idea of compiling "a possibly complete dictionary" was included in the Hungarian Academy of Sciences' plans. At the end of 1834 a little booklet was issued for the members; then in 1840 a final plan: "The Design of the Internal Order of a Large Hungarian Dictionary" was published. Finally, on 16 December 1844, Gergely (Gegory) Czuczor and János (John) Fogarasi were elected to be the dictionary's editors. The manuscript was produced between 1845 and 1861, over two years of which Czuczor spent in prison. Finally, the Dictionary of the Hungarian Language was published in 6 volumes between 1862 and 1874. After Czuczor's death, the final editorial work was completed by Fogarasi, and published by the Athenaeum Publishing Firm. As soon as it came out, it was heavily criticized, primarily for its etymologies and comparative method. Nevertheless, the Czuczor-Fogarasi has become a household name in Hungarian linguistics; it is the first scholarly monolingual dictionary that gives insight into the language's construction, including the vocabulary of sciences, trades and regional dialects. – B&T: 7617.→**Czuczor, Gergely; Fogarasi, János; Teleki, Count József.**

**Czuczor, Gergely** (Gregory) (Andód, now Andovce, Slovakia, 17 December 1800 - Pest, 9 September 1866) – Monk, poet. He attended high school in Nyitra (now Nitra, Slovakia), Esztergom and Pozsony (now Bratislava, Slovakia). He entered the Benedictine Order in Pannonhalma in 1817, studied Philosophy in Győr and Theology in Pest. He was a high school teacher at Győr in 1827, then at Révkomárom (now Komarno, Slovakia) in 1830; became a corresponding member of the Hungarian Academy of Sciences in 1831, and moved to Pest. Later he was posted to Pannonhalma and worked as a librarian and archivist. He also taught at Győr again, and returned to Pest for the second time. He was Editor of the monumental *Great Hungarian Dictionary (Nagy magyar*

*szótár*). For his role in the Revolution of 1848-1849, he was sentenced to a six-year prison term in Kufstein, Austria, and later in Buda for his revolutionary poem *War Cry* (*Rohamkiáltás*). He received amnesty in 1851. His first great epic poem was *The Battle of Augsburg* (*Az augsburgi ütközet*), then the cycle on *János Hunyadi*, a legend on Matthias Corvinus, and one on the *Dream of Virgin Margaret*, also romances as *Szondi*. He also wrote *The System of the Hungarian Language* (*A magyar nyelv rendszere*) (1847). He translated Tacitus' work on *Germania*, Horace's *Ars Poetica*, and *The Life of Washington* by Jared Sparks. He became an ordinary member of the Hungarian Academy of Sciences in 1836. – B: 0921, 1257, T: 7103. → **Fogarasi, János; Lechfeld (Augsburg), Battle of; Freedom Fight of 1848-1849**

**Czvittinger, Dávid** (Selmecebánya, now Banska Stiavnica, Slovakia, 1676 - Selmecebánya, 18 March 1743) – Literary historian, bibliographer. He was born into a middle class family and was educated as a theologian at German universities, including Altdorf; but his main interest was literature. Throughout his life he had financial problems and wrote most of his pioneering *Specimen Hungariae Literatae*, (Frankfurt, 1711) in a debtors' prison. This work was the first to start documentation about the life and works of Hungarian writers. In his work he listed 296 Hungarian, Transylvanian (*Erdély*, now in Romania) Croatian and Dalmatian writers with biographical notes in alphabetical order. Czvittinger undertook this heroic effort in order to defend Hungarian literature against disparaging Western, mainly Austrian, criticism and to make the Hungarian authors also known outside the country. Notwithstanding his limited resources, he produced a remarkable work. Editors of foreign Encyclopedias use his data. – B: 0883, 1257, T: 7654, 7655.

## D

**Dacia** – A Roman province embracing roughly the areas from the lower Danube River in the south to the Carpathian Mountains in the north, and from the Tisza River in the west to the Szeret River in the east. Its history goes back to prehistoric times. The first known inhabitants were the Agathyrs and the Scythians in 2,500 BC, followed by the Celts and Gethae. Thereafter the Thracians, followed by the *Daci* (Greek: *Dákai*) populated the region. King Burebista (70-44 BC) founded the Dacian Empire, but it collapsed after his death. Around 80 AD Decebal revived a strong Dacian realm and threatened the Roman Empire. In 104, and again in 107, Emperor Trajan conducted two campaigns against Dacia and, as a result, the greater part of Dacia fell under Roman rule. The fiercely resisting Dak (Dacian) population was completely annihilated; no Latin-speaking nucleus remained to form a later Romance language. The Emperor brought in Dalmatian, Greek and Syrian settlers from other parts of the Empire, Roman citizens for the administration, veterans and mainly miners for the gold and salt mines. In 271, yielding to the pressure of the Visigoths, Emperor Aurelian completely evacuated Dacia, involving the withdrawal of the entire Roman officialdom and citizens, together with their households, (expecting bloody revenge), ordering the demolition of buildings and the removal of food supplies before the oncoming barbarians. Later the Huns occupied the region between 433 and 454. After the death of Attila, the Hun Empire collapsed and, in 480, the western part of the territory became occupied by the Gepids, while the eastern part was still inhabited by a surviving tribe of the Huns. In 560 the Avars, a nation probably speaking the same language as the Huns – according to contemporary Greek chronicles –, crossed the Carpathians and occupied the entire Carpathian Basin including Transylvania. In 796 the Avar Empire collapsed under the onslaught of Charlemagne. In 805, Khan Krum “the terrible” created the Bulgarian Empire on both sides of the Danube, including Transylvania. In 896, while occupying the Carpathian Basin, the Magyars defeated the Bulgarians and took possession of Transylvania as well. In 946, for the first time, Byzantine documents mentioned also the presence of the Szeklers (*Székely*) in the eastern-most corner of Transylvania, describing them as one of the Magyar tribes, settled there as border guards. Greek chronicles (Kedrenos II. 435. Ed. Bonn) also recorded the name Vlachs (or Wlachs) as a people of herdsmen located between Kastoria and Prespa, near the present Albanian border, who were the ancestors of the Wallachians (now called Romanians) centuries later. They were herdsmen moving towards the northeast, looking for new pastures for their herds, finally arriving on the outer slopes of the Carpathian Mountains and from there, during the Middle Ages, they infiltrated the Transylvanian part of the Hungarian Kingdom. In 982 Byzantine traders reported “rich Hungarian towns” in Transylvania. In 978, Vatican missionaries reported to Rome that there was a small tribe of the Jazygs (*Jász*), who spoke “almost the same language” as the Magyars and were supposed to be living in the same region long before the Magyars arrived. Apart from a few scattered fragments of Slavs, they are the only recorded inhabitants found by the Magyar settlers in the Carpathian Basin, including Transylvania. However, Romanians insist on the Daco-Roman continuity, according to which they are the descendants of the Dak (*Daci*) people of Dacia. Neither historical records, nor cemeteries, nor archeological finds support this theory, although it served well the Romanians’ claim for the possession of Transylvania, a historical part of Hungary. – B:

1240, 1241, T: 7103.→**Hungary, History of; Szeklers; Jazygs; Avars; Daco-Roman Theory; Trianon Peace Treaty; Paris Peace Treaty.**

**Dacians** – Greek historian Strabo (27 BC - 14 AD) described the Dacians as an ancient people scattered between the Black Sea and Lake Aral. Later they moved to and settled in Dacia. They lived in permanent dwellings, raised animals, and worked the fields. They were familiar with metal smelting and even forged their own weapons. Their clothing consisted of long pants tied at the ankles, a short-sleeved jacket and a heavy cloak. The rich wore a high fur cap. Their favorite weapon was a curved sword. Their 80 years of struggle against the Romans ended in total defeat in 106 A.D. The Dacian population was decimated by Emperor Trajan's military campaigns. Later, emigration further reduced the population. The Jazygs, Karps and Roxolans absorbed those who were left, while those who remained were swept away by the tribes of the great migration period. – B: 0942, T: 3240.→**Dacia; Immigration to Hungary.**

**Daco-Roman Continuity, Theory of** – Romanian national consciousness emerged from the Daco-Roman theory, which appeared in Transylvania (now in Romania) in the 17th century writings of Uniate priests Samuil Micu, Petru Maior, and Gheorghe Sincai. They received Latin education in Rome, enabling them to recognize the Latin relation to the Romanian language and they concluded that the ancient Romanians were in some way linked to the Roman Empire. Therefore, according to them, it follows, that the Romanians are the descendants of the ancient Romans. This naturally meant that their people were directly descended from the Roman inhabitants of ancient Dacia, making them the oldest among all the inhabitants of Transylvania. They compiled dictionaries with new Latinized words and wrote historical studies to prove the Roman origins of their people. Through this theory, Romanian historians have focused primarily on three themes: (1) the origin of the Romanians as Transylvania's ancient indigenous inhabitants; (2) the uninterrupted and continuous settlement of Transylvania (the center of the ancient Dacian kingdom) by Romanians; and (3) Romanian priority in Transylvania as opposed to the “later” settlement of Germanic tribes, Hungarians, and still later the Saxons.

*As to the historical background:* during the reign of Emperor Trajan (A.D. 98-117), the Romans conquered the Dacians in two bloody wars (A.D. 101-102 and 105-106). From this time until ca. A.D. 271-275, Dacia, as a colony, remained under Roman control. The Romans under Emperor Aurelian, withdrew from Dacia in AD 271-275 because of the continued attacks by the *Goths*, followed by the *Gepids*. These 165 to 170 years of Roman occupation are the historical basis of the Daco-Roman theory. These years of Roman rule allegedly resulted in the “Romanization” of the native Dacian population. The Dacians (called *Getae* by the Greeks, *Daci* by the Romans) are known to have had an advanced material culture with a tribal organization, their language mainly known from geographic names. The defeated Dacians appear to have avoided the towns of the Romans and rather lived in their villages, since Latin was not their native tongue. The Dacians subsequently were mixed with Slavic and Germanic (*Goths*, *Gepids*) immigrants, later by Uralic and Altaic (Turkic) peoples, such as *Huns*, *Avars*, *Blaks (Bulaks)*, *Petchenegs*, *Bulgarians* and *Cumanians*.

The debated question is whether a Daco-Roman population somehow survived all the historic (and linguistic) upheavals that followed the Roman withdrawal, or whether the Vlachs (Romanians) originate from the Balkans. Historic and linguistic evidence shows that the Vlachs came from the center of the Balkan Peninsula, from the environs of Lake

Ochrida, east of Albania, from where they kept migrating slowly and steadily for prolonged periods to the northeast, due to their pastoralist lifestyle, until they settled in the southern and eastern slopes of the Carpathians. They are considered to be the descendants of Romanized *Thracians* and *Illyrians*. During the *Vlach* migrations, they absorbed a considerable number of Slavic (south Slavic) elements in their language, classified by linguists as an *East Romance* tongue. Since the Romance languages are considered to have evolved from the Vulgar Latin during the 5th to 9th centuries, they could not have been in existence at the time of the Roman evacuation of Dacia (including Transylvania) in the 3rd century. Therefore, the language of the *Vlachs* could not have been formed in the isolated location of Transylvania. The Vlachs of more recent times called themselves Rumun (Rumuny), and from the mid-19th century as Roumanians-Rumanians-Romanians. (At the Berlin Conference of 1878, on the suggestion of the Hungarian Count Gyula (Julius) Andrásy, the Foreign-Minister of the Austro-Hungarian Empire, Wallachia received the name Roumania). During the 12th-14th centuries Transylvania was also inhabited by the Turkish Blaks (Bulaks, Blakos), not to be confused with Vlachs (Wallachs, Wlachs) according to L. Rásonyi (1982) and G. Bodor (1976), corresponding to the Hungarian chronicler Anonymus's ethnic name *Blacus* (in plural *Blachi* or *Blacci*); Roger Bacon, in about 1280, also mentions *Blacia* (the *blako* people). E.R. Roesler (1871) was the first to criticize the hypothesis of the Daco-Roman continuity (much earlier F.J. Sulzer, 1781, did the same), maintaining that the Romanians with their Romance tongue are a relatively recent "importation" from the Balkans, from near Albania. He was supported, among others, by the distinguished Hungarian linguist, ethnographer and historian, P. Hunfalvy, in his book on the history of the Vlachs (Romanians) in Transylvania (1894). Roesler's criticism of the Daco-Roman continuity hypothesis was in turn criticized by Johann H. Jung of Innsbruck and the Romanian writers, like: J.L. Pic, B.P. Hasdeu, D. Onciul, A.D. Xenopol, C.C. Giurescu and others.

On the other hand, the Hungarian scholars have opposed the hypothesis on archeological and historic grounds: first documented appearance of Vlachs (Romanians) in Transylvania being dated 1222, as shepherds in the mountains at that stage, and the first extant text in Romanian is a letter from 1521, also on a linguistic basis, contending that the hypothesis is scientifically untenable. Andre Du Nay (1977) follows the same line of thought, developed also on linguistic grounds. Linguist and orientalist L. Kazár (1983) pointed out that (1) neither in Rome, nor in Byzantium are any records in existence concerning the Christianization of the Daco-Roman people, (2) the Vlachs were placed under the rule of the Archbishopric of Ochrida (near Albania) by the Byzantine Emperor Basil II (Basilius, "the Bulgar-slayer"), because after protracted campaigns, he had totally destroyed the West Bulgarian Empire and their Vlach allies by 1018; the Transylvanian Wallachians as a result belonged to this Eastern Church rite until 1715, and the Vlach priests did not use the Latin script but the Cyrillic up to the middle of the 19th century; (3) the 19th century vocabulary of the Romanian language was composed of 31% Latin, 45,7% Slavic, 8,4% Turkish, 7% Greek, 6% Magyar, and 0,6% Albanian, and no Dacian – according to A. de Cihac, a Romanian linguist; (4) there is no evidence of borrowings from the culturally advanced Goths and Gepids who settled in Transylvania after the Roman withdrawal; (5) There are no archeological proofs (artifacts, utensils, ruins, cemeteries) that Daco-Romans lived in Transylvania after the Roman evacuation in ca. AD. 270; (6) The *Regestrum Varadiense* of the Bishopric of

Nagyvárad (now Oradea) records for the eastern part of the Hungarian Kingdom about 600 place names and 2500 personal names without any such names being of Romanian origin, and beside the large majority of Hungarian names, there are also German, Walloon, Ruthenian and Ishmaelite names, while Romanian names start occurring only centuries later in Hungarian documents; (7) there are numerous, conspicuously common characteristics between the Albanian and the Romanian; (8) the settlement history of Transylvania shows (following I. Kniezsa, 1938, and others), that up to the end of the 12th century, out of 511 well-established place names, only three are of Vlach origin; (9) King István I (Saint Stephen) of Hungary (997-1038) adopted Western Christianity for his kingdom (including Transylvania, AD 1004), with the Latin language and script, whereas the Greek Orthodox Christianity, with its Cyrillic alphabet was regarded as heretical; (10) in Vlach/Romanian church services, the language of ritual was Slavic up to the 19th century; (11) assuming that the Vlachs converted to Christianity in the 4th or 5th century, there should be widespread occurrences of religious symbols, like inscriptions and epitaphs in Transylvania (Dacia), which in other Roman provinces never fail to occur; (12) during the Roman rule of 166 years the soldiers and settlers were not drawn from Italy but from other provinces, whose language was not Latin; (13) in Transylvania there are no river, brook and creek names of Daco-Romanian origin (stated by I. Kniezsa, 1938 as well), these names are mostly Hungarian or Slavic in origin and the Romanians simply adopted them; this fact also indicates that the Vlachs/Romanians arrived by infiltration or immigration *after* the Carpathian settlement by the Magyars under the Hungarian Leader/Khagan Árpád (895), and also *after* the Germanic tribes. In order to escape the harsh rule of their own chieftains, Vlachs gradually infiltrated from the southern slopes of the Carpathians into the Hungarian-ruled Transylvania. Their number grew steadily: in the 14th century there were only 389 Vlach villages in Transylvania; by 1874 the Vlach population had increased to 787,000, and finally, they claimed Transylvania for themselves as their original homeland on the basis of their mythical Daco-Roman hypothesis. This has been successfully disseminated on international level and, in some instances it has been adopted by Western historians.

However, Colin McEvedy: *The Penguin Atlas of Medieval History* (1961) stated the following: "The Latin-speaking Wallachians and Moldavians, inhabiting modern Rumania, are first mentioned at the beginning of the fourteenth century. Their later claim to be descendants of the Roman colonists planted there in the second century A.D. seems tendentious and improbable, for the Romans' withdrawal from Rumania [Dacia] (270) and the appearance of the Vlach states are separated by a milleneum, in which the country was the property of Slav and nomad, and which is devoid of all evidence of Roman survival. Almost certainly the Vlachs came from the western Balkans and only migrated into Rumania as the nomads abandoned it in the late thirteenth and early fourteenth century".

The Daco-Roman theory received great political significance before and after the Versailles-Trianon Dictated Peace Treaty (1920), because Romanian nationalists found the theory very useful in stressing their "historic rights" to the possession of Transylvania. Most recent findings of the Etruscan-Hungarian language research suggest that the so-called proto-Magyars were in possession of the Carpathian Basin around BC 3000, well before the beginning of the Roman Empire. – B: 1068, 1075, 1240, 1285, 1582, 1763, T: 3233, 7103, 7456.→**Dacia; Vlachs, The; "Divide et Impera"; Árpád;**

**Etruscan-Hungarian Linguistic Relationship; Trianon Peace Treaty; Paris Peace Treaty.**

**Dádan, János** (John) (Jan) (? - Zorban, ca. 1674) – Printer. He was a Czech who worked in Hungary. He started his operation in Zsolna, a town of mixed languages in Northern Hungary (Upland, *Felvidék*, now Slovakia) in 1665. His mainly Protestant prints appeared in several languages: mostly in Latin but also in Slovak, Czech and, from 1672, in Hungarian. His last work was probably prepared in 1704, as Vencel Krolop had already taken over the direction of this reputable printing-shop in the same year. – B: 0942, 1267, T: 7659.

**Daday, Loránd** (Roland) (pen-names Mózes Székely, Mihály Derzsi, Bálint Kovács) (Beszterce, now Bistrița, Romania, 6 November 1893 - Dés, now Dej, Romania, 23 July 1954) – Writer. He studied in Dés and at the Reformed College, Kolozsvár (now Cluj-Napoca, Romania). Thereafter, he took a Theology course at the Reformed Theological Academy, Kolozsvár and earned a Ph.D. in Philosophy at the University of Budapest. During World War I, on the front he was captured and spent more than four years in a POW camp in Italy. After a short stay in Budapest, he returned to his inherited estate at Semesnye (now Șimișna, Transylvania, Romania) and worked as a farmer from 1926. His writings appeared in the journals *Sunrise* (*Napkelet*), *Shepherd's Campfire* (*Pásztortűz*), and *Our Age* (*Korunk*). Under the pen-name Mózes Székely he wrote a novel entitled *Bottom-rock* (*Zátony*), published in Budapest in 1930, and he received great publicity for his objective reporting on the tragic situation of Hungarians in Transylvania (*Erdély*) under Romanian rule since the Versailles-Trianon Peace Dictate in 1920. The book appeared in French under the title of *L'Éucell* (1935). His drama *The Map* (*A térkép*) was performed at the Inner City Theater (*Belvárosi Színház*), Budapest (1933). His novel *Thursday* (*Csütörtök*), dealing with Romanians was published in Budapest. For these two novels, a Romanian Military Court sentenced him to a six-month prison term. His prison experiences were published as short stories. After North Transylvania (*Észak Erdély*) was returned to Hungary in 1940, he worked as Chief Inspector of schools in County Szolnok-Doboka. His drama, *Whose is the Country?* (*Kié az ország?*), appeared under a pen-name in 1944. Thereafter, he was Mayor of Dés, and a teacher at a Hungarian High School. In 1946, he was indicted, and arrested again in 1952. He wrote short stories under the pen-name, Bálint (Valentine) Kovács, which appeared in the journals: *Our Way* (*Útunk*), *True Word* (*Igaz Szó*), and in anthologies. His posthumous volume of short stories, *Through the Marshland* (*Lápon át*), was published in 1954 after a long hiatus. His life work is still victimized in Romania, where officials did not even allow a commemorative plaque on the 50th anniversary of his death. – B: 0878, 1276, 1257, T: 7103. → **Trianon Peace Treaty.**

**Dajka, Margit** (Margaret) (Dayka) (Nagyvárad, now Oradea, Romania, 13 October 1907 - 15 May 1986) – Actress. She appeared on stage at the early age of 9. She studied acting in her city of birth and started her acting career in local theaters. Soon she received a contract in Kolozsvár (now Cluj-Napoca, Romania), where she became a public favorite in soubrette and ingénue roles. Thereafter, she played in Miskolc, and in 1928-1929 in Szeged. In 1929 she received a contract with the Comedy Theater (*Vigszínház*), Budapest. Her first appearance was in the role of Kis Erzsébet in Zsigmond Móricz' *Birdy* (*Kis madár*) and won over both the public and the critics. She worked with the Madách Theater (*Madách Színház*), Budapest, (1948); then played in the Petőfi Theater (*Petőfi*

*Színház*), Veszprém. Concurrently she was member of the Thália Theater (*Thália Színház*), Budapest. She was a very versatile artist whose strength in tragic roles and comic talent merged in her nature; she was equally successful as the frightening Mursavetzkaya in Ostrovskij's *Wolves and Sheep* (*Farkasok és bárányok*), and as good-humored, satirical Kamilla in Szigligeti's *Liliomfi*. Some of her other roles were Vica, in Emőd-Török's *Two Girls on the Street* (*Két lány az utcán*); Katyusa in Tolstoy's *Resurrection* (*Feltámadás*), Bese Anna in K. Kós' *Budai Nagy Antal*, and Grand Lady in S. Bródy's *Schoolmistress* (*Tanítónő*). There are more than 45 feature films to her credit including *The Bride of Torockó* (*Torockói menyasszony*) (1937); *John, the Brave* (*János vitéz*) (1938); *Yellow Rose* (*Sérge rózsza*) (1940), *Liliomfi* (1954); *Iron Flower* (*Vasvirág*) (1958), and *Csontváry* (1979). Among her numerous TV films are: *Earthquake* (*Földindulás*) (1970); *Auntie Bors* (*Bors néni*) (1981), and *Grandma* (*Nagymama*) (1981). She was a recipient the Kossuth Prize (1952), and honored by the titles of Outstanding Artist and Artist of Merit. (1952,1953). – B: 0871, 1445, T: 7684.→**Indig, Ottó (1).**

**Dala, László** (Leslie) (Hamilton, 1959? - ) – Music Director and Conductor of the Prince George (British Columbia) Symphony Orchestra, and Chorus Director and Associate Conductor of the Vancouver Opera. In 2009, he took on the role of Principal Conductor of the Vancouver Academy of Music, and was appointed Music Director of the 150-member Vancouver Bach Choir. He received his early music education at St. Michael's Choir School in Toronto, where he studied voice, piano, organ, and violin. He then went on to complete a Bachelors Degree in piano performance at the University of Toronto. After a session at the Banff Center, he moved to Vancouver and completed a Masters Degree at University of British Columbia. He has assisted on over fifty main stage productions with Vancouver Opera, and in 2004, he conducted the company premiere production of Kurt Weill's *Threepenny Opera*. He has collaborated with the University of British Columbia Opera Ensemble for six seasons in productions of *Così fan tutte*, *La Bohème*, *Die Fledermaus*, *Don Giovanni*, *The Magic Flute*, *HMS Pinafore*, and the popular *Merry Evening of Opera* concerts presented by the "Bard On the Beach" festival in Vancouver. He previously held the positions of Music Director of *Les Jeunes Voix du Rhin*, in Strasbourg, France (2001-2002), and the Opera as Theatre program at the Banff Centre (2002-2004). He has worked with the Canadian Opera Company, Edmonton Opera, Soundstreams Canada. He has been the Artistic Director of "The Little Chamber Music Series That Could", and conductor of the Helikon Ensemble. An avid performer of contemporary music, Leslie has recorded three dramatic works by Canadian composer Harry Somers, including the recently released *Death of Enkidu*. He worked with virtually all of the leading contemporary music ensembles in Vancouver, including the Hard Rubber Orchestra, Standing Wave, and the Turning Point Ensemble. In 2006, in honor of the 50th anniversary of the 1956 Hungarian Uprising, he conducted Zoltán Kodály's *Peacock Variations* for orchestra in Vancouver. – B&T: 7617.

**Dalmatia** – Territory on the eastern shore of the Adriatic Sea, approximately 560 km long, including islands. In ancient times, the Dalmatians, related to the Illyrians, were the original inhabitants; later on Slavic people filtered in. In the Middle Ages, self-governing city states (through the importance of the islands) had military significance. Consequently Byzantium, Venice and Hungary fought constantly between the 11-15th centuries for the

possession of Arbe (Rab), Ossero (Osor), Raguza (Dubrovnik), Sebenico (Sibenik), Spalato (Split) Trau (Trogir), Veglia (Krk) and Zára (Zadar). In the end, Hungary lost its rule over this territory in 1420. From the 16th century on, the Turks, later the Austrians and the French ruled Dalmatia and, from 1918 on, it was part of the Serbian-Slovenian Kingdom. In 1929, it became part of Yugoslavia. Since the falling apart of Yugoslavia in the 1990s, it belongs to the newly formed Croatia. – B: 1153, 1031, T: 7668.

**Dálnok, Lajos** (Louis) (Budapest, 11 April 1922 - Budapest, 3 November 1999) – Organist, conductor, opera singer, composer. He studied organ, composition and singing at the National Music Institute, then at the Ferenc (Franz) Liszt Academy of Music, Budapest (1939-1947). As a singer his major roles included Scarpia in Puccini's *Tosca*, Rigoletto in Verdi's *Rigoletto*, and Amonastro in Verdi's *Aida*. Between 1945 and 1950, he was Music Producer for the Hungarian Radio. In the meantime, he organized the yearly "National Protestant Days" and contributed to them with organ music. In 1950, the jubilee year of J. S. Bach, he performed some 50 organ concertos. From 1967 to 1986, he was the concert organizer and concert organist of the National Philharmonic Society, Budapest. From 1946 until his death, he was the organist and choirmaster at the Szabadság-Square Reformed Church, Budapest. In this capacity he continued the work of László (Ladislav) Lajtha. He was a contributor as organist to the Calvin Choir and Orchestra of the Calvin Square Reformed Church, Budapest (1962-1968). He was also the chief contributor in performing organ concertos and major oratorios, such as Haydn's *Creation*, Shütz and Bach *Cantatas*, and Mendelsson's *Psalms*, under the baton of Joseph Pungur, and helped to organize numerous church music evenings. In the last decade of his life, he was again the organist at the Szabadság Square Reformed Church, giving many organ recitals; 28 recordings were made with the label of Odeon, Pátria and Darling studios. His major works include *Preludes and Fugues for Organ*, piano pieces and songs written to the lyrics of Endre Ady, Ernő Szép and Francois Villon. In the second half of the 20th century he was an outstanding church musician of the Reformed Church in Hungary. – B: 1087, T: 7103.→**Lajtha, László; Ady, Endre; Szép, Ernő; Pungur, Joseph.**

**Dálnoki Miklós, Béla** (Budapest, 11 June 1890 - Budapest, 21 November 1948) – General, Prime Minister. He completed the military cadet school in Kőszeg, graduated from the Royal Military Ludovika Academy in Budapest, and was promoted to lieutenant in 1910. Following World War I, he served as general staff officer at various military bases; and from 1933-1936 he served as military attaché in Berlin. In 1939 he became Commander of the Mounted Brigade; in 1941, Commander of the newly formed Rapid Deployment Army Corps; and in 1942, Commander of the XI. Army Corps of Kolozsvár (now Cluj-Napoca, Romania). On 11 November 1942, he was named Chief Military Adjutant to Regent Miklós (Nicholas) Horthy; was Head of the War Office and, from 1 July 1944, Commander of Army Corps I. Following the 15-16 October 1944 pro-Nazi Arrow Cross Party *coup d'état*, he defected to the Red Army with his closer associates. On 19 October 1944, he published a declaration "for the cessation of hostilities against the Russian forces and the initiation of resistance against the German Army". Upon his arrival with several Hungarian politicians and army officers in Debrecen, he was elected as a non-aligned member of the National Provisional Assembly (*Ideiglenes Nemzetgyűlés*) in the Reformed College on 21 December 1944. The following day he was named Prime Minister of the National Provisional Government (*Ideiglenes Nemzeti*

*Kormány*), serving until 15 November 1945. He was one of the leaders of the right-wing faction of the Coalition Government. – B: 0883, 1031, T: 7617.→**Ludovika Royal Hungarian Military Academy.**

**Damjanich, János** (John) (Staza, 8 December 1804 - Arad, 6 October 1849) – Officer of the National Defense Guards (*Honvéd Forces*). He was one of the most outstanding military leaders of the 1848-1849 War of Independence against Austria, and one of the martyr generals hanged by the victors. He came from a Serbian border-guard family, but was ardently loyal to the Hungarian reform movement and Hungary's national aspirations. As a major of the Imperial Army, he joined the Hungarian uprising in the summer of 1848. In recognition of his outstanding military success at the southern frontier, he was promoted to General. During the spring offensive in 1849, led by him personally, his famous "Red Beret Brigade" (*Vörössipkások*) became legendary, by playing a decisive role in the battles at Szolnok, Hatvan, Tápióbicske, Isaszeg, Vác and Nagysalló (now Tekovské Luzany, Slovakia). The key to his victories was his personal courage, combined with his outstanding military strategy. In 1849, he accidentally broke his leg and could not actively participate further in field operations. In August of the same year, he was appointed Commander of the Arad Fortress. He gave up the Fort after the Világos Armistice to the Russian forces at the direct order of the Commander in Chief, General Artur Görgey. The bloodthirsty Austrian general Haynau sentenced him to death with 12 of his fellow generals and they were executed at Arad (Oradea, now Romania) on 6 October 1849. A museum in Szolnok, high schools and streets bear his name in Hungary. – B: 0883, 1105, T: 3233.→**Görgey, Artur; Arad, Martyrs of.**

**Dán, Róbert** (Budapest, 25 July 1936 - Budapest, 27 March 1986) – Bibliographer, literary historian. He began working as a scientific associate in the National Széchényi Library, Budapest. In 1965-1966 he was on scholarship pursuing some bibliographic work in the Royal Library of Copenhagen. In 1969 he completed an Arts course in Bibliography and Hungarian at the University of Budapest. Concurrently he studied at the National College of Rabbinical Studies. From 1968 to 1970 he was Head Librarian of the Bibliophilic and Graphics Collection. From 1971 he was Scientific Associate in the Department of Medieval World History. From 1980 he was Professor and Head of the Bibliographic Department at the University of Budapest, and from 1970, he also took part in the work of the Renaissance Research Group. From 1981 he was a member of the editorial board of the journal *Hungarian Book Review* (*Magyar Könyvszemle*), and Editor for the joint Hungarian-Dutch series, *Bibliotheca Unitariorum*. In his research activities the central position was taken by the study of the 16th-17th centuries, dealing also with the history of the Reformation and Humanism in Hungary, particularly with the work of Miklós Misztótfalusi-Kis, as well as with Judaistics. He studied the role played by the Hebrew language and the post-Biblical Jewish literature in Hungarian culture and literary history. He also studied the problem of antitrinitarism. He initiated the launching of the Judaistic Research Center within the framework of the Hungarian Academy of Sciences. He was one of the leading researchers of the Sabbatarian movement in Transylvania. His works included *Humanism, Reformation, Antitrinitarism and the Hebrew Language in Hungary* (*Humanizmus, reformáció, antitrinitarizmus és a héber nyelv Magyarországon*) (1973) and *The Sabbatarian Ideology and the Literary Work of Simon Péchy* (*A szombatos ideológia és Péchy Simon irodalmi munkássága*) (1987). – B: 0883, 1257, T: 7456.→**Misztótfalusi-Kis, Miklós; Péchy, Simon.**

**Dance, Hungarian** – Its origin can be traced from the ritual dances accompanied by singing. Singing still has an importance in Hungarian folk dances of today. Among the relics from the pre-settlement era are the depiction of a dancing Hun from Chinese

Shang-tun, and a silver bracelet depicting a Hungarian musician playing the zither, found in Staraya Riazan. After a successful battle, revelling warriors danced a sword dance. Gáspár (Gasper) Heltai gives a colorful description of the merrymaking after the victorious battle against the Turks at Kenyérmező in 1479. And while all the warriors were dancing the *toborzó* (recruiting dance), they waved at Pál (Paul) Kinizsi, to see if he too, would show his joy at the victory. Count Miklós (Nicholas) Zrinyi described in his great epic poem about the victory feast of the heroes of Szigetvár and the fearless warriors: “... the warriors are eating, drinking and loudly singing, and dancing the *hajdú-dance with their swords*”. György (George) Thurzó, Palatine of Hungary, arranged a procession of men selected from his subjects with their military

carriages and their masterful sword dances, for the occasion of the festivities put on for his son at Wittenberg. Traveling in Hungary in 1669, Edward Brown described the *hajdú* dance. He called it *Pyrrhik* (ancient Greek sword dance) and described it as follows: “*These (warriors) dance with bare swords, hitting each other’s swords, thereby making a lot of rattle, they swirl, jump in the air, throw themselves to the ground with great skill and finally they sing in their own special way, as it was done by the Greeks in ancient times*”. A similar Hungarian dance was customary in country houses of the nobility in a more polished and refined form. At the coronation of King Zsigmond (Sigismund of Luxembourg) in 1433 in Milan, János (John) Hunyadi dazzled the noble Italian ladies with his stately Hungarian dance. In 1572, Bálint (Valentine) Balassi danced his famous and mesmerizing *hajdú* dance at the coronation feast of Emperor Miksa (Maximilian) in Pozsony (now Bratislava, Slovakia); and it was the seven-year old Miklós (Nicholas) Eszterházy, who too performed this attractive Hungarian dance. In the 17th century, an abbot described the Hungarian dance of the noble houses thus: “*The dancing couples join hands. The first (couple) leads the whole line, at first with slow steps, then continuing with livelier ones and finishing like a gavotte, in which the man embraces the lady following him, and with two hands, spins her around several times without stepping out of the half-circle; thus, seven or eight men are spinning around with their female partners in a large hall, while the others maintain the form of the semi-circle*”. In addition, Daniel Speer, a German musician, talking about his experiences in Hungary around the middle of the 17th century, highlights it in connection with a wedding: “*...almost all their dances are ballet and they truly dance neatly and gracefully, not like the Germans or French who think their jumping around is wonderful*”. Dances and songs were used during the recruiting for the national uprising of Prince Ferenc (Francis) Rákóczi II (1703-1711), clearly reflected in the songs of the *Kuruc* (soldiers of the

insurrectionist armies fighting against Habsburg oppression): “*It’s high time you wake up, clean your musket and sword of rust, and get on your horse to the sound of drums.*” Or the lines of Csinom Palkó: “*Come on, good soldiers, drink to our health, let’s each dance with our betrothed.*” The recruits of the War of Succession enticed the young men of the villages to military service with the Hungarian jumping dance. According to Gáspár Heltai, this heroes’ dance is a recruiting dance and, from the end of the 18th century it remained in use under the Germanized name of ‘*verbunkos*’ (meaning recruiting). Dance was also used for the nationalist independence efforts during the 18/19th centuries. The revival of the old dances, the *körmagyar* (old Hungarian Ballroom dance), the *csárdás* and the *palotás* (slow and stately) took place during those times in the name of national romanticism, and have remained favorite ballroom dances to our days. The “slow Hungarian”, also called “the silent song”, is a derivative of the *saraband*, fashionable at the time. The marriage-feast dances and the bantering dance were also performed. The funeral dances took place at the beginning of the 18th century. The so-called local dances: the strolling dance, the gun dances, stamping dances, the famous dog-stamping dance from Szeged and the *kállai kettős* (*Double of Kálló*), which appeared in Nagykálló, were in style in one or another part of the country. Among the Transylvanian dances are the *borica* and barn banging. The latter was accompanied by song and dance in and around the barn. At the turn of the 19th century, several strange dance names appeared: *barát* (friends) *rattle dance*, *the wolves’ dance*, *torch dance*, *candle dance*, *pillow dance*, the *körmagyar* (Hungarian circle dance), and a social dance, called *wreath dance*. The *cotillion* was danced around at the same time. The *waltz* was later superseded by the *polka*. Around 1840, Baron Béla Wenckheim commenced popularizing Hungarian folk dances, under the name of *czardas* (*csárdás*). In villages, the Hungarian dance heritage continued without interruption. Ethnographic data-gathering found 60 dance names. The collection of folk songs during the 20th century gradually turned the attention to folk dance. This resulted in 1931 in newly formed peasant dance teams under the name ‘*Gyöngyös bokréta*’ (Pearly Bouquet). Each year until 1944, on the 20th of August (St Stephen’s Day), they held their performances of folk dances, songs and games. More than 100 sub-organizations of the movement performed 200 varieties of 80 dances. After World War II, dance groups in the villages were formed ostensibly on the basis of the *Pearly Bouquets*, (*Gyöngyösbokréta*); however, they withered during the 1950s. The *Hungarian State Folk Ensemble* was established around that time, under the leadership of Miklós Rába. The more than forty-year-old ensemble performed with great success in many parts of the world. The artistic dance, *ballet* had appeared already in the court of Prince Gábor (Gabriel) Bethlen (1613-1629). However, further development of this dance began in the French court during the 17th century. In Hungary, the noble courts, especially the *Estherházys*, invited foreign ballet dancers to be their guests. Hungarian ballet dancers first performed on the stage of the National Theater in 1837, and the Italian, Frederico Campilli, became leader of the dancers in 1847. Hungarian ballet was really formed following the Compromise of 1867, under the leadership of Italian dance masters. Between the two World Wars, Hungarian ballet of a national character reached its peak through the activities of Ferenc Nádasí and Gyula (Julius) Harangozó. Among the outstanding ballet dancers are: Bella Bordy, László (Ladislav) Csányi, Dora Csinády, Viktor Fülöp, Gyula Harangozó, Nóra Kovács, Zsuzsa (Susan) Kun, Gabriella Lakatos, Melinda Otrubay, Iván Markó, István Rab, György Tatár and

Ilona (Helena) Vera. – B: 1078, 1134, 1144, T: 7684, 7884.→**Heltai, Gáspár; Kinizsi, Pál; Zrinyi, Count Miklós; Zsigmond King; Hunyadi, János; Balassi, Bálint; Esterházy, Prince Miklós; Rákóczi II, Prince Ferenc; Rába, Miklós; Harangozó, Gyula; Bordy, Bella; Lakatos, Gabriella; Otrubay, Melinda; Markó, Iván; Dance House Movement; Hungarian Dances, Traditional.**

**Dance House Movement** (*Táncház mozgalom*) – On 6 May 1972, a movement was born in Budapest with the opening of the first *táncház* at the initiative of Ferenc (Francis) Sebő, Ferenc (Francis) Novák, Béla Halmos and György (George) Martin. The aim of the movement was to revive the traditional Hungarian dance culture. It spread throughout the country, especially in the cities, including Budapest, and all over the world where Hungarian ethnic communities are living, including the neighboring countries: Slovakia, Ukraine, Romania, Croatia and Serbia. There is hardly a major town in the western world where there is not a Hungarian Folk-dance ensemble, sometimes even two.

The term *táncház* (*dance house*) was taken over from a Transylvanian tradition of holding dances at individual's homes. *Táncház* draws on traditions from every part of Hungary, featuring song, music and dance, as well as from Transylvania (Erdély, now a region of Romania) and other detached parts of historic Hungary, such as the *Felvidék* (Upland, Northern Hungary, now Slovakia), *Délvidék* (Southland, Vojvodina, now Serbia) and *Kárpátalja* (now Carpatho-Ukraine, Ukraine).

The *táncház* tradition mainly relies on the folk-dance tradition of countryside villages. The movement is composed of numerous informal groups, closely affiliated with each other, and they usually have folk-dance festivals where dancing groups from a particular region perform on stage for enthusiastic audiences.

In Budapest, beside the State Folk Assembly, there are a number of *táncház* groups, including *Kalamajka, Meta and Csángó*. Countrywide, there are more than 60 folk-music ensembles, among them the *Téka, Muzsikás, Boglya, Zenegő* and *Tücsök*, to name only a few. There are renowned folk-music singers such as Ilona (Helen) Budai, Márta Sebestyén, Bea Palya, Éva Takács, Ilona (Helen) Nyisztor, András (Andrew) Berecz and Ferenc (Francis) Szilágyi. One of the achievements of the Dance House movement is that folk-dance became the foundation of the contemporary popular dance. It has even influenced modern Hungarian music, as it can be seen in a rock-opera entitled *Stephen, the King (István, a király)*. – B: 1105, 1646, T: 7103.→**Dance; Dévai Nagy, Kamilla; Faragó, Laura; Martin, György; Sebestyén, Márta; Berecz, András; Folk Fiddling.**

**Dancs, Rózsa** (Rose) (Érmihályfalva, now Valea lui Miei, Transylvania, Romania) 7 July 1944 -) – Writer. She was raised in Sepsimagyarós (now Măgheruș, Romania). She completed her high school at the Mikó Székely Collegiate School in Sepsiszentgyörgy (now Sf. Gheorge, Romania), then obtained her Degree in Pedagogy at the College of Pedagogy in Marosvásárhely (now Targu Mureș, Romania). She studied further at the Department of Philology of Babeș-Bolyai University of Kolozsvár (now Cluj-Napoca, Romania), where she received her Master's Degree. In her old country, Rózsa Dancs was a secondary school teacher of Hungarian Language and Literature. After arriving in Canada in 1988 with two small children, in the midst of creating an existence for her family, she enrolled at the University of Toronto, where she studied History and Librarianship and obtained a Master's Degree. For many years now, together with her husband, George Telch, she is active as a publisher and edits the magazine entitled

*Kaleidoscope (Kalejdoszkóp)*, which is one of a few Hungarian cultural magazines in North America. This endeavour to preserve and popularize the Hungarian heritage in both languages, Hungarian and English, is very important. One of her important books is the *Wild Boars Were Plundering the Corn (Vaddisznók törték a törökbúzát)*, which is a collection of short stories, essays, reviews and reports that appeared in newspapers, magazines and anthologies. In it, not only Dancs' subjective evaluation can be sensed, but also that very few books have written about Canadian-Hungarian artists with such great expertise. These include Dóra de Pédery-Hunt's artistry, Károly (Charles) Dálnoki-Veress and András (Andrew) Bényei's Sculptures, and Erika G. Simon's and Peter Gottlieb's Paintings. Rózsa's other books are: *The First Half Century of the Hungarian Helicon Society (A Magyar Helikon Társaság félévszázados története)* (2003), the *Rákóczi Foundation – 50 (Rákóczi Alapítvány –50)* (2003), and *Transylvanian-Hungarian Cooking (Erdélyi Magyar Főzőcske)* in English and Hungarian (1994). Dancs is Editor for the *Newsletters of Canadian Hungarian Artist's Collective (CHAC)* of Montreal, and the *Hungarian Cultural Centre (HCCC)* of Toronto, where she is the Media Director. As an accredited journalist, Dancs' reports and articles regularly appear in the papers: *Canadian Hungarians, (Kanadai Magyarság)*, the *Hungarian Chronicle (Magyar Krónika)*, Montreal, *American Hungarian Panorama*, and many other publications in Hungary and Transylvania. She is a recipient a number of prizes in illustrious literary competitions. – B: 1931, 0892, T: 7695, 7103.→**Pédery-Hunt, de Dóra.**

**Dankó, Pista** (Steve) (Szeged-Szatymáz, 13 June 1858 - Budapest, 29 March 1903) – Song/ writer, believed to be of Gypsy origin. At the age of 13, he organized and conducted in his village an orchestra made up of Gypsies. Later he moved to Szeged. Lujza (Louisa) Blaha, a renowned Hungarian actress, made his first songs famous. Eventually he moved to Budapest, where he won the competition of the periodical *New Times (Új Idők)* by writing the music to the lyrics of *Lake Balaton* by Lajos (Louis) Pósa. In the 1890s, he traveled around in Hungary with a choir, overshadowing the popularity of German singing groups. As he did not know how to write musical notes, he had to rely on other people to record his music. He struggled with hardships all his life. Near the end he was sent, in vain, to San Remo to cure his rapidly spreading tuberculosis. He wrote close to 400 songs based on folk music. He also wrote theater plays on folk themes. A few of his songs for example: *Crane (Darumadár)*, *My Violin is Broken (Eltörött a hegedűm)* and *One Kitten, two Kittens (Egy cica, két cica)* are still sung throughout the country. His statue is in Szeged.– B: 1150, 0883, 1031, 1445, T: 7684.→ **Blaha, Lujza; Pósa, Lajos.**

**Danube Banks of Budapest, Heritage Complex** – In 1998, the UNESCO declared the area between the Margit (Margaret) Bridge and the Szabadság Bridge (Freedom Bridge) as a World Heritage site. The area includes both sides of the river, the Gellért Mountain and the Castle of Buda. – B: 1051, T: 7656.

**Danube-Drava National Park** – This 49,500-hectare national park (established in 1996) is situated in southern Hungary. The region includes sections of the Danube and Dráva rivers, framing the hills of Southern Transdanubia (*Dunántúl*), as well as the alluvial plains. Prior to river-regulations, the marshlands covered a huge area; today they cover only a fraction of their former territory. Interestingly, the National Park is not an interconnected series of areas but rather a mosaic-like patchwork. Among these sections,

the best known is Gemenc, famed far and wide for its superb game stock, as well as Béda-Karapanca, which extend across the marshes, pastureland and floodplain of the lower course of the Danube. The area is home to Hungary's largest osprey (*Pandion haliaetus*) nesting site. The Drava is rich in all kinds of fish, certain rare species are found only here. The highly protected little tern (*Sterna albifrons*) nests in these parts only. The Bares juniper groves are also famous: they represent the unique habitat of two native flowers, the Royal Fern (*Osmunda regalis*) and the Shepherd's Cress (*Teesdalia nudicaulis*). – B&T: 1546.

**Danube Fleet** – (1) The Romans kept a permanent fleet to defend the borders of Pannonia (present day *Dunántúl* or Transdanubia). (2) In Hungarian history, starting with the first kings, there were warships for defense purposes, especially on the Upper and Lower Danube sections. They provided excellent service during the times of the Turkish wars: in 1428 at Galambóc, in 1456 at Nándorfehérvár (now Belgrade, Serbia), and in 1686 at the recapture of Buda. King Mátyás I (Matthias Corvinus, 1458-1490) recognized their importance and gave the fleet a permanent structure. Following the lost battle against the Turks at Mohács in 1526, the fleet came under Viennese command. After forcing out the Turks from Hungary and recapturing Fort Buda in 1686, the only role of the fleet was to guard the southern borders. – B: 0942, T: 7668.→**Mátyás I (Matthias Corvinus), King; Mohács, Battle of.**

**Danube-Ipoly National Park** – A protected area extending over 63,000 hectares of northern Hungary was formed in 1997. Its primary attraction is the Danube Bend. It is special for its terraced valleys, the meeting point of the plain and the hills, as well as for its amazingly varied natural habitats. The Park actually comprises the bare steep slopes of the Pilis Hills dotted with caves; the Visegrád Hill famed for its medieval castle; and the Börzsöny, with its spectacular serrated cliff formations. 60% of Hungary's bird habitat occurs in the Börzsöny Hills. Several Roman and medieval sites are located within the boundary of the National Park. – B&T: 1546.

**Danube Principalities** – Earlier combined name for united Moldavia and Wallachia. For centuries they lived under the suzerainty of the Turkish Ottoman Empire. In 1856 they secured their autonomy and they merged merged in 1862 to form the Principality of Romania. A few years later they adopted the new name Roumania. The Berlin Congress (1878), on the suggestion of Count Gyula Julius) Andrassy, Minister of Foreign Affairs of the Monarchy, recognizing its independence. – B: 0942, 1138, T: 7668.→**Andrassy, Count Gyula (1).**

**Darai, Lajos Mihály** (Louis Michael) (Hangács, 1951 szeptember 29 - ) – Philosopher, historian. He was born into a peasant family. His secondary studies were at the Franciscan High School of Esztergom. After graduation he was conscripted into the army for two years. He studied Theology at the Seminary of Esztergom for two semesters and moved to Eger, and finally to Budapest. He studied Philosophy and Hungarian Literature at the Arts Faculty of the University of Budapest, as a member of Eötvös College (1974-1979). Between 1979 and 1995, he worked in the Philosophy Department of the Budapest Polytechnic; in the meantime he obtained a Ph.D. From 1996 to 1997, he taught and carried out research at the Philosophy Department, St Stephen University at Gödöllő, where he founded a research group supported by the Hungarian Academy of Sciences. Since 1966, he has been teaching at the János Kodolányi Academy, Székesfehérvár. His

field of research is Philosophy, History of Philosophy, 20th Century Philosophy, History of Religion, Postmodern Philosophy and Society, European Studies, and History of Culture. He is member of a number of learned societies, including that of the Hungarian Philosophy Society, Hungarian Education Society, Hungarian Political Society, and Philosophy Committee of the Hungarian Academy of Sciences. He wrote numerous scientific papers, studies; his books include *Karl Popper* (1981); *Zur Geschichte der ungarndeutschen Philosophie. Aufklärungsperiode (On History of the Hungarian-German Philosophy. Enlightenment Period)* (1998); *History of Philosophy (Filozófiatörténet)* (1999), and *Cultural History of Philosophy (A filozófia kulturtörténete)* (2006). He co-authored several books with Ferenc (Francis) Cser; their books include *Hungarian Continuity in the Carpathian Basin (Magyar folytonosság a Kárpát-medencében)*, (2005); *People of the New Stone Age Revolution (Az újkőkori forradalom népe)* (2007); *Carpathian Basin or Scythia? (Kárpát-medence vagy Szkítia)*, (2008), and *We are Europe, vols. i,ii (Európa mi vagyunk, I, II)* (2008), their co-authored studies were presented at the Zürich Magyar Historical Society – ZMTE, and were published in their publications. – B: 1935, 1954, T: 7103, 7456.→**Cser, Ferenc.**

**Darányi, Kálmán** (Coloman) (Budapest, 2 March 1882 - Budapest, 1 November 1939) – Statesman, politician. He earned a Ph.D. in Political Science from the University of Budapest (1909). He was Chief Magistrate in County Fogaras, Transylvania (now Fagaras, Romania), from 1910, Chief Notary, then Lord Lieutenat of County Zólyom (now in Slovakia). He retired to his Transdanubian estates in 1917. He was Lord Lieutenant of the Transdanubian northern counties (1920-1927) and Undersecretary of the office of the Prime Minister (1928-1936), leader of the Unity Party (*Egységpárt*), Minister of Agriculture in 1935, and Prime Minister from 1936 till 1938, after the death of Gyula (Julius) Gömbös. He modernized the state apparatus and banned the right-wing Arrow Cross Party (*Nyilaskeresztes Párt*) of Ferenc (Francis) Szálasi. Darányi played active parts in agricultural farming interests, in the National Agricultural Association (as member of the directorate committee), and in Reformed Church activities. He initiated the so-called Program of Győr (*Győri Program*) (in March 1938) for the modernization of the army. During his time in office the First Jewish Law (*Első zsidótörvény*) (Act XV of 1938) was legislated by Parliament; then in May 1938, 60 Christian Hungarian writers, artists, scholars and public figures protested against this; their appeal “To the Conscience of the Nation” was signed by prominent figures like Béla Bartók, József (Joseph) Darvas, Noémi Ferenczy, Zsigmond (Sigismund) Móricz, Aladár Schöpflin, Géza Supka, Árpád Szakasits and Lajos (Louis) Zilahy. The Regent of Hungary, Miklós Horthy appointed the distinguished geographer and Head Scout of the nation, Count Pál Teleki as Prime Minister, replacing Darányi. – B: 0932, 1031, T: 7103, 7456.→**Gömbös, Gyula; Szálasi, Ferenc; Teleki, Count Pál; Horthy, Miklós; Bartók, Béla; Darvas, József; Ferenczy, Noémi; Móricz, Zsigmond; Schöpflin, Aladár; Supka, Géza; Szakasits, Árpád; Zilahy, Lajos.**

**Dardanelles**, (Hellespontos) Turkey – A strait 65 km long and 1,350-7,500 m wide between the Sea of Marmara and the Aegean Sea. It separates Europe from Asia Minor. It played a great historical role in trade and fishery. In antiquity, the city of Troy dominated the strait. The Persian King Xerxes (480 BC) and Alexander the Great (334 BC) crossed it with their armies. Until 1543 AD the Strait was under Byzantine control; thereafter it became part of the Ottoman Turkish Empire. When the expansion of Czarist Russia

reached the shore of the Black Sea, it acquired greater significance. By realizing the threat, the Sultan ordered the fortification of the strait in 1770. The Commander-in-Chief of the Turkish Artillery, the Hungarian Baron Ferenc (Francis) Tóth, was entrusted with the carrying out of the fortification. – B: 1138, 1020, T: 3233. → **Tóth, Baron Ferenc.**

**Dargay, Attila** (Mezőnyék, 30 June 1927 - Budapest, 22 October, 2009) – Cartoon animator. He attended the Academy of Applied Arts, Budapest (1945-1948), worked as a stage decorator at the National Theater (1951), he was trainee of animated cartoon-making (1951-1954), a planner (1954-1957), and Director from 1957. His cartoons include *Nut-kernel Prince (Dióbél királyfi)* (1963); *Variations on a Dragon (Variációk egy sárkányra)* (1967); *Three Rabbits (Három nyúl)* (1978); *Arthur, the Angel (Arthur, az angyal)* (1960-1961); *Gustavus (Gusztáv)* (1965-1968); *Crafty Matt, the Goose-herd (Ludas Matyi)* (1976), and *Captain of the Forest (Az erdő kapitánya)* (1968). He received many awards and prizes, including the Prize of Category I, Cannes (1957), the Silver Medal of La Plata (1967), the Silver Pelican Prize, Mamaia (1968), the Silver Cup of Salerno (1979) and the Merited and Outstanding Artist titles (1978, 1983). – B: 0874, 1031, T: 7103.

**Darkó, István** (Stephen) (Székely, István) (Szentendre, 19 March 1902 - Budapest, 6 August 1972) – Writer, political writer, newspaper editor. He was born into a Szekler Unitarian family. When he was six months old his parents moved to Losonc, now Lucenec, Slovakia, where he completed his high school studies. In 1923 he was one of the founding members of the Madách Circle of Losonc, and later became secretary of the Hungarian Cultural Association of Slovensko (*Szlovákiai Magyar Kultúr Egyesület – SZMKE*). He was also correspondent and secretary of *Our Paper (Mi Lapunk)*; *Hungarian Writing (Magyar Írás)* and *Observer (Figyelő)*. He was correspondent of the *Diary of Kassa (Kassai Napló)* as well as that of the *Hungarian News (Magyar Hírlap)* in Prague. From 1939 to 1944 (when the Hungarian populated southern part of Slovakia was returned to Hungary), he was director of Radio Kassa. In 1945 he was briefly taken prisoner of war by the occupying Soviet forces. After regaining his freedom he fled to Hungary to avoid a concocted lawsuit. He was employed by the Hungarian Resettlement Government Committee; later he became director of a College. His novel entitled *Burning Bush (Égő csipkebokor)* was rewarded with the State Prize of Czechoslovakia in 1937. In his short stories he depicted the life of the poor of the highlands. He also authored novels for children, and works dealing with psychology. He was a realist writer, but he was influenced also by expressionism, romanticism and secessionism. His language was determined by the Szekler and Palóc dialects. His writings were characterized by hopefulness in a better society. During the period between the two World Wars, he was one of the most significant Slovakian Hungarian writers, and was one of the main organizers of Hungarian cultural life in Slovakia. His works include *Two Peoples, one Shadow (Két ember, egy árnyék)* short story (1925); *Plank Town (Deszkaváros)* novel (1938); *People of the Hungarian Mountains (Magyar hegyek népe)* short story (1943), and *Ruins and Lights (Romok és fények)*, short story (1969). He was recipient of the Czechoslovak State Prize (1936). – B: 0883, 1890 1257, T: 7456. → **Trianon Peace Treaty; Atrocities against Hungarians; Szekler; Palóc.**

**Darnyi, Tamás** (Thomas) (Budapest, 3 March 1967 - ) – Swimmer. At the age of 15 he

lost vision in his left eye as a result of an accident. He was a member of the Sport Clubs Újpest Dózsa, BRSE and Sport Plus-OTP SE. He entered the 1988 Seoul Summer Olympic Games as World Record Holder in both the 200m and 400m medleys. In Seoul, he won both races and set another World Record in each. At the Barcelona Games in 1992, he successfully defended his Olympic titles. For eight years, he was undefeated in both categories. He held eight World Records, won four Olympic Gold Medals, and was Hungarian Champion 58 times. He started his career at the European competition in Sofia (1985) and closed it at the Sheffield European competition in 1993. He is the greatest medley swimmer in Olympic history, the most successful Hungarian swimmer ever. He is Vice-President of the Hungarian Swimming Association. A Swimmer-School in Budapest bears his name. – B: 1051, 1031, T: 7103.

**Daróc** – (1) Rough, thick wool felt. (2) Overcoat made of the same material. The name *daróc* was first used in 1493 as a substitute for felt, and in 1560 the first written record of it used it as substitute word for garment. It resembles the traditional long shepherd's coat in cut, but is shorter. The cut is straight; the shoulders can be turned out; it is seamless; the fitting of the sleeves and the generally square outline is similar to the shepherd's coat. The diagonal closing of the front distinguishes it from that of the shepherd's coat; it is a typical eastern element of the Hungarian style. In the old days, people wore it across their shoulders. – B: 1134, 1020, T: 3233.

**Daróczy, Sándor** (Alexander) (Püspökladány, 1899 - 1983, USA) – Minister of the Reformed Church in the USA. He received his education, including his training for the Christian ministry in Debrecen. He emigrated to the United States in 1922 and served in the Hungarian Reformed churches in New York City, McKeesport, Pennsylvania, and Carteret, New Jersey. He became one of the chief architects of the Hungarian Reformed Church in America and was the first Arch-Dean of his denomination. Following his service in Carteret (1935-1957), he was Director and, between 1967-1969, Superintendent of the Bethlen Home in Ligonier, Penn. He founded the Bethlen Press, the only Hungarian Reformed printing shop and publishing house in the West. Through his personal visits, correspondence, articles appearing in periodicals and the Bethlen Calendar, he held together thousands of members of the Hungarian Reformed faith scattered throughout the world. – B: 0906, T: 7617. → **Reformed Churches in America.**

**Daruvar, Yves de** (Istanbul, Turkey, 31 March 1921 - ) – French diplomat, writer. His father was Hungarian and an officer in the Austro-Hungarian army, and his mother a French woman. During World War I he fell into Russian captivity, where he learned the Turkish language. After the War he served as an analyst to the Turkish artillery. After his secondary studies in Paris, he obtained a diploma from the Overseas National School of France in 1940. After the French defeat in 1940, he went to England and joined the Free French Army of General Leclerc. He fought valiantly in World War II, and was wounded three times. After the War, he entered the diplomatic service and, from 1947 to 1950, was Head of the Administrator-Superior of the Madagascar, then successively in Mauritania (1952-1954), Ivory Coast (1955-1956) and in the Cameroons (1957-1958). He was Director of the Tourist Bureau of the AOF in Dakar (1958-1959), thereafter Secretary-General of the French Coast of Somalia (1959-1962), and High Commissioner of the Republic in the Comoros (1962-1963). He finished his career with the Atomic Energy Commission (1963-1981). Among his books are: *The Tragic Fate of Hungary: a Country*

*Carved up at Trianon* (1971), internationally recognized; in Hungarian: *A feldarabolt Magyarország*, Lucern (1976), *Red Book, 1919-1993* (*Vörös könyv 1919-1993*), selection (1992). In 1970 he was made a Knight Commander of the Legion of Honor Companion. B: 1242, 1020, 1672, T: 7103, 7680.→**Trianon Peace Treaty**.

**Darvas, Iván** (Szilárd) (Beje, 14 June 1925 - Budapest, 3 June 2007) – Actor. His mother was Russian, his father Hungarian. He lived in Prague from 1926 and moved to Hungary in 1939. He enrolled at the Academy of Dramatic Art, Budapest, in 1943. However, he did not complete his studies, as in 1945 he was an interpreter for a Soviet military unit. In 1946 he already played at the Artists' Theater (*Művész Színház*), Budapest. He achieved his first successes as Orpheus in Anouilh's *Euridyce*, and as Raskolnykov in Dostojevsky-Ackland's *Crime and Punishment* (*Bűn és bűnhődés*). In 1949 he received a contract to the Madách Theater (*Madách Színház*), Budapest, where he played until the end of 1956. For his participation in the Revolution and Freedom Fight of 1956, he was sentenced to 22 months in prison by a Communist court. Thereafter, he worked as an unskilled worker from 1959 to 1963. He stepped onto the stage again in 1963, in Miskolc. The following year he received a contract from the Attila József Theater (*József Attila Színház*), Budapest, and since 1966 he was a member of the Comedy Theater (*Vígyszínház*), Budapest. With him, a completely new type of young hero appeared on stage, able to interpret the spiritual struggle of modern man in a new and convincing manner. He could play any role from the light-hearted clown to the tragic one. A gentle irony characterized his interpretations. He was very successful in Gogol's *Diary of a Madman* (*Egy őrült naplója*). Some of his most important roles were in Móricz's *The Relatives* (*A Rokonok*); in Chechov's *The Three Sisters* (*A három nővér*); in Goldoni's *The Liar* (*A hazug*); in Maugham's *Arranged Marriage and a Dowry* (*Hozomány nélküli menyasszony*), and in T. Williams' *Cat on a Hot Tin Roof* (*Macska a forró tetőn*). He appeared in many feature films, including *Budapest Spring* (*Budapesti tavasz*) (1955); *Lark* (*Pacsirta*) (1963); *Cold Days* (*Hideg napok*) (1966), and *Love* (*Szerelem*) (1970). He was one of the most popular actors in the past half-century. He participated also in political life as one of the founding members of the Historical Justice Committee (*Történelmi Igazságtétel Bizottság*), and Member of Parliament from 1990-1994. He regularly exhibited his graphic works. He was awarded the Mari Jászay Prize (1955, 1967), the titles of Artist of Merit (1969) and Outstanding Artist (1979), the Kossuth Prize (1978, 1998), the Pro Urbe Budapest Prize (2001), the Imre Nagy Medal (2002), the Prima Primiissima Prize (2003), the Great Cross of Order of Merit of the Republic of Hungary (2005). He was an Actor of the Nation. – B: 0872, 1445, 1442, T: 7684.

**Darvas, József** (Joseph) (Dumitras) (Orosháza, 10 February 1912 - Budapest, 3 December 1973) – Writer, journalist and politician. He rose from humble peasant stock and graduated from a teachers' college in 1932. He worked at menial jobs in the Capital, became involved in the illegal Communist movement, was arrested, spent two months in jail in 1933, and was under police surveillance for the next five years, but still continued his association with the Communists. After 1934, he worked as a journalist. His first novels dealt with the social problems of the peasantry. In 1936-1937 he edited the Communist newspaper *Thought* (*Gondolat*), with György (George) Vértes. In his writings he dealt mainly with the responsibility of the educated middle classes for solving the country's social ills, demanding the redistribution of land and an end to unemployment. He served as Vice-President of the Peasants' Party and Editor of its

newspaper *Free Word* (*Szabad Szó*) (1945-1949). From 1945 to the end of his life he was a Member of Parliament; between 1947 and 1956 he held various ministerial posts and was also Director of the Hunnia Film Studio (1957-1959). Darvas was a prolific writer who published many books and plays. Some of his works are: *Rainbow* (*Szivárvány*) poems (1932); *Black Bread* (*Fekete kenyér*) novel (1934); *Story of a Peasant Family* (*Egy parasztcsalád története*) sociography (1939); *Abyss* (*Szakadék*); drama (1943), and *October Fog* (*Októberi köd*), novel (1970). He was one of the leading members of the populist writers' movement and twice recipient of the Kossuth Prize (1956, 1960). – B: 0878, 0883, 1257, T: 7617. → **Tolnai, Gábor.**

**Darvas, Lili** (Budapest, 10 April 1902 - New York, USA, 23 July 1974) – Actress. She was a student of Sándor (Alexander) Góth, and in her first stage appearance she played Julia in Shakespeare's *Romeo and Juliet* in 1920 in the Theater Circle of Buda (*Budai Színházkör*). Then she received a contract from the Hungarian Theater (*Magyar Színház*), Budapest, and in 1924 became a member of the Comedy Theater (*Víg Színház*), Budapest, where she played successfully in Ferenc Molnár's plays. He later became her husband. She received a contract from Max Reinhardt in Vienna and frequently played in Berlin. She emigrated to the United States in 1937, and lived abroad ever since that time, regularly performing in English language plays. She also appeared on television. In 1965 she performed as a guest artist in the role of F. Molnár's Princess Eugenie in *Olympia* at the Madách Theater in Budapest. At the beginning of her career she interpreted lyric roles with great conviction. Later on, she successfully played light comic roles due to her natural mannerism, engaging charm, and outstanding acting techniques. Her more important roles were in Schiller's *The Maid of Orleans*, but appeared mainly in Molnár roles such as *Heavenly and Earthly Love* (*Mennyei és földi szerelem*); *The Glass Slipper* (*Az üveg-cipő*), and *The Red Mill* (*A vörös malom*). Her feature films included *Marie Bashkirtseff* (*Baskirtsev Mária*) (Austrian, 1936); *Meet Me in Las Vegas* (*Találkoz velem Las Vegasban*) (USA, 1956); *Twenty-Four Hours in a Woman's Life* (USA TV, 1961) *Cimarron* (USA, 1961), and *Love* (*Szerelem*) (Hungarian, 1970). Between 1951 and 1965 she appeared in more than 150 TV film series. She received the Prize of the Hungarian Film Critics in 1971, and the Tony Prize in 1972. – B: 0872, 1445, T: 7684. → **Molnár, Ferenc; Góth, Sándor.**

**Darvas, Szilárd** (Constantine) (Budapest, 30 November 1909 - Budapest, 9 March 1961) – Poet, humorist. While training to become a master printer, his poetry was being published in several papers. He also wrote comedies. One of his anti-Fascist and anti-war poems brought him before a military court in 1943. From 1945-1948, he was editor of two papers: *Freedom* (*Szabadság*) and *Crafty Matt, the Goose-herd* (*Ludas Matyi*), a satiric weekly, of the latter he was Editor-in-Chief in 1947-1948. His witty, humorous sketches reflected the awkward situations of everyday life. He wrote song lyrics, revised opera libretti and film scripts. He was the permanent Master of Ceremonies at several theaters. He wrote a number of literary caricatures and humoresques. Some of his works are: *Dance Around a Picture* (*Tánc egy kép körül*) tragicomedy (1930); *Man on the Clock's Arm* (*Ember az óramutatón*) poems (1934); *It is the same in Jokes* (*Ugyanaz viccben*) humorous writings (1950), and *Don't Let Me* (*Ne hagyjatok*), poems. – B: 0883, 0878, 1257, T: 7617. → **Szür-Szabó, József.**

**Dávid, Ferenc** (Francis) (Hertel) (Kolozsvár, now Cluj-Napoca, Romania, ca. 1510 -

Déva, now in Romania, 15 November 1579) – Church reformer. He studied at the Universities of Wittenberg and Frankfurt an der Oder, Germany. He was influenced by the thoughts of Erasmus, Luther, and later Servetius. In Kolozsvár he was a Lutheran, then a Calvinist minister, and later a Bishop of the Unitarian Church. He was also a famous adversary of Calvinist Bishop Péter Méliusz Juhász, holding important religious debates with Melius over the Trinitarian dogma. Dávid's goal was a religious reform along Unitarian lines. David was supported by the Transylvanian Reigning Prince János Zsigmond (John Sigismund, 1556-1571). Dávid successfully propagated his doctrine of anti-Trinitarianism and the Unitarian ideas against Trinitarianism. He was the founder of the Unitarian Church in Transylvania and Hungary. His verbal debates (in Gyulafehérvár, now Alba Julia, Nagyvárad, now Oradea, Romania, and also in Debrecen) proved to be more effective than his theological works in Latin and Hungarian. When the Roman Catholic Prince István (Stephen) Báthori came to the throne in 1571, it became a time of confrontations: in 1579 Dávid was sued and sentenced to life imprisonment. After spending few months in prison he died at the fortress of Déva. Under Dávid's influence the Diet of Torda legislated religious freedom in 1568, the first such legislation in the world Dávid wrote some 40 major works, including *Responsum* (1556); *Defensio...*(1559), *Confessio* (1570). His works are considered important for the history of religions and religious freedom. – B: 0883, 0907, 1031, 1150, 1257; T: 7682, 7103.→**Méliusz Juhász, Péter; János II, King; Gyulafehérvár Religious Disputes; Unitarian Church in Hungary.**

**Dávid, Géza** (Budapest, 22 August 1949 - ) – Turkologist, historian. During 1968-1973 he completed his higher studies in History, Turkish and English at the University of Budapest. From 1973 until 1980 he was lecturer of Turkish language at the University of Szeged. Since 1980, he has been working at the University of Budapest, first as a demonstrator in Turkish Philology; in 1998 as an assistant lecturer, then assistant professor, full professor, and from 1999 Head of the Department of Turkish Studies. From 1987-1989 he furthered his studies on a Soros scholarship of the Hungarian Academy of Sciences, and in 1997, on a Széchenyi scholarship and a Humboldt scholarship. He obtained a Ph.D. in 1997. He was a guest lecturer at the Universities of Humboldt, Cambridge, London, Oxford and Munich. He also made study trips to Turkey, Italy, France, West-Germany and Austria. He is a member of the Orientalistic Council of the Academy of Sciences; President of the Mixed Hungarian-Turkish Historical Council, correspondent of the Turkish Historical Society, and member of other scholarly societies as well. He is Vice-President of the Editorial Committee of the journal *Eastern Research(Keletkutatás)*. His teaching subjects are: history of the Ottoman Empire, Turkish Narrative and Documentary Sources, and special courses. His research field is the history of demographic changes, economic conditions and system of administration during the Turkish occupation of Hungary. The number of his published works exceeds 190. His works include *Hungarian-Turkish, Turkish-Hungarian Travel Dictionary (Magyar-török, török-magyar úti szótár)* (1987), *Studies in Demographic and Administrative History of Ottoman Hungary* (1997), *The Population of Hungary in the 16th - 17th Centuries (Magyarország népessége a 16-17. században)* (1997). – B: 0874, 1257, T: 7456.

**Dávid, Gyula** (Julius) (Árapatak, now Araci, Romania, 13 August 1928 - ) – Literary historian in Transylvania (*Erdély*, now in Romania). He attended elementary school in his

birthplace, Árapatak, and in Székelyudvarhely (now Odorheiu Secuiesc), the Roman Catholic High School and the Reformed College of Székelyudvarhely, graduating in 1947. He studied Hungarian Language and Literature at the University of Kolozsvár (now Cluj-Napoca, Romania) and received his diploma in 1951 and a Ph.D. in 1974. In 1957 he was imprisoned for 7 years for sympathizing with the illfated Hungarian Revolution and Freedom Fight of 1956. He languished in the prison of Szamosújvár (now Gherla) and in the forced labor camps of the Danube Delta and on Braila Island. Upon his release, he was classified as an unskilled worker between 1964 and 1965, and was a free-lance writer (1965-1969). Following his rehabilitation in 1969 and until his retirement in 1992, he worked as a contributor, then as Manager at the Kolozsvár branch of the Kriterion Publishers. In 1992, he co-founded the Polis Publishers in Kolozsvár. His major works include *Jókai* (1971), *Petőfi in Transylvania (Petőfi Erdélyben)* with Imre (Emeric) Mikó (1972), *Meetings (Találkozások)* (1976), *Memory of Balázs Orbán (Orbán Balázs emlékezete)* (1995), *Transylvanian Pantheon, vol. ii (Erdélyi Pantheon, II)* (1999). He is a member of the Writers' Association, as well as several cultural associations and editorial boards. He was a recipient of the Áron Tamási Prize (1991), the Zsigmond Kemény Prize and the Imre Nagy memorial plaque. – B: 0878, 0910, T: 7103.→**Freedom Fight of 1956.**

**Dávid, Ibolya Márta** (Violet) (Baja, 12 August 1954 - ) – Politician, lawyer. She completed her high school studies at the Kálmán Tóth High School of Baja in 1972, worked in temporary jobs, entered the Law School of the University of Pécs and graduated in 1981. She worked as a lawyer-candidate at Tamási, and in 1982 she was admitted to the Bar. She served as a member of the *Hungarian Democratic Forum (Magyar Demokrata Fórum-MDF)* from 1989, and was elected Member of Parliament in 1990, where she performed various committee duties. She is also a member of the Hungarian Section of the Interparliamentary Union, a member of the Canadian-Hungarian section, and a member of the International Body of Francophone Representatives. In 1996 she became member of the MDF Presidium, later Vice-President, and finally its President in 1999. From 1998 to 2002, she was Minister of Justice in the Orbán Government, when the MDF was in coalition with the Fidesz Party. The MDF has been present in the Parliament from the beginning of the new political era in Hungary, but in the 2010 election the Party lost its parliamentary presence. Miss Dávid was a Member of Parliament from 1990 to 2010. – B: 0995, 1031, T: 7103.→**Political Parties in Hungary.**

**Dávid, István** (Stephen) (Székelyudvarhely, now Odorheiu Secuiesc, Transylvania in Romania, 1 November 1949 - ) – Organist. He completed his music studies at the Academy of Music, Kolozsvár (now Cluj-Napoca, Romania) during 1967 and 1972. He furthered his studies in master classes abroad, as student of J. E. Kohler and Jean Guillou (Weimar, Rotterdam, Alpe d'Huez). He also pursued studies at the Ferenc (Franz) Liszt Academy of Music, Budapest, from 1996 to 1999. He worked as a music teacher at Hídalmás (now Hida, Romania) in 1972 -1973, and as coach and piano teacher at the College of Art, Kolozsvár between 1973 and 1987. He was a piano teacher at a special high school of Kecskemét from 1989 to 1996. From 1988 he has been working as an organist and choir master at the Reformed Congregation of Nagykőrös and, from 1991 Professor and Head of Department of Music at the Teachers' Training College of Nagykőrös of the Gáspár Károli Reformed University. Also, from 1991 he has been a

member of the Presidium of the *Organa Transsylvanica Foundation*, and from 1997 that of the *Hungarian Sacred Music Society*. He played at concerts in numerous European countries. He is well known for his research on the history of organ and also for his prize-winning book, written on the historic organs of Transylvania. The church organ of the Reformed Church of Nagykőrös was rebuilt under his expert guidance. In 2002 he obtained a Ph.D. from the Ferenc (Franz) Liszt Academy of Music, majoring in the history of organs in Transylvania. The title of his Ph.D. thesis was: *Organ-building in 18th Century Transylvania and its Influence in the Hungarian Reformed Church (Erdély XVIII. századi orgonaépítészete és hatása a magyar református egyházban)*. His other works include *Historic Organs in Kolozsvár (Műemlék orgonák Kolozsváron)* (1983); *Historic Organs in Transylvania (Műemlék orgonák Erdélyben)* (1996). A gramophone record of his organ playing appeared in 1996. His distinctions include the Liszt Memorial Plaque (1986) for the best Hungarian book in Romania (1996), and the László Debreceni Memorial Medal (1999). – B: 0874, 1982, T: 7456.

**Dávid, Kornél** (Cornel) (Nagykanizsa, 22 October 1971 - ) – Sportsman. Until 1996, he played in the Hungarian basketball league, was a regular member of the National Team and was widely recognized as the best basketball player in Hungary. In 1997 the perennial NBA Champions, the Chicago Bulls signed him for a contract. However, it wasn't until the retirement of superstar Michael Jordan in 1999 that he had his chance to play in the best league in the world. Unfortunately, most of his career in the National Basketball Association was spent as a journeyman and he played for four different teams in as many years. He had some memorable games; he outscored and successfully defended against Shaquille O'Neal in the 2nd quarter of a game in Cleveland. During his career, he was nothing short of a national hero in Hungary where the game of basketball became more and more popular with each game he played in the NBA. He enjoyed mild popularity in the USA, mostly in Cleveland, with its large Hungarian population. In 2001, after the Washington Wizards released him, he returned to Europe to play for Strasbourg and in 2002 he joined the Lithuanian team, Zalgiris Kaunas. – B&T: 1040.

**Dávid, Teréz** (Therese) (née Davidovics, Mrs. Géza Bräuer) (Görgényszentimre, now Gurghiu, Transylvania in Romania, 9 August 1906 - Pozsony, now Bratislava, Slovakia, 11 June 2002) – Dramaturgist, writer in Slovakia (formerly Northern Hungary – Upland, *Felvidék*). In 1924, after completing high school, she studied photography and worked as a photographer from 1924 to 1957, first in Ungvár (now Uzhhorod, Ukraine), later in Pozsony. During World War II, she had to hide because of her Jewish origin. Between 1963 and 1965 she was dramaturgist at the Hungarian Regional Theater (*Magyar Területi Színház – MATESZ*). From 1963, she was a member of the Hungarian Section of the Slovak Writers' Association, as well as the Czechoslovak Hungarian Social and Cultural Alliance (*Csehszlovákiai Magyar Dolgozók Kulturális Szövetsége – CSEMADOK*). Her articles, e.g. *History of my Silence (Némaságom története)* (1972), appeared in weeklies, such as the *Week (Hét)*, and *Woman (Nő)*. Her stage plays include *Dódi* (1958); *Ignis fatuus (Will-o'-the-Wisp, Lidércfény)*, drama (1959); *Black Lamb (Fekete bárány)*, drama (1960); *Timed Happiness (Időzített boldogság)*, novel (1973), and *Love Comes to the House (A szerelem házhoz jön)*, play (1981). She received prizes from the CSEMADOK, the Slovakian Writers' Association, and the Slovakian Women's Federation. – B: 0878, 1083, 1257, 1551, T: 7456.

**Dawn Song** – Song or hymn, greeting the rising sun. It is in verse format with rhythm and rhyme. According to its content and title, the *Hajnali ének Boldogasszonyról* (*Dawn Song about the Blessed Mother*) is such a song. In the Latin edition of the *Cantus Catholici* of 1651, the cantata *aurora luciudissima* is the same type of song. There are a great variety of morning songs from the 16th century; some of them were even recited by tower watchmen. – B: 1138, T: 3233.→**Madonna the Great.**

**Day Laborers of the Nation** – A title referring to actors. The expression first appeared in 1857 in a book by Gereben Vas: *Day Laborers of the Nation* (*A nemzet napszamosai*). The members of the Hungarian Strolling Players (*vándorszínészek*) became known by this title throughout the country. During the early part of the 20th century the term also referred to teachers, especially rural teachers. – B: 1078,1020, T: 7685.

**Deák** – A word with several meanings in Hungarian. (1) Priest of a religious order (monk, friar or deacon). (2) Scribe, clerk or secretary (3) Student. (4) A man of classical education speaking Latin. – B: 0942, T: 3233.

**Deák-Ébner, Lajos** (Louis) (Pest, 18 July 1850 - Budapest, 20 January 1934) – Painter. He studied painting in Munich, Germany and in Paris. He belonged to the circle of Mihály (Michael) Munkácsy and László (Ladislav) Paál in Barbizon. He was one of the founders of the Artist Colony of Szolnok, where he spent more than a decade from 1874 on. He learned portrayal from the Barbizon school. Realism was the main feature of his works. He was an accomplished painter and leader of the School of Women Painters, Budapest (1887-1922). He painted the frescoes of the Abbey of Tihany with the masters Károly (Charles) Lotz and Bertalan (Bartholomew) Székely (1889-1890). His works include *Market Woman* (*Kofa*), *Bridal Procession* (*Nászmenet*); *Easter Procession* (*Húsvéti körmenet*), and *Stork on the Roof* (*Gólya a háztetőn*). – B: 0934, 1160, T: 7103.→**Munkácsy, Mihály; Pál, László; Lotz, Károly; Bihari, Sándor; Székely, Bertalan.**

**Deák, Ferenc** (1) (Francis) (Söjtör, 17 October 1803 - Budapest, 28 January 1876) – Statesman, legal expert. During the reform meetings in 1832-1836 and 1839-1840, he was one of the leaders of the opposition, and from then on, leader of the opposition's moderate majority. It could be attributed to his commanding presence that in 1840 the government granted amnesty to László (Ladislav) Lovassy, Lajos (Louis) Kossuth and Baron Miklós (Nicholas) Wesselényi, convicted for political reasons. As the Minister of Justice of the Batthyány Government, in August of 1848 he attempted, but without success, to reach a compromise between the Government and the Vienna Court. On 3 January 1849, he was a member of the parliamentary commission that negotiated the conditions of the peace with General Prince Alfred Windischgrätz. After fruitless efforts, he retired to his estate at Kehida. He lived in Pest from 1854 on, and was the political leader of the passive resistance movement against Austrian rule. After the "Diploma of October", he became again Member of Parliament, standing for the laws of 1848. In the 1860s, even the Government in Vienna took notice of this wise, moderate patriot's words and he was

given more and more important parts in the preliminary proceedings of the Compromise between the nation and the Dynasty. The testing of the Compromise of 1867 began with his article in *Pesti Napló*'s 16 April 1865 Easter Issue. Its conclusion was largely Deák's merit, for which the country gave him the title: "Wise Man of the Country" (*A Haza Bölcsse*). After the Compromise of 1867, he did not take any position in the newly formed government; but his authority and influence continued to be significant. In exile, Lajos (Louis) Kossuth opposed the Compromise of 1867 and pointed out in his letter to Deák that by it the nation was bound to the Austrian Empire, already condemned to death. Shortly after, the views regarding the Compromise also changed in Hungary, and Deák himself acknowledged that his hopes attached to the Compromise were not realized. At his funeral, Queen Erzsébet (Elizabeth) mourned him, together with the whole nation. – B: 1150, 1153, 1257, T: 7668. → **Kossuth, Lajos; Baron Wesselényi, Miklós, Count Batthyány, Lajos; Erzsébet (Elizabeth Amalia Eugenia), Queen; Compromise of 1867.**

**Deák, Ferenc (2)** (Francis) (Kokos, now Chichi, Romania, 17 June 1935 - ) – Graphic artist in Transylvania (*Erdély*, now in Romania). He graduated from the Andreescu Academy of Fine Art, Kolozsvár (now Cluj-Napoca, Romania) in 1958. Until 1967, he was a graphic artist of the magazines *Art (Művészet)* then *New Life (Új Élet)*. From 1967 to his retirement in 1995, he was a graphic editor for the Kriterion Publishers. Since 1960 he has illustrated several hundred books and other publications in Hungary and abroad. Some of his exhibitions were in Kolozsvár (now Cluj-Napoca, Romania) (1965), Braunschweig (1994), Budapest (1969, 1984), Philadelphia (1973), Vienna (1976), Stockholm (1976), Helsinki (1979), Moscow (1980), and Boston (1983). He is a member of numerous art societies and recipient of many prizes, among them the Graphic Prize, Rome (1967, 1983), the First Prize, Budapest (1973, 1974) and the Biennale Award, Poland (1977). – B: 1036, T: 7103.

**Deák, István** (Stephen) (Székesfehérvár, 11 May 1926 - ) – Historian. He received his higher education at the University of Budapest (1945-1948), University of Paris (1949-1951), and Columbia University, New York, USA (1956-1960). He worked as a book retailer and librarian in Budapest (1948-1951), and in Paris (1951-1956). He worked at the Research Department of Radio Free Europe, Munich (1956-1959) and at the Press Department of the Free Europe Committee, New York (1956-1959). From 1963, he taught at Columbia University, first as a lecturer, later as a professor and a Seth Low Professor of European History. He was also a guest professor at other universities. He served as Director of the Central European Institute (1967-1978). He retired from teaching in 1997, and was later a visiting professor at Stanford University. He has continued to publish on European history. His works include *Weimar Germany's Left-wing Intellectuals: A Political History of the Weltbühne and Its Circle* (1968); *Lawful Revolution, Lajos Kossuth and the Hungarians 1848-1849* (1979); *The Social and Psychological Consequences of the Disintegration of Austria-Hungary in 1918* (1980); *Beyond Nationalism: A Social and Political History of the Habsburg Officer Corps 1848-1918*, (1990) (*Volt egyszer egy tisztikar 1848-1918*) (1993). His recent books include *Memories of Hell* (1997) and *Essays on Hitler's Europe* (2002). He wrote numerous articles as well. After 1964, he worked to re-establish links between American and Hungarian historians. He was Co-President of the World Association of Hungarian historians. Since 1990, he has been an external member of the Hungarian Academy of

Sciences. He is a recipient of the Book Prize of Lionel Trilling (1979) and the George Washington Prize (1999). – B: 0874, 0878, 1031, 1257, T: 7103.

**Debály, Ferenc József** (Francisco José Debali) (Kinnen, Wallachia, Romania, 26 June 1791 - Montevideo, Uruguay, 13 January 1859) – Composer. Joseph Haydn was his godfather. He was educated as a musician and worked in the army. After he left the army he settled in Germany, then moved to Italy, and finally to Brazil, where he composed musical poems, military marches and folk dances. He was a friend of Giuseppe Garibaldi. He composed the Uruguay Anthem and the Vatican Anthem as well. He composed some 143 musical pieces including symphonies, sonatas, masses, and even dance music. – B: 1243, 1031, T: 7103. → **Brazil, Hungarians in; Uruguay, Hungarians in.**

**Debrecen** – (Latin: *Debretinum*, German: *Debrezin*). Largest country town of Hungary (population 29,000 in 1787; 117,000 in 1930; 198,000 in 1983, 205,084 in 2008), the “Calvinist Rome”, situated in the northeastern part of the Great Hungarian Plain in County Hajdu-Bihar. It is predominantly an agricultural center, but it has some industry, producing mainly agricultural machinery, medical instruments and pharmaceuticals. It is also a center for railway industry, producing railroad cars. Debrecen is a university town, founded a Reformed College in 1538. The town is at the western edge of the *Great Forest (Nagy Erdő)*, an extensive and beautifully kept parkland, at the north end of the town.

**The Great Presbyterian (Reformed) Church**

In its early history, the site of Debrecen was inhabited for shorter periods by Vandals, Goths, Sarmatians, Gepids, and by Avars for more than two centuries (568-803) as part of the Avar Khanate embracing the entire Carpathian Basin. The name of the town first appeared in documents in the 13th century. It was granted the privileges of a market town by King Louis the Great (*Nagy Lajos*) in 1361. From 1450 to 1507, the town belonged to the Hunyadi family. The Reformed Printing Press was established by Reformer Gál Huszár in 1561. Debrecen became the stronghold of Hungarian Protestantism in the 16th century. The Turkish occupation did not seem to have had serious effect on the town. Its merchants transported cattle, horses, wheat and wine to western countries. It was also the center of resistance in the War of Independence against Habsburg rule in 1848-1949. Despite its great past, the town has hardly any old historic buildings. The present building of the more than 400-year-old Reformed College was built in the early 19th century. The Great Church of Debrecen, the St Peter's of Calvinism in Hungary, built originally in the 14th century, was built in its present form during 1805-1827, designed by Mihály Péchy. It dominates the former marketplace in the center of the town. It was in this church that the Revolutionary Government of Louis (Lajos) Kossuth proclaimed the independence of Hungary from Austria and the dethronement of the Habsburg Dynasty on 14 April 1849. Near the end of

World War II, in the fall of 1944, under the influence of the invading Soviet forces, the town was the provisional capital of Soviet occupied Hungary. The County Hall was designed in the Magyaresque style by Lajos (Louis) Jámbor and Zoltán Bálint. Close to the center is the fine building of the Déri Museum. West of the town is the *Hortobágy National Park*. – B: 1031, 1068, 1789, 7456, T: 7456.→ **Debrecen, Tank Battle of; Debrecen Codex; Debrecen Reformed College; Debrecen-Egervölgy Confession; Szűr Mantle; Debrecen, Synod of; Kossuth, Lajos. Debrecen, cifra szűr of→Szűr Mantle.**

**Debrecen Codex** – A fragment of the copy of a complete Hungarian legendary Codex originating in 1519. It contains the legends of saints according to the Franciscan missal or breviary for the period of 30 November to 25 March. In addition it contains sermons, parables, prayers, but these don't belong to the main text. It consists of 316 leaves, the work of six hands. From the Franciscans of Csíksomlyó (now Sumuleu Ciuc, Romania) it ended up at the Reformed College of Debrecen. It was so carefully guarded there that later, poet Ferenc (Francis) Kölcsey could only copy it secretly for Ferenc Kazinczy, who intended to publish it. – B: 1150, T: 7659.→**Codex Literature; Kölcsey, Ferenc; Kazinczy, Ferenc; Debrecen.**

**Debrecen-Egervölgy Confession** – By the end of the 1550s, the leading personalities of Transylvania (*Erdély*, now in Romania), *Tiszántúl* (Trans-Tisza or transtibiscan region) and the Danube-Tisza interstice became converts of the Helvetic-oriented Reformation. With regard to the doctrine of the Lord's Supper, they upheld the mutual cooperation of faith and the Holy Spirit. This Doctrine was accepted at Nagyvárad (now Oradea, Romania) and Marosvásárhely (now Targu-Mures, Romania). Peter Méliusz Juhász escaped to Debrecen in 1561 with his printing press, where he published his own work; he debated almost every aspect of moral and public life. The result of the debates was the *Confessio Debrecina*, *Confessio Catholica*, the first standard of the Reformed faith in Hungarian. Regarding the doctrine of the Lord's Supper, the Confession agreed with the teaching of Calvin, but presented it independently. During the years 1561-1562, Synods were held at Nagyvárad, Eger and Debrecen. As a result of these meetings, the Confession of Faith was printed in 1562. Among the authors Peter Meliusz Juhász, Gergely (Gregory) Szegedi from Debrecen and György (George) Czeglédi, minister from Nagyvárad are mentioned. When Antal (Anthony) Verancsics, Roman Catholic Bishop of Eger and commander of the fortress accused the citizens of Eger with sedition, in their defense the citizens presented to King Ferdinand the Confession of Debrecen. – B: 1244, T: 7682.→**Meliusz Juhász, Péter; Debrecen; Szegedi, Gergely; Verancsics, Antal.**

**Debrecen, Reformed College** (Presbyterian or Calvinist) – Higher education began in Debrecen with the Reformed College, which was founded in 1538. Over centuries of its existence it was one of the key institutions of higher education in Hungary. In the beginning of the 20th century the College was transformed into a university. In 1908, the *Calvinist Academy of Humanities* was created and, in 1912, the *Hungarian Royal University* was founded. The university incorporated the Theology, Law, and Arts Faculties of the College and added a Medical School. Teaching began in 1914 in the old Calvinist College buildings.

The origin of the College dates back to János (John) Enyingi-Török, a landowner who inherited the town of Debrecen where he had carried the Reformation in 1552. The city

became owner of the convent of the Franciscan Order, and this was the beginning of the College's history. András (Andrew) Dézsi was its

first schoolmaster. The initial school-regulations were patterned on the Wittenberg School, Germany. From 1588 onward the College enjoyed a certain degree of autonomy. The building, standing since 1538, occasionally became the victim of fires. The College had great difficulties in supporting itself because of Austria's repressive politics and religious persecution, but always managed to renew itself and never ceased its work. Within its walls, the educational work was carried from the lowest to the highest level. Students were recruited from peasant stock, craftsmen, citizens, and members of the lower nobility who, on their return to their folks, after graduating or after studying often for many years abroad, made the best use of their knowledge. Many leading poets, writers and scientists were educated in the College in the past 450 years. This is how the Reformed College of Debrecen grew in prominence and significantly contributed to the history of Hungarian and universal culture. The teachers and students had already started to compile material as mementoes of Hungary's past and of their schools, at a time when this seemed to be an oddity. Their original collections are Archives, Birth Registry, Numismatic Collection, Zoological Museum, Mineral Museum, Botanical Collection, Archeological and Ethnographic Collection, Natural History and Laboratory. With the reorganization of their collections, the College Library and the Church History Museum were established. – B: 0942, T: 7675.→**Debrecen; Reformed Colleges; Reformed Church in Hungary, History of.**

**Debrecen, Synod of** – Synod held in Debrecen on 24 - 26 February 1567. It made key decisions, written in Latin, concerning three important questions. The Geneva Confession was reaffirmed and, in addition the Second Helvetic Confession was accepted. They considered the importance of contradictory opinions against the steadily growing Unitarian movement. Church discipline and conduct were established along specific guidelines. The decree consisted of three points and became the legal document of the Church. György (George) Gönczi prepared an extract in 1591, while Áron Kiss published it later in Hungarian. Its validity was recognized even at the turn of the 19th century. The Synod, prepared by Péter Meliusz Juhász, signifies the foundation of the Reformed Church in Hungary. – B: 0942, 1244, T: 7682.→**Reformed Church in Hungary; David, Ferenc; Unitarian Church in Hungary; Debrecen; Méliusz Juhász, Péter.**

**Debrecen, Tank Battle of** – This was the second greatest tank battle of World War II, fought in the autumn of 1944 on the Great Hungarian Plain, west of the historic town of Debrecen. After Romania asked for an armistice on 23 August 1944 and turned against its former ally, Germany, the southern wing of the German army collapsed within days

and the Soviet army appeared at the southern border of Hungary. The German and the 2nd Hungarian armies under the name *Heeresgruppe Süd*, under the leadership of General Friessner, improvised resistance at the River Maros line at Arad, Kolozsvár (now Cluj-Napoca, Romania), and Nagyvárad (now Oradea, Romania). Despite stiff resistance, the 2nd Ukrainian army soon occupied the Great Hungarian Plain (*Nagyalföld*). Based on these successes, Marshal Malinovsky wanted to launch a big offensive in order to end the war by the year's end. The general staff planned a huge encircling movement to trap the 8th German and the 2nd Hungarian Armies. By October 6, when the offensive started, the German reinforcements arrived and they were ready not only to withhold the onslaught but to launch a counter-offensive as well. Major General Grolman, who saw an opportunity, planned not only to disrupt Malinovsky's advance, but also to cut off and destroy a large part of the Russian spearhead. The Germans successfully encircled Group Pliyev and not only repulsed its attempts of break-through, but jeopardized every relieving effort. The tank-battle relentlessly raged for two weeks. On the German side, the 10th Hungarian Infantry Division fought heroically. In the raging battle, the civilian population suffered tremendously. In his memoirs, Friessner described the site of the recaptured town of Nyíregyháza. "Women of all ages were raped and sometimes murdered. Parents were nailed to doorposts, while their children were mutilated". The news of the Soviet conduct in this town spread quickly in both defending armies and stiffened the resolve of the Hungarian soldiers to resist the Russians, while the Germans now put up the most desperate resistance against the Red Army. The adversaries suffered heavy losses. Group Pliyev alone had lost about 25,000 men, killed, wounded or taken prisoner; as well as 358 tanks, 310 artillery pieces, 600 anti-tank guns, 247 mortars and 1,954 other vehicles. After the battle, the Germans had only 8,450 men fit for combat, and were left with 67 tanks, 58 assault guns, 62 heavy anti-tank guns, and 176 artillery pieces. The general loss of this war theater was 650 destroyed Soviet and 250 German tanks and armored vehicles. It caused a tremendous loss in human lives as well, especially on the part of the Soviets. However, the battle around Debrecen was important as it prevented the encirclement of the Hungarian and German armed forces in Transylvania (*Erdély*, now in Romania) and also prevented the quick occupation of Budapest, by offering enough time to build up its defense system; it prolonged the war by six months at the least. – B: 1246, T: 7103.→**Debrecen.**

**Debreceni Ember, Pál** →**Ember, Pál.**

**Debreceni, S. János** (John) (? - ?, 1614) – Poet. He was a representative of popular political poetry. His strongly anti-Habsburg and anti-Catholic songs salute István (Stephen) Bocskai and his *Hajdús* (Hayduks) and immortalize the attempt on Prince Gábor (Gabriel) Báthori's life. – B: 1153, 1257, T: 7659.→**Bocskai, Prince István; Hajdú.**

**Debreczeni, József (1)** (Joseph) (Brunner) (Budapest, 13 October 1905 - Belgrade, 26 April 1978) – Writer, poet, journalist, translator of literary works. After completing his university studies he became a journalist. From 1925 to 1932 he was Editor for the paper *Diary (Napló)* of Szabadka (now Subotica, Serbia); between 1933 and 1938, Editor for the magazine *Holiday (Ünnep)* of Budapest. During World War II, he was taken to Auschwitz. After 1945, he made Belgrade his home, where he wrote articles in the Yugoslavian-Hungarian papers and journals until his death. Some of his plays appeared

on stage in Budapest as well as in Belgrade. Several of his books were published in a number of languages and he also did translations of literary works written in those languages. In 1928, he co-authored with Kornél Szenteleky and published an anthology of modern Serbian poets in Hungarian. He featured his works regularly on Radio Újvidék (now Novi Sad, Serbia). His works include *Miss Universum*, satirical novel (1925); *On a Sparkling Landscape (Tündöklő tájon)*, poems (1949), *Midnight in Belgrád (Belgrádi éjfé)*, selected poems (1958), and *Let Song be the Signal (Dal legyen a jel)*, selected poems (1966). – B: 0883, 0878, T: 7456.→**Szenteleky, Kornél.**

**Debreczeni, József (2)** (Joseph) (Dunaszentgyörgy, 13 June 1955 - ) – Politician, writer, journalist, political analyst. His higher studies were at the University of Debrecen, where he studied Hungarian Literature and History (1974-1979). In 1979-1981 he was a newsman in Debrecen. From 1981 to 1986, he taught at the high school of Kiskunmajsa, and from 1986 at the high school of Kecskemét. Since 1994, he has been an adjunct professor at the University of Miskolc. In 1987, he was one of the founding members of the Hungarian Democratic Forum (*Magyar Demokrataikus Fórum – MDF*); a founding member of the MDF chapter in Kecskemét (1988); in 1989-1990, he was a presidium member of the MDF. He was a Member of Parliament from 1989-1994, and a member of a number of parliamentary committees. From 1994 to 1996, he was advisor to Viktor Orbán, President of FIDESZ. In 2004, he turned against the policy of Viktor Orbán and became a supporter of the regime of Ferenc (Francis) Gyurcsány, and wrote many analytical and critical articles on FIDESZ and Orbán. His works include a number of articles mainly in leftist newspapers and books: *Which Game Should We Play? (Melyik játékot játszunk?)* (1993); *Restauráció (Restoration)* (1996), and his controversial books on three prime ministers: *The Prime Minister (A miniszterelnök)* about the life and work of József (Joseph) Antall (2003); Victor Orban (Orbán Viktor), a biography of the Prime Minister (1988-2002) (2003); *The New Prime Minister (Az új miniszterelnök)*, a biography of Ferenc Gyurcsány (2006), and *Game of Chance (Hazardjáték)*, on the life of Ferenc Gyurcsány. (2007) – B: 0874, 1031, T: 7103.→**Antall, József; Orbán, Viktor; Gyurcsány, Ferenc.**

**Debreczeni, Márton** (Martin) (Magyargyerőmonostor, now Manastireni, Romania, 25 January 1802 - Kolozsvár, now Cluj-Napoca, Romania, 18 February 1851) – Mining engineer, poet. He was a son of a village master-potter. He became a student of the Reformed College of Kolozsvár, where he graduated in Law. Thereafter, he studied Theology, but after a while he discontinued it, and enrolled in the Mining Academy of Selmecbánya (now Banská Stiavnica, Slovakia). After completing his studies, he ended up in Radna, where he wrote his epic poem of a heroic historical episode, entitled the *Battle of Kiow (Kióvi csata)*. He was a mining consultant at Nagyszeben (now Sibiu, Romania). He modernized metallurgy in general, and iron-metallurgy in Transylvania (*Erdély*, now in Romania) at Zalatna (now Zlatna, Romania), Vajdahunyad (now Huneodara, Romania) and other places. Among his numerous inventions, the spiral bellows, which improved the air supply of foundries, was named after him. It was introduced in many places outside Hungary. During the first half of the 19th century, he was the most recognized mining and metallurgical engineer in many places abroad. In 1848, he was a member of the committee negotiating the reunion of Transylvania with Hungary; then became a consultant to the Hungarian Ministry of Finance. After the downfall of the War of Independence (1848-1849), the Vienna Court brought action

against him and he was dismissed from his position. As a consequence of an illness acquired during his metallurgical experiments, he was unable to work and died in dire poverty. – B: 0883, 1257, T: 7659.

**“Decade of Mourning”** (*Gyászévtized*) – In the history of the Hungarian Protestant Church, this was the most severe period of persecution. It occurred both in Reformed and Evangelical-Lutheran Churches between 1671 and 1681. Among its preliminaries was the humiliating Peace Treaty of Vasvár (14 August 1664) between the Viennese court and the Turks; after the victory at Szentgotthárd, the Hungarian public expected a more favorable treaty. The widespread dissatisfaction led to Count Wesselényi’s plot against the House of Habsburgs; but it was betrayed and the mostly Roman Catholic estate participants were severely punished. Nonetheless, for the raging Counter-Reformation, the plot served as pretext for a showdown with the Protestant Churches in Hungary. In 1673, an extraordinary court was set up in Pozsony (now Bratislava, Slovakia) and pastors from the entire realm, who resisted re-catholicization, were summoned to the court overseen by Archbishop Lipót (Leopold) Kollonich. They were imprisoned, and 30 of them were sold as galley slaves in Naples in March 1675. Following the protest of the whole Protestant Europe, finally the Dutch Admiral Michiel De Ruyter freed the remaining 26 on 11 February 1676. The Diet in 1681 ended the harsh treatments of Protestants. – B: 1078, 1244, T: 7103. → **Kollonich, Lipót; Freedom Fight of Thököly; Galley-slavery; Wesselényi Conspiracy; Reformed Church in Hungary; Evangelical-Lutheran Church in Hungary, Roman Catholic Church in Hungary.**

**De Caux Mimi** (Mimi, Mrs. László) (Kolozsvár, now Cluj-Napoca, Romania, 1825 - Újpest (suburb, District IV of Budapest), 8 December 1906) – Actress, singer. She is a descendant of a French migrant family; her father was an official of the Transylvanian *Gubernium* (District Administrative Authority; its head being the Governor in Transylvania). She started her career in 1838 with the David Kilényi Co. in her native town. Until 1843, as a strolling player, she was in the same company with the great poet Sándor (Alexander) Petőfi at Kecskemét. Between 1843 and 1847 she was a member of the National Theater (*Nemzeti Színház*), Pest. From 1845 to 1847 she was the wife of the actor József (Joseph) László. Then she went on a study trip to Italy. She did not return to Hungary; instead she continued her career in the Opera Houses of London, Paris, Hamburg and Vienna. She played ingénue roles and sang lyric soprano parts. She also frequently and successfully appeared in folk-plays. Abroad, she sang both lyric and dramatic soprano roles. Her roles included Cordelia in Shakespeare’s *King Lear*; Marcsa in J. B. Hirschfeld’s *Fairy Castle in Hungary* (*Tündérlak Magyarhonban*), and Amina in Bellini’s *La sonnambula*; title role in Donizetti’s *Lucrezia Borgia*. – B: 1445, 1160, T: 7456. → **László, József; Petőfi, Sándor.**

**Déchy, Mór** (Maurice) (Budapest, 4 November 1851 - Budapest, 8 February 1917) – Alpinist, world-traveler, researcher of the Caucasus Mountains, geography writer. He toured the mountains of Europe and North Africa, led an expedition to the Himalayas; but his main merit is the exploration and description of the Caucasus Mountains. He published detailed works on the glacier life, hydrography and geomorphology, as well as the first detailed and reliable map of this enormous mountain system. Between 1884 and 1902, he made seven study-trips there. He crossed the main ridge several times and scaled all the high peaks. Déchy participated in the founding of the Hungarian Carpathian

Society. He was the first to climb a main peak of the Caucasus Mountains, the *Monte Rosa* at 4,638 meters, from the southern side in 1871, and also the highest peak of the Caucasus Mountain Range: the *Elbrus* of 5642 m in 1884. His alpinist-style photographs represent a high artistic and technical standard, even today, and are still regarded internationally as pioneering work. – B: 1068, 1078, 0883, 1031, T: 7456.→**Tatra Mountain; Papp, Károly.**

**Decorated Easter Eggs** – Throughout the ages special meanings were attributed to the egg. It represented mystery, magic, medicine, food and omen. In the ancient world it was honored during many Rite-of-Spring festivals by many peoples, such as the Romans, Gauls, Chinese, Egyptians and Persians. From ancient times, eggs were dyed, exchanged, and shown reverence. In Pagan times, the egg was believed to have special powers and it symbolized the rebirth of the earth and nature; when winter was over, spring miraculously burst forth with life. With the advent of Christianity, the symbolism of the egg changed and it became the symbol of man's spiritual rebirth. Christians likened it to the tomb from where Christ rose. It is the universal symbol of Easter celebrations throughout the world and has been dyed, painted, adorned and embellished in the celebration of its special symbolism. Egg painters decorate it with superb artistry. The most famous decorated Easter eggs were those made by the well-known goldsmith Peter Carl Fabergé. In 1883, the Russian Czar commissioned Fabergé to make a special Easter gift for his wife. The Hungarian custom of egg decoration reaches well beyond Christianity. After their conversion, Hungarians never attributed Christian meanings to this custom. The ancient signs of their former life and beliefs, such as the pastoralist and horsemen's lifestyle, nature, immortality, fertility, sorcery, preventing obstacles, portrayal of the cosmic world are all there in the old drawings on eggs. In modern times, the most often used color for the Easter egg is red, hence the other Hungarian name "red egg" (*piros tojás*). Etching with natural dyes is the ancient method of decoration on hardboiled eggs. The traditional "inscribed eggs" are the most widely produced. The writing is carried out with warm wax on the egg and then it is dyed. Sometimes small metallic objects – usually tiny horseshoes – are nailed onto the egg, which is a Hungarian specialty – B: 1245, T: 7103.

**Decorative Art** – Any form of art that produces or organizes decorative elements. Hungarian folk art mostly follows the ancient rules of the symmetrical art form even today. The inhabitants of Eastern Asia never followed the symmetric form. People acquired a taste for non-symmetric arrangements only in the 18th century. The rule of that arrangement could either be very strict or liberal. For instance, in Hungarian decorative folk art, not all the decorative elements of the vertically or the horizontally dissected space contain symmetric elements; but the totality of the arrangements are in balance. The crucial law for the positioning of the elements requires that the surface should be divided proportionately and the balance of the parts – by using similar and contrasting elements – must keep all parts in proper connection. – B: 0942, T: 3233.

**Decsi, János** (John) (Baranyai Decsi Csimor, János) (Decs, ca 1560 - Székelyvásárhely, renamed Marosvásárhely, now Tirgu-Mures, Transylvania in Romania, 15 May 1601) – Pen name: *Joannes C. Decius Baronius/Barovius*. He was a humanist teacher, historiographer, jurist, translator and proverb-collector. He studied at Tolna, at the Reformed College of Debrecen, and at the Reformed College of Kolozsvár (now Cluj-

Napoca, Romania), as well as at the University of Wittenberg; and finally at the Academy of Strasbourg, where he earned a doctoral degree in 1591. His dissertation, *Philosophiae*, was printed both in Strasbourg and Wittenberg. Its English translation was published in England and it is in the British Library, London. The description of his journey from Bonchida–Warsaw–Wittenberg was published by the *Hodoeporicon Wittenberg* in 1587. His jurisprudential work, under the name of *Syntagma institutionum juris Imprealis ac Ungarici*, was published in Kolozsvár (1593). He was the first to translate Latin text into Hungarian in 1593. He edited the first collection of circa 5,000 quotes and proverbs in Hungarian entitled: *Adagiorum graeco-latino-ungharicorum chiliades quinque*, in Bártfa (now Bardejov, Slovakia), 1598. His histographic work about the years of 1592-1598 remained in manuscript until 1886, and the Hungarian translation was published in 1977. He wrote about the Szeklers' runic writing (*rovásírás*). Some of his letters to Professor Grynaeus of Bern are extant. He was the principal of the Székelyvásárhely's school, then minister from 1595. Lack of recognition prompted him to leave Transylvania with his two disciples. – B: 0879, 0877, 1257, T: 7103. → **Hungarian Runic Script.**

**Defense Bastion of Europe – Hungary** – Robert Johnson, English scholar said: “Hungary did more to avert the Turkish danger than all other Christian states together.” J. Dommerge, a French scientist, wrote: “Europe was saved by the Hungarian, János (John) Hunyadi, while Hungarians bled for humanity in the Turkish war”. The French historian Michelet wrote: “The Hungarian nation is a heroic, spiritual and worthy of nobility. When will we pay our debts to this blessed nation that saved the cultured humanity by defending Europe with its own force against the Mongols and Turks?” The American political writer, Bachwell, stated in 1841 “The role of Hungary was, and still is, to be the protecting bastion of Europe, hence Hungarian flags should fly from the shoreline of the Adriatic to the Black Sea!” On 2 April 1910 Theodore Roosevelt, President of the USA, said in the Hungarian Parliament: “When America was still in Europe’s womb Hungary already hampered the spread of barbarism, defended the civilization of Europe and, for this, the civilized world is indebted to Hungary”. For the suffering and tremendous sacrifice in human lives, signified by the kind words of the President, the West never expressed any gratitude. Hungary could have prospered easily, if instead of resisting those plundering hordes, she had joined them as many other nations did. Instead, she became weakened in the defense of the Christian civilization of the West and became the victim of those for whom she shed her blood.

In 1241, during the Mongol invasion, King Béla IV (1235-1270) of Hungary asked the Holy See to proclaim a crusade to prevent the Mongols from crossing the River Danube. Instead of organizing a crusade, pretending to help, Frederick II, Prince of Austria and Steyr, invited the King to Hainburg, arrested him and held him for ransom. He took three of his counties, Locsmánd, Moson and Sopron and even occupied the city of Győr.

After Hungary lost the Battle of Mohács in 1526, the Turks marched against Vienna in 1532, with an overwhelming force, intending to strike a mortal blow to the heart of the Habsburg Empire. The design of the Turks failed due to the heroic resistance of Miklós (Nicholas) Jurisics, at the fortress of Kőszeg on the western border of Hungary-Austria. During the siege, the Austrian Imperial Army was camping nearby at Wiener-Neustadt, Austria, and it made no attempt to break the Turkish encircling grip on the Hungarian fort. As soon as the danger was over, they dispersed. From 1547 on, Emperor Ferdinand bought his peace from the Turks with a yearly ransom of 30 thousand gold pieces, the

greater part of which was levied on his Hungarian subjects. Ferdinand abandoned Central Hungary at the same time the country became a ruined land. In 1566, the Turks renewed their attack against Vienna but Count Miklós Zrinyi stopped their advance at the fort of Szigetvár with his valiant defenders: thus the Ottoman attack was crushed again on Hungarian soil. In spite of this event, the Turks later gained some new Hungarian territory. In 1664, the Turks besieged the fort of New Zrinyi Fort (*Új-Zrinyivár*), and Count Montecuccoli, the Commander of the Imperial Army, moved near the Turkish forces but avoided any direct engagement. They let the fort fall into Turkish hands, despite the protest of Count Zrinyi, and the Turks blew up all the fortifications. Shortly after, the Imperial Army defeated the Turks at Szentgotthárd in a very decisive manner; but the Peace Treaty, called the Vasvár Peace, was so humiliating and shameful to Hungary that it roused the nation's indignation and protest. A boar, in a hunting accident, under very suspicious circumstances, soon killed Count Miklós Zrinyi. The death of Zrinyi was followed by the execution and estate confiscation of the well-known discontented counts: Ferenc (Francis) Frangepán, Ferenc Nádasdy and Péter Zrinyi. In 1583, the surprise attack of the Turks launched against Vienna was unsuccessful without Count Imre (Emeric) Thököly's badly needed forces. The Turks arrested and kept him in captivity for years.

In 1944, when the situation in World War II became desperate, the Hungarian army, in cooperation with the civil defense, made many valiant efforts to block the advance of the Soviet forces toward Western Europe, first at the River Tisza, then at the River Danube, later at the fort of Buda and at Lake Balaton. These hindering actions could not save Hungary but gave enough time for the Allied Forces to reach deep into Germany and the foothills of the Czech mountain ranges, to keep the Soviets out of most of Western Europe.

In 1956, during the Hungarian Revolution and Freedom Fight, when Hungarians fought with heroism to free the country from Communist dictatorship and Soviet oppression, the West failed again to lend any relevant support. Rather it gave the Soviets another opportunity to suppress with military force Hungary's 12 day-old hard-earned freedom. For centuries, Europe was free to prosper financially as well as culturally, partly because of the defensive efforts of the Hungarians. The Hungarian nation was decimated repeatedly under the blows of the Mongols, Tartars, Turks, Austrians and Soviets.

Unprecedented were the sacrifices Hungarians paid in suffering and blood to maintain Europe's freedom and defense during the past thousand years. They fought against the sickle-moon Standards of the Turks as well as against the Red Star of the Soviets when Europe's freedom was attacked. For example, at the end of the 15th century, Hungary's population was 4 million, the same as that of England's. Today, altogether 16.5 million Hungarians live on the globe. Compare this with today's 60 million Britons to understand the enormity of Hungarian losses of life in the defense of the West. Instead of expressing some form of gratitude, the Versailles-Trianon Peace Treaty took away two-thirds of its historical territory and its 3.5 million ethnic Hungarian population in 1920. The Paris Peace Treaty backed this up in 1947.

In 1989, it was Hungary who broke down the Iron Curtain by allowing East Germans free access to West Germany through Hungarian territory via Austria. This event led to the tearing down of the Berlin Wall and the unification of the two Germans. It was Rev. László (Ladislav) Tőkés, a minister of the Hungarian Reformed Church in Temesvár

(now Timișoara, Romania), who triggered the Revolution, ousting Romania's tyrannical communist regime. The tiny and dismembered Hungary was able to serve as an inspiration for other Communist-dominated countries. The fact is that, despite enormous national tragedies of the past, Hungary still occupies a central position in the Carpathian Basin with its 14.5 million or so Hungarians living within Hungary and as minorities in neighboring states. They still represent an absolute majority in the Carpathian Basin. – B: 1274, 1075, 1020, T: 3233, 3240, 7103.→**Béla IV (Bela), King; Zrinyi, Count Miklós; Thököly, Count Imre; Trianon Peace Treaty; Paris Peace Treaty; Freedom Fight of 1956; Tókécs, László; Iron Curtain.**

**De Gerando, Ágost** (Auguste Degrand, Gerando) (Lyon, France, 4 April 1819 - Dresden, Germany, 8 December 1849) – French writer. He became Hungarian in his heart when he made the acquaintance of Emma Teleki. They were married in Paris in 1840 and decided to settle in Hungary. Hearing about the 1848 French Revolution, he went back to France but soon after returned to Hungary. He participated in the Hungarian War of Independence (1848-1849), and saved the Hungarian flag in the battle of Győr. He emigrated after the surrender at Világos. He intended to establish permanent residence in Paris but died on the way. In his three books, written in French, he reviewed the origin of the Hungarians and Transylvania (*Erdély*, now in Romania) and also wrote about Hungarian intellectual life following the French Revolution. – B: 0883, 1257, T: 3240.→**Világos, Surrender at.**

**Dégh, Linda** (Lyndall) (Budapest, 18 March 1920 - ) – Folklorist. She obtained a PhD in philosophy from the University of Budapest in 1943; has been research worker of the Ervin Szabó Library since 1947, and that of the Ethnological Institute from 1949, assistant professor at the University of Budapest until 1964. She was invited by Indiana University, Bloomington, USA in 1965, where she was professor of ethnography until her retirement. Her research fields are: folk narrative forms and their functions, acculturation, inter-ethnic connections, regional and ethnic groups, modern and urban regional folklore in Europe and in the USA, culture of Hungarian folk groups in the USA; member of numerous Folklore Societies; editor of the journal *Indiana Folklore*; and keeper and editor of several folk-tale collections. A number of studies by her were published in Hungarian and foreign journals. Her most important works are: *Stories of Péter Pandur (Pandur Péter meséi)*(I-II, 1941, 1942); *Research on the Hungarian Folk Theater (A magyar népi színháztudomány kutatása)*(1947); *Folk-poetry of the Freedom War [1848-1849] (A szabadságharc népköltészete)* (1952); *Folk-tales of Kakasdi népmesék* (I-II, 1955, 1960); *Märchen, Erzähler und Erzählgemeinschaft. Dargestellt an der ungarischen Volksüberlieferung* (1962), and *Folktales of Hungary* (1965, 1969); *Folktales and Society* (1969). The University of Debrecen conferred an honorary doctorate on him in 2002. His distinctions include Pitre-Preis in Gold (1995), Ortutay-Medallion of the Hungarian Ethnographic Society (1995) and the Lifetime Scholarly Achievement Award of the American Folklore Society (2004). – B: 1134, 1031, T: 7456.→**Szabó, Ervin.**

**Degré, Alajos** (Aloysius) (Lippa, now Lipova, Romania, 6 January 1819 - Budapest, 1 November 1896) – Writer, publicist. His father came from France. His higher studies were at Nagyvárad (now Oradea, Romania) where he read Law (1838-1840). In 1842, he moved to Pest and worked as a law clerk in a law office. He was admitted to the bar in 1843. Thereafter, he worked in Vienna then, settled in Pest. In 1846 he became a member

of the “Society of Ten” around the great poet Sándor (Alexander) Petőfi. In 1848, he was Secretary at the Ministry of Home Affairs and in the same year he joined the army and was promoted to Hussar captain. After the collapse of the War of Independence in 1849, he went into hiding for a while. After a short detention, when amnesty was proclaimed, he returned to Pest. In 1856, he visited the Hungarian émigrés abroad. He was a member of the Kisfaludy Society (1867) and Member of Parliament (1870-1875, 1878-1880). He was Editor for the newspaper *All the World* (Ország Világ) (1883-1885). The French romantic writers influenced his work. His major works include *Industry Knights* (*Iparlovagok*) comedy (1852), *Salvator Rosa*, novel (1870), *My Memories, vols. i, ii* (*Visszaemlékezéseim I,II*) (1883-1884). – B: 0883, 1031, 1257, T: 7103.→**Petőfi Sándor; Freedom Fight of 1848-1849.**

**De Laszlo, Sir Philip** (Fülöp Elek László) (Budapest, 1869 - London, UK, 1937) – Portrait painter. He came from humble ancestry. After his studies under Bertalan (Bartholomew) Székely and Károly (Charles) Lotz in Budapest he went to Munich. He lived in Budapest and Vienna until 1907, later on in London. He became a British citizen in 1914. He was a renowned painter of the aristocracy and royalty in Europe. His art was welcomed in Britain and over the years he was to paint a significant number of portraits of the British Royal Family and aristocracy. In 1917, during World War I, he was imprisoned. In 1919, his name was cleared and he resumed his role as Europe's leading portrait painter. His works include portraits of Pope Leo XII (1900), Emperor and Empress of Germany (1908), President Theodore Roosevelt (1910), Admiral Togo (1911), Count Albert Apponyi (1931). – B: 0972, 0943, 1497, T: 7103.→**Apponyi, Count Albert; Székely, Bertalan; Lotz, Károly.**

**Delly, Rózsi** (Rose) (Budapest 16 December 1912 - Budapest, 4 March 2000) – Opera singer (mezzo-soprano). She studied voice at the Ferenc (Franz) Liszt Academy of Music, Budapest, under the direction of Ferenc Székelyhidi (1936-1940). In 1947, she was contracted by the State Opera House, Budapest, where she made her debut in the role of Santuzza in Mascagni's *Cavalleria Rusticana* (*Parasztbecsület*). Soon she became the leading dramatic soprano of the Opera House; for decades she was the only Wagner heroine. Her stage performance is characterized by high dramatic tension. Her wide voice register and balanced singing technique predestined her for dramatic soprano and mezzo roles. She was an internationally renowned Wagner singer and was invited to the Bayreuth Festivals. She appeared on the great opera stages of Europe, including Moscow, Paris, Brussels, London and the USA. Her roles included Puccini's *Turandot*; Goldmark's *The Queen of Sheba*; Eboli in Verdi's *Don Carlos*; Amneris in *Aida*; Herodias in R. Strauss's *Salome*; Brünnhilde in Wagner's *Die Valküre*; Ortrude in *Lohengrin*; Isolde in *Tristan und Isolde*; Gertrudis in Erkel's *Bánk bán*, and Judit in Bartók's *Bluebeard's Castle* (*A kékszakállú herceg vára*). She was recipient of the Merited Artist title (1959), the Outstanding Artist title (1973), the Officer Cross of the Order of Merit of the Republic of Hungary (1993), and she was Life Member of the Opera House, Budapest. – B: 1445, 1766, 1031, T: 7103.

**Délvidék, Southland**→**Southern Hungary.**

**Dembinszky, Count Henrik** (Henryk hrabia Dembiński) (Groi, Poland, 16 January 1791 - Paris 13 June 1864) – Polish freedom fighter, Hungarian Lieutenant-General. He studied military engineering in Vienna. From 1806 he was a captain in the Army of the

Warsaw Principality. In 1812 he participated in Napoleon's Russian campaign. He was wounded at the battle of Smolensk and was made a French Knight of the Légion d'Honneur. In the Battle of Leipzig, he fought against Napoleon. He distinguished himself in the Battle of Ostrolenka (1813), the Polish War of Liberation against the Czar, and became a hero of the Polish nation. For a short while, he was the military Governor of Warsaw and Commander-in-Chief of the Polish Army. After the Polish defeat, he emigrated to France and settled in Paris. On the invitation of Count László (Ladislas) Teleki, he went to Hungary, where Lajos (Louis) Kossuth, Regent of Hungary, entrusted him with the supreme command of the Hungarian Army in 1849. After many failures, resulting in the loss of the battle at Kápolna, General Artur Görgey demanded his resignation. He was demoted to command the Northeastern Army Corps. Later the defense of the southern sector was entrusted to him. In both operations he was unsuccessful. Before the armistice, he escaped to Turkey with some members of the Government and, from there, he returned to Paris. He published his memoirs about the Hungarian War of Independence. A Street bears his name in Budapest. – B: 0883, 1031, T: 3233.→**Kossuth, Lajos; Teleki, Count László; Görgey, Artur; Freedom Fight of 1848-1849; Arad, Martyrs of.**

**Deme, László** (Ladislas) (pen-name Péter Kurdi) (Pécel, 14 November 1921 - Pécel, 6 June 2011) – Linguist. His higher studies were at the University of Budapest and its Eötvös College (1939-1943). From 1942 to 1944, he worked at the University first as lecturer; then an assistant professor (1944-1947) and an adjunct professor (1947-1949). From 1949 to 1970, he worked in different positions at the Language Science Institute of the Hungarian Academy of Sciences. Between 1964 and 1969, he was a guest professor at the Komenský University of Bratislava (formerly Pozsony, now in Slovakia). Besides being a member of learned societies and scientific institutions, he was a Member of Parliament from 1994 to 1997. His fields of research were: language theory, phonetics and phonology, dialectology, grammatics, language-culture, socio-linguistics, text and style research. He was Founding Co-President of the Languagefoster Society (*Anyanyelvápolók Szövetségének alapító társelnöke*). He was one of the best linguists in Hungary. He was co-author of the *Atlas of Hungarian Dialects, vols. i-vi (A magyar nyelvjárások atlasza I-VI)* (1968-1977), *System of the Present-day Hungarian Language (A mai magyar nyelv rendszere)* (1961) and that of orthographical handbooks. His other works include *Logic of Orthographical Systems (Helyesírási rendszerek logikája)* (1965), *Foundations of General Linguistics (Az általános nyelvészet alapjai)* (1969). He was recipient of a number of prizes and awards, among them the Szinnyei Memorial Medal (1943), the Academy Prize (1953, 1955, 1964), the Révai Memorial Medal (1969), the Bölöni Award (1988), and the József Implom Prize (2006). – B: 0874, 0878, 1257, 1031, T: 7103.→**Lőrincze, Lajos.**

**Demény, György** (George) (Douai, France, 1850 - Paris, 17 December 1917) – Physiologist, motion picture pioneer. His ancestor was a Hungarian officer who moved to France after the 1711 defeat of the War of Independence of Prince Ferenc (Francis) Rákóczi II. Demény invented an apparatus called “phonoscope” in 1892 and presented it at the International Photographic Exhibition in Paris. By means of this apparatus he took pictures of a man speaking, showing his facial and lip movements; and afterwards he actually projected it onto a screen. In the same year, he gave notice of another invention. He stated that the pictures taken could be connected with a phonograph. In 1895, the

Gaumont Works produced, on the basis of this patent the so-called “bioscope”, followed by a projection apparatus called “biograph”, and what was called “chronophotograph”, which proved eminently successful all over the world. Later on Leon Gaumont further improved this and, in 1902, he produced a new version of it, equipped with a sound. This was the first real sound camera. In his birthplace in northern France, the sports ground was subsequently named after him (Demény Stadium). In 1945, a memorial plaque for Georges Demény was placed on the wall of the building at Boulevard des Capucines 15, where the first motion picture screening took place. – B: 1226, 1105, T: 7456.→**Chronophotograph.**

**Demény, Ottó** (Budapest, 5 April 1928 - Budapest, 12 December 1975) – Poet. His secondary education was in Budapest and Orosháza – but he did not complete it. He worked as an unskilled laborer and was conscripted into the army. From 1949 to 1953, he worked as a storeman at the National Library Center; thereafter he was a machine worker at the Lampart Factory. From 1954, he was employed as a bookstore manager. His first volume of poems appeared in 1958, and was welcomed as an intellectual worker-poet. His works include *Flower Street (Virágutca)* poems (1958); *Cloud's Shadow (Felhőárnyék)*, poems (1973) and *House with Tower (Tornyosház)*, fables (1976). – B: 0883, 0878, 1257, T: 7103.

**Demény, Pál** (Paul) (Budapest, 29 August 1901 - Budapest, 14 January 1991) – Politician. He completed his studies at the Academy of Commerce, Budapest. He joined the Communist Party in 1919, and became leader of the Communist Youth Movement. Dissatisfied with the policy of Communist leaders, he organized a new fraction in 1924. He was arrested several times between 1924 and 1942. In 1944, he joined the Communist Resistance Movement with László (Ladislav) Rajk. He was arrested by the Communist political police on 13 February 1945, and was sentenced to imprisonment. He was freed on 15 October 1956, and was rehabilitated in 1989. His works include *My Captivities, Recollection vols. i-ii (Rabságaim, Visszaemlékezés I-II)* (1989), *My Cellmate, Spinoza (Zárkatársam, Spinoza)* (1989). A memorial medal bears his name.– B: 0879, 1112, T: 7103.→**Rajk, László; State Security Police.**

**Demjén, Ferenc** (Francis) (nickname: Rózszi) (Miskolc-Diósgyőr, 21 December 1946 - ) – Musician (bass-guitar), singer, composer. His father was an engineer at the local Iron Works, but was dismissed for political reasons. In 1951, the family moved to Budapest. At the beginning, he played bass-guitar in various ensembles, including the *Számum (Samum)* (1965-1968), the *Dogs*, the *Liversing* (1968-1969), the *Tűzkerék (Fire-wheel)* (1969-1970) and the *Kulcsár Ensemble* (1970-1971). He was a member of the *Bergendy Ensemble* (1971-1977), and a *V-Motor Truck* leader (1978-1989). In the meantime, he wrote songs for singers, including Klári Katona, Kati Kovács and Zoran, and had his debut as singer in a film entitled: *Love till the First Blood (Szerelem az első vérig)* (1986), followed by many more. He was in the USA in 1988. He has been a soloist since 1989 and has produced recordings almost yearly. In 1991, he performed once for an audience of 12 thousand and repeated it eight times. His lyrics appeared in feature films such as the *Home Conquest (Honfoglalás)* (1991) and the *Sacra Corona* (2001). His lyrics appear in some 150 albums and he tops the list of the most frequently played lyricists. He is a recipient of a number of prizes and awards, including the Jenő Huszka Prize (1994), the Golden Giraffe Prize (1997), the Officer's Cross of Merit of the

Republic of Hungary (2010), and the Kossuth Prize (2012). – B: 0874, 1031, 1650, T: 7103. → **Bergendy, István; Kovács, Kati; Katona, Klári; Sztevanovity, Zorán.**

**Demmer, George** (György) (Újvidék, now Novi-Sad, Serbia, 26 November 1934 - ) – Educator, founder of the *Hungarica Canadiana* heritage collection. He obtained a Degree in Music Theory at the University of Belgrade, Yugoslavia; he taught at the Teachers' College, Sremski Karlovci (1959-1963), and the State Music School in Újvidék (1964-1966). He emigrated to Canada with his family in 1967, and settled in Ottawa, where he was teaching until his retirement in 1992. He obtained an MA from Carleton University, at the Institute of Canadian Studies in Ottawa. He published music-related themes in periodicals and was one of the contributors to the *Encyclopaedia Hungarica* on Hungarian-Canadian related subjects. In 1981, he began collecting and researching the field of Hungarian folk music in Canada and later extended it to include all types of Hungarian-Canadian archival and library material. The *Hungarica Canadiana* holds many important documents: manuscripts and some 4,000 recorded Hungarian folk music pieces, tapes of oral history, photographs, films and videos dating back to the 1920's. These are available to the students of Canadian Hungarology. His collection of Hungarian-Canadian serials, close to 250 titles of original periodicals, newspapers and other publications, is the largest of its kind. The *Hungarica Canadiana* collection is still growing and has achieved noted historical significance. – B: 0917, T: 7103.

**Demse, Mrs. Dávid** (née Luca Antal) (Moldavia, 1897 - Sásd, 7 January 1975) – Folk singer, preserved and popularized Hungarian folk songs of Moldavia. She appeared in films and in TV programs. Ferenc (Francis) Várnai, a collector of folk songs from Pécs, recorded her songs. She received the title of Master of Folk Art. – B: 0883, 1402, T: 3240.

**Demszky, Gábor** (Gabriel) (Budapest, 4 August 1952 - ) – Lawyer, sociologist, politician. He studied Law from 1970 to 1976, and Sociology from 1978 to 1981 at the University of Budapest. First, he was attracted by Maoism, but soon left it for “liberal ideology” and became a critic of the Kádár Government. He joined the illegal underground “democratic” opposition to the Kádár regime and he was involved in printing and publishing illegal books and a newspaper, *Szamizdats*. In 1981, he founded the *AB-Independent Publisher (AB Független Kiadó)*. In 1984, he was sentenced to a 6-month suspended prison term. He was a founding member of the *Free Democratic Party (Szabad Demokraták Szövetsége)*, then from 1994 to 2000, was its Manager, and in 2001-2002, its President. In 1994, he became a Member of Parliament and also President of the *For Budapest Foundation's Advisory Board (Budapestért Alapítvány Kuratorium)*. Since 1992, he has been Deputy President of one of the committees of the European Council. Since 1990, he has been Lord Mayor of Budapest, reelected again in 1994, 1998, 2002 and 2006, amidst opposition and criticism. His works include *Underground Lines (Földalatti vonalak)*, co-author (2000); *Recapturing Freedom (A szabadság visszahódítása)* (2001). – B: 0874, 1032; T: 7617, 7456.

**Dénes, György** (George) (Dániel Dusik Jr.) (Pelsőc, now Plešivec, Slovakia, 24 May 1923 - Pelsőc, 14 September 2007) – Poet, writer. He completed his high-school education at Rozsnyó (now Rožňava, Slovakia) in 1943. He was an office clerk between 1943 and 1944 and an occasional laborer at Pelsőc between 1945 and 1948. Between 1948 and 1949, he was a factory worker, laboratory attendant and payroll clerk in the

cellulose works at Őzörény (now Gemerská Horka, Slovakia). Between 1950 and 1951, he worked for the Center of the Czechoslovak-Hungarian Workers' Social and Cultural Alliance (*Csehszlovákiai Magyar Dolgozók Kulturális Szövetsége – CSEMADOK*) in Pozsony (now Bratislava, Slovakia). From 1951 until his retirement in 1985, he was Editor of the Hungarian section of the Czechoslovak Radio in Pozsony. He was a member of the CSEMADOK, as well as the Slovakian Writers' Federation. He wrote poems while he was a student. He was the first Hungarian poet whose work appeared in print after 1945. His poems for children were popular. He published more than 13 volumes of poetry, including *At the Foot of the Blue Mountains (Kék hegyek alatt)*, poems (1955); *The Power of Years (Évek hatalma)* poems (1966); *Above the Abyss (Mélység fölött)* poems (1972); *From Csallóköz to Bodrogek (A Csallóköztől a Bodrogekőzig)* anthology of poems (1977); *Fire Palace (Tűzpalota)* (1990); *Zebra Bird (Zebramadár)* juvenile poems (1991), and *Night Song of Swans (Hatrtyúk éji dala)*, poems (2003). His poems, prose, interviews and translations from the Czech and Slovakian languages are well known on the Hungarian program of the Czechoslovak Radio and in various newspapers and magazines like *Week (Hét)*; *Literary Review (Irodalmi Szemle)*; *Sun (Nap)*, *Woman (Nő)*. He was awarded the Imre Madách Prize (1971), the Posonium Prize (2003) and the Silver Plaque of the Slovak Government (2003). György Dées is an emblematic person of the 1956 Revolution. – B: 1083, 0878, 1890, T: 7456.

**Dénes, János** (John) (Budapest, 5 January 1930 - ) – Laborer, politician. His parents settled in Hungary from Transylvania after Northern Transylvania (returned to Hungary by the Second Vienna Award in 1941) was again ceded to Romania after World War II. His childhood was spent in Kőbánya, an eastern suburb of Budapest, where he completed his high school studies in 1948-1949. Thereafter, he started working as a laborer. Between 1950 and 1953 he was in the army. In October 1956, he took an active part in the Revolution. On 30 October he was elected President of the Workers' Council of his factory where he worked and was made delegate in the Central Workers' Council of Greater Budapest. After the occupying Soviet Army put down the Revolution on 4 November, he participated in the general freedom fight against the invading Soviet forces. He was one of the initiators of the general strike of 11-12 December 1956. He was arrested in 1957 and, after having been kept in custody for several months, was sentenced to 15 years imprisonment on 19 August 1958. He was a prisoner in Budapest, Vác and Sátoraljaújhely. He was released from prison as a result of an amnesty on 29 April 1963. He became a laborer again and took part in the work of the Democratic Opposition (DE). On 27 September 1987, he participated in the discussions at Lakitelek. He was the leading organizer of the demonstration, "For Transylvania", held on Heroes Square (*Hősök tere*) in Budapest on 27 June 1988. He is one of the founding members of the *Hungarian Democratic Forum (Magyar Demokrata Forum – MDF)* and, in 1990 he was elected Member of Parliament for the Democratic Forum. On his motion the Act of 1990/XXVIII came into force, which declared: "the Revolution and Freedom Fight of 23 October 1956" is a national day. After the 1990 "taxi-blockade", because of the powerlessness of the Government, he resigned from the MDF in protest and continued his political work as an independent. In 1994, he was not re-elected to Parliament; he is now living as a retiree, but is still active in public affairs; and since 2004, he has been writing his memoirs, entitled *His Majesty, the Hungarian Nation I (From Father to Son)*; *His*

*Majesty, the Hungarian Nation II (Against the Wind)*, and *Our Inheritance*, speeches in parliament. – B: 0874, 1952, T: 7456. → **Revolution and Freedom Fight of 1956.**

**Dénes, Mihály** (Michael) (Gödöllő, 7 July, 1894 - Berlin, 29 August, 1953) – Mechanical engineer. His secondary education was completed at the Mihály Vörösmarty High School, Budapest, then he studied at the Polytechnic of Budapest, where he received his Degree in Mechanical Engineering. From 1910 he worked at the Telephone Factory, Budapest, and was engaged in television experiments. On 7 June 1916, he produced a successful movie with a sound track. On 30 April 1918, he applied for a patent for a method called *Projectophon* for recording sound pictures. His method provided good quality sound tracks with 35 mm film stock, using optical sound recording and he can thus be regarded as the inventor of the sound film. His patent was published on 18 October 1922. He moved to Berlin in 1924 to work for AEG. His first practical piece of equipment, the *Telehor*, was introduced in 1928. On 8 March 1929, the Berlin-Witzleben Radio Station transmitted the first live television broadcast in the world, using his system. He established a television factory by the name of *Telehor AG*. Under Hitler's rule, he was sent to a concentration camp for hiding the persecuted. He died in 1953 of tuberculosis acquired in the concentration camp. He is listed among the world's leading scientists in the field of electronic image transmission. – B: 1279, 1031, T: 1279, 7103.

**Dénes, Tibor** (Nagyvárad now Oradea, Romania, 15 July 1907 - Lugano, Switzerland, 17 March 1983) – Writer, literary and theater historian. His higher studies were at the University of Pécs, where he obtained his Ph.D. in 1932. He was a contributor to the journals: *Sunrise (Napkelet)*, *Vigilia*, and the *Catholic Review*. After 1945, he taught at the Academy of Dramatic Art, Budapest. In 1951, he was arrested under false accusations and sentenced to prison. After regaining freedom he worked at the Theater of Kaposvár and Békéscsaba. In 1956, he left Hungary and settled in Geneva, later in Lugano, Switzerland where he was a librarian. His writings appeared at the *Literary Newspaper (Irodalmi Újság)*, *New Horizon (Új Látóhatár)*, *Hungarian Workshop (Magyar Műhely)*, and other Hungarian papers in the West. Beside his essays and studies he wrote books, including *Night (Éjszaka)* novel (1943); *The Stranger (Az idegen)* novel (1944); *Une pufit d'un portier d'Hotel*, short stories (1959); and *Agony (Agónia)*, novel (1971), *Our Friend Bunyák (Barátunk, Bunyák)*, novel (1977). – B: 0883, 1257, T: 7103

**Dénes, Valéria** (Budapest, 2 November 1877 - Pécs, 18 July 1915) – Painter. She studied painting in Budapest, Nagybánya (now Baia Mare, Romania) and Paris. With her husband, Sándor (Alexander) Galimberti, she joined the *avant-garde* trend. They were its first Hungarian representatives. Her death was untimely. Her works include *Still Life with Flowers (Virágcsendélet)* (1908-1910); *Sunflower (Napraforgó)* (1913) and *Street-detail (Utcarészlet)* (1913). – B: 0883, 0924, T: 7103.

**Dengezik** (? - 469) – Hun leader, second son of Attila. After the death of Attila in 453, his eldest son, Ellák, became his successor; but he fell fighting against the rebelling Goth and Gepid tribes at the Battle of Nadao. The same Germanic tribes pushed out his two younger brothers Dengezik and Csaba (Irnák). Dengezik fled to the East and became ruler of the remnants of the Hun Empire extending from the lower Danube to the Don rivers. He conducted campaigns against the Goths, Gepids, and the Byzantine Empire. In 467, he and his army were trapped by the East-Romans. He managed to escape but was not so lucky in 469. This time he was ambushed again, his army massacred and he was

killed. Soon after, the East-European Hun realm disappeared. However, the Hun people continued to live on in this region. – B: 0942, 1020, T: 7103. → **Attila; Csaba Prince, Legend of.**

**Denmark, Hungarians in** – Prior to 1960 there were approximately 1,250 Hungarians in Denmark, including Iceland. Denmark accepted about 2,000 Hungarian refugees after the crushed Revolution and Freedom Fight of 1956. Some 2 to 300 of them later emigrated to other countries, to be replaced by new arrivals from various parts of the Carpathian Basin, mainly from Transylvania (now Romania) during the final years of the Ceausescu dictatorship. In 1988, their number was estimated to be about 2,500. According to an informed estimate, in 2004, some 3,500-4,000 Hungarians lived in the country. Most of them live in the capital city, Copenhagen, but there are Hungarians in Aarhus, Esbjerg, Odense, Viborg, Aalborg and Horsens. Before 1990, there were two Hungarian organizations in Denmark: the *Hungarian Circle (Magyar Kör)* and the *Danish-Hungarian Film Club (Dán-Magyar Filmklub)* that merged with the *Hungarian-Danish Friends Society (Magyar-Dán Baráti Társaság)* after 1990. In 1989, a new society emerged, the *Danish-Hungarian/International Hamvas Club (Dán Magyar/Nemzetközi Hamvas Club)* for the propagation of Béla Hamvas' philosophy. They organize cultural events and applied art exhibitions, as well as dinners. Their newspaper is the *Island (Sziget)*, which appears twice a year. In 1998, the *National Alliance of Hungarians in Denmark (Dániai Magyarok Országos Szövetsége – DMOSZ)* was formed, with three organizations: *Duna Danish Hungarian Cultural Society (Duna Dán Magyar Kulturális Egyesület)*, *Béla Bartók Club*, and the *Kocsos Dance Ensemble (Kocsos táncegyüttes)*. There is a Hungarian local radio program that broadcasts biweekly. Being a small community, these Hungarians are well informed of their fellow compatriots who have achieved notable successes in Denmark, such as violinist, Antal (Anthony) Kontra, painter, Ilona (Helena) Ósz, TV director, Gergely (Gregory) Szabó and conductor, Tamás (Thomas) Vető. – B: 1104, 1364, 1382, T: 3240, 7103. → **Hamvas, Béla; Bartók, Béla.**

**Dentumoger** – Anonymus, 12th century chronicler in his work *Gesta Hungarorum* called the original home of the Hungarians *Dentumoger*. He also applied the same name to the Hungarians themselves: “*Gens Hungarorum... de gente Scithica, que per idioma suum proprium Dentumoger dicitur duxit originem*”. Anonymus describes the route that leads from Dentumoger to the Carpathian Basin as follows: the River Volga, Susdal, Kiev, Vladimir and Galicia. He did not mention any migration towards the Kuban-region or the Black Sea. Quite plainly Anonymus makes the Hungarians come directly from the territory that later authors call *Magna Hungaria* or *Bascardia*. However, he did not describe the location of Dentumoger. Anonymus also mentioned that it was a tribe, and its leader gave his daughter Emese to the head of the Ugors. From their marriage was born Prince Álmos, the father of Khagan (Reigning Prince) Árpád. – B: 1478, 1133, T: 1478, 7103. → **Anonymus; Scythians; Emese; Álmos; Árpád.**

**Deportations** – The removal by force into concentration camps, restricted areas or abroad of people or groups the state considers undesirable, either for security or political reasons. This was a frequently used form of punishment in the ancient world by Assyrians, Babylonians, or by Rome.

(1) This has been used in modern times to remove dangerous criminals or political opponents to remote areas. In modern times, the British in South Africa built the first

concentration camps during the Boer war in 1902. Here Boer women and children were confined and died by thousands as a result of starvation and diseases.

(2) Before World War II, concentration camps were constructed by the National Socialists in Germany for political opponents. During the War, Jews were sent there first from Germany, later from the occupied countries in Europe, together with foreign political adversaries, Slavs, Gypsies, priests and prisoners of war. Special camps were designated for the mass destruction of unwanted elements. On 19 March 1944, German troops occupied Hungary and the persecution of Hungarian Jews started. Until this date, the Jews were not persecuted in Hungary, although they were somewhat restricted by the so-called Jewish laws. In the presence of Nazi occupying forces, at the direct request of German Chancellor, Adolf Hitler, a new Hungarian Government was appointed. After the arrival of SS Obergruppenführer Adolf Eichman, ghettos were set up for the Jews, and their deportation to death-camps in German territories started on 15 May 1944. The Minister of the Interior of the new pro-German Government was Andor Jaross and his two deputy ministers, responsible for deportations, were László (Ladislav) Baky and László Endre. The Royal Hungarian Gendarmerie (*Magyar Királyi Csendőrség*), was under the jurisdiction of the Minister of the Interior who, through his deputy ministers, directed some gendarmerie contingents to support Eichman in the deportation of the Jews. This began with the collection of Jews living in the countryside. When the Allied Powers opened the western front against Germany on 6 June 1944, most of the German troops were withdrawn from Hungary. Regent Miklós (Nicholas) Horthy then dismissed Jaross and his deputies, the accomplices of Eichmann, on 7 August 1944, and appointed Miklós Bonczos to be the new Minister of Interior. Bonczos immediately ordered the gendarmerie to cease giving any assistance to Eichmann; and from this time on, the gendarmerie took no part in the deportations. With this step, they saved the Jews of Budapest and those Jews who had fled there from the neighboring countries under Hitler's control. Horthy also ordered the Panzer Unit, under the command of Ferenc (Francis) Koszorús, to move from the Esztergom camp for the protection of the Jewish Getto in Budapest. Though only some of the gendarmerie units participated in the co-operation with Eichmann's commandos, Mátyás (Mathew) Rákosi, Hungary's Communist dictator took severe revenge against them through the so-called people's courts. The chief Ashkenazim rabbi of Jerusalem, who visited Budapest in 1944, issued the following statement: "*You should be glad that in East Central Europe the Hungarian Jews escaped destruction in the largest number*". Thus in Slovakia the "55 Commandos" and Tiso, the head of state; in Romania, Prime Minister Antonescu, and in Croatia, the national leader Ante Pavelic, all co-operated in the almost total destruction of the Jews, either by deportation or local executions. In 1939, 403,000 Jews lived in Hungary. Their number swelled to 700,000 during the war years by Jewish refugees from other countries, because Hungary was regarded as a relatively safe place for survival – until the Nazi occupation. At the end of the War, the number of Jews in Hungary was 280,000, including 200,000 Jews of Budapest. Civilians, church organizations, priests, pastors and neutral countries' embassies sheltered many of them.

(3) During World War II, countries on the opposite side of the war also took counter-measures against unreliable elements. For example, people with Japanese origin were sent to concentration areas in the USA and Canada. The Soviets deported a large number of people, such as Tartars, Chechens and Volga Germans to the remote eastern territories.

(4) After World War II, there were large-scale deportations or removal of various ethnic groups, though most of those involved were Germans. About 13 million Germans were forcibly deported to Germany from Czechoslovakia and Poland, and about 200,000 from Hungary. Officially there were no deportations in Romania; but many Hungarians left Northern Transylvania before and after Romanian occupation. In Yugoslavia, some 40-50 thousand ethnic Hungarians were massacred by Tito's partisans in former Southern Hungary (*Délvidék*) in the fall of 1944 and the spring of 1945. In these regions the number of ethnic minorities declined considerably after World War II. The ominous "Beneš Decrees", announced by president Beneš, on 5 April 1945 in Czechoslovakia, declared all Germans and Hungarians "collective war criminals" in the so called "Košice Program". The Czechoslovak Government intended to deport the 700,000-strong Hungarian ethnic minority from Czechoslovakia, mainly from southern Slovakia, from their ancestral homeland, the same way as they removed 3.3 million Sudeten Germans; but Allied Powers rejected this policy against Hungarians. After all, Hungary did not wage war against that country. Instead, the so-called "population exchange agreement" was signed on 13 July 1947 between Czechoslovakia and Hungary at Pöstyén (*Pieštany*). They managed to expel altogether about 120,000 ethnic Hungarians from southern Slovakia to Hungary, including 57,109, who were forcibly relocated, and 50,000 were transported to the Sudetenland for forced labor on the abandoned German farms. In the population exchange program only 37,696 Slovaks moved voluntarily from Hungary to Slovakia. However, population exchange soon came to a halt, because there were not enough Slovakian volunteers in Hungary for this repatriation program. Hungarians left in Slovakia 15,700 houses, the Slovaks left in Hungary 4,400 houses. The left behind lands' ratio was 10:1 in favor of Slovakia. From Carpatho-Ukraine, annexed to the Soviet Union after World War II, more than 40,000 Hungarian civilians – men and women – were taken to the Soviet Union to forced labor. After Hungary was occupied by the Soviet Army in 1945, of the some 800,000 civilians taken to forced labor in the Soviet Union, only a fragment returned.

(5) After the nationalization of the entire school system, including denominational schools by the Communist regime of Hungary, the arrest and internal deportation of monks and nuns started in 1950. At that time there were 23 male monastic orders with 2,582 monks, and 40 nunneries with 8,956 nuns, altogether 63 monastic orders with 11,538 members. The arrest and deportation of monks had taken place in two phases. The first was carried out on the nights of 7 and 9 June 1950, when 3,200 monks and 600-700 nuns were deported from the Yugoslav border area and from the surroundings of Szentgotthárd, near the western border. The second deportation took place on the night of 18 June. This time 2,000 monks and nuns were deported from Budapest to the countryside. The deportees were relocated to existing ecclesiastical buildings in Central Hungary where they were under virtual house arrest and were not allowed to leave their mandatory residences.

(6) In Communist-ruled Hungary, internal deportations of "class-alien" citizens into remote internment areas began on the night of 20-21 June 1951. This action was preceded by an announcement of the Ministry of the Interior on 17 June 1951, regarding the deportation of the members of the "former exploiting and ruling classes" from Budapest. The first night, the tarpaulin-covered trucks stopped at about 1,000 addresses, delivering an order to the head of families, instructing them to be ready to leave within 24 hours. In

later days the deportees were not given even 24 hours; they had to get dressed and go to the waiting trucks while being harassed by machine-gun toting secret policemen of the ÁVH (*Államvédelmi Hivatal*, the State Defense Authority, Secret Police). The order to leave always came at night. It was during those months that the so-called “bell-fright” took hold of the population of Budapest because everybody was frightened that their own doorbell might ring the next night. The deportation orders specified 500 kg of luggage for the head of families, and 250 kg for each family member; but the trucks down the street only accepted 30 kg per person. Their apartments were expropriated for “community purposes”. Though officially the deportation order applied only to residents of Budapest, the policy in fact affected several larger cities in the country. Altogether some 10,000 Hungarians, including families with women, children, and even grandparents, suffered deportation to forced internment camps. Their properties, including houses, lands, animals and tools were confiscated. They were deported in closed box cars to the eastern part of the country: east of the River Tisza (*Tiszántúl*, *Trans-Tisza region including the Hortobágy*) to work on collective or state farms for 12-14 hours daily for only 10% of the wages prescribed for the type of work. Their accommodation was in empty stables, granaries, warehouses and sometimes in tents. Some of them were housed on private farms but were not much better off. Armed police, who made no exceptions for the sick, the women, children or the elderly, took the interned to work. Because of overwork, poor nutrition, lack of medical care, the cold and the uncertain future, many died or committed suicide. On 26 July 1953, the Council of Ministers, in its order of 1034/1953, ended the deportations and the internments. The survivors were released in August and September. According to official statements, these deportations, conducted without trial or court order, affected about 30,000 “undesirable elements of the exploiting classes” but an objective estimate puts the figure closer to 100,000. – B: 1230, 1231, 1020, 7103, T: 7665. → **Hitler, Adolf; Jaross, Andor; Horthy, Miklós; Koszorús, Ferenc; Gendarmerie, Royal Hungarian; Rákosi, Mátyás; Benes Decrees; Atrocities against Hungarians; Farmer of Larger Lands; Forced Labor Service; Jews in Hungary; State Security Police.**

**Dér, Endre** (Andrew) (Békéscsaba, 7 July 1922 – Szeged ?, 21 May 1204) – Writer, journalist, Lutheran theologian, pastor. His higher studies were at the Lutheran Theological Academy of Sopron (1941-1945) and at the Teachers College, Szeged, where he obtained a diploma in Hungarian Literature in 1946. Between 1945 and 1950, he served as a Lutheran Pastor and worked for the *Hungarian Youth Democratic Alliance* (*Magyar Demokratikus Ifjúsági Szövetség – MADISZ*). From 1953 to 1963, he was a librarian at the University of Szeged, and Secretary of the Writers Alliance, Szeged. In the meantime, he edited the gazette *University of Szeged* (*Szegedi Egyetem*). He was a contributor and columnist for the literary review, *Tisza-region* (*Tiszatáj*) (1965-1970), and Chief Contributor to the literary periodical, *New Aurora* (*Új Aurora*) (1981-1983). From 1983 on, he was a free-lance writer and translator from Czech and Slovak literature. His works include *The First Trial* (*Az első próba*) novel (1955); *Marika*, play (1960); *Tornado*, novel (1989); *Danger Zone* (*Veszélyzóna*) novel (1993), and *Flourishing Years* (*Viruló évek*) memoirs (2000). He is recipient of a number of prizes, including the Attila József Prize (1956), the Prize of the City of Szeged (1972), and the Commemorative Medal of Szeged (1997). – B: 0874, 0878, 1257, T: 7103.

**Déri, Miksa** (Max) (Bács, 26 November 1854 - Merano, Italy, 3 March 1938) –

Mechanical engineer, inventor. He was an engineer at Ganz and Partner Electrical Works, Austria, later on, its Director. As the associate of Károly (Charles) Zipernowszky, he solved the parallel connection of transformers. As an associate of Otto Titusz Bláthy, he constructed a compounded synchronized machine of self-induction, and also worked out an electric motor, bearing his name. Among his numerous inventions particularly noted was an improved version of the structure of direct current turbo dynamos. He was one of the outstanding Hungarian pioneers of electrical engineering. – B: 0878, 0883, 1230, T: 7456.→**Zipernowszky, Károly; Bláthy, Ottó Titusz.**

**Déri Motor** – A special type electric motor with double-brush system of single-phase current with repulsing commutator, invented by Miksa (Max) Déri in 1903-1904. It is known by his name worldwide. – B: 1138, T: 7456.→**Déri, Miksa.**

**Derkovits, Gyula** (Julius) (Szombathely, 13 April, 1894 - Budapest, 18 June, 1934) – Painter, graphic artist. He learnt cabinetmaking in his father's workshop. Early in his life, he began drawing; later a sign-painter taught him how to paint. As a result of serving in World War I, his left arm became paralyzed. From 1916 he lived in Budapest. In 1917 his drawings were exhibited in the editorial office of the journal *Today (Ma)*. In Károly Kernstok's free school he mastered the art of painting and copper engraving. Between 1916 and 1918, he produced mainly pencil and tint drawings. The exhibition of his collected works was in Belvedere in 1922, which concluded his first phase as an artist. Between 1923 and 1926, while he lived in Vienna, he became acquainted with the leftist émigrés, and joined the Austrian Communist Party. During this phase in his career the influence of the German expressionist painters can be felt. In 1925 he exhibited his painting *Fugitives (Menekülők)*; in 1927 he organized an exhibition in the Ernst Museum, Budapest. In 1928-1929, he intensively took part in the illegal activities of the Communist Party, his flat serving as a meeting place. His most important graphic work was finished at this time: a series of wood engravings, e.g. "1514", inspired by Dózsa's Peasant Revolt. In 1931, he turned his Dózsa engravings into copper engraving. The final phase of his art is represented in the works: *Orders (Végzés)* (1930); *Sleeper (Alvó)* (1932); *Execution (Kivégzés)* (1932); *By the Railroads (Vasút mentén)* (1932), and *Mother (Anyá)* (1934). His satirical tintdrawing of 1930 was a criticism of the bourgeois society. In his last years, he created a quite individual method of expression by combining a strict composition with lyric scenes and inspired portrayal. Privation and illness contributed to his early death at the age 40. Memorial exhibitions of his works were organized in the Ernst Museum in 1934, in the Metropolitan Gallery in 1928, and in the Museum of Fine Arts, Budapest, in 1954. His works were also shown in Venice and Amsterdam. He was awarded the Kossuth Prize posthumously in 1948. – B: 0883, 0934, T: 7456.→**Kernstok, Károly; Dózsa, György.**

**Déryné** (Mrs. Déry) (Róza Széppataki) (Rose) (Schenbach-Schekenbach) (Jászberény, 24 December 1793 - Miskolc, 29 September 1872) – Actress. She was Hungary's first opera singer and the most beloved artist of the vaudeville period. She learned acting from Mrs. Murányi, and singing from Gáspár Pacha. While studying German in Budapest she met several Hungarian actors. In 1810 she received a contract at the second Hungarian theater company playing in the Hacker Hotel. In 1813 she married her acting colleague István (Stephen) Déry, whom she divorced soon after. After the dissolution of the company in Pest in 1815, she performed in the cities of Eger and Miskolc as a member of the

Transdanubian theater company of Dávid Kilényi. She also went to Pozsony (now

Bratislava, Slovakia) and Komárom with him. In 1821 she received a contract in Kolozsvár (now Cluj-Napoca, Romania) and as a guest artist, where she was a great success. She was also a success in Pest. In 1823 she again went to Kolozsvár, where the establishment and subsequent flourishing of the Opera of Kolozsvár is connected with her name. During 1828-1837 she enjoyed the golden age of her popularity at Kassa (now Košice, Slovakia). In 1837 she received a contract from the National Theater of Pest; but the critics declared her acting old fashioned and overly sweet. Depressed, she returned to the countryside and performed in Kassa, Kolozsvár and Debrecen, as well as in smaller Transylvanian cities. Her

earlier popularity had greatly diminished. She returned to Pest and accepted less important roles at the National Theater. In 1847 she left the stage and retired to her sister in Miskolc. In 1868 she once more appeared on stage. Then she wrote her memoir that is still the most important source material of early Hungarian acting. As all actors of the age, she performed in every role. She won her greatest successes as a soubrette singer. Her famous roles were Marcsa in Hirschfeld-Lang's *Fairy Castle in the Hungarian Motherland* (*Tündérvár Magyarhonban*); Pamina in Mozart's *Magic Flute*, Amenaïda in Rossini's *Tancredi* and Rosina in Rossini's *Barber of Seville*. Her charming personality often inspired Hungarian writers and artists. Ferenc (Francis) Herczeg wrote a drama about her entitled *Darling Young Lady* (*Drága Ifjasszony*); Imre (Emeric) Balassa wrote a romantic biography: *Life of an Actress of Old* (*Egy régi színésznő élete*). Her life story was also made into a film in 1951. Her best-known portrait depicts her in *Our Country's Artist* (*Honművész*) as Liszli in the *Little Rose of the Alps* (*Alpesi rózsácska*). Miklós (Nicholas) Ligeti's sculpture of her was destroyed during the siege of Budapest in World War II. – B: 0872, 0883, 1445, T: 7684. → **Herczeg, Ferenc; Ligeti, Miklós; Staud, Géza.**

**Déry, Tibor** (pen-name Tibor Dániel) (Budapest, 18 October 1894 - Budapest, 18 August 1977) – Writer, literary translator. After completing his studies at the Academy of Commerce, Budapest, he served as a clerk until 1918. He wrote short novels and poems, became member of the Communist Party, and in 1919 he became a member of the Writers' Directorate. He lived in Czechoslovakia, Austria, Germany and France, and finally returned to Hungary in 1926, to become one of the editors of the journal *Document* (*Dokumentum*). He then returned to Vienna. After returning again to Hungary, he earned his living from literary translations. After World War II, he rejoined the Communist Party and became a board member of the Hungarian Writers Association. In July 1956, Déry openly criticized the Communist Party leadership and was ousted from the Party. As he was member of the Revolutionary Committee of the Writers Association during the Revolution of 1956, he was sentenced to nine years in prison, but was granted amnesty in 1962. His writings include *Unfinished Judgment* (*Befejezetlen ítélet*) novel

(1947); *Answer*, vols. i-ii (*Felelet, I, II*) novels (1950-1952); *Mr. A.G. in X* (*G.A. úr X-ben*), a critical novel about the Communist society (1964), and *There is no Judgement* (*Itélet nincs*), autobiographic novel (1968). His short writings were edited and published by Ferenc (Francis) Botka. He received a number of prizes, including the Baumgarten Prize (1947) and the Kossuth Prize (1948). – B: 0881, 0878, 0874, 0877 1257, T: 7103.

**Dés, László** (Ladislas) (Budapest, 9 January 1954 - ) – Jazz-musician, composer. His musical studies were at the Zoltán Kodály music school, Budapest (1960-1968), piano studies (1963-1971), then clarinet studies at the Béla Bartók Music Conservatory (1971-1973). Finally he studied the saxophone at the Ferenc Liszt Academy of Music (1973-1976). He has been active in musical life since 1974. In 1979 he formed his own ensemble, named *Dimenzió*, performed in Hungary and abroad for nine years, and produced records including *Dimenzió I* (1980), *Dimenzio II* (1987). In 1987, he formed the *Trio Stendhalt* with Ferenc Snétberger and Kornél Horváth, achieving great popularity all over the world by performing in concerts and making records, such as *Trio Stendhal I* (1989) and *The Bests of Stendhal* (1988). He is also well known as a soloist, played pop-music as well, and composed music, such as film-music pieces, musicals, songs and pop-music. His film-music pieces include *Pirates* (*Kalózok*), *Glass-tiger* (*Üvegtigris*) and the *Book of the Jungle* (*Dzsungel könyve*). From 1993 he worked as an instrumental soloist (soprano saxophone), performing contemporary music with orchestras. In 2003, he formed a new ensemble and toured across the county with their album entitled *Street-music* (*Utcazene*). His latest production is the *Contemporary Gregorian* ensemble. László Dés is appreciated both by his audiences and critics. As a soloist he has received a number of awards and prizes at jazz-festivals from San Sebastian to Karlovy Vary, including the Best Soloist Prize (1976, 1985, 1986), the Critics' Prize (1981), the Ferenc Liszt Prize (1991), the Golden Giraffe Prize (2001), and the Kossuth Prize (2007). – B: 0878, 1649, T: 7103.

**Desericzky, József Ince** (Ince Desericidius) (Alsódiós, 25 March 1702 - Vác, 16 November 1763) – Historian. As a Piarist monk he taught at Győr, later was sent to the Piarist monastery in Rome. Here, after long contemplation he wrote his five-volume study on the origin and ancestors of the Hungarians (*De initiis ac maioribus Hungarorum commentaria*) (Buda and Pest, 1748-1760). György (George) Pray strongly criticized his work and this resulted in a sharp controversy between the two monks. Pope Benedict XIV used his knowledge and sent him to a diplomatic mission to Bucharest, but the Patriarch thwarted it. On his return to Hungary he became the Abbot of the Piarist monastery of Vác. Here, he wrote the history of the Bishopric of Vác. – B: 0883, 0945, T: 3240. → **Pray, György**.

**Dessewffy, Count Arisztid** (Csákány, ? June 1802 - Arad, 6 October 1849) – General of the National Defense Force of the 1848-1849 War of Independence against Austria, and one of the thirteen martyred generals executed by the Austrians on 6 October 1849 at Fort Arad. His family belonged to the modestly wealthy nobility. He served until 1839 in the Imperial Army as a captain until his retirement. In 1848, he reported for service in the new Hungarian National Defense Army, formed under the banner of County Sáros. Soon he was promoted to lieutenant-colonel, then to colonel. In 1849, he defeated the Austrian contingent of Colonel Colloredo at Kompolc. Dessewffy's regiment had the lion's share in the victory of the Battle of Tarcal. He was promoted to general on 1 June 1849. After

the loss of the Battle of Temesvár, he intended to lead his contingent at Orsova across the River Danube to Turkey but, at Karánsebes, the Imperial general promised him immunity if he would surrender and, on this promise, his corps laid down their arms on 19 August 1849. The Austrian General Haynau sentenced him to death by hanging but, by clemency, he was allowed to die by facing the firing squad. Streets bear his name. – B: 0883, 1075, T: 3233.→**Freedom Figh of 1948-1849; Haynau, Baron Julius Freiherr von; Arad, Martyrs of.**

**Detre, László (1)** (Ladislav) (Nagysurány, 19 October 1874 - New York, NY, USA, 7 May 1939) – Immunologist. He received his Medical Degree in 1905 from the Medical School of the University of Budapest. First, he worked as an anatomist in Budapest, thereafter he worked in Vienna, and at the Pasteur Institute, Paris. Upon his return to Budapest, he became the Head of the Jenner-Pasteur Laboratory. In 1919 he founded his own serum-producing institute and was its president. When it was amalgamated into the Philaxia Serum Ltd in 1933, he emigrated to the United States. Here he taught at the Medical School of the University of Georgetown, later he worked as Department Head at the National Health Institute. His field of research was immunology. Among his discoveries are the so-called antigen-theory and leukotoxin-theory. He also worked out a differentiating method between human and bovine tuberculosis. He wrote the first Hungarian monograph on the doctrine of practical immunity. – B: 0883, 1496, T: 7103.

**Detre, László (2)** (Ladislav) (Szombathely, 10 April 1906 - Budapest, 15 October 1974) – Astronomer. He graduated from the University of Budapest. From 1929 he was an assistant at the Institute of Astronomy of Svábhegy, Budapest, and later became director of the same Institute, renamed as the Astronomical Research Institute of the Hungarian Academy of Sciences. From the early 1930s' he studied the RR Lyrae-type short-period, inconstant stars, collected invaluable observational material of their period changes and arrived at fundamental conclusions. He was President of the Inconstant Star's Committee of the International Astronomical Union from 1970 to 1973. In the early 1970s' he proved that one period of the RR Lyrae type stars corresponds to the sun's magnetic cycle. Observation of the inconstant stars is still one of the chief areas of research of the Institute in Budapest, as well as of the Observatory of Piszkestető. He worked as a university professor from 1964 on, and published numerous scientific papers and studies. A prize bears his name. – B: 0883, 1031, T: 7674.→**Astronomy in Hungary.**

**Detsi Codex** – A Codex written between 1609 and 1613 in the village of Decs, County of Tolna by István (Stephen) Detsi, preacher and songwriter. Some of the 45 songs are 16th century religious songs, otherwise the Codex contains quite a number of historical songs; some of them known only from this work. Its content of historical song material, covering the beginning of the 17th century, is considered significant. – B: 0883, 1257, T: 3240.→**Detsi, István; Codex Literature.**

**Detsi, István** (Stephen) (? - 1613) – Preacher and songwriter. He was a teacher and a preacher in different Transdanubian (*Dunántúl*) villages, including Decs. He probably wrote here the Detsi-Codex, originating between 1609 and 1613. His two songs were included in it, while three of his hymns are in the Szentés Hymnbook. – B: 1050, 1257, T: 3240.→**Detsi Codex.**

**Déva, Csángós of** – The Szeklers of Bukovina settled in the County of Hunyad and became known as Csángós. Between 1888 and 1892 about 2,000 of them moved from

Bukovina to Déva (now Deva, Romania), in 1892 to Vajdahunyad (now Hunedoara), in 1910 to Déva again, and to Csernakeresztúr (now Cristur, Romania), and Sztrigyszentgyörgy (now Streisangeorgiu, Romania). The newcomers formed their distinct *Csángó* settlements beside these towns. For a long time, they farmed their land, and later became workers at the industrial sites of Vajdahunyad. Their long isolation enabled them to retain the ancient characteristics of their folk culture and language. The area is in Romania since 1920. – B: 1134, T: 3240.→**Csángó.**

**Dévai Bíró, Mátyás** (Matthias) (ca 1500 - 1545) – Lutheran reformer. He studied at Krakow (1523-1525) and Wittenberg (1529-1531). From 1527 he was a chaplain of the Boldogkő Castle. During his stay in Wittenberg, he was a guest of Martin Luther and Philip Melancton, and became a member of their table society. On his return to Hungary, he worked in Buda, then in Kassa (now Košice, Slovakia). Due to his reformer doctrines, he was imprisoned for several years at Likava, Pozsony (now Bratislava, Slovakia), Vienna and Buda; in 1533, Johannes Faber, Bishop of Vienna, received him for questioning. From 1535, he worked under the auspices of Tamás (Thomas) Nádasdy in Sárvár. After another trip to Germany, he returned to Sárvár, where János (John) Sylvester was his partner. From 1539, he was Court chaplain of Péter Perényi; and from 1540, he was a schoolmaster at Szikszó; from 1541 to 1543, he again stayed in Wittenberg, where he acted as Melancton's mediator regarding the Lord's Supper. He took part in Lord Supper disputes several times in Hungary. The reformers of Wittenberg always defended him. He was probably the author of the doctrines laid down by the Council of Erdőd of 1545 but, due to his death, he was unable to sign it. Already his contemporaries called him the "Hungarian Luther". His main works include his 52 reformer's theses (polemics in Latin). In his paper on the sleeping saints he stated that "*the saints cannot be asked for help, as they live only with respect to God but regarding us they are asleep*"; he wrote his primer, *Orthographia Ungarica* and his "Catechism" (1538). – B: 0883, 1050, 1257, T: 7456.→**Evangelical Lutheran Church in Hungary; Sylvester, János; Abádi, Benedek; Nádasdy, Baron Tamás; Perényi, Péter.**
